NUWAVE TECHNOLOGIES, INC.  
NOTES TO CONDENSED FINANCIAL STATEMENTS

1. Basis of Interim Financial Statement Preparation  
-----

The accompanying unaudited condensed financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America for interim information. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. The results of

## Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10QSB

operations for the interim periods shown in this report are not necessarily indicative of expected results for any future interim period or for the entire fiscal year. NUWAVE Technologies, Inc. (the "Company" or "NUWAVE"), believes that the quarterly information presented includes all adjustments (consisting only of normal, recurring adjustments) necessary for a fair presentation in accordance with generally accepted accounting principles. The accompanying condensed financial statements should be read in conjunction with the Company's Annual Report on Form 10-KSB as filed with the Securities and Exchange Commission ("SEC") on April 16, 2002.

### 2. Capital Transactions

-----

On February 5, 2002, the Company entered into a private placement agreement with investors whereby the Company issued 600,000 shares of the Company's Common Stock for an aggregate purchase price of \$330,000. In connection with this agreement, the Company issued to the Placement Agent a Placement Agent Warrant, exercisable to purchase up to 30,000 shares of Common Stock, representing five percent of the total of the stock issued in the Offering. The warrants shall be exercisable for a period of five years, expiring on February 5, 2007, at an exercise price of \$.55 per share. The Placement Agent also received a cash placement fee of eight percent of the purchase price and a non-accountable allowance equal to two percent of the purchase price, totaling \$33,000.

On February 27, 2002, the Company entered into agreement with an investor whereby the Company issued 214,286 shares of Common Stock for an aggregate purchase price of \$150,000 and warrants to purchase up to 50,000 shares of Common Stock at an exercise price of \$1.00 per share with an exercise period of five years expiring February 27, 2007. Under the terms of the agreement a consultant was paid a finder's fee of \$1,500 representing one percent of the purchase price.

On April 15, 2002, the Company entered into a \$3.0 million Equity Line of Credit Agreement with Cornell Capital Partners, LP (the "Purchaser"). Provided we are in compliance with the terms of the Agreement, we may, at our option, periodically require the Purchaser to purchase up to \$100,000 in any seven day period of the Company's Common Stock (the "put" shares) up to a maximum of \$3.0 million over the next two years, commencing on May 31, 2002 the effective date of a Securities Act of 1933 (the "Securities Act") registration statement on

7

Form SB-2 for the registration of 5,000,000 shares of Common Stock to be sold under the Equity Line of Credit, plus the 238,095 shares mentioned below. The Company has issued to the Purchaser 218,095 shares of Common Stock as a commitment fee for entering into the Equity Line of Credit Agreement. In addition, the Company issued to the placement agent 20,000 shares of NUWAVE's common stock. For each share of Common Stock purchased under the Equity Line of Credit, the Purchaser will pay 97% of the then Market Price (as defined in the Equity Line of Credit), and will be paid a fee of 4% of each advance.

The Equity Line of Credit is non-exclusive; thereby permitting us to offer and sell our securities to third parties while the Equity Line of Credit is in effect. NUWAVE has the option to terminate the Equity Line of Credit Agreement at any time, provided there is no pending advance thereunder.

Between June 7, 2002 and June 30, 2002 the Company entered into agreements with various investors whereby a total of 1,101,165 shares of Common Stock was

## Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10QSB

issued for an aggregate purchase price of \$330,350. In connection with the issuance of these shares, the Company incurred costs of \$20,640 in placement agent fees and expenses.

### 3. Subsequent Events

-----

On July 3, 2002, the Company's Public Warrants, issued in the Company's initial public offering expired. On the expiration, there was 2,530,000 public warrants unexercised that then expired.

8

## MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

### FORWARD-LOOKING STATEMENTS

This Report on Form 10-QSB contains "forward-looking statements" within the meaning of Section 27A of the Securities Act and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). All statements other than statements of historical facts included in this Report, including without limitation, the statements under "General," "Marketing and Sales," and "Liquidity and Capital Resources," are forward-looking statements. The Company cautions that forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those indicated in the forward-looking statements, due to several important factors herein identified. Important factors that could cause actual results to differ materially from those indicated in the forward-looking statements ("Cautionary Statements") include delays in product development, competitive products and pricing, lack of acceptance of the Company's products, general economic conditions, risks of intellectual property litigation, product demand, industry capacity, new product development, failure of distributor to market our products effectively, commercialization of new technologies, the Company's ability to raise additional capital, and the risk factors detailed from time to time in the Company's Annual Report on Form 10-KSB and other materials filed with the SEC.

All subsequent written and oral forward-looking statements attributable to the Company or persons acting on its behalf are expressly qualified in their entirety by the Cautionary Statements.

### GENERAL

Our mission is to identify, develop and commercialize high-margin, proprietary technologies suited for high-volume, high-growth markets and, in turn, achieve attractive long-term growth for our company. Our focus to date has been and continues to be on technology related to image and video enhancement designed to enrich picture and video output with clearer, more defined detail in texture, color, contrast and tone, at low cost. Our initial products can be used by original equipment manufacturers (OEM's) for placement into products that produce images for display screens such as televisions and/or DVD players, for supplementing and increasing video quality on existing television monitors and video displays via set-top boxes containing our technology, and by individuals over the Internet for improving their personal images and photographs. Our patented high speed filtering technology removes approximately 70% of the picture noise while retaining correct focus (the image and text in the image

## Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10QSB

does not blur). The three product lines based upon our proprietary technology are: 1) the NUWAVE Video Processor (NVP) Technology, 2) Retail Products and 3) Digital Filtering Technology.

9

### RESULTS OF OPERATIONS

#### Six Months Ended June 30, 2002 Compared to Six Months Ended June 30, 2001

Revenues for the six months ended June 30, 2002 were \$281,000 compared to \$72,000 for the six months ended June 30, 2001 as we began selling the NVP Technology in the form of ASIC (application specific integrated circuits) chips to OEMs and our first retail product the "VGE" video game enhancer in June 2001 of 2001. In December 2001, we entered into a strategic alliance with Gemini Industries (Gemini), a leading manufacturer and distributor of consumer electronics accessories. Gemini was granted a five-year exclusive license to market and distribute NUWAVE's VGE in North America. Initial shipments of the VGE and ASIC chips to Gemini took place during the first quarter of 2002. Cost of sales for the six months ended June 30, 2002 was \$148,000 compared to \$28,000 for the six months ended June 30, 2001. During the six months ended June 30, 2002, \$469,000 was spent on research and development activities compared to \$512,000 for the same six-month period in 2001, a decrease of \$43,000. This decrease was primarily due to the elimination of amortization of the development costs relating to Company's PicturePrep software product and PicturePrepClub website. The majority of the research and development expenditures incurred during 2002 related to the development of the Company's new ASIC chip, the "NVP 1104" which was completed in July 2002 and the development of our retail and security/surveillance lines (see marketing and sales). General and administrative expenses for the six months ended June 30, 2002, totaled \$1,237,000 representing a decrease of \$75,000 compared to the six months ended June 30, 2001. Such decrease was the result of decreases in payroll of \$44,000 combined with decreases in recruiting of \$37,000, professional fees of \$18,000 and marketing costs of \$33,000 and other of \$24,000; these decreases were offset by an increase in financial consulting \$81,000 primarily representing the non-cash costs (using the Black-Scholes calculation of accounting for issuances of options and warrants) of options and warrants issued to consultants.

Interest income (net of interest expense) was \$4,000 for the six months ended June 30, 2002 as compared to \$65,000 for the same period in 2001 primarily due to the Company's lower cash position as well as lower interest rates. As a result of the above, we had a net loss of \$1,569,000 for the six months ended June 30, 2002 compared to a net loss for the six months ended June 30, 2001, of \$1,715,000.

#### Three Months Ended June 30, 2002 Compared to Three Months Ended June 30, 2001

Revenues for the three months ended June 30, 2002 were \$13,000 compared to \$70,000 for the three months ended June 30, 2001. The revenues for the 2001 period were attributable to the introduction and sale of the "VGE" in June 2001. In compliance with the exclusive license and distribution agreement, Gemini purchased their opening VGE inventory requirements during the first quarter of this year and did not place additional orders during the quarter ended June 30, 2002. Per the amended terms of the agreement, beginning in October 2002 Gemini has minimum monthly purchase obligations throughout the remainder of the agreement. For the quarter ended June 30, 2002, we had a net loss of \$976,000 compared to a net loss for the quarter ended June 30, 2001 of \$899,000. The loss

## Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10QSB

for the quarter ended June 30, 2002 included \$664,000 in general and administrative expenses, representing a decrease of \$66,000 compared to the

10

quarter ended June 30, 2001. Such decrease was primarily the result of reduced sales and marketing costs of \$56,000 combined with decreases in professional fees of \$38,000, travel & entertainment of \$29,000, recruiting of \$20,000, and other \$9,000; these decreases were offset by an increase in financial consulting of (\$86,000) primarily representing the non-cash costs (using the Black-Scholes calculation of accounting for issuances of options and warrants) of options and warrants issued to consultants.

Although we anticipate deriving revenue from the sale of our ASIC chips, retail products and proprietary software during the second half of 2002, no assurance can be given that these products will be successfully marketed during such period. See "Liquidity and Capital Resources."

### MARKETING AND SALES

#### Retail & Security/Surveillance Products

We have licensed our proprietary VGE technology to Gemini to manufacture, market and distribute the VGE to its customer base, which covers approximately 17,000 retail locations in North America. This alliance supports our strategy to obtain access to an established retail distribution channel for the specialized image enhancement products we develop. Additionally, it allows us to allocate our time and resources away from costly retail marketing and distribution processes, to focus on developing innovative technologies and products for license to third parties with established marketing and distribution channels. In light of the Gemini agreement we have also reduced our marketing expenditures in Europe and are currently concentrating our efforts there on finding a distributor to market our products on a similar arrangement as Gemini.

On July 24, 2002 the Company announced its introduction of (1) a line of Retail video products and (2) Security/Surveillance image enhancement products for applications within the growing Homeland Security market. These two new product lines are scheduled for release in the third and fourth quarters of 2002. The retail line includes a series of video game hook-up cables, an "S" Video Enhancer (SVE) set top box and four video selector boxes that feature the company's proprietary technology for image enhancement. The Company expected the retail line to be sold to OEMs and consumer electronic distributors for resale to national retail chains and specialty audio/video stores. The introduction of these products, should not only satisfy consumer demand for better video quality, but also should allow consumers to mix multiple video sources, from popular products like DVD Players, Satellite Receivers, Video Camcorders, and Video Game Consoles.

The NUWAVE ENABLED Security/ Surveillance image enhancement products will be rolled out in the third quarter of 2002 for the Homeland Security markets. NUWAVE's patented hardware chip technology breaks down a video signal into its chrominance and luminance components and then modifies specific parameters: color, luminance, black level, clarity and noise reduction, to remove visual noise before reassembling the signal and sending it to a playback device, such as a video monitor. When integrated into a security and surveillance system, this technology has applications for law enforcement, anti-terrorism and business surveillance, in public locations such as airports, retail stores,

sports stadiums and other public gathering places. The Company has received its first order from an agency of the Federal Government for this new line of security/surveillance image enhancement products.

#### NVP ASIC Technology

The NUWAVE Video Processor (NVP) technology is proprietary video-enhancement technology designed to significantly enhance video output devices with clearer, sharper details and more vibrant colors when viewed on the display screen. We are marketing this technology in the form of ASIC chips (Application Specific Integrated Circuits) directly to OEM's who by incorporating this enabling technology would improve picture quality in their televisions, VCR's, DVD's, camcorders, set-top boxes and other video output devices. This technology can also be licensed to the OEM for incorporation onto their own ASIC design. The NVP 104 plastic (silicon) chip was completed during 2001.

During July 2002, the Company announced the availability of its new ASIC Chip, the "NVP 1104". This new chip can create economies of scale in the marketplace by offering a superior product with unique features, which satisfy customer's demands for higher video quality at modest prices. It supports the latest video standards such as component video and progressive scan systems, includes features that are targeted at video enhancement for the Security/Surveillance and Home Entertainment applications. These important features together with its low cost implementation make it very attractive to incorporate into OEM consumer audio/video products like DVD players, AV receivers, Video Games, Satellite Receivers, AV Selectors, TV's and Retail set-top box products. The NVP 1104 is 'future proofed' due to its' unique design philosophy, and by its' ability to function with the many video standards available today.

#### Digital Filtering Technology

Our proprietary digital filters remove graininess and digital artifacts while preserving proper focus better than any other "real time" filters that are on the market today. In October 2001, we were granted a patent by the U.S. Patent Office covering our digital filters. We plan to license our digital filtering technology to OEM's for embedding in products such as PC's, printers, scanners, camcorders and DVD's, among other digital imaging devices. These patented filters are expected to be in demand for use in processing digital video and movies used for streaming video over the Internet. The digital technology not only complements our proprietary analog ASIC chip technology but can also work in conjunction with it to further improve the resulting image quality. In April 2002, we signed an agreement with Sony Corporation, giving Sony the non-exclusive right to use one of our filters in its digital color printers, in return for a nominal one-time licensing fee. While this initial step may lead to a growing relationship between Sony Corporation and NUWAVE, there is no assurance that such a relationship will develop.

With the initial sales of our VGE retail product and our ASIC chips to Gemini during the first six months of 2002, our net sales for the six months ended June 30, 2002 were \$281,000 as compared to \$72,000 for the six months

## Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10QSB

ended June 30, 2001. As a result of the exclusive Gemini Agreement, we anticipate a substantial reduction in our overall marketing and distribution costs in 2002 since they will be responsible for marketing and selling to retail outlets in North America. Gemini has taken longer than originally anticipated to integrate and market the VGE to their customer base and has been granted an extension from July 1 to October 1, 2002 to begin minimum monthly purchase obligations throughout the remainder of the agreement. Although we anticipate deriving increased revenues from the sale of our ASIC chips and retail products and the licensing of our proprietary digital software during 2002, no assurance can be given that these products will be successfully marketed or that losses will not continue to occur during such period. See "Liquidity and Capital Resources."

### LIQUIDITY AND CAPITAL RESOURCES

On June 30, 2002, the Company had cash and cash equivalents of approximately \$323,000 and no long-term liabilities. On April 15, 2002, we entered into a \$3 million Equity Line of Credit. Provided we are in compliance with the terms of the Equity Line of Credit Agreement, we may, at our option, require the Purchaser to purchase up to \$100,000 in any seven business day period of our Common Stock, up to a maximum of \$3 million over the two years from May 31, 2002. The purchase price of the shares will be 97% of the then current market price. Upon the initial advance and all subsequent advances, the Investor shall receive a fee equal to 4% of the gross proceeds of each advance. The Equity Line of Credit is non-exclusive; thereby permitting us to offer and sell our securities to third parties while the Equity Line of Credit is in effect. We have the right to terminate the Equity Line of Credit Agreement at any time, provided there is no pending advance thereunder. As of July 31, 2002, the Company had not exercised any of its "put" options under the Equity Agreement.

Between June 7, 2002 and June 30, 2002 the Company entered into agreements with various investors whereby a total of 1,101,165 shares of Common Stock was issued for an aggregate purchase price of \$330,350. In connection with the issuance of these shares, the Company incurred costs of \$20,640 in placement agent fees and expenses.

In their report on the audit of NUWAVE's financial statements for the year ended December 31, 2001, our independent auditors included an explanatory paragraph because of the uncertainty that we could continue in business as a going concern in the event we are unable to complete a registration and sale of our Common Stock pursuant to this Equity Line of Credit. We anticipate that with our cash currently on hand and the completion of an effective registration statement on May 31, 2002 relating to the \$3 million Equity Line of Credit and sales thereunder, we will be able to satisfy currently contemplated cash requirements for at least through the next twelve months. In the event we are unable to complete the sale of our Common Stock pursuant to this agreement or otherwise; there would be substantial doubt about our ability to continue as a going concern. We are continuing our efforts to raise capital in the financial markets on terms that would potentially be less dilutive than utilization of the Equity Line of Credit as well as exploring other options such as mergers/acquisitions and strategic alliances. There can be no assurance that we will be successful in these endeavors.

Effective as of the opening of business on Tuesday, August 13, 2002 the Company's common stock will be trading on the OTC bulletin board (OTCBB) Market

## Edgar Filing: NUWAVE TECHNOLOGIES INC - Form 10QSB

under the symbol WAVE. The OTCBB is a regulated quotation service that displays real-time quotes, last-sale prices and volume information in over-the-counter (OTC) equity securities. Prior to August 13, 2002, the stock had been traded on the Nasdaq SmallCap Market.

14

### PART II - OTHER INFORMATION

#### Item 2. Changes in Securities

-----

(c) On April 15, 2002, the Company entered into a \$3.0 million Equity Line of Credit Agreement with a qualified investor (the "Purchaser"). Provided we are in compliance with the terms of the Agreement, we may, at our option, periodically require the Purchaser to purchase up to \$100,000 in any seven day period of the Company's Common Stock (the "put" shares) up to a maximum of \$3.0 million over the next two years, commencing upon the effective date of a Securities Act registration statement covering such shares. For each share of common stock purchased under the Equity Line of Credit, the Purchaser will pay 97% of the then Market Price (as defined in the Equity Line of Credit), and will be paid a fee of 4% of each advance. The sale of the shares under the Equity Line of Credit is conditioned upon the SEC declaring effective a registration statement under the Securities Act of 1933 concerning the shares of Common Stock to be sold under the equity line of credit. The Company filed a registration statement on Form SB-2 for the registration of 5,000,000 shares of Common Stock to be sold under the Equity Line of Credit, plus the 238,095 shares mentioned below, which was declared effective on May 31, 2002. The Company has issued to the purchaser 218,095 shares of Common Stock as a commitment fee for entering into the Equity Line of Credit Agreement. In addition, the Company issued to the placement agent 20,000 shares of NUWAVE's common stock.

The Equity Line of Credit is non-exclusive; thereby permitting us to offer and sell our securities to third parties while the Equity Line of Credit is in effect. NUWAVE has the option to terminate the Equity Line of Credit Agreement at any time, provided there is no pending advance thereunder.

Between June 7, 2002 and June 30, 2002 the Company entered into agreements with various investors whereby a total of 1,101,165 shares of Common Stock was issued for an aggregate purchase price of \$330,350. In connection with the issuance of these shares, the Company incurred costs of \$20,640 in placement agent fees and expenses.

These placements were claimed exempt from the registration requirements of the Securities Act of 1933 by reason of Section 4(2) thereon and Regulation D thereunder as each purchaser represented it was an "accredited investor" and made additional representations regarding its purchase.
