**VERTICALNET, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

(1)

Background and Basis of Presentation

Company Overview

Verticalnet, Inc., which was incorporated on July 28, 1995 under the laws of Pennsylvania, is referred to throughout this report as "Verticalnet", the Company, the registrant, we, or us.

We are a provider of Strategic Sourcing and Supply Management solutions that enable companies to identify, negotiate, realize, and maintain supply chain savings. Led by our Spend Analysis solution that provides companies with insight into enterprise-wide spending, Verticalnet's full suite of Supply Management solutions enables companies to achieve lower prices, improved contract compliance, better supplier service, and shorter sourcing cycles.

With the completion of the June 2002 sale of our Small/Medium Business (SMB) unit that operated and managed 59 industry-specific online marketplaces, we have completed a business transformation from our origins as an operator of online public vertical communities to a business solely focused on delivering supply chain solutions to enterprise customers. The operating results of this unit through June 28, 2002 have been reflected as a discontinued operation in our consolidated financial statements.

Our consolidated financial statements as of and for the three months ended March 31, 2003 and 2002 have been prepared without audit pursuant to the rules and regulations of the United States Securities and Exchange Commission (SEC). In the opinion of management, the unaudited interim consolidated financial statements that accompany these notes reflect all adjustments, consisting only of normal recurring adjustments, necessary to present fairly our financial position as of March 31, 2003 and December 31, 2002 and the results of operations and cash flows for the three months ended March 31, 2003 and 2002. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to the SEC's rules and regulations relating to interim financial statements. These consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes included in our Annual Report on Form 10-K for the year ended December 31, 2002.

Basis of Presentation

Our consolidated financial statements include the accounts of our wholly-owned subsidiaries. All significant inter-company balances and transactions have been eliminated in consolidation. Certain prior period amounts have been reclassified for comparability with the current period's financial statement presentation.

On July 1, 2002, the Company announced that its board of directors had approved a one-for-ten reverse stock split effective with the commencement of trading on July 15, 2002. All references in the consolidated financial statements to shares and per share amounts have been adjusted for this split.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates include the allowance for doubtful accounts; carrying values for intangible assets and non-publicly held investments; and restructuring charges for abandoned operating leases.

Cash and Cash Equivalents

Cash and cash equivalents include cash, money market investments and other highly-liquid investments with purchased maturities of three months or less.

Table of Contents**VERTICALNET, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)***Restricted Cash*

Restricted cash represents certificates of deposit held pursuant to building lease agreements and other financing arrangements. At March 31, 2003, we had approximately \$0.8 million and \$0.1 million of restricted cash classified in current and non-current other assets, respectively, on the consolidated balance sheet. At December 31, 2002, we had approximately \$1.1 million and \$0.5 million of restricted cash classified in current and non-current other assets, respectively, on the consolidated balance sheet.

Investments

We account for debt securities and marketable equity securities in accordance with Statement of Financial Accounting Standards (SFAS) No. 115, Accounting for Certain Investments in Debt and Equity Securities. These available-for-sale investments are classified as prepaid expenses and other current assets on the consolidated balance sheet and are reported at fair value, with unrealized gains and losses recorded in other comprehensive income (loss). Realized gains or losses and other than temporary declines in fair value of available-for-sale securities are reported in interest and other expense, net, as incurred.

We hold equity instruments of privately-held companies for business and strategic purposes. These investments are included in other investments on the consolidated balance sheet and are accounted for under the cost method since our ownership percentage is less than 20% and we do not have the ability to exercise significant influence over the investees. For these non-publicly traded investments, our policy is to regularly review the market conditions and the assumptions underlying the operating performance and cash flow forecasts in assessing the recoverability of the carrying values.

Property and Equipment

Property and equipment are originally stated at cost. Leasehold improvements are amortized on a straight-line basis over the lesser of the estimated useful life of the asset or the lease term. Property and equipment are depreciated on a straight-line basis over the estimated useful lives of the assets as follows:

Computer equipment and software	1.5 - 3 years
Office equipment and furniture	5 years

Capitalized Software

Under the provisions of Statement of Position (SOP) 98-1, Accounting for the Costs of Computer Software Developed or Obtained for Internal Use, we capitalize costs associated with internally developed and/or purchased software systems for new products and enhancements to existing products that have reached the application development stage and meet recoverability tests. Capitalized costs include external direct costs of materials and services utilized in developing or obtaining internal-use software, payroll and payroll-related expenses for employees who are directly associated with and devote time to the internal-use software project and interest costs incurred, if material, while developing internal-use software. Capitalization of such costs begins when the preliminary project stage is complete and ceases no later than the point at which the project is substantially complete and ready for its intended purpose. These capitalized costs are amortized on a straight-line basis over the economic useful life, beginning when the asset is ready for its intended use.

Under the provisions of SFAS No. 86, Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed, certain development costs of our software products are capitalized subsequent to the establishment of technological feasibility and up to the time the product becomes available for general release. Amortization is provided on a product-by-product basis on the straight-line method over the remaining estimated economic life of the product.

There were no software costs capitalized under SOP 98-1 and SFAS No. 86 during the three months ended March 31, 2003 and 2002. Any costs that were capitalized would be included in property and equipment on the consolidated balance sheet. Amortization expense for the three months ended March 31, 2003 and 2002 was immaterial. The carrying value of the software is regularly reviewed and an impairment is recognized if the

Edgar Filing: VERTICALNET INC - Form 10-Q

value of the estimated undiscounted cash flow benefits related to the asset is less than the remaining unamortized cost. No impairment of capitalized software was recognized during the three months ended March 31, 2003 and 2002.

Table of Contents

VERTICALNET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Intangible and Other Long-Lived Assets

We adopted SFAS No. 142, Goodwill and Other Intangible Assets, effective January 1, 2002. Under SFAS No. 142, goodwill is no longer amortized but is reviewed for impairment annually, or more frequently if certain indicators arise. We performed a goodwill impairment test as of September 30, 2002 under SFAS No. 142. As a result of this test, the Company recorded a goodwill impairment charge of approximately \$27.6 million, which represented the full amount of unamortized goodwill at the time of the test. Long-lived assets, other than goodwill, are reviewed for impairment whenever, in management's judgment, conditions indicate a possible loss. Such impairment tests compare estimated undiscounted cash flows to the reduced value of the asset. If an impairment is indicated, the asset is written down to its fair market value based on an estimate of its discounted cash flows.

Self Insurance

We are self-insured for certain losses related to employee medical benefits. We have purchased stop-loss coverage in order to limit our exposure. Self-insurance losses are accrued based on our estimates of the aggregate liability for uninsured claims incurred using certain actuarial assumptions followed in the insurance industry. At March 31, 2003 and December 31, 2002, the accrued liability for self-insured losses is included in accounts payable and accrued expenses and approximates \$0.2 million and \$0.5 million, respectively.

Concentration of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents in bank deposits accounts, short-term investments and trade receivables. Cash and cash equivalents are held with high quality financial institutions. Short-term investments are primarily held in corporate bonds. We periodically perform credit evaluations of our customers and maintain reserves for potential losses, if necessary. We do not anticipate losses from these receivables in excess of provided allowances.

Revenue Recognition

Software licensing and related services revenues are principally derived from the licensing of our products, from maintenance and support contracts and from the delivery of professional services. Customers who license our products also generally purchase maintenance contracts which provide software updates and technical support over a stated term, which is usually a twelve-month period. Customers may also purchase custom development and implementation services from us.

The license agreements for our products do not provide for a right of return other than during the warranty period, and historically product returns have not been significant. We do not recognize revenue for refundable fees or agreements with cancellation rights until such rights to refund or cancellation have expired. Our products are either acquired under a perpetual license model or under a time-based license model.

We recognize revenue in accordance with SOP 97-2, Software Revenue Recognition, as amended by SOP 98-9, Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions. We recognize revenue when all of the following criteria are met: persuasive evidence of an arrangement exists; delivery of the product has occurred; the fee is fixed or determinable; and collectibility is probable. We consider all arrangements with payment terms extending beyond one year to not be fixed or determinable, and revenue under these agreements is recognized as payments become due from the customer. If collectibility is not considered probable, revenue is recognized when the fee is collected.

SOP 97-2, as amended, generally requires revenue earned on software arrangements involving multiple elements to be allocated to each element based on the relative fair values of the elements. Our determination of fair value of each element in multi-element arrangements is based on vendor-specific objective evidence (VSOE). We limit our assessment of VSOE for each element to either the price charged when the same element is sold separately or the price established by management, having the relevant authority to do so, for an element not yet sold separately.

If evidence of fair value of all undelivered elements exists but evidence does not exist for one or more delivered elements, then revenue is recognized using the residual method. Under the residual method, the fair value of the undelivered elements is deferred

Table of Contents**VERTICALNET, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

and the remaining portion of the arrangement fee is recognized as revenue. Revenue allocated to maintenance and support is recognized ratably over the maintenance term and revenue allocated to training and other service elements is recognized as the services are performed. The proportion of revenue recognized upon delivery may vary from quarter to quarter depending upon the relative mix of licensing arrangements and the availability of VSOE of fair value for all of the undelivered elements.

Arrangements that include professional services are evaluated to determine whether those services are essential to the functionality of other elements of the arrangement. When services are not considered essential, the revenue allocable to the professional services is recognized as the services are performed. If we provide professional services that are considered essential to the functionality of the software products, both the software product revenue and professional service revenue are recognized in accordance with the provisions of SOP 81-1, Accounting for Performance of Construction-Type and Certain Production-Type Contracts. To date, most of our professional services rendered in connection with the licensing of our software have been considered to be essential to the functionality and therefore, the majority of our contracts that involved licenses and professional services were recognized on a percentage of completion basis.

Deferred revenue includes amounts received from customers for which revenue has not been recognized, which in most cases relates to maintenance or license fees that are deferred until they can be recognized. The majority of our deferred revenue at December 31, 2001 was related to license fee payments received from Converge, Inc. (Converge). Such amounts were to be recognized as revenue on a straight-line basis over the contract term, which was scheduled to end on December 31, 2003. This revenue comprised the majority of our revenue (66%) for the three months ended March 31, 2002. See Note 6 to these consolidated financial statements regarding the November 2002 amendment to the Converge license agreement.

Research and Development

Research and development costs consist primarily of salaries and benefits, consulting and other related expenses, which are expensed as incurred.

Advertising Costs

We expense advertising costs as incurred and report such costs as a component of sales and marketing expense. Advertising expenses for continuing operations were immaterial for the three months ended March 31, 2003 and 2002.

Stock Options

Stock-based employee compensation is recognized using the intrinsic value method in accordance with Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations. Under the intrinsic value method, compensation expense is recorded on the date of grant only if the current market price of the stock exceeded the exercise price. For disclosure purposes, pro forma net loss and loss per share data are provided in accordance with SFAS No. 123, Accounting for Stock-Based Compensation, as if the fair value method had been applied. The following table illustrates the effect on our net loss attributable to common shareholders and loss per common share if the Company had applied the fair value recognition provisions of SFAS No. 123 (in thousands, except for per share data):

	Three Months Ended	
	March 31,	
	2003	2002
Loss attributable to common shareholders:		
As reported	\$ (1,193)	\$ (199)
Add: Stock-based employee compensation included in reported net loss	91	31

As reported	\$ (0.09)	\$ (0.02)
Pro forma	\$ (0.19)	\$ (0.75)

Table of Contents

VERTICALNET, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Foreign Currency Translation

We translate the assets and liabilities of international subsidiaries into U.S. dollars at the current rates of exchange in effect as of each balance sheet date. Revenues and expenses are translated using average rates in effect during the period. Gains and losses from translation adjustments are included in accumulated other comprehensive loss on the consolidated balance sheet. Foreign currency transaction gains or losses are recognized in current operations and have not been significant to our operating results in any period. The effect of foreign currency rate changes on cash and cash equivalents has not been significant in any period.

Accounting for Derivatives

We account for derivatives in accordance with SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, which provides accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities. All derivatives, whether designated in hedging relationships or not, are recorded on the consolidated balance sheet at fair value. If the derivative is designated as a fair value hedge, the changes in the fair value of the derivative and of the hedged item attributable to the hedged risk are recognized in interest and other expense, net. If the derivative is designated as a cash flow hedge, the effective portion of changes in the fair value of the derivative is recorded in other comprehensive income (loss) and is recognized in interest and other expense, net when the hedged item affects earnings. The ineffective portion of changes in the fair value of cash flow hedges is recognized in interest and other expense, net.

Income Taxes

We record income taxes using the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and the tax effect of net operating loss carryforwards.

Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the period that includes the enactment date. A valuation allowance is recorded against deferred tax assets if it is more likely than not that such assets will not be realized.

Comprehensive Income (Loss)

We report comprehensive income or loss in accordance with the provisions of SFAS No. 130, Reporting Comprehensive Income. SFAS No. 130 establishes standards for reporting comprehensive income (loss) and its components in financial statements. Comprehensive income or loss, as defined, includes all changes in equity during a period from non-owner sources.

Computation of Historical Net Income (Loss) Per Share

Basic income (loss) per share is computed using the weighted average number of common shares outstanding during the period. Diluted income (loss) per share is computed using the weighted average number of common and dilutive common equivalent shares outstanding during the period, including incremental common shares issuable upon the exercise of stock options and warrants (using the treasury stock method) and the conversion of our 5 1/4% convertible subordinated debentures and our former Series A 6.00% convertible redeemable preferred stock (using the if-converted method). Common equivalent shares are excluded from the calculation if their effect is anti-dilutive.

Table of Contents**VERTICALNET, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

The following table sets forth the computation of loss per common share (in thousands, except per share data):

	Three Months Ended	
	March 31,	
	2003	2002
Loss from continuing operations	\$ (1,193)	\$ (5,763)

Basic and diluted loss per common share:		
Loss from continuing operations	\$ (0.09)	\$ (0.69)
Income from discontinued operations		0.67
Loss per common share	\$ (0.09)	\$ (0.02)
Weighted average common shares outstanding:		
Basic and diluted	13,400	11,073

During the periods ending March 31, 2003 and 2002, the dilutive earnings per share calculation was the same as the basic earnings per share calculation as all potentially dilutive securities were anti-dilutive. Potentially dilutive common shares of 2,140,420 and 2,406,747 were excluded because their effect was anti-dilutive for the periods ending March 31, 2003 and 2002, respectively. In addition 247,939 common shares, that were previously held in escrow in connection with the Atlas Commerce, Inc. (Atlas Commerce) transaction are only included in the loss per share calculation since their release date of March 31, 2003.

Adoption of New Pronouncements

In April 2002, the Financial Accounting Standards Board (FASB) issued SFAS No. 145, Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement No. 13 and Technical Corrections. SFAS No. 4, Reporting Gains and Losses from Extinguishment of Debt, required that gains and losses from extinguishments of debt be included in the determination of net income and be aggregated and, if material, classified as an extraordinary item, net of related income tax effect. Although SFAS No. 145 became effective January 1, 2003, the Company elected to early adopt the provisions of SFAS No. 145 in 2002. During the third quarter of 2002, in connection with the settlement of obligations involving British Telecommunications Plc. (BT), the Company recognized a \$4.8 million gain representing the difference between the fair value of the consideration issued in the settlement transaction and the carrying value of the amounts due BT. As a result of the early adoption of SFAS No. 145, the Company evaluated the classification of this gain in accordance with the provisions of APB Opinion No. 30, Reporting the Results of Operations Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions, and determined that the gain did not meet the criteria for classification as an extraordinary item.

In June 2002, the FASB issued SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities. This Statement addresses the financial accounting and reporting of expenses related to restructurings initiated after 2002, and applies to costs associated with an exit activity (including a restructuring) or with a disposal of long-lived assets. Those activities can include eliminating or reducing product lines, terminating

Edgar Filing: VERTICALNET INC - Form 10-Q

employees and contracts, and relocating plan facilities or personnel. Under SFAS No. 146, a company will record a liability for a cost associated with an exit or disposal activity when the liability is incurred and can be measured at fair value. The provisions of SFAS No. 146 are effective prospectively for exit or disposal activities initiated after December 31, 2002.

In December 2002, the FASB issued SFAS No. 148, Accounting for Stock-Based Compensation – Transition and Disclosure, which amends SFAS No. 123, Accounting for Stock-Based Compensation to provide alternative methods of transition for a voluntary change to the fair value method of accounting for stock-based employee compensation. In addition, SFAS No. 148 amends the disclosure requirements of SFAS No. 123 to require prominent disclosures in both annual and interim financial statements. Certain of the disclosure modifications are required for interim periods ending after December 15, 2002, which the Company has applied in these consolidated financial statements.

(2)

LIQUIDITY

We believe that our current level of liquid assets and the expected cash flows from contractual arrangements will be sufficient to finance our capital requirements and anticipated operating losses for at least the next twelve months. However, to the extent that the current level of liquid assets or future revenues prove to be insufficient, we may need to further reduce our operating costs or obtain additional debt or equity financing. Additionally, we may, if the capital markets present attractive opportunities, raise cash through the sale of debt or equity. We can provide no assurance that we will be successful in obtaining any required or desired financing either on acceptable terms or at all.

We may attempt to settle outstanding non-cancelable lease obligations and/or the Company's convertible notes. If successful, our financial resources will be reduced.

(3)

DISCONTINUED OPERATIONS

SMB

On June 28, 2002, we completed the sale of the SMB unit to Vert Markets, Inc., an affiliate of Corry Publishing, Inc. The SMB unit generated revenue from e-enablement and e-commerce, as well as advertising and services. As consideration for the transaction, we received cash of \$2.35 million. In addition, we may receive up to an additional \$6.5 million based on a four-year performance-based earn-out provision. We recorded a loss on disposal of approximately \$0.2 million in the three months ended June 30, 2002 for the sale of the SMB unit.

The results of the SMB unit have been shown as a discontinued operation and prior periods have been restated. Revenues and losses from this discontinued operation are as follows:

	Three Months Ended March 31, 2002
	(in thousands)
E-commerce, advertising, software, maintenance and other revenues	\$ 13,052
Income from discontinued operations	7,481

The income from discontinued operations for the three months ended March 31, 2002 includes \$0.3 million in restructuring charges.

(4)

INVESTMENTS

Cost Method Investments

At March 31, 2003 and December 31, 2002, cost method investments were approximately \$0.6 million.

Other Investments

Edgar Filing: VERTICALNET INC - Form 10-Q

On February 15, 2002, we invested \$3.5 million in Converge, LLC, an indirect subsidiary of Converge, Inc. (Converge), and received a subordinated promissory note with a face value of \$8.75 million. In September 2002, the Company and its wholly-owned subsidiary, VNI Holdings, Inc. sold all of the Company's equity interests in, and notes receivable from, Converge to another investor in Converge for cash consideration of approximately \$1.9 million (See Note 6).

12

Table of Contents**VERTICALNET, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****(5)****INTANGIBLE ASSETS**

The following table reflects the components of amortizable intangible assets as of March 31, 2003 and December 31, 2002:

Amortizable intangible assets:	Gross Carrying Amount	Accumulated Amortization
Existing technology	\$ 1,925	\$ 642
Customer contracts	775	258
Balance as of December 31, 2002	\$ 2,700	\$ 900
Existing technology	\$ 1,925	\$ 802
Customer contracts	775	323
Balance as of March 31, 2003	\$ 2,700	\$ 1,125

Amortization expense on intangible assets was \$0.2 million and \$0.3 million for the three months ended March 31, 2003 and 2002, respectively.

The following sets forth the remaining estimated amortization expense on intangible assets for the fiscal years ending December 31:

	(in thousands)
2003	\$ 675
2004	900
Thereafter	

(6)**STRATEGIC RELATIONSHIP****Converge**

In December 2000, we entered into a subscription license agreement and professional services agreement with Converge, which among other things, provided for us to receive an aggregate of \$108.0 million during the three-year term of the agreements. On October 9, 2001, Verticalnet and Converge terminated the professional services agreement, amended and restated the subscription license agreement and entered into a maintenance and support agreement. The amended and restated subscription license agreement as well as the maintenance and support agreement had a term of 18 months ending in March 2003.

Edgar Filing: VERTICALNET INC - Form 10-Q

Verticalnet and Converge entered into a first amendment to the amended and restated subscription license agreement and a first amendment to the maintenance and support agreement, both as of February 1, 2002. As a result of these amendments, the term of each agreement was extended to December 31, 2003. The amendment to the maintenance and support agreement reduced our required level of service, accelerated the payment terms and reduced Converge's aggregate obligation by \$0.5 million. The expected contractual payments under the new agreements plus the remaining deferred revenue under the original agreements were anticipated to be recognized on a straight-line basis through December 2003. In order to secure the payments under the amended and restated subscription license agreement, the Company also received a subordinated security interest in certain of Converge's assets (the "Security Interest").

In February 2002, we invested \$3.5 million in Converge LLC, an indirect subsidiary of Converge, and received a subordinated promissory note with a face value of \$8.75 million. In connection with the investment, we also received a warrant to purchase 3,500,000 shares of preferred stock in Converge Financial Corporation, a wholly-owned subsidiary of Converge and an indirect parent of Converge LLC, at an initial exercise price of \$.01 per share. As noted above, we sold all of the Company's equity interests in, and notes receivable from, Converge for cash consideration of approximately \$1.9 million in September 2002.

In August 2002, Converge notified the Company that they would not be paying the remaining maintenance amounts through December 2002 according to the first amendment to the maintenance and support agreement. Converge proposed an amended payment schedule that extended the payment terms through October 2006 for the remaining \$1.8 million due. This amended payment schedule was not finalized.

In November 2002, the Company entered into a second amendment to the amended and restated subscription license agreement with Converge. This amendment eliminated the obligation of the Company to provide future Verticalnet products to Converge at no cost for the term of the original subscription license agreement. As there remained no further obligation by Verticalnet under the license

Table of Contents**VERTICALNET, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

agreement with Converge, the remaining deferred license revenue balance of \$19.6 million was recognized during the fourth quarter of 2002. Since all amounts due under the amended and restated subscription license agreement had been collected, the revenue recognized did not represent additional cash inflows to the Company. This amendment did not alter the maintenance and support agreement between the Company and Converge.

In March 2003, Converge informed the Company that Converge intended to sell substantially all the assets of Converge to PCG Trading, LLC (PCG Trading), and in connection with such sale transaction, PCG Trading and certain of its affiliates intended to enter into a credit and security agreement with Fleet Capital Corporation (Fleet Capital). As a condition to (a) the completion of the sale transaction to PCG Trading and (b) the closing of the Fleet Capital credit facility (collectively, the Sale Transactions), PCG Trading and Fleet Capital required that Verticalnet's Security Interest, as defined, and lien in all collateral be released. In connection with the Sale Transactions and the subsequent dissolution and winding up of Converge, Converge also requested the termination of the amended and restated subscription license agreement effective as of October 1, 2001, by and among the Company and certain of its affiliates and Converge and the maintenance and support agreement effective as of October 1, 2001, by and among the Company and certain of its affiliates and Converge, as amended.

In exchange for the right to use the software installed at Converge in accordance with the terms and conditions set forth in the amended and restated subscription license agreement for a term of six (6) months from the consummation of the Sale Transactions, at which time such right shall terminate, PCG Trading agreed to pay the Company \$0.33 million, payable \$33,000 per month for ten consecutive months beginning April 1, 2003, and the Company agreed to provide PCG Trading maintenance and support for the software installed at Converge pursuant to the amended and restated subscription license agreement for the six-month period following the consummation of the Sale Transactions.

In addition, the Security Interest, the amended and restated subscription license agreement and the amended maintenance and support agreement were deemed terminated immediately preceding the consummation of the Sale Transactions. Both the Company and Converge agreed there would be no further obligations of the Company, Converge or either of their respective affiliates under the amended and restated subscription license agreement and the amended maintenance and support agreement as of, and following, the consummation of the Sale Transactions. The Security Interest of the Company in the collateral or in any other assets of Converge, Converge, LLC or its affiliates was released and terminated as of the consummation of the Sale Transactions.

(7)

RESTRUCTURING CHARGES AND ASSET WRITE-DOWN

During 2003, we continued to make payments under previous restructuring charges incurred in connection with strategic and organizational initiatives designed to realign business operations, eliminate acquisition related redundancies and reduce costs. The aggregate remaining restructuring accrual at March 31, 2003 of approximately \$1.2 million, included in accrued expenses on the consolidated balance sheet, is expected to be adequate to cover actual amounts to be paid. Differences, if any, between the estimated amounts accrued and the actual amounts paid will be reflected in operating expenses in future periods.

The following table provides a summary by category and a roll forward of the changes in the restructuring accrual for the three months ended March 31, 2003:

	Accrual at December 31, 2002	Cash payments	Adjustments	Accrual at March 31, 2003
	<u> </u>	<u> </u>	<u> </u>	<u> </u>
Lease termination costs	\$ 3,484	\$(2,276)	\$ 1	\$ 1,209
Employee severance and related benefits	50	(40)	(10)	
Other exit costs			3	3
	<u> </u>	<u> </u>	<u> </u>	<u> </u>
	\$ 3,534	\$(2,322)	\$ (6)	\$ 1,212

In connection with a lease termination settlement, during the three months ended March 31, 2003, the Company received back its security deposits in the amount of \$0.8 million. The security deposits had previously been classified as restricted cash.

The amount accrued at March 31, 2003 for lease termination costs relates to two leases for office facilities that have not yet been terminated. The accrual represents the amount required to fulfill our obligation under signed lease contracts, the net expense expected to be incurred to sublet the facilities, or the estimated amount to be paid to terminate the lease contracts before the end of their terms.

COMMITMENTS AND CONTINGENCIES*Leases*

Future minimum lease payments as of March 31, 2003 for our buildings leases are as follows (in thousands):

Years ending December 31,

2003	\$ 747
2004	646
2005	124
Thereafter	31

These future minimum lease payments include all leases for which we are contractually committed to make payments. We are in the process of negotiating sublease arrangements and/or terminations of various facility leases, which represent approximately \$1.5 million of the above amounts.

SEC Comment Letter

In connection with our acquisition of Atlas Commerce, we filed a registration statement on Form S-3 with the SEC registering the resale of shares of our common stock issued to acquire Atlas Commerce. In connection with a routine review and comment letter process related to this filing, we have received comments from the SEC. The remaining open comments relate primarily to the presentation and recognition of certain previously reported revenue and expense items of our SMB business and whether one element of a material agreement should be accounted for as barter in accordance with Emerging Issues Task Force (EITF) Issue No. 99-17, Accounting for Advertising Barter Transactions. During the year ended December 31, 2002 we recognized no advertising revenues under the subject agreement. From inception of the agreement through completion, we recorded advertising revenues of \$22.2 million and advertising expenses of \$19.3 million. We believe the ultimate resolution of such comments would not change our accumulated deficit at March 31, 2003. The consolidated balance sheets as of March 31, 2003 and December 31, 2002 do not include any assets or liabilities associated with advertising activities under the subject agreement. We further believe that the cash flows from operations for the year ended December 31, 2002 would be unaffected by any potential change in presentation.

Pennsylvania Tax Grants

In July 2000, we entered into an Opportunity Grant Program Contract with the Commonwealth of Pennsylvania Department of Community and Economic Development (PaDCED) whereby we received a grant in the amount of \$1.0 million from the Commonwealth. The grant was conditioned upon, among other things, the creation of 1,000 full time jobs and that we would operate in the Horsham facility for at least five years. In July 2000, Atlas Commerce entered into an Opportunity Grant Program Contract with the PaDCED whereby Atlas Commerce received a grant in the amount of \$0.4 million from the Commonwealth, which amount was increased to \$0.6 million in June 2001. The grant was conditioned upon, among other things, the creation of 250 full time jobs and that Atlas Commerce would operate in the Malvern facility for at least five years. Both contracts contain a provision that requires repayment of the grant amount in the event the conditions are not met.

In November 2002, the PaDCED requested that we repay the entire grant amount of \$1.0 million for the July 2000 grant. The Company has responded to the PaDCED and believes that Verticalnet has substantially complied with the conditions. Although we intend to negotiate an amicable settlement of the matter, we will vigorously defend any action to recover the grant amount.

(9)

LITIGATION

On June 12, 2001, a class action lawsuit was filed against us and several of our officers and directors in U.S. Federal Court for the Southern District of New York in an action captioned CJA Acquisition, Inc. v. Verticalnet, et al., C.A. No. 01-CV-5241 (the CJA Action). Also named as defendants were four underwriters involved in the issuance and initial public offering of our common stock in February 1999 Lehman Brothers Inc., Hambrecht & Quist LLC, Volpe Brown Whelan & Company LLC and WIT Capital Corporation. The complaint in the CJA Action alleges violations of Sections 11 and 15 of the Securities Act of 1933 and Section 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated there under, based on, among other things, claims that the four underwriters awarded material portions of the initial shares to certain favored customers in exchange for excessive

15

Table of Contents**VERTICALNET, INC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

commissions. The plaintiff also asserts that the underwriters engaged in a practice known as laddering, whereby the clients or customers agreed that in exchange for IPO shares they would purchase additional shares at progressively higher prices after the IPO. With respect to Verticalnet, the complaint alleges that the Company and its officers and directors failed to disclose in the prospectus and the registration statement the existence of these purported excessive commissions and laddering agreements. After the CJA Action was filed, several copycat complaints were filed in U.S. Federal Court for the Southern District of New York. Those complaints, whose allegations mirror those found in the CJA Action, include Ezra Charitable Trust v. Verticalnet, et al., C.A. No. 01-CV-5350; Kofsky v. Verticalnet, et al., C.A. No. 01-CV-5628; Reeberg v. Verticalnet, C.A. No. 01-CV-5730; Lee v. Verticalnet, et al., C.A. No. 01-CV-7385; Hoang v. Verticalnet, et al., C.A. No. 01-CV-6864; Morris v. Verticalnet, et al., C.A. No. 01-CV-9459, and Murphy v. Verticalnet, et al., C.A. No. 01-CV-8084. None of the complaints state the amount of any damages being sought, but do ask the court to award rescissory damages. All of the foregoing suits were amended and consolidated into a single complaint that was filed with the U.S. Federal Court on April 19, 2002. This amended complaint contains additional factual allegations concerning the events discussed in the original complaints, and asserts that, in addition to Sections 11 and 15 of the Securities Act, the Company and our officers and directors also violated Sections 10(b), 20(a) and Rule 10b-5 of the Exchange Act in connection with the IPO. In addition to this amended and consolidated complaint, the plaintiffs in this lawsuit and in the hundreds of other similar suits filed against other companies in connection with IPOs that occurred in the late 1990s have filed master allegations that primarily focus on the conduct of the underwriters of the IPOs, including our IPO. On October 9, 2002, the U.S. Federal Court for the Southern District of New York entered an order dismissing, without prejudice, the claims against the individual Verticalnet officers and directors who had been named as defendants in the various complaints. In February 2003, the District Court entered an order denying a motion made by the defendants to dismiss the actions in their entirety, but granting the motion as to certain of the claims against some defendants. However, the District Court did not dismiss any claims against Verticalnet. We have retained counsel and intend to vigorously defend ourselves in connection with the allegations raised in the amended and consolidated complaint. In addition, we intend to enforce our indemnity rights with respect to the underwriters who are also named as defendants in the amended and consolidated complaint.

We are also party to various litigations and claims that arise in the ordinary course of business. In the opinion of management, the ultimate resolutions with respect to these actions will not have a material adverse effect on our financial position or results of operations.

Item 2.**Management's Discussion and Analysis of Financial Condition and Results of Operations****CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS**

The information in this report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Any statements contained in this report that are not statements of historical fact may be deemed forward-looking statements. Words such as may, might, will, would, should, could, project, estimate, pro forma, predict, potential, strategy, anticipate, plan to, believe, continue, intend, expect and words of similar expression (including the negative of any of the foregoing) are intended to identify forward-looking statements. Additionally, forward-looking statements in this report include statements relating to the design, development and implementation of our products; the strategies underlying our business objectives; the benefits to our customers and their trading partners of our products; our liquidity and capital resources; and the impact of our acquisitions and investments on our business, financial condition and operating results.

Our forward-looking statements are not meant to predict future events or circumstances and may not be realized because they are based upon current expectations that involve risks and uncertainties. Actual results and the timing of certain events may differ materially from those currently expected as a result of these risks and uncertainties. Factors that may cause or contribute to a difference between the expected or desired results and actual results include, but are not limited to, the availability of and terms of equity and debt financing to fund our business; our reliance on the development of our enterprise software business; our ability to continue to remain listed on the Nasdaq SmallCap Market; competition in our target markets; economic conditions in general and in our specific target markets; our ability to use and protect our intellectual property; and our ability to attract and retain qualified personnel, as well as the risks discussed in the section of this report entitled Factors Affecting our Business Condition. Given these uncertainties, investors are cautioned not to place undue reliance on our forward-looking statements. We disclaim any obligation to update these factors or to announce publicly the results of any revisions to any of the forward-looking statements contained in this report to reflect future events or developments.

Table of Contents

Company Overview

We are a provider of Strategic Sourcing and Supply Management solutions that enable companies to identify, negotiate, realize, and maintain supply chain savings. Supply Management is more than merely reducing prices – it requires the balancing of price, performance, and risk resulting in a lower total cost of ownership. Led by our Spend Analysis solution that quickly provides companies with insight into enterprise-wide spending, Verticalnet's full suite of Supply Management solutions enables companies to achieve lower prices, improved contract compliance, better supplier service, and shorter sourcing cycles. As a result, our clients recognize significant and sustainable savings in materials costs, inventory levels, and administrative costs – resulting in improved profitability.

With the completion of the June 2002 sale of our Small/Medium Business (SMB) unit that operated and managed 59 industry-specific online marketplaces, we have completed a business transformation from our origins as an operator of online public vertical communities to a business solely focused on delivering supply chain solutions to enterprise customers. The operating results of this unit through June 28, 2002 have been reflected as a discontinued operation in our consolidated financial statements.

Significant management actions were taken since the beginning of 2002 to complete the transformation from an operator of online public vertical communities to an enterprise software company. These actions included the following:

In June 2002, we completed the sale of certain assets of the SMB unit to Corry Publishing for \$2.35 million in cash consideration, plus up to an additional \$6.5 million as an earn-out over the four-year period after the closing date. Additionally, during the quarter ended June 30, 2002, other assets in the SMB unit were sold under a separate agreement. Together, the transactions substantially finalized the operations of the SMB unit as part of Verticalnet.

With our transformation to an enterprise software business model complete, management has taken the following significant actions since June 2002 to restructure our balance sheet and improve the financial viability of our business:

In June 2002, the Company completed the repurchase of all of its outstanding shares of Series A 6.00% convertible redeemable preferred stock due 2010, plus accrued dividends thereon, for a purchase price of \$5.0 million, and cancelled a common stock purchase warrant, dated April 7, 2000. The effect of the transaction was a net increase to shareholders' equity of \$101.0 million.

In July 2002, we completed the repurchase of \$13.85 million of our 5 1/4% convertible subordinated debentures due September 2004 for total consideration of \$2.9 million. This consideration included 1,270,854 shares of common stock valued at \$0.8 million and \$2.1 million in cash consideration. Additionally, we made a payment for accrued but unpaid interest of \$0.3 million, also in cash. In connection with the transaction, \$0.2 million of deferred debt offering costs attributable to the portion of debt repurchased were written off against additional paid-in capital. In addition, the Company also recorded a charge to operations of \$2.9 million representing an inducement for conversion of the convertible debentures, in accordance with Statement of Financial Accounting Standards (SFAS) No. 84, Induced Conversions of Convertible Debt. The net effect on shareholders' equity was an increase of \$11.5 million. In December 2002, we completed the repurchase of \$0.7 million of our 5 1/4% convertible subordinated debentures for total consideration of \$0.1 million. We recognized a gain of \$0.6 million in connection with the December repurchase.

In September 2002, we completed the repurchase of the remaining 10% interest in Verticalnet Europe, B.V. that we did not own (the BV Shares), for consideration of \$6.5 million in cash and 1,000,000 shares of common stock valued at \$1.2 million (200,000 shares were previously issued in 2002 as partial payments toward the obligation, along with an additional \$3.0 million payment). In connection with this settlement, the put and call agreement between Verticalnet and British Telecommunications Plc. (BT) was terminated. Separately, the Company and BT also agreed to terminate a Reseller Agreement between the parties, including a \$1.5 million prepaid license obligation. As a result of this settlement, the Company recorded a \$4.8 million gain representing the difference between the fair value of the consideration issued in the settlement transaction and the carrying value of the amounts due BT.

Edgar Filing: VERTICALNET INC - Form 10-Q

Also in September 2002, the Company and its wholly-owned subsidiary, VNI Holdings, Inc. (VNI) entered into an agreement with another investor in Converge, Inc. (Converge) to sell all of the Company's equity interests in, and notes receivable from, Converge for cash consideration of approximately \$1.9 million. At the first closing on September 30, 2002, VNI transferred the notes receivable and a portion of the Converge equity to the buyer and received the entire \$1.9 million cash consideration.

Table of Contents

Under the terms of the agreement, the Company was to transfer to the buyer all of the outstanding capital stock of VNI at a second closing. If the Company was not able to transfer the stock of VNI, the Company could have been required to refund \$0.1 million to the buyer. The Company was relieved of this obligation as part of the sale of Converge's assets as more fully set forth in Strategic Relationship (see Note 6 of the consolidated financial statements).

We completed a goodwill impairment test as of September 30, 2002, under SFAS No. 142, Goodwill and Other Intangible Assets. This test requires a comparison of the fair value of a reporting unit with its carrying amount, including goodwill. We did not consider the market capitalization of the Company, which consists of only one reporting unit, to be representative of its fair value due to the volatility of the market price. Therefore, we estimated the fair value of the business based upon the amounts we could reasonably expect to realize in the sale of the assets of the business. As a result of this test, the Company recorded an impairment charge to goodwill of \$27.6 million. Of this amount, approximately \$21.6 million related to the December 2001 acquisition of Atlas Commerce, Inc. (Atlas Commerce) and approximately \$6.0 million related to the Company's acquisition of Isadra, Inc. (Isadra) in August 1999.

In November 2002, the Company entered into a second amendment to the amended and restated subscription license agreement with Converge. This amendment eliminated the obligation of the Company to provide future Verticalnet products to Converge at no cost for the term of the original subscription license agreement. As there remained no further obligation by Verticalnet under the license agreement with Converge, the remaining deferred license revenue balance of \$19.6 million was recognized during the fourth quarter of 2002. Since all amounts due under the amended and restated subscription license agreement had been collected, the revenue recognized did not represent additional cash inflows to the Company. This amendment did not alter the maintenance and support agreement between the Company and Converge.

In January 2003, the Company amended the lease agreement with its primary landlord resulting in an annual savings of \$2.7 million of operating expenses and reducing the Company's off balance sheet obligations by \$16.4 million, which consisted of both future minimum lease payment and related operations expenses. The amended agreement terminated the Company's financial obligation for the lease of the 700 Dresher Road and 300 Chester Field Parkway locations. Additionally, the agreement provides for occupancy of the 400 Chester Field Parkway premises until May 31, 2003 with options to continue the lease on a quarterly basis. We have exercised the option to continue the lease for an additional 90 days, commencing June 1, 2003.

Results of Continuing Operations for the Three Months Ended March 31, 2003 and 2002

Revenues

Total revenues for the quarter ended March 31, 2003 were \$3.4 million as compared to \$8.0 million for the quarter ended March 31, 2002.

Revenues in the ongoing business are comprised of software license revenues and service and maintenance revenues. For the three months ended March 31, 2003, software license revenues were \$0.2 million versus \$6.3 million in the same period last year. The decline relates primarily to a more difficult macro economic market for software. The Company has not executed a software license agreement since March 2002. Services and maintenance revenues were \$3.2 million in the first quarter of 2003 as compared to \$1.7 million in the same period last year. The increase in service and maintenance revenues is due to selling additional services to our customers. Revenues derived from the Converge arrangement, as a percentage of total revenues for the quarters ended March 31, 2003 and 2002 were 5% and 66%, respectively.

Cost of Revenues

Cost of revenues is comprised of the cost of software license and the cost of services and maintenance. The cost of software license itself is comprised of royalties and the cost of acquired technology, which is the non-cash amortization of currently used technologies acquired through acquisitions. The cost of software license was \$0.2 million for the quarter ended March 31, 2003 as compared to \$0.4 million for the same period last year. The decrease of approximately \$0.2 million from the first quarter of 2002 to the first quarter of 2003 is due primarily to the decrease in the amortization of the technology acquired in the Isadra and Tradeum, Inc. (Tradeum) acquisitions, which, as of December 31, 2002 had been fully amortized. The cost of acquired technology for the first quarter of 2003 relates primarily to the Atlas Commerce acquisition, which occurred in December 2001.

Edgar Filing: VERTICALNET INC - Form 10-Q

The cost of services and maintenance includes the cost of the Company's consultants who are primarily responsible for the software implementations and configurations. Also included is the cost of the Company's customer support function, which is provided to customers as part of the recurring maintenance fees. These costs decreased from approximately \$1.5 million to \$0.7 million in the quarters ended March 31, 2002 and 2003, respectively. The decrease relates substantially to reduced facilities and infrastructure.

Table of Contents

costs and a significant reduction in headcount in the first nine months of 2002 as a result of the restructuring actions that occurred during 2002. The combination of these costs accounted for approximately \$0.7 million of the decrease. In addition, the costs attributable to the amortization of software maintenance contracts decreased approximately \$0.1 million, largely due to the restructuring actions taken throughout 2002.

Research and Development

Research and development costs consist primarily of salaries and fringe benefits costs of our product strategy, development, and testing employees. The research and development costs decreased approximately \$2.4 million to approximately \$1.1 million for the quarter ended March 31, 2003 from approximately \$3.5 million in the first quarter of 2002. The decrease was primarily due to headcount reductions associated with the restructuring actions that occurred during 2002. Salary and fringe benefits related costs accounted for approximately \$1.5 million of the decrease. Facilities and infrastructure costs attributable to the research and development group contributed approximately \$0.6 million to the overall decrease. In addition, third-party consulting costs decreased approximately \$0.3 million.

Sales and Marketing

Sales and marketing expenses consist primarily of salaries and fringe benefits costs, as well as commissions, for sales and marketing employees. Also, the travel costs associated with business development are included in sales and marketing expenses. The sales and marketing expenses for the quarters ended March 31, 2003 and 2002 were approximately \$0.7 million and \$1.7 million, respectively. The significant decrease in sales and marketing expenses is primarily related to headcount reductions during the first nine months of 2002, as salary and fringe benefits reductions amounted to approximately \$0.6 million. Facilities and infrastructure costs attributable to the group contributed approximately \$0.3 million in reductions, while direct marketing expenses, such as advertising, public relations and trade shows, declined approximately \$0.1 million.

General and Administrative

General and administrative expenses consist primarily of salaries and related costs for our executive, administrative, finance, legal and human resources personnel. General and administrative expenses decreased approximately \$2.0 million to approximately \$1.6 million for the quarter ended March 31, 2003 from \$3.6 million for the quarter ended March 31, 2002. These expenses declined primarily as a result of the restructuring actions undertaken in 2002. Headcount related cost reductions during the first nine months of 2002 accounted for approximately \$1.7 million of the decline. General and administrative expenses, such as rent, contributed approximately \$0.3 million in cost reductions.

Restructuring and Asset Impairment Charges

Restructuring and impairment charges for the first quarter of 2003 reflect the net adjustment to the restructuring accrual. For the three months ended March 31, 2002 the Company recognized approximately \$1.4 million in restructuring and impairment charges. The charges taken during the first quarter of 2002 relate to severance benefits and facility leases and include adjustments to amounts previously recorded. The severance benefits related to positions that were redundant as a result of the December 28, 2001 acquisition and subsequent integration of Atlas Commerce and amount to approximately \$0.7 million. The facility leases were adjusted approximately \$0.7 million to reflect the difficult sublet market that existed for office space in certain markets where the Company currently leases office space. The Company is actively engaged in marketing the excess office space. The Company did not incur any significant restructuring and impairment charges during the quarter ended March 31, 2003.

Amortization Expense

For the quarter ended March 31, 2002 amortization expense totaled approximately \$1.1 million, which primarily reflected the non-cash amortization of deferred costs related to warrants and Series A preferred stock issued to Microsoft.

Table of Contents**Interest and Other Expense, net**

Interest and other expense, net was comprised of the following (in thousands):

	Three Months Ending	
	March 31,	
	2003	2002
Gain (loss) on asset disposal	\$ (9)	\$ 108
Transaction loss		(13)
Realized gain (loss) on investments	113	(10)
Interest expense	(488)	(737)
Interest and other expense, net	<u>\$ (384)</u>	<u>\$ (652)</u>

Liquidity and Capital Resources

As of March 31, 2003, our primary source of liquidity consists of cash and cash equivalents. The majority of such funds are readily available for operating purposes. At March 31, 2003, we had cash and cash equivalents totaling approximately \$6.1 million, compared to cash, cash equivalents and short-term investments of \$9.0 million at December 31, 2002. At March 31, 2003, working capital increased approximately \$0.5 million to approximately \$4.4 million from \$3.9 million at December 31, 2002.

Net cash used in operating activities was approximately \$4.0 million for the three months ended March 31, 2003 compared to \$13.7 million for the three months ended March 31, 2002. Net cash used in operating activities for the three months ended March 31, 2003 consisted primarily of losses from continuing operations, decreases in accounts payable and accrued expenses, increases in accounts receivable and prepaid expenses and other assets, offset by an increase in deferred revenue.

During the three months ended March 31, 2003, \$2.1 million of net cash was provided by investing activities, compared to net cash used in investing activities of \$1.8 million during the three months ended March 31, 2002. Cash provided by investing activities for the three months ended March 31, 2003 includes \$1.0 million from the sale of our investment in corporate bonds, \$0.3 million from the sale of property and equipment, and \$0.8 million from the release of previously restricted funds.

Net cash provided by financing activities was immaterial for the three months ended March 31, 2003, compared to net cash used in financing activities of \$0.7 million in 2002. The 2002 amount primarily relates to the repayment of long term debt offset by proceeds from employee stock plans.

As of March 31, 2003, we have \$1.2 million of accrued restructuring costs primarily related to facility leases. We have made significant efforts to estimate the expected costs to early terminate the leases or sublease facilities. If these facilities cannot be sublet or the leases early terminated, our contractual lease payments of approximately \$1.5 million related to these leases will be due over the respective lease terms.

We believe that our current level of liquid assets and the expected cash flows from contractual arrangements will be sufficient to finance our capital requirements and anticipated operating losses for at least the next twelve months. However, to the extent that the current level of liquid assets or future revenues prove to be insufficient, we may need to further reduce our operating costs or obtain additional debt or equity financing. Additionally, we may, if the capital markets present attractive opportunities, raise cash through the sale of debt or equity. We can provide no assurance that we will be successful in obtaining any required or desired financing either on acceptable terms or at all.

We may attempt to settle outstanding non-cancelable lease obligations and/or the Company's convertible notes. If successful, our financial resources will be reduced.

Recent Accounting Pronouncements

In April 2002, the Financial Accounting Standards Board (FASB) issued SFAS No. 145, Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement No. 13 and Technical Corrections. SFAS No. 4, Reporting Gains and Losses from Extinguishment of Debt, required that gains and losses from extinguishments of debt be included in the determination of net income and be aggregated and, if material, classified as an extraordinary item, net of related income tax effect. Although SFAS No. 145 became effective January 1, 2003, the Company elected to early adopt the provisions of SFAS No. 145 in 2002. During the third quarter of 2002, in connection with the settlement of obligations involving BT, the Company recognized a \$4.8 million gain

20

Table of Contents

representing the difference between the fair value of the consideration issued in the settlement transaction and the carrying value of the amounts due BT. As a result of the early adoption of SFAS No. 145, the Company evaluated the classification of this gain in accordance with the provisions of APB Opinion No. 30, Reporting the Results of Operations – Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions, and determined that the gain did not meet the criteria for classification as an extraordinary item.

In June 2002, the FASB issued SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities. This Statement addresses the financial accounting and reporting of expenses related to restructurings initiated after 2002, and applies to costs associated with an exit activity (including a restructuring) or with a disposal of long-lived assets. Those activities can include eliminating or reducing product lines, terminating employees and contracts, and relocating plant facilities or personnel. Under SFAS No. 146, a company will record a liability for a cost associated with an exit or disposal activity when the liability is incurred and can be measured at fair value. The provisions of SFAS No. 146 are effective prospectively for exit or disposal activities initiated after December 31, 2002.

In December 2002, the FASB issued SFAS No. 148, Accounting for Stock-Based Compensation – Transition and Disclosure, which amends SFAS No. 123, Accounting for Stock-Based Compensation, to provide alternative methods of transition for a voluntary change to the fair value method of accounting for stock-based employee compensation. In addition, SFAS No. 148 amends the disclosure requirements of SFAS No. 123 to require prominent disclosures in both annual and interim financial statements. Certain of the disclosure modifications are required for interim periods ending after December 15, 2002, which the Company has applied in these consolidated financial statements.

FACTORS AFFECTING OUR BUSINESS CONDITION

We may require additional capital for our operations and obligations, and, as a result, we are exploring alternatives to preserve and enhance value.

Although, based on our most recent projections, we believe our current level of liquid assets and the expected cash flows from contractual arrangements will be sufficient to finance our capital requirements and anticipated operating losses for the next twelve months, any projection of future long-term cash needs and cash flows are inherently subject to uncertainty. There is no assurance that our resources will be sufficient for anticipated or unanticipated working capital and capital expenditure requirements during this period. We may need, or find it advantageous, to raise additional funds in the future to fund our growth, pursue sales and licensing opportunities, develop new or enhanced products and services, respond to competitive pressures or acquire complementary businesses, technologies or services.

In November 2002, we announced that we had retained US Bancorp Piper Jaffray, an investment banker, to pursue a potential sale of the Company. While we now believe a sale of the Company is unlikely given our announced intention to actively pursue continued operations and growth of the Company, we may not be able to achieve that growth and may in the future again pursue a sale of the Company. In the event that we complete a sale, certain severance and third-party obligations could be triggered, which could be substantial.

If we are ultimately unable, for any reason, to receive cash payments expected from our customers, our business, financial condition and results of operations will be materially and adversely affected.

We may not generate an operating profit.

As of March 31, 2003, our accumulated deficit was approximately \$1.2 billion. Although we generated a profit in the fourth quarter of 2002, we expect to incur operating losses for the foreseeable future. We may never generate an operating profit or, even if we do become profitable from operations at some point, we may be unable to sustain that profitability.

Table of Contents

We may not develop significant revenues from enterprise software licensing and professional services, which could adversely affect our future revenue growth and ability to achieve profitability.

If we do not develop and consistently generate significant revenues from enterprise software licensing and professional services, our business, financial condition and operating results will be impaired. Our ability to generate software revenues depends on the overall demand for enterprise software solutions and professional services, as well as general economic and business conditions. Suppressed demand for software solutions and services caused by a weakening economy and reduced levels of spending on technology solutions may result in less revenue growth than expected or even a decline in revenues. We cannot offer any assurances that we will be able to develop, enhance or promote our enterprise software solutions and professional services effectively, whether as a result of general economic conditions or otherwise.

We anticipate lengthy sales cycles for our software products, and difficulty in obtaining customer commitments.

The Company has not executed a software license agreement since March 2002. Looking forward, we anticipate the sales cycles for our enterprise software products to average approximately three to nine months. We have experienced an increase in the length of sales cycles during 2002 and 2003. We have also experienced difficulty in obtaining customer commitments to enter into contracts even after we have been selected as the preferred vendor given financial flux at prospective customers. If the economy and the market for technology solutions remain depressed or continue to worsen, then our average sales cycle could become increasingly longer and our ability to enter into customer agreements could become increasingly more difficult. In selling our products, we may be asking potential customers in many cases to change their established business practices and conduct business in new ways. In addition, potential customers must generally consider additional issues, such as product benefits, ease of installation, ability to work with existing technology, functionality and reliability, and adoption by their suppliers, before committing to purchase our products. Additionally, we believe that the purchase of our products is often discretionary and generally involves a significant commitment of capital and other resources by a customer, which frequently requires approval at a number of management levels within the customer organization. Likewise, the implementation and deployment of our enterprise software products requires a significant commitment of resources by our customers and our professional services organization. The challenges we face in attempting to obtain commitments and approvals from our customers may be exacerbated by worsening economic conditions in general and in our target markets, as well as by competition from other software solution providers whose brands, products and services may be better known to, and more widely accepted by, potential customers than ours.

We may be unable to maintain our listing on the Nasdaq Stock Market, which could cause our stock price to fall and decrease the liquidity of our common stock.

Our common stock is currently listed on the Nasdaq Stock Market, which has requirements for the continued listing of stock. In May 2002, we transferred our listing from the Nasdaq National Market to the Nasdaq SmallCap Market due to our inability to comply with the Nasdaq National Market bid price and shareholders' equity requirements. Continued listing on the Nasdaq SmallCap Market requires us to maintain \$2.5 million in shareholders' equity and our common stock to maintain a minimum bid price of \$1.00 per share. Although we completed a one-for-ten reverse split of our common stock on July 15, 2002, the bid price for our common stock has closed below \$1.00 for several weeks at a time. We will not meet the continued listing standard if the closing price of our common stock is less than \$1.00 for 30 consecutive trading days. On March 6, 2003, the Nasdaq notified us that we were not in compliance with the minimum bid price rule. As of May 15, 2003, our common stock had closed above \$1.00 for 10 consecutive trading days and we now satisfy that standard for continued listing of our common stock. As of March 31, 2003, shareholders' equity is approximately \$0.6 million, which is below the Nasdaq SmallCap Market continued listing requirement. Because we have not maintained \$2.5 million in shareholders' equity, Nasdaq could institute delisting procedures at any time. On April 8, 2003, we received a letter from Nasdaq stating that Nasdaq was reviewing our eligibility for continued listing on Nasdaq SmallCap Market due to (i) the Company's failure to maintain the minimum net worth, and (ii) Nasdaq's belief that the members of the Company's Audit Committee were not independent within the meaning of Nasdaq rules. The letter stated that delisting procedures would begin if Nasdaq believed the Company's plan to achieve and maintain compliance with listing standards was inadequate. On April 22, 2003, the Company responded to Nasdaq and asserted that (i) the Company has a plan to improve the Company's net worth sufficient to meet Nasdaq listing requirements, and (ii) that the Company believes that under existing law and proposed SEC and Nasdaq rules, the members of the Company's Audit Committee are independent, and that no further modification of the Audit Committee would be required until the annual meeting in 2004. The Company has not received a response from Nasdaq as of the date of this filing.

Table of Contents

If our stock is delisted from the Nasdaq stock market and our share price declines significantly, then our stock may be deemed to be penny stock.

If our common stock is considered penny stock, it would be subject to rules that impose additional sales practices on broker-dealers who sell our securities. Because of these additional obligations, some brokers may be unwilling to effect transactions in our stock. This could have an adverse effect on the liquidity of our common stock and the ability of investors to sell the common stock. For example, broker-dealers must make a special suitability determination for the purchaser and have received the purchaser's written consent to the transaction prior to sale. Also, a disclosure schedule must be prepared prior to any transaction involving a penny stock and disclosure is required about sales commissions payable to both the broker-dealer and the registered representative and current quotations for the securities. Monthly statements are required to be sent disclosing recent price information for the penny stock held in the account and information on the limited market in penny stock.

If our stock is delisted from the Nasdaq stock market and our share price declines significantly, then we may be unable to license our products and sell our services to prospective or existing customers.

If our stock is delisted and our share price declines significantly, our prospective and existing customers may lose confidence that we can continue as a viable business to provide the support necessary to further develop the solution and provide ongoing maintenance and consulting services. Prospective and existing customers could consider alternative solutions or significantly reduce the value they are willing to pay for our solution to compensate for the potential added risk to their business. Our ability to meet our revenue goals could be adversely impacted, resulting in further deterioration of the financial condition of the business.

Our ability to complete the business repositioning and financial restructuring of the Company depends on our key management and experienced software personnel, whom we may not be able to retain.

We believe that our ability to complete a successful business repositioning and financial restructuring of the Company depends on continued employment of our senior management team and on maintaining a highly trained product development staff. If one or more members of our senior management team were unable or unwilling to continue in their present positions, our prospects for reorganizing the Company could be materially adversely affected. If we are unable to retain trained technical personnel, it could limit our ability to design and develop products, which could reduce our attractiveness to potential investors or acquirers.

We may not be able to hire enough additional personnel to meet our hiring needs.

Our success also depends on having a highly trained professional services and development personnel. We may need to hire additional personnel if our business grows. A shortage in the number of trained consultants and developers could limit our ability to implement our software if we are able to license software to new customers or if our present customers ask us to perform more services for them. Competition for personnel, particularly for employees with technical expertise, could be strong. Our business, financial condition and operating results will be materially adversely affected if we cannot hire and retain suitable personnel.

We may have to amend previously filed reports with respect to revenue and expense items of our discontinued SMB business if we cannot otherwise resolve comments we have received from the SEC.

In connection with our acquisition of Atlas Commerce, we filed a registration statement on Form S-3 with the SEC registering the resale of shares of our common stock issued in the acquisition. In connection with a routine review and comment letter process related to this filing, we have received comments from the SEC. The remaining open comments relate primarily to the presentation and recognition of certain previously reported revenue and expense items of our SMB business and whether one element of a material agreement should be accounted for as barter in accordance with EITF Issue No. 99-17, Accounting for Advertising Barter Transactions. We believe the ultimate resolution of such comments would not change our accumulated deficit at March 31, 2003, although there could be differences in reported quarterly operating results (refer to Note 8 to the consolidated financial statements for additional information). The remaining open SEC comments do not relate in any way to our ongoing collaborative supply chain software operations. The SMB business was sold on June 28, 2002, and that business unit is reflected in our financial statements as a discontinued operation for all periods presented, which requires that all elements of revenue and expense be netted as a single line item to report net results of discontinued operations. As a result, revenues and expenses of our SMB business are no longer separately presented in our financial statements. We filed a response to the matters raised by the SEC and are awaiting their response. We are currently in the process of resolving these matters with the SEC and believe the historical presentations and

Table of Contents

recognition of revenue and expense for the SMB business are appropriate. If the SEC will not declare the Form S-3 effective without us first revising the historical presentation and recognition of previously reported revenue and expense items of our SMB business, then we will have to amend the reports that are incorporated into the Form S-3.

Fluctuations in our quarterly operating results may cause our stock price to decline.

Our quarterly operating results are difficult to forecast and could vary significantly. If our operating results in a future quarter or quarters do not meet the expectations of securities analysts or investors, the price of our common stock may fall. Our quarterly operating results will be substantially dependent on software licenses booked and delivered in that quarter. Any delay in the recognition of revenue for any of our license transactions could cause significant variations in our quarterly operating results and could cause our revenues to fall significantly short of anticipated levels. We also expect that our quarterly operating results will fluctuate significantly due to other factors, many of which are beyond our control, including:

anticipated lengthy sales cycles for our products;

the size and timing of individual license transactions;

intense and increased competition in our target markets;

our ability to develop, introduce and bring to market new products and services, or enhancements to our existing products and services, on a timely basis; and

risks associated with past acquisitions.

If we are able to grow our business, we may not be able to manage the growth successfully.

If we are able to grow our business, such growth could place a significant strain on our resources and systems. To manage our growth, we must implement systems and train and manage our employees. In addition, we may not be able to limit our exposure to non-creditworthy customers.

We may seek to raise or acquire additional capital, which could dilute our existing shareholders.

We may seek to grow our business by acquiring another business which has additional capital. In addition, we may seek to raise additional capital. We may be required to incur debt or issue equity securities to pay for acquisitions or to acquire additional capital, which may be dilutive to our existing shareholders.

We expect to rely on third parties to implement our products.

We expect to rely on third parties to implement our software products at customer sites. If we are unable to establish and maintain effective, long-term relationships with implementation providers, or if these providers do not meet the needs or expectations of our customers, our business could be seriously harmed. As a result of the limited resources and capacities of many third-party implementation providers, we may be unable to establish or maintain relationships with third parties having sufficient resources to provide the necessary implementation services to support our needs. If these resources are unavailable, we will be required to provide these services internally, which could significantly limit our ability to meet our customers' implementation needs. A number of our competitors have significantly more well established relationships with third parties that we may potentially partner with. As a result, these third parties may be more likely to recommend competitors products and

Edgar Filing: VERTICALNET INC - Form 10-Q

services rather than our own. In addition, we would not be able to control the level and quality of service provided by our implementation partners.

New versions and releases of our products may contain errors or defects.

Our enterprise software products may contain undetected errors or failures when first introduced or as new versions are released. This may result in loss of, or delay in, market acceptance of our products. Errors in new releases and new products after their introduction could result in delays in release, lost revenues and customer frustration during the period required to correct these errors. We may in the future discover errors and defects in new releases or new products after they are shipped or released.

Table of Contents

Our target markets are evolving and characterized by rapid technological change, which we may not be able to keep pace with.

The markets for our products and services are evolving and characterized by rapid technological change, changing customer needs, evolving industry standards and frequent new product and service announcements. The introduction of products employing new technologies and emerging industry standards could render our existing products or services obsolete or unmarketable. If we are unable to respond to these developments successfully or do not respond in a cost-effective way, our business, financial condition and operating results will suffer. To be successful, we must continually improve and enhance the responsiveness, services and features of our enterprise software products and introduce and deliver new product and service offerings and new releases of existing products. We may fail to improve or enhance our software products or introduce and deliver new releases or new offerings on a timely and cost-effective basis or at all. If we experience delays in the future with respect to our software products, or if our improvements, enhancements, offerings or releases to these products do not achieve market acceptance, we could experience a delay or loss of revenues and customer dissatisfaction. Our success will also depend in part on our ability to acquire or license third-party technologies that are useful in our business, which we may not be able to do.

We may ultimately be unable to compete in the markets for the products and services we offer.

The markets for our software products and services are intensely competitive, which may result in low or negative profit margins and difficulty in achieving market share, either of which could seriously harm our business. We expect the intensity of competition to increase. Our enterprise software products and services face competition from software companies whose products or services compete with a particular aspect of the solution we provide, as well as several major enterprise software developers. Many of our competitors have longer operating histories, greater brand recognition and greater financial, technical, marketing and other resources than we do, and may have well-established relationships with our existing and prospective customers. This may place us at a disadvantage in responding to our competitors' pricing strategies, technological advances, advertising campaigns, strategic partnerships and other initiatives. Our competitors may also develop products or services that are superior to or have greater market acceptance than ours. If we are unable to compete successfully against our competitors, our business, financial condition and operating results would be negatively impacted.

We have had decreases in the fair value, and in some cases a complete loss, of our equity investments.

We hold investments in equity instruments of privately held companies that we made for business and strategic purposes prior to 2002. Such items are included in other investments on our balance sheet. For the year ended December 31, 2002, we recorded an aggregate of \$12.0 million in impairment charges for other than temporary declines in the fair value of our cost method, equity method and available-for-sale investments, \$9.6 million of which was a write-down of the fair value of our equity investment in, and note receivable from, Converge, for which we entered into a sale agreement as of September 30, 2002. As of March 31, 2003, we held cost method investments with a carrying value of \$0.6 million. We may never realize any return on our equity interests that we continue to hold, and we may suffer a complete loss of these interests, which could materially and adversely affect our business, financial condition and operating results.

If we do not develop the Verticalnet brand in the enterprise software industry, our revenues might not increase.

We must establish and continuously strengthen the awareness of the Verticalnet brand in the enterprise software industry. If our brand awareness as a maker of enterprise software does not develop, or if developed, is not sustained as a respected brand, it could decrease the attractiveness of our products and services to potential customers, which could result in decreased revenues.

Our interests may conflict with those of Internet Capital Group, our largest shareholder, which may affect our business strategy and operations negatively.

As a result of its stock ownership and board representation, Internet Capital Group, Inc. (Internet Capital Group) is in a position to affect our business strategy and operations, including corporate actions such as mergers or takeover attempts, in a manner that could conflict with the interests of our public shareholders. At March 31, 2003, Internet Capital Group beneficially owned 3,579,172 shares, or approximately 26%, of our common stock, which includes 62,703 shares of our common stock underlying warrants issued to Internet Capital Group prior to our initial public offering. One representative of Internet Capital Group is a member of our board of directors and a second member of the board of directors is an employee of Internet Capital Group. We may compete with Internet Capital Group and its partner companies for enterprise software opportunities, in part through acquisitions and investments. Internet

Table of Contents

Capital Group, therefore, may seek to acquire or invest in companies that we would find attractive. While we may partner with Internet Capital Group on future acquisitions or investments, neither they nor we have any current contractual obligations to do so. We do not have any contracts or other understandings that would govern resolution of this potential conflict. This competition, and the potential conflict posed by the designated director, may deter companies from partnering with us and may limit our business opportunities.

Internet Capital Group may have to buy or sell our stock to avoid registration under the Investment Company Act of 1940, which may negatively affect our stock price.

To avoid registration under the Investment Company Act of 1940, Internet Capital Group may need to continue to own more than 25% of our voting securities and to continue to have a representative on our board of directors. Under the Investment Company Act, a company is considered to control another company if it owns more than 25% of that company's voting securities and is the largest stockholder of such company. A company may be required to register as an investment company if more than 45% of its total assets consist of, and more than 45% of its income/loss and revenue attributable to it over the last four quarters is derived from, ownership interests in companies it does not control. Internet Capital Group has publicly stated that it is not feasible to be regulated as an investment company because the Investment Company Act rules are inconsistent with their corporate strategy. As of March 31, 2003, Internet Capital Group's ownership interest in us was 18%. Internet Capital Group's total beneficial ownership in us is 3,579,172 or 26% of our common stock, because it has an agreement with Safeguard Scientifics, Inc. ("Safeguard Scientific") that provides it with the right of first refusal to purchase the 1,052,308 shares of our stock that Safeguard Scientific owns. If its ownership interest falls below 25%, Internet Capital Group may need to purchase additional voting securities to return to an ownership interest of at least 25% to avoid having to register as an investment company. The possible need of Internet Capital Group to maintain a 25% ownership position could adversely influence its decisions regarding actions that may otherwise be in the best interests of our public shareholders. If Internet Capital Group sells all or part of its investment in us, whether to comply with the Investment Company Act of 1940, to raise additional capital or otherwise, it could adversely affect our common stock's market price.

We may not be able to protect our proprietary rights and may infringe the proprietary rights of others.

Proprietary rights are important to our success and our competitive position. We may be unable to register, maintain and protect our proprietary rights adequately or to prevent others from claiming violations of their proprietary rights. Although we file copyright registrations for the source code underlying our software, enforcement of our rights might be too difficult and costly for us to pursue effectively. We have filed patent applications for the proprietary technology underlying our software, but our ability to fully protect this technology is contingent upon the ultimate issuance of the corresponding patents. Effective patent, copyright and trade secret protection of our software may be unavailable or limited in certain countries.

Several lawsuits have been brought against us and the outcome of these lawsuits is uncertain.

Several lawsuits have been brought against us and the underwriters of our stock in our initial public offering. These lawsuits allege, among other things, that the underwriters engaged in sales practices that had the effect of inflating our stock price, and that our prospectus for that offering was materially misleading because it did not disclose these sales practices. We intend to vigorously defend against these lawsuits. No assurance can be given as to the outcome of these lawsuits.

Shares eligible for future sale by our current or future shareholders may cause our stock price to decline.

If our shareholders or option holders sell substantial amounts of our common stock in the public market, including shares issued in completed or future acquisitions or upon the exercise of outstanding options and warrants, then the market price of our common stock could fall. As of March 31, 2003, the holders of 3,528,500 shares of common stock and warrants to purchase 62,703 shares of common stock have demand and/or piggyback registration rights. The exercise of such rights could adversely affect the market price of our common stock. We also have filed a shelf registration statement to facilitate our acquisition strategy, as well as registration statements to register shares of common stock under our stock option and employee stock purchase plans. Shares issued pursuant to existing or future shelf registration statements, upon exercise of stock options and in connection with our employee stock purchase plan will be eligible for resale in the public market without restriction.

Table of Contents

Anti-takeover provisions and our right to issue preferred stock could make a third-party acquisition of us difficult.

Verticalnet is a Pennsylvania corporation. Anti-takeover provisions of Pennsylvania law could make it more difficult for a third party to acquire control of us, even if such change in control would be beneficial to our shareholders. Our articles of incorporation provide that our board of directors may issue preferred stock without shareholder approval. In addition, our bylaws provide for a classified board, with each board member serving a staggered three-year term. The issuance of preferred stock and the existence of a classified board could make it more difficult for a third party to acquire us.

Our common stock price is likely to remain highly volatile.

The market for stocks of technology companies has been highly volatile since our initial public offering in 1999. Throughout this period, the market price of our common stock has reached extreme highs and lows, and our daily trading volume has been, and will likely continue to be, highly volatile. Investors may not be able to resell their shares of our common stock following periods of price or trading volume volatility because of the market's adverse reaction to such volatility. Factors that could cause volatility in our stock price and trading volume, in some cases regardless of our operating performance, include, among other things:

general economic conditions, including suppressed demand for technology products and services;

actual or anticipated variations in quarterly operating results;

announcements of technological innovations;

new products or services;

changes in the market valuations of other software or technology companies;

failure to meet analysts' or investors' expectations;

announcements by us or our competitors of significant acquisitions, strategic partnerships or joint ventures;

our cash position and cash commitments;

our prospects for software sales and new customers; and

additions or departures of key personnel.

ITEM 3.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our exposure to market risk related changes in interest rates relates primarily to our investment portfolio. We have invested in instruments that meet high quality credit standards, as specified in our investment policy. The policy also limits the amount of credit exposure we may have to any one issue, issuer or type of investment. As of March 31, 2003, our portfolio of investments included \$6.1 million in cash and cash equivalents. Due to the conservative nature of our investment portfolio, we believe that a sudden change in interest rates would not have a material effect on the value of the portfolio since in most cases the average yield on our investments is less than 1% at March 31, 2003. The impact on our future interest income and future changes in investment yields will depend largely on the gross amount of our investment portfolio.

We have invested in equity instruments of privately held companies for business and strategic purposes. These investments are included in other investments and are accounted for under the cost method when ownership is less than 20% and we do not have the ability to exercise significant influence over operations. As of March 31, 2003 we hold cost method equity investments with a carrying value of approximately \$0.6 million. For these investments in privately held companies, our policy is to regularly review the assumptions underlying the operating performance and cash flow forecasts in assessing the recoverability of the carrying values. We identify and record impairment losses when events and circumstances indicate that such assets might be impaired.

In connection with Ariba Inc. s (Ariba) acquisition of Tradex Technologies, Inc., we received Ariba common stock. In July 2000, we entered into forward sale contracts relating to our investment in Ariba. Under these contracts, we pledged our shares of Ariba s common stock to the counter-party for a three-year period in return for approximately \$47.4 million of cash. At the conclusion of the three-year period, we have the option of delivering either cash or the pledged Ariba shares to satisfy the forward sale. However, we will not be required to deliver shares in excess of those we pledged. If we choose to deliver Ariba shares to satisfy the forward sale, the number of Ariba shares to be delivered at maturity may vary depending on the then market price of Ariba s common stock. We have only limited involvement with derivative financial instruments and do not use them for trading purposes. Our risk of loss in the event of nonperformance by the counter-party under the forward sales contract is not considered to be significant. Although the forward sales contract exposes us to market risk, fluctuations in the fair value of these contracts are mitigated by expected offsetting fluctuations in the fair value of the pledged securities.

Table of Contents**ITEM 4.****CONTROLS AND PROCEDURES**

(a) Evaluation of disclosure controls and procedures. The Company evaluated the effectiveness of the design and operation of its disclosure controls and procedures as of a date within 90 days of the filing date of this quarterly report. The Company's disclosure controls and procedures are designed to ensure that information required to be disclosed by the Company in the reports that are filed or submitted under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. Based on this evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that these controls and procedures are effective.

(b) Changes in internal controls. There have been no significant changes in the Company's internal controls or in other factors that could significantly affect these controls subsequent to the date of the Company's evaluation, including any corrective actions with regard to significant deficiencies or material weaknesses.

PART II. OTHER INFORMATION**ITEM 1.****LEGAL PROCEEDINGS**

On June 12, 2001, a class action lawsuit was filed against us and several of our officers and directors in U.S. Federal Court for the Southern District of New York in an action captioned *CJA Acquisition, Inc. v. Verticalnet, et al.*, C.A. No. 01-CV-5241 (the "CJA Action"). Also named as defendants were four underwriters involved in the issuance and initial public offering of our common stock in February 1999—Lehman Brothers Inc., Hambrecht & Quist LLC, Volpe Brown Whelan & Company LLC and WIT Capital Corporation. The complaint in the CJA Action alleges violations of Sections 11 and 15 of the Securities Act of 1933 and Section 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated there under, based on, among other things, claims that the four underwriters awarded material portions of the initial shares to certain favored customers in exchange for excessive commissions. The plaintiff also asserts that the underwriters engaged in a practice known as "laddering," whereby the clients or customers agreed that in exchange for IPO shares they would purchase additional shares at progressively higher prices after the IPO. With respect to Verticalnet, the complaint alleges that the Company and its officers and directors failed to disclose in the prospectus and the registration statement the existence of these purported excessive commissions and laddering agreements. After the CJA Action was filed, several "copycat" complaints were filed in U.S. Federal Court for the Southern District of New York. Those complaints, whose allegations mirror those found in the CJA Action, include *Ezra Charitable Trust v. Verticalnet, et al.*, C.A. No. 01-CV-5350; *Kofsky v. Verticalnet, et al.*, C.A. No. 01-CV-5628; *Reeberg v. Verticalnet, et al.*, C.A. No. 01-CV-5730; *Lee v. Verticalnet, et al.*, C.A. No. 01-CV-7385; *Hoang v. Verticalnet, et al.*, C.A. No. 01-CV-6864; *Morris v. Verticalnet, et al.*, C.A. No. 01-CV-9459, and *Murphy v. Verticalnet, et al.*, C.A. No. 01-CV-8084. None of the complaints state the amount of any damages being sought, but do ask the court to award rescissory damages. All of the foregoing suits were amended and consolidated into a single complaint that was filed with the U.S. Federal Court on April 19, 2002. This amended complaint contains additional factual allegations concerning the events discussed in the original complaints, and asserts that, in addition to Sections 11 and 15 of the Securities Act, the Company and our officers and directors also violated Sections 10(b), 20(a) and Rule 10b-5 of the Exchange Act in connection with the IPO. In addition to this amended and consolidated complaint, the plaintiffs in this lawsuit and in the hundreds of other similar suits filed against other companies in connection with IPOs that occurred in the late 1990s have filed "master allegations" that primarily focus on the conduct of the underwriters of the IPOs, including our IPO. On October 9, 2002, the U.S. Federal Court for the Southern District of New York entered an order dismissing, without prejudice, the claims against the individual Verticalnet officers and directors who had been named as defendants in the various complaints. In February 2003, the District Court entered an order denying a motion made by the defendants to dismiss the actions in their entirety, but granting the motion as to certain of the claims against some defendants. However, the District Court did not dismiss any claims against Verticalnet. We have retained counsel and intend to vigorously defend ourselves in connection with the allegations raised in the amended and consolidated complaint. In addition, we intend to enforce our indemnity rights with respect to the underwriters who are also named as defendants in the amended and consolidated complaint.

We are also party to various litigations and claims that arise in the ordinary course of business. In the opinion of management, the ultimate resolutions with respect to these actions will not have a material adverse effect on our financial position or results of operations.

CEO CERTIFICATION

PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Nathanael V. Lentz, certify that:

1.

I have reviewed this quarterly report on Form 10-Q of Verticalnet, Inc.

2.

Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;

3.

Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;

4.

The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in the Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:

a.

designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;

b.

evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the Evaluation Date); and

c.

presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;

5.

The registrant's other certifying officer and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors:

a.

all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and

b.

Edgar Filing: VERTICALNET INC - Form 10-Q

any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and

6.

The registrant's other certifying officer and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
