PART I FINANCIAL INFORMATION (CONT. D.)
HESS CORPORATION AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. Basis of Presentation

On May 3, 2006, Amerada Hess Corporation changed its name to Hess Corporation (the Corporation).

The financial statements included in this report reflect all normal and recurring adjustments which, in the opinion of management, are necessary for a fair presentation of the Corporation's consolidated financial position at June 30, 2006 and December 31, 2005 and the consolidated results of operations and the consolidated cash flows for the three- and six-month periods ended June 30, 2006 and 2005. The unaudited results of operations for the interim periods reported are not necessarily indicative of results to be expected for the full year.

Certain notes and other information have been condensed or omitted from these interim financial statements. These statements, therefore, should be read in conjunction with the consolidated financial statements and related notes included in the Corporation's Form 10-K for the year ended December 31, 2005.

2. Stock Split

On May 3, 2006, the Corporation's shareholders voted to increase the number of authorized common shares from 200 million to 600 million and the board of directors declared a three-for-one stock split. The stock split was completed in the form of a stock dividend that was issued on May 31, 2006 to shareholders of record on May 17, 2006. The common share par value remained at \$1.00 per share. All common share and per share amounts in these financial statements and notes are on an after-split basis for all periods presented.

3. Acquisitions and Divestitures

In January 2006, the Corporation, in conjunction with its Oasis Group partners, re-entered its former oil and gas production operations in the Waha concessions in Libya, in which the Corporation holds an 8.16% interest. The re-entry terms include a 25-year extension of the concessions and a payment in January 2006 by the Corporation to the Libyan National Oil Corporation of \$260 million. The Corporation also accrued \$106 million that will be paid in the fourth quarter of 2006, related to certain investments in fixed assets made by the Libyan National Oil Corporation since 1986. This transaction was accounted for as a business combination.

The following table summarizes the preliminary allocation of the purchase price to assets and liabilities acquired (in millions):

Property, plant and equipment	\$ 366
Goodwill	236
Total assets acquired	602
Deferred tax liabilities	(236)
Net assets acquired	\$ 366

PART I FINANCIAL INFORMATION (CONT. D.)
HESS CORPORATION AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

The goodwill recorded in this transaction relates to the deferred tax liability recorded for the difference in book and tax bases of the assets acquired. The goodwill is not expected to be deductible for income tax purposes. Production from the Libyan operation averaged 23,000 barrels per day in the six months ended June 30, 2006 and liftings commenced in the second quarter. The primary reason for the Libyan investment was to acquire long-lived crude oil reserves.

In January 2006, the Corporation acquired a 55% working interest in the deepwater section of the West Mediterranean Block 1 Concession (the West Med Block) in Egypt for \$413 million. The Corporation has a 25-year development lease for the West Med Block, which contains four existing natural gas discoveries and additional exploration opportunities. This transaction was accounted for as an acquisition of assets.

In the first quarter of 2006, the Corporation completed the sale of its interests in certain producing properties located in the Permian Basin in Texas and New Mexico for \$358 million. This asset sale resulted in an after-tax gain of \$186 million (\$289 million before income taxes).

In June 2006, the Corporation completed the sale of U.S. Gulf Coast onshore oil and gas producing assets for \$86 million resulting in an after-tax gain of \$50 million (\$80 million before income taxes). These assets were producing at a combined net rate of approximately 2,600 barrels of oil equivalent per day.

4. Inventories

Inventories consist of the following (in millions):

	June 30, 2006	December 31, 2005
Crude oil and other charge stocks	\$ 254	\$ 161
Refined and other finished products	1,518	1,149
Less LIFO adjustment	(853)	(656)
	919	654
Merchandise, materials and supplies	229	201
Total inventories	\$ 1,148	\$ 855

During the first quarter of 2005, the Corporation liquidated LIFO inventories, which decreased cost of products sold by approximately \$11 million.

Capitalized exploratory well costs greater than one year old after completion of drilling were \$61 million as of June 30, 2006 and \$150 million as of December 31, 2005.

7. Long-Term Debt

In May 2006, the Corporation amended and restated its existing syndicated, revolving credit facility to increase the credit line to \$3 billion from \$2.5 billion and extend the term to May 2011 from December 2009. The facility can be used for borrowings and letters of credit. Current borrowings under the amended facility bear interest at .525% above the London Interbank Offered Rate and a facility fee of .125% per annum is payable on the amount of the credit line. The interest rate and facility fee are subject to adjustment if the Corporation's credit rating changes. The restrictions on the amount of total borrowings and cash dividends remain unchanged.

Capitalized interest on development projects amounted to the following (in millions):

	Three months ended June 30		Six months ended June 30	
	2006	2005	2006	2005

9. Pension Plans

Components of pension expense consisted of the following (in millions):

	Three months ended June 30		Six months ended June 30	
	2006	2005	2006	2005
Service cost	\$ 9	\$ 7	\$ 17	\$ 14
Interest cost	16	14	32	28
Expected return on plan assets	(16)	(14)	(31)	(27)
Amortization of prior service cost	1	1	1	1
Amortization of net loss	6	6	12	12
Pension expense	\$ 16	\$ 14	\$ 31	\$ 28

In 2006, the Corporation expects to contribute \$40 million to its funded pension plans and \$20 million to the trust established for its unfunded pension plan. Through June 30, 2006, the Corporation contributed \$24 million to its funded pension plans and \$20 million to the trust for its unfunded pension plan.

10. Stock-based Compensation

Effective January 1, 2006, the Corporation adopted the provisions of Statement of Financial Accounting Standards No. 123R, Share-Based Payment (FAS 123R). This standard requires that all stock based compensation to employees, including grants of stock options, be expensed over the vesting period. Awards of restricted common stock were expensed over the vesting period under previous accounting requirements and will continue to be expensed under FAS 123R. The Corporation records compensation expense for both stock options and restricted stock on a straight-line basis over the vesting period.

The Corporation adopted FAS 123R using the modified prospective application method. Under this method, compensation cost includes expense for restricted stock, previously awarded unvested stock options outstanding at January 1, 2006 based on the grant date fair-values used for disclosure purposes under previous accounting requirements, and stock options awarded subsequent to January 1, 2006 determined under the provisions of FAS 123R. For the six months ended June 30, 2006, stock-based compensation expense was \$31 million (\$20 million after income taxes), of which \$14 million (\$9 million after income taxes) related to stock options and the remainder related to restricted stock. Stock option expense recorded in the first half of 2006 reduced basic and diluted earnings per share by \$.03 per share. The cumulative effect on prior years of this change in accounting principle was immaterial.

PART I FINANCIAL INFORMATION (CONT. D.)
HESS CORPORATION AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

The Corporation's stock option activity in the first half of 2006 consisted of the following:

	Options (Thousands)		Weighted Average Exercise Price Per Share
Outstanding at January 1, 2006	11,451	\$	24.09
Granted	2,753		49.47
Exercised	(463)		23.01
Forfeited	(36)		31.62
Outstanding at June 30, 2006	13,705	\$	29.20
Exercisable at June 30, 2006	7,561	\$	21.95

The intrinsic value of outstanding options and exercisable options at June 30, 2006 was \$324 million and \$234 million, respectively. At June 30, 2006, assuming forfeitures of 2% per year, the number of outstanding options that are expected to vest is 13,516,000 shares with a weighted average exercise price of \$29.05 per share. At June 30, 2006 the weighted average remaining term of exercisable options was 6 years and the remaining term of all outstanding options was 7 years.

The Corporation uses the Black-Scholes model to estimate the fair value of employee stock options. The following weighted average assumptions were utilized for stock options awarded for the six months ended June 30:

	2006	2005
Risk free interest rate	4.52%	3.93%
Stock price volatility	.321	.300
Dividend yield	.81%	1.34%
Expected term in years	5	7
Weighted average fair value per option granted	\$16.50	\$10.11

The assumption above for the risk free interest rate is based on the expected terms of the options and is obtained from published sources. The stock price volatility is determined from historical experience using the same period as the expected terms of the options. The expected stock option term is based on historical exercise patterns and the expected future holding period.

The Corporation's restricted stock activity in the first half of 2006 consisted of the following:

	Shares of Restricted Common Stock Awarded (Thousands)		Weighted-Average Price on Date of Grant
Outstanding at January 1, 2006	4,363	\$	22.32
Granted	921		50.55
Distributed	(84)		27.13
Forfeited	(39)		22.49

Outstanding at June 30, 2006	5,161	\$	27.28

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

At June 30, 2006, the number of common shares reserved for issuance under the 1995 Long-Term Incentive Plan is as follows (in thousands):

Future awards of restricted stock and stock options	11,772
Stock options outstanding	13,705
	25,477

Based on restricted stock and stock option awards outstanding at June 30, 2006, unearned compensation expense, before income taxes, will be recognized as follows: remainder of 2006 \$35 million, 2007 \$55 million and 2008 \$32 million.

If FAS 123R had been adopted on January 1, 2005, pro-forma net income for the first half of 2005 would have been \$508 million (compared with reported net income of \$518 million) and diluted earnings per share would have been \$1.64 per share (compared with reported diluted earnings per share of \$1.67).

11. Provision for Income Taxes

The provision for income taxes consisted of the following (in millions):

	Three months ended June 30		Six months ended June 30	
	2006	2005	2006	2005
Current	\$ 462	\$ 259	\$ 811	\$ 542

Total	\$ 532	\$ 189	\$ 1,001	\$ 426

In the first quarter of 2005, the Corporation recorded an income tax charge of \$41 million related to the repatriation of \$1.3 billion of foreign earnings under the American Jobs Creation Act of 2004.

12. Stockholders Equity and Weighted Average Common Shares

At June 30, 2006, the Corporation has outstanding 13,500,000 shares of 7% cumulative mandatory convertible preferred stock (7% Preferred). The 7% Preferred have a liquidation preference of \$675 million (\$50 per share). After adjustment for the stock split, the following conversion terms apply to the 7% Preferred. Each 7% Preferred share will automatically convert on December 1, 2006 into 2.4915 to 3.0897 shares of common stock, depending on the average closing price of the Corporation's common stock over a 20-day period before conversion. The conversion rate will be 2.4915 shares of common stock for each share of 7% Preferred, if the common stock price is \$20.07 or greater, and up to 3.0897 shares of common stock for each preferred share, if the common stock price is lower. Holders of the 7% Preferred have the right to convert their shares at any time prior to December 1, 2006 at the rate of 2.4915 shares of common stock for each preferred share converted.

Table of Contents**PART I FINANCIAL INFORMATION (CONT. D.)****HESS CORPORATION AND CONSOLIDATED SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

At June 30, 2006, the Corporation has outstanding 323,715 shares of 3% cumulative convertible preferred stock (3% Preferred) which carry a liquidation value of \$16 million (\$50 per share). After adjustment for the stock split, each share of the 3% Preferred is convertible at the option of the holder into 1.8783 shares of common stock.

The weighted average number of common shares used in the basic and diluted earnings per share computations are as follows (in thousands):

	Three months ended June 30		Six months ended June 30	
	2006	2005(*)	2006	2005(*)

Common shares diluted	315,510	311,173	315,164	310,450

(*) Restated for three-for-one stock split issued on May 31, 2006.

13. Comprehensive Income

Comprehensive income (loss) was as follows (in millions):

	Three months ended June 30		Six months ended June 30	
	2006	2005	2006	2005
Net income	\$ 565	\$ 299	\$ 1,260	\$ 518

Comprehensive income (loss)	\$ 413	\$ 231	\$ 906	\$ (325)

The Corporation reclassifies hedging gains and losses included in other comprehensive income (loss) to earnings at the time the hedged transactions are recognized. Hedging decreased Exploration and Production results by \$83 million (\$128 million before income taxes) in the second quarter of 2006 and \$231 million (\$363 million before income taxes) in the second quarter of 2005. Hedging decreased Exploration and Production results by \$147 million (\$229 million before income taxes) in the six months ended June 30, 2006 and \$426 million

Edgar Filing: HESS CORP - Form 10-Q

(\$671 million before income taxes) in the six months ended June 30, 2005.

At June 30, 2006, accumulated other comprehensive income (loss) included after-tax unrealized deferred losses of \$1,689 million primarily related to crude oil contracts used as hedges of future Exploration and Production sales. The pre-tax amount of deferred hedge losses is reflected in accounts payable and the related income tax benefits are recorded as deferred tax assets on the balance sheet.

15. Subsequent Event

In July 2006, the United Kingdom enacted an additional 10% supplementary tax on petroleum operations with an effective date of January 1, 2006. As a result, the Corporation will record a charge in the third quarter of approximately \$105 million. This charge includes a provision of approximately \$60 million representing the incremental tax on earnings for the first half of the year and a charge of approximately \$45 million to adjust the deferred tax liability in the U.K.

Item 2. Management's Discussion and Analysis of Results of Operations and Financial Condition.

Overview

On May 3, 2006, Amerada Hess Corporation changed its name to Hess Corporation (the Corporation) and declared a three-for-one stock split in the form of a stock dividend that was issued on May 31, 2006. The Corporation is a global integrated energy company that operates in two segments, Exploration and Production and Marketing and Refining. The Exploration and Production segment explores for, develops, produces and sells crude oil and natural gas. The Marketing and Refining segment manufactures, purchases, trades and markets refined petroleum products and other energy products. Net income was \$565 million for the second quarter of 2006, compared with \$299 million for the second quarter of 2005.

Exploration and Production: Exploration and Production net income was \$501 million for the second quarter of 2006, compared with \$263 million in the second quarter of 2005. Worldwide crude oil and natural gas production was 354,000 barrels of oil equivalent per day (boepd) in the second quarter of 2006 compared with 355,000 boepd in the same period of 2005. The Corporation anticipates that its production for the full year of 2006 will average between 360,000 and 370,000 boepd.

The following is an update of Exploration and Production activities during the second quarter of 2006:

In June, production commenced at the Atlantic and Cromarty natural gas fields in the United Kingdom and averaged 13,000 Mcf per day in the second quarter. The fields are currently producing at a rate of approximately 80,000 Mcf net to Hess.

The Shenzi oil and gas field in the deepwater Gulf of Mexico was sanctioned by the operator and first oil is expected in 2009.

An exploration well on the Pony Prospect in the deepwater Gulf of Mexico encountered 475 feet of oil saturated sandstone in Miocene age reservoirs. The Corporation is also drilling the Ouachita and Alsace prospects and an appraisal well at its Tubular Bells discovery.

In June 2006, the Corporation completed the sale of U.S. Gulf Coast onshore oil and gas producing assets for \$86 million resulting in an after-tax gain of \$50 million. These assets were producing at a combined net rate of approximately 2,600 barrels of oil equivalent per day.

Table of Contents**PART I FINANCIAL INFORMATION (CONT. D.)****Overview (Continued)**

Marketing and Refining: Marketing and Refining earnings were \$121 million for the second quarter of 2006, compared with \$98 million in the second quarter of 2005.

In June 2006, the Corporation acquired energy marketing customer accounts and related assets to expand the Corporation's natural gas and electric sales in the Northeast.

Corporate: In May 2006, the Corporation amended and restated its existing syndicated, revolving credit facility to increase the facility to \$3 billion from \$2.5 billion and extend the term to May 2011 from December 2009.

Results of Operations (Continued)

The net gain from asset sales in the second quarter of 2006 relates to the sale of U.S. Gulf Coast onshore oil and gas producing assets (\$80 million before income taxes). In the second quarter of 2006, the Corporation also recorded an after-tax charge for vacated leased office space (\$30 million before income taxes, recorded in general and administrative expenses). The net gain from asset sales for the six months ended June 30, 2006 also reflects the disposition of certain producing properties located in the Permian Basin in Texas and New Mexico (\$289 million before income taxes).

Earnings in the second quarter of 2005 include income tax benefits of \$11 million, reflecting the effect on deferred income taxes of a reduction in the income tax rate in Denmark and a tax settlement in the United Kingdom. Second quarter 2005 results also include a charge of \$7 million (\$10 million before income taxes) for premiums on bond repurchases. The first half of 2005 also includes a net gain of \$11 million (\$18 million before income taxes) on the disposition of a mature North Sea asset, a net gain of \$11 million (\$19 million before income taxes) for a legal settlement reflecting the favorable resolution of contingencies on a prior year asset sale, and an income tax charge of \$41 million related to the repatriation of \$1.3 billion of foreign earnings under the American Jobs Creation Act of 2004.

In the discussion that follows, the financial effects of certain transactions are disclosed on an after-tax basis. Management reviews segment earnings on an after-tax basis and uses after-tax amounts in its review of variances in segment earnings. Management believes that after-tax amounts are a preferable method of explaining variances in earnings, since they show the entire effect of a transaction rather than only the pre-tax amount. After-tax amounts are determined by applying the appropriate income tax rate in each tax jurisdiction to pre-tax amounts.

After considering the items affecting comparability between periods, the remaining changes in Exploration and Production earnings are primarily attributable to changes in selling prices, sales volumes and operating costs and exploration expenses, as discussed below.

Table of Contents**PART I FINANCIAL INFORMATION (CONT. D.)****Results of Operations (Continued)**

Selling prices: Higher average selling prices of crude oil and natural gas and reduced crude oil hedge positions increased Exploration and Production revenues by approximately \$635 million in the second quarter and \$1,215 million in the first half of 2006 compared with the corresponding periods of 2005. The Corporation's average selling prices were as follows:

Sales and production volumes: The Corporation's crude oil and natural gas production, on a barrel of oil equivalent basis was 354,000 boepd in the second quarter of 2006 compared with 355,000 boepd in the same period of 2005. Production in the first half of 2006 was 357,000 boepd compared with 356,000 boepd in the first half of 2005. The Corporation anticipates that its production for the full year of 2006 will average between 360,000 and 370,000 boepd. The Corporation's net daily worldwide production by region was as follows (in thousands):

Table of Contents**PART I FINANCIAL INFORMATION (CONT. D.)****Results of Operations (Continued)**

Crude oil and natural gas production in the United States was lower in the second quarter and first half of 2006 due to asset sales, natural decline and decreased production caused by hurricanes in 2005. Production in Europe was lower due to increased maintenance and natural decline, partially offset by increased production from Russia and the Atlantic and Cromarty natural gas fields in the United Kingdom, which commenced production in June. Increased crude oil production in Africa in the second quarter and first half of 2006 was primarily due to production from Libya. Natural gas production in Asia was higher due to increased production from Block A-18 in the Joint Development Area between Malaysia and Thailand (JDA).

Lower crude oil and natural gas sales volumes reduced Exploration and Production revenues by approximately \$50 million in the second quarter and \$110 million in the first half of 2006 compared with the corresponding periods of 2005.

Operating costs and depreciation, depletion and amortization: Cash operating costs, consisting of production expenses and general and administrative expenses, totaled \$345 million and \$656 million in the second quarter and first half of 2006, an increase of \$68 million and \$124 million, respectively, from the corresponding periods of 2005. The increase reflects higher production taxes resulting from higher oil prices, higher maintenance and repair costs and increased costs of services and materials. Depreciation, depletion and amortization charges increased in 2006 reflecting higher per barrel rates.

Exploration expenses: Exploration expenses were \$79 million and \$191 million in the second quarter and first half of 2006, a decrease of \$8 million and \$29 million, from 2005. The decrease principally reflects lower dry hole costs, partially offset by higher seismic expense.

Income Taxes: The effective income tax rate for Exploration and Production operations in the first half of 2006 was 46% compared with 41% in the first half of 2005. The increase is primarily due to income taxes on sales of Libyan crude oil. In July 2006, the United Kingdom enacted an additional 10% supplementary tax on petroleum operations with an effective date of January 1, 2006. As a result, we will record a charge in the third quarter of approximately \$105 million. This charge includes a provision of approximately \$60 million representing the incremental tax on earnings for the first half of the year and a charge of approximately \$45 million to adjust the deferred tax liability in the U.K. Excluding this special charge for the change in U.K. supplementary tax, we expect the Exploration & Production effective rate for the year to be in the range of 50% to 53%.

PART I FINANCIAL INFORMATION (CONT. D.)

Results of Operations (Continued)

The Corporation's future Exploration and Production earnings may be impacted by external factors, such as political risk, volatility in the selling prices of crude oil and natural gas, reserve and production changes, industry cost inflation, exploration expenses, the effects of weather and changes in foreign exchange and income tax rates.

Marketing and Refining

Earnings from Marketing and Refining activities amounted to \$121 million in the second quarter of 2006 compared with \$98 million in the corresponding period of 2005. Earnings from Marketing and Refining activities amounted to \$170 million in the first half of 2006 compared with \$161 million in the corresponding period of 2005. The Corporation's downstream operations include HOVENSA L.L.C. (HOVENSA), a 50% owned refining joint venture with a subsidiary of Petroleos de Venezuela S.A. (PDVSA). Additional Marketing and Refining activities include a fluid catalytic cracking facility in Port Reading, New Jersey, as well as retail gasoline stations, energy marketing and trading operations.

Refining: Refining earnings, which consist of the Corporation's share of HOVENSA's results, Port Reading earnings, interest income on the note receivable from PDVSA and other miscellaneous items, were \$107 million in the second quarter of 2006 and \$127 million in the first half of 2006 compared with \$77 million in the second quarter and \$119 million in the first half of 2005.

The Corporation's share of HOVENSA's income after income taxes was \$63 million in the second quarter of 2006 compared with income of \$66 million in the second quarter of 2005. The decrease was primarily due to lower charge rates, resulting from a combination of planned and unplanned maintenance. For the first half of 2006, the Corporation's share of HOVENSA's after-tax income was \$62 million compared with \$97 million in the first half of 2005, reflecting lower charge rates.

Interest income after income taxes on the PDVSA note was \$2 million in the second quarter and \$5 million in the first half of 2006 compared with \$3 million in the second quarter and \$7 million in the first half of 2005. At June 30, 2006, the remaining balance of the PDVSA note was \$182 million, which is scheduled to be fully repaid by February 2009.

Port Reading's after tax earnings were \$40 million in the second quarter and \$59 million in the first half of 2006 compared with \$7 million in the second quarter and \$14 million in the first half of 2005. The increase reflects higher margins and sales volumes. In the first quarter of 2005, the Port Reading facility was shutdown for planned maintenance.

Coker	58	73.2%	100.9%	79.4%	96.9%
Port Reading	65	96.9%	89.2%	97.8%	72.8%

Marketing: Marketing earnings, which consist principally of retail gasoline and energy marketing activities, were \$15 million in the second quarter of 2006 and \$28 million in the first half of 2006 compared with \$14 million in the second quarter and \$27 million in the first half of 2005. Retail gasoline operations generated losses in the second quarter and first half of 2006 as wholesale prices rose more quickly than retail prices. Retail gasoline operations were slightly profitable in the second quarter of 2005, but generated a loss in the first half of 2005. Earnings from energy marketing activities increased slightly in the second quarter and first half of 2006 compared with the corresponding periods of 2005. Total refined product sales volumes were 466,000 barrels per day in the first half of 2006 and 448,000 barrels per day in the first half of 2005.

The Corporation has a 50% voting interest in a consolidated partnership that trades energy commodities and energy derivatives. The Corporation also takes trading positions for its own account. The Corporation's after-tax results from trading activities, including its share of the earnings of the trading partnership, amounted to a loss of \$1 million in the second quarter of 2006 and income of \$15 million in the first half of 2006 compared with earnings of \$7 million in the second quarter and \$15 million in the first half of 2005.

The Corporation's future Marketing and Refining earnings may be impacted by volatility in marketing and refining margins, competitive industry conditions, government regulatory changes, credit risk and supply and demand factors, including the effects of weather.

Corporate

After-tax corporate expenses were \$29 million in the second quarter of 2006 and \$52 million in the first half of 2006 compared with \$28 million in the second quarter and \$97 million in the first half of 2005. Results for the second quarter of 2005 include net expenses of \$7 million (\$10 million before income taxes) for premiums on bond repurchases. The results for the first half of 2005 also include an income tax charge of \$41 million related to repatriation of foreign earnings under the American Jobs Creation Act of 2004. Excluding these items, the increase in corporate expenses in 2006 compared to 2005 reflects the expensing of stock options commencing January 1, 2006 and increases in the costs of insurance and other employee benefit costs.

Table of Contents**PART I FINANCIAL INFORMATION (CONT. D.)****Results of Operations (Continued)*****Interest***

Interest expense was as follows (in millions):

	Three months ended June 30		Six months ended June 30	
	2006	2005	2006	2005
Total interest incurred	\$ 70	\$ 76	\$ 151	\$ 151

Interest expense before income taxes	44	54	101	115
Less income taxes	16	20	36	43
After-tax interest expense	\$ 28	\$ 34	\$ 65	\$ 72

After-tax interest expense for the full year of 2006 is anticipated to be lower than the 2005 amount, primarily due to increased capitalized interest and lower average interest rates on outstanding borrowings.

Sales and Other Operating Revenues

Sales and other operating revenues increased by 35% in the second quarter and 40% in the first half of 2006 compared with the corresponding periods of 2005. This increase principally reflects increased selling prices of crude oil, natural gas and refined products and reduced crude oil hedge positions. The increase in cost of goods sold reflects the increased costs of refined products purchased.

Capital expenditures in the first half of 2006 include payments of \$260 million related to the Corporation's re-entry into its former oil and gas production operations in the Waha concessions in Libya and \$413 million to acquire a 55% working interest in the West Med Block in Egypt.

Proceeds from asset sales totaled \$444 million in the first half of 2006, including the sale of the Corporation's interests in certain producing properties in the Permian Basin and onshore Gulf Coast. Proceeds from asset sales totaled \$3 million in the first half of 2005.

Financing Activities: The Corporation reduced debt by \$11 million during the first half of 2006 compared with \$49 million in the first half of 2005. Dividends paid were \$108 million in the first half of 2006 compared with \$107 million in the first half of 2005. During the first half of 2006, the Corporation received proceeds related to the exercise of stock options totaling \$15 million compared with \$52 million in the same period of 2005.

Table of Contents**PART I FINANCIAL INFORMATION (CONT. D.)****Liquidity and Capital Resources (Continued)**

Future Capital Requirements and Resources: The Corporation anticipates that its capital and exploratory expenditures, excluding additional acquisitions, will be approximately \$4.1 billion to \$4.3 billion during 2006. The Corporation expects that it will fund its 2006 operations, including capital expenditures, dividends, pension contributions and required debt repayments, with existing cash on-hand and cash flow from operations. If necessary, unused borrowing capacity is available on the revolving credit facility.

In May 2006, the Corporation amended and restated its existing syndicated, revolving credit facility to increase the credit line to \$3 billion from \$2.5 billion and extend the term to May 2011 from December 2009. The facility can be used for borrowings and letters of credit. Current borrowings under the amended facility bear interest at .525% above the London Interbank Offered Rate and a facility fee of .125% per annum is payable on the amount of the credit line. The interest rate and facility fee are subject to adjustment if the Corporation's credit rating changes. The restrictions on the amount of total borrowings and cash dividends remain unchanged.

A loan agreement covenant allows the Corporation to borrow up to an additional \$8.2 billion for the construction or acquisition of assets at June 30, 2006. The maximum amount of dividends or stock repurchases that can be paid from borrowings under this covenant is \$3.1 billion at June 30, 2006.

	\$ 3,220	\$ 2,685

At June 30, 2006, the Corporation has \$2,138 million available under the amended and restated revolving credit facility and has additional unused lines of credit of \$785 million, primarily for letters of credit, under uncommitted arrangements with banks. The Corporation also has a shelf registration under which it may issue additional debt securities, warrants, common stock or preferred stock.

Liquidity and Capital Resources (Continued)

Off-Balance Sheet Arrangements: The Corporation has leveraged leases not included in its balance sheet, primarily related to retail gasoline stations that the Corporation operates. The net present value of these leases is \$480 million at June 30, 2006. The Corporation's June 30, 2006 debt to capitalization ratio would increase from 34.5% to 37.3% if the leases were included as debt.

Contingencies and Other: At January 1, 2006, the Corporation had an accrual of \$31 million for the costs of vacated office space. In the first half of 2006, the Corporation recorded an additional \$30 million charge for vacated leased office space (\$18 million after income taxes) and made payments of \$5 million. At June 30, 2006, the Corporation had a remaining accrual of \$56 million for vacated office space.

The Corporation guarantees the payment of up to 50% of HOVENSA's crude oil purchases from suppliers other than PDVSA. At June 30, 2006, the guarantee amounted to \$377 million. This amount fluctuates based on the volume of crude oil purchased and related prices. In addition, the Corporation has agreed to provide funding up to a maximum of \$15 million to the extent HOVENSA does not have funds to meet its senior debt obligations.

In December 2005, the Minerals Management Service (MMS) issued an order to the Corporation to pay royalties on certain deep water exploration leases in the Gulf of Mexico held by the Corporation subject to the Deep Water Royalty Relief Act of 1995. The Corporation is paying all royalties as demanded by the MMS for these leases.

Stock Split

On May 3, 2006, the Corporation's shareholders voted to increase the number of authorized common shares from 200 million to 600 million and the board of directors declared a three-for-one stock split. The stock split was completed in the form of a stock dividend that was issued on May 31, 2006 to shareholders of record on May 17, 2006. The common share par value remained at \$1.00 per share. All common share and per share amounts in the financial statements and notes and management's discussion and analysis are on an after-split basis for all periods presented.

New Accounting Pronouncements

Effective January 1, 2006, the Corporation adopted the provisions of Statement of Financial Accounting Standards No. 123R, *Share-Based Payment* (FAS 123R). This standard requires that the fair value of all stock based compensation to employees, including grants of stock options, be expensed over the vesting period. Through December 31, 2005, the Corporation used the intrinsic value method to account for employee stock options. Because the exercise prices of employee stock options equaled or exceeded the market price of the stock on the date of grant, the Corporation did not recognize compensation expense under the intrinsic value method. See Note 10 to the consolidated financial statements.

In June 2006, the Financial Accounting Standards Board issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). FIN 48 prescribes the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The Corporation is currently evaluating the requirements and will adopt the provisions of FIN 48 on January 1, 2007.

Market Risk Disclosure

In the normal course of its business, the Corporation is exposed to commodity risks related to changes in the price of crude oil, natural gas, refined products and electricity, as well as to changes in interest rates and foreign currency values. In the disclosures that follow, these operations are referred to as non-trading activities. The Corporation also has trading operations, principally through a 50% voting interest in a trading partnership. These activities are also exposed to commodity risks primarily related to the prices of crude oil, natural gas and refined products.

Instruments: The Corporation primarily uses forward commodity contracts, foreign exchange forward contracts, futures, swaps, options and energy commodity based securities in its non-trading and trading activities. Generally, these contracts are widely traded instruments with standardized terms.

Value-at-Risk: The Corporation uses value-at-risk to monitor and control commodity risk within its trading and non-trading activities. The value-at-risk model uses historical simulation and the results represent the potential loss in fair value over one day at a 95% confidence level. The model captures both first and second order sensitivities for options. The potential change in fair value based on commodity price risk is presented in the non-trading and trading sections below.

Non-Trading: The Corporation's Exploration and Production segment uses derivative instruments to fix the selling prices of a portion of its future production and the related gains or losses are an integral part of its selling prices. Following is a summary of the Corporation's outstanding crude oil hedges at June 30, 2006:

Maturities	Brent Crude Oil	
	Average Selling Price	Thousands of Barrels per Day
2006		
Third quarter	\$27.96	30
Fourth quarter	27.75	30
2007	25.85	24
2008	25.56	24
2009	25.54	24
2010	25.78	24
2011	26.37	24
2012	26.90	24

There were no hedges of WTI crude oil or natural gas production at June 30, 2006. As market conditions change, the Corporation may adjust its hedge positions. The Corporation also markets energy commodities including refined petroleum products, natural gas and electricity. The Corporation uses derivative instruments to manage the risk in its marketing activities.

Accumulated other comprehensive income (loss) at June 30, 2006 includes after-tax unrealized deferred losses of \$1,689 million primarily related to crude oil contracts used as hedges of Exploration and Production sales. The pre-tax amount of deferred hedge losses is reflected in accounts payable and the related income tax benefits are recorded as deferred tax assets on the balance sheet.

The Corporation estimates that at June 30, 2006, the value-at-risk for commodity related derivatives that are settled in cash and used in non-trading activities was \$79 million (\$93 million at December 31, 2005). The results may vary from time to time as hedge levels change.

Trading: In trading activities, the Corporation is exposed to changes in crude oil, natural gas and refined product prices. The trading partnership in which the Corporation has a 50% voting interest trades energy commodities and derivatives. The accounts of the partnership are consolidated with those of the Corporation. The Corporation also takes trading positions for its own account. The information that follows represents 100% of the trading partnership and the Corporation's proprietary trading accounts.

Total realized gains for the first half of 2006 amounted to \$399 million compared with \$55 million of realized gains for the first half of 2005. The following table provides an assessment of the factors affecting the changes in fair value of trading activities and represents 100% of the trading partnership and other trading activities (in millions):

	2006	2005
Fair value of contracts outstanding at January 1	\$ 1,109	\$ 184
Change in fair value of contracts outstanding at the beginning of the year and still outstanding at June 30	(167)	16
Reversal of fair value for contracts closed during the period	(148)	71
Fair value of contracts entered into during the period and still outstanding	(96)	96
Fair value of contracts outstanding at June 30	\$ 698	\$ 367

The Corporation uses observable market values for determining the fair value of its trading instruments. In cases where actively quoted prices are not available, other external sources are used which incorporate information about commodity prices in actively quoted markets, quoted prices in less active markets and other market fundamental analysis. Internal estimates are based on internal models incorporating underlying market information such as commodity volatilities and correlations. The Corporation's risk management department regularly compares valuations to independent sources and models.

The following table summarizes the sources of fair values of derivatives used in the Corporation's trading activities at June 30, 2006 (in millions):

Source of Fair Value	Total	Instruments Maturing			2009 and beyond
		2006	2007	2008	
Prices actively quoted	\$ 711	\$ 171	\$ 234	\$ 128	\$ 178
Other external sources	(20)	(9)	(4)	(9)	2
Internal estimates	7		4	2	1
Total	\$ 698	\$ 162	\$ 234	\$ 121	\$ 181

The Corporation estimates that at June 30, 2006, the value-at-risk for trading activities was \$19 million (\$18 million at December 31, 2005). The results may change from time to time as strategies change to capture potential market rate movements.
