COMMISSION FILE NUMBER 1-7521
FRIEDMAN INDUSTRIES, INCORPORATED
(Exact name of registrant as specified in its charter)**

TEXAS 74-1504405
(State or other jurisdiction of (I.R.S. Employer Identification
incorporation or organization) Number)
4001 HOMESTEAD ROAD, HOUSTON, TEXAS 77028-5585
(Address of principal executive office) (zip code)

Registrant's telephone number, including area code (713) 672-9433

Former name, former address and former fiscal year, if changed since last report

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☐ No ○

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes ☐ No ○

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ○ Accelerated filer ○ Non-accelerated filer ○ Smaller reporting company ☐
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes ○ No ☐

At June 30, 2011, the number of shares outstanding of the issuer's only class of stock was 6,799,444 shares of Common Stock.

FRIEDMAN INDUSTRIES, INCORPORATED
CONDENSED NOTES TO QUARTERLY REPORT UNAUDITED

NOTE A BASIS OF PRESENTATION

The accompanying unaudited, condensed consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. For further information, refer to the consolidated financial statements and footnotes included in the Company's annual report on Form 10-K for the year ended March 31, 2011.

NOTE B INVENTORIES

Inventories consist of prime coil, non-standard coil and tubular materials. Prime coil inventory consists primarily of raw materials, non-standard coil inventory consists primarily of finished goods and tubular inventory consists of both raw materials and finished goods. Inventories are valued at the lower of cost or replacement market. Cost for prime coil inventory is determined under the last-in, first-out (LIFO) method. Cost for non-standard coil inventory is determined using the specific identification method. Cost for tubular inventory is determined using the weighted average method.

During the quarter ended June 30, 2011, LIFO inventories were reduced but are expected to be replaced by March 31, 2012. During the quarter ended June 30, 2010, LIFO inventories were reduced and were partially replaced by March 31, 2011. Deferred credits of \$82,653 and \$94,064 were recorded at June 30, 2011 and June 30, 2010, respectively, to reflect replacement cost in excess of LIFO cost.

A summary of inventory values by product group follows:

	June 30, 2011	March 31, 2011
Prime Coil Inventory	\$ 6,855,072	\$ 7,239,465
Non-Standard Coil Inventory	1,072,322	1,722,224
Tubular Raw Material	3,796,469	6,086,291
Tubular Finished Goods	17,891,570	19,631,290
	\$ 29,615,433	\$ 34,679,270

Table of Contents

NOTE C SEGMENT INFORMATION (in thousands)

	THREE MONTHS ENDED JUNE 30,	
	2011	2010
Net sales		
Coil	\$ 15,430	\$ 12,097
Tubular	23,505	17,125
Total net sales	\$ 38,935	\$ 29,222
Operating profit (loss)		
Coil	\$ (329)	\$ (324)
Tubular	3,916	3,245
Total operating profit	3,587	2,921
Corporate expenses	850	758
Interest & other income	(18)	(14)
Earnings before income taxes	\$ 2,755	\$ 2,177
	June 30,	March 31,
	2011	2011
Segment assets		
Coil	\$ 22,371	\$ 25,150
Tubular	32,592	36,334
Corporate assets	54,963	61,484
	17,936	8,100
	\$ 72,899	\$ 69,584

Corporate expenses reflect general and administrative expenses not directly associated with segment operations and consist primarily of corporate executive and accounting salaries, professional fees and services, bad debts, profit sharing expense, corporate insurance expenses and office supplies. Corporate assets consist primarily of cash and cash equivalents and the cash value of officers' life insurance.

NOTE D SUPPLEMENTAL CASH FLOW INFORMATION

The Company paid income taxes of approximately \$398,000 and \$253,000 in the quarters ended June 30, 2011 and 2010, respectively. No interest was paid in the quarters ended June 30, 2011 and 2010, respectively. For the three months ended June 30, 2011 and June 30, 2010, noncash financing activities consisted of accrued dividends of \$883,927 and \$271,978, respectively.

NOTE E SUBSEQUENT EVENTS

ASC Topic 855, Subsequent Events (ASC 855) establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before the financial statements are issued or are available to be issued. ASC 855 provides guidance on the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements and the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. The Company adopted ASC 855 during the quarter ended June 30, 2009, and its application had no impact on the Company's consolidated condensed financial statements. The Company evaluated subsequent events through the date of this filing.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**
Results of Operations*Three Months Ended June 30, 2011 Compared to Three Months Ended June 30, 2010*

During the three months ended June 30, 2011, sales, costs of goods sold and gross profit increased \$9,713,224, \$8,994,337 and \$718,887, respectively, from the comparable amounts recorded during the three months ended June 30, 2010. The increase in sales was related to an increase in tons sold which increased from approximately 39,000 tons in the 2010 quarter to approximately 46,000 tons in the 2011 quarter. Also, the average per ton selling price increased from approximately \$750 per ton in the 2010 quarter to \$854 per ton in the 2011 quarter. The increase in costs of goods sold was related to the increase in tons sold and an increase in average per ton cost which increased from approximately \$662 per ton in the 2010 quarter to \$763 in the 2011 quarter. Gross profit primarily benefited from the sales increase. The increase in gross profit was related primarily to the Company's tubular product segment. Gross profit as a percentage of sales declined from approximately 11.8% in the 2010 quarter to approximately 10.7% in the 2011 quarter. In the 2011 quarter, the market value of our products declined and had the effect of reducing margins earned on sales. Management believes this decline was related to a lack of demand caused by the sluggish U.S. economy.

Coil product segment sales increased approximately \$3,333,000 during the 2011 quarter. This increase was related primarily to an increase in the average selling price which increased from approximately \$738 in the 2010 quarter to \$897 in the 2011 quarter. Coil tons shipped increased from approximately 16,000 tons in the 2010 quarter to approximately 17,000 tons in the 2011 quarter. Coil segment operations reflected an operational loss of approximately \$324,000 and \$329,000 in the 2010 and 2011 quarters, respectively. These operations were adversely impacted in both the 2010 quarter and the 2011 quarter by soft demand. Management believes that market conditions for coil products, which are related to durable goods, will not improve until the U.S. economy improves and generates a significant improvement in the demand for durable goods.

In August 2008, the Company began operating its coil facility in Decatur, Alabama. This facility reflected improved results in the 2011 quarter but continued to experience an operating loss. This facility produced operating losses of approximately \$300,000 and \$245,000 in the 2010 and 2011 quarters, respectively. The Company expects that this facility will continue to produce losses until demand for coil products improves.

The Company is primarily dependent on Nucor Steel Company (NSC) for its supply of coil inventory. In the 2011 quarter, NSC continued to supply the Company with steel coils in amounts that were adequate for the Company's purposes. The Company does not currently anticipate any significant change in such supply from NSC. Loss of NSC as a supplier could have a material adverse effect on the Company's business.

Tubular product segment sales increased approximately \$6,380,000 during the 2011 quarter. This increase resulted from an increase in tons sold which increased from approximately 23,000 tons in the 2010 quarter to approximately 28,000 tons in the 2011 quarter. In addition, the average per ton selling price of tubular products increased from approximately \$759 per ton in the 2010 quarter to \$828 per ton in the 2011 quarter. Tubular segment operations benefited from the increase in sales. Tubular product segment operating profits as a percentage of segment sales were approximately 18.9% and 16.7% in the 2010 and 2011 quarters, respectively. In June 2011, the market value of tubular products declined and had the effect of reducing margins on tubular segment sales.

U. S. Steel Tubular Products, Inc. (USS) has been the Company's primary supplier of tubular products and coil material used in pipe manufacturing and is a major customer of finished tubular products. Certain finished tubular products used in the energy business are manufactured by the Company and sold to USS. Beginning in December 2008, USS reduced orders for these finished tubular products. Also, in February 2009, USS announced that it was temporarily idling its plant in Lone Star, Texas, due to weak market conditions. From February 2009 until February 2010, the Company received few orders from USS and a significantly reduced supply of pipe and coil material from USS. During this period, USS reopened its Lone Star facility and since February 2010, the Company has received an increase in orders for finished tubular products from USS and an increase in supply of tubular products and coil material used in the production of pipe. Loss of USS as a supplier or customer could have an adverse effect on the Company's business. The Company can make no assurances as to orders from USS or the amounts of pipe and coil material that will be available from USS in the future.

From February 2009 until February 2010, the Company downsized its tubular division to a level more commensurate with operations. Since February 2010, the Company has increased the level of operations of the tubular division to support an increase in production requirements.

During the 2011 quarter, general, selling and administrative costs increased \$145,349 from the amount recorded during the 2010 quarter. This increase was related primarily to an increase in bonuses and commissions associated with increased earnings and volume.

Income taxes in the 2011 quarter increased \$181,109 from the amount recorded in the 2010 quarter. This increase was related primarily to the increase in earnings before taxes in the 2011 quarter. The effective tax rate was approximately 34% in both quarters.

FINANCIAL POSITION, LIQUIDITY AND CAPITAL RESOURCES

The Company remained in a strong, liquid position at June 30, 2011. The current ratios were 4.9 at June 30, 2011 and 5.8 at March 31, 2011. Working capital was \$46,317,706 at June 30, 2011, and \$45,094,969 at March 31, 2011.

During the quarter ended June 30, 2011, the Company maintained assets and liabilities at levels it believed were commensurate with operations. Changes in balance sheet amounts primarily occurred in the ordinary course of business. Cash increased primarily as a result of decreases in accounts receivable and inventories and an increase in accounts payable. The Company expects to continue to monitor, evaluate and manage balance sheet components depending on changes in market conditions and the Company's operations.

The Company has in the past and may in the future borrow funds on a term basis to build or improve facilities. The Company currently has no plans to borrow any significant amount of funds on a term basis.

Notwithstanding the current market conditions, the Company believes its cash flows from operations and borrowing capability due to its strong balance sheet are adequate to fund its expected cash requirements for the next twenty-four months.

CRITICAL ACCOUNTING POLICIES

The preparation of consolidated financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. One such accounting policy which requires significant estimates and judgments is the valuation of LIFO inventories in the Company's quarterly reporting. The quarterly valuation of inventory requires estimates of the year end quantities which is inherently difficult. Historically, these estimates have been materially correct. In the quarter ended June 30, 2011, LIFO inventories were reduced and are expected to be replaced by March 31, 2012. Also, in the quarter ended June 30, 2010, LIFO inventories were reduced and were partially replaced by March 31, 2011. Deferred credits of \$82,653 and \$94,064 were recorded at June 30, 2011 and June 30, 2010, respectively, to reflect replacement cost in excess of LIFO cost.

FORWARD-LOOKING STATEMENTS

From time to time, the Company may make certain statements that contain forward-looking information (as defined in the Private Securities Litigation Reform Act of 1996) and that involve risk and uncertainty. These forward-looking statements may include, but are not limited to, future results of operations, future production capacity, product quality and proposed expansion plans. Forward-looking statements may be made by management orally or in writing including, but not limited to, this Management's Discussion and Analysis of Financial Condition and Results of Operations and other sections of the Company's filings with the Securities and Exchange Commission under the Securities Act of 1933 and the Securities Exchange Act of 1934 (the Exchange Act). Actual results and trends in the future may differ materially depending on a variety of factors including, but not limited to, changes in the demand for and prices of the Company's products, changes in the demand for steel and steel products in general and the Company's success in executing its internal operating plans, including any proposed expansion plans.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Not Required

Table of Contents

Item 4. Controls and Procedures

The Company's management, with the participation of the Company's principal executive officer (CEO) and principal financial officer (CFO), evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Exchange Act) as of the end of the fiscal quarter ended June 30, 2011. Based on this evaluation, the CEO and CFO have concluded that the Company's disclosure controls and procedures were effective as of the end of the fiscal quarter ended June 30, 2011 to ensure that information that is required to be disclosed by the Company in the reports it files or submits under the Exchange Act is (i) recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms and (ii) accumulated and communicated to the Company's management, including the CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

There were no changes in the Company's internal control over financial reporting that occurred during the fiscal quarter ended June 30, 2011 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
