for the quarterly period ended November 30, 2010

o **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

for the transition period from__________ to __________
Commission File No. 1-13146

THE GREENBRIER COMPANIES, INC.
(Exact name of registrant as specified in its charter)

Oregon	93-0816972
(State of Incorporation)	(I.R.S. Employer Identification No.)

One Centerpointe Drive, Suite 200, Lake Oswego, OR 97035
(Address of principal executive offices) (Zip Code)
(503) 684-7000
(Registrant s telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.
Yes þ No o

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulations S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).
Yes o No o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of large accelerated filer , accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer o	Accelerated filer þ	Non-accelerated filer o (Do not check if a smaller reporting company)	Smaller reporting company o

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act)
Yes o No þ

The number of shares of the registrant s common stock, without par value, outstanding on January 6, 2011 was 24,880,820 shares.

Forward-Looking Statements

From time to time, The Greenbrier Companies, Inc. and its subsidiaries (Greenbrier or the Company) or their representatives have made or may make forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, including, without limitation, statements as to expectations, beliefs and strategies regarding the future. Such forward-looking statements may be included in, but not limited to, press releases, oral statements made with the approval of an authorized executive officer or in various filings made by us with the Securities and Exchange Commission, including this filing on Form 10-Q. These statements involve known and unknown risks, uncertainties and other important factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. These forward-looking statements rely on a number of assumptions concerning future events and include statements relating to:

- availability of financing sources and borrowing base for working capital, other business development activities, capital spending and railcar and marine warehousing activities;
- ability to renew, maintain or obtain sufficient lines of credit and performance guarantees on acceptable terms;
- ability to utilize beneficial tax strategies;
- ability to grow our wheel services, refurbishment and parts, and lease fleet and management services businesses;
- ability to obtain sales contracts which provide adequate protection against increased costs of materials and components;
- ability to obtain adequate insurance coverage at acceptable rates;
- ability to obtain adequate certification and licensing of products; and
- short- and long-term revenue and earnings effects of the above items.

The following factors, among others, could cause actual results or outcomes to differ materially from the forward-looking statements:

- fluctuations in demand for newly manufactured railcars or marine barges;
- fluctuations in demand for wheel services, refurbishment and parts;
- delays in receipt of orders, risks that contracts may be canceled during their term or not renewed and that customers may not purchase the amount of products or services under the contracts as anticipated;
- ability to maintain sufficient availability of credit facilities and to maintain compliance with or to obtain appropriate amendments to covenants under various credit agreements;
- domestic and global economic conditions including such matters as embargoes or quotas;
- U.S., Mexican and other global political or security conditions including such matters as terrorism, war, civil disruption and crime;
- growth or reduction in the surface transportation industry;
- ability to maintain good relationships with third party labor providers or collective bargaining units;
- steel and specialty component price fluctuations, scrap surcharges, steel scrap prices and other commodity price fluctuations and their impact on product demand and margin;
- delay or failure of acquired businesses, assets, start-up operations, or new products or services to compete successfully;
- changes in product mix and the mix of revenue levels among reporting segments;
- labor disputes, energy shortages or operating difficulties that might disrupt operations or the flow of cargo;

production difficulties and product delivery delays as a result of, among other matters, changing technologies or non-performance of alliance partners, subcontractors or suppliers;
ability to renew or replace expiring customer contracts on satisfactory terms;
ability to obtain and execute suitable contracts for railcars held for sale;
lower than anticipated lease renewal rates, earnings on utilization based leases or residual values for leased equipment;
discovery of defects in railcars resulting in increased warranty costs or litigation;
resolution or outcome of pending or future litigation and investigations;
loss of business from, or a decline in the financial condition of, any of the principal customers that represent a significant portion of our total revenues;

- competitive factors, including introduction of competitive products, new entrants into certain of our markets, price pressures, limited customer base, and competitiveness of our manufacturing facilities and products;
- industry overcapacity and our manufacturing capacity utilization;
- decreases in carrying value of inventory, goodwill or other assets due to impairment;
- severance or other costs or charges associated with lay-offs, shutdowns, or reducing the size and scope of operations;
- changes in future maintenance or warranty requirements;
- ability to adjust to the cyclical nature of the industries in which we operate;
- changes in interest rates and financial impacts from interest rates;
- ability and cost to maintain and renew operating permits;
- actions by various regulatory agencies;
- changes in fuel and/or energy prices;
- risks associated with our intellectual property rights or those of third parties, including infringement, maintenance, protection, validity, enforcement and continued use of such rights;
- expansion of warranty and product support terms beyond those which have traditionally prevailed in the rail supply industry;
- availability of a trained work force and availability and/or price of essential raw materials, specialties or components, including steel castings, to permit manufacture of units on order;
- failure to successfully integrate acquired businesses;
- discovery of previously unknown liabilities associated with acquired businesses;
- failure of or delay in implementing and using new software or other technologies;
- ability to replace maturing lease and management services revenue and earnings with revenue and earnings from new commercial transactions, including new railcar leases, additions to the lease fleet and new management services contracts;
- credit limitations upon our ability to maintain effective hedging programs; and
- financial impacts from currency fluctuations and currency hedging activities in our worldwide operations.

Any forward-looking statements should be considered in light of these factors. Words such as anticipates, believes, forecast, potential, contemplates, expects, intends, plans, seeks, estimates, could, would, will, expressions identify forward-looking statements. These forward-looking statements are not guarantees of future performance and are subject to risks and uncertainties that could cause actual results to differ materially from the results contemplated by the forward-looking statements. Many of the important factors that will determine these results and values are beyond our ability to control or predict. You are cautioned not to put undue reliance on any forward-looking statements. Except as otherwise required by law, we do not assume any obligation to update any forward-looking statements.

All references to years refer to the fiscal years ended August 31st unless otherwise noted.

THE GREENBRIER COMPANIES, INC.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

Note 1 Interim Financial Statements

The Condensed Consolidated Financial Statements of The Greenbrier Companies, Inc. and Subsidiaries (Greenbrier or the Company) as of November 30, 2010 and for the three months ended November 30, 2010 and 2009 have been prepared without audit and reflect all adjustments (consisting of normal recurring accruals) which, in the opinion of management, are necessary for a fair presentation of the financial position and operating results and cash flows for the periods indicated. The results of operations for the three months ended November 30, 2010 are not necessarily indicative of the results to be expected for the entire year ending August 31, 2011.

Certain notes and other information have been condensed or omitted from the interim financial statements presented in this Quarterly Report on Form 10-Q. Therefore, these financial statements should be read in conjunction with the Consolidated Financial Statements contained in the Company s 2010 Annual Report on Form 10-K.

Management estimates The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires judgment on the part of management to arrive at estimates and assumptions on matters that are inherently uncertain. These estimates may affect the amount of assets, liabilities, revenue and expenses reported in the financial statements and accompanying notes and disclosure of contingent assets and liabilities within the financial statements. Estimates and assumptions are periodically evaluated and may be adjusted in future periods. Actual results could differ from those estimates.

Initial Adoption of Accounting Policies In June 2009, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 167, *Amendments to FASB Interpretation No. 46(R)* which provides guidance with respect to consolidation of variable interest entities. This statement retains the scope of Interpretation 46(R) with the addition of entities previously considered qualifying special-purpose entities, as the concept of these entities was eliminated in SFAS No. 166, *Accounting for Transfers of Financial Assets*. This statement replaces the quantitative-based risks and rewards calculation for determining the primary beneficiary of a variable interest entity. The approach focuses on identifying which enterprise has the power to direct activities that most significantly impact the entity s economic performance and the obligation to absorb the losses or receive the benefits from the entity. It is possible that application of this revised guidance will change an enterprise s assessment of involvement with variable interest entities. This statement, which has been codified within ASC 810, *Consolidations,* was effective for the Company as of September 1, 2010. The initial adoption did not have an effect on the Company s Consolidated Financial Statements.

Note 2 Inventories

(In thousands)	November 30, 2010	August 31, 2010
Manufacturing supplies and raw materials	$ 130,945	$ 119,306
Work-in-process	98,159	70,394
Lower of cost or market adjustment	(3,901)	(4,096)
	$ 225,203	$ 185,604

Note 3 Assets Held for Sale

(In thousands)	November 30, 2010	August 31, 2010
Assets held for sale	$ 51,985	$ 12,804
Railcars in transit to customer	6,307	2,451
Finished goods parts	17,398	16,571
	$ 75,690	$ 31,826

Note 4 Intangibles and other assets

Intangible assets that are determined to have finite lives are amortized over their useful lives. Intangible assets with indefinite useful lives are not amortized and are periodically evaluated for impairment.

The following table summarizes the Company s identifiable intangible assets balance:

(In thousands)	November 30, 2010	August 31, 2010
Intangible assets subject to amortization:		
Customer relationships	$ 66,825	$ 66,825
Accumulated amortization	(14,739)	(13,701)
Other intangibles	5,019	5,003
Accumulated amortization	(3,000)	(2,845)
	54,105	55,282
Intangible assets not subject to amortization	912	912
Prepaid and other assets	31,773	34,485
Total intangible and other assets	$ 86,790	$ 90,679

Intangible assets with finite lives are amortized using the straight line method over their estimated useful lives and include the following: proprietary technology, 10 years; trade names, 5 years; patents, 11 years; and long-term customer agreements, 5 to 20 years. Amortization expense for the three months ended November 30, 2010 and 2009 was $1.2 million for each period. Amortization expense for the years ending August 31, 2011, 2012, 2013, 2014 and 2015 is expected to be $4.7 million, $4.5 million, $4.4 million, $4.3 million and $4.3 million.

Note 5 Revolving Notes

All amounts originating in foreign currency have been translated at the November 30, 2010 exchange rate for the following discussion. As of November 30, 2010 senior secured credit facilities, consisting of three components, aggregated $121.2 million. As of November 30, 2010 a $100.0 million revolving line of credit secured by substantially all the Company s assets in the United States not otherwise pledged as security for term loans, maturing November 2011, was available to provide working capital and interim financing of equipment, principally for the United States and Mexican operations. Advances under this facility bear interest at variable rates that depend on the type of borrowing and the defined ratio of debt to total capitalization. Available borrowings under the credit facility are generally based on defined levels of inventory, receivables, property, plant and equipment and leased equipment,

as well as total debt to consolidated capitalization and interest coverage ratios. In addition, as of November 30, 2010, lines of credit totaling $11.2 million secured by substantially all of the Company s European assets, with various variable rates, were available for working capital needs of the European manufacturing operation. European credit facilities are continually being renewed. Currently these European credit facilities have maturities that range from April 2011 through June 2011. The Company s Mexican joint venture obtained a line of credit of up to $10.0 million secured by certain of the joint venture s accounts receivable and inventory. Advances under this facility bear interest at LIBOR plus 2.5% and are due 180 days after the date of borrowing. Currently the

8

---

outstanding borrowings have maturities that range from April 2011 to May 2011. The joint venture will be able to draw against the facility through August 2011.

As of November 30, 2010 outstanding borrowings under these facilities consists of $3.6 million in letters of credit outstanding under the North American credit facility, $3.7 million in revolving notes outstanding under the European credit facilities and $6.2 million outstanding under the joint venture credit facility.

Note 6 Accounts Payable and Accrued Liabilities

(In thousands)	November 30, 2010	August 31, 2010
Trade payables	$ 170,007	$ 141,767
Accrued payroll and related liabilities	20,595	19,025
Accrued maintenance	11,300	12,460
Accrued warranty	6,284	6,304
Other	2,155	2,082
	$ 210,341	$ 181,638

Note 7 Warranty Accruals

Warranty costs are estimated and charged to operations to cover a defined warranty period. The estimated warranty cost is based on the history of warranty claims for each particular product type. For new product types without a warranty history, preliminary estimates are based on historical information for similar product types. The warranty accruals, included in Accounts payable and accrued liabilities on the Consolidated Balance Sheets, are reviewed periodically and updated based on warranty trends and expirations of warranty periods.

Warranty accrual activity:

	Three Months Ended November 30,	
(In thousands)	2010	2009
Balance at beginning of period	$ 6,304	$ 8,184
Charged to cost of revenue	149	102
Payments	(173)	(495)
Currency translation effect	4	23
Balance at end of period	$ 6,284	$ 7,814

Note 8 Comprehensive Income (Loss)

The following is a reconciliation of net loss to comprehensive income (loss):

	Three Months Ended November 30,	
(In thousands)	2010	2009
Net loss	$ (2,052)	$ (3,361)
Reclassification of derivative financial instruments recognized in net loss during the three months (net of tax effect)	(9)	(277)
Unrealized loss on derivative financial instruments (net of tax effect)	(478)	(285)
Foreign currency translation adjustment	349	917
Comprehensive loss	(2,190)	(3,006)
Comprehensive income (loss) attributable to noncontrolling interest	(252)	117
Comprehensive loss attributable to Greenbrier	$ (2,442)	$ (2,889)

Accumulated other comprehensive income (loss), net of tax effect, consisted of the following:

(In thousands)	Unrealized Loss on Derivative Financial Instruments	Pension Plan Adjustment	Foreign Currency Translation Adjustment	Accumulated Other Comprehensive Loss
Balance, August 31, 2010	$ (2,899)	$ (188)	$ (4,117)	$ (7,204)
First quarter activity	(487)		349	(138)
Balance, November 30, 2010	$ (3,386)	$ (188)	$ (3,768)	$ (7,342)

Note 9 Loss Per Share

The shares used in the computation of the Company s basic and diluted loss per common share are reconciled as follows:

	Three Months Ended November 30,	
(In thousands)	2010	2009
Weighted average basic common shares outstanding	21,879	17,087
Dilutive effect of employee stock options [(1)]		
Dilutive effect of warrants [(1)]		
Weighted average diluted common shares outstanding	21,879	17,087

(1) Dilutive effect of common stock equivalents is excluded from per share calculations for the three months ended November 30, 2010 and 2009 due to net loss. The dilutive effect of warrants equivalent to 2.1 million and 1.6 million shares were excluded from per share calculations for the three months ended November 30, 2010 and 2009 due to net loss.

Note 10 Stock Based Compensation

All stock options were vested prior to September 1, 2005 and accordingly no compensation expense was recorded for stock options for the three months ended November 30, 2010 and 2009. There were no stock options outstanding as of November 30, 2010. The value of stock awarded under restricted stock grants is amortized as compensation expense over the vesting period, which is generally between two to five years. For the three months ended November 30, 2010 and 2009, $1.3 million and $1.4 million in compensation expense was recorded for restricted stock grants.

THE GREENBRIER COMPANIES, INC.

Note 11 Derivative Instruments

Foreign operations give rise to market risks from changes in foreign currency exchange rates. Foreign currency forward exchange contracts with established financial institutions are utilized to hedge a portion of that risk in Pound Sterling and Euro. Interest rate swap agreements are utilized to reduce the impact of changes in interest rates on certain debt. The Company s foreign currency forward exchange contracts and interest rate swap agreements are designated as cash flow hedges, and therefore the effective portion of unrealized gains and losses are recorded in accumulated other comprehensive loss.

At November 30, 2010 exchange rates, forward exchange contracts for the purchase of Polish Zloty and the sale of Euro aggregated $33.4 million. Adjusting the foreign currency exchange contracts to the fair value of the cash flow hedges at November 30, 2010 resulted in an unrealized pre-tax loss of $0.5 million that was recorded in accumulated other comprehensive loss. The fair value of the contracts is included in accounts payable and accrued liabilities when there is a loss, or accounts receivable when there is a gain, on the Consolidated Balance Sheets. As the contracts mature at various dates through December 2011, any such gain or loss remaining will be recognized in manufacturing revenue along with the related transactions. In the event that the underlying sales transaction does not occur or does not occur in the period designated at the inception of the hedge, the amount classified in accumulated other comprehensive loss would be reclassified to the current year s results of operations in Interest and foreign exchange.

At November 30, 2010, an interest rate swap agreement had a notional amount of $45.3 million and matures March 2014. The fair value of this cash flow hedge at November 30, 2010 resulted in an unrealized pre-tax loss of $4.8 million. The loss is included in accumulated other comprehensive loss and the fair value of the contract is included in accounts payable and accrued liabilities on the Consolidated Balance Sheets. As interest expense on the underlying debt is recognized, amounts corresponding to the interest rate swap are reclassified from accumulated other comprehensive loss and charged or credited to interest expense. At November 30, 2010 interest rates, approximately $1.3 million would be reclassified to interest expense in the next 12 months.

Fair Values of Derivative Instruments

	Asset Derivatives			**Liability Derivatives**		
(In thousands)	Balance sheet location	November 30, 2010 Fair Value	August 31, 2010 Fair Value	Balance sheet location	November 30, 2010 Fair Value	August 31, 2010 Fair Value

Note 12 Segment Information

Greenbrier operates in three reportable segments: Manufacturing; Wheel Services, Refurbishment & Parts and Leasing & Services. The accounting policies of the segments are described in the summary of significant accounting policies in the Consolidated Financial Statements contained in the Company s 2010 Annual Report on Form 10-K. Performance is evaluated based on margin. Intersegment sales and transfers are generally accounted for at fair value as if the sales or transfers were to third parties. While intercompany transactions are treated like third-party transactions to evaluate segment performance, the revenues and related expenses are eliminated in consolidation and therefore do not impact consolidated results.

The information in the following table is derived directly from the segments internal financial reports used for corporate management purposes.

(In thousands)	Three Months Ended November 30, 2010	2009
Revenue:		
Manufacturing	$ 126,628	$ 74,637
Wheel Services, Refurbishment & Parts	103,170	93,184
Leasing & Services	18,876	18,878
Intersegment eliminations	(47,230)	(15,006)
	$ 201,444	$ 171,693
Margin:		
Manufacturing	$ 5,693	$ 4,231
Wheel Services, Refurbishment & Parts	10,734	9,697
Leasing & Services	9,739	7,714
Segment margin total	26,166	21,642
Less unallocated expenses:		
Selling and administrative	17,938	16,208
Interest and foreign exchange	10,304	11,112
Loss before income taxes and loss from unconsolidated affiliates	$ (2,076)	$ (5,678)

Note 13 Commitments and Contingencies

Environmental studies have been conducted of the Company s owned and leased properties that indicate additional investigation and some remediation on certain properties may be necessary. The Company s Portland, Oregon manufacturing facility is located adjacent to the Willamette River. The United States Environmental Protection Agency (EPA) has classified portions of the river bed, including the portion fronting Greenbrier s facility, as a federal National Priority List or Superfund site due to sediment contamination (the Portland Harbor Site). Greenbrier and more than 130 other parties have received a General Notice of potential liability from the EPA relating to the Portland Harbor Site. The letter advised the Company that it may be liable for the costs of investigation and remediation (which liability may be joint and several with other potentially responsible parties) as well as for natural resource damages resulting from releases of hazardous substances to the site. At this time, ten private and public entities, including the Company, have signed an Administrative Order on Consent (AOC) to perform a remedial investigation/feasibility study (RI/FS) of the Portland Harbor Site under EPA oversight, and several additional entities have not signed such consent, but are nevertheless contributing money to the effort. A draft of the RI study was submitted on October 27, 2009. The Feasibility Study is being developed and is expected to be submitted in the third calendar quarter of 2011. Eighty-two parties have entered into a non-judicial mediation process to try to allocate costs associated with the Portland Harbor site. Approximately 110 additional parties have signed tolling agreements related to such allocations. On April 23, 2009, the Company and the other AOC signatories filed suit against 69 other parties due to a possible limitations period for some such claims; *Arkema Inc. et al v. A & C Foundry Products, Inc.et al,* US District Court, District of Oregon, Case #3:09-cv-453-PK. All but 12 of these parties elected to sign tolling agreements and be dismissed without prejudice, and the case has now been stayed by the court, pending completion of the RI/FS. In addition, the Company has entered into a Voluntary Clean-Up Agreement with the Oregon Department of Environmental Quality in which the Company agreed to conduct an investigation of whether, and to what extent, past or present operations at the Portland property may have released hazardous substances to the environment. The Company is also conducting groundwater remediation relating to a historical spill on the property which antedates its ownership.

Because these environmental investigations are still underway, the Company is unable to determine the amount of ultimate liability relating to these matters. Based on the results of the pending investigations and future assessments of natural resource damages, Greenbrier may be required to incur costs associated with additional phases of investigation or remedial action, and may be liable for damages to natural resources. In addition, the Company may be required to perform periodic maintenance dredging in order to continue to launch vessels from its launch ways in Portland, Oregon, on the Willamette River, and the river s classification as a Superfund site could result in some limitations on future dredging and launch activities. Any of these matters could adversely affect the Company s business and Consolidated Financial Statements, or the value of its Portland property.

From time to time, Greenbrier is involved as a defendant in litigation in the ordinary course of business, the outcome of which cannot be predicted with certainty. The most significant litigation is as follows:

Greenbrier s customer, SEB Finans AB (SEB), has raised performance concerns related to a component that the Company installed on 372 railcar units with an aggregate sales value of approximately $20.0 million produced under a contract with SEB. On December 9, 2005, SEB filed a Statement of Claim in an arbitration proceeding in Stockholm, Sweden, against Greenbrier alleging that the cars were defective and could not be used for their intended purpose. A settlement agreement was entered into effective February 28, 2007 pursuant to which the railcar units previously delivered were to be repaired and the remaining units completed and delivered to SEB. Greenbrier is proceeding with repairs of the railcars in accordance with terms of the settlement agreement, though SEB has recently made additional warranty claims, including claims with respect to cars that have been repaired pursuant to the agreement. Greenbrier is evaluating SEB s new warranty claim. Current estimates of potential costs of such repairs do not exceed amounts accrued.

When the Company acquired the assets of the Freight Wagon Division of DaimlerChrysler in January 2000, it acquired a contract to build 201 freight cars for Okombi GmbH, a subsidiary of Rail Cargo Austria AG. Subsequently, Okombi made breach of warranty and late delivery claims against the Company which grew out of design and

certification problems. All of these issues were settled as of March 2004. Additional allegations have been made, the most serious of which involve cracks to the structure of the cars. Okombi has been required to

remove all 201 freight cars from service, and a formal claim has been made against the Company. Legal, technical and commercial evaluations are on-going to determine what obligations the Company might have, if any, to remedy the alleged defects.

Management intends to vigorously defend its position in each of the open foregoing cases. While the ultimate outcome of such legal proceedings cannot be determined at this time, management believes that the resolution of these actions will not have a material adverse effect on the Company s Consolidated Financial Statements.

The Company is involved as a defendant in other litigation initiated in the ordinary course of business. While the ultimate outcome of such legal proceedings cannot be determined at this time, management believes that the resolution of these actions will not have a material adverse effect on the Company s Consolidated Financial Statements.

The Company delivered 500 railcar units during fiscal year 2009 for which the Company has an obligation to guarantee the purchaser minimum earnings. The obligation expires December 31, 2011. The maximum potential obligation totaled $13.1 million and in certain defined instances the obligation may be reduced due to early termination. Upon delivery of the railcar units, the entire purchase price was recorded as revenue and paid in full. The minimum earnings due to the purchaser were considered a reduction of revenue and were recorded as deferred revenue. The purchaser has agreed to utilize the railcars on a preferential basis, and the Company is entitled to re-market the railcar units when they are not being utilized by the purchaser during the obligation period. Any earnings generated from the railcar units will offset the obligation and be recognized as revenue and margin in future periods. As of November 30, 2010, the Company has $9.1 million of the potential obligation remaining in deferred revenue.

The Company has entered into contingent rental assistance agreements, aggregating $5.8 million, on certain railcars subject to leases that have been sold to third parties. These agreements guarantee the purchasers a minimum lease rental, subject to a maximum defined rental assistance amount, over remaining periods of up to two years. A liability is established and revenue is reduced in the period during which a determination can be made that it is probable that a rental shortfall will occur and the amount can be estimated. For the three months ended November 30, 2010 no accrual was made to cover estimated obligations as management determined no additional rental shortfall was probable. For the three months ended November 30, 2009 an accrual of $0.1 million was recorded to cover future obligations. The remaining balance of the accrued liability was $15 thousand as November 30, 2010. All of these agreements were entered into prior to December 31, 2002 and have not been modified since.

In accordance with customary business practices in Europe, the Company has $9.3 million in bank and third party performance and warranty guarantee facilities, all of which have been utilized as of November 30, 2010. To date no amounts have been drawn under these performance and warranty guarantee facilities.

At November 30, 2010, an unconsolidated affiliate had $0.2 million of third party debt, for which the Company has guaranteed 33% or approximately $70 thousand. In the event that there is a change in control or insolvency by any of the three 33% investors that have guaranteed the debt, the remaining investors share of the guarantee will increase proportionately.

As of November 30, 2010 the Company has outstanding letters of credit aggregating $3.6 million associated with facility leases and payroll.

Table of Contents

Note 14 Fair Value Measures

Certain assets and liabilities are reported at fair value on either a recurring or nonrecurring basis. Fair value, for this disclosure, is defined as an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants, under a three-tier fair value hierarchy which prioritizes the inputs used in measuring a fair value as follows:

Level 1 observable inputs such as unadjusted quoted prices in active markets for identical instruments;

Level 2 inputs, other than the quoted market prices in active markets for similar instruments, which are observable, either directly or indirectly; and

Level 3 unobservable inputs for which there is little or no market data available, which require the reporting entity to develop its own assumptions.

Assets and liabilities measured at fair value on a recurring basis as of November 30, 2010 are:

(In thousands)	Total	Level 1	Level 2[(1)]	Level 3
Assets:				
Derivative financial instruments	$ 290	$	$ 290	$
Nonqualified savings plan	6,499	6,499		
Money market investments	15,306	15,306		
	$ 22,095	$ 21,805	$ 290	$
Liabilities:				
Derivative financial instruments	$ 5,330	$	$ 5,330	$

(1) Level 2 assets include derivative financial instruments which are valued based on significant observable inputs. See note 11 Derivative Instruments for further discussion.

Assets and liabilities measured at fair value on a recurring basis as of August 31, 2010 are:

(In thousands)	Total	Level 1	Level 2	Level 3
Assets:				
Derivative financial instruments	$ 684	$	$ 684	$
Nonqualified savings plan	6,489	6,489		
Money market investments	57,300	57,300		
	$ 64,473	$ 63,789	$ 684	$
Liabilities:				
Derivative financial instruments	$ 5,370	$	$ 5,370	$

Note 15 Guarantor/Non Guarantor

The combined senior unsecured notes (the Notes) issued on May 11, 2005 and November 21, 2005 and convertible senior notes issued on May 22, 2006 are fully and unconditionally and jointly and severally guaranteed by substantially all of Greenbrier s material 100% owned United States subsidiaries: Autostack Company LLC, Greenbrier-Concarril, LLC, Greenbrier Leasing Company LLC, Greenbrier Leasing Limited Partner, LLC, Greenbrier Management Services, LLC, Greenbrier Leasing, L.P., Greenbrier Railcar LLC, Gunderson LLC, Gunderson Marine LLC, Gunderson Rail Services LLC, Meridian Rail Holding Corp., Meridian Rail Acquisition Corp., Meridian Rail Mexico City Corp., Brandon Railroad LLC, Gunderson Specialty Products, LLC and Greenbrier Railcar Leasing, Inc. No other subsidiaries guarantee the Notes including Greenbrier Leasing Limited, Greenbrier Europe B.V., Greenbrier Germany GmbH, WagonySwidnica S.A., Gunderson-Concarril, S.A. de C.V., Mexico Meridian Rail Services, S.A. de C.V., Greenbrier Railcar Services Tierra Blanca S.A. de C.V., YSD Doors, S.A. de C.V., Greenbrier-Gimsa, LLC and Gunderson-Gimsa S de RL de C.V.

The following represents the supplemental condensed consolidating financial information of Greenbrier and its guarantor and non guarantor subsidiaries, as of November 30, 2010 and August 31, 2010 and for the three months ended November 30, 2010 and 2009. The information is presented on the basis of Greenbrier accounting for its ownership of its wholly owned subsidiaries using the equity method of accounting. The equity method investment for each subsidiary is recorded by the parent in intangibles and other assets. Intercompany transactions of goods and services between the guarantor and non guarantor subsidiaries are presented as if the sales or transfers were at fair value to third parties and eliminated in consolidation. Certain reclassifications between Combined Non Guarantor Subsidiaries and Eliminations have been made to prior year s condensed consolidating statements to conform to the current year presentation.

Note 16 Subsequent Events

Subsequent to quarter end, the Company sold 3,000,000 shares of our common stock, under a shelf registration statement filed in April 2010, in an underwritten at-the-market public offering at $21.06 per share less expenses. Management has broad discretion to allocate the net proceeds of approximately $62.9 million from the offering for such purposes as working capital, capital expenditures, repayment or repurchase of a portion of our indebtedness or acquisitions of, or investment in, complementary businesses and products. Pending such uses, the Company plans to invest the net proceeds from this offering in highly liquid, investment-grade securities.

In June 2009, in connection with a secured loan that the WL Ross Group made to Greenbrier, the Company issued warrants to the WL Ross Group to acquire 3,377,903 shares of the Company s common stock at an exercise price of $6.00 per share. WLR Recovery Fund IV, L.P. (Recovery Fund) and WLR IV Parallel ESC, L.P. (Parallel Fund) own warrants to purchase 3,276,566 shares of Common Stock and Victoria McManus, a director of the Company, owns warrants to purchase 101,337 shares of Common Stock. The exercise price and the number of shares issuable upon exercise of the warrants are subject to adjustment as provided in the warrant agreement. The Company s equity offering conducted in December 2010 resulted in an automatic adjustment to the warrants to reduce the exercise price from $6.00 to approximately $5.96 and to increase the aggregate number of shares that may be purchased from 3,377,903 to approximately 3,400,000, based on the initial estimates of the Company s offering expenses.

Subsequent to quarter end the Company agreed with our joint venture partner to modify, with retroactive effect to September 1, 2010, various agreements concerning the Greenbrier-GIMSA LLC (GIMSA) joint venture. The modifications include foregoing the Company s option to increase its ownership percentage of GIMSA from fifty percent to sixty-six & two thirds percent, and GIMSA foregoing the right to share, in an equitable manner, the net benefits received from the modification of the long-term new railcar contract with General Electric Railcar Services Corporation. The Company also agreed to increase revenue based fees to each of the partners for services provided to GIMSA, and to extend the initial term of the joint venture to 2019 (after which the agreement is automatically renewed for successive three year terms unless a party elects not to renew).

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

Executive Summary

We operate in three primary business segments: Manufacturing; Wheel Services, Refurbishment & Parts and Leasing & Services. These three business segments are operationally integrated. The Manufacturing segment, operating from five facilities in the United States, Mexico and Poland, produces double-stack intermodal railcars, conventional railcars, tank cars and marine vessels. The Wheel Services, Refurbishment & Parts segment performs railcar repair, refurbishment and maintenance activities in the United States, Mexico and Canada as well as wheel, axle and bearing servicing, and production and reconditioning of a variety of parts for the railroad industry. The Leasing & Services segment owns approximately 9,000 railcars and provides management services for approximately 224,000 railcars for railroads, shippers, carriers, institutional investors and other leasing and transportation companies in North America. Management evaluates segment performance based on margins. We also produce rail castings through an unconsolidated joint venture.

The rail and marine industries are cyclical in nature. We are starting to see signs of a recovery in the freight car markets in which we operate. Demand for our marine barge products remains soft. Customer orders may be subject to cancellations and contain terms and conditions customary in the industry. Until recently, little variation has been experienced between the quantity ordered and the quantity actually delivered. Economic conditions have caused some customers to seek to renegotiate, delay or cancel orders. Our railcar and marine backlogs are not necessarily indicative of future results of operations.

Multi-year supply agreements are a part of rail industry practice. Our total manufacturing backlog of railcars as of November 30, 2010 was approximately 8,100 units with an estimated value of $580 million compared to 4,900 units valued at $430 million as of November 30, 2009. A portion of the orders included in backlog reflects an assumed product mix. Under terms of the orders, the exact mix will be determined in the future which may impact the dollar amount of backlog. Subsequent to quarter end we received new railcar orders for 1,900 units with an aggregate value of approximately $130 million.

Marine backlog as of November 30, 2010 was approximately $10.0 million compared to $96.0 million as of November 30, 2009.

Prices for steel, a primary component of railcars and barges, and related surcharges have fluctuated significantly and remain volatile. In addition, the price of certain railcar components, which are a product of steel, are affected by steel price fluctuations. New railcar and marine backlog generally either includes fixed price contracts which anticipate material price increases and surcharges, or contracts that contain actual or formulaic pass through of material price increases and surcharges. We are aggressively working to mitigate these exposures. The Company s integrated business model has helped offset some of the effects of fluctuating steel and scrap steel prices, as a portion of our business segments benefit from rising steel scrap prices while other segments benefit from lower steel and scrap steel prices through enhanced margins.

In April 2010, we filed a registration statement on Form S-3 with the SEC, using a shelf registration process. The registration statement was declared effective on April 14, 2010 and pursuant to the prospectus filed as part of the registration statement, we may sell from time to time any combination of securities in one or more offerings up to an aggregate amount of $300.0 million. The securities described in the prospectus include common stock, preferred stock, debt securities, guarantees, rights, and units. We may also offer common stock or preferred stock upon conversion of debt securities, common stock upon conversion of preferred stock, or common stock, preferred stock or debt securities upon the exercise of warrants or rights. Each time we sell securities under the shelf, we will provide a prospectus supplement that will contain specific information about the terms of the securities being offered and of the offering. Proceeds from the sale of these securities may be used for general corporate purposes including, among other things, working capital, financings, possible acquisitions, the repayment of obligations that have matured, and reducing or refinancing indebtedness that may be outstanding at the time of any offering. In May 2010, we issued 4,500,000 shares of our common stock resulting in net proceeds of $52.7 million.

Subsequent to quarter end, we sold 3,000,000 shares of our common stock under the shelf registration statement in an underwritten at-the-market public offering at $21.06 per share, less expenses. We have broad discretion to

24

allocate the net proceeds of approximately $62.9 million from the offering for such purposes as working capital, capital expenditures, repayment or repurchase of a portion of our indebtedness or acquisitions of, or investment in, complementary businesses and products. Pending such uses, we plan to invest the net proceeds from this offering in highly liquid, investment-grade securities.

In June 2009, in connection with a secured loan that the WL Ross Group made to us, we issued warrants to the WL Ross Group to acquire 3,377,903 shares of our common stock at an exercise price of $6.00 per share. WLR Recovery Fund IV, L.P. (Recovery Fund) and WLR IV Parallel ESC, L.P. (Parallel Fund) own warrants to purchase 3,276,566 shares of Common Stock and Victoria McManus, a director of the Company, owns warrants to purchase 101,337 shares of Common Stock. The exercise price and the number of shares issuable upon exercise of the warrants are subject to adjustment as provided in the warrant agreement. Our equity offering conducted in December 2010 resulted in an automatic adjustment to the warrants to reduce the exercise price from $6.00 to approximately $5.96 and to increase the aggregate number of shares that may be purchased from 3,377,903 to approximately 3,400,000, based on initial estimates of our offering expenses.

Subsequent to quarter end we agreed with our joint venture partner to modify, with retroactive effect to September 1, 2010, various agreements concerning the Greenbrier-GIMSA LLC (GIMSA) joint venture. The modifications include foregoing our option to increase our ownership percentage of GIMSA from fifty percent to sixty-six & two thirds percent, and GIMSA foregoing the right to share, in an equitable manner, the net benefits received from the modification of the long-term new railcar contract with General Electric Railcar Services Corporation. We also agreed to increase revenue based fees to each of the partners for services provided to GIMSA, and to extend the initial term of the joint venture to 2019 (after which the agreement is automatically renewed for successive three year terms unless a party elects not to renew).

Critical Accounting Policies

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires judgment on the part of management to arrive at estimates and assumptions on matters that are inherently uncertain. These estimates may affect the amount of assets, liabilities, revenue and expenses reported in the financial statements and accompanying notes and disclosure of contingent assets and liabilities within the financial statements. Estimates and assumptions are periodically evaluated and may be adjusted in future periods. Actual results could differ from those estimates.

Income taxes For financial reporting purposes, income tax expense is estimated based on planned tax return filings. The amounts anticipated to be reported in those filings may change between the time the financial statements are prepared and the time the tax returns are filed. Further, because tax filings are subject to review by taxing authorities, there is also the risk that a position taken in preparation of a tax return may be challenged by a taxing authority. If the taxing authority is successful in asserting a position different than that taken by us, differences in tax expense or between current and deferred tax items may arise in future periods. Such differences, which could have a material impact on our financial statements, would be reflected in the financial statements when management considers them probable of occurring and the amount reasonably estimable. Valuation allowances reduce deferred tax assets to an amount that will more likely than not be realized. Our estimates of the realization of deferred tax assets is based on the information available at the time the financial statements are prepared and may include estimates of future income and other assumptions that are inherently uncertain.

Maintenance obligations We are responsible for maintenance on a portion of the managed and owned lease fleet under the terms of maintenance obligations defined in the underlying lease or management agreement. The estimated maintenance liability is based on maintenance histories for each type and age of railcar. These estimates involve judgment as to the future costs of repairs and the types and timing of repairs required over the lease term. As we cannot predict with certainty the prices, timing and volume of maintenance needed in the future on railcars under long-term leases, this estimate is uncertain and could be materially different from maintenance requirements. The liability is periodically reviewed and updated based on maintenance trends and known future repair or refurbishment requirements. These adjustments could be material due to the inherent uncertainty in predicting future maintenance requirements.

Warranty accruals Warranty costs to cover a defined warranty period are estimated and charged to operations. The estimated warranty cost is based on historical warranty claims for each particular product type. For new product types without a warranty history, preliminary estimates are based on historical information for similar product types. These estimates are inherently uncertain as they are based on historical data for existing products and judgment for new products. If warranty claims are made in the current period for issues that have not historically been the subject of warranty claims and were not taken into consideration in establishing the accrual or if claims for issues already considered in establishing the accrual exceed expectations, warranty expense may exceed the accrual for that particular product. Conversely, there is the possibility that claims may be lower than estimates. The warranty accrual is periodically reviewed and updated based on warranty trends. However, as we cannot predict future claims, the potential exists for the difference in any one reporting period to be material.

Revenue recognition Revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred or services have been rendered, the price is fixed or determinable and collectibility is reasonably assured. Railcars are generally manufactured, repaired or refurbished and wheel services and parts produced under firm orders from third parties. Revenue is recognized when these products are completed, accepted by an unaffiliated customer and contractual contingencies removed. Direct finance lease revenue is recognized over the lease term in a manner that produces a constant rate of return on the net investment in the lease. Operating lease revenue is recognized as earned under the lease terms. Certain leases are operated under car hire arrangements whereby revenue is earned based on utilization, car hire rates and terms specified in the lease agreement. Car hire revenue is reported from a third party source two months in arrears; however, such revenue is accrued in the month earned based on estimates of use from historical activity and is adjusted to actual as reported. These estimates are inherently uncertain as they involve judgment as to the estimated use of each railcar. Adjustments to actual have historically not been significant.

Revenues from construction of marine barges are either recognized on the percentage of completion method during the construction period or on the completed contract method based on the terms of the contract. Under the percentage of completion method, judgment is used to determine a definitive threshold against which progress towards completion can be measured to determine timing of revenue recognition.

Impairment of long-lived assets When changes in circumstances indicate the carrying amount of certain long-lived assets may not be recoverable, the assets are evaluated for impairment. If the forecast undiscounted future cash flows are less than the carrying amount of the assets, an impairment charge to reduce the carrying value of the assets to fair value is recognized in the current period. These estimates are based on the best information available at the time of the impairment and could be materially different if circumstances change. Forecasted undiscounted future cash flows exceeded the carrying amount of the assets indicating that the assets were not impaired.

Goodwill and acquired intangible assets The Company periodically acquires businesses in purchase transactions in which the allocation of the purchase price may result in the recognition of goodwill and other intangible assets. The determination of the value of such intangible assets requires management to make estimates and assumptions. These estimates affect the amount of future period amortization and possible impairment charges.

We perform a goodwill impairment test annually during the third quarter. Goodwill is also tested more frequently if changes in circumstances or the occurrence of events indicates that a potential impairment exists. The provisions of ASC 350, *Intangibles Goodwill and Other*, require that we perform a two-step impairment test on goodwill. In the first step, we compare the fair value of each reporting unit with its carrying value. We determine the fair value of our reporting units based on a weighting of income and market approaches. Under the income approach, we calculate the fair value of a reporting unit based on the present value of estimated future cash flows. Under the market approach, we estimate the fair value based on observed market multiples for comparable businesses. The second step of the goodwill impairment test is required only in situations where the carrying value of the reporting unit exceeds its fair value as determined in the first step. In the second step we would compare the implied fair value of goodwill to its carrying value. The implied fair value of goodwill is determined by allocating the fair value of a reporting unit to all of the assets and liabilities of that unit as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the price paid to acquire the reporting unit. The excess of the fair value of a reporting unit over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. An impairment loss is

recorded to the extent that the carrying amount of the reporting unit goodwill

26

---

exceeds the implied fair value of that goodwill. The goodwill balance as of November 30, 2010 of $137.1 million relates to the Wheel Services, Refurbishment & Parts segment.

Loss contingencies On certain railcar contracts the total cost to produce the railcar may exceed the actual fixed or determinable contractual sale price of the railcar. When the anticipated loss on production of railcars in backlog is both probable and estimable the Company will accrue a loss contingency. These estimates are based on the best information available at the time of the accrual and may be adjusted at a later date to reflect actual costs.

Results of Operations

Three Months Ended November 30, 2010 Compared to Three Months Ended November 30, 2009

Overview

Total revenue for the three months ended November 30, 2010 was $201.4 million, an increase of $29.7 million from revenues of $171.7 million in the prior comparable period. Net loss attributable to Greenbrier for the three months ended November 30, 2010 was $2.3 million or $0.11 per diluted common share compared to net loss attributable to Greenbrier of $3.2 million or $0.19 per diluted common share for the three months ended November 30, 2009.

Manufacturing Segment

Manufacturing revenue includes results from new railcar and marine production. New railcar delivery and backlog information includes all facilities.

Manufacturing revenue for the three months ended November 30, 2010 was $85.4 million compared to $60.1 million in the corresponding prior period, an increase of $25.3 million. Railcar deliveries, which are the primary source of manufacturing revenue, were approximately 1,050 units in the current period compared to approximately 350 units in the prior comparable period. The increase in revenue was primarily due to higher railcar deliveries, somewhat offset by a decline in marine barge production and a change in product mix with lower per unit sales prices.

Manufacturing margin as a percentage of revenue for the three months ended November 30, 2010 was 6.7% compared to a margin of 7.0% for the three months ended November 30, 2009. The slight decrease was primarily the result of reduction in marine production and inefficiencies associated with the ramping up of production at certain of our facilities that were idled in the previous year. This was partially offset by a more favorable product mix and improved production efficiencies at our Mexican joint venture.

Wheel Services, Refurbishment & Parts Segment

Wheel Services, Refurbishment & Parts revenue was $97.1 million for the three months ended November 30, 2010 compared to revenue of $93.0 million in the prior comparable period. The increase of $4.1 million was primarily due to higher sales volumes due to an increase in maintenance and repair work. Also during the quarter a gain of $1.9 million was recorded on insurance proceeds related to the January 2009 fire at one of our facilities. These higher revenues were partially offset by reduced volume demand for wheel services. Scrap volumes also declined from the previous comparable period, but were partially offset by improved scrap metal pricing.

Wheel Services, Refurbishment & Parts margin as a percentage of revenue was 11.0% for the three months ended November 30, 2010 compared to 10.4% for the three months ended November 30, 2009. The increase was primarily the result of improved efficiencies and cost structure at our repair facilities due to the higher volumes of workflow, the gain from the insurance proceeds which has no associated cost of revenues and favorable scrap metal pricing. These factors were partially offset by lower wheelset volumes and a change in product mix.

Leasing & Services Segment

Leasing & Services revenue was $18.9 million for the three months ended November 30, 2010 compared to $18.6 million for the three months ended November 30, 2009. The increase was primarily a result of increased management services revenues and rents earned on assets held for sale. These factors were partially offset by reduced rental rates on certain lease renewals and lower gains on sale of assets from the lease fleet.

Pre-tax gains on sale of $0.6 million were realized on the disposition of leased equipment, compared to $0.9 million in the prior comparable period. Assets from Greenbrier s lease fleet are periodically sold in the normal course of business in order to take advantage of market conditions, manage risk and maintain liquidity.

Leasing & Services margin as a percentage of revenue was 51.6% and 41.4% for the three-month periods ended November 30, 2010 and 2009. The increase was primarily a result of increased rents earned on assets held for sale which have no associated cost of revenue, maintenance reserve adjustments and improved lease fleet margins as a result of lower operating costs. These were partially offset by lower gains on sales of assets from the lease fleet.

The percentage of owned units on lease as of November 30, 2010 was 96.7% compared to 91.3% at November 30, 2009.

Other Costs

Selling and administrative expense was $17.9 million for the three months ended November 30, 2010 compared to $16.2 million for the comparable prior period, an increase of $1.7 million. The increase was primarily due to employee related costs, consulting activities, revenue based fees paid to our joint venture partners in Mexico due to higher activity levels and a contractual increase in fee percentages for services provided, computer maintenance and depreciation. These increases were partially offset by lower legal expenses and the reversal of certain reserves in the prior year.

Interest and foreign exchange expense was $10.3 million for the three months ended November 30, 2010, compared to $11.1 million in the prior comparable period.

	Three Months Ended November 30,		Increase
(In thousands)	2010	2009	(decrease)
Interest and foreign exchange:			
Interest and other expense	$ 8,599	$ 8,808	$ (209)
Accretion of term loan debt discount	1,069	1,118	(49)
Accretion of convertible debt discount	729	998	(269)
Foreign exchange gain (loss)	(93)	188	(281)
	$ 10,304	$ 11,112	$ (808)

Interest and other expense decreased due to lower debt levels and favorable interest rates on our variable debt. The decrease in the accretion of the convertible debt discounts was due to the proportionate write-off of the debt discount in the previous year associated with the partial retirement of the convertible senior notes.

Income Tax

The tax rate for the three months ended November 30, 2010 was 29.4% as compared to 44.0% in the prior comparable period. The provision for income taxes is based on projected consolidated results of operations and geographical mix of earnings for the entire year which resulted in an estimated 29.4% annual effective tax rate on pre-tax results for fiscal year 2011. The effective tax rate fluctuates from year to year due to the geographical mix of pre-tax earnings and losses, minimum tax requirements in certain local jurisdictions and operating results for certain operations with no related tax effect. Relatively large changes in tax rates are the result of relatively small pre-tax operating profits and losses in comparison to the amount of taxes recorded.

Loss from Unconsolidated Affiliates

Losses from unconsolidated affiliates were $0.6 million for the three months ended November 30, 2010 and $0.2 million for the three months ended November 30, 2009. Losses for the three months ended November 30, 2010 include losses from our castings joint venture and from WLR Greenbrier Rail Inc. The prior year comparable period consisted entirely of results from our castings joint venture.

Noncontrolling Interest

Noncontrolling interest primarily represents our joint venture partner s share in the earnings (losses) of our Mexican railcar manufacturing joint venture that began production in fiscal year 2007.

Liquidity and Capital Resources

We have been financed through cash generated from operations, borrowings and issuance of stock. During the quarter ended November 30, 2010, cash and cash equivalents decreased $49.7 million to $49.2 million from $98.9 million at August 31, 2010. Subsequent to quarter end, we received approximately $62.9 million in net proceeds from the sale of 3,000,000 shares of our common stock.

Cash used in operations was $47.4 million for the three months ended November 30, 2010 compared to cash provided by operations for the three months ended November 30, 2009 of $5.1 million. The decrease was primarily due to a change in working capital needs as we ramp up production levels.

Cash used in investing activities, primarily for capital expenditures, was $7.8 million for the three months ended November 30, 2010 compared to $11.9 million in the prior comparable period.

Capital expenditures totaled $11.5 million and $11.9 million for the three months ended November 30, 2010 and 2009. Of these capital expenditures, approximately $1.4 million and $8.4 million were attributable to Leasing & Services operations. Leasing & Services capital expenditures for 2011, net of proceeds from sales of equipment, are expected to be approximately $40.0 million. We regularly sell assets from our lease fleet, some of which may have been purchased within the current year and included in capital expenditures. Proceeds from sales of equipment were $4.1 million and $2.7 million for the three months ended November 30, 2010 and 2009.

Approximately $5.8 million and $0.6 million of capital expenditures for the three months ended November 30, 2010 and 2009 were attributable to Manufacturing operations. Capital expenditures for Manufacturing operations are expected to be approximately $19.0 million in 2011 and primarily relate to enhancements to existing manufacturing facilities and ERP implementation.

Wheel Services, Refurbishment & Parts capital expenditures for the three months ended November 30, 2010 and 2009 were $4.3 million and $2.9 million and are expected to be approximately $28.0 million in 2011 for the opening of a new wheel services facility to replace one previously destroyed by fire, maintenance and improvement of existing facilities and information systems implementation.

Cash provided by financing activities was $6.0 million for the three months ended November 30, 2010 compared to cash used in financing activities of $3.4 million for the three months ended November 30, 2009. During the three months ended November 30, 2010 we received $7.2 million in net proceeds from revolving notes borrowings and repaid $1.2 million in term debt. During the three months ended November 30, 2009 we repaid $3.9 million in net revolving credit lines and $1.2 million in term debt. This was partially offset by $1.7 million received in net proceeds from a new term loan borrowing.

All amounts originating in foreign currency have been translated at the November 30, 2010 exchange rate for the following discussion. As of November 30, 2010 senior secured credit facilities, consisting of three components, aggregated $121.2 million. A $100.0 million revolving line of credit, maturing November 2011, is secured by substantially all of our assets in the United States not otherwise pledged as security for term loans. The facility is available to provide working capital and interim financing of equipment, principally for the United States and Mexican operations. Advances under this revolving credit facility bear interest at variable rates that depend on the

type of borrowing and the defined ratio of debt to total capitalization. In addition, current lines of credit totaling $11.2 million secured by substantially all of our European assets, with various variable rates, are available for working capital needs of the European manufacturing operation. European credit facilities are continually being renewed. Currently these European credit facilities have maturities that range from April 2011 through June 2011. The Mexican joint venture line of credit for up to $10.0 million is secured by certain of the joint venture s accounts receivable and inventory. Advances under this facility bear interest at LIBOR plus 2.5% and are due 180 days after the date of borrowing. Currently the Mexican joint venture can borrow on this facility through August 2011. As of November 30, 2010 outstanding borrowings under our facilities consists of $3.6 million in letters of credit outstanding under the North American credit facility, $3.7 million in revolving notes outstanding under the European credit facilities and $6.2 million outstanding under the joint venture credit facility.

The revolving and operating lines of credit, along with notes payable, contain covenants with respect to the Company and various subsidiaries, the most restrictive of which, among other things, limit the ability to: incur additional indebtedness or guarantees; pay dividends or repurchase stock; enter into sale leaseback transactions; create liens; sell assets; engage in transactions with affiliates, including joint ventures and non U.S. subsidiaries, including but not limited to loans, advances, equity investments and guarantees; enter into mergers, consolidations or sales of substantially all the Company s assets; and enter into new lines of business. The covenants also require certain maximum ratios of debt to total capitalization and minimum levels of fixed charges (interest plus rent) coverage.

Available borrowings under our credit facilities are generally based on defined levels of inventory, receivables, property, plant and equipment and leased equipment, as well as total debt to consolidated capitalization and interest coverage ratios which, as of November 30, 2010 would allow for maximum additional borrowing of $123.9 million. The Company has an aggregate of $107.7 million available to draw down under the committed credit facilities as of November 30, 2010. This amount consists of $96.4 million available on the North American credit facility, $7.5 million on the European credit facilities and $3.8 million on the Mexican joint venture credit facility.

As of November 30, 2010, we had outstanding notes payable in an aggregate amount of approximately $500 million with maturities ranging from 2012 to 2015. For more information regarding our notes payable, see Note 16, Notes Payable, to our Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended August 31, 2010.

We may from time to time seek to repurchase or otherwise retire or exchange securities, including outstanding borrowings and equity securities, and take other steps to reduce our debt or otherwise improve our balance sheet. These actions may include open market repurchases, unsolicited or solicited privately negotiated transactions or other retirements, repurchases or exchanges. Such repurchases or exchanges, if any, will depend on a number of factors, including, but not limited to, prevailing market conditions, trading levels of our debt, our liquidity requirements and contractual restrictions, if applicable.

We have operations in Mexico and Poland that conduct business in their local currencies as well as other regional currencies. To mitigate the exposure to transactions denominated in currencies other than the functional currency of each entity, we enter into foreign currency forward exchange contracts to protect the margin on a portion of forecast foreign currency sales.

Foreign operations give rise to risks from changes in foreign currency exchange rates. We utilize foreign currency forward exchange contracts with established financial institutions to hedge a portion of that risk. No provision has been made for credit loss due to counterparty non-performance.

In addition to the third party financing, Greenbrier has provided financing for a portion of the working capital needs of our Mexican joint venture through a secured, interest bearing loan. The balance of the loan was $19.0 million as of November 30, 2010.

In accordance with customary business practices in Europe, we have $9.3 million in bank and third party performance and warranty guarantee facilities, all of which have been utilized as of November 30, 2010. To date no amounts have been drawn under these performance and warranty guarantees.

We have $0.5 million in long-term advances to an unconsolidated affiliate which are secured by accounts receivable and inventory. As of November 30, 2010, this same unconsolidated affiliate had $0.2 million in third party debt for which we have guaranteed 33% or approximately $70 thousand. The facility has been idled and expects to restart production when demand returns. We, along with our partners, have made an additional equity investment during the first quarter of 2011, of which our share was $0.2 million. Additional investments may be required.

We expect existing funds and cash generated from operations, together with proceeds from financing activities including borrowings under existing credit facilities and long-term financings, to be sufficient to fund working capital needs, planned capital expenditures and expected debt repayments for the foreseeable future.

Off Balance Sheet Arrangements

We do not currently have off balance sheet arrangements that have or are likely to have a material current or future effect on our Consolidated Financial Statements.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign Currency Exchange Risk

We have operations in Mexico, Germany and Poland that conduct business in their local currencies as well as other regional currencies. To mitigate the exposure to transactions denominated in currencies other than the functional currency of each entity, we enter into foreign currency forward exchange contracts to protect the margin on a portion of forecast foreign currency sales. At November 30, 2010, $33.4 million of forecast sales in Europe were hedged by foreign exchange contracts. Because of the variety of currencies in which purchases and sales are transacted and the interaction between currency rates, it is not possible to predict the impact a movement in a single foreign currency exchange rate would have on future operating results. We believe the exposure to foreign exchange risk is not material.

In addition to exposure to transaction gains or losses, we are also exposed to foreign currency exchange risk related to the net asset position of our foreign subsidiaries. At November 30, 2010, net assets of foreign subsidiaries aggregated $24.9 million and a 10% strengthening of the United States dollar relative to the foreign currencies would result in a decrease in equity of $2.5 million, 0.9% of total equity Greenbrier. This calculation assumes that each exchange rate would change in the same direction relative to the United States dollar.

Interest Rate Risk

We have managed a portion of our variable rate debt with interest rate swap agreements, effectively converting $45.3 million of variable rate debt to fixed rate debt. As a result, we are exposed to interest rate risk relating to our revolving debt and a portion of term debt, which are at variable rates. At November 30, 2010, 66% of our outstanding debt has fixed rates and 34% has variable rates. At November 30, 2010, a uniform 10% increase in interest rates would result in approximately $0.4 million of additional annual interest expense.

Item 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management has evaluated, under the supervision and with the participation of our President and Chief Executive Officer and our Chief Financial Officer, the effectiveness of the Company s disclosure controls and procedures as of the end of the period covered by this report pursuant to Rule 13a-15(b) under the Securities Exchange Act of 1934 (the Exchange Act). Based on that evaluation, our President and Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective in ensuring that information required to be disclosed in our Exchange Act reports is (1) recorded, processed, summarized and reported in a timely manner, and (2) accumulated and communicated to our management, including our President and Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Controls over Financial Reporting

There have been no changes in our internal control over financial reporting that occurred during the quarter ended November 30, 2010 that have materially affected, or are reasonably likely to materially affect, the Company s internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

There is hereby incorporated by reference the information disclosed in Note 13 to Consolidated Financial Statements, Part I of this quarterly report.

Item 1a. Risk Factors

This 10-Q should be read in conjunction with the risk factors and information disclosed in our Annual Report on Form 10-K for the year ended August 31, 2010. Except for the changes listed below, there have been no other material changes in our risk factors described in our Annual Report on Form 10-K for the year ended August 31, 2010.

Our Level of Indebtedness and the Terms of our Indebtedness Could Adversely Affect our Business, Financial Condition and Liquidity.

We have a high level of indebtedness, a portion of which has variable interest rates. Our level of indebtedness, and the terms of our indebtedness could adversely affect our business, financial condition and liquidity. Although we intend to refinance our debt on or before maturity, there can be no assurance that we will be successful, or if we are able to refinance, that we will be able to do so at favorable rates and terms. If we are unable to successfully refinance our debt, we may have inadequate liquidity to fund our ongoing cash needs. In addition, our high level of indebtedness and financial covenants limit our ability to borrow additional amounts of money for working capital, capital expenditures or other purposes. We must dedicate a substantial portion of these funds to service debt, limiting our ability to use operating cash flow in other areas of our business. The limitations of our financial covenants, among other things, limit our ability to incur additional indebtedness or guarantees, pay dividends or repurchase stock, enter into sale leaseback transactions, create liens, sell assets, engage in transactions with affiliates, joint ventures and foreign subsidiaries, and engage in other transactions, including but not limited to loans, advances, equity investments and guarantees, enter into mergers, consolidations or sales of substantially all of its assets, and enter into new lines of business. The high amount of debt increases our vulnerability to general adverse economic and industry conditions and could limit our ability to take advantage of business opportunities and react to competitive pressures.

During Economic Downturns or in a Rising Interest Rate Environment, the Cyclical Nature of Our Business Results in Lower Demand for our Products and Reduced Revenue.

Our business is cyclical. Overall economic conditions and the purchasing practices of buyers have a significant effect upon our railcar repair, refurbishment and component parts, marine manufacturing, railcar manufacturing and leasing and fleet management services businesses due to the impact on demand for new, refurbished, used and leased products. As a result, during downturns, we could operate with a lower level of backlog and may temporarily slow down or halt production at some or all of our facilities. Economic conditions that result in higher interest rates increase the cost of new leasing arrangements, which could cause some of our leasing customers to lease fewer of our railcars or demand shorter lease terms. An economic downturn or increase in interest rates may reduce demand for our products, resulting in lower sales volumes, lower prices, lower lease utilization rates and decreased profits.

Our Backlog is Not Necessarily Indicative of the Level of Our Future Revenues.

Our manufacturing backlog represents future production for which we have written orders from our customers in various periods, and estimated potential revenue attributable to those orders. Some of this backlog is subject to our fulfillment of certain competitive conditions. Our reported backlog may not be converted to revenue in any particular period and some of our contracts permit cancellations without financial penalties or with limited compensation that would not replace lost revenue or margins. Actual revenue from such contracts may not equal our backlog revenues, and therefore, our backlog is not necessarily indicative of the level of our future revenues.

Railcar deliveries, which are the primary source of our manufacturing revenue, were approximately 2,500 units in the fiscal year ended August 31, 2010. We derive a significant amount of our revenue from a limited number of customers, the loss of or reduction of business from one or more of which could have an adverse effect on our business. A significant portion of our revenue and backlog is generated from a few major customers. We cannot be assured that our customers will continue to use our products or services or that they will continue to do so at historical levels. A reduction in the purchase or leasing of our products or a termination of our services by one or more of our major customers could have an adverse effect on our business and operating results.

We Face Aggressive Competition by a Concentrated Group of Competitors.

We face aggressive competition by a concentrated group of competitors in all geographic markets and in each industry sector in which we operate and a number of factors may influence our performance, including without limitation: fluctuations in the demand for newly manufactured railcars or marine barges; fluctuations in demand for wheel services, refurbishment and parts; our ability to adjust to the cyclical nature of the industries in which we operate; delays in receipt of orders, risks that contracts may be canceled during their term or not renewed and that customers may not purchase the amount of products or services under the contracts as anticipated; domestic and global economic conditions including such matters as embargoes or quotas; growth or reduction in the surface transportation industry; steel and specialty component price fluctuations, scrap surcharges, steel scrap prices and other commodity price fluctuations and their impact on product demand and margin; loss of business from, or a decline in the financial condition of, any of the principal customers that represent a significant portion of our total revenues; competitive factors, including introduction of competitive products, new entrants into certain of our markets, price pressures, limited customer base and competitiveness of our manufacturing facilities and products; industry overcapacity and our manufacturing capacity utilization; and other risks, uncertainties and factors identified in our Annual Report on Form 10-K for the fiscal year ended August 31, 2010.

Item 6. Exhibits

(a) List of Exhibits:

31.1 Certification pursuant to Rule 13 (a) 14 (a)

31.2 Certification pursuant to Rule 13 (a) 14 (a)

32.1 Certification pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

32.2 Certification pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
