FOR IMMEDIATE RELEASE

**FLUSHING FINANCIAL CORPORATION REPORTS
25 PERCENT INCREASE IN FIRST QUARTER EARNINGS PER SHARE**

FLUSHING, NY April 15, 2003 Flushing Financial Corporation (Nasdaq: FFIC), the parent holding company for Flushing Savings Bank, FSB (the "Bank"), today announced its results for the three months ended March 31, 2003.

Michael J. Hegarty, President and Chief Executive Officer, stated: "Flushing completed another strong quarter, achieving record earnings per share and solid growth in the first quarter of 2003, as we continued to execute on the strategic initiatives that proved successful in 2002. We are very pleased to report a 25 percent increase in our earnings per share for the first quarter of 2003 to a record \$0.45 per diluted share from \$0.36 per diluted share in the comparable quarter a year ago. Net income for the first quarter of 2003 increased 17 percent to \$5.3 million from the \$4.5 million earned in the comparable quarter a year ago. Return on average equity and return on average assets each increased significantly to 16.1 percent and 1.3 percent, respectively.

"Focusing our origination efforts on higher yielding mortgage loan products, we realized growth in the higher yielding one-to-four family mixed-use residential real estate loans, which increased \$9.2 million, and multi-family real estate loans, which increased \$22.9 million. In line with our strategic initiatives, lower yielding conventional one-to-four family residential real estate loans declined \$18.7 million during the quarter as mortgagors continued to refinance and we did not actively pursue this refinance market. In total, the loan portfolio grew \$14.7 million during the quarter.

"Mortgage-backed securities and other securities increased \$80.2 million and \$20.2 million, respectively, during the first quarter. Funds not used for loan originations during the quarter were invested in marketable mortgage-backed securities and shorter-term investment securities to provide readily available funding for future loan originations. At March 31, 2003, loans in process totaled \$161.4 million.

"We have continued to attract new deposits, resulting in an increase of \$65.1 million in the first quarter of 2003. Lower costing core deposits increased \$50.6 million while certificates of deposits increased \$14.5 million. This has allowed us to fund our asset growth without relying on borrowings.

"The result of this growth was an increase of \$1.8 million in net interest income, as the net interest margin increased to 3.60 percent for the first quarter of 2003, an increase of 5 basis points from the fourth quarter of 2002, and an increase of 11 basis points from the first quarter of 2002. The increase in the net interest margin was primarily driven by a lower cost of funds.

"While the net interest margin for the first quarter of 2003 reflects an increase from the fourth quarter of 2002, as the quarter progressed, we began to see a decrease in the net interest margin on a month-to-month basis. This is partially due to the interest rates we are able to obtain on new loans being less than the interest rates on loans which have been satisfied. We have been able to offset the effect of the reduced yields on new loans by continuing to grow the balance sheet, and funding this growth with deposits.

more

Flushing Financial Corporation

April 15, 2003

Page Two

"Our capital position enabled us to increase our asset size, continue our stock repurchase program, and focus on other shareholder value initiatives. During the first quarter of 2003, we increased our quarterly dividend 11 percent to \$0.10 per common share - an indicated yearly rate of \$0.40 per common share.

"We remain committed to a path of structured and orderly growth in 2003, focusing on the key initiatives of our strategic plan. This includes continued expansion of the financial services we offer to our customers and continued focus on the origination of higher yielding one-to-four family mixed-use residential real estate loans, multi-family real estate loans, and commercial real estate loans. At the same time, we will continue our increased focus on fee-based products.

"Above all, we continue to strive to optimize our shareholders' return on their investment."

Earnings Summary Three Months Ended March 31, 2003

Net interest income for the three months ended March 31, 2003 increased \$1.8 million, or 14.7 percent, to \$14.2 million from \$12.4 million for the three months ended March 31, 2002. This increase in net interest income is primarily due to a \$158.7 million increase in the average balance of interest-earning assets, combined with a 17 basis point increase in the net interest spread. The yield on interest-earning assets declined 40 basis points to 6.94 percent for the three months ended March 31, 2003 from 7.34 percent in the three months ended March 31, 2002, while the cost of funds declined 57 basis points to 3.53 percent for the three months ended March 31, 2003 from 4.10 percent for the three months ended March 31, 2002. These decreases were primarily due to the declining interest rate environment experienced during the past two years. The yield on interest-earning assets declined less than the cost of interest-bearing liabilities due to a \$98.5 million increase in the average balance of the higher-yielding mortgage loan portfolio.

Non-interest income during the three months ended March 31, 2003 increased \$0.2 million, or 15.8 percent, to \$1.6 million for the three months ended March 31, 2003 from \$1.4 million for the first quarter of 2002. This increase is attributed to increased fee income from loan fees and banking services.

Non-interest expense was \$7.2 million for the three months ended March 31, 2003, an increase of \$0.7 million, or 11.5 percent, from \$6.5 million for the three months ended March 31, 2002. The increase from the prior year period is attributable to the Bank's continued focus on expanding its current product offerings to enhance its ability to serve its customers. Management continues to monitor expenditures resulting in an improvement in the efficiency ratio to 45.7 percent for the three months ended March 31, 2003 from 47.1 percent for the three months ended March 31, 2002.

Primarily as a result of the increase in net interest income, net income for the three months ended March 31, 2003 increased 16.8 percent to \$5.3 million from \$4.5 million for the three months ended March 31, 2002. Diluted earnings per share increased 25.0 percent to \$0.45 per share for the three months ended March 31, 2003 from \$0.36 per share for the three months ended March 31, 2002.

Return on average equity was 16.1 percent for the three months ended March 31, 2003 compared to 15.4 percent for the three months ended December 31, 2002 and 13.8 percent for the three months ended March 31, 2002. Return on average assets was 1.3 percent for the three months ended March 31, 2003 compared to 1.2 percent for each of the three-month periods ended December 31, 2002 and March 31, 2002.

Balance Sheet Summary

At March 31, 2003, total assets were \$1,737.3 million, an increase of \$84.3 million from December 31, 2002. During the first three months of 2003, loan originations and purchases were \$42.3 million for multi-family real estate loans, \$19.6 million for commercial real estate loans, \$15.5 million for mixed-use property one-to-four family residential real estate loans, \$9.8 million for conventional one-to-four family residential real estate loans, and \$3.7 million in construction loans. For the first three months of 2002, loan originations and purchases were \$37.9 million for multi-family real estate loans, \$15.4 million for commercial real estate loans, \$17.3 million for mixed-use property one-to-four family residential real estate loans, \$5.9 million for conventional one-to-four family residential real estate loans, and \$4.1 million in construction loans. Total loans increased \$14.7 million during the three months ended March 31, 2003 to \$1,184.3 million from \$1,169.6 million at December 31, 2002.

As the Company continues to increase its loan portfolio, management continues to adhere to the Bank's strict underwriting standards. As a result, the Company has been able to minimize charge-offs of losses from impaired loans and maintain asset quality. Non-performing assets were \$2.0 million at March 31, 2003 compared to \$4.3 million at December 31, 2002 and \$2.1 million at March 31, 2002. Total non-performing assets as a percentage of total assets were 0.1 percent at March 31, 2003, 0.3 percent at December 31, 2002, and 0.1 percent at March 31, 2002. The ratio of allowance for loan losses to total non-performing loans was 501 percent at March 31, 2003 compared to 183 percent at December 31, 2002 and 327 percent at March 31, 2002.

Mortgage-backed securities increased \$80.2 million to \$399.5 million at March 31, 2003, while other securities increased \$20.2 million to \$59.9 million at March 31, 2003. Funds not used during the quarter for loan originations have been invested in readily marketable mortgage-backed securities and shorter-term investment securities to provide readily available funding for future loan originations. Other securities primarily consists of securities issued by government agencies and mutual or bond funds that invest in government and government agency securities. At March 31, 2003, loans in process totaled \$161.4 million.

Total liabilities increased \$80.1 million to \$1,601.7 million at March 31, 2003 from \$1,521.6 million at December 31, 2002. Due to depositors increased \$65.1 million as certificate of deposit accounts increased \$14.5 million while lower costing core deposits, primarily money market deposit accounts, increased \$50.6 million. Borrowed funds were \$493.2 million at March 31, 2003, the same as December 31, 2002.

Total stockholders' equity increased \$4.2 million to \$135.6 million at March 31, 2003 from \$131.4 million at December 31, 2002. The \$5.3 million in net income for the three months ended March 31, 2003 was partially offset by \$1.1 million in cash dividends paid during the three-month period. Book value per share was \$10.76 at March 31, 2003 compared to \$10.43 per share at December 31, 2002 and \$9.90 per share at March 31, 2002.

Under its stock repurchase programs, the Company repurchased 42,700 shares during the three months ended March 31, 2003, at a total cost of \$0.7 million, or an average of \$17.43 per share. At March 31, 2003, 587,300 shares remain to be repurchased under the current stock repurchase program. Through March 31, 2003, the Company had repurchased approximately 42 percent of the common shares issued in connection with the Company's initial public offering at a cost of \$93.7 million.
