VALIDUS HOLDINGS DELIVERS LETTER TO IPC HOLDINGS

Hamilton, Bermuda April 6, 2009 Validus Holdings, Ltd. (Validus) (NYSE: VR) today announced that it has sent a letter to the Board of Directors of IPC Holdings, Ltd. (IPC) (NASDAQ: IPCR). Presented below is the full text of the letter sent to the Board of Directors of IPC:

April 6, 2009

The Board of Directors of IPC Holdings, Ltd.
c/o James P. Bryce, President and Chief Executive Officer
American International Bldg.
29 Richmond Road
Pembroke, HM 08
Bermuda

Dear Members of the Board:

The difficulty of being unable to speak directly has lead to an exchange of press releases, which is unfortunate. In this context, we would like to respond to the Max statement issued this morning by describing the analytical framework we believe is appropriate.

In today's press release, Max modified its description of its calculation of pro forma book value per share. In essence, the Max calculation now describes what an IPC shareholder would receive on a standalone basis from either Validus or Max. We disagree with this basis for valuation. Our approach is focused on a comparison of what an IPC shareholder would own as a result of either transaction.

However, if we were to follow the Max approach, we would note that there are a number of adjustments contemplated in the proposed Max/IPC Amalgamation Agreement, which would reduce the standalone value that Max delivers by \$117.4 million. The joint proxy statement/prospectus filed by IPC and Max references, among other adjustments, the need to increase Max's loss reserves for annuity claims as well as property and casualty claims by \$130.0 million. As a result, the Max book value delivered would be reduced by \$2.06 per Max share, resulting in a book value delivered of \$20.40 per share, on the basis of Max's calculation of diluted book value.

I would also note that Validus and Max use differing accounting conventions for calculating diluted book value per share. While each is valid, on the basis upon which Validus calculates diluted book value per share, the Max value delivered would be \$19.68 after a \$1.81 per share reduction in book value.

We have provided the attached schedule of our calculations in an effort to be as transparent as possible in our communication with you.

Sincerely,

/s/ Edward J. Noonan

- (1) Represents historical net book value of Max.
- (2) Represents adjustment to reduce the deferred acquisition costs of Max to their estimated fair value at December 31, 2008.

- (3) Represents adjustment to reduce goodwill and intangible assets of Max to their estimated fair value at December 31, 2008.

- (4) The fair value of Max's reserve for property and casualty losses and loss adjustment expenses, life and annuity benefits, and loss and loss adjustment expenses recoverable were estimated based on the present value of the underlying cash flows of the loss reserves and recoverables. In determining the fair value estimate, IPC's management estimated a risk premium deemed to be reasonable and consistent with expectations in the marketplace given the nature and the related degree of uncertainty of such reserves. Such risk premium exceeded the discount IPC's

management would use to determine the present value of the underlying cash flows.

- (5) Represents the estimated fair value of the profit within Max's unearned property and casualty premiums. In determining fair value, IPC's management estimated the combined ratio associated with Max's net unearned property and casualty premiums.
- (6) Represents adjustment to record Max's senior notes to their estimated fair value at December 31, 2008.
- (7) Common shares outstanding plus the gross amount of all warrants, options, restricted shares, RSUs, restricted common shares and performance share units outstanding as of the
