

MEDIX RESOURCES INC
Form 424B3
May 14, 2003

Filed Pursuant to Rule 424(b)(3)
Registration No. 333-103196

PROSPECTUS

MEDIX RESOURCES, INC.

21,343,333 Shares of Common Stock

The securityholders of Medix Resources, Inc. named herein will have the right to offer and sell up to an aggregate of 21,343,333 shares of our common stock under this prospectus. The shares were purchased from Medix in private placements or are covered by warrants that were issued (i) in private placements or (ii) as fees to finders in private placements.

Medix will not receive directly any of the proceeds from the sale of these shares by the selling securityholders. However, Medix will receive the proceeds from the exercise of warrants to purchase some of the shares to be sold hereunder. See "Use of Proceeds". Medix will pay the expenses of registration of these shares.

Medix's common stock is traded on the American Stock Exchange under the symbol "MXR". On May 6, 2003, the closing price of our common stock was reported as \$0.29.

The securities offered hereby involve a high degree of risk. See "Risk Factors" beginning on page 3 for certain risks that should be considered by prospective purchasers of the securities offered hereby.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is May 7, 2003

No dealer, salesman or other person has been authorized to give any information or to make any representation not contained in or incorporated by reference in this prospectus and, if given or made, such information or representation must not be relied upon as having been authorized by us, the selling securityholders or any other person. Neither the delivery of this prospectus nor any sale made hereunder shall, under any circumstances, create any implication that the information herein is correct as of any time subsequent to the date hereof or that there has been no change in our affairs since such date.

SUMMARY

The following summary highlights some information from this prospectus. It is not complete and does not contain all of the information that you should consider before making an investment decision. You should read this entire prospectus, including the "Risk Factors" section and the financial statements, related notes and the other more detailed information appearing elsewhere or incorporated by reference in this prospectus. Unless otherwise indicated, "we", "us", "our" and similar terms, as well as references to the "Company" and "Medix", refer to Medix Resources, Inc. and its subsidiaries and not to the selling securityholders. All industry statistics incorporated by reference in this prospectus were obtained from data prepared or provided by recognized industry sources.

This prospectus covers the offering and sale of 21,343,333 shares of our common stock to the public by certain selling securityholders listed under the heading selling securityholders in this prospectus, of which 9,676,250 shares are issued and outstanding and 11,667,083 shares are covered by warrants held by the selling securityholders. See "Selling Securityholders". The selling securityholders purchased the shares of common stock and the warrants covering shares of common stock from us in one or more private placements or received warrants as fees for serving as finders in private placements. We received aggregate proceeds in those private placements of \$3,870,500. As part of the private placements, we agreed to register the shares of common stock issued or issuable pursuant to warrants under the Securities Act of 1933, as amended. We also agreed to register the shares of common stock covered by warrants issued to finders as fees in private placements. As of March 31, 2003 we had 80,767,065 shares of our common stock outstanding, and approximately 36,247,226 shares were issuable upon the exercise of outstanding options, warrants or other rights, and the conversion of outstanding preferred stock.

We develop, distribute and deploy connectivity products for Internet-based communications and information management by medical service providers. We have no revenues from current operations and are funding the development and deployment of our products through the sales of our securities. See "The Company" and "Risk Factors".

Because of our continuing losses, and the lack of certain sources of capital to fund our development of connectivity products, our independent accountants included a "going concern" uncertainty in their audit report on our audited financial statements for the year ended December 31, 2002. The "going concern" uncertainty signifies that significant questions exist about our ability to continue in business. See "Risk Factors".

Our principal executive office is located at 420 Lexington Avenue, Suite 1830, New York, New York 10170, and our telephone number is (212) 697-2509.

RECENT DEVELOPMENTS

On March 4, 2003, we purchased from Comdisco Ventures, Inc. substantially all of the assets formerly used by ePhysician, Inc. in its software and technology business prior to its cessation of operations in 2002. We are evaluating the newly acquired technology to determine how best to integrate our Cymedix technology with the ePhysician technology, resulting in our merged

Edgar Filing: MEDIX RESOURCES INC - Form 424B3

technology (the "Merged Technology"). From its formation in 1998, through its cessation of operations in November 2002, ePhysician developed and provided ePhysician Practice, a suite of software products that enables physicians to prescribe medications, access drug reference data, schedule patients, view formulary information, review critical patient information and capture charges at the point of care using a Palm OS(R)-based handheld device and the Internet.

On March 5, 2003, we terminated our merger agreement with PocketScript, LLC. We had entered into a non-binding Letter of Intent with PocketScript on October 30, 2002 and had executed a definitive merger agreement on December 19, 2002 to acquire PocketScript, LLC subject to certain conditions of closing.

RISK FACTORS

An investment in our common stock involves a high degree of risk. You should carefully consider the following risk factors and other information in this prospectus before investing in our common stock. The trading price of our common stock could decline due to any of these risks, and you may lose all or part of your investment.

Our continuing losses endanger our viability as a going-concern and caused our accountants to issue a "going concern" exception in their annual audit report.

We reported net losses of \$9,014,000, \$10,636,000 and \$5,415,000 for the years ended December 31, 2002, 2001 and 2000, respectively. At December 31, 2002, we had an accumulated deficit of \$43,073,000 and a net working capital deficit of \$252,000. Our products are in the development and early deployment stage and have not generated any revenue to date. We are funding our operations through the sale of our securities. Our independent accountants have included a "going concern" exception in their audit reports on our audited 2002, 2001 and 2000 financial statements.

Our need for additional financing is acute and failure to obtain adequate financing could lead to the financial failure of our company.

We expect to continue to experience losses, in the near term, until such time as the Merged Technology can be successfully deployed with physicians and produce revenue. The continuing development, marketing and deployment of the Merged Technology will depend upon our ability to obtain additional financing. The Merged Technology is in the development stage and has not generated any revenue to date. We are funding our operations now through the sale of our securities. There can be no assurance that additional investments or financings will be available to us on favorable terms or at all as needed to support the development and deployment of the Merged Technology. Failure to obtain such capital on a timely basis could result in lost business opportunities, the sale of the Merged Technology at a distressed price or the financial failure of our company.

We have a limited number of authorized shares of common stock for issuance, and if our shareholders do not approve of an increase in the authorized number of shares of our common stock, we will be unable to raise additional capital.

We currently have 125,000,000 shares of common stock authorized for issuance under our certificate of incorporation, and as of March 31, 2003, have 80,767,065 outstanding shares of common stock and 36,247,226 shares of common stock reserved for issuance under existing options, warrants and outstanding shares of our convertible preferred stock. Thus, we only have 7,985,709 shares of common stock that are available for issuance. We have requested that our shareholders approve, at a special meeting of shareholders, an increase in the number of shares of common stock that we are authorized to issue from 125,000,000 to 400,000,000. However, we cannot predict the outcome of that vote.

Edgar Filing: MEDIX RESOURCES INC - Form 424B3

If our shareholders do not approve of the increase in the number of shares of common stock that we are authorized to issue, we will be unable to raise additional capital.

We have frequent cash flow problems that often cause us to be delinquent in making payments to our vendors and other creditors, which may cause damage to our business relationships and cause us to incur additional expenses in the payment of late charges and penalties.

During 2002, from time to time, our lack of cash flow caused us to delay payment of our obligations as they came due in the ordinary course of our business. In some cases, we were delinquent in making payments by the legally required due dates. At our four office locations, we had 48 monthly rental payments due in the aggregate during 2002. Two of those payments were late. Such payments were paid within 30 days of their due date. All payments plus any required penalties were ultimately paid with respect to our 2002 obligations. We had 26 Federal withholding and other payment due dates. Of those, three due dates were missed. The resulting delinquencies ranged from one to ten days before the required payments were made. We paid the resulting penalties as they were billed. We had state withholding obligations in five states, Colorado, California, Georgia, New Jersey and New York. Although we were not late in making withholding payments in those five states during 2002, we have been late in prior periods. Similarly, although we were not late in making deposits of our employees' 401(k) contributions during 2002, we have been late in making such deposits in the past. During 2003, we may be delinquent from time to time in meeting our obligations as they become due.

While we have had operations since 1988, we are better considered a development stage company, which means our products and services have not yet proved themselves commercially viable and therefore our future is uncertain.

Although we have had operations since 1988, because of our move away from temporary healthcare staffing, we have a relatively short operating history and limited financial data upon which you may evaluate our business and prospects, and are better considered a development stage company. In addition, our business model is likely to continue to evolve as we attempt to develop our product offerings and enter new markets. As a result, our potential for future profitability must be considered in light of the risks, uncertainties, expenses and difficulties frequently encountered by development stage companies that are attempting to move into new markets and continuing to innovate with new and unproven technologies. We are still in the process of gaining experience in marketing physician connectivity products, providing support services, evaluating demand for products, financing a technology business and dealing with government regulation of health information technology products. While we are putting together a team of experienced executives, they have come from different backgrounds and may require some time to develop an efficient operating structure and corporate culture for our company.

We rely on healthcare professionals for the quality of the information that is transmitted through our interconnectivity systems, and we may not be paid for our services by third-party payors if that quality does not meet certain standards.

The success of our products and services in generating revenue may be subject to the quality and completeness of the data that is generated and stored by the physician or other healthcare professional and entered into our interconnectivity systems, including the failure to input appropriate or accurate information. Such failure may negatively affect our ability to generate revenue and our reputation.

Our market, healthcare services, is rapidly changing and the introduction of Internet connectivity services and products into that market has been slow,

which may cause us to be unable to develop a profitable market for our services and products.

- o As a developer of connectivity technology products, we will be required to anticipate and adapt to evolving industry standards and new technological developments. The market for the Merged Technology is characterized by continued and rapid technological advances in both hardware and software development, requiring ongoing expenditures for research and development, and timely introduction of new products and enhancements to existing products. The establishment of standards is largely a function of user acceptance. Therefore, such standards are subject to change. Our future success, if any, will depend in part upon our ability to enhance existing products, to respond effectively to technology changes, and to introduce new products and technologies that are functional and meet the evolving needs of our clients and users in the healthcare information systems market.
- o The introduction of physician connectivity products in our market has been slow due, in part, to the large number of small practitioners who are resistant to change and the implicit costs associated with change, particularly in a period of rising pressure to reduce costs in the market. In addition, the integration of processes and procedures with several payors and management intermediaries in a market area has taken more time than anticipated. The resulting delays continue to prevent the receipt of transaction fees and cause us to continue to raise money by the sale of our securities to finance our operations.
- o Our early-stage market approach concentrated product distribution efforts in a single market (Atlanta, Georgia), thereby amplifying the effect of localized market restrictions on our prospects, and delaying large-scale distribution of our products. While we intend to mitigate these local factors with a strategy to develop alternate distribution channels in multiple markets, there can be no assurance that we will be successful.
- o We cannot assure you that we will successfully complete the development of the Merged Technology in a timely fashion or at all or that our current or future products will satisfy the needs of the healthcare information systems market. Further, we cannot assure you that products or technologies developed by others will not adversely affect our competitive position or render our products or technologies noncompetitive or obsolete.

As a provider of medical connectivity products and services, we may become liable for product liability claims that could have a materially adverse effect on our financial condition.

Certain of our products provide applications that relate to patient medical histories and treatment plans. Any failure by our products to provide accurate, secure and timely information could result in product liability claims against us by our clients or their affiliates or patients. We are seeking product liability coverage, which may be prohibitive in cost. There can be no assurance that we will be able to obtain such coverage at an acceptable cost or that our insurance coverage would adequately cover any claim asserted against us. Such a claim could be in excess of the limits imposed by any policy we might be able to obtain. A successful claim brought against us in excess of any insurance coverage we might have could have a material adverse effect on our results of operations, financial condition or business. Even unsuccessful claims could result in the expenditure of funds in litigation, as well as diversion of management time and resources.

Our industry, healthcare, continually experiences rapid change and uncertainty

that could result in issues for our business planning or operations that could severely impact on our ability to become profitable.

The healthcare and medical services industry in the United States is in a period of rapid change and uncertainty. Governmental programs have been proposed, and some adopted, from time to time, to reform various aspects of the U.S. healthcare delivery system. Some of these programs contain proposals to increase government involvement in healthcare, lower reimbursement rates and otherwise change the operating environment for our physician users and customers. Particularly, the Health Insurance Portability and Accountability Act and the regulations that are being promulgated under it are causing the healthcare industry to change its procedures and incur substantial cost in doing so. Although we expect these regulations to have the beneficial effect of spurring adoption of our software products, we cannot predict with any certainty what impact, if any, these and future healthcare reforms might have on our business.

We rely on intellectual property rights, such as copyrights and trademarks, and unprotected propriety technology in our business operations and to create value in our companies; however, protecting intellectual property frequently requires litigation and close legal monitoring and may adversely affect our ability to become profitable.

- o Our wholly owned subsidiary, Cymedix Lynx Corporation, has certain intellectual property relating to its software business. These rights have been assigned by our subsidiary to the parent company, Medix Resources. The intellectual property legal issues for software programs, such as the Cymedix(R)products, are complex and currently evolving. Since patent applications are secret until patents are issued, in the United States, or published, in other countries, we cannot be sure that we are the first to file any patent application. In addition, we cannot assure you that competitors, many of which have far greater resources than we do, will not apply for and obtain patents that will interfere with our ability to develop or market the Merged Technology. Further, the laws of certain foreign countries do not provide the protection to intellectual property that is provided in the United States, and may limit our ability to market our products overseas. While we have no prospects for marketing or operations in foreign countries at this time, future opportunities for growth in foreign markets, for that reason, may be limited. We cannot give any assurance that the scope of the rights that we have been granted are broad enough to fully protect the Merged Technology from infringement.
- o Litigation or regulatory proceedings may be necessary to protect our intellectual property rights, such as the scope of our patent rights. In fact, the information technology and healthcare industries in general are characterized by substantial litigation. Such litigation and regulatory proceedings are very expensive and could be a significant drain on our resources and divert resources from product development. There is no assurance that we will have the financial resources to defend our patent rights or other intellectual property from infringement or claims of invalidity. A party has notified us that it believes our pharmacy product may infringe on patents that it holds. We have retained patent counsel who has made a preliminary investigation and determined that our product does not infringe on the identified patents. At this time no legal action has been instituted.
- o We also rely upon unprotected propriety technology and no assurance can be given that others will not independently develop substantially equivalent propriety information and techniques or otherwise gain access to or disclose our propriety technology or that we can meaningfully protect our rights in such unpatented propriety

Edgar Filing: MEDIX RESOURCES INC - Form 424B3

technology. We will use our best commercial efforts to protect such information and techniques; however, we cannot assure you that such efforts will be successful. The failure to protect our intellectual property could cause us to lose substantial revenues and to fail to reach our financial potential over the long term.

Because our business is highly competitive and there are many competitors who are financially stronger than we are, we are at risk of being outperformed in staffing, marketing, product development and customer services, which could severely limit our ability to become profitable.

- o eHealth Services. Competition can be expected to emerge from established healthcare information vendors and established or new Internet related vendors. The most likely competitors are companies with a focus on clinical information systems and enterprises with an Internet commerce or electronic network focus. Many of these competitors will have access to substantially greater amounts of capital resources than we have access to, for the financing of technical, manufacturing and marketing efforts. Frequently, these competitors will have affiliations with major medical product or software development companies, who may assist in the financing of such competitor's product development. We will seek to raise capital to develop the Merged Technology in a timely manner, however, so long as our operations remain under-funded, as they now are, we will be at a competitive disadvantage.
- o Personnel. The success of the development, distribution and deployment of the Merged Technology is dependent to a significant degree on our key management and technical personnel. We believe that our success will also depend upon our ability to attract, motivate and retain highly skilled, managerial, sales and marketing, and technical personnel, including software programmers and systems architects skilled in the computer languages in which the Merged Technology operates. Competition for such personnel in the software and information services industries is intense. The loss of key personnel, or the inability to hire or retain qualified personnel, could have a material adverse effect on our results of operations, financial condition or business.

We have relied on the private placement exemption to raise substantial amounts of capital, and could suffer substantial losses if that exemption was determined not to have been properly relied upon.

We have raised substantial amounts of capital in private placements from time to time. The securities offered in such private placements were not registered with the SEC or any state agency in reliance upon exemptions from such registration requirements. Such exemptions are highly technical in nature and if we inadvertently failed to comply with the requirements of any of such exemptive provisions, investors would have the right to rescind their purchase of our securities or sue for damages. If one or more investors were to successfully seek such rescission or institute any such suit, we could face severe financial demands that could materially and adversely affect our financial position.

The impact of shares of our common stock that may become available for sale in the future may result in the market price of our stock being depressed.

As of March 31, 2003, we had 80,767,065 shares of common stock outstanding. As of that date approximately 36,247,226 shares were issuable upon the exercise of outstanding options, warrants or other rights, and the conversion of preferred stock. Most of these shares will be immediately saleable upon exercise or conversion under registration statements we have filed with the SEC. The

Edgar Filing: MEDIX RESOURCES INC - Form 424B3

exercise prices of options, warrants or other rights to acquire common stock presently outstanding range from \$.25 per share to \$4.97 per share. During the respective terms of the outstanding options, warrants, preferred stock and other outstanding derivative securities, the holders are given the opportunity to profit from a rise in the market price of the common stock, and the exercise of any options, warrants or other rights may dilute the book value per share of our common stock and put downward pressure on the price of the common stock. The existence of the options, conversion rights, or any outstanding warrants may adversely affect the terms on which we may obtain additional equity financing. Moreover, the holders of such securities are likely to exercise their rights to acquire common stock at a time when we would otherwise be able to obtain capital on terms more favorable than could be obtained through the exercise or conversion of such securities. We have requested that our shareholders approve, at a special meeting of shareholders, an increase in the number of shares of common stock that we are authorized to issue from 125,000,000 to 400,000,000. If our shareholders approve of that increase, the possibility exists that shareholders of our common stock will be greatly diluted in the future when we issue additional shares and the price of our common stock may decrease as a result.

Because of dilution to our outstanding common stock from the below market pricing features of financings that are available to us, the market price of our stock may be depressed.

Financings that may be available to us under current market conditions frequently involve below market sales, as well as the issuance of warrants or convertible debt that require exercise or conversion prices that are calculated in the future at a discount to the then market price of our common stock. Any agreement to sell, or convert debt or equity securities into, common stock at a future date and at a price based on the then current market price will provide an incentive to the investor or third parties to sell the common stock short to decrease the price and increase the number of shares they may receive in a future purchase, whether directly from us or in the market. The issuance of our common stock in connection with such exercise or conversion may result in substantial dilution to the common stock holdings of other holders of our common stock.

Because of market volatility in our stock price, investors may find that they have a loss position if emergency sales become necessary.

Historically, our common stock has experienced significant price fluctuations. One or more of the following factors influence these fluctuations:

- o unfavorable announcements or press releases relating to the technology sector;
- o regulatory, legislative or other developments affecting our company or the healthcare industry generally;
- o conversion of our preferred stock and convertible debt into common stock at conversion rates based on current market prices or discounts to market prices, of our common stock and exercise of options and warrants at below current market prices;
- o sales by those financing our company through an equity line of credit or convertible securities which have been registered with the SEC and may be sold into the public market immediately upon receipt; and
- o market conditions specific to technology and Internet companies, the healthcare industry and general market conditions.

In addition, in recent years the stock market has experienced significant price

Edgar Filing: MEDIX RESOURCES INC - Form 424B3

and volume fluctuations. These fluctuations, which are often unrelated to the operating performance of specific companies, have had a substantial effect on the market price for many healthcare related technology companies. Factors such as those cited above, as well as other factors that may be unrelated to our operating performance, may adversely affect the price of our common stock.

The application of the "penny stock" rules to our common stock may depress the market for our stock.

Trading of our common stock may be subject to the penny stock rules under the Securities Exchange Act of 1934, as amended, unless an exemption from such rules is available. Broker-dealers making a market in our common stock will be required to provide disclosure to their customers regarding the risks associated with our common stock, the suitability for the customer of an investment in our common stock, the duties of the broker-dealer to the customer and information regarding bid and asked prices for our common stock, and the amount and description of any compensation the broker-dealer would receive in connection with a transaction in our common stock. The application of these rules may further result in fewer market makers making a market in our common stock and further restrict the liquidity of our common stock.

FORWARD-LOOKING STATEMENTS

Certain information contained in this prospectus and the documents incorporated by reference into this prospectus include forward-looking statements (as defined in Section 27A of the Securities Act and Section 21E of the Securities Exchange Act), which mean that they relate to events or transactions that have not yet occurred, our expectations or estimates for our future operations, our growth strategies or business plans or other facts that have not yet occurred. Such statements can be identified by the use of forward-looking terminology such as "might," "may," "will," "could," "expect," "anticipate," "estimate," "likely," "believe," or "continue" or the negative thereof or other variations thereon or comparable terminology. The above risk factors contain discussions of important factors that should be considered by prospective investors for their potential impact on forward-looking statements included in this prospectus and in the documents incorporated by reference into this prospectus. These important factors, among others, may cause actual results to differ materially and adversely from the results expressed or implied by the forward-looking statements.

THE COMPANY

General

We develop and intend to market communication technologies for use in the healthcare industry primarily at the point of care. We have focused on electronic prescribing of drugs, laboratory orders and laboratory results because these represent the majority of the transactions performed at the point of care, and remain largely a paper-based starting point for transferring information in the healthcare system. Our goal is to close the gap in electronic or automated processing by providing technologies and workflow processes at the point of care. Our technologies would enable point-of-care providers ("POCs") (i.e. physician or caretaker) to connect with other participants in the healthcare system. At this time, we are focused primarily on healthcare value chain intermediaries ("HVCIs") (e.g. pharmacy, lab, pharmacy benefit managers, pharmaceutical companies, etc.). Our products are designed to improve the accuracy and the efficiency of the processes of drug prescribing and the ordering of laboratory tests and the receiving of laboratory results.

When we shifted to this business in 2000, our plan was initially to deploy

Edgar Filing: MEDIX RESOURCES INC - Form 424B3

the technology in a single market. We began to test this approach in April 2002 with a small, local sales and installation team in Georgia that deployed the Cymedix technology to physician practices. By August 2002 it was clear to us that although the technology worked and physicians were using the system, this approach was not going to be commercially viable for several reasons including slow adoption by physicians unless there was an economic incentive, limited support by major HVCIs, and the high cost of marketing, sales, installation and service associated with serving individual and small medical practices. Based on these results, the initial deployment in Georgia was halted in August 2002.

At that time, we evaluated the business of automating the transaction at the point of care and concluded that a viable business could be built, but a different approach would be required than originally anticipated. Based on this evaluation, in September 2002, our Board recruited certain new senior managers including a new chief executive officer to assist us in pursuing alternative approaches to developing and deploying technology at the point of care.

Our current plan for the commercialization of our technology is to target physician practices and other POC centers that have the following characteristics: sufficient patient volume; clear economic incentive, such as administrative savings and time savings; commitment to electronic transfer of point of care information; and HVCIs or other healthcare participant support for the rollout of the technology. Subject to the above criteria, our goal remains to connect from the point of care to the various segments of the healthcare industry that meet these criteria, such as health plans, insurers, skilled nursing facilities, pharmacy benefit management companies ("PBMs"), pharmacies and pharmaceutical companies.

We believe that it is important to deploy technologies that are easy to adopt or already have established markets. As such, on March 4, 2003 we acquired assets from Comdisco Ventures, Inc. that were formerly used by ePhysician, Inc. in its software and technology business prior to its cessation of operations in 2002. ePhysician point-of-care technologies enable physicians to securely access and send information to pharmacies, billing service companies, and practice management systems via the Palm OS(R)-based handheld device and the Internet, meeting our objective of deploying a recognized technology. Our goal is the integration of the Cymedix and e-Physician technologies and to market them on a commercial basis.

We have been in business since 1988. We decided in 2000 to dispose of the temporary healthcare staffing business to focus on the healthcare software and connectivity solutions industry. The development of technology and the future marketing of connectivity solutions is our sole business at this time. Our net operating loss is due to this transition and the ongoing efforts to build a commercially viable business in point-of-care automation. We currently do not have any active users of our products.

We are currently a Colorado corporation, but have requested that our shareholders approve, at a special meeting of shareholders, a reincorporation merger in Delaware with our wholly owned subsidiary.

Our principal executive office is located at The Graybar Building, 420 Lexington Avenue, Suite 1830, New York, New York 10170, and our telephone number is (212) 697-2509. We have closed our California and Colorado offices, and we are actively pursuing an exit to our leases in Georgia and California.

USE OF PROCEEDS

The selling securityholders will receive the net proceeds from the sale of shares. We will not receive any of the proceeds from any sale of the shares by the selling securityholders. However, we will receive the proceeds from the

Edgar Filing: MEDIX RESOURCES INC - Form 424B3

exercise of warrants to purchase certain of the shares offered hereunder. If all warrants covered hereby are exercised, we would receive proceeds of \$5,833,542. Any such proceeds will be used for working capital purposes.

SELLING SECURITYHOLDERS

The table below sets forth information as of April 30, 2003, with respect to the selling securityholders, including names, holdings of shares of common stock prior to the offering of the shares, including shares covered by warrants, the number of shares being offered for each account, and the number and percentage of shares of common stock to be owned by the selling securityholders immediately following the sale of the shares, assuming all of the offered shares are sold. The selling securityholders acquired the shares of common stock and warrants covering shares of our common stock in private placement transactions or as fees for serving as finders in connection with our private placements.

(1) Includes shares of common stock covered by warrants that are included in this prospectus.

(2) Aaron Investments, Blue Water Trading, Inc., Carl Frankson, Intercoastal Financial Services Corp., Legend Merchant Group, Marjorie E. Goddard, Jonathan Merriman, Barry Ollman and Otape, LLC advised us that they are affiliated with broker-dealers. Each of the foregoing purchased the covered securities from us in private placements and previously confirmed to us that the covered securities were acquired solely for investment purposes and for the account of the selling securityholder, and not with a view to or for the resale or distribution of such securities.

Edgar Filing: MEDIX RESOURCES INC - Form 424B3

Relationship Between Medix and the Selling Securityholders

The selling securityholders have purchased their shares from us, or will acquire the shares of common stock indicated above upon the exercise of warrants, in private placements. None of the persons listed above are affiliates or controlled by our affiliates, except the following officer and directors who purchased securities on the same terms as other investors in the private placement: Patrick Jeffries and Mark Lerner. We have separate contractual obligations to file this registration with each of the selling securityholders.

DESCRIPTION OF THE SECURITIES

Our authorized capital consists of 125,000,000 shares of common stock, par value \$.001 per share, and 2,500,000 shares of preferred stock, par value \$.001 per share. As of March 31, 2003, we had outstanding 80,767,065 shares of common stock, 1 share of 1996 Preferred Stock and 75 shares of 1999 Series C Preferred Stock. As of such date, our common stock was held of record by approximately 460 persons and beneficially owned by approximately 10,000 persons. We have requested that our shareholders approve, at a special meeting of shareholders, an increase in the number of shares of common stock that we are authorized to issue from 125,000,000 to 400,000,000.

Common Stock

Each share of common stock is entitled to one vote at all meetings of stockholders. Stockholders are not permitted to cumulate votes in the election of directors. Currently, the Board of Directors consists of five directors, who serve for staggered terms of three years, with at least two directors elected at every annual meeting. We also currently have two vacancies on our Board of Directors that we intend to fill. All shares of common stock are equal to each other with respect to liquidation rights and dividend rights. There are no preemptive rights to purchase any additional shares of common stock. In the event of our liquidation, dissolution or winding up, holders of the common stock will be entitled to receive on a pro rata basis all of our assets remaining after satisfaction of all liabilities and preferences of the outstanding preferred stock. The outstanding shares of common stock and the shares of common stock issuable upon conversion or exercise of derivative securities are or will be, as the case may be, duly and validly issued, fully paid and non-assessable.

Transfer Agent and Registrar

We have retained Computershare Trust Company, Inc., 350 Indiana Street, Suite 800, Golden, Colorado 80401, as Transfer Agent and Registrar, for our common stock. Computershare Trust Company's telephone number is (303) 262-0600.

PLAN OF DISTRIBUTION

The selling securityholders and any of their pledgees, donees, assignees and successors-in-interest may, from time to time, sell any or all of their shares of common stock on any stock exchange, market or trading facility on which the shares are traded. These sales may be at fixed or negotiated prices. The selling securityholders may use any one or more of the following methods when selling shares:

- o ordinary brokerage transactions and transactions in which the broker-dealer solicits purchasers;
- o block trades in which the broker-dealer will attempt to sell the shares as agent but may position and resell a portion of the block as principal to facilitate the transaction;

Edgar Filing: MEDIX RESOURCES INC - Form 424B3

- o purchases by a broker-dealer as principal and resale by the broker-dealer for its account;
- o an exchange distribution in accordance with the rules of the applicable exchange;
- o privately negotiated transactions;
- o short sales;
- o broker-dealers may agree with the selling securityholders to sell a specified number of such shares at a stipulated price per share;
- o a combination of any such methods of sale; and
- o any other method permitted pursuant to applicable law.

The selling securityholders may also sell shares under Rule 144 under the Securities Act of 1933, as amended (the "Securities Act"), if available, rather than under this prospectus.

The selling securityholders may also engage in short sales against the box, puts and calls and other transactions in our securities or derivatives of our securities and may sell or deliver shares in connection with these trades. The selling securityholders may pledge their shares to their brokers under the margin provisions of customer agreements. If a selling stockholder defaults on a margin loan, the broker may, from time to time, offer and sell the pledged shares. We believe that the selling securityholders have not entered into any agreements, understandings or arrangements with any underwriters or broker-dealers regarding the sale of their shares other than ordinary course brokerage arrangements, nor is there an underwriter or coordinating broker acting in connection with the proposed sale of shares by the selling securityholders.

Broker-dealers engaged by the selling securityholders may arrange for other brokers-dealers to participate in sales. Broker-dealers may receive commissions or discounts from the selling securityholders (or, if any broker-dealer acts as agent for the purchaser of shares, from the purchaser) in amounts to be negotiated. The selling securityholders do not expect these commissions and discounts to exceed what is customary in the types of transactions involved.

Selling securityholders and any broker-dealers or agents that are involved in selling the shares may be deemed to be "underwriters" within the meaning of the Securities Act in connection with such sales. In such event, any commissions received by such broker-dealers or agents and any profit on the resale of the shares purchased by them may be deemed to be underwriting commissions or discounts under the Securities Act. If the selling securityholders are deemed to be underwriters, the selling securityholders may be subject to certain statutory and regulatory liabilities, including liabilities imposed pursuant to Sections 11, 12 and 17 of the Securities Act and Rule 10b-5 under the Exchange Act.

We are required to pay all fees and expenses incident to the registration of the shares. Otherwise, all discounts, commissions or fees incurred in connection with the sale of the common stock offered hereby will be paid by the selling securityholders.

Upon our being notified by a selling stockholder that any material arrangement has been entered into with a broker-dealer for the sale of shares through a block trade, special offering, exchange distribution or secondary distribution or a purchase by a broker or dealer, a supplement to this prospectus will be filed, if required, pursuant to Rule 424(b) under the

Edgar Filing: MEDIX RESOURCES INC - Form 424B3

Securities Act, disclosing (i) the name of each such selling stockholder and of the participating broker-dealer(s), (ii) the number of shares involved, (iii) the price at which such shares were sold, (iv) the commissions paid or discounts or concessions allowed to such broker-dealer(s), where applicable, (v) that such broker-dealer(s) did not conduct any investigation to verify the information set out or incorporated by reference in this prospectus, and (vi) other facts material to the transaction.

In order to comply with the securities laws of certain states, if applicable, the shares will be sold in such jurisdictions, if required, only through registered or licensed brokers or dealers. In addition, in certain states the shares may not be sold unless the shares have been registered or qualified for sale in such state or an exemption from registration or qualification is available and complied with.

We advised the selling securityholders that the anti-manipulative provisions of Regulation M promulgated under the Exchange Act may apply to their sales of the shares offered hereby.

INDEMNIFICATION OF OFFICERS AND DIRECTORS

Article 109 of the Colorado Business Corporation Act generally provides that we may indemnify our directors, officers, employees and agents against liabilities in any action, suit or proceeding whether civil, criminal, administrative or investigative and whether formal or informal (a "Proceeding"), by reason of being or having been a director, officer, employee, fiduciary or agent of Medix, if such person acted in good faith and reasonably believed that his conduct, in his official capacity, was in the best interests of Medix (or, with respect to employee benefit plans, was in the best interests of the participants of the plan), and in all other cases that his conduct was at least not opposed to Medix's best interests. In the case of a criminal proceeding, the director, officer, employee or agent must have had no reasonable cause to believe that his conduct was unlawful. Under Colorado Law, we may not indemnify a director, officer, employee or agent in connection with a proceeding by or in the right of Medix if the director is adjudged liable to Medix, or in a proceeding in which the directors, officer employee or agent is adjudged liable for an improper personal benefit.

Our Articles of Incorporation and Bylaws provide that we shall indemnify our directors, and officers, employees and agents to the extent and in the manner permitted by the provisions of the laws of the State of Colorado, as amended from time to time, subject to any permissible expansion or limitation of such indemnification, as may be set forth in any stockholders' or directors' resolution or by contract.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers or persons controlling Medix pursuant to the foregoing provisions, we have been informed that in the opinion of the Securities and Exchange Commission (the "Commission"), such indemnification is against public policy as expressed in the Securities Act and is therefore unenforceable.

WHERE YOU CAN FIND MORE INFORMATION ABOUT US

We file reports, proxy statements, information statements and other information with the SEC. You may read and copy this information, for a copying fee, at the SEC's Public Reference Room at 450 Fifth Street, N.W., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for more information on its public reference rooms. Our SEC filings are also available to the public from commercial document retrieval services, from the American Stock Exchange and at

Edgar Filing: MEDIX RESOURCES INC - Form 424B3

the web site maintained by the SEC at <http://www.sec.gov>.

We have filed a registration statement under the Securities Act, with respect to the securities offered pursuant to this prospectus. This prospectus does not contain all of the information set forth in the registration statement, certain parts of which are omitted in accordance with the rules and regulations of the Commission. For further information, reference is made to the registration statement and the exhibits filed as a part thereof, which may be found at the locations and website referred to above.

INCORPORATION OF CERTAIN INFORMATION BY REFERENCE

The Securities and Exchange Commission (the "SEC") allows us to "incorporate by reference" into this prospectus the information we file with the SEC, which means that we can disclose important information to you by referring to those documents. The information incorporated by reference is an important part of this prospectus. We incorporate by reference the following documents we filed with the SEC:

- o Our Annual Report on Form 10-K for the fiscal year ended December 31, 2002;
- o Our Current Report on Form 8-K, dated January 13, 2003;
- o Our Current Report on Form 8-K, dated January 21, 2003;
- o Our Current Report on Form 8-K, dated February 3, 2003;
- o Our Current Report on Form 8-K, dated February 6, 2003;
- o Our Current Report on Form 8-K, dated February 10, 2003; and
- o Our Current Report on Form 8-K, dated March 6, 2003; and
- o Our Current Report on Form 8-K, dated April 14, 2003.

We are also incorporating by reference additional documents that we may file with the Commission under Section 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act prior to the termination of this offering.

If you are a stockholder, we may have sent you some of the documents incorporated by reference, but you can obtain any of them through the Commission or us. Documents incorporated by reference are available from us without charge, except exhibits, unless we have specifically incorporated by reference an exhibit into a document that this prospectus incorporates. Stockholders may obtain documents incorporated by reference into this prospectus by requesting them in writing or by telephone from:
