EXPLANATORY NOTE

This quarterly report combines the quarterly reports on Form 10-Q for the three- and nine-month periods ended September 30, 2013 of Edison Mission Energy (EME) and Midwest Generation, LLC (Midwest Generation). EME, an indirect wholly owned subsidiary of Edison International (EIX), is a holding company whose subsidiaries and affiliates are engaged in the business of owning, leasing, operating and selling energy and capacity from independent power production facilities. Midwest Generation, an indirect wholly owned subsidiary of EME, operates and sells energy and capacity at four coal-fired generating stations and two oil-fired generating peakers in Illinois. As of the date of this filing, EME and 19 of its wholly owned subsidiaries, including Midwest Generation, have filed voluntary petitions for relief under Chapter 11 of the United States Bankruptcy Code (the Bankruptcy Code) in the United States Bankruptcy Court for the Northern District of Illinois, Eastern Division (the Bankruptcy Court). Information on the cases, including each item filed on the docket, is available at www.edisonmissionrestructuring.com. The information set forth on this web site shall not be deemed to be a part of, or incorporated by reference into, EME's and Midwest Generation's quarterly report on Form 10-Q. The consolidated financial statements of EME reflect the accounts of EME and its subsidiaries, including Midwest Generation, and are labeled debtor-in-possession to reflect EME's status. Midwest Generation's consolidated financial statements include the accounts of Midwest Generation and its subsidiaries and are labeled debtor-in-possession to reflect Midwest Generation's status. All significant intercompany balances and transactions have been eliminated for each reporting entity. The discussion in this quarterly report and in the notes to the consolidated financial statements generally applies to both EME and Midwest Generation unless otherwise specified as indicated parenthetically next to each corresponding disclosure. This quarterly report also includes separate sections under Part I, Item 4. Controls and Procedures and separate Exhibit 31 and Exhibit 32 certifications for EME and Midwest Generation.

EDISON MISSION ENERGY AND SUBSIDIARIES
MIDWEST GENERATION, LLC AND SUBSIDIARIES
COMBINED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Summary of Significant Accounting Policies (EME and Midwest Generation, except as noted)

Chapter 11 Cases

In order to preserve liquidity, on December 17, 2012, EME and 16 of its wholly owned subsidiaries, Camino Energy Company, Chestnut Ridge Energy Company, Edison Mission Energy Fuel Services, LLC, Edison Mission Fuel Resources, Inc., Edison Mission Fuel Transportation, Inc., Edison Mission Holdings Co., Edison Mission Midwest Holdings Co., Midwest Finance Corp., Midwest Generation EME, LLC, Midwest Generation, Midwest Generation Procurement Services, LLC, Midwest Peaker Holdings, Inc., Mission Energy Westside, Inc., San Joaquin Energy Company, Southern Sierra Energy Company, and Western Sierra Energy Company (the Initial Debtors) filed voluntary petitions for relief under Chapter 11 of the Bankruptcy Code. On May 2, 2013, 3 additional EME subsidiaries, EME Homer City Generation L.P. (Homer City), Homer City Property Holdings Inc., and Edison Mission Finance Company (collectively, the Homer City Debtors) filed voluntary petitions for relief under Chapter 11 of the Bankruptcy Code. The Initial Debtors' chapter 11 cases and the Homer City Debtors' chapter 11 cases (collectively, the Chapter 11 Cases) are being jointly administered under case No. 12-49219 (JPC). The Initial Debtors and the Homer City Debtors are collectively referred to as the Debtor Entities.

The Debtor Entities remain in possession of their property and continue their business operations uninterrupted as "debtors-in-possession" under the jurisdiction of the Bankruptcy Court and in accordance with the applicable provisions of the Bankruptcy Code and orders of the Bankruptcy Court. Other than the Debtor Entities, none of EME's other direct or indirect subsidiaries is a debtor in the Chapter 11 Cases. The filing of the Chapter 11 Cases automatically stayed most actions against the Debtor Entities, including actions to enforce the payment of EME's \$3.7 billion of unsecured senior notes and Midwest Generation's obligations related to leases of the Powerton Station and Units 7 and 8 of the Joliet Station (the Powerton and Joliet Sale Leaseback). Absent an order from the Bankruptcy Court, substantially all of the Debtor Entities' pre-petition liabilities are subject to settlement under a reorganization plan.

The factors that caused EME and Midwest Generation to seek relief under Chapter 11, including low realized energy and capacity prices, high fuel costs and low generation, combined with capital requirements associated with retrofitting the Midwest Generation plants to comply with governmental regulations continue to exist. As a result of these factors and based on further analysis of its capital allocation strategy, EME and Midwest Generation recorded an impairment charge of \$464 million related to its Will County Station. However, this impairment does not constitute a decision on further operations of this station, including capital investments necessary to comply with state and federal environmental regulations. For additional information, see Note 13—Impairment of Long-Lived Assets.

The Bankruptcy Court established June 17, 2013 and October 29, 2013 as the bar date for filing proofs of claim against the Initial Debtors and Homer City Debtors estates, respectively. The differences between amounts recorded by the Debtor Entities and the proofs of claims filed by creditors are investigated and resolved through the claims resolution process. This process may take considerable time to complete. The resolution of such claims could result in material adjustments to EME or Midwest Generation's financial statements. For additional discussion, see Note 15—Restructuring Activities—Claims.

On December 16, 2012, EME, Edison International (EIX), and certain of EME's senior unsecured noteholders entered into a Transaction Support Agreement (the Support Agreement) pursuant to which EME, EIX and the signing noteholders (the Noteholders) agreed to support approval of certain transactions by the Bankruptcy Court. On July 25, 2013, 98.02% of the Noteholders terminated the Support Agreement, stating that, among other things, certain Required Consenting Noteholder Termination Events under Section 8 of the Support Agreement had occurred. The filing of the Chapter 11 Cases constitutes an event of default under the Powerton and Joliet Sale Leaseback and under instruments governing the Senior Lease Obligation Bonds issued to finance these leases. EME, Midwest Generation, the owner-lessors, and certain of the holders of the pass-through certificates of Midwest Generation's lessor debt (the Certificate Holders) have been engaged in ongoing discussions regarding the ultimate disposition of

the leases. In June 2013, EME and Midwest Generation agreed, among other things, to make monthly rental payments of \$3.75 million beginning in July 2013 and to pay certain professional fees for the owner-lessors and Certificate Holders in exchange for an extension of the deadline to assume or reject the Powerton and Joliet leases and the agreement of the Certificate Holders to forbear and to direct the lease indenture trustee and pass-through trustee to forbear from seeking payment of any administrative claim for rent under the Powerton and Joliet leases (except the monthly partial rental payments of \$3.75 million under the agreement) before the earlier of the effective date of a chapter 11 plan for Midwest Generation or a sale of substantially all of the assets of Midwest Generation. The parties filed a motion detailing the terms of this agreement and the Bankruptcy Court approved the extension

Table of Contents

of the statutory deadline by which the Debtor Entities must assume or reject the Powerton and Joliet leases until December 31, 2013.

The Chapter 11 Cases could also potentially give rise to counterparty rights and remedies under other documents. For additional information, see Note 5—Debt and Credit Agreements and Note 9—Commitments and Contingencies—Lease Commitments—Powerton and Joliet Sale Leaseback.

On October 18, 2013, EME and its debtor subsidiaries, including Midwest Generation, entered into various agreements that, upon completion, would ultimately implement a reorganization of the Debtor Entities through a sale of substantially all of EME's assets, including its equity interests in substantially all of its debtor and non-debtor subsidiaries, to a wholly owned subsidiary of NRG Energy Inc., upon Bankruptcy Court confirmation and consummation of a plan of reorganization (the NRG Sale). Midwest Generation is included in the equity interests to be sold. For additional information, see Note 15—Restructuring Activities—NRG Sale.

The accompanying consolidated financial statements have been prepared assuming that EME and Midwest Generation will continue as going concerns. Financial statements prepared on this basis assume the realization of assets and the satisfaction of liabilities in the normal course of business for the 12-month period following the date of the financial statements. The accompanying consolidated financial statements do not include any adjustments related to the recoverability and classification of assets or the amounts and classification of liabilities or any other adjustments that might be necessary if EME and Midwest Generation were unable to continue as going concerns.

Basis of Presentation

There are no material updates to EME's and Midwest Generation's significant accounting policies since the filing of EME's and Midwest Generation's combined annual report on Form 10-K for the year ended December 31, 2012, with the exception of new accounting principles adopted as discussed below in "—New Accounting Guidance." This quarterly report should be read in conjunction with the financial statements and notes included in EME's and Midwest Generation's combined annual report on Form 10-K for the year ended December 31, 2012.

In the opinion of management, all adjustments, consisting of recurring accruals, have been made that are necessary to fairly state the consolidated financial position and results of operations and cash flows in accordance with accounting principles generally accepted in the United States of America (GAAP) for the periods covered by this quarterly report on Form 10-Q. The results of operations for the three- and nine-month periods ended September 30, 2013 are not necessarily indicative of the operating results for the full year. Except as indicated, amounts reflected in the notes to the consolidated financial statements relate to continuing operations of EME and Midwest Generation. Certain prior period amounts have been reclassified to conform to the current year financial statement presentation pertaining to discontinued operations. In December 2012, EME reclassified costs previously presented as professional fees related to potential reorganization to reorganization items, net to reflect the proper classification of costs that were directly associated with the Chapter 11 Cases but were incurred prior to the December 17, 2012 petition date. Accordingly, EME's consolidated statements of operations for the three and nine months ended September 30, 2012 were revised to reflect \$7 million and \$9 million, respectively, of professional fees related to potential reorganization as reorganization items, net. Management believes the reclassification does not have a material impact on the prior year financial statements as it has no impact on loss from continuing operations or net loss.

Cash Equivalents

Cash equivalents included money market funds totaling \$948 million and \$615 million for EME and \$103 million and \$75 million for Midwest Generation at September 30, 2013 and December 31, 2012, respectively. The carrying value of cash equivalents equals the fair value as all investments have original maturities of less than three months.

Table of Contents

Inventory

Inventory consisted of the following:

(in millions)	EME		Midwest Generation	
	September 30, 2013	December 31, 2012	September 30, 2013	December 31, 2012
Coal, fuel oil and other raw materials	\$60	\$123	\$57	\$119
Spare parts, materials and supplies	61	52	45	46
Total inventory	\$121	\$175	\$102	\$165

Notes Receivable from EME (Midwest Generation only)

Notes receivable from EME on Midwest Generation's consolidated balance sheets consisted of the following:

(in millions)	September 30, 2013			December 31, 2012		
	Carrying Value	Valuation Allowance	Net	Carrying Value	Valuation Allowance	Net
Current portion of notes receivable from affiliate	\$19	\$(19))\$—	\$12	\$(12))\$—
Interest receivable from affiliate	55	(55))—	55	(55))—
Notes receivable from affiliate	1,304	(1,304))—	1,311	(1,311))—
Total	\$1,378	\$(1,378))\$—	\$1,378	\$(1,378))\$—

At December 31, 2012, Midwest Generation recorded a \$1.4 billion charge, equal to the full carrying amount of the loan and accrued interest, and ceased accruing interest income associated with the intercompany loan. EME did not make the scheduled principal and interest payment of \$61 million due on both January 2, 2013 and July 2, 2013. As a result, interest income from affiliate, included in interest and other income on Midwest Generation's consolidated statements of operations, was none and \$28 million during the three months ended September 30, 2013 and 2012, respectively, and none and \$83 million during the nine months ended September 30, 2013 and 2012, respectively. Upon completion of the NRG Sale, this loan and accrued interest would be canceled. For additional information, see Note 15—Restructuring Activities—NRG Sale.

New Accounting Guidance

Accounting Guidance Adopted in 2013

Offsetting Assets and Liabilities

In December 2011 and December 2012, the Financial Accounting Standards Board (FASB) issued accounting standards updates modifying the disclosure requirements about the nature of an entity's rights of offsetting assets and liabilities in the consolidated balance sheet under master netting agreements and related arrangements associated with financial and derivative instruments. The guidance requires increased disclosure of the gross and net recognized assets and liabilities, collateral positions, and narrative descriptions of setoff rights. EME and Midwest Generation adopted this guidance effective January 1, 2013.

Presentation of Items Reclassified out of Accumulated Other Comprehensive Income

In February 2013, the FASB issued an accounting standards update which requires disclosure related to items reclassified out of accumulated other comprehensive income (AOCI). The guidance requires entities to present separately, for each component of other comprehensive income (OCI), current period reclassifications and the remainder of the current-period OCI. In addition, for certain current period reclassifications, an entity is required to disclose the effect of the item reclassified out of AOCI on the respective line item of net income. EME adopted this guidance effective January 1, 2013.

Table of Contents

Accounting Guidance Not Yet Adopted

Joint and Several Liabilities

In February 2013, the FASB issued an accounting standard update which modifies the requirements for the recognition, measurement, and disclosure of obligations resulting from joint and several liability arrangements for which the total amount of the obligation is fixed at the reporting date. The guidance requires companies to measure these obligations as the sum of the amount the company has agreed with co-obligors to pay and any additional amount it expects to pay on behalf of one or more co-obligors. This guidance is effective for fiscal years beginning after December 31, 2013. EME and Midwest Generation do not expect this guidance to have a material impact on results of operations.

Presentation of Unrecognized Tax Benefits

In July 2013, the FASB issued an accounting standard update which clarifies that a liability for an unrecognized tax benefit should be presented as a reduction of a deferred tax asset when settlement of the liability with the taxing authority results in the reduction of a net operating loss or tax credit carryforward. The requirement to record a non-cash settlement in a net manner does not affect EME and Midwest Generation's analysis of the realization of deferred tax assets. This guidance is effective for fiscal years beginning after December 31, 2013. EME and Midwest Generation do not expect this guidance to have a material impact on results of operations.

Note 2. Consolidated Statements of Changes in Equity (EME only)

EME's changes in equity for the nine months ended September 30, 2013 consisted of the following:

(in millions)	Edison Mission Energy Shareholder's Equity					
	Common Stock	Additional Paid-in Capital	Retained Deficit	AOCI	Non-controlling Interests	Total Equity
Balance at December 31, 2012	\$64	\$1,095	\$(577)	\$(138)	\$288	\$732
Net income (loss)	—	—	(635)	—	21	(614)
OCI, net of tax	—	—	—	29	—	29
Payments to EIX for stock purchases related to stock-based compensation	—	—	(13)	—	—	(13)
Cash contribution from EIX ¹	—	6	—	—	—	6
Non-cash contribution from EIX ¹	—	32	—	—	—	32

Balance at September 30, 2013	\$64	\$1,137	\$(1,225)	\$(109)	\$392	\$259

¹ During 2013, EME received contributions from EIX related to the tax-allocation agreements. For further information, see Note 7—Income Taxes—EME—Effective Tax Rate.

² Funds contributed by third-party investors to Capistrano Wind Partners. For further information, see Note 3—Variable Interest Entities—Projects or Entities that are Consolidated—Capistrano Wind Partners.

EME's changes in equity for the nine months ended September 30, 2012 consisted of the following:

(in millions)	Edison Mission Energy Shareholder's Equity					
	Common Stock	Additional Paid-in Capital	Retained Earnings	AOCI	Non-controlling Interests	Total Equity
Balance at December 31, 2011	\$64	\$1,327	\$365	\$(94)	\$2	\$1,664
Net income (loss)	—	—	(360)	—	12	(348)
OCI, net of tax	—	—	—	(34)	—	(34)

Edgar Filing: EDISON MISSION ENERGY - Form 10-Q

Payments to EIX for stock purchases related to stock-based compensation	—	—	(14)	—	—	(14)
Excess tax benefits related to stock option exercises	—	3	—	—	—	3
Other stock transactions, net	—	4	—	—	—	4
Contributions from noncontrolling interests ¹	—	—	—	—	242	242
Distributions to noncontrolling interests	—	—	—	—	(14)	(14)
Transfers of assets to Capistrano Wind Partners ²	—	(21)	—	—	—	(21)
Balance at September 30, 2012	\$64	\$1,313	\$(9)	\$(128)	\$242	\$1,482

¹ Funds contributed by third-party investors to Capistrano Wind Partners. For further information, see Note 3—Variable Interest Entities—Projects or Entities that are Consolidated—Capistrano Wind Partners.

² Additional paid in capital was reduced by \$21 million due to a new tax basis in the assets transferred to Capistrano Wind Partners.

Note 3. Variable Interest Entities (EME only)

Projects or Entities that are Consolidated

At September 30, 2013 and December 31, 2012, EME consolidated 16 and 15 projects, respectively, that have noncontrolling interests held by others. These projects have a total generating capacity of 958 megawatts (MW) and 878 MW, respectively. The increase in the number of projects consolidated is due to the sale of Edison Mission Wind Inc.'s (Edison Mission Wind) indirect equity interest in the Broken Bow I wind project (80 MW in Nebraska) to Capistrano Wind Partners for \$112 million. Edison Mission Wind is a wholly owned subsidiary of EME. Outside investors provided \$94 million of the funding. In determining that EME was the primary beneficiary of the projects that are consolidated, key factors considered were EME's ability to direct commercial and operating activities and EME's obligation to absorb losses of the variable interest entities.

EME's summarized financial information for consolidated projects consisted of the following:

(in millions)	September 30, 2013	December 31, 2012
Current assets	\$84	\$74
Net property, plant and equipment	1,205	1,117
Other long-term assets	108	90
Total assets	\$1,397	\$1,281
Current liabilities	\$39	\$50
Long-term debt net of current portion	227	186
Deferred revenues	153	156
Long-term derivative liabilities	14	23
Other long-term liabilities	47	40
Total liabilities	\$480	\$455
Noncontrolling interests	\$392	\$288

Assets serving as collateral for the debt obligations had a carrying value of \$623 million and \$497 million at September 30, 2013 and December 31, 2012, respectively, and primarily consist of property, plant and equipment. The debt obligations are nonrecourse to EME. For further discussion, see Note 5—Debt and Credit Agreements.

Table of Contents

Capistrano Wind Partners

In addition to the Broken Bow I transaction discussed above, in February 2012, Edison Mission Wind sold its indirect equity interests in the Cedro Hill wind project (150 MW in Texas), the Mountain Wind Power I wind project (61 MW in Wyoming), and the Mountain Wind Power II wind project (80 MW in Wyoming) to Capistrano Wind Partners for \$346 million. Outside investors provided \$238 million of the funding and Mission Energy Holding Company (MEHC) made a \$4 million preferred investment. In December 2012, Edison Mission Wind sold its indirect equity interest in the Crofton Bluffs wind project (40 MW in Nebraska) to Capistrano Wind Partners for \$58 million. Outside investors provided \$46 million of the funding.

Through their ownership of Capistrano Wind Holdings, an indirect subsidiary of EME, Edison Mission Wind and EME's parent company, MEHC, own 100% of the Class A equity interests in Capistrano Wind Partners, and the Class B preferred equity interests are held by outside investors. In the event that Edison Mission Wind is no longer included in the consolidated income tax returns of EIX, MEHC's equity interest converts to common stock such that Capistrano Wind Holdings would remain included in the EIX consolidated tax group. The closing of the NRG Sale would trigger the provisions to increase MEHC's holding of Capistrano Wind Holdings' common stock. For additional information, see Note 7—Income Taxes and Note 15—Restructuring Activities—NRG Sale.

Under the terms of the formation documents, preferred equity interests receive 100% of the cash available for distribution up to a scheduled amount to target a certain return and thereafter cash distributions are shared. Cash available for distribution includes 90% of the tax benefits realized by MEHC and contributed to Capistrano Wind Partners.

Edison Mission Wind retains indirect beneficial ownership of the common equity in the projects, net of MEHC's preferred investment, and retains responsibilities for managing the operations of Capistrano Wind Holdings and its projects. Accordingly, EME will continue to consolidate these projects. The \$378 million contributed by the third-party investors and the \$4 million preferred investment made by MEHC are reflected in noncontrolling interests on EME's consolidated balance sheet at September 30, 2013. The transactions between Edison Mission Wind and Capistrano Wind Partners were accounted for as a transfer among entities under common control and, therefore, resulted in no change in the book basis of the transferred assets. However, the transaction did trigger a taxable gain and new tax basis in the assets with a corresponding adjustment to deferred taxes and a reduction to equity.

Note 4. Fair Value Measurements (EME, Midwest Generation)

Recurring Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (referred to as an "exit price"). Fair value of an asset or liability considers assumptions that market participants would use in pricing the asset or liability, including assumptions about nonperformance risk, which was not material as of September 30, 2013 and December 31, 2012 for both EME and Midwest Generation.

Valuation Techniques Used to Determine Fair Value

Assets and liabilities are categorized into a three-level fair value hierarchy based on valuation inputs used to determine fair value. The hierarchy gives the highest priority to unadjusted quoted market prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The fair value of transfers in and out of each level is determined at the end of each reporting period.

Level 1

The fair value of Level 1 assets and liabilities is determined using unadjusted quoted prices in active markets that are available at the measurement date for identical assets and liabilities. This level includes exchange-traded derivatives and money market funds.

Level 2

The fair value of Level 2 assets and liabilities is determined using the income approach by obtaining quoted prices for similar assets and liabilities in active markets and inputs that are observable, either directly or indirectly, for substantially the full term of the instrument. This level includes over-the-counter derivatives and interest rate swaps.

Over-the-counter derivative contracts are valued using standard pricing models to determine the net present value of estimated future cash flows. Inputs to the pricing models include forward published or posted clearing prices from exchanges (New York Mercantile Exchange and Intercontinental Exchange) for similar instruments and discount rates. A primary price

15

source that best represents trade activity for each market is used to develop observable forward market prices in determining the fair value of these positions. Broker quotes, prices from exchanges, or comparison to executed trades are used to validate and corroborate the primary price source. These price quotations reflect mid-market prices (average of bid and ask) and are obtained from sources believed to provide the most liquid market for the commodity. Level 3

The fair value of Level 3 assets and liabilities is determined using the income approach through various models and techniques that require significant unobservable inputs. This level includes over-the-counter options and derivative contracts that trade infrequently, such as congestion revenue rights and long-term power agreements.

Assumptions are made in order to value derivative contracts in which observable inputs are not available. Changes in fair value are based on changes to forward market prices, including extrapolation of short-term observable inputs into forecasted prices for illiquid forward periods. In circumstances where fair value cannot be verified with observable market transactions, it is possible that a different valuation model could produce a materially different estimate of fair value. Modeling methodologies, inputs, and techniques are reviewed and assessed as markets continue to develop and more pricing information becomes available. The fair value is adjusted when it is concluded that a change in inputs or techniques would result in a new valuation that better reflects the fair value of those derivative contracts.

EME

The following table sets forth EME's assets and liabilities that were accounted for at fair value by level within the fair value hierarchy:

(in millions)	September 30, 2013				Total
	Level 1	Level 2	Level 3	Netting and Collateral ¹	
Assets at Fair Value					
Money market funds ²	\$948	\$—	\$—	\$—	\$948
Derivative contracts					
Electricity	—	35	26	(7)	54
Natural gas	3	—	—	(3)	—
Interest rate	—	2	—	—	2
Total assets	\$951	\$37	\$26	\$(10)	\$1,004
Liabilities at Fair Value					
Derivative contracts					
Electricity	\$—	\$1	\$5	\$(6)	\$—
Interest rate	—	69	—	—	69
Total liabilities	\$—	\$70	\$5	\$(6)	\$69

(in millions)	December 31, 2012				Total
	Level 1	Level 2	Level 3	Netting and Collateral ¹	
Assets at Fair Value					
Money market funds ²	\$615	\$—	\$—	\$—	\$615
Derivative contracts					
Electricity	—	41	52	(3)	90
Total assets	\$615	\$41	\$52	\$(3)	\$705
Liabilities at Fair Value					
Derivative contracts					
Electricity	\$—	\$6	\$1	\$(7)	\$—
Natural gas	3	—	—	(3)	—
Interest rate	—	118	—	—	118
Total liabilities	\$3	\$124	\$1	\$(10)	\$118

¹ Represents cash collateral and the impact of netting across the levels of the fair value hierarchy. Netting among positions classified within the same level is included in that level.

² Money market funds are included in cash and cash equivalents on EME's consolidated balance sheets.

Level 3 Valuation Process

The process of determining fair value of commodity derivative contracts is the responsibility of the risk department, which reports to the chief financial officer. This department obtains observable and unobservable inputs through broker quotes, exchanges, and internal valuation techniques and uses both standard and proprietary models to determine fair value. Each reporting period, the risk and key finance departments collaborate to determine the appropriate fair value methodologies and classifications for each derivative. Inputs are validated for reasonableness by comparison against prior prices, other broker quotes, and volatility fluctuation thresholds. Inputs used and valuations are reviewed period-over-period and compared with market conditions to determine reasonableness.

The following table sets forth the valuation techniques and significant unobservable inputs used to determine fair value for EME's Level 3 assets and liabilities:

	September 30, 2013		Valuation Techniques	Significant Unobservable Input	Range	Weighted Average
	Fair Value (in millions)					
	Assets	Liabilities				
Electricity						
Congestion contracts	\$42	\$17	Latest auction pricing	Congestion prices	\$(34.77) - \$18.70	\$0.10
Power contracts	3	7	Discounted cash flows	Power prices	\$30.43 - \$58.65	\$37.41
Netting	(19)	(19)				
Total	\$26	\$5				

	December 31, 2012		Valuation Techniques	Significant Unobservable Input	Range	Weighted Average
	Fair Value (in millions)					
	Assets	Liabilities				
Electricity Congestion contracts	\$71	\$20	Latest auction pricing	Congestion prices	\$(8.93) - \$18.03	\$0.19
Power contracts	2	2	Discounted cash flows	Power prices	\$22.54 - \$48.85	\$39.62
Netting	(21)	(21)				
Total	\$52	\$1				

Level 3 Fair Value Sensitivity

For congestion contracts, generally, an increase (decrease) in congestion prices in the last auction relative to the contract price will increase (decrease) fair value. For power contracts, generally, an increase (decrease) in long-term forward power prices at illiquid locations relative to the contract price will increase (decrease) fair value.

The following table sets forth a summary of changes in the fair value of EME's Level 3 net derivative assets and liabilities:

(in millions)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
Fair value of net assets at beginning of period	\$26	\$41	\$51	\$83
Total realized/unrealized gains (losses)				
Included in earnings ¹	5	12	(14)	20
Included in AOCI ²	—	(1)	—	1
Purchases	8	8	27	27
Settlements	(18)	(29)	(43)	(49)
Transfers out of Level 3	—	—	—	(51)
Fair value of net assets at end of period	\$21	\$31	\$21	\$31
Change during the period in unrealized gains (losses) related to assets and liabilities held at end of period ¹	\$(1)	\$(7)	\$(18)	\$—

¹ Reported in operating revenues on EME's consolidated statements of operations.

² Included in reclassification adjustments in EME's consolidated statement of OCI.

There were no transfers between levels during the nine months ended September 30, 2013 and no transfers between Level 1 and Level 2 during the nine months ended September 30, 2012. Significant transfers out of Level 3 into Level 2 occurred in the first quarter of 2012 due to significant observable inputs becoming available as the transactions neared maturity.

Fair Value of Long-term Debt

The carrying amounts and fair values of EME's long-term debt were as follows:

(in millions)	September 30, 2013		December 31, 2012	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Long-term debt, including current portion	\$1,523	\$1,520	\$1,056	\$1,057

In assessing the fair value of EME's long-term debt, EME primarily uses quoted market prices, except for floating-rate debt for which the carrying amounts were considered a reasonable estimate of fair value. The fair value of EME's long-term debt is classified as Level 2.

The carrying amount of short-term debt at December 31, 2012 approximates fair value.

Midwest Generation

The following table sets forth Midwest Generation's assets and liabilities that were accounted for at fair value by level within the fair value hierarchy:

(in millions)	September 30, 2013			Total
	Level 1	Level 2	Netting ¹	
Assets at Fair Value				
Money market funds ²	\$103	\$—	\$—	\$103
Derivative contracts				
Electricity	—	1	—	1
Total assets	\$103	\$1	\$—	\$104
Liabilities at Fair Value				
Derivative contracts

Total liabilities	\$—	\$2	\$—	\$2
	December 31, 2012			
(in millions)	Level 1	Level 2	Netting ¹	Total
Assets at Fair Value				
Money market funds ²	\$75	\$—	\$—	\$75
Derivative contracts				
Electricity	—	2	—	2
Total assets	\$75	\$2	\$—	\$77
Liabilities at Fair Value				
Derivative contracts				
Electricity	\$—	\$3	\$—	\$3
Total liabilities	\$—	\$3	\$—	\$3

¹ Represents the impact of netting across the levels of the fair value hierarchy. Netting among positions classified within the same level is included in that level.

² Money market funds are included in cash and cash equivalents on Midwest Generation's consolidated balance sheets.

Midwest Generation does not have any Level 3 assets and liabilities. There were no transfers between levels during the nine months ended September 30, 2013 and 2012.

Table of Contents

Note 5. Debt and Credit Agreements (EME only)

Debt

Debt with recourse to EME totaled \$3.7 billion and is classified as part of liabilities subject to compromise (LSTC) as of September 30, 2013 and December 31, 2012. Nonrecourse debt, as summarized below, is debt whereby lenders rely on specific project assets to repay such obligations. The following table summarizes long-term debt (rates and terms as of September 30, 2013), excluding LSTC:

(in millions)	Current Rate ¹	Effective Interest Rate ²	Maturity Date	September 30, 2013	December 31, 2012
Walnut Creek Energy Term Loan	2.50% LIBOR+2.25%	5.46%	May 2023	\$425	\$330

Long-term debt, net of current portion				\$1,433	\$749

¹ London Interbank Offered Rate (LIBOR).

The effective rate at which interest expense is reflected in the financial statements after the consideration of the

² current rate of debt and any amounts subject to interest rate swaps. For further discussion, see Note 6—Derivative Instruments and Hedging Activities—Interest Rate Risk Management.

Principal payments are due annually through October 1, 2017. Interest rates are reset weekly based on current bond yields for similar securities. On October 1, 2013, American Bituminous Power Partners, L.P. (Ambit) made the

³ required annual principal payment to bondholders by drawing on its line of credit. Ambit was unable to fully reimburse the draw down which is a potential event of default. However, Ambit and various counterparties, including the line of credit issuer, executed an agreement effective October 1, 2013 to waive any event of default.

⁴ The interest rate swaps for this obligation will expire in December 2013 and forward starting rate swaps will become effective. For additional information, see Note 6—Derivative Instruments and Hedging Activities.

Table of Contents

Chapter 11 Cases

The filing of the Chapter 11 Cases constitutes an event of default under various financing documents. In addition to the instruments discussed below, the Chapter 11 Cases could also potentially give rise to counterparty rights and remedies under other documents.

Senior Notes

The filing of the Chapter 11 Cases constitutes an event of default under EME's senior notes and, as a result, the principal and interest due under these debt instruments are immediately due and payable. The creditors are stayed from taking any action as a result of the default under Section 362 of the Bankruptcy Code and the obligations related to the senior notes are recorded as part of LSTC. For additional information, see Note 15—Restructuring Activities.

Viento II Financing

In July 2013, EME completed, through its subsidiary, Viento Funding II, Inc., an amendment of its Viento II Financing, a nonrecourse financing of its interests in the Wildorado, San Juan Mesa and Elkhorn Ridge wind projects. The amendment increased the financing amount to \$238 million, which included a \$202 million 10-year partially amortizing term loan, a \$27 million 7-year letter of credit facility, and a \$9 million 7-year working capital facility. Interest under the term loan accrues at LIBOR plus 2.75% initially with the rate increasing 0.25% on every fourth anniversary. EME reaffirmed the pledge of its interest in Viento Funding II, Inc. in connection with the amendment but is not a borrower or a guarantor. The amendment cured any possible event of default, and therefore the Viento Funding II debt was classified as a long-term liability on the consolidated balance sheets.

Viento Funding II terminated \$78 million amortizing notional amount 3.415% interest rate swap agreements and entered into several tranches of new interest rate swap agreements to hedge the majority of exposure to fluctuations in interest rates. As a result of the termination, EME wrote off \$4 million of unamortized deferred financing costs as a loss on early extinguishment of debt in the consolidated statements of operations. For additional information, see Note 6—Derivative Instruments and Hedging-Interest Rate Risk Management.

High Lonesome Financing

The filing of the Chapter 11 Cases constitutes an event of default under the documents governing the issuance of the Series 2010A and 2010B Bonds (the Bonds). In July 2013, the applicable bondholders granted a permanent waiver of default, subject to EME assuming the state production tax credit agreement in the Chapter 11 Cases. Pursuant to assumption and rejection procedures previously approved by the Bankruptcy Court, EME assumed the agreement effective as of July 15, 2013. As of September 30, 2013, there were \$41 million and \$25 million outstanding under the Series 2010A and Series 2010B Bonds, respectively, and \$7 million of outstanding letters of credit.

Credit Facilities and Letters of Credit

At September 30, 2013, letters of credit under EME's and its subsidiaries' credit facilities aggregated \$169 million and were scheduled to expire as follows: \$2 million in 2013, \$57 million in 2014, \$17 million in 2017, \$9 million in 2018, \$27 million in 2020, \$18 million in 2021, \$13 million in 2022 and \$26 million in 2023.

Standby letters of credit include \$22 million issued in connection with the power purchase agreement with Southern California Edison Company (SCE), an affiliate of EME, under the Walnut Creek credit facility. At September 30, 2013, EME had \$22 million of cash collateral supporting its standby letters of credit, including cash collateral under Edison Mission Wind's \$75 million letter of credit facility which was completed in April 2013 and expires on April 30, 2016. Letter of credit facilities for Mountain Wind Power, LLC and Mountain Wind Power II, LLC of \$10 million and \$16 million, respectively, were both completed in September 2013 and expire in September 2020. In October 2013, the letter of credit facility agreement between EME and DNB Bank was terminated. There was no outstanding balance under this agreement on September 30, 2013. Certain letters of credit are subject to automatic annual renewal provisions.

Big Sky Turbine Financing

In October 2009, EME's subsidiary, Big Sky Wind, LLC (Big Sky), entered into turbine financing arrangements with the turbine manufacturer Suzlon Wind Energy Corporation (Suzlon) for wind turbine purchase obligations related to the 240 MW Big Sky wind project. The loan associated with the financing arrangements has a five-year final maturity. However, the satisfaction of certain criteria, including project performance and absence of serial defects, may trigger earlier repayment. In September 2012, Suzlon sued Big Sky in New York federal court seeking a declaratory

judgment that the early repayment provisions had been satisfied and that Big Sky should be required to repay the loan in full in February 2013. Big Sky

21

Table of Contents

answered Suzlon's complaint, denied the allegations and counterclaimed. The counterclaim alleged that certain serial defects existing in the turbine equipment supplied by Suzlon precluded application of the early repayment provisions. The litigation is pending in New York federal court. The Big Sky loan is secured by a leasehold mortgage on the project's real property assets, a pledge of all other collateral of the Big Sky wind project, as well as a cash reserve account into which one-third of distributable cash flow, if any, of the Big Sky wind project is to be deposited on a monthly basis. The loan is also secured by pledges of Big Sky's direct and indirect ownership interests in the project, but is nonrecourse to EME. For further details regarding consolidated assets pledged as security for debt obligations, see Note 3—Variable Interest Entities.

As of September 30, 2013, \$228 million was outstanding under the vendor financing loan at an effective interest rate of 3.94%. EME has been in discussions with Suzlon regarding a potential sale of EME's interest in the Big Sky wind project in exchange for forgiveness of debt and other consideration. These discussions are ongoing and EME has not made any decisions with respect to a potential sale. As a result, Big Sky's long-lived assets, consisting of property, plant and equipment and deferred revenue, were evaluated for impairment under the Held for Use model of Accounting Standards Codification 360 Property, Plant, and Equipment (ASC 360). The probability weighted future undiscounted cash flows associated with this asset group exceeded its carrying value at September 30, 2013 and consequently no impairment has been recognized. If EME and Suzlon do agree upon a sale transaction under terms similar to those currently under discussion, EME would record a material loss. If EME and Suzlon do not agree upon a sale transaction, Big Sky will need to arrange alternative financing, if available, to repay the loan at maturity or reach agreement with the lender to extend the maturity date of the loan. EME does not intend to make an investment in the project and is under no obligation to do so. If a restructuring of the loan or a sale effort is unsuccessful, Suzlon may foreclose on the project resulting in a write-off of the entire investment in the project. At September 30, 2013, EME's investment in the Big Sky wind project consisted of assets of \$451 million and liabilities of \$369 million.

Walnut Creek

Walnut Creek, a 479 MW gas-fired peaker plant, achieved commercial operation during the second quarter 2013, and accordingly, EME completed, through two wholly owned subsidiaries, Walnut Creek Energy and WCEP Holdings, LLC, the conversion of its nonrecourse financings from construction loans to 10-year amortizing term loans. Walnut Creek started earning revenues under its long-term purchase power agreement in June 2013.

Note 6. Derivative Instruments and Hedging Activities (EME, Midwest Generation)

EME and Midwest Generation use derivative instruments to reduce their exposure to market risks that arise from price fluctuations of electricity, capacity, fuel, emission allowances, transmission rights, and interest rates. The derivative financial instruments vary in duration, ranging from a few days to several years, depending upon the instrument. To the extent that EME and Midwest Generation do not use derivative instruments to hedge these market risks, the unhedged portions will be subject to the risks and benefits of spot market price movements.

Risk management positions may be designated as cash flow hedges or economic hedges, which are derivatives that are not designated as cash flow hedges. Economic hedges are accounted for at fair value on EME's and Midwest Generation's consolidated balance sheets as derivative assets or liabilities with offsetting changes recorded on the consolidated statements of operations. For derivative instruments that qualify for hedge accounting treatment, the fair value is recognized on EME's and Midwest Generation's consolidated balance sheets as derivative assets or liabilities with offsetting changes in fair value, to the extent effective, recognized in AOCI until reclassified into earnings when the related forecasted transaction occurs. The portion of a cash flow hedge that does not offset the change in the fair value of the transaction being hedged, which is commonly referred to as the ineffective portion, is immediately recognized in earnings. The results of derivative activities are recorded in cash flows from operating activities on the consolidated statements of cash flows.

Derivative instruments that are utilized by EME for trading purposes are measured at fair value and included on the consolidated balance sheets as derivative assets or liabilities, with offsetting changes recognized in operating revenues on the consolidated statements of operations.

Where EME's and Midwest Generation's derivative instruments are subject to a master netting agreement or contain collateral deposit requirements and the criteria of authoritative guidance are met, EME presents its derivative assets

and liabilities on a net basis on its consolidated balance sheets. EME's and Midwest Generation's master netting agreements allow for the right of offset for contracts with physical settlement. They do not allow for cross commodity settlement unless all positions are liquidated.

Since EME's and Midwest Generation's credit ratings are below investment grade, EME and its subsidiaries have provided collateral in the form of cash and letters of credit for the benefit of derivative counterparties and brokers. The amount of

22

Table of Contents

margin and collateral deposits generally varies based on changes in fair value of the related positions. Future changes in power prices could expose EME and Midwest Generation to additional collateral postings.

EME's and Midwest Generation's approach to trading and risk management depends, in part, on the ability to use clearing brokers to enter into market transactions. As a result of their financial position, EME and Midwest Generation have limited access to enter into such transactions and have been subject to increased initial collateral and margin requirements. There is no assurance that EME and Midwest Generation will continue to be able to utilize clearing brokers. If EME and Midwest Generation become unable to utilize clearing brokers, they may seek to execute bilateral transactions with third parties which could be unavailable on commercially reasonable terms or at all.

Notional Volumes of Derivative Instruments

The following table summarizes notional volumes of derivatives used for hedging and trading activities:

September 30, 2013

Commodity Instrument	Classification	Unit of Measure	Cash Flow Hedges			Economic Hedges			Trading Activities	
			Midwest Generation	Other EME Subsidiaries	EME	Midwest Generation	Other EME Subsidiaries	EME	Other EME Subsidiaries	EME
Electricity	Forwards/Futures	Sales, net	GWh ¹	908	—	908	—	13	13	² —

¹ gigawatt-hours (GWh); gigawatts-day (GW-Day); billion cubic feet (bcf); cooling degree day (CDD).

These positions adjust financial and physical positions, or day-ahead and real-time positions to reduce costs or

² increase gross margin. The net sales positions of these categories are primarily related to hedge transactions that are not designated as cash flow hedges.

³

Hedge transactions for capacity result from bilateral trades. Capacity sold in the PJM Interconnection, LLC Reliability Pricing Model (PJM RPM) auction is not accounted for as a derivative.

Congestion contracts include financial transmission rights, transmission congestion contracts, or congestion revenue⁴ rights. These positions are similar to a swap, where the buyer is entitled to receive a stream of revenues (or charges) based on the hourly day-ahead price differences between two locations.

EME

Interest Rate Risk Management

EME mitigates the risk of interest rate fluctuations for a number of its project financings by arranging for fixed rate financing or variable rate financing with interest rate swaps, interest rate options, or other hedging mechanisms. Through July 2013, as a result of the Chapter 11 Cases and the short-term forbearance agreements that had been executed with the lenders and the EME subsidiary borrowers, EME could no longer conclude it was probable that the future interest payments associated with the Viento II Financing would occur. Accordingly, the cash flow hedges associated with these interest rate swaps were prospectively discontinued. Unrealized gains of \$1 million and \$6 million during the three and nine months ended September 30, 2013, respectively, were recorded in interest expense on the consolidated statements of operations from changes in the fair value of interest rate swaps. In conjunction with the amendment of the Viento II

Table of Contents

Financing in July 2013, EME entered into new interest rate swaps and re-designated the existing interest rate swaps as cash flow hedges. Interest rate swap termination fees of \$6 million were recorded as reduction to derivative liabilities on the consolidated balance sheets. For additional information, see Note 5—Debt and Credit Agreements.

The following table summarizes EME's interest rate swaps:

	Effective Date	Expiration Date	Fixed Swap Rate Paid	Notional Value (in millions)	
				September 30, 2013	December 31, 2012
Project Financing					
Viento Funding II	June 2009	June 2016	3.18%	\$55	\$65
Viento Funding II	March 2011	December 2020	3.42%	30	108
Viento Funding II	July 2013	July 2023	3.03%	96	—
Cedro Hill	December 2010	December 2025	4.29%	107	112

¹ EME's interest rate swaps are not subject to master netting agreements and do not require EME to post collateral.

Table of Contents

EME's subsidiaries have posted \$85 million and \$61 million cash margin in the aggregate with various counterparties at September 30, 2013 and December 31, 2012, respectively, to support hedging and trading activities. The cash margin posted is required by counterparties as an initial collateral deposit and cannot be offset against the fair value of open contracts except in the event of default. EME's exposure is composed of \$42 million and \$44 million of net accounts receivable at September 30, 2013 and December 31, 2012, respectively. For positions subject to a master netting agreement, EME is in a net asset position, and in the event of default, cash collateral would be returned to EME. EME did not have any collateral received from counterparties as of September 30, 2013 and December 31, 2012.

Income Statement Impact of Derivative Instruments

The following table provides the cash flow hedge activity as part of EME's AOCI:

(in millions)	Nine Months Ended September 30,			
	2013		2012	
	Commodity Contracts	Interest Rate Contracts	Commodity Contracts	Interest Rate Contracts
Beginning of period derivative gains (losses)	\$(1)	\$(118)	\$35	\$(90)
Effective portion of changes in fair value	(2)	38	3	(35)
Reclassification to operating revenues	3	—	(31)	—
Reclassification to interest expense	—	4	—	—
End of period derivative gains (losses) ¹	\$—	\$(76)	\$7	\$(125)

¹ Unrealized derivative gains (losses) are before income taxes. Amounts recorded in AOCI include commodity and interest rate contracts. For additional information, see Note 11—Accumulated Other Comprehensive Loss.

EME recorded net gains (losses) of none and \$(2) million during the third quarter of 2013 and 2012, respectively, and \$(1) million and none during the nine months ended September 30, 2013 and 2012, respectively, in operating revenues on the consolidated statements of operations representing the amount of cash flow hedge ineffectiveness. EME also reclassified \$4 million of unrealized losses in AOCI to interest expense on the consolidated statements of operations in the nine months ended September 30, 2013 due to the discontinuation of the Viento II interest rate swaps.

The effect of realized and unrealized gains from derivative instruments used for economic hedging and trading purposes on the consolidated statements of operations is presented below:

(in millions)	Income Statement Location	Three Months Ended September 30,		Nine Months Ended September 30,	
		2013	2012	2013	2012
Economic hedges	Operating revenues	\$(4)	\$8	\$(6)	\$25
	Fuel	—	3	—	2
Trading activities	Operating revenues	24	22	66	72

Midwest Generation

Summary of Derivative Instruments

The following table summarizes Midwest Generation's commodity short-term derivative instruments for non-trading purposes, including amounts offset by collateral and under master netting agreements:

(in millions)	September 30, 2013			December 31, 2012		
	Gross	Netting and Collateral	Net	Gross	Netting and Collateral	Net
Assets						
Electricity contracts	\$5	\$(4))\$1	\$12	\$(10))\$2
Liabilities						
Electricity contracts	\$6	\$(4))\$2	\$13	\$(10))\$3

Midwest Generation does not have any long-term derivative assets and liabilities at September 30, 2013 and December 31, 2012.

Income Statement Impact of Derivative Instruments

The following table provides the cash flow hedge activity as part of Midwest Generation's AOCI:

(in millions)	Nine Months Ended	
	September 30, 2013	2012
Beginning of period derivative gains (losses)	\$(2)) \$34
Effective portion of changes in fair value	(2)) 5
Reclassification to operating revenues	4	(32)
End of period derivative gains (losses) ¹	\$—	\$7

¹ Unrealized derivative gains (losses) are before income taxes. Amounts recorded in AOCI include commodity contracts. For additional information, see Note 11—Accumulated Other Comprehensive Loss.

Midwest Generation recorded net gains (losses) of none and \$(2) million during the third quarter of 2013 and 2012, respectively, and \$(1) million and none during the nine months ended September 30, 2013 and 2012, respectively, in operating revenues on the consolidated statements of operations representing the amount of cash flow hedge ineffectiveness.

The effect of realized and unrealized gains from derivative instruments used for non-trading purposes on the consolidated statements of operations is presented below:

(in millions)	Income Statement Location	Three Months Ended		Nine Months Ended	
		September 30, 2013	2012	September 30, 2013	2012
Economic hedges	Operating revenues	\$(4)) \$8	\$(6)) \$24
	Fuel	—	3	—	2

Taxes on income allocated to noncontrolling interests	(1)	(1)	(7)	(5)
Other	—	(1)	4	1
Total provision (benefit) for income taxes from continuing operations	\$ 3	\$ (47)	\$ (25)	\$ (204)
Effective tax rate	*	35 %	4 %	48 %

*Not meaningful.

Estimated state income tax benefits allocated from EIX for the three and nine months ended September 30, 2013 and 2012 were \$(1) million and none, respectively, and \$2 million and \$7 million, respectively. The benefit for state taxes was lower in 2012 due to an adjustment in state apportionment factors.

EME's right to receive payments under the tax-allocation agreements and the timing and amount of those payments are dependent on the inclusion of EME in the consolidated income tax returns of EIX and other factors, including the amount of consolidated taxable income and net operating loss carryforwards of EIX, and other tax items of EME and other subsidiaries of EIX. In November 2012, EIX modified the tax-allocation agreements to provide for termination of EME's participation on December 31, 2013. Termination does not relieve any party of any obligations with respect to any tax year beginning prior to the year of termination. During the third quarter of 2013, EIX filed its federal consolidated tax return for the year 2012. In connection with EIX's finalization of the tax return, EME recorded a non-cash contribution from EIX of \$32 million related to tax benefits which EME had previously believed would be used in EIX consolidated tax return on a statutory basis but would not be paid under the tax-allocation agreements. In addition, during the first nine months of 2013, EME received a net tax-allocation payment from EIX of approximately \$7 million of which \$6 million was treated as an equity contribution as it was a partial payment for tax benefits previously recorded as non-cash distributions. In total, EME recorded contributions from EIX related to the tax-allocation agreements of \$38 million during 2013.

Without objectively verifiable evidence supporting the taxable income forecast of the EIX consolidated tax group during 2013, EME is not currently able to determine whether it is more likely than not that future tax-sharing payments will occur. EME's deferred tax asset valuation allowance increased to \$742 million at September 30, 2013 from \$444 million at December 31, 2012 partially due to \$167 million related to an asset impairment charge on the Will County Station recorded during the third quarter of 2013. For additional information, see Note 13—Impairment of Long-Lived Assets.

Tax Dispute

The Internal Revenue Service examination phase of tax years 2003 through 2006, which included a proposed adjustment related to EME, was completed in the fourth quarter of 2010. The proposed adjustment increases the taxable gain on the 2004 sale of EME's international assets, which if sustained, would result in a federal tax payment

of approximately \$205 million, including approximately \$57 million of interest and \$42 million in penalties through September 30, 2013. EME disagrees with the proposed adjustment and filed a protest with the Internal Revenue Service in the first quarter of 2011. The appeals

Table of Contents

process to date has not resulted in a change in the proposed adjustment by the Internal Revenue Service. EME continues to seek resolution through the appeals process and has requested technical advice from the Internal Revenue Service National Office.

Midwest Generation

Effective Tax Rate

The table below provides a reconciliation of income tax benefit computed at the federal statutory income tax rate to the income tax benefit:

(in millions)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
Loss before income taxes	\$(472)	\$(19)	\$(619)	\$(102)
Benefit for income taxes at federal statutory rate of 35%	\$(166)	\$(7)	\$(217)	\$(36)
Increase (decrease) in income tax from				
State tax, net of federal benefit	(20)	(1)	(28)	(5)
Change in valuation allowance	183	—	243	—
Other	2	1	2	2
Total benefit for income taxes	\$(1)	\$(7)	\$—	\$(39)
Effective tax rate	*	37	% *	38

*Not meaningful.

As a result of the recently recognized losses and the indications of expected future losses, Midwest Generation increased its deferred tax valuation allowance to \$776 million at September 30, 2013 from \$533 million at December 31, 2012. At December 31, 2012, \$106 million of tax benefits that would have been collected by Midwest Generation in a hypothetical tax return prepared on a separate return basis but was not collectible under Midwest Generation's tax-allocation agreement were accounted for as non-cash distributions to Midwest Generation's parent. Midwest Generation's tax-allocation agreement only permits the use of net operating losses to offset future taxable income and does not include the right to receive payments.

Note 8. Compensation and Benefit Plans (EME and Midwest Generation, except as noted)

Pension Plans and Postretirement Benefits Other than Pensions

Pension Plans

During the nine months ended September 30, 2013, EME and Midwest Generation made contributions of \$8 million and \$4 million, respectively, and during the remainder of 2013, expect to make additional contributions of \$3 million and \$3 million, respectively.

The following were components of pension expense:

(in millions)	Three Months Ended September 30, 2013			2012		
	Midwest Generation	Other EME Sub- sidiaries ¹	EME	Midwest Generation	Other EME Sub- sidiaries ¹	EME

Total expense	\$4.0	\$1.6	\$5.6	\$4.5	\$1.7	\$6.2

¹ Excludes Homer City.

Effective May 1, 2013, Homer City terminated further access and company subsidy of postretirement medical, dental, vision and life insurance coverage. For further discussion, see Note 14—Discontinued Operations.

Transfer of Certain Postretirement Benefits to EIX (EME only)

During 2012, EME transferred the executive deferred compensation and executive postretirement benefit liabilities related to active employees to EIX. EME agreed to fund changes to the projected benefit obligation of the executive postretirement benefits and the employer portion of the executive deferred compensation plan through EME's emergence from bankruptcy. During the nine months ended September 30, 2013, EME funded \$3 million in connection with this agreement.

Table of Contents

Note 9. Commitments and Contingencies (EME and Midwest Generation, except as noted)

Lease Commitments

Powerton and Joliet Sale Leaseback

Covenants in the Powerton and Joliet Sale Leaseback documents include restrictions on the ability of EME and Midwest Generation to, among other things, incur debt, create liens on their property, merge or consolidate, sell assets, make investments, engage in transactions with affiliates, make distributions, make capital expenditures, enter into agreements restricting their ability to make distributions, engage in other lines of business, enter into swap agreements, or engage in transactions for any speculative purpose.

The filing of the Chapter 11 Cases constitutes an event of default under the Powerton and Joliet Sale Leaseback and under instruments governing the Senior Lease Obligation Bonds issued to finance these leases. Prior to the filing of the Chapter 11 Cases, EME and Midwest Generation had entered into a forbearance agreement with the owner-lessors, the owner-lessors' equity owners, and the Certificate Holders. Under the terms of the forbearance agreement, Midwest Generation did not make the scheduled lease payment of \$76 million on January 2, 2013, but on February 15, 2013, did pay the ratable portion of the rent due under the leases attributable to the period between December 17, 2012 and January 2, 2013 of \$7 million. This forbearance agreement has expired. In June 2013, EME and Midwest Generation agreed, among other things, to make monthly rental payments of \$3.75 million beginning in July 2013, in lieu of the scheduled \$76 million lease payment due on July 2, 2013. In addition, the Bankruptcy Court approved the extension of the statutory deadline by which the Debtor Entities must assume or reject the Powerton and Joliet leases until December 31, 2013. Upon completion of the NRG Sale, Midwest Generation would assume the Powerton and Joliet leases. EME would retain all liabilities with respect to the payment of the cure amount as set forth in the Asset Purchase Agreement (the Powerton and Joliet Cure Amount). The cure amount would have been approximately \$150 million at September 30, 2013. For additional information, see Note 15—Restructuring Activities—NRG Sale. Each lease sets forth a termination value payable upon certain circumstances, which generally declines over time. A default under the terms of the Powerton and Joliet leases could result in foreclosure and a loss by Midwest Generation of its lease interest in the plant. In addition, under certain circumstances, a default would trigger obligations under EME's guarantee of such leases. These events could have an adverse effect on EME's and Midwest Generation's results of operations and financial position.

Operating Lease Commitments

At September 30, 2013, Midwest Generation had future minimum operating lease payments totaling approximately \$4 million, which consists of \$1 million for the remainder of 2013, \$1 million for 2014, \$1 million for 2015, and \$1 million for 2016. Future minimum operating lease commitments decreased from December 31, 2012 primarily due to amended contracts and the rejection of executory contracts in connection with the Chapter 11 Cases.

Other Commitments

Fuel Supply Contracts

At September 30, 2013, Midwest Generation had commitments to purchase coal from third-party suppliers at fixed prices, subject to adjustment clauses. These commitments under existing agreements are estimated to aggregate \$336 million, which consists of: \$186 million for the remainder of 2013 and \$150 million for 2014. Midwest Generation has the right to reject these fuel supply contracts in connection with the Chapter 11 Cases.

Capital Commitments

At September 30, 2013, Midwest Generation had firm commitments to spend approximately \$8 million during the remainder of 2013 and \$1 million for 2014 for capital expenditures.

Other Contractual Obligations

At September 30, 2013, Midwest Generation had contractual commitments for the purchase of materials used in the operation of environmental controls equipment. These commitments are estimated to aggregate \$19 million, which consists of \$4 million for the remainder of 2013 and \$15 million for 2014.

At September 30, 2013, EME's other subsidiaries had contractual commitments primarily related to turbine operations and maintenance agreements. These commitments are estimated to aggregate \$88 million, which consists of \$5 million for the

Table of Contents

remainder of 2013, \$31 million for 2014, \$27 million for 2015, \$17 million for 2016, \$7 million for 2017, and \$1 million thereafter.

Guarantees and Indemnities

EME and certain of its subsidiaries have various financial and performance guarantees and indemnity agreements which are issued in the normal course of business. The contracts discussed below include performance guarantees.

Environmental Indemnities Related to the Midwest Generation Plants

In connection with the acquisition of the Midwest Generation plants, EME and Midwest Generation agreed to indemnify Commonwealth Edison Company (Commonwealth Edison) with respect to specified environmental liabilities before and after December 15, 1999, the date of sale. The indemnification obligations are reduced by any insurance proceeds and tax benefits related to such indemnified claims and are subject to a requirement that Commonwealth Edison takes all reasonable steps to mitigate losses related to any such indemnification claim. Also, in connection with the Powerton and Joliet Sale Leaseback, EME agreed to indemnify the owner-lessors for specified environmental liabilities. These indemnities are not limited in term or amount. Due to the nature of the obligations under these indemnities, a maximum potential liability cannot be determined. Commonwealth Edison has advised EME that Commonwealth Edison believes it is entitled to indemnification for all liabilities, costs, and expenses that it may be required to bear as a result of the litigation discussed below under "—Contingencies—Midwest Generation New Source Review and Other Litigation," and one of the Powerton-Joliet owner-lessors has made a similar request for indemnification. Except as discussed below, EME and Midwest Generation have not recorded a liability related to these environmental indemnities.

Midwest Generation entered into a supplemental agreement with Commonwealth Edison and Exelon Generation Company LLC on February 20, 2003 to resolve a dispute regarding interpretation of Midwest Generation's reimbursement obligation for asbestos claims under the environmental indemnities set forth in the Asset Sale Agreement. Under this supplemental agreement, Midwest Generation agreed to reimburse Commonwealth Edison and Exelon Generation for 50% of specific asbestos claims pending as of February 2003 and related expenses less recovery of insurance costs and agreed to a sharing arrangement for liabilities and expenses associated with future asbestos-related claims as specified in the agreement. The obligations under this agreement are not subject to a maximum liability. The supplemental agreement had an initial five-year term with an automatic renewal provision for subsequent one-year terms (subject to the right of either party to terminate); pursuant to the automatic renewal provision, the supplemental agreement has been extended until February 2014. There were approximately 276 cases for which Midwest Generation was potentially liable that had not been settled and dismissed at September 30, 2013. Midwest Generation had \$53 million recorded in LSTC at September 30, 2013 related to this contractual indemnity. For discussion of LSTC, see Note 15—Restructuring Activities.

Indemnities Related to the Homer City Plant (EME only)

In connection with the 1999 acquisition of the Homer City plant from New York State Electric & Gas Corporation (NYSEG) and Pennsylvania Electric Company (Penelec) (the sellers), Homer City agreed to indemnify the sellers with respect to specified environmental liabilities before and after the date of sale. EME guaranteed this indemnity obligation of Homer City. In connection with Homer City's divestiture of assets to an affiliate of General Electric Capital Corporation (GECC) on December 14, 2012, EME re-affirmed its guaranty to NYSEG and Penelec. Also in connection with the recent asset transfer to the GECC affiliate, all operative documents with respect to Homer City's sale leaseback (including all EME indemnities in favor of the former owner-lessors) were terminated. In connection with the transfer, the GECC affiliate did not assume (and Homer City retained) liabilities for monetary fines and penalties for violations of environmental laws or environmental permits prior to the closing date. EME has not recorded a liability related to this indemnity. For discussion of the New Source Review lawsuit filed against Homer City, see "—Contingencies—Homer City New Source Review and Other Litigation."

Indemnities Provided under Asset Sale and Sale Leaseback Agreements

The asset sale agreements for the sale of EME's international assets contain indemnities from EME to the purchasers, including indemnification for taxes imposed with respect to operations of the assets prior to the sale and for pre-closing environmental liabilities. Not all indemnities under the asset sale agreements have specific expiration dates. At September 30, 2013, EME had \$20 million recorded in LSTC related to these matters. For discussion of

LSTC, see Note 15—Restructuring Activities.

In connection with the Powerton and Joliet Sale Leaseback and, previously, a sale leaseback transaction related to the Collins Station in Illinois, EME, Midwest Generation, and another wholly owned subsidiary of EME entered into tax indemnity agreements. Under certain of these tax indemnity agreements, Midwest Generation, as the lessee in the Powerton and Joliet Sale Leaseback, agreed to indemnify the respective owner-lessors for specified adverse tax consequences that could result

32

Table of Contents

from certain situations set forth in each tax indemnity agreement, including specified defaults under the respective leases. Although the Collins Station lease terminated in April 2004, Midwest Generation's indemnities in favor of its former lease equity investors are still in effect. EME provided similar indemnities in the Powerton and Joliet Sale Leaseback. The potential indemnity obligations under these tax indemnity agreements could be significant. Due to the nature of these potential obligations, EME and Midwest Generation cannot determine a range of estimated obligations which would be triggered by a valid claim from the owner-lessors. EME and Midwest Generation have not recorded a liability for these matters.

Other Indemnities

EME and Midwest Generation provide other indemnifications through contracts entered into in the normal course of business. These include, among other things, indemnities for specified environmental liabilities and for income taxes with respect to assets sold. EME's and Midwest Generation's obligations under these agreements may or may not be limited in terms of time and/or amount, and in some instances, EME and Midwest Generation may have recourse against third parties. EME and Midwest Generation cannot determine a range of estimates and have not recorded a liability related to these indemnities.

Contingencies

In addition to the matters disclosed in these notes, EME and Midwest Generation are involved in other legal, tax, and regulatory proceedings before various courts and governmental agencies regarding matters arising in the ordinary course of business. EME and Midwest Generation believe the outcome of these other proceedings, individually and in the aggregate, will not materially affect their results of operations or liquidity.

Midwest Generation New Source Review and Other Litigation

In August 2009, the United States Environmental Protection Agency (US EPA) and the State of Illinois filed a complaint in the United States District Court for the Northern District of Illinois alleging that Midwest Generation or Commonwealth Edison performed repair or replacement projects at six Illinois coal-fired electric generating stations in violation of the Prevention of Significant Deterioration (PSD) requirements and of the New Source Performance Standards of the Clean Air Act (CAA), including alleged requirements to obtain a construction permit and to install controls sufficient to meet best available control technology (BACT) emission rates. The US EPA also alleged that Midwest Generation and Commonwealth Edison violated certain operating permit requirements under Title V of the CAA. Finally, the US EPA alleged violations of certain opacity and particulate matter standards at the Midwest Generation plants. In addition to seeking penalties ranging from \$25,000 to \$37,500 per violation per day, the complaint called for an injunction ordering Midwest Generation to install controls sufficient to meet BACT emission rates at all units subject to the complaint and other remedies. The remedies sought by the plaintiffs in the lawsuit could go well beyond the requirements of the Combined Pollutant Standard (CPS). Several Chicago-based environmental action groups intervened in the case.

Nine of the ten PSD claims raised in the complaint have been dismissed, along with claims related to alleged violations of Title V of the CAA, to the extent based on the dismissed PSD claims, and all claims asserted against Commonwealth Edison and EME. The dismissals were affirmed by the Seventh Circuit Court of Appeals in July 2013. The court denied a motion to dismiss a claim by the Chicago-based environmental action groups for civil penalties in the remaining PSD claim but noted that the plaintiffs will be required to convince the court that the statute of limitations should be equitably tolled. The court did not address other counts in the complaint that allege violations of opacity and particulate matter limitations under the Illinois State Implementation Plan and Title V of the CAA. In February 2012, certain of the environmental action groups that had intervened in the case entered into an agreement with Midwest Generation to dismiss without prejudice all of their opacity claims as to all defendants. The agreed upon motion to dismiss was approved by the court on March 26, 2012.

In January 2012, two complaints were filed against Midwest Generation in Illinois state court by residents living near the Crawford and Fisk Stations on behalf of themselves and all others similarly situated, each asserting claims of nuisance, negligence, trespass, and strict liability. The plaintiffs seek to have their suits certified as a class action and request injunctive relief, as well as compensatory and punitive damages. The complaints are similar to two complaints previously filed in the United States District Court for the Northern District of Illinois, which were dismissed in October 2011 for lack of federal jurisdiction. Midwest Generation's motions to dismiss the cases were denied in

August 2012, following which the plaintiffs filed amended complaints alleging substantially similar claims and requesting similar relief. Midwest Generation has filed motions to dismiss the amended complaints, and these complaints are stayed as a result of the Chapter 11 Cases.

In October 2012, Midwest Generation and the Illinois Environmental Protection Agency entered into Compliance Commitment Agreements outlining specified environmental remediation measures and groundwater monitoring activities to be undertaken at its Powerton, Joliet, Crawford, Will County, and Waukegan generating stations. Midwest Generation has submitted certification to the Illinois Environmental Protection Agency that all compliance measures have been successfully

Table of Contents

completed. Also in October 2012, several environmental groups filed a complaint before the Illinois Pollution Control Board against Midwest Generation, alleging violations of the Illinois groundwater standards through the operation of coal ash disposal ponds at its Powerton, Joliet, Waukegan, and Will County generating stations. The complaint requests the imposition of civil penalties, injunctive relief, and remediation. The matter is currently stayed as a result of the Chapter 11 Cases, although that stay was lifted in part in April 2013 so that the proceedings could continue for the sole purpose of adjudicating Midwest Generation's motion to dismiss the complaint. On October 3, 2013, the Pollution Control Board denied Midwest Generation's motion to dismiss the complaint.

In December 2012, the Sierra Club filed a complaint before the Illinois Pollution Control Board against Midwest Generation, alleging violations of sulfur dioxide (SO₂) emissions standards at its Powerton, Joliet, Waukegan, and Will County generating stations. The complaint is based on alleged violations of the US EPA National Ambient Air Quality Standards (NAAQS) regulations for 1-hour SO₂, which have not yet been incorporated into any specific state implementation plan in Illinois. The complaint requests the imposition of civil penalties, injunctive relief, and the imposition of further reductions on SO₂ emissions to offset past emissions. The complaint is currently stayed as a result of the Chapter 11 Cases. On October 16, 2013, the Bankruptcy Court heard argument on the Sierra Club's motion to lift the automatic stay. The court took the matter under advisement.

Adverse decisions in these cases could involve penalties, remedial actions, and damages that could have a material impact on the financial condition and results of operations of Midwest Generation and EME. EME cannot predict the outcome of these matters or estimate the impact on the Midwest Generation plants, or EME's and Midwest Generation's results of operations, financial position, or cash flows. EME and Midwest Generation have not recorded a liability for these matters.

Homer City New Source Review and Other Litigation (EME only)

In January 2011, the US EPA filed a complaint in the United States District Court for the Western District of Pennsylvania against Homer City, the sale leaseback owner participants of the Homer City plant, and two prior owners of the Homer City plant. The complaint alleged violations of the PSD and Title V provisions of the CAA as a result of projects in the 1990s performed by prior owners without PSD permits and the subsequent failure to incorporate emissions limitations that meet BACT into the station's Title V operating permit. In addition to seeking penalties ranging from \$32,500 to \$37,500 per violation per day, the complaint called for an injunction ordering Homer City to install controls sufficient to meet BACT emission rates at all units subject to the complaint and for other remedies. The PADEP, the State of New York, and the State of New Jersey intervened in the lawsuit. In October 2011, all of the claims in the US EPA's lawsuit were dismissed with prejudice. The dismissal was affirmed by the United States Court of Appeals for the Third Circuit in August 2013.

Adverse decisions in this case could involve penalties, remedial actions, and damages. EME cannot predict the outcome of these matters or estimate the impact on its results of operations, financial position, or cash flows. EME has not recorded a liability for these matters.

Environmental Remediation

Legislative and regulatory activities by federal, state, and local authorities in the United States relating to energy and the environment impose numerous restrictions and requirements with respect to the operation of EME's existing facilities, including the Midwest Generation plants, and affect the timing, cost, location, design, construction, and operation of new facilities by EME's subsidiaries, as well as the cost of mitigating the environmental impacts of past operations.

With respect to potential liabilities arising under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA) or similar laws for the investigation and remediation of contaminated property, EME and Midwest Generation accrue a liability to the extent the costs are probable and can be reasonably estimated.

Midwest Generation had accrued a probable amount of approximately \$8 million at September 30, 2013 for estimated environmental investigation and remediation costs for two stations at the Midwest Generation plants. This estimate is based upon the number of sites, the scope of work, and the estimated costs for investigation and/or remediation where such expenditures could be reasonably estimated. EME and Midwest Generation also have identified sites for which a reasonable estimate cannot be made. Future estimated costs may vary based on changes in regulations or requirements of federal, state or local governmental agencies, changes in technology, and actual costs of disposal. In addition,

future remediation costs will be affected by the nature and extent of contamination discovered at the sites that require remediation. Given the prior history of the operations at its facilities, EME and Midwest Generation cannot be certain that the existence or extent of all contamination at its sites has been fully identified.

Table of Contents

Chevron Adversary Proceeding (EME only)

In December 2012, Chevron Kern River Company and Chevron Sycamore Cogeneration Company filed a complaint against Southern Sierra Energy Company and Western Sierra Energy in the Chapter 11 Cases. The plaintiffs and defendants are partners in the Kern River and Sycamore projects. The complaint alleged that the filing of the Chapter 11 Cases constituted a default under the partnership agreements related to those projects, entitling the defendants to expel the plaintiffs from the partnerships and pay for their interests at a price based on the net book value of the partnerships, and sought a declaratory judgment, injunctive relief, and relief from the automatic stay in support of those alleged remedies. In January 2013, the Bankruptcy Court denied the plaintiffs' request for relief from the automatic stay and a preliminary injunction. The plaintiffs filed a notice of appeal, and the defendants moved to stay proceedings until the plaintiffs' appeal was decided. In September 2013, the U.S. District Court issued an order denying the plaintiffs' request for leave to appeal the denial of the preliminary injunction, and permitting their appeal from denial of the motion for relief from the automatic stay.

Note 10. Environmental Developments (EME, Midwest Generation)

Midwest Generation Environmental Compliance Plans and Costs

On April 4, 2013, Midwest Generation was granted a variance, subject to various conditions, by the Illinois Pollution Control Board from the CPS system-wide annual SO₂ emission rate in 2015 and 2016 and an extension of the Waukegan Unit 8 unit specific retrofit requirements from December 31, 2014 until May 31, 2015. Among the conditions of the variance, the Illinois Pollution Control Board accelerated the unit specific retrofit requirements of Powerton Unit 6 to December 31, 2014 and required the retrofitting of Waukegan Unit 7 by December 31, 2014. Midwest Generation has accepted the variance. As a result of the variance, it is more likely that Midwest Generation will install environmental controls at Waukegan Unit 7, which had been impaired from an accounting perspective during the fourth quarter of 2011. If Midwest Generation ultimately decides to install environmental controls at Waukegan Unit 7, less of Midwest Generation's available liquidity will be available to install environmental controls at other units. The likelihood of installation of environmental controls at each station is a key judgment used in developing probability weighted undiscounted cash flows for the purposes of impairment testing under ASC 360. For information on the impairment charge relating to the Will County Station, see Note 13—Impairment of Long-Lived Assets. Decreases in the expected likelihood of installing environmental controls or other decreases in expected future cash flows at Midwest Generation's remaining plants could result in additional impairment charges.

The following table summarizes Midwest Generation's carrying value for the Midwest Generation plants:

(in millions)	September 30, 2013
Joliet Station ¹	\$674
Powerton Station	802
Fleet assets	66
Property, Plant and Equipment, net	\$1,542

¹ The Joliet Station is composed of Units 6, 7, and 8.

Greenhouse Gas Regulation

In September 2013, the US EPA issued proposed regulations governing greenhouse gas (GHG) emissions from new electric generating stations. The US EPA intends to issue proposed GHG emission standards for reconstructed and existing electric generating stations in June 2014 and to promulgate such standards in June 2015. States would be required to submit their implementation plans responding to such guidelines to the US EPA one year after the regulations are promulgated.

Greenhouse Gas Litigation

In April 2013, the United States Court of Appeals for the Fifth Circuit dismissed, as to EME and three wholly owned EME subsidiaries, the plaintiffs' appeal of the Mississippi federal district court's dismissal of a lawsuit filed in March 2012 against a large number of defendants (including EME and the three subsidiaries). The plaintiffs had alleged that defendants' activities resulted in emissions of substantial quantities of GHG that have contributed to climate change and sea level rise, which in turn were alleged to have increased the destructive force of Hurricane Katrina.

Table of Contents

In May 2013, the United States Supreme Court declined to review the dismissal by the United States Court of Appeals for the Ninth Circuit of a case brought against EME's parent company, EIX, and other defendants, by the Alaskan Native Village of Kivalina.

Cross-State Air Pollution Rule

The U.S. Supreme Court has agreed to review the United States Court of Appeals for the District of Columbia Circuit's August 2012 decision, which vacated the US EPA's Cross-State Air Pollution Rule and directed the US EPA to continue administering the Clean Air Interstate Rule pending the promulgation of a valid replacement.

Water Quality

Regulations under the Clean Water Act that would affect cooling water intake structures at generating facilities, previously expected to be finalized by June 2013, are now expected in November 2013.

In June 2013, the US EPA proposed changes to the Steam Electric Guideline Regulation which sets discharge limits for various operations which discharge to waters of the United States. EME is reviewing the proposed rule and intends to provide comments. The rule is scheduled for issuance by May 2014.

Note 11. Accumulated Other Comprehensive Loss (EME, Midwest Generation)**EME**

EME's AOCI, net of tax and including discontinued operations, consisted of:

(in millions)	Unrealized Gains and Losses on Cash Flow Hedges	Unrecognized Loss and Prior Service Adjustments, Net ¹	Valuation Allowance on Deferred Tax Asset	AOCI
Balance at December 31, 2012	\$(76)	\$(56)	\$(6)	\$(138)
OCI before reclassifications	23	(2)	—	21
Amount reclassified from AOCI	5	3	—	8
Balance at September 30, 2013 ²	\$(48)	\$(55)	\$(6)	\$(109)

¹ For further detail, see Note 8—Compensation and Benefit Plans.

² EME and Midwest Generation both expect to reclassify unrealized losses on cash flow hedges into earnings in the next 12 months. For further explanation, see "—Unrealized Losses on Cash Flow Hedges."

The after-tax amounts recorded in AOCI at September 30, 2013 and December 31, 2012 for commodity contracts were losses of none and \$1 million, respectively, and for interest rate contracts were losses of \$48 million and \$75 million, respectively. EME's significant items reclassified out of AOCI and the effect on the statement of operations consisted of:

(in millions)	Three Months Ended September 30,	Nine Months Ended September 30,	Affected Line Item in the Statement of Operations
Unrealized gains and losses on cash flow hedges			
Electricity commodity hedges	\$(5)	\$(4)	Operating revenues
Interest rate contracts	(6)	(4)	Interest expense
Tax benefit	4	3	Benefit for income taxes
Total, net	\$(7)	\$(5)	Net loss
Amortization of retirement benefit items			
Unamortized prior service cost on terminated plan	\$—	\$(2)	Plant operations and administrative and general ¹
Actuarial losses	(2)	(3)	Plant operations and administrative and general ¹
Tax benefit	1	2	Benefit for income taxes
Total, net	\$(1)	\$(3)	Net loss

For the three and nine months ended September 30, 2013, \$1 million and \$3 million were reclassified from AOCI to plant operations, respectively, and \$1 million and \$2 million from AOCI to administrative and general expenses, respectively.

Table of Contents

Midwest Generation

Midwest Generation's AOCI, net of tax, consisted of:

(in millions)	Unrealized Gains and Losses on Cash Flow Hedges	Unrecognized Loss and Prior Service Adjustments, Net ¹	Valuation Allowance on Deferred Tax Asset	AOCI
Balance at December 31, 2012	\$(1)	\$(37)	\$(12)	\$(50)
OCI before reclassifications	(1)	—	—	(1)
Amount reclassified from AOCI	2	2	—	4
Balance at September 30, 2013	\$—	\$(35)	\$(12)	\$(47)

¹ For further detail, see Note 8—Compensation and Benefit Plans.

Midwest Generation's significant items reclassified out of AOCI and the effect on the statement of operations consisted of:

(in millions)	Three Months Ended September 30,	Nine Months Ended September 30,	Affected Line Item in the Statement of Operations
Unrealized gains and losses on cash flow hedges			
Electricity commodity hedges	\$(5)	\$(4)	Operating revenues
Tax benefit	2	2	Benefit for income taxes
Total, net	\$(3)	\$(2)	Net loss
Amortization of retirement benefit items			
Prior services costs	\$—	\$(1)	Plant operations
Actuarial losses	(1)	(2)	Plant operations
Tax benefit	—	1	Benefit for income taxes
Total, net	\$(1)	\$(2)	Net loss

Unrealized Losses on Cash Flow Hedges (EME, Midwest Generation)

At September 30, 2013, unrealized losses on cash flow hedges, net of tax, consisted of futures and forward electricity contracts that qualify for hedge accounting. These losses arise because current forecasts of future electricity prices are higher than the contract prices. Unrealized losses on cash flow hedges that are expected to be reclassified into earnings during the next 12 months are immaterial as volumes have declined and the maximum period over which commodity cash flow hedges are designated is December 31, 2013. Management expects that reclassification of net unrealized losses will decrease energy revenues recognized at market prices.

Note 12. Supplemental Cash Flows Information (EME, Midwest Generation)

EME

Supplemental cash flows information for EME, including discontinued operations, consisted of the following:

(in millions)	Nine Months Ended September 30, 2013	2012
Cash paid (received)		
Interest (net of amount capitalized) ¹	\$38	\$156
Income taxes	(12)	168
Cash payments under plant operating leases	18	199
Non-cash contribution from EIX ²	32	—
Non-cash activities from vendor financing	\$7	\$8

¹ Interest paid by EME for September 30, 2013 and 2012 was \$45 million and \$178 million, respectively. Interest capitalized by EME for September 30, 2013 and 2012 was \$7 million and \$22 million, respectively.

Table of Contents

² During 2013, the non-cash contribution from EIX relates to the tax-allocation agreements. For further information, see Note 7—Income Taxes—EME—Effective Tax Rate.

EME's accrued capital expenditures at September 30, 2013 and 2012 were \$3 million and \$17 million, respectively. Accrued capital expenditures will be included as an investing activity in the consolidated statements of cash flows in the period paid.

Midwest Generation

Supplemental cash flows information for Midwest Generation consisted of the following:

(in millions)	Nine Months Ended September 30,	
	2013	2012
Cash paid		
Interest	\$13	\$36

Midwest Generation's accrued capital expenditures at both September 30, 2013 and 2012 were \$3 million and \$2 million, respectively. Accrued capital expenditures will be included as an investing activity on the consolidated statements of cash flows in the period paid.

Note 13. Impairment of Long-Lived Assets (EME, Midwest Generation)

In connection with the preparation of its financial statements in the third quarter of 2013, Midwest Generation concluded, based on continued low realized energy and capacity prices, high fuel costs and low generation and further analysis of its capital allocation strategy, that indicators of potential impairment existed for its Will County Station and an impairment evaluation was performed.

The long-lived asset group that was subject to the impairment evaluation was determined to include the property, plant and equipment of the station. Management updated the probability weighted future undiscounted cash flows expected to be received at the Will County Station and concluded that such amounts did not recover its carrying amount. Forecasted commodity prices and plant dispatch levels are the most significant input into the cash flow estimates. However, as part of these alternative cash flow scenarios, management considered a shortened estimated useful life of the station if environmental improvements were not made.

To measure the amount of the impairment loss, management used the market approach which considers sales of similar facilities and numerous recent decisions by other power generators to shut down similar coal plants rather than install additional equipment corroborated by the income approach which considers discounted cash flows. This resulted in an impairment charge related to the Will County Station of \$464 million. The estimated fair value of zero for the Will County Station was determined using both observable inputs and unobservable inputs, which are Level 3 inputs as defined by accounting guidance for fair value measurements. These inputs included a range of zero to \$169 per kilowatt hour of recent transactions for scrubbed coal plants in similar markets.

Note 14. Discontinued Operations (EME only)

In September 2012, Homer City, a wholly owned indirect subsidiary of EME, and Homer City Generation, L.P., an affiliate of GECC, entered into the Homer City Master Transaction Agreement (MTA) for the divestiture by Homer City of substantially all of its remaining assets and certain specified liabilities. Accordingly, in the third quarter of 2012, Homer City met the definition of a discontinued operation and was classified separately on EME's consolidated financial statements. In December 2012, the transaction closed and Homer City Generation, L.P. assumed control of Homer City. On May 2, 2013, the Homer City Debtors filed voluntary petitions for relief under Chapter 11 of the Bankruptcy Code. For further discussion, see Note 15—Restructuring Activities and Note 16—Condensed Combined Debtors' Financial Information.

Effective May 1, 2013, Homer City withdrew from the benefit plan that provided postretirement medical, dental, vision, and life insurance coverage to certain Homer City retirees, effectively terminating access and company subsidy for these programs. Employees who were eligible for the plan continued to receive coverage for these benefits up to June 30, 2013. As a result of the withdrawal from the plan, EME recorded a pre-tax gain of approximately \$30 million in income (loss) from operations of discontinued subsidiaries on the consolidated statements of operations.

Table of Contents

Summarized results of discontinued operations are:

(in millions)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
Total operating revenues	\$—	\$121	\$—	\$303
Total operating expenses	—	(138)	29	(385)
Asset impairments and other charges	—	(113)	—	(134)
Other income (expense)	(1)	5	—	7
Income (loss) before income taxes	(1)	(125)	29	(209)
Provision (benefit) for income taxes	—	(49)	13	(80)
Income (loss) from operations of discontinued subsidiaries	\$(1)	\$(76)	\$16	\$(129)

The assets and liabilities associated with the discontinued operations are segregated on the consolidated balance sheets are:

(in millions)	September 30, 2013	December 31, 2012
Cash and cash equivalents	\$—	\$2
Other current assets	—	7
Carrying value adjustment	—	(9)
Assets of discontinued operations	\$—	\$—

Note 15. Restructuring Activities (EME, Midwest Generation)

LSTC

EME's LSTC are summarized below:

(in millions)	September 30, 2013	December 31, 2012
Senior notes, net	\$3,700	\$3,700
Accounts payable and accrued liabilities	52	32
Interest payable	154	154
Other	73	73
Total liabilities subject to compromise	\$3,979	\$3,959

In connection with the filing of the Chapter 11 Cases, EME classified both its \$3.7 billion unsecured senior notes and \$154 million of accrued interest related to the unsecured senior notes as LSTC and ceased accruing interest expense.

The accrued interest reclassified to LSTC primarily relates to \$97 million and \$38 million of interest payments that were due on November 15 and December 17, 2012, respectively, that EME did not make. Unpaid contractual interest for the three and nine months ended September 30, 2013 was \$70 million and \$211 million, respectively.

Midwest Generation's LSTC are summarized below:

(in millions)	September 30, 2013	December 31, 2012
Lease financing	\$434	\$434
Accounts payable and accrued liabilities	42	29
Interest payable	13	13
Other	53	53
Total liabilities subject to compromise	\$542	\$529

Table of Contents

In connection with the filing of the Chapter 11 Cases, Midwest Generation classified \$13 million of accrued interest due on the Powerton and Joliet Sale Leaseback as LSTC but did not cease accruing interest expense. Upon closing of the NRG Sale, approximately \$32 million of LSTC will be transferred from Midwest Generation to EME. For further discussion, see Note 9—Commitments and Contingencies—Lease Commitments.

Claims

The Bankruptcy Court established June 17, 2013 and October 29, 2013 as the bar date for filing proofs of claim against the Initial Debtors and Homer City Debtors estates, respectively.

As of the date of this filing, EME and Midwest Generation have received 1,996 and 333 proofs of claim, respectively. New and amended claims may be filed in the future, including claims amended to assign value to claims originally filed with no value. EME and Midwest Generation are in the process of reconciling such claims to the amounts listed in LSTC. LSTC have been recorded based on the expected probable claim, which is subject to judgment and could change as new information develops during the reconciliation process. Differences in liability amounts estimated and claims filed by creditors have been and will continue to be investigated and resolved, including the filing of objections with the Bankruptcy Court as appropriate. Through this process, EME and Midwest Generation may identify that additional liabilities need to be recorded as LSTC and the Bankruptcy Court may determine that liabilities currently estimated as part of LSTC are without merit. The claims resolution process may take considerable time to complete. The resolution of such claims could result in material adjustments to EME or Midwest Generation's financial statements. Determination of how liabilities will ultimately be treated cannot be made until the Bankruptcy Court approves a plan of reorganization. Accordingly, the ultimate amount or treatment of such liabilities is not determinable at this time.

Reorganization Items

Reorganization items represent the direct and incremental costs of bankruptcy, such as professional fees, LSTC claim adjustments, and losses related to terminated contracts that are probable and can be estimated. Professional fees primarily relate to legal and other consultants working directly on the bankruptcy filing.

EME's and Midwest Generation's significant items in reorganization charges consisted of:

(in millions)	Three Months Ended September 30, 2013			Nine Months Ended September 30, 2013		
	Midwest Generation	Other EME Subsidiaries	EME	Midwest Generation	Other EME Subsidiaries	EME
Provision for allowable claims	\$—	\$—	\$—	\$19	\$—	\$19
Professional fees	5	19	24	20	60	80
Reorganization items, net	\$5	\$19	\$24	\$39	\$60	\$99

EME incurred professional fees included in reorganization items, net of \$7 million and \$9 million for the three and nine months ended September 30, 2012, respectively.

Cost Reduction Activities

EME eliminated approximately 150 positions in its regional and corporate offices and generating stations in April 2013, including 120 positions at Midwest Generation. EME recorded charges of approximately \$7 million, and Midwest Generation recorded its share of these charges, a total of \$5 million, in administrative and general expense on their respective consolidated statements of operations in the second quarter of 2013.

NRG Sale

On October 18, 2013, EME, Midwest Generation, and certain other Debtor Entities entered into a Plan Sponsor Agreement (the PSA) with NRG Energy, Inc. (NRG), NRG Holdings Inc., the Official Committee of Unsecured Creditors appointed in the Chapter 11 Cases, the counterparties to the Powerton and Joliet Sale Leaseback and certain of EME's noteholders that are signatories to the PSA, that provides for the parties to support and pursue confirmation by the Bankruptcy Court of a chapter 11 plan (the Plan), that will implement a reorganization of the Debtor Entities through a sale of substantially all of the assets of EME to NRG pursuant to an Asset Purchase Agreement (the Acquisition Agreement). The PSA contains representations, warranties and covenants of the parties to support and pursue confirmation of the Plan.

The Acquisition Agreement between EME, NRG and NRG Energy Holdings Inc. (the Purchaser), a wholly owned subsidiary of NRG, provides for the sale of substantially all of EME's assets, including the outstanding equity interests in certain of

40

Table of Contents

EME's direct subsidiaries (and thereby such subsidiaries' assets and liabilities), EME's cash and cash equivalents and EME's interest in substantially all of the other assets used in the operation of EME's and its subsidiaries' businesses (the Acquired Assets) to the Purchaser upon Bankruptcy Court confirmation and consummation of the Plan. Upon closing, the Purchaser will assume substantially all of the liabilities related to the Acquired Assets, including, among other things, (i) all liabilities of EME under the Powerton and Joliet leases, other than the Powerton and Joliet Cure Amount; (ii) all trade and vendor accounts payable and accrued liabilities arising from the operation of the Debtor Entities' businesses prior to the date of the closing of the transaction; and (iii) all cure amounts and other liabilities of the Debtor Entities other than the Homer City Debtors and certain agreed-upon excluded liabilities.

In particular, with respect to the Powerton and Joliet leases, at the closing of the transaction, NRG would (i) replace the existing EME guarantees with NRG guarantees; (ii) replace EME as a party to the tax indemnity agreements relating to the Powerton and Joliet leases; and (iii) covenant to make a capital investment in the Powerton and Joliet Stations, provided that NRG will not be obligated to make capital investments in excess of \$350 million.

In consideration of the foregoing, at the closing of the transaction, EME would retain all liabilities with respect to the payment of the Powerton and Joliet Cure Amount and would be responsible for bearing the costs of such cure payment for all amounts due under the lease before January 2, 2014. In addition, the intercompany note issued by EME for the benefit of Midwest Generation, would be canceled, Midwest Generation would assume the Powerton and Joliet leases and the other operative documents related thereto, as modified by mutual agreement of the parties, and all monetary defaults under each lease would be cured at closing.

The Acquired Assets do not include, among other things, (i) the Homer City Debtors, (ii) potential litigation claims of EME against its parent, EIX or (iii) various tax attributes of EME, including tax losses, tax loss carryforwards, tax credits and tax refunds. Pursuant to the Acquisition Agreement, the total purchase price to be paid by the Purchaser for the Acquired Assets is \$2.635 billion, subject to certain adjustments provided in the Acquisition Agreement, as well as the assumption of certain indebtedness of EME's subsidiaries and other liabilities. The Acquisition Agreement provides for \$350 million of the total purchase price to be paid in the form of 12,671,977 newly issued shares of NRG's common stock to be registered with the Securities and Exchange Commission on a Form S-1 Registration Statement (the Registration Statement) and the remainder to be paid in cash.

The Plan generally provides for each of EME's unsecured creditors to receive a pro rata portion of the NRG stock and cash consideration to be paid by the Purchaser to EME under the Acquisition Agreement (less certain distributions to be paid to other creditors of EME).

The Acquisition Agreement contains various closing conditions including, among other things, (i) the confirmation of a Plan of Reorganization and the entry of a Confirmation Order by the Bankruptcy Court; (ii) receipt of applicable government approvals, including FERC approval and the expiration of the waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976; and (iii) the declaration of effectiveness of the Registration Statement for, and the approval for listing on the New York Stock Exchange of, the common stock to be issued as a portion of the purchase price. The Acquisition Agreement contains certain representations and warranties made by EME, NRG and the Purchaser. There are also various pre-closing and post-closing covenants binding on the parties.

Under the Acquisition Agreement, EME is permitted to solicit other competing acquisition proposals through December 6, 2013 and EME has agreed not to solicit or encourage competing acquisition proposals after this date. The Acquisition Agreement provides specific termination rights to each party, which include a right to terminate if certain milestone dates are not met, for material breaches of the Acquisition Agreement not cured within a specified period or if EME enters into or seeks approval of a superior proposal. EME may terminate the deal to enter into a superior proposal at any time prior to entry of a Confirmation Order. Under specified circumstances, NRG will be entitled to receive a cash fee of \$65 million, and expense reimbursement of all reasonable and documented out-of-pocket expenses, if the Acquisition Agreement is terminated.

Note 16. Condensed Combined Debtors' Financial Information (EME only)

The financial statements below represent the condensed combined financial statements of the Debtor Entities. Subsidiaries of EME that are not Debtor Entities are accounted for as non-consolidated subsidiaries in these financial statements. Therefore, their net income is included as "Equity in income of non-Debtor Entities, net of tax" in the

Debtor Entities' Statement of Operations and their net assets are included as "Investment in non-debtor entities" in the Debtor Entities' Statement of Financial Position.

41

Table of Contents

Intercompany transactions among the Debtor Entities have been eliminated in the condensed combined financial statements of the Debtor Entities contained here.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This quarterly report on Form 10-Q contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These statements reflect EME's and Midwest Generation's current expectations and projections about future events based on EME's and Midwest Generation's knowledge of present facts and circumstances and assumptions about future events and include any statement that does not directly relate to a historical or current fact. Other information distributed by EME and Midwest Generation that is incorporated in this annual report, or that refers to or incorporates this annual report, may also contain forward-looking statements. In this annual report and elsewhere, the words "expects," "believes," "anticipates," "estimates," "projects," "intends," "plans," "probable," "may," "will," "could," "would," "should," and variations of such words and similar expressions, or discussions of strategy or plans, are intended to identify forward-looking statements. Such statements necessarily involve risks and uncertainties that could cause actual results to differ materially from those anticipated. Some of the risks, uncertainties, and other important factors that could cause results to differ from those currently expected, or that otherwise could impact EME or Midwest Generation or their respective subsidiaries, include but are not limited to:

- their ability to consummate one or more plans of reorganization with respect to the Chapter 11 Cases, and to consummate settlement transactions implementing such plans;
- the existence and duration of the Chapter 11 Cases, and the impact of orders and decisions of the Bankruptcy Court;
- beliefs and assumptions regarding their ability to continue as going concerns;
- their ability to meet liquidity requirements during periods of operating losses and capital spending programs, and Midwest Generation's ability to fund cash flow deficits and environmental retrofits;
- their ability to restructure their debt and lease obligations and stabilize their capital structures;
- their significant cash requirements and limited ability to borrow funds and access the capital markets on reasonable terms;
- EME's continued ability to monetize tax benefits generated by it and its subsidiaries, either through a settlement transaction or otherwise;
- the impact of reduced natural gas prices resulting from, among other things, shale gas technology on electric capacity and energy prices;
- supply and demand for electric capacity and energy and the resulting prices and dispatch volumes;
- volatility of market prices for energy and capacity;
- the difficulty of predicting wholesale prices, transmission congestion, energy demand, and other aspects of the wholesale power generation market;

Table of Contents

environmental laws and regulations, or changes in the application of those laws and regulations, that could require additional expenditures or otherwise affect the cost and manner of business operations, including compliance with the CPS, the CAIR, the MATS rule, and thermal discharge and other water quality standards;

the cost and availability of fuel, sorbents, and other commodities used for power generation and emission controls, and of related transportation services;

the cost and availability of emission credits or allowances;

transmission congestion in and to each market area and the resulting differences in prices between delivery points;

- the availability and creditworthiness of counterparties, their ability to pay amounts owed in excess of collateral provided in support of obligations, and the resulting effects on liquidity in power and fuel markets;

the willingness of counterparties to transact business with EME and Midwest Generation during the Chapter 11 Cases;

governmental, statutory, regulatory or administrative changes or initiatives, including the market structure rules applicable to each market and price mitigation strategies adopted by ISOs and RTOs;

market volatility and other market conditions that could increase the obligation to post collateral beyond the amounts currently expected and the potential effect of such conditions on the ability of EME and Midwest Generation to provide sufficient collateral in support of their hedging activities and purchases of fuel;

completion of permitting and construction of their capital projects;

weather conditions, natural disasters, and other unforeseen events;

the extent of additional supplies of capacity, energy, and ancillary services from current competitors or new market entrants, including the development of new generation facilities, technologies that may be able to produce electricity at a lower cost than their generating facilities, and/or increased access by competitors to their markets as a result of transmission upgrades;

competition in all aspects of their business;

operating risks, including equipment failure, availability, heat rate, output, costs of repairs and retrofits, and availability and cost of spare parts;

creditworthiness of suppliers and other project participants and their ability to deliver goods and services under their contract obligations or to pay damages if they fail to fulfill those obligations;

effects of legal proceedings, changes in or interpretations of tax laws, rates or policies, and changes in accounting standards;

general political, economic, and business conditions; and

their ability to attract and retain skilled people, with the necessary applicable experience, particularly during the pendency of the Chapter 11 Cases.

Additional information about risks and uncertainties, including more detail about the factors described above, is contained throughout this MD&A and in "Item 1A. Risk Factors" of EME's and Midwest Generation's combined annual report on Form 10-K for the year ended December 31, 2012. Readers are urged to read this entire quarterly report on Form 10-Q and the combined annual report on Form 10-K including the information incorporated by reference, and to carefully consider the risks, uncertainties, and other factors that affect EME's and Midwest Generation's businesses. Forward-looking statements speak only as of the date they are made, and EME and Midwest Generation are not obligated to publicly update or revise forward-looking statements. Readers should review future reports filed by EME and Midwest Generation with the Securities and Exchange Commission.

This MD&A discusses material changes in the results of operations, financial condition, and other developments of EME since December 31, 2012 and as compared to the third quarter ended September 30, 2012. This discussion presumes that the reader has read or has access to the MD&A included in Item 7 of EME's and Midwest Generation's combined annual report on Form 10-K for the year ended December 31, 2012.

EDISON MISSION ENERGY OVERVIEW

EME and 19 of its wholly owned subsidiaries (the Debtor Entities) have filed voluntary petitions for relief under Chapter 11 of the United States Bankruptcy Code (the Bankruptcy Code) in the United States Bankruptcy Court for the Northern District of Illinois, Eastern Division (the Bankruptcy Court). The Debtor Entities chapter 11 cases (the Chapter 11 Cases) are being

Table of Contents

jointly administered under case No. 12-49219 (JPC). The Debtor Entities remain in possession of their property and continue their business operations uninterrupted as "debtors-in-possession" under the jurisdiction of the Bankruptcy Court and in accordance with the applicable provisions of the Bankruptcy Code and orders of the Bankruptcy Court. Other than the Debtor Entities, none of EME's other direct or indirect subsidiaries is a debtor in the Chapter 11 Cases. The factors that caused EME and Midwest Generation to seek relief under Chapter 11, including low realized energy and capacity prices, high fuel costs and low generation, combined with capital requirements associated with retrofitting the Midwest Generation plants to comply with governmental regulations continue to exist. As a result of these factors and based on further analysis of its capital allocation strategy, EME and Midwest Generation recorded an impairment charge of \$464 million related to its Will County Station. However, this impairment does not constitute a decision on further operations of this station, including capital investments necessary to comply with state and federal environmental regulations. For additional information, see Note 13—Impairment of Long-Lived Assets.

The filing of the Chapter 11 Cases constitutes an event of default under Midwest Generation's obligations related to leases of the Powerton Station and Units 7 and 8 of the Joliet Station (the Powerton and Joliet Sale Leaseback) and under instruments governing the Senior Lease Obligation Bonds issued to finance these leases. EME, Midwest Generation, the owner-lessors, and certain of the holders of the pass-through certificates of Midwest Generation's lessor debt (the Certificate Holders) have been engaged in ongoing discussions regarding the ultimate disposition of the leases. In June 2013, EME and Midwest Generation agreed, among other things, to make monthly rental payments of \$3.75 million beginning in July 2013 and to pay certain professional fees for the owner-lessors and Certificate Holders in exchange for an extension of the deadline to assume or reject the Powerton and Joliet leases and the agreement of the Certificate Holders to forbear and to direct the lease indenture trustee and pass-through trustee to forbear from seeking payment of any administrative claim for rent under the Powerton and Joliet leases (except the monthly partial rental payments of \$3.75 million under the agreement) before the earlier of the effective date of a chapter 11 plan for Midwest Generation or a sale of substantially all of the assets of Midwest Generation. The parties filed a motion detailing the terms of this agreement and the Bankruptcy Court approved the extension of the statutory deadline by which the Debtor Entities must assume or reject the Powerton and Joliet leases until December 31, 2013. On October 18, 2013, EME and its debtor subsidiaries, including Midwest Generation, entered into various agreements that, upon completion, would ultimately implement a reorganization of the Debtor Entities through a sale of substantially all of EME's assets, including its equity interests in substantially all of its debtor and non-debtor subsidiaries, to a wholly owned subsidiary of NRG Energy Inc., upon Bankruptcy Court confirmation and consummation of a plan of reorganization (the NRG Sale). Midwest Generation is included in the equity interests to be sold. For additional information, see Note 15—Restructuring Activities—NRG Sale.

Highlights of Operating Results

The following table reconciles net loss attributable to the EME common shareholder on EME's consolidated statements of operations to earnings before interest, taxes, depreciation and amortization, as adjusted for certain items discussed below (Adjusted EBITDA):

(in millions)	Three Months Ended			Nine Months Ended

Table of Contents

Provision (benefit) for income taxes excludes the impact of production tax credits and includes changes in the valuation allowance. For additional information, see "Combined Notes to Consolidated Financial Statements—Note 7. Income Taxes—EME—Effective Tax Rate."

Adjusted EBITDA is equal to net income (loss) under generally accepted accounting principles in the United States of America (GAAP) before net interest expense, income tax expense (benefit), depreciation and amortization, adjusted to include the impact of production tax credits and exclude the impact of discontinued operations, gain (loss) on sale of assets, gain (loss) on early extinguishment of debt and leases, impairment of assets and investments, restructuring costs, and reorganization items. This non-GAAP financial measure reflects an additional way of viewing EME's business and augments the understanding of facts and trends affecting the business. This non-GAAP financial measure should not be relied upon to the exclusion of GAAP financial measures and may not be comparable to those of other companies' non-GAAP financial measures having the same or similar names.

The following table shows the Adjusted EBITDA of EME's projects:

(in millions)	Three Months Ended			Nine Months Ended		
	September 30,			September 30,		
	2013	2012	Change	2013	2012	Change
Midwest Generation plants	\$15	\$(25)) \$40	\$(54)	\$(115)) \$61
Renewable energy projects	19	17	2	111	104	7
Energy trading ¹	24	21	3	67	70	(3)

Doga ²	5	—	5	5	11	(6)
Westside Projects ²	3	2	1	3	(1)) 4
Other projects	2	5	(3)	7	13	(6)
	\$151	\$44	\$107	\$234	\$123	\$111
Corporate administrative and general	(16)	(26)) 10	(66)	(90)) 24
Production tax credits	16	12	4	58	48	10
Adjusted EBITDA	\$151	\$30	\$121	\$226	\$81	\$145

¹ Adjusted EBITDA for energy trading does not include administrative and general costs, which are included in corporate administrative and general to calculate consolidated Adjusted EBITDA.

² Adjusted EBITDA is equal to equity in income (loss) from unconsolidated affiliates.

EME's Adjusted EBITDA for the third quarter of 2013 increased compared to the third quarter of 2012, primarily due to the following:

- \$56 million increase in results from Walnut Creek which achieved commercial operation in the second quarter of 2013 and began selling power under its power purchase agreement with Southern California Edison (SCE) in June 2013;

- \$40 million increase in results from the Midwest Generation plants primarily attributable to lower plant operations costs and lower support fuel costs;

- \$10 million decrease in corporate administrative and general expenses due to lower departmental spending and a reduction in shared services charges from EIX; and

- \$5 million increase attributable to the timing of distributions received from the Doga project.

EME's Adjusted EBITDA for the nine months ended September 30, 2013 increased compared to the nine months ended September 30, 2012, primarily due to the following:

- \$61 million increase in results from the Midwest Generation plants primarily attributable to lower plant operations costs and lower support fuel costs, partially offset by lower capacity revenues;

- \$58 million increase in results from Walnut Creek which achieved commercial operation in the second quarter of 2013 and began selling power under its power purchase agreement with SCE in June 2013;

- \$24 million decrease in corporate administrative and general expenses due to lower departmental spending and a reduction in shared services charges from EIX;

Table of Contents

\$17 million increase in the results of the renewable energy projects primarily attributable to the results of Broken Bow I and Crofton Bluffs wind projects that achieved commercial operation in the fourth quarter of 2012, higher merchant pricing at the Goat wind project, and sale of Oklahoma state tax credits at the Taloga wind project, partially offset by higher plant operations costs at the High Lonesome wind project and income allocated to outside investors of Capistrano Wind Partners; and

\$11 million increase in the results of the Big 4 Projects due to a property tax refund at Watson and higher revenue, partially offset by higher fuel costs and operating expenses.

The nine-month increase in Adjusted EBITDA was partially offset by the following:

\$15 million decrease in the results of the Sunrise project due to lower revenues as the project transitioned to merchant generation; and

\$6 million decrease attributable to lower distributions received from the Doga project.

Midwest Generation Environmental Compliance Plans and Costs

All of Midwest Generation's Illinois coal-fired electric generating units are subject to an Illinois regulation called the Combined Pollutant Standard (CPS), which sets emission limits for mercury, nitrogen oxide and SO₂ and specifies the control technologies that are to be installed on some units by specified dates. Midwest Generation must install the required technology by the specified deadline, shut down the unit, or curtail generation to be in compliance with the CPS.

On April 4, 2013, Midwest Generation was granted a variance, subject to various conditions, by the Illinois Pollution Control Board from the CPS system-wide annual SO₂ emission rate in 2015 and 2016 and an extension of the Waukegan Unit 8 unit specific retrofit requirements from December 31, 2014 until May 31, 2015. Among the conditions of the variance, the Illinois Pollution Control Board accelerated the unit specific retrofit requirements of Powerton Unit 6 to December 31, 2014 and required the retrofitting of Waukegan Unit 7 by December 31, 2014. Midwest Generation has accepted the variance. As a result of the variance, it is more likely that Midwest Generation will install environmental controls at Waukegan Unit 7, which had been impaired from an accounting perspective during the fourth quarter of 2011. If Midwest Generation ultimately decides to install environmental controls at Waukegan Unit 7, less of Midwest Generation's available liquidity will be available to install environmental controls at other units. For further discussion related to impairment policies on EME and Midwest Generation's unit of account, refer to EME's and Midwest Generation's combined annual report on Form 10-K for the year ended December 31, 2012.

Decisions whether to proceed with retrofitting of any particular units to comply with CPS requirements for SO₂ and mercury emissions, including those that have received permits, are subject to a number of factors such as market conditions, regulatory and legislative developments, liquidity, forecasted commodity prices, and capital and operating costs applicable at the time decisions are required or made. Midwest Generation is not expected to generate sufficient cash flows from operating activities and will likely need to borrow funds, receive additional contributions from EME, or find other sources of capital to fund the retrofits of its coal-fired plants. EME's ability to provide capital to Midwest Generation is subject to its own liquidity constraints and oversight by EME's creditors.

All capital projects needed to comply with nitrogen oxide emission limits of the CPS have been completed. Capital projects needed to comply with mercury limits of the CPS have been completed except for the projects that must be undertaken on Waukegan Unit 7 and Will County Unit 3. Waukegan Unit 7 and Will County Unit 3 are subject to a unique CPS requirement to convert hot-side electrostatic precipitator (ESP) equipment to cold-side ESP or fabric filtration equipment in order to reduce mercury emissions. Final decisions to retrofit or shut down units will be made in light of the timing requirements under the CPS and other applicable environmental regulations and the economic projections of those retrofits, on a unit-by-unit basis, at the time the decision is made. Based on work to date through September 30, 2013, the estimated costs of retrofitting the Midwest Generation plants for full CPS compliance, as well as compliance with the federal Mercury and Air Toxics Standards (MATS), are as follows:

Unit	Remaining Cost (in millions)	Unit	Remaining Cost (in millions)
Joliet 6	\$75	Waukegan 7	\$58

Edgar Filing: EDISON MISSION ENERGY - Form 10-Q

Joliet 7	114	Waukegan 8	64
Joliet 8	129	Will County 3	104
Powerton 5	133	Will County 4	93
Powerton 6	67

Table of Contents

MIDWEST GENERATION, LLC

Results of Operations

In accordance with GAAP, Midwest Generation accounts for the Powerton and Joliet Sale Leaseback as a lease financing in its separate consolidated financial statements. Accordingly, Midwest Generation records the power plants as assets in a similar manner to a capital lease and records depreciation expense from the power plants and interest expense from the lease financing.

The following table reconciles Midwest Generation's third quarter results of operations to the EME consolidated Adjusted EBITDA results of the Midwest Generation plants as reported by EME:

(in millions)	Three Months Ended September 30, 2013			2012		
	Midwest Generation	Adjustments	EME Adjusted EBITDA	Midwest Generation	Adjustments	EME Adjusted EBITDA

Adjusted EBITDA	\$(563))\$509	\$(54)	\$(160))\$45	\$(115)

¹ Represents levelized rent expense of the Powerton and Joliet Sale Leaseback as recorded as an operating lease at EME.

Includes \$32 million of depreciation recorded by Midwest Generation for the Powerton and Joliet Sale Leaseback for both the nine months ended September 30, 2013 and 2012. Depreciation and amortization are excluded from Adjusted EBITDA.

³ Adjustments represent operating expenses which are excluded from Adjusted EBITDA.

The following table presents key additional data for Midwest Generation:

Statistics ¹	Nine Months Ended September 30,			
	2013		2012	
Generation (in GWh)	16,830		17,459	
Aggregate plant performance				
Equivalent availability	88.7	%	83.5	%
Capacity factor ²	59.7	%	52.5	%
Load factor ²	67.2	%	62.9	%
Forced outage rate	2.5	%	4.8	%
Average realized price/MWh	\$34.95		\$34.61	
Capacity revenues only (in millions)	\$24		\$90	
Average realized fuel costs/MWh	\$24.54		\$24.69	

¹ For an explanation of how the statistical data is determined, see "—Reconciliation of Non-GAAP Disclosures and Statistical Definitions."

The increase in capacity and load factor was driven by lower installed capacity for the nine months ended September 30, 2013 as a result of the voluntary shutdown of the coal-fired Fisk and Crawford Stations in August 2012.

Operating Income (Loss)

Midwest Generation's operating loss increased \$424 million and \$403 million for the three and nine months ended September 30, 2013, respectively, compared to the corresponding periods of 2012 primarily due to the \$464 million impairment charge related to the Will County Station. For further discussion, see "Combined Notes to Consolidated Financial Statements—Note 13. Impairment of Long-Lived Assets." Excluding the impairment charge, Midwest

Generation's operating loss decreased \$40 million and \$61 million for the three and nine months ended September 30, 2013, respectively, compared

49

Table of Contents

to the corresponding periods of 2012. Lower plant operations costs were attributable to the voluntary shutdown of the coal-fired Fisk and Crawford Stations in August 2012 and lower planned maintenance costs due to a reduction in scope of projects. Lower support fuel costs were primarily attributable to a decline in usage and lower prices of activated carbon and urea. For additional discussion of Midwest Generation's operating results, see "Edison Mission Energy Overview—Highlights of Operating Results."

Included in fuel costs were unrealized gains (losses) of none and \$2 million for the third quarter of 2013 and 2012, respectively, and none and \$(2) million for the nine months ended September 30, 2013 and 2012, respectively, due to oil futures contracts that were accounted for as economic hedges. These contracts were entered into as economic hedges of the variable fuel price component of rail transportation costs and expired at the end of 2012.

Reconciliation of Non-GAAP Disclosures and Statistical Definitions

Average realized energy price and average realized fuel costs are presented as an aid in understanding the operating results of Midwest Generation. These statistical measures are both non-GAAP performance measures since they exclude unrealized gains or losses recorded as operating revenues or fuel costs. Management believes that these measures are meaningful for investors as this information reflects the impact of hedge contracts at the time of actual generation in period-over-period comparisons or as compared to real-time market prices. These measures may not be comparable to those of other companies.

Average Realized Energy Price

The average realized energy price reflects the average price at which energy is sold into the market including the effects of hedges, real-time and day-ahead sales, and PJM Interconnection, LLC (PJM) fees and ancillary services. It is determined by dividing (i) operating revenues adjusted for unrealized gains (losses) and other non-energy related revenues by (ii) generation as shown in the table below. Revenues related to capacity sales are excluded from the calculation of average realized energy price. The following table shows the average realized energy price for Midwest Generation:

(in millions)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
Operating revenues	\$232	\$253	\$614	\$699
Adjusted for:				
Unrealized losses	—	5	1	2
Capacity and other revenues	(12) (11) (27) (97
Realized revenues	\$220	\$247	\$588	\$604
Generation (in GWh)	6,021	6,653	16,830	17,459
Average realized energy price/MWh	\$36.63	\$37.20	\$34.95	\$34.61

A reconciliation of the operating revenues of Midwest Generation presented in the preceding table and renewable energy projects presented in "Edison Mission Energy—Results of Operations—Renewable Energy Projects" to consolidated EME operating revenues is set forth below:

(in millions)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
Operating revenues				
Midwest Generation	\$232	\$253	\$614	\$699
EME renewable energy projects	53	47	205	182
Other EME subsidiaries	100	40	188	126
Consolidated EME operating revenues as reported	\$385	\$340	\$1,007	\$1,007

Table of Contents

Average Realized Fuel Costs

The average realized fuel costs for Midwest Generation reflects the average cost per MWh at which fuel is consumed for generation sold into the market, including emission allowance costs and the effects of hedges. It is determined by dividing (i) fuel costs adjusted for unrealized gains (losses) by (ii) generation as shown in the table below:

(in millions)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
Fuel costs	\$146	\$183	\$413	\$443
Adjusted for:				
Unrealized gains (losses)	—	2	—	(2
Cost of coal sales ¹	—	(10)	—
Realized fuel costs	\$146	\$175	\$413	\$431
Generation (in GWh)	6,021	6,653	16,830	17,459
Average realized fuel costs/MWh	\$24.21	\$26.34	\$24.54	\$24.69

¹ During the three months ended September 30, 2012, Midwest Generation sold one million tons of coal.

A reconciliation of the fuel costs of Midwest Generation to consolidated EME fuel costs is set forth below:

(in millions)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
Fuel costs				
Midwest Generation	\$146	\$183	\$413	\$443
Other EME subsidiaries	5	4	20	15
Consolidated EME fuel costs as reported	\$151	\$187	\$433	\$458

Statistical Definitions

Equivalent availability reflects the impact of the unit's inability to achieve full load, referred to as derating, as well as outages which result in a complete unit shutdown. The Midwest Generation plants are not available during periods of planned and unplanned maintenance. The equivalent availability factor is defined as the number of MWh the coal plants are available to generate electricity divided by the product of the capacity of the coal plants (in megawatts (MW)) and the number of hours in the period.

The capacity factor indicates how much power a unit generated compared to the maximum amount of power that could be generated according to its rating. It is defined as the actual number of MWh generated by the coal plants divided by the product of the capacity of the coal plants (in MW) and the number of hours in the period.

The load factor indicates how much power a unit generated compared to the maximum amount of power that a unit was available to generate electricity. It is determined by dividing capacity factor by the equivalent availability factor. The forced outage rate refers to forced outages and deratings excluding events outside of management's control as defined by North American Electric Reliability Corporation (NERC). Examples include floods, tornado damage, and transmission outages.

Other Income (Expense)

(in millions)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
Interest income from affiliate	\$—	\$28	\$—	\$83
Interest expense	(4)	(8)
Total other income (expense)	\$(4)	\$20	\$(17
)	\$58

Table of Contents

Beginning in 2013, Midwest Generation ceased accruing interest income on its intercompany loan with EME. The declines in interest expense primarily relate to the Powerton and Joliet Sale Leaseback.

Income Taxes

The valuation allowance Midwest Generation recorded in the three months and nine months ended September 30, 2013 resulted in a significant variance between the effective tax rate and the statutory rate. Midwest Generation's effective tax rate was 37% and 38% for the three and nine months ended September 30, 2012, respectively. Midwest Generation's effective tax rates also differ from the federal statutory rate of 35% due to state income taxes. For further discussion, see "Combined Notes to Consolidated Financial Statements—Note 7. Income Taxes."

EDISON MISSION ENERGY

Results of Operations

Midwest Generation Plants

In accordance with GAAP, EME records rent expense related to the Powerton and Joliet Sale Leaseback on a levelized basis over the terms of the respective leases, which is reflected below under plant operating leases. Neither the value of the leased assets nor the lessor debt is reflected on EME's consolidated balance sheet.

The following table presents Adjusted EBITDA for the Midwest Generation plants as part of the consolidated financial statements of EME:

(in millions)	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012

Nonrecourse debt	(26)	(18)	(65)	(55)
Interest expense, net	\$(26)	\$(82)	\$(64)	\$(252)

EME's net interest expense decreased \$56 million and \$188 million for the three and nine months ended September 30, 2013, respectively, compared to the corresponding periods of 2012 primarily due to the fact that EME ceased accruing interest on its \$3.7 billion of unsecured senior notes during the pendency of the Chapter 11 Cases. Unpaid contractual interest for the three and nine months ended September 30, 2013 was \$70 million and \$211 million, respectively. For additional information, see "Combined Notes to Consolidated Financial Statements—Note 15. Restructuring Activities—LSTC."

Income Taxes

The valuation allowance EME recorded in the three months and nine months ended September 30, 2013 resulted in a significant variance between the effective tax rate and the statutory rate. In addition, EME's effective tax rates differ from the federal statutory rate of 35% due to production tax credits, estimated state income tax benefits allocated from EIX, and taxes on income allocated to noncontrolling interests. Production tax credits of \$58 million and \$48 million were included in income taxes for the nine months ended September 30, 2013 and 2012, respectively. Estimated state income tax benefits allocated from EIX of none and \$7 million were recognized for the nine months ended September 30, 2013 and 2012, respectively. The benefit for state taxes was lower in 2012 due to an adjustment in state apportionment factors. For further discussion, see "Combined Notes to Consolidated Financial Statements—Note 7. Income Taxes."

Results of Discontinued Operations

Income (loss) from discontinued operations, net of tax, was \$(1) million and \$(76) million for the third quarter ended September 30, 2013 and 2012, respectively, and \$16 million and \$(129) million for the nine months ended September 30, 2013 and 2012, respectively. The 2013 gain from discontinued operations primarily reflects the withdrawal from the benefit plan that provided postretirement medical, dental, vision, and life insurance coverage to certain Homer City retirees and the 2012 loss from discontinued operations primarily reflects the results related to Homer City plant operations. For additional information, see "Combined Notes to Consolidated Financial Statements—Note 14. Discontinued Operations."

Seasonality

Due to fluctuations in electric demand resulting from warm weather during the summer months and cold weather during the winter months, electric revenues from Midwest Generation's coal-fired plants normally vary substantially on a seasonal basis. In addition, maintenance outages generally are scheduled during periods of lower projected electric demand (spring and fall), further reducing generation and increasing major maintenance costs which are recorded as an expense when incurred. Accordingly, Midwest Generation's income is seasonal and has significant variability from quarter to quarter. Seasonal fluctuations may also be affected by changes in market prices. For further discussion regarding market prices, see "Market Risk Exposures—Commodity Price Risk—Energy Price Risk." EME's third quarter equity in income from its unconsolidated energy projects is normally higher than equity in income related to other quarters of the year due to seasonal fluctuations and higher energy contract prices during the summer months.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES (EME and Midwest Generation, except as noted)

Available Liquidity

The following table summarizes EME's and Midwest Generation's available liquidity at September 30, 2013:

(in millions)	Debtor Entities	Non-debtor Entities	Cash and Cash Equivalents
EME as a holding company	\$554	\$—	\$554
Midwest Generation	120	—	120
Other EME subsidiaries	3	400	403
EME and subsidiaries without contractual dividend restrictions	677	400	1,077
EME subsidiaries with contractual dividend restrictions	—	61	61
Total	\$677	\$461	\$1,138

EME, as a holding company, does not directly operate any revenue-producing generation facilities. EME relies on cash distributions and tax payments from its projects and tax benefits received under a tax-allocation agreement with EIX to meet its obligations, including debt service obligations on long-term debt. The timing and amount of payments from EIX under the tax-allocation agreement is uncertain and the timing and amount of distributions from EME's subsidiaries may be restricted. For further discussion, see "Combined Notes to Consolidated Financial Statements—Note 7. Income Taxes."

Midwest Generation generates liquidity through cash flows from operations and payments by EME under an intercompany loan issued in connection with the Powerton and Joliet Sale Leaseback. However, at December 31, 2012, Midwest Generation recorded a \$1.4 billion charge, equal to the full carrying amount of the loan and accrued interest, and ceased accruing interest income associated with the intercompany loan. EME did not make the scheduled principal and interest payment of \$61 million due on both January 2, 2013 and July 2, 2013. Upon completion of the NRG Sale, this loan and accrued interest would be canceled.

Likewise, prior to the filing of the Chapter 11 Cases, EME and Midwest Generation entered into a forbearance agreement with various parties to the Powerton and Joliet Sale Leaseback and the Senior Lease Obligation Bonds issued to finance these leases. Under the terms of the forbearance agreement, Midwest Generation did not make the scheduled lease payment of \$76 million on January 2, 2013, but on February 15, 2013, did pay the ratable portion of the rent due under the leases attributable to the period between December 17, 2012 and January 2, 2013 of \$7 million. This forbearance agreement has expired. In June 2013, EME and Midwest Generation agreed, among other things, to make monthly rental payments of \$3.75 million beginning in July 2013, in lieu of the scheduled \$76 million lease payment due on July 2, 2013. In addition, the Bankruptcy Court approved the extension of the statutory deadline by which the Debtor Entities must assume or reject the Powerton and Joliet leases until December 31, 2013. Upon completion of the NRG Sale, Midwest Generation would assume the Powerton and Joliet leases. EME would retain all liabilities with respect to the payment of the cure amount as set forth in the Asset Purchase Agreement (the Powerton and Joliet Cure Amount). The cure amount would have been approximately \$150 million at September 30, 2013.

The Chapter 11 Cases could also potentially give rise to counterparty rights and remedies under other documents.

Capital Investment Plan

Midwest Generation's forecasted environmental expenditures are based on using dry scrubbing with sodium-based sorbents and upgrading particulate removal systems to comply with CPS requirements for SO₂ and mercury emissions and the United States Environmental Protection Agency's (US EPA) MATS regulations on hazardous air pollutant emissions. On April 4, 2013, Midwest Generation was granted a variance, subject to various conditions, by the Illinois Pollution Control Board from the CPS system-wide annual SO₂ emission rate in 2015 and 2016 and an extension of the Waukegan Unit 8 unit specific retrofit requirements from December 31, 2014 until May 31, 2015.

Table of Contents

Management's estimate of capital expenditures through 2015 by EME's subsidiaries for existing projects and corporate activities is as follows:

(in millions)	October through December 2013	2014	2015
Midwest Generation			
Environmental	\$6	\$124	\$235
Plant capital	1	7	17
Walnut Creek Project	7	—	—
Renewable energy projects	2	1	—
Other capital ¹	2	8	9
Total	\$18	\$140	\$261

¹ Primarily represents EME corporate and information technology related expenditures.

The timing of commencing capital projects may vary from the amounts set forth in the above table. For additional information on environmental expenditures, see "Edison Mission Energy Overview—Midwest Generation Environmental Compliance Plans and Costs."

Construction on the Walnut Creek Project began in June 2011. During March and April 2013, the project completed testing and commissioning of the units and began selling power into the merchant market. The power purchase agreement with SCE began in June 2013. The nonrecourse financing associated with the Walnut Creek Project converted to 10-year amortizing term loans in June 2013.

Historical Consolidated Cash Flow (EME only)

The following table presents EME's condensed consolidated statement of cash flows:

(in millions)	Nine Months Ended September 30,	
	2013	2012
Operating cash flows from continuing operations	\$171	\$(535)
Operating cash flows from discontinued operations, net	(2)	(5)
Net cash provided by (used in) operating activities	169	(540)
Net cash provided by financing activities from continuing operations	151	354
Investing cash flows from continuing operations	(72)	(342)
Investing cash flows from discontinued operations, net	—	(19)
Net cash used in investing activities	(72)	(361)
Net increase (decrease) in cash and cash equivalents from continuing operations	\$250	\$(523)
Net decrease in cash and cash equivalents from discontinued operations	\$(2)	\$(24)

Cash Flows From Operating Activities

The fluctuation in cash provided by operating activities from continuing operations in 2013 as compared to cash used in operating activities from continuing operations in 2012 was attributable to lower rent payments for the leased facilities at the Powerton and Joliet plants due to the forbearance agreement (see "—Available Liquidity") and fewer coal purchases as existing coal inventory was utilized. The fluctuation was also attributable to tax-allocation payments received, net of payments, of \$9 million in 2013 compared to tax-allocation payments, net of receipts, of \$168 million in 2012. These increases were partially offset by lower capacity revenues at Midwest Generation. The remaining changes relate to the timing of cash receipts and disbursements related to working capital items. In addition, less cash is being disbursed in 2013 due to the classification of pre-petition obligations as LSTC.

Table of Contents

Cash Flows From Financing Activities

The change in financing activities is primarily due to cash contributions from noncontrolling interests and the timing of financings and repayment of debt as summarized in the following table:

(in millions)	Nine Months Ended September 30,	
	2013	2012
Cash contributions from noncontrolling interests	\$94	\$242
Debt financings		
Walnut Creek Project	149	154
Renewable energy projects	22	21
Debt repayments		
Walnut Creek Project	(52) —
Renewable energy projects	(31) (23
Other projects	(9) (8
Financing costs and others	(22) (32
Total cash provided by financing activities	\$151	\$354

Cash Flows From Investing Activities

The change in investing activities is primarily due to the timing of capital expenditures and cash collateral to secure letter of credit facilities associated with the termination of EME's revolving credit facility. Changes in other investing activities are reflected in the following table:

(in millions)	Nine Months Ended September 30,	
	2013	2012
Capital expenditures		
Midwest Generation plants		
Environmental	\$(10) \$(17
Plant capital	(7) (7
Walnut Creek Project	(70) (159
Renewable energy projects	(2) (78
Other capital expenditures	(2) (5
Investments in other assets	—	(9
Collateral for letter of credit facilities	27	(51
Other investing activities	(8) (16
Homer City plant	—	(19
Total cash used in investing activities	\$(72) \$(361

Table of Contents

Historical Consolidated Cash Flow (Midwest Generation only)

The following table presents Midwest Generation's condensed consolidated statement of cash flows:

(in millions)	Nine Months Ended September 30,	
	2013	2012
Net cash provided by operating activities	\$46	\$57
Net cash used in financing activities	(6) (116
Net cash used in investing activities	(15) (12
Net increase (decrease) in cash and cash equivalents	\$25	\$(71

Cash Flows From Operating Activities

The decrease in cash provided by operating activities in 2013 as compared to 2012 was primarily attributable to lower capacity revenues, which was partially offset by fewer coal purchases as existing coal inventory was utilized. The remaining changes relate to the timing of cash receipts and disbursements related to working capital items. In addition, less cash is being disbursed in 2013 due to the classification of pre-petition obligations as LSTC.

Cash Flows From Financing Activities

The decrease was primarily due to lower rent payments for the leased facilities at the Powerton and Joliet plants due to the forbearance agreement (see "—Available Liquidity") in 2013 as compared with 2012.

Cash Flows From Investing Activities

Net cash used in investing activities consisted primarily of capital expenditures for 2013 and 2012.

Margin, Collateral Deposits and Other Credit Support for Energy Contracts

To reduce their exposure to market risk, EME and Midwest Generation hedge a portion of their electricity price exposure through Edison Mission Marketing & Trading, Inc. (EMMT). In connection with entering into contracts, EMMT may be required to support its risk of nonperformance through parent guarantees, margining, or other credit support. EME has entered into guarantees in support of certain of EMMT's hedging and trading activities. However, EME and EMMT have historically also provided collateral in the form of cash and letters of credit for the benefit of counterparties. EME's ability to provide collateral during the Chapter 11 Cases is limited. For further details, see "Combined Notes to Consolidated Financial Statements—Note 6. Derivative Instruments and Hedging Activities—EME—Summary of Derivative Instruments."

Midwest Generation anticipates that sales of its power through EMMT may require additional credit support, depending upon market conditions and the strategies adopted for the sale of this power. Changes in forward market prices and margin requirements and increases in merchant sales could further increase the need for credit support related to hedging activities. Midwest Generation has only a limited ability to provide collateral to support bilateral contracts for power and fuel to the extent that any such transactions relate to its merchant energy operations. Pursuant to an order from the Bankruptcy Court, such credit support would require prior written notice to certain of Midwest Generation's unsecured creditors, who would have an opportunity to object. In the event of an objection, Midwest Generation would not be able to provide collateral unless the Bankruptcy Court orders otherwise. There is no assurance that Midwest Generation will be able to provide credit support to EMMT.

Future cash collateral requirements for hedging and trading activities may be higher than the margin and collateral requirements at September 30, 2013, if wholesale energy prices change or if EMMT enters into additional transactions. EME estimates that, under existing arrangements, margin and collateral requirements for energy and congestion contracts outstanding as of September 30, 2013 could increase by approximately \$2 million over the remaining life of the contracts using a 95% confidence level.

EME's approach to trading and risk management depends, in part, on the ability to use clearing brokers to enter into market transactions. As a result of its financial position, EME has limited access to enter into such transactions and has been subject to increased initial collateral and margin requirements. There is no assurance that EME will continue to be able to utilize clearing brokers. If EME becomes unable to utilize clearing brokers, it may seek to execute

bilateral transactions with third parties which could be unavailable on commercially reasonable terms or at all.

Table of Contents

EME's Intercompany Tax-Allocation Agreement

EME is included in the consolidated federal and combined state income tax returns of EIX and is eligible to participate in tax-allocation agreements with EIX and its subsidiaries. EME's right to receive payments under the tax-allocation agreements and the timing and amount of those payments are dependent on the inclusion of EME in the consolidated income tax returns of EIX and other factors, including the amount of consolidated taxable income and net operating loss carryforwards of EIX, and other tax items of EME and other subsidiaries of EIX. Based on the application of the factors cited above, EME is obligated during periods it generates taxable income to make payments under the tax-allocation agreements. Tax-allocation receipts and payments may also be affected by redetermination of utilization of net operating losses resulting from carryback of net operating losses on a consolidated basis or settlement of tax liabilities for prior periods. In November 2012, EIX modified the tax-allocation agreements to provide for termination of EME's participation on December 31, 2013. Termination does not relieve any party of any obligations with respect to any tax year beginning prior to the year of termination.

During the third quarter of 2013, EIX filed its federal consolidated tax return for the year 2012. In connection with EIX's finalization of the tax return, EME recorded a non-cash contribution from EIX of \$32 million related to tax benefits which EME had previously believed would be used in EIX consolidated tax return on a statutory basis but would not be paid under the tax-allocation agreements. In addition, during the first nine months of 2013, EME received a net tax-allocation payment from EIX of approximately \$7 million of which \$6 million was treated as an equity contribution as it was a partial payment for tax benefits previously recorded as non-cash distributions. In total, EME recorded contributions from EIX related to the tax-allocation agreements of \$38 million during 2013.

Dividend Restrictions in Major Financings

Each of EME's direct or indirect subsidiaries is organized as a legal entity separate and apart from EME and its other subsidiaries. Assets of certain EME subsidiaries, including some wind projects in portfolio financings and projects under construction, are not available to satisfy EME's obligations or the obligations of any of its other subsidiaries. However, unrestricted cash or other assets that are available for distribution may, subject to applicable law and the terms of financing arrangements of the parties, be advanced, loaned, paid as dividends, or otherwise distributed or contributed to EME or to its subsidiary holding companies.

Covenants in the Powerton and Joliet Sale Leaseback documents include restrictions on the ability of EME and Midwest Generation to, among other things, incur debt, create liens on their property, merge or consolidate, sell assets, make investments, engage in transactions with affiliates, make distributions, make capital expenditures, enter into agreements restricting their ability to make distributions, engage in other lines of business, enter into swap agreements, or engage in transactions for any speculative purpose. For further discussion on the Powerton and Joliet Sale Leaseback, see "Combined Notes to Consolidated Financial Statements—Note 9. Commitments and Contingencies."

Contractual Obligations, Commercial Commitments and Contingencies

Contractual Obligations

There have been no significant developments with respect to EME's and Midwest Generation's contractual obligations that affect disclosures presented in EME's and Midwest Generation's combined annual report on Form 10-K, except as set forth in "Combined Notes to Consolidated Financial Statements—Note 5. Debt and Credit Agreements," and "—Note 9. Commitments and Contingencies—Lease Commitments" and "—Other Commitments."

EME and Midwest Generation are in the process of evaluating the Debtor Entities' executory contracts in order to determine if notice will be filed with the Bankruptcy Court to reject any contracts. A provision for claims associated with the contracts that have been rejected or for which a notice to reject has been filed with the Bankruptcy Court is included in LSTC. For further discussion regarding LSTC, see "Combined Notes to Consolidated Financial Statements—Note 15. Restructuring Activities."

Commercial Commitments (EME only)

For a discussion of letters of credit under EME's and its subsidiaries' credit facilities, see "Combined Notes to Consolidated Financial Statements—Note 5. Debt and Credit Agreements—Credit Facilities and Letters of Credit."

Contingencies

For a discussion of contingencies related to the Midwest Generation New Source Review and other litigation, the Homer City New Source Review and other litigation, environmental remediation, and the Chevron adversary proceeding, see "Combined Notes to Consolidated Financial Statements—Note 9. Commitments and Contingencies—Contingencies."

Table of Contents

Off-Balance Sheet Transactions

There have been no significant developments with respect to EME's and Midwest Generation's off-balance sheet transactions that affect disclosures presented in EME's and Midwest Generation's combined annual report on Form 10-K for the year ended December 31, 2012, except those related to EME's operating lease resulting from the Powerton and Joliet Sale Leaseback and Midwest Generation's operating leases primarily related to leased railcars as set forth in "Combined Notes to Consolidated Financial Statements—Note 9. Commitments and Contingencies—Lease Commitments."

Environmental Matters and Regulations

There have been no significant developments with respect to environmental and regulatory matters specifically affecting EME and Midwest Generation since the filing of EME's and Midwest Generation's combined annual report on Form 10-K for the year ended December 31, 2012, except as set forth in "Combined Notes to Consolidated Financial Statements—Note 10. Environmental Developments."

Table of Contents

MARKET RISK EXPOSURES (EME and Midwest Generation, except as noted)

EME's and Midwest Generation's primary market risk exposures are associated with the sale of electricity and capacity from, and the procurement of fuel for, their merchant power plants. These market risks arise from price fluctuations of electricity, capacity, fuel, emission allowances, and transmission rights. Additionally, EME's financial results can be affected by fluctuations in interest rates. EME and Midwest Generation manage these risks in part by using derivative instruments in accordance with established policies and procedures. Both EME and Midwest Generation use commodity derivatives for non-trading purposes. EME also has derivatives used for trading purposes.

Derivative Instruments

Unrealized Gains and Losses

Unrealized gains and losses from derivative instruments (other than the effective portion of derivatives that qualify for hedge accounting) are recorded as part of operating revenues or fuel costs. The following table summarizes unrealized gains (losses) from non-trading activities:

(in millions)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
Midwest Generation				
Non-qualifying hedges	\$—	\$(1)	\$—	\$(2)
Ineffective portion of cash flow hedges	—	(2)	(1)	(2)
Total unrealized losses	\$—	\$(3)	\$(1)	\$(4)

At September 30, 2013, no cumulative unrealized gains or losses were recognized that related to subsequent periods.

Fair Value Disclosures

In determining the fair value of EME's and Midwest Generation's derivative positions, third-party market pricing is used where available. For further explanation of the fair value hierarchy and a discussion of EME's and Midwest Generation's derivative instruments, see "Combined Notes to Consolidated Financial Statements—Note 4. Fair Value Measurements" and "—Note 6. Derivative Instruments and Hedging Activities."

Commodity Price Risk

Energy Price Risk

EME is exposed to energy price risk through its indirect ownership of Midwest Generation, 428 MW of merchant renewable energy projects in PJM and Electric Reliability Council of Texas (ERCOT), 50% of the Sunrise project, and its proprietary trading. Midwest Generation is exposed to energy price risk through sales of energy and capacity into the PJM market. Energy and capacity from Midwest Generation are sold under terms, including price, duration, and quantity, arranged by EMMT with customers through a combination of bilateral agreements (resulting from negotiations or from auctions), forward energy sales, and spot market sales. Power is sold into PJM at spot prices based upon locational marginal pricing.

The following table depicts the average historical market prices for energy per megawatt-hour at the Northern Illinois Hub for the first nine months of 2013 and 2012:

	2013	2012
24-Hour Average Historical Market Prices ¹	\$32.58	\$28.56

¹ Energy prices were calculated at the Northern Illinois Hub delivery point using historical hourly day-ahead prices as published by PJM or provided on the PJM web-site.

Table of Contents

The following table sets forth the forward market prices for energy per megawatt-hour as quoted for sales into the Northern Illinois Hub at September 30, 2013:

	24-Hour Forward Energy Prices ¹
2013	
October	\$29.07
November	28.48
December	30.12
2014 calendar "strip" ²	\$30.25
2015 calendar "strip" ²	\$30.47

¹ Energy prices were determined by obtaining broker quotes and information from other public sources relating to the Northern Illinois Hub delivery point.

² Market price for energy purchases for the entire calendar year.

Power prices remained low in the first nine months of 2013 due to an abundance of low-priced natural gas. Forward market prices at the Northern Illinois Hub fluctuate as a result of a number of factors, including natural gas prices, transmission congestion, changes in market rules, electricity demand (which in turn is affected by weather, economic growth, and other factors), plant outages in the region, and the amount of existing and planned power plant capacity. The actual spot prices for electricity delivered by Midwest Generation into these markets may vary materially from the forward market prices set forth in the preceding table.

EMMT engages in hedging activities for Midwest Generation to hedge the risk of future changes in the price of electricity. The following table summarizes the hedge positions at September 30, 2013 for electricity expected to be generated during the remainder of 2013:

	MWh (in thousands)	Average price/MWh ¹
Midwest Generation ²	908	\$36.14

The above hedge positions include forward contracts for the sale of power and futures contracts during different periods of the year and the day. Market prices tend to be higher during on-peak periods and during summer months, although there is significant variability of power prices during different periods of time. Accordingly, the above hedge positions are not directly comparable to the 24-hour Northern Illinois Hub prices set forth above.

¹ Includes hedging transactions primarily at the American Electric Power (AEP)/Dayton Hub and the Northern Illinois Hub, both in PJM, and to a lesser extent the Indiana Hub in Midwest Independent Transmission System Operator (MISO).

Table of Contents

Capacity Price Risk

EME and Midwest Generation are exposed to capacity price risk through sales of capacity into the PJM market. Under the Reliability Pricing Model (RPM), capacity commitments are made in advance to provide a long-term pricing signal for construction and maintenance of capacity resources. The following table summarizes the status of capacity sales for Midwest Generation at September 30, 2013:

	RPM Capacity Sold in Base Residual Auction		Other Capacity Purchases, Net of Sales ¹		Aggregate Average Price per MW-day
	MW	Price per MW-day	MW	Average Price per MW-day	
October 1, 2013 to May 31, 2014	4,650	\$27.73	(2,242) ²	\$6.34	\$47.65
June 1, 2014 to May 31, 2015	4,625	125.99	(704)	5.65	147.59
June 1, 2015 to May 31, 2016	3,620	136.00	0.2	43.00	135.99
June 1, 2016 to May 31, 2017	3,331	59.37	—	—	59.37

Other capacity sales and purchases, net includes contracts executed in advance of the RPM base residual auction to ¹ hedge the price risk related to such auction, participation in RPM incremental auctions, and other capacity transactions entered into to manage capacity risks.

² Includes the impact of a 13 MW capacity swap transaction executed between Big Sky and Midwest Generation. The RPM auction capacity price for the delivery period of June 1, 2016 to May 31, 2017 of \$59.37 per MW-day for the western portion of PJM, affecting Midwest Generation, was substantially down from the prior auction mainly due to increased competition from new or upgrades to existing, gas-fired generation, higher imports from nearby markets and low growth in demand due to the slow economy. The impact of lower capacity prices for these periods compared to previous years will have an adverse effect on Midwest Generation's revenues unless such lower capacity prices are offset by increased energy prices.

Revenues from the sale of capacity beyond the periods set forth above will depend upon the amount of capacity available and future market prices either in PJM or nearby markets if those facilities have an opportunity to capture a higher value associated with those markets.

Coal Price Risk

Midwest Generation purchases coal primarily from the Southern Powder River Basin (PRB) of Wyoming. Coal purchases are made under a variety of supply agreements. The following table summarizes the amount of coal Midwest Generation has under contract at September 30, 2013:

	October through December 2013	2014
Amount of Coal Under Contract in Millions of Equivalent Tons ¹	13.3	9.8

¹ The amount of coal under contract in equivalent tons is calculated based on contracted tons and applying an 8,800 Btu equivalent.

Midwest Generation is subject to price risk for purchases of coal that are not under contract. Market prices of PRB coal based on 8,800 Btu per pound heat content and 0.8 pounds of SO₂ per million British thermal units (MMBtu) sulfur content remained relatively flat during the nine months ended September 30, 2013 from 2012 year-end prices.

Basis Risk

During the nine months ended September 30, 2013, day-ahead prices at the individual busbars of Midwest Generation compared to the AEP/Dayton Hub, Indiana Hub, and Northern Illinois Hub were on average lower by 8%, higher by 1%, and lower by less than 1%, respectively. During the nine months ended September 30, 2012, day-ahead prices at the individual busbars of Midwest Generation compared to the AEP/Dayton Hub, Indiana Hub, and Northern Illinois Hub were on average lower by 6%, lower by 1%, and higher by 1%, respectively. Differences in day-ahead pricing between the individual busbars of Midwest Generation generally arise due to transmission congestion.

Table of Contents**Credit Risk**

The credit risk exposure from counterparties of merchant energy hedging and trading activities is measured as the sum of net receivables (accounts receivable less accounts payable) and the current fair value of net derivative assets.

EME's subsidiaries enter into master agreements and other arrangements in conducting such activities which typically provide for a right of setoff in the event of bankruptcy or default by the counterparty. At September 30, 2013, the balance sheet exposure as described above, by the credit ratings of EME's counterparties, was as follows:

(in millions) Credit Rating ¹	September 30, 2013		
	Exposure ²	Collateral	Net Exposure
A or higher	\$66	\$—	\$66
A-	—	—	—
BBB+	1	—	1
BBB	—	—	—
BBB-	—	—	—
Below investment grade	—	—	—
Total	\$67	\$—	\$67

EME assigns a credit rating based on the lower of a counterparty's Standard & Poor's Ratings Services (S&P) or ¹ Moody's Investors Service, Inc. (Moody's) rating. For ease of reference, the above table uses the S&P classifications to summarize risk, but reflects the lower of the two credit ratings.

Exposure excludes amounts related to contracts classified as normal purchase and sales and non-derivative ² contractual commitments that are not recorded on the consolidated balance sheet, except for any related accounts receivable.

The credit risk exposure set forth in the above table is composed of \$42 million of net accounts receivable and payables and \$25 million representing the fair value of derivative contracts. The exposure is based on master netting agreements with the related counterparties. Credit ratings may not be reflective of the actual related credit risks. In addition to the amounts set forth in the above table, EME's subsidiaries have posted an \$85 million cash margin in the aggregate with various counterparties to support hedging and trading activities. The margin posted to support these activities also exposes EME to credit risk of the related entities.

The coal plants sell electric power generally into the PJM market by participating in PJM's capacity and energy markets or transacting in capacity and energy on a bilateral basis. Sales into PJM accounted for approximately 62% and 100% of EME's and Midwest Generation's consolidated operating revenues, respectively, for the nine months ended September 30, 2013. At September 30, 2013, EME's account receivable due from PJM was \$33 million. EME's turbine supply agreements contain significant suppliers' obligations for failure to meet performance obligations and warranty agreements. EME's reliance on these contractual provisions is subject to credit risks. Generally, these are unsecured obligations of the turbine manufacturer. A material adverse development with respect to EME's turbine suppliers may have a material impact on EME's wind projects. Two of EME's turbine suppliers, Suzlon Wind Energy Corporation and Clipper Windpower, LLC (Clipper), have been experiencing significant adverse credit and liquidity issues. As a result, EME's ability to enforce performance and warranty guarantees is subject to the credit risk of these counterparties. In April 2013, EME entered into a settlement agreement with Clipper with respect to claims under and termination of the turbine supply, maintenance, and warranty agreements and other related documents.

Interest Rate Risk (EME only)

Interest rate changes can affect earnings and the cost of capital for capital improvements or new investments in power projects. EME mitigates the risk of interest rate fluctuations for a number of its project financings by arranging for fixed rate financing or variable rate financing with interest rate swaps, interest rate options, or other hedging mechanisms. For further details, see "Combined Notes to Consolidated Financial Statements—Note 4. Fair Value Measurements" and "—Note 6. Derivative Instruments and Hedging Activities."

Table of Contents

CRITICAL ACCOUNTING ESTIMATES AND POLICIES (EME, Midwest Generation)

EME's and Midwest Generation's critical accounting policies have not changed materially since the filing of EME's and Midwest Generation's combined annual report on Form 10-K for the year ended December 31, 2012.

For a discussion of new accounting guidance affecting EME and Midwest Generation, see "Combined Notes to Consolidated Financial Statements—Note 1. Summary of Significant Accounting Policies—New Accounting Guidance."

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

EME's and Midwest Generation's exposures to market risk have not changed materially since the filing of EME's and Midwest Generation's combined annual report on Form 10-K for the year ended December 31, 2012, except as set forth in "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations—Market Risk Exposures."

ITEM 4. CONTROLS AND PROCEDURES

EME

Disclosure Controls and Procedures

EME's management, under the supervision and with the participation of the company's President and Chief Financial Officer, has evaluated the effectiveness of EME's disclosure controls and procedures (as that term is defined in Rules 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based on that evaluation, the President and Chief Financial Officer concluded that, as of the end of the period, EME's disclosure controls and procedures were effective.

Internal Control Over Financial Reporting

There were no changes in EME's internal control over financial reporting (as that term is defined in Rules 13a-15(f) or 15d-15(f) under the Exchange Act) during the period to which this report relates that have materially affected, or are reasonably likely to materially affect, EME's internal control over financial reporting.

Midwest Generation

Disclosure Controls and Procedures

Midwest Generation's management, under the supervision and with the participation of the company's President and Chief Financial Officer, has evaluated the effectiveness of Midwest Generation's disclosure controls and procedures (as that term is defined in Rules 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based on that evaluation, the President and Chief Financial Officer concluded that, as of the end of the period, Midwest Generation's disclosure controls and procedures were effective.

Internal Control Over Financial Reporting

There were no changes in Midwest Generation's internal control over financial reporting (as that term is defined in Rules 13a-15(f) or 15d-15(f) under the Exchange Act) during the period to which this report relates that have materially affected, or are reasonably likely to materially affect, Midwest Generation's internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

There have been no significant developments with respect to legal proceedings specifically affecting EME and Midwest Generation since the filing of EME's and Midwest Generation's combined annual report on Form 10-K for the year ended December 31, 2012, except as follows:

In October 2012, several environmental groups filed a complaint before the Illinois Pollution Control Board against Midwest Generation alleging violations of the Illinois groundwater standards through the operation of coal ash disposal ponds at its Powerton, Joliet, Waukegan, and Will County generating stations. The complaint requests the imposition of civil penalties, injunctive relief, and remediation. The matter is currently stayed as a result of the Chapter 11 Cases, although that stay was lifted in April 2013 in part so that the proceedings may continue for the sole purpose of adjudicating Midwest Generation's motion to dismiss the complaint. On October 3, 2013, the Pollution Control Board denied Midwest Generation's motion to dismiss the complaint.

In July 2013, the United States Court of Appeals for the Seventh Circuit affirmed the U.S. District Court's dismissal of nine of the ten Prevention of Significant Deterioration (PSD) claims asserted against Midwest Generation and EME by the State of Illinois and the Department of Justice, along with claims related to alleged violations of Title V of the Clean Air Act to the extent based on the dismissed PSD claims, and all claims asserted against Commonwealth Edison.

In August 2013, the United States Court of Appeals for the Third Circuit affirmed the U.S. District Court's dismissal of all of claims asserted in the lawsuit filed by the US EPA in January 2011 against Homer City, the sale leaseback owner participants of the Homer City plant, and two prior owners of the Homer City plant.

In September 2013, the U.S. District Court issued an order denying the request made by Chevron Kern River Company and Chevron Sycamore Cogeneration Company for leave to appeal the denial of the preliminary injunction in the Chevron adversary proceeding, and permitting their appeal from denial of the motion for relief from the automatic stay.

ITEM 1A. RISK FACTORS

In addition to the risk factors below, refer to "Item 1A. Risk Factors" on page 24 of EME's and Midwest Generation's combined annual report on Form 10-K for the year ended December 31, 2012 for a discussion of the risks, uncertainties and other important factors which could materially affect EME's and Midwest Generation's business, financial condition, or future results. The risks described in EME's and Midwest Generation's combined annual report on Form 10-K and in this combined report are not the only risks facing EME and Midwest Generation. Additional risks and uncertainties that are not currently known, or that are currently deemed to be immaterial, also may materially adversely affect EME's and Midwest Generation's business, financial condition or future results.

Risks Related to Restructuring

Failure to complete the NRG Sale could negatively affect EME's future business and financial results.

On October 18, 2013, EME announced the execution of the Acquisition Agreement with NRG and the Purchaser. Before the NRG Sale may be completed, the parties must satisfy all conditions set forth in the Acquisition Agreement, including, among other things, (i) the confirmation of a Plan of Reorganization and the entry of a Confirmation Order by the Bankruptcy Court, (ii) receipt of applicable government approvals, including FERC approval and the expiration of the waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, (iii) the declaration of effectiveness of Registration Statement for, and the approval for listing on the New York Stock Exchange of, the NRG common stock to be issued as a portion of the purchase price. Governmental authorities may impose conditions on the completion, or require changes to the terms, of the NRG transaction, and if the conditions or requirements are not satisfied or waived the NRG Sale will not be consummated. These conditions or changes could have the effect of delaying completion of, or imposing additional costs on, the NRG transaction.

If the NRG Sale is not completed, EME still will be required to pay its own costs relating to the NRG Sale, including legal, accounting, financial advisory, filing and printing costs. Also, in certain specified circumstances, EME may be required to pay NRG a cash fee of \$65 million plus reimbursement of all reasonable and documented out-of-pocket

expenses if the Acquisition Agreement is terminated.

67

Table of Contents

EME will be subject to various uncertainties and contractual restrictions while the NRG Sale is pending that could adversely affect its financial results.

Uncertainty about the effect of the NRG Sale on employees, customers, suppliers and others may have an adverse effect on EME's business. These uncertainties may impair EME's ability to attract, retain and motivate key personnel and could cause its customers, suppliers and other contract counterparties to seek to change existing business relationships to EME's disadvantage.

The pursuit of the NRG Sale and the preparation for the transition of EME's assets from EME to NRG may place a significant burden on EME's management and internal resources. Employee retention will be particularly challenging prior to the completion of the NRG transaction, due to uncertainty about future employment prospects with NRG.

ITEM 4. MINE SAFETY DISCLOSURES

There have been no significant developments with respect to mine safety disclosures for EME since the filing of EME's and Midwest Generation's combined annual report on Form 10-K for the year ended December 31, 2012.

ITEM 6. EXHIBITS
