The Mexico Fund, Inc.

First Quarter Report

January 31, 2003

Highlights

- The first quarter of the Fund's fiscal year 2003 ended January 31, 2003.
- After a year of recession, the Mexican economy began to show signs of recovery, as gross domestic product (GDP) increased 0.9% during 2002.
- During this fiscal quarter, the most important factor that affected the performance of international stock markets, including the Mexican Bolsa, was the uncertainty created by the potential war in Iraq.
- The Fund's market price per share decreased 13.8% during this quarter, while the Fund's net asset value (NAV) per share fell 8.3%.
- At January 31, 2003, the discount between the Fund's market price and NAV per share was 12.8%.
- Similar to the performance of the US dollar, the Mexican peso has weakened and shown some volatility and the Central Bank continues to implement a restrictive monetary policy to allow inflation to remain under control.
- The Fund conducted its third in-kind repurchase offer from December 30, 2002 to January 22, 2003, in which up to 5% of outstanding shares were offered to be repurchased.
- Participation in the Fund's in-kind repurchase offers is not mandatory. The repurchase offers are not part of a plan to liquidate the Fund. The Fund's shares continue to be traded on the New York Stock Exchange (NYSE) during the in-kind repurchase offers.
- The Fund's next in-kind repurchase offer is scheduled to commence at the end of July 2003 for an undetermined amount of shares.
- On January 28, 2003, the Fund paid a distribution of \$1.793 per share, the third largest distribution paid by the Fund. Stockholders owning 51.7% of the Fund's outstanding shares opted to receive this distribution in Fund shares.

Economic Environment

Mexico's economy started to show signs of recovery during the second quarter of 2002 and the gross domestic product (GDP) increased 0.9% during 2002. The sectors of the economy that reported positive rates of growth were: financial services, up 4.4%; electricity, gas and water, which grew 3.8%; transportation, up 2.2%; construction, up 1.7%; and personal services, up 1.3%. In contrast, the sectors of the economy that registered negative rates of growth during 2002 were: manufacturing, -0.6%; the primary sector, composed of agriculture, fishery and livestock, -0.40%; commerce, restaurants and hotels, -0.4%; and mining, -0.3%. Although Mexico's economy continues to be vulnerable to a turndown of the U.S. economy, economists surveyed by Mexico's Central Bank estimate that positive GDP growth will continue during 2003, when GDP is expected to expand by approximately 2.8%.

After three consecutive years of achieving inflation rates lower than the targets, during 2002 Mexico's inflation rate reached 5.7%, higher than the 4.5% originally estimated by the authorities. The high level of prices of goods and services provided by the public sector explains this underperformance. In order to reach an inflation level of 3% during 2003, the Central Bank has announced that it will continue implementing a restrictive monetary policy. As the 3% target seems difficult to achieve given the current level of 5.73% and the prevailing environment, economists estimate that inflation will register a figure of approximately 4.3% at the end of 2003. At the same time, Mexican interest rates also increased during this quarter, when yields of 28-day Cetes (treasury bills) ended January 2002 at 9.08%, compared with 7.7% at the end of fiscal 2002.

The currency market continues performing in a volatile manner, mainly as a result of the uncertainty created by fear of a war in Iraq. The value of the Mexican peso against the dollar decreased 7.4% during this quarter, when it ended at a level of Ps. 10.907. The Central Bank has announced that it will not intervene directly in the currency market to influence the level of the exchange rate but that it will implement a mechanism to slow the rate of growth of international reserves, which have reached a historical maximum level of \$52 billion.

Mexico's trade balance registered a deficit of \$8.0 billion during 2002, 19.7% lower than during 2001. Total exports increased 1.4% to \$160.7 billion, and within them, oil exports increased 13.1%, mostly because of higher international oil prices, while manufacturing exports increased 0.4%. At the same time, total imports increased 0.2% to \$168.7 billion, and within them, consumer good imports grew by 7.2%, intermediate good imports by 0.3%, while capital good imports decreased 6.7%. Mexico continues to be the second largest trade partner of the United States only after Canada. During 2002, total trade between Mexico and the United States was \$232.26 billion, with a trade balance surplus for Mexico of \$37.2 billion. According to preliminary figures recently published by the authorities, during February 2003, Mexico's trade balance regis -

tered a surplus of \$65 million. This was the first monthly surplus since June 1997 and resulted from a 110% increase in oil exports.

Fund s Performance & Portfolio Strategy

Since the last quarter of fiscal 2002, the Fund s investment adviser continued to pursue opportunities to invest in small and mid-cap Mexican companies. Many of these new portfolio acquisitions, while listed on the Bolsa, are not available to foreign investors through ADRs or similar instruments traded abroad and their shares trading volume is significantly less than some of the Fund s larger capitalization holdings. The companies added to the Fund s portfolio were selected because of their financial strength, including healthy profitability and leverage ratios, as well as because of their attractive growth potential. Additionally, their current valuations, solid management and outlook for coming periods were considered. Many of these companies shares trade at volumes lower than those of shares of the Fund s largest portfolio holdings. At the end of this fiscal quarter, these companies represented approximately 42% of Fund net assets. The Fund s investment adviser intends to continue accumulating positions in these kind of companies in the near future. The most recent issuer additions to the Fund s portfolio are Asur (airport operator); Apasco (cement); KOF, Arca and Contal (beverages); Imsa and Tenaris (steel), Gsanborn and Soriana (retail); Vitro (glass); Desc (a diversified holding company); and GEO (housing). For similar reasons, the Fund also increased its investments in Ara (housing), Alfa (holding), Bimbo (food products), CIE (entertainment), Gcarso (holding), Gfinbur and Gfnorte (financial). In order to make these investments the Fund has reduced its holdings in Telmex, AMX and CEL (telecommunications); Tlevisa and TVAzteca (broadcasting); Walmex and Elektra (retail); Cemex (cement) and GFBB (financial).

As previously mentioned, the climate of uncertainty and volatility prevailing in international stock markets extended to Mexico as well, resulting in a decline in the IFCG Mexico Index, the Fund s benchmark, of 5.19%. The Fund s NAV and market price per share declined 8.3% and 13.8%, respectively. The discount between the Fund s market price and NAV per share ended January 2003 at 12.8%, compared with 5.7% at the end of fiscal 2002. The Fund s investment adviser believes that as the Mexican economy seems to be returning to an expansion period, the valuation of the market could improve once the prevailing uncertain environment fades away, resulting in increasing returns to investors.

The liquidity of Fund shares on the NYSE has decreased as a consequence of the share repurchase offers conducted by the Fund; 29.5 million shares, equivalent to 65% of outstanding shares, were cancelled during 2002. The total number of Fund shares traded on the NYSE during 2002 was 17 million, compared with 34 million and 29 million during 2000 and 2001, respectively.

This Report includes, for your reference, a summary description of the Fund s recently acquired companies and the Fund s ten largest holdings. The Fund s investments are

categorized according to the sector classification provided by the Mexican Stock Exchange.

The Fund has adopted a concentration policy that permits it to concentrate its investments in any industry or group of industries in the IPC Index (or any successor or comparable index as determined by the Board of Directors to be an appropriate measure of the Mexican market) if, at the time of investment, such industry represents 20% or more of the IPC Index; provided, however, that the Fund will not exceed the IPC Index concentration by more than 5%.

Currently, the only industry group that represents 20% or more of the value of the securities included in the IPC Index is the communications industry group. This industry category includes local, long-distance, and cellular telephone companies, as well as broadcast and media companies. Approximately 87.3% of this industry group is comprised of stocks of telecommunications companies. Since the fourth fiscal quarter, the Fund's investment adviser has reduced its market weighting of the communications sector from 24.4% at the end of fiscal 2002 to 23.2% at the end of this fiscal quarter. This is compared with the communications industry group's weighting of approximately 39.7% of the IPC Index. The Fund's investment adviser will continue to evaluate the concentration in this industry and may choose not to concentrate in this industry group in the future or to concentrate in other industries subject to the concentration policy described above.

On January 28, 2003, the Fund paid a \$1.793 per share dividend to shareholders of record on December 23, 2002. This dividend was declared in additional Fund shares with a cash option. A total of 8,240,933 shares, equivalent to 51.7% opted to receive the dividend in the form of additional Fund shares, at a price of \$12.08 per share, which was the closing market price of Fund shares on the NYSE on

January 14, 2003, the valuation date. The remaining 7,690,388 shares, equivalent to 48.3% of total shares, opted to receive this dividend in cash.

Periodic Repurchase Offer Policy

On March 6, 2002, the Fund announced Board approval of a policy to conduct periodic in-kind repurchase offers at no less than 98% of NAV for up to 100% of the Fund's outstanding shares. This policy is intended to provide additional liquidity to Fund shares and to reduce the discount at which Fund shares have been trading on the NYSE. Under this policy which was approved by stockholders and is the subject of exemptive relief granted by the Securities and Exchange Commission, the Fund offers to repurchase no less than five percent of the Fund's outstanding shares each fiscal year, based on the number of shares outstanding at the beginning of the fiscal year. Repurchase offers are in-kind and conducted at least once each fiscal year, but not more frequently than quarterly, and are for between one and one hundred percent of the Fund's outstanding shares. The Board can set or reset the periodic interval between repurchase offers at three, six or 12 months.

The Fund conducted its third in-kind repurchase offer and the first of this fiscal year

from December 30, 2002 to January 22, 2003. The Fund offered to repurchase up to 5% of outstanding shares at 98% of the Fund's NAV on the Repurchase Pricing Date of the offer. The Fund received repurchase requests for approximately 7.35% of the outstanding shares and, according to the terms of the offer, pro-ration was applied at 67.99% to each number of shares submitted by participants.

After the Fund issued new shares in connection with stock dividend in December 2002, the Fund now has 16,357,931 shares outstanding. The Fund anticipates conducting its next in-kind repurchase offer, for an amount not yet determined by the Board at the end of July 2003.

The repurchase offers are not part of a plan to liquidate the Fund. Shareholder participation in the repurchase offers is not mandatory as shareholders can continue to purchase and sell Fund shares in cash transactions on the NYSE. The Fund continues to provide a convenient professionally managed vehicle for investing in Mexico.

Dividend Reinvestment Plan

The Fund's Dividend Reinvestment Plan (the Plan) provides a convenient way to increase your holdings in the Common Stock of the Fund through the reinvestment of net investment income and capital gain distributions. Under the terms of the Plan, Fund shareholders are automatically enrolled as participants in the Plan. If you do not wish to participate in the Plan, please contact the Plan Agent. Upon any termination of participation under the Plan, the Plan Agent will cause a share certificate for the appropriate

Edgar Filing: MEXICO FUND INC - Form N-30B-2

number of full shares to be delivered to the participant, and a cash adjustment for any fractional shares. At a shareholder's request, the Plan Agent will sell the participant's shares and remit any proceeds to the participant, net of brokerage commissions. Shareholders who do not participate in the Plan will receive all distributions in cash.

Under the terms of the Plan, whenever the Fund declares a distribution, Plan participants will receive their distribution entirely in shares of Common Stock purchased either in the open market or from the Fund. If, on the date a distribution becomes payable or such other date as may be specified by the Fund's Board of Directors (the valuation date), the market price of the Common Stock plus estimated brokerage commissions is equal to or exceeds the NAV per share of Common Stock, the Plan Agent will invest the distribution in newly issued shares of Common Stock, which will be priced at NAV. If on the valuation date, the market price of the Common Stock plus estimated brokerage commissions is lower than the NAV per share, the Plan Agent will buy Common Stock in the open market. As a participant in the Plan, you will be charged a *pro-rata* portion of brokerage commissions on all open market purchases.

If your shares are registered or will be registered in the name of a broker-dealer or any other nominee, you must contact the broker-dealer or other nominee regarding his or her

status under the Plan, including whether such broker-dealer or nominee will participate in the Plan on your behalf. Generally, shareholders receiving Common Stock under the Plan will be treated as having received a distribution equal to the amount payable to them in cash as a distribution had the shareholder not participated in the Plan.

If you have any questions concerning the Plan or would like a copy of the Plan brochure, please contact the Plan Agent:

Notes to Financial Statements

January 31, 2003 (Unaudited)

1. Operations and Significant Accounting Policies:

The Fund is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as a closed-end management investment company. On October 16, 2000, the Fund received shareholder approval to convert from a diversified to a non-diversified investment company under the 1940 Act. The investment objective of the Fund is to seek long term capital appreciation through investment in securities, primarily equity, listed on the Mexican Stock Exchange.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses for the period. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund.

Valuation of investments Investments traded on the Mexican Stock Exchange are valued at the closing price reported by the Mexican Stock Exchange. The closing price represents the weighted average for the last ten minutes of operations in any business day. Short-term securities are carried at cost, plus accrued interest, which approximates market value. All other securities are valued in accordance with methods determined by the Board of Directors. If the Board of Directors believes that the price of a security obtained under the Fund's valuation procedures does not represent the amount that the Fund reasonably expects to receive on a current sale of the security, the Fund will value the security based on a method that the Board believes accurately reflects fair value.

Security transactions and investment income Security transactions are recorded on the date which the transactions are entered into (the trade date). Dividend income is recorded on the ex-dividend date and interest income is recorded as earned.

Foreign Currency The market value of Mexican securities, currency holdings and other assets and liabilities denominated in Pesos (Ps.) was recorded in the financial statements after being translated into U.S. dollars based on the open market exchange rate prevailing in Mexico City at the end of the period. The open market exchange rate at January 31, 2003 was Ps. 10.9069 to \$1.00.

The identified cost of portfolio holdings is translated at approximate rates prevailing when acquired. Income and expense amounts are translated at approximate rates prevailing when earned or incurred.

Since the net assets of the Fund are determined based on the currency exchange rate and market values at the close of each business day, it is not practicable to isolate that portion of the results of operations arising as a result of changes in the foreign exchange

rates from the fluctuations arising from changes in the market prices of securities during the year. Accordingly, the net realized and unrealized gain on investments presented in the accompanying financial statements include the effects of both such changes.

Reported net realized foreign exchange gains or losses arise from sales of short-term securities in exchange of cash, payment of services or functional currency denominated assets, currency gains or losses realized between the trade and settlement dates on securities transactions, the difference between the amounts of dividends, interest, and foreign withholding taxes recorded by the Fund, and the U.S. dollar equivalent of the amount actually received or paid.

Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities other than investments in common stocks, resulting from changes in the exchange rate.

Repurchase Agreements The Fund enters into repurchase agreements with approved institutions. The Fund's repurchase agreements are fully collateralized by Mexican or U.S. Government securities. The Fund takes possession of the collateral and the Fund's investment advisor monitors the credit standing of repurchase agreement counterparties. It is the Fund's policy that the fair value of the collateral is at least equal to the principal amount of the repurchase transaction, including accrued interest, at all times. If the counterparty defaults, and the fair value of the collateral declines, realization of the collateral by the Fund may be delayed or limited.

Realized gains and losses on investments Realized gains and losses on investments are determined on the identified cost basis.

Taxes No provision has been made for U.S. income or excise taxes for the year ended October 31, 2002, on net investment company taxable income or net long-term capital gains as defined by the Internal Revenue Code (the Code), since the Fund intends to comply with the requirements of the Code applicable to regulated investment companies and to distribute substantially all of such income to its shareholders.

Dividends to shareholders from net investment income are determined based on Federal income tax regulations, whereas the corresponding net investment income as reflected in the accompanying financial statements, is presented in accordance with accounting principles generally accepted in the United States. Net realized gains from security transactions, are distributed annually to shareholders.

The Fund is subject to Mexican withholding taxes in accordance with the Mexican Income Tax Law and with the provisions included in the treaty to avoid double taxation signed between Mexico and the United States, on specific sources of income. Such taxes will be applied to the shareholders upon payment of dividends by the Fund.

The provision for value-added taxes represents Mexican value-added tax on certain services rendered by Mexican corporations to the Fund.

Dividends to shareholders Cash dividends are recorded by the Fund on the ex-dividend date. Dividends paid to shareholders may be subject to Mexican withholding taxes.

Risks of Investment in Mexican Securities Investing in Mexican securities involves certain considerations not typically associated with investing in securities of U.S. issuers, including (1) lesser liquidity and smaller market capitalization of the Mexican securities markets, (2) currency fluctuations; (3) higher rates of inflation and domestic interest rates and (4) less stringent disclosure requirements, less available information regarding Mexican public companies and less active regulatory oversight of Mexican public companies.

2. Investment Advisory Agreement:

The Fund has a management contract with Impulsora del Fondo México, S.A. de C.V. (the Adviser), a Mexican corporation registered under the U.S. Investment Advisers Act of 1940. The Adviser furnishes investment research and portfolio management services consistent with the Fund's stated investment policies. The Fund pays to the Adviser a monthly fee at the annual rate of 0.85% on the first \$200 million of average daily net assets, 0.70% on the excess over \$200 million up to \$400 million and 0.60% on the excess over \$400 million.

3. Administrative Services Agreement:

Effective April 1, 1994, the Fund entered into an Administrative Services Agreement with the Adviser, which provides for certain services to be performed by the Adviser, including among other administrative activities, the determination and publication of the net asset value of the Fund, the maintenance of the Fund's books and records in accordance with applicable U.S. and Mexican Laws and assistance in the preparation and filing of annual reports and tax returns. The term of this agreement was renewed by the Board of Directors through August 31, 2003. The Fund pays to the Adviser a monthly fee at the annual rate of 0.07% of average daily net assets, with a minimum amount of \$350,000. Beginning with the Stock Repurchase Program that commenced on October 10, 2002, the Adviser will receive a fee of \$75,000 per every repurchase made by the Fund.

4. Mandate Agreement and Mandatory Party:

On March 31, 1998, the Fund signed a Mandate Agreement with Bancomer. Under this Agreement, Bancomer acts as the Mandatory Party, performing certain activities related to the custody of the Fund's securities. The annual fee payable to Bancomer under this Agreement is denominated in Mexican pesos, which currently translates to approximately \$43,985 as of January 31, 2003. Due to the nature of this Agreement, the fees paid to Bancomer are consolidated with the Fund's custodian fees.

5. Purchases and Sales of Investments:

Purchases and sales of investments, excluding short-term securities, for the three months ended January 31, 2003 were as follows:

Purchases	
Common Stock	\$ 12,917,864
Total Purchases	\$ 12,917,864
Proceeds from Investments Sold	
Common Stock	\$ 94,531,901
Total Sales	\$ 94,531,901

Included in proceeds from investments sold, is \$68,697,926 representing the value of securities disposed of in payment of redemptions in-kind, resulting in realized gains of \$7,784,765. Pursuant to a ruling order from the Internal Revenue Service, obtained by the Fund, these gains are not recognized by the Fund for tax purposes. As a result, net realized gains differ for financial statements and tax purposes. These realized gains have been reclassified from undistributed realized gains on investments to additional paid in capital in the accompanying financial statements.

6. Capital Stock:

At October 31, 2002, there were 150,000,000 shares of \$1.00 par value common stock authorized, of which 16,357,931 shares were outstanding.

The Fund offers a Dividend Reinvestment Plan (Plan) to its shareholders. Fund shareholders are automatically enrolled as participants in the Plan unless they notify the Fund's transfer agent otherwise.

On December 5, 2002, the Board of Directors declared a stock dividend of \$28,564,858. This dividend was paid in shares of common stock of the Fund, and in cash by specific election. Some shareholders selected the stock dividend, therefore the Company issued 1,223,179 shares, which amounted to \$14,775,992.

7. Distributions to Shareholders:

As of January 31, 2003, the components of accumulated earnings (deficit) on a tax basis were as follows:

Edgar Filing: MEXICO FUND INC - Form N-30B-2

Accumulated net realized loss on investments	\$	(3,506,942)
Accumulated net investment loss		(1,333,927)
Unrealized appreciation		4,521,509
		<hr/>
Total accumulated earnings	\$	(337,080)
		<hr/>

At January 31, 2003, the cost of investments for federal income tax purposes was \$200,737,292. Gross unrealized appreciation of investments was \$45,661,516 and gross unrealized depreciation of investments was \$41,137,162 resulting in net unrealized appre

-

ciation on investments of \$4,524,354, excluding foreign currency transactions. The difference between book-basis and tax basis unrealized appreciation/ (depreciation) is attributable primarily to different book and tax treatment on corporate reorganizations to securities held by the Fund.

8. Stock Repurchase Programs:

On March 6, 2002, the Board of Directors of the Fund announced a policy contemplating in-kind repurchase offers at 98% of net asset value for up to 100% of the Fund's outstanding shares.

The first such offer commenced on May 8, 2002 and expired on June 7, 2002. A total of 25,487,175 shares participated in the offer, equivalent to a total repurchase price of \$458,047,473, including \$700,000 of expenses related to the offer. These expenses were charged to capital. The Fund used a tax accounting practice to treat a portion of the price of capital shares redeemed during the year as distributions from realized capital gains and undistributed net investment income. Accordingly, the Fund reclassified such amounts from undistributed net realized gains and undistributed net investment income to additional paid in capital.

The second offer commenced on October 10, 2002 and expired on October 31, 2002. The amount paid for redeemed shares was 98% of the Fund's net asset value on November 14, 2002, was paid on November 19, 2002 and was recorded in November for financial statements purposes. A total of 4,037,736 shares participated in the offer, equivalent to a total repurchase price of \$60,478,026, including \$250,000 of expenses related to the offer.

The third offer was limited to 5% of the Fund's outstanding shares, commenced on December 3, 2002 and expired on January 22, 2003. The amount paid for redeemed shares was 98% of the Fund's net asset value on January 29, 2003, was paid on February 3, 2003 and was recorded in January for financial statements purposes. A total of 1,171,565 shares participated in the offer, of which 796,569 were repurchased by the Fund equivalent to a total repurchase price of \$9,911,029, including \$198,186 of expenses related to the offer.

9. Investments:

As a result of significant losses incurred by Grupo Financiero Scotiabank Inverlat, S.A. de C.V. (Inverlat), certain significant shareholders, together with the financial authorities, developed a recapitalization program. On July 23, 1996, after the absorption of accumulated losses through the total reduction of capital stock, shareholders of Inverlat approved a cash contribution by FOBAPROA (Banking Fund for Savings Protection) to cover such losses. As a consequence, all shares outstanding prior to July 23, 1996, were cancelled. The Fund has received an interest in a Recovery Trust set up to manage the recovery assets of Inverlat. Through the trust agreement, the Company may receive shares equal to 9% and up to 36% of their ownership interest. Management has assigned the market

value of the Fund's holdings in the Recovery Trust at \$0 as of January 31, 2003, due to the uncertainty regarding its ultimate realization.

According to the Bank Savings Protection Law, which was enacted on January 20, 1999, all assets of FOBAPROA have been transferred to a new entity called IPAB (Bank Savings Protection Institute). This transfer will not modify the market value assigned to the Recovery Trust.

Certain members of the Board of Directors of the Fund are also members of Boards of Directors of certain companies held in the Fund's portfolio.
