Chairman's Statement

Dear Stockholders,

The past twelve months have seen a number of significant developments, both for The Taiwan Fund, Inc. (the Fund) and for Taiwan. Happily, these developments have been positive in both cases.

On May 8, 2010, we switched the management of the Fund to Martin Currie, Inc. (Martin Currie). I am pleased to report that, so far, this has been validated by the Fund's returns. Thanks to clear outperformance in the three months since Martin Currie took over, the Fund has beaten its benchmark over the past twelve months, returning 18.6%* in U.S. dollar terms against the Taiwan Stock Exchange Index (the TAIEX) return of 14.7%. This is despite the costs associated with the change of strategy—a process that involved numerous transactions.

The Fund is now significantly underweight in the electronics sector and has a more pronounced bias to small and mid-cap stocks; this reflects the new manager's preference for beneficiaries of rising domestic consumption and of the closer links with China.

Those links became closer still over the past year, with the historic signing of the Economic Cooperation Framework Agreement, a free-trade agreement between Taipei and Beijing in June, 2010. The agreement, which was approved by the Taiwanese parliament in August 2010, removes the tariffs on hundreds of products and will have a considerable and positive economic impact on the island.

Given the positive political developments and after the strong start that the Fund has made under its new management, I look forward to being able to report further strong performance in my next statement. On behalf of the Board, I would like to thank you for your continuing support of the Taiwan Fund, Inc.

Sincerely,
Harvey Chang
Chairman

* Returns for the Fund are historical total returns that reflect changes in net asset value per share during each period and assume that dividends and capital gains, if any, were reinvested. Returns for the TAIEX are not total returns and reflect only changes in share price but do not assume that cash dividends, if any, were reinvested, and thus are not strictly comparable to the Fund returns. Past performance is not indicative of future results of the Fund.

Report of the Investment Manager

Review

The Taiwanese market rose by 14.7% over the twelve months ended August 31, 2010. The Fund did better, rising by 18.6%. All of this outperformance came after the change in management and despite the transactions costs involved in repositioning the portfolio. In the three full months since the switch of manager, the Fund has returned 9.7% against a 3.1% return from the benchmark.

Economic news has been better than expected, with Taiwan's second-quarter gross domestic product growth beating all expectations at 12.5%, the second-fastest expansion since 1986. Inflation has remained low, and exports are growing rapidly, although the pace of growth is likely to decelerate because of disappointing demand from the Information Technology sector. Car sales have been particularly eye-catching, growing by 23.4% in July; Hotai, the Toyota car distributor, revised up its forecast for Taiwanese new-car sales in 2010, from 230,000 to 280,000 units, and expects another good year in 2011.

But the most noteworthy development over the period was the signing of the Economic Cooperation Framework Agreement (the ECFA) on June 29, 2010. This marks a new chapter in relations between the island and the mainland. The agreement was approved by the Legislative Yuan in August and will be effective from September onwards. A total of 539 items have been included in the early harvest list of Taiwanese products that will benefit from tariff cuts (a shorter list of mainland products will also benefit). The estimated direct benefit to Taiwan is around US\$815 million.

After taking over management on May 8, 2010, we undertook a major reorganization of the portfolio. In a program trade, we sold 25 stocks (value US\$118 million) and bought 38 stocks (value US\$112 million) at a cost of 3 basis points. As part of this reorganization, the realized net gain rose from US\$12.8 million on May 8, 2010 to US\$41.5 million at year-end.

The main effect of the dealing was to reduce the Fund's exposure to the electronics industry to 31% and telecommunications industry to 0%, while increasing our investment in the potential beneficiaries of the improvement in cross-strait relations and a recovery in domestic consumption. With the resultant increased weighting in smaller-caps, the number of stocks in the portfolio has grown to 56. Given the signing of ECFA, the new focus on China plays was a major factor in

the Fund's outperformance over the past three months and, consequently, the twelve month period ended August 31, 2010.

Stocks sold from the inherited portfolio included Realtek Semiconductor Corp., RichTek Technology Corp., Chimei Innolux Corp., AU Optronics Corp., Novatek Microelectronics Corp. Ltd., ALI Corp., Everlight Electronics Co., Ltd., Siliconware Precision Industries Co., Ralink Technology Corp., Quanta Computer, Inc., Lite-On Technology Corp., Formosa Advanced Technologies Co., Ltd., Far EasTone Telecommunications Co., Ltd., Chunghwa Telecom Co., Ltd., Taiwan Mobile Co., Ltd., Great Wall Enterprise Co., Ltd., Formosa Plastics Corp., Cheng Shin Rubber Industry Co., Ltd., Taishin Financial Holdings Co., Ltd., First Financial Holding Co., Ltd., Pou Chen Corp., Asia Cement Corp., China Steel Chemical Corp., U-Ming Marine Transport Corp. and Yulon Nissan Motor Co., Ltd.

New stocks included Prince Housing & Development Corp., Taiwan Land Development Corp., Hung Poo Real Estate Development Corp., Taiwan Tea Corp., Continental Holdings Corp., Yungtay Engineering Co., Ltd., Tatung Co., Ltd., Awea Mechatronic Co., Ltd., Globe Union Industrial Corp., Wei Mon Industry Co., Ltd., Depo Auto Parts Industrial Co., Ltd., Farglory F T Z Investment Holding Co., Ltd., Test-Rite International Co., Ltd., Far Eastern Department Stores, Ltd., PC Home Online, Mercuries & Associates, Ltd., Excelsior Medical Co., Ltd., Eastern Media International, Wah Lee Industrial Corp., Aurora Corp., Soft-World International Corp., WT Microelectronics Co., Ltd., Avermedia Technologies, Inc., Chicony Electronics Co., Ltd., Syncmold Enterprise Corp., Powercom Co., Ltd., TSRC Corp., China Petrochemical Development Corp., Li Peng Enterprise Co., Ltd., Taiwan Glass Industrial Corp., Tung Ho Steel Enterprise Corp., China Life Insurance Co., Ltd., SinoPac Financial Holdings Co., Ltd., Yuanta Financial Holding Co., Ltd. and KGI Securities Co., Ltd.

Outlook

Clearly, the results of ECFA will take time to show, with the tariff reductions only coming into effect on January 1, 2011. But the increasing amount of cross-strait M&A rumors show that companies are not waiting for the starting gun. Examples abound in our portfolio. Another benefit that should not be overlooked is that it will allow President Ma to sign free-trade agreements with other trading partners; this was previously hampered by Beijing. Also, we expect negotiations

on round two, which will broaden the agreement, to start within six months of the first stage being put into effect.

In the meantime, direct flights are to increase by 100 per week (+37%) to meet the surging demand from Chinese tourists, whose numbers have already surpassed Taiwan's ceiling of an average of 3,000 tourists per day. The Taiwanese government estimates that the overall number of Chinese tourists will double this year.

We believe the stream of strong economic data emanating from the island, and the improving trade relationship with its giant neighbour should encourage a rebound in the equity markets. We are confident that the portfolio we have put together is well placed to benefit from these trends in the coming months and quarters.

Thank you for your continued support.

Notes to Financial Statements

1. Significant Accounting Policies

The Taiwan Fund, Inc. (the Fund), a Delaware corporation, is registered under the Investment Company Act of 1940, as amended (the Act), as a diversified closed-end management investment fund.

The Fund concentrates its investments in the securities listed on the Taiwan Stock Exchange. Because of this concentration, the Fund may be subject to additional risks resulting from future political or economic conditions in Taiwan and the possible imposition of adverse governmental laws of currency exchange restrictions affecting Taiwan.

Events or transactions occurring after year end through the date the financial statements were issued, have been evaluated by management in the preparation of the financial statements. The following summarizes the significant accounting policies followed by the Fund in the preparation of its financial statements in conformity with U.S. generally accepted accounting principles.

Security Valuation. All securities, including those traded over-the-counter, for which market quotations are readily available are valued at the last sales price prior to the time of determination of the Fund's net asset value per share or, if there were no sales on such date, at the closing price quoted for such securities (but if bid and asked quotations are available, at the mean between the last current bid and asked prices, rather than such quoted closing price). In certain instances where the price determined above may not represent fair market value, the value is determined in such manner as the Board of Directors (the Board) may prescribe. Foreign securities may be valued at fair value according to procedures approved by the Board if the closing price is not reflective of current market values due to trading or events occurring in the valuation time of the Fund. In addition, substantial changes in values in the U.S. markets subsequent to the close of a foreign market may also affect the values of securities traded in the foreign market. Short-term investments, having a maturity of 60 days or less are valued at amortized cost, which approximates market value, with accrued interest or discount earned included in interest receivable.

The Fund has adopted fair valuation accounting standards which establish a definition of fair value and set out a hierarchy for measuring fair value. These standards require additional disclosures about the various inputs and valuation techniques used to develop the measurements of fair value and a discussion in changes in valuation techniques and related inputs during the period. These inputs are summarized in the three broad levels listed below:

Level 1 quoted unadjusted prices for identical instruments in active markets to which the fund has access at the date of measurement.

Level 2 quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model derived valuations in which all significant inputs and significant value drivers are observable in active markets. Level 2 inputs are those in markets for which there are few transactions, the prices are not current, little public information exists or instances where prices vary substantially over time or among brokered market makers.

Level 3 model derived valuations in which one or more significant inputs or significant value drivers are unobservable. Unobservable inputs are those inputs that reflect the Fund's own assumptions that market participants would use to price the asset or liability based on the best available information.

In January 2010, the Financial Accounting Standards Board issued Accounting Standards Update No. 2010-06, Improving

Disclosures about Fair Value Measurements (ASU 2010-06). ASU 2010-06 requires new disclosures regarding transfers in and out of Levels 1 and 2 effective for interim and annual reporting periods beginning after December 15, 2009. For the year ended August 31, 2010, there were no transfers between Levels 1 and 2. ASU 2010-06 will also require additional details regarding Level 3 transaction activity effective for interim and annual periods beginning after December 15, 2010. Management is currently evaluating the effect that this additional requirement will have on the Fund's financial statements.

Repurchase Agreements. In connection with transactions in repurchase agreements, it is the Fund's policy that its custodian take possession of the underlying collateral securities, the fair value of which exceeds the principal amount of the repurchase transaction, including accrued interest, at all times. If the seller defaults, and the fair value of the collateral declines, realization of the collateral by the Fund may be delayed or limited.

Foreign Currency Translation. The financial accounting records of the Fund are maintained in U.S. dollars. Investment securities, other assets and liabilities denominated in a foreign currency are translated into U.S. dollars at the current exchange rate. Purchases and sales of securities, income receipts and expense payments are translated into U.S. dollars at the exchange rate on the dates of the transactions.

Reported net realized gains and losses on foreign currency transactions represent net gains and losses from disposition of foreign currencies, currency gains and losses realized between the trade dates and settlement dates of security transactions, and the difference between the amount of net investment income accrued and the U.S. dollar amount actually received. The effects of changes in foreign currency exchange rates on investments in securities are not segregated in the Statement of Operations from the effects of changes in market prices of those securities, but are included in realized and unrealized gain or loss on investments in securities.

Forward Foreign Currency Transactions. A forward foreign currency contract (Forward) is an agreement between two parties to buy or sell currency at a set price on a future date. The Fund may enter into Forwards in order to hedge foreign currency risk or for other risk management purposes. Realized gains or losses on Forwards include net gains or losses on contracts that have matured or which the Fund has terminated by entering into an offsetting closing transaction. Unrealized appreciation or depreciation of Forwards is included in the Statement of Assets and Liabilities and is carried on a net basis. The portfolio could be exposed to risk of loss if the counterparty is unable to meet the terms of the contract or if the value of the currency changes unfavorably. As of August 31, 2010 the Fund had no open Forwards.

Indemnification Obligations. Under the Fund's organizational documents, its Officers and Directors are indemnified against certain liabilities arising out of the performance of their duties to the Fund. In addition, in the normal course of business the Fund enters into contracts that provide general indemnifications to other parties. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred.

Taxes. As a qualified regulated investment Fund under Subchapter M of the Internal Revenue Code, the Fund is not subject to income taxes to the extent that it distributes all of its investment Fund taxable income and net realized capital gains for its fiscal year. In addition to federal income tax for which the Fund is liable on undistributed amounts, the Fund is subject to federal excise tax on undistributed investment company taxable income and net realized capital gains. The Fund is organized in Delaware and as such is required to pay Delaware an annual franchise tax. Also, the Fund is currently subject to a Taiwan security transaction tax of 0.3% on equities and 0.1% on mutual

fund shares of the transaction amount.

The Fund's functional currency for tax reporting purposes is the New Taiwan dollar.

The Fund recognizes the tax benefits of uncertain tax positions only where the position is more likely than not to be

Notes to Financial Statements *(continued)*

sustained assuming examination by tax authorities. Management has analyzed the Fund's tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on returns filed for open tax years (2007-2009), or expected to be taken in the Fund's 2010 tax returns. The Fund identifies its major tax jurisdictions as U.S. Federal, Delaware and foreign jurisdictions where the Fund is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months.

Investment Income. Dividend income is recorded on the ex-dividend date; except, where the ex-dividend date may have passed, certain dividends from foreign securities are recorded as soon as the Fund is informed of the ex-dividend date.

Taiwanese companies typically declare dividends in the Fund's third fiscal quarter of each year. As a result, the Fund receives substantially less dividend income in the first half of its year. Interest income, which includes accretion of original discount, is accrued as earned.

Dividend and interest income generated in Taiwan is subject to a 20% withholding tax. Stock dividends received (except those which have resulted from capitalization of capital surplus) are taxable at 20% of the par value of the stock dividends received.

Distributions to Shareholders. The Fund distributes to stockholders at least annually, substantially all of its taxable ordinary income and expects to distribute its taxable net realized gains. Certain foreign currency gains (losses) are taxable as ordinary income and, therefore, increase (decrease) taxable ordinary income available for distribution. Pursuant to the Dividend Reinvestment and Cash Purchase Plan (the Plan), stockholders may elect to have all cash distributions automatically reinvested in Fund shares. (See the summary of the Plan.) Unless the Board elects to make a distribution in shares of the Fund's common stock, stockholders who do not participate in the Plan will receive all distributions in cash paid by check in U.S. dollars. Income and capital gain distributions are determined in accordance with income tax regulations, which may differ from U.S. generally accepted accounting principles. No capital gain distributions shall be made until any capital loss carryforwards have been fully utilized or expired.

These differences are primarily due to differing treatments for foreign currency transactions, losses deferred due to wash sales, post October loss deferrals and capital loss carryforwards. Permanent book and tax basis differences relating to shareholder distributions will result in reclassifications to paid in capital. For the year ended August 31, 2010, the Fund decreased undistributed net investment income by \$(936,355), increased paid in capital by \$5,427,580, and increased accumulated net realized loss by \$(4,491,225). These reclassifications have no effect on the net assets or net asset value per share.

Security Transactions. Security transactions are accounted as of the trade date. Gains and losses on securities sold are determined on the basis of identified cost.

Use of Estimates. The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

2. Purchases and Sales of Securities

For the fiscal year ended August 31, 2010, purchases and sales of securities, other than short-term securities, aggregated \$287,983,069 and \$273,648,605, respectively.

3. Management Fees and Other Service Providers

Management Fee. As the Fund's investment adviser, HSBC, received a basic fee that is computed daily at an annual rate of 1.00% of the Fund's average net assets. The basic fee is subject to monthly performance adjustments based on the Fund's investment performance as compared to the Taiwan Stock Exchange Index over a rolling 36-month period (the

performance adjustments). The basic fee may increase or decrease by + or -0.30% depending on the Fund's performance.

Effective January 1, 2008 through March 31, 2009, HSBC agreed to waive a portion of the basic fee so that the basic fee will not exceed 1.00% of the Fund's average daily net assets. The performance adjustments remained unchanged by this fee waiver.

On April 26, 2010, the stockholders of the Fund voted to approve an Investment Advisory and Management Agreement (the New Advisory Agreement) between the Fund and Martin Currie, Inc. (Martin Currie), the Fund's new investment adviser, which had been approved on January 21, 2010 by the Board and all of the Independent Directors. Effective on May 8, 2010, the New Advisory Agreement replaced the Discretionary Investment Management Contract that was in place between the Fund and HSBC. Under the New Advisory Agreement, Martin Currie is entitled to receive a fee for its services, computed daily and payable monthly in U.S. dollars, at the annual rate of 0.90% on the first \$150 million in total net assets under management, 0.80% on the next \$150 million in total net assets under management and 0.70% on total net assets under management over \$300 million.

For the year ended August 31, 2010, the management fee, including the performance adjustments, was equivalent to an annual rate of 0.76% of average net assets.

Administration Fees. State Street Bank and Trust Company (State Street) provides, or arranges for the provision of certain administrative and accounting services for the Fund, including maintaining the books and records of the Fund, and preparing certain reports and other documents required by federal and/or state laws and regulations. The Fund pays State Street a fee at the annual rate of 0.11% of the Fund's average daily net assets up to \$150 million, 0.08% of the next \$150 million, and 0.05% of those assets in excess of \$300 million, subject to certain minimum requirements. The Fund also pays State Street \$130,000 per year for certain legal administrative services, including corporate secretarial services and preparing regulatory filings. As of August 31, 2010, State Street succeeded Mega Bank as custodian for the Fund's Taiwan assets and now serves as custodian for all the Fund's assets.

Directors Fees. The Fund pays each of its directors who is not a director, officer or employee of the investment adviser an annual fee of \$20,000 plus \$2,500 for each Board of Directors meeting or Committee meeting attended, and \$2,500 for each meeting attended by telephone. In addition, the Fund will reimburse each of the directors for travel and out-of-pocket expenses incurred in connection with Board of Directors meetings.

Other Service Providers. Foreside Compliance Services, LLC (FCS) provides the Fund with a Chief Compliance Officer. Effective May 8, 2010, Foreside Management Services, LLC (FMS) provides the Fund with a Treasurer. Martin Currie pays FMS customary fees for its services pursuant to the Treasury Services Agreement between the Fund and FMS dated May 8, 2010. Neither FCS or FMS have a role in determining the Fund's investment policies or which securities are purchased or sold by the Fund.

General. Certain directors and officers of the Fund may also be directors or employees of the aforementioned companies that provide services to the Fund, and during their terms of office, receive no compensation from the Fund.

4. Fund Shares

Edgar Filing: TAIWAN FUND INC - Form N-CSR

At August 31, 2010, there were 100,000,000 shares of \$0.01 par value capital stock authorized, of which 18,575,112 were issued and outstanding. On January 8, 2010, the Fund issued 166 shares of its common stock, valued at \$2,435, to stockholders participating in the Fund's Dividend Reinvestment and Cash Purchase Plan.

Notes to Financial Statements *(continued)***5. Distributions**

The tax character of distributions made by the Fund during the year ended August 31, 2009 and August 31, 2010 are as follows:

		Year Ended August 31, 2009
Ordinary Income	\$	832,006
Distributions in Excess of Current Earnings		2,329,264
Total	\$	3,161,270

		Year Ended August 31, 2010
Ordinary Income	\$	1,312,691
Total	\$	1,312,691

As of August 31, 2010, the components of distributable earnings on a tax basis were \$307,733 of Undistributed Ordinary Income, \$0 of Undistributed Long-Term Capital Gain, \$52,904,121 of Unrealized Appreciation, \$0 of post October capital and currency losses, and \$(43,053,037) of capital loss carryover.

The difference between book basis and tax basis unrealized appreciation and depreciation is attributable primarily to the tax deferral of losses on wash sales. At August 31, 2010, the aggregate cost basis of the Fund's investment securities for income tax purposes was \$234,931,349. Net unrealized appreciation of the Fund's investment securities was \$52,913,480 of which \$59,974,065 related to appreciated investment securities and \$(7,060,585) related to depreciated investment securities.

At August 31, 2010, the Fund had available for federal income tax purposes a capital loss carryover of \$(43,053,037) of which \$(34,329,861) and \$(8,723,176) expire on August 31, 2017 and August 31, 2018, respectively, which can be used to offset certain future realized capital gains.

Summary of Dividend Reinvestment and Cash Purchase Plan

What is the Dividend Reinvestment and Cash Purchase Plan?

The Dividend Reinvestment and Cash Purchase Plan (the Plan) offers shareholders of the Fund, a prompt and simple way to reinvest their dividends and capital gains distributions in shares of the Fund. The Fund will distribute to shareholders, at least annually, substantially all of its net income and expects to distribute annually its net realized capital gains. Computershare Trust Company, N.A. (the Plan Administrator), acts as Plan Administrator for shareholders in administering the Plan. The Plan also allows you to make optional cash investments in Fund shares through the Plan Administrator.

Who Can Participate in the Plan?

If you own shares in your own name, you can elect to participate directly in the Plan. If you own shares that are held in the name of a brokerage firm, bank, or other nominee, you should contact your nominee to arrange for them to participate on your behalf.

What Does the Plan Offer?

The Plan has two components; reinvestment of dividends and capital gains distributions, and a voluntary cash purchase feature.

Reinvestment of dividends and capital gains distributions

If you choose to participate in the Plan, your dividends and capital gains distributions will be promptly invested for you, automatically increasing your holdings in the Fund. If the Fund declares a dividend or capital gains distribution payable in cash, you will automatically receive shares purchased by the Plan Administrator on the open market. You will be charged a per share fee (currently \$0.05) incurred with respect to the Plan Administrator's open market purchases.

If a distribution is declared which is payable in shares or cash at the option of the shareholder and if on the valuation date (generally the payable date) the market price of shares is equal to or exceeds their net asset value, the Fund will issue new shares to you at the greater of the following: (a) net asset value per share or (b) 95% of the market price per share. If the market price per share on the valuation date is less than the net asset value per share, the Fund will issue new shares to you at the market price per share on the valuation date.

All reinvestments are in full and fractional shares, carried to three decimal places. In the case of foreign (non-U.S.) shareholders, reinvestment will be made net of applicable withholding tax.

The Plan will not operate if a distribution is declared in shares only, subject to an election by the shareholders to receive cash.

Voluntary cash purchase option

Plan participants have the option of making investments in Fund shares through the Plan Administrator. You may invest any amount from \$100 to \$3,000 semi-annually. The Plan Administrator will purchase shares for you on the New York Stock Exchange or otherwise on the open market on or about February 15 and August 15. If you hold shares in your own name, you should deal directly with the Plan Administrator. Checks in U.S. dollars and drawn in

U.S. banks) should be made payable to Computershare . The Plan Administrator will not accept cash, traveler s checks, money orders, or third party checks. We suggest you send your check, along with a completed transaction form which is attached to each statement you receive, to the following address to be received at least two business days before the investment date: Computershare, c/o The Taiwan Fund, Inc. at P.O. Box 43078,

Summary of Dividend Reinvestment and Cash Purchase Plan *(continued)*

Providence, RI 02940-3078. The Plan Administrator will return any cash payments received more than thirty days prior to February 15 or August 15, and you will not receive interest on uninvested cash payments. If you own shares that are held in the name of a brokerage firm, bank, or other nominee, you should contact your nominee to arrange for them to participate in the cash purchase option on your behalf.

If your check is returned unpaid for any reason, the Plan Administrator will consider the request for investment of such funds null and void, and shall immediately remove these shares from your account. The Plan Administrator shall be entitled to sell shares to satisfy any uncollected amount plus any applicable fees. If the net proceeds of the sale are insufficient to satisfy the balance of any uncollected amounts, the Plan Administrator shall be entitled to sell such additional shares from your account as may be necessary to satisfy the uncollected balance.

Is There a Cost to Participate?

For purchases from the reinvestment and capital gains distributions, you will pay a pro rata portion of brokerage commissions payable with respect to purchases of shares by the Plan Administrator on the open market. You will also be charged a per share fee (currently \$0.05) incurred with respect to the Plan Administrator's open market purchases in connection with the reinvestment of dividends and capital gains distributions. Brokerage charges for purchasing shares through the Plan are expected to be less than the usual brokerage charges for individual transactions, because the Plan Administrator will purchase stock for all participants in blocks, resulting in lower commissions for each individual participant. The Plan Administrator's transaction fees for handling capital gains distributions or income dividends will be paid by the Fund.

For purchases from voluntary cash payments, participants are charged a service fee (currently \$0.75 per investment) and a per fee (currently \$0.05) for each voluntary cash investment. Per share fees include any brokerage commissions the Plan Administrator is required to pay.

Brokerage commissions and service fees, if any, will be deducted from amounts to be invested.

What Are the Tax Implications for Participants?

You will receive tax information annually for your personal records and to help you prepare your federal income tax return. The automatic reinvestment of dividends and capital gains distributions does not relieve you of any income tax which may be payable on dividends or distributions. For further information as to the tax consequences of participating in the Plan, you should consult with your tax advisors.

If the Fund issues shares upon reinvestment of a dividend or capital gains distribution, for U.S. federal income tax purposes, the amount reportable in respect of the reinvested amount of the dividend or distribution will be the fair market value of the shares received as of the payment date, which will be reportable as ordinary dividend income and/or long term capital gains. The shares will have a tax basis equal to such fair market value, and the holding period for the shares will begin on the day after the payment date. State, local and foreign taxes may also be applicable.

In addition, the Investment Manager has adopted a Code of Conduct that sets forth policies regarding conflicts of interest.
