\* The table assumes that the digital return amount will be set at the lowest value indicated in this offering summary. The actual digital return amount will be determined on the pricing date.

<sup>(1)</sup> Hypothetical total return on securities at maturity = hypothetical payment at maturity per security *minus* \$1,000 stated principal amount per security, *divided by* \$1,000 stated principal amount per security

### **Selected Risk Considerations**

- You may lose a significant portion or all of your investment. If the final underlying value is less than the final barrier value, you will lose 1% of the stated principal amount of your securities for every 1% by which the underlying has depreciated from the initial underlying value to the final underlying value. There is no minimum payment at maturity on the securities, and you may lose up to all of your investment.
  
- The securities do not pay interest.
  
- Your potential return on the securities is limited. Your return on the securities will not exceed the digital return, even if the underlying appreciates by significantly more than the digital return.
  
- You will not receive dividends or have any other rights with respect to the underlying.
  
- Your payment at maturity depends on the closing value of the underlying on a single day.
  
- The securities are subject to the credit risk of Citigroup Global Markets Holdings Inc. and Citigroup Inc. If Citigroup Global Markets Holdings Inc. defaults on its obligations under the securities and Citigroup Inc. defaults on its guarantee obligations, you may not receive anything owed to you under the securities.
  
- The securities will not be listed on any securities exchange and you may not be able to sell them prior to maturity.
  
- The estimated value of the securities on the pricing date will be less than the issue price. For more information about the estimated value of the securities, see the accompanying preliminary pricing supplement.
  
- The value of the securities prior to maturity will fluctuate based on many unpredictable factors.
  
- The EURO STOXX 50<sup>®</sup> Index is subject to risks associated with non-U.S. markets.

- The performance of the EURO STOXX 50<sup>®</sup> Index will not be adjusted for changes in the exchange rate between the euro and the U.S. dollar.
- The issuer and its affiliates may have conflicts of interest with you.
- The U.S. federal tax consequences of an investment in the securities are unclear.

**The above summary of selected risks does not describe all of the risks associated with an investment in the securities. You should read the accompanying preliminary pricing supplement and product supplement for a more complete description of risks relating to the securities.**
