Notes to Financial Statements

1. Significant Accounting Policies

The Adams Express Company (the Company) is registered under the Investment Company Act of 1940 as a diversified investment company. The Company's investment objectives as well as the nature and risk of its investment transactions are set forth in the Company's registration statement.

Security Valuation -- Investments in securities traded on a national security exchange are valued at the last reported sale price on the day of valuation. Over-the-counter and listed securities for which a sale price is not available are valued at the last quoted bid price. Short-term investments (excluding purchased options) are valued at amortized cost. Purchased and written options are valued at the last quoted asked price.

Affiliated Companies -- Investments in companies 5% or more of whose outstanding voting securities are held by the Company are defined as "Affiliated Companies" in Section 2(a)(3) of the Investment Company Act of 1940.

Security Transactions and Investment Income -- Investment transactions are accounted for on the trade date. Gain or loss on sales of securities and options is determined on the basis of identified cost. Dividend income and distributions to shareholders are recognized on the ex-dividend date, and interest income is recognized on the accrual basis.

Edgar Filing: ADAMS EXPRESS CO - Form N-30D

2. Federal Income Taxes

The Company's policy is to distribute all of its taxable income to its shareholders in compliance with the requirements of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. For federal income tax purposes, the identified cost of securities, including options, at June 30, 2001 was \$1,005,353,991, and net unrealized appreciation aggregated \$608,898,927, of which the related gross unrealized appreciation and depreciation were \$734,971,477 and \$126,072,550, respectively.

Distributions are determined in accordance with income tax regulations which may differ from generally accepted accounting principles. Accordingly, periodic reclassifications are made within the Company's capital accounts to reflect income and gains available for distribution under income tax regulations.

3. Investment Transactions

Purchases and sales of portfolio securities, other than options and short-term investments, during the six months ended June 30, 2001 were \$198,517,618 and \$218,361,921, respectively. Options may be written or purchased by the Company. The Company, as writer of an option, bears the market risk of an unfavorable change in the price of the security underlying the written option. The risk associated with purchasing options is limited to the premium originally paid. Option transactions comprised an insignificant portion of operations during the period ended June 30, 2001. All investment decisions are made by a committee, and no one person is primarily responsible for making recommendations to that committee.

4. Capital Stock

The Company has 10,000,000 authorized and unissued preferred shares without par value.

On October 19, 2000 the Company effected a 3-for-2 stock split. All references to the number of outstanding shares and per share amounts have been adjusted retroactively to reflect the stock split.

The Company may purchase shares of its common stock from time to time at such prices and amounts as the Board of Directors may deem advisable. Transactions in common stock for 2001 and 2000 were as follows:
