PART I

Item 1. Business.

J.W. Mays, Inc. (the Company or Registrant) with executive offices at 9 Bond Street, Brooklyn, New York 11201, operates a number of commercial real estate properties, which are described in Item 2 Properties . The Company s business was founded in 1924 and incorporated under the laws of the State of New York on July 6, 1927.

The Company discontinued its department store business which operated under the name of MAYS , in the year ended July 31, 1989, and has continued the leasing of real estate. The Company has no foreign operations.

The Company employs 30 employees and has a contract, expiring November 30, 2013, with a union covering rates of pay, hours of employment and other conditions of employment for approximately 23% of its employees. The Company considers that its labor relations with its employees and union are good.

Cautionary Statement Regarding Forward-Looking Statements

This Annual Report on Form 10-K may contain forward-looking statements which include assumptions about future market conditions, operations and financial results. These statements are based on current expectations and are subject to risks and uncertainties. They are made pursuant to safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The Company s actual results, performance or achievements in the future could differ significantly from the results, performance or achievements discussed or implied in such forward-looking statements herein and in prior Securities and Exchange Commission filings by the Company. The Company assumes no obligation to update these forward-looking statements or to advise of changes in the assumptions on which they were based.

Factors that could cause or contribute to such differences include, but are not limited to, changes in the competitive environment of the Company, general economic and business conditions, industry trends, changes in government rules and regulations and environmental rules and regulations. Statements concerning interest rates and other financial instrument fair values and their estimated contribution to the Company s future results of operations are based upon market information as of a specific date. This market information is often a function of significant judgment and estimation. Further, market interest rates are subject to significant volatility.

Item 1A. Risk Factors.

Risks Relating to Ownership Structure

The controlling shareholder group may be able to vote its shares in favor of its interests that may not always coincide with the interests of shareholders not part of such group. This risk may be counter-balanced to a degree by the actions of the Board of Directors whose composition is made up of a majority of independent directors.

The controlling shareholder group includes a corporation that owns a significant percentage of the Company s common stock and which does business with the Company, as further described in the Notes to the Consolidated Financial Statements. In theory, this could result in a conflict of interest; nevertheless, the Company and its largest shareholder have put in place some controls to reduce the effects of any perceived conflict of interest.

Certain conflicts of interest may be perceived by the relationship between the Company and its largest shareholder. Both entities have the same Chief Executive Officer, and certain management personnel work for both entities. Nevertheless, the Company s Board of Directors is composed of a majority of independent directors. As recently as 2005, in a case involving both entities, the Delaware Supreme Court in connection with an attempt to obtain books and records of the Company through a proceeding against the Company s significant shareholder, held that the actions

of the Company's Board were proper.

Risks Related to Our Business

We are a part of the communities in which we do business. Accordingly, like other businesses in our communities, we are subject to the following risks:

the continued threat of terrorism;

economic downturns, both on a national and on local scales;

loss of key personnel;

the availability, if needed, of additional financing;

the continued availability of insurance (in different types of policies) at reasonably acceptable rates; and

the general burdens of governmental regulation, at the Local, State and Federal levels.

Risks Related to Real Estate Operations

Our investment in property development may be limited by increasing costs required to fit up property to be leased to tenants. Also, as the cost of fitting up properties increases, we may be required to wait and forsake opportunities that would be revenue producing until such time that we obtain the necessary financing of such ventures. This risk may be mitigated by our obtaining of lines of credit and other financing vehicles, although such have significant limitations on the amounts that may be borrowed at any point in time.

We also may be subject to environmental liability as an owner or operator of properties. Many of our properties are old and when we need to fit up a property for a new tenant, we may find materials and the like that could be deemed to contain hazardous elements requiring remediation or encapsulation.

We try to lease our properties to tenants with adequate finances, but as a result of the recent economic downturn, even formerly financially strong tenants may be at risk. The Company is trying to mitigate the latter by leasing our properties to multiple tenants where applicable in order to diversify the tenant base.

Risks Related to our Investments

Excess cash and cash equivalents may be invested from time to time. We seek to earn rates of return that will help us finance our business operations. These investments may be subject to significant uncertainties and may not be successful for many reasons, including, but not limited to the following:

fluctuations in
interest rates;

worsening of
general
economic and
market
conditions;
and

adverse legal,
financial and
regulatory
developments
that may
affect a
particular
business.

Risk Factors Summary

These are some of the Risk Factors that could affect the Company's business. The Company endeavors to take actions and do business in a way that reduces these Risk Factors or, at least, takes them into account when conducting its business. Nevertheless, some of these Risk Factors cannot be avoided so that the Company must also take actions and do business that negates the adverse effects that these may have on the ongoing business of the Company.

As of July 31, 2011, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including its Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rules 13a-14(c) and 15d-14(c) of the Securities Exchange Act of 1934. All internal control systems, no matter how well designed, have inherent limitations. Even those systems that have been determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. The Company's management assessed the effectiveness of our internal control over financial reporting as of July 31, 2011. In making this assessment, the

Company's management used the criteria set forth by the Committee Sponsoring Organizations of the Treadway Commission in Internal Control - Integrated Framework Guidance for Small Public Companies.
