FORM 10-Q
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

(Mark one)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For Quarterly period ended October 2, 2004

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For the transition period from _____ to _____

Commission file number 1-9751

CHAMPION ENTERPRISES, INC.

(Exact name of registrant as specified in its charter)

Michigan

38-2743168

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

2701 Cambridge Court, Suite 300
Auburn Hills, MI 48326

(Address of principal executive offices)

Registrant's telephone number, including area code: (248) 340-9090

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the Registrant is an accelerated filer (as defined in Exchange Act Rule 12b-2).

Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

71,618,866 shares of the registrant's \$1.00 par value Common Stock were outstanding as of October 19, 2004.

CHAMPION ENTERPRISES, INC.
Notes to Consolidated Financial Statements
(Unaudited)

1. The Consolidated Financial Statements are unaudited, but in the opinion of management include all adjustments necessary for a fair presentation of the results of the interim period. All such adjustments are of a normal recurring nature except for 2003 restructuring charges discussed in Note 2, the decrease in the allowance for tax adjustments discussed in Note 3, the goodwill impairment charges recorded in the third quarter of 2003 discussed in Note 4, and the charge to retained earnings related to the induced conversion of the Series C Preferred Stock recorded in the first quarter of 2003 and discussed in Note 8. Financial results of the interim period are not necessarily indicative of results that may be expected for any other interim period or for the fiscal year. The balance sheet as of January 3, 2004 was derived from audited financial statements.

The Company exited its consumer finance business in the third quarter of 2003 and as a result that segment has been reported as discontinued operations for all periods presented.

For a description of significant accounting policies used by Champion Enterprises, Inc. (the Company) in the preparation of its consolidated financial statements, please refer to Note 1 of Notes to Consolidated Financial Statements in the Company s Annual Report on Form 10-K for the year ended January 3, 2004.

Certain amounts reported in previous periods have been reclassified to conform to the 2004 presentation.

The Company accounts for its stock-based employee compensation programs under Accounting Principles Board (APB) Opinion No. 25. The additional disclosures and pro forma information required by Statement of Financial Accounting Standards (SFAS) No. 123 as amended by SFAS No. 148 follow. If compensation costs for the Company s stock-based compensation plans had been determined based on the fair value at the grant dates consistent with the requirements of SFAS No. 123, pro forma net income (loss), income (loss) per share, and stock-based compensation expense would have been as indicated below:

	Three Months Ended	
	October 2, 2004	September 27, 2003
	(In thousands, except per share amounts)	
Net income (loss) as reported	\$ 9,989	\$ (81,096)
Net income (loss) pro forma	9,577	(79,895)
Basic income (loss) per share as reported	0.13	(1.41)
Diluted income (loss) per share as reported	0.12	(1.41)
Basic income (loss) per share pro forma	0.12	(1.39)
Diluted income (loss) per share pro forma	0.12	(1.39)
Stock-based employee compensation expense, net of related tax effects as reported	256	2,423
Stock-based employee compensation expense, net of related tax effects pro forma	668	1,222

Nine Months Ended

	October 2, 2004	September 27, 2003
	(In thousands, except per share amounts)	
Net income (loss) as reported	\$ 19,098	\$ (99,494)
Net income (loss) pro forma	18,521	(99,497)
Basic income (loss) per share as reported	0.25	(1.84)

Basic income (loss) per share pro forma	0.24	(1.84)
Diluted income (loss) per share pro forma	0.23	(1.84)
Stock-based employee compensation expense, net of related tax effects as reported	586	2,696
Stock-based employee compensation expense, net of related tax effects pro forma	1,163	2,699

Table of Contents

2. During the quarter ended September 27, 2003, the Company announced the closure of four manufacturing facilities, the relocation of one manufacturing facility and the closure of 35 retail sales centers and recorded \$26.9 million of restructuring charges. Manufacturing charges totaled \$20.6 million and included \$15.1 million of fixed asset impairment charges, \$3.3 million of additional warranty accruals and inventory write downs of \$1.0 million. Retail charges totaled \$8.4 million and included \$4.6 million of inventory write downs and \$2.0 million of fixed asset impairment charges. The inventory charges, net of intercompany profit elimination of \$2.1 million (credit), and the warranty accruals were included in cost of sales. All other charges were included in restructuring charges.

The following table provides information regarding current year activity for restructuring reserves.

	Nine Months Ended October 2, 2004		
	2003 Closures	Prior Closures	Total
	(In thousands)		
Balance at beginning of year	\$ 4,280	\$ 3,793	\$ 8,073
Cash payments:			
Warranty costs	(1,039)	(476)	(1,515)
Other closing costs	(705)	(285)	(990)
Reversals credited to earnings:			
Warranty costs		(1,000)	(1,000)
Other closing costs	(119)	(44)	(163)
	<u> </u>	<u> </u>	<u> </u>
Balance at October 2, 2004	<u>\$ 2,417</u>	<u>\$ 1,988</u>	<u>\$ 4,405</u>
Period end balance comprised of:			
Warranty costs	\$ 1,551	\$ 1,760	\$ 3,311
Other closing costs	866	228	1,094
	<u> </u>	<u> </u>	<u> </u>
	<u>\$ 2,417</u>	<u>\$ 1,988</u>	<u>\$ 4,405</u>

Warranty costs are expected to be paid over a three-year period after the related closures. The reversal of warranty costs during the nine months ended October 2, 2004 was due to better than expected payment experience. Other closing costs are generally paid within one year of the related closures, though certain lease payments at abandoned retail locations are paid up to three years after the closures. The reversal of other closing costs during the nine months ended October 2, 2004 consisted of adjustments to accruals for employee severance and lease terminations.

3. The provisions for income tax (benefit) differ from the amount of income tax (benefit) determined by applying the applicable U.S. statutory federal income tax rate to pretax income (loss) from continuing operations as a result of the following differences:

	Nine Months Ended	
	October 2, 2004	September 27, 2003
	(In thousands)	
Statutory U.S. tax rate	\$ 2,700	\$(28,600)
(Decrease) increase in rate resulting from:		
Deferred tax valuation allowance	(4,200)	25,600
Decrease in allowance for tax adjustments	(12,000)	
State taxes, net of federal tax effect	300	250
Other	2,900	800
	<u> </u>	<u> </u>
Total income tax benefit	<u>\$ (10,300)</u>	<u>\$ (1,950)</u>

The Company currently provides a 100% valuation allowance for its deferred tax assets. Deferred tax assets will continue to require a 100% valuation allowance until the Company has demonstrated their realizability through sustained profitability and/or from other factors. The Company has net operating losses incurred in 2003 totaling \$77 million that are available to offset certain future taxable income. The effective tax rates for the nine months ended October 2, 2004 and September 27, 2003 differ from the 35% federal statutory rate in part because of this

Table of Contents

100% valuation allowance. The 2004 tax rate was also affected by the decrease in the allowance for tax adjustments as a result of the finalization of certain tax examinations. The 2003 tax rate was also affected by a \$3.0 million tax benefit for a reduction in the valuation allowance, as a result of receiving a tax refund in 2003 that exceeded the amount estimated as of December 28, 2002.

4. In the third quarter of 2003, as a result of the significant downsizing of its operations in reaction to ongoing reductions in industry sales and in accordance with SFAS No. 142, the Company performed a test for retail and manufacturing goodwill impairment using the income approach. Under this method, the fair value of the reporting unit is determined based on the present value of estimated future cash flows that the reporting unit is expected to generate over its remaining life. In applying this method, the Company was required to make estimates of future operating trends and judgments about discount rates and other variables. Actual future results could differ from these estimates. In applying the income approach, it assumed a cash flow period of five years, a discount rate of 12%, and a terminal value of the fifth year's estimated cash flows for the next five years. The results of this impairment test indicated that retail goodwill had no value, resulting in a non-cash pretax impairment charge equal to the then remaining balance of retail goodwill of \$34.2 million, which was recorded in the quarter ended September 27, 2003.

5. A summary of inventories by component follows:

	October 2, 2004	January 3, 2004
	(In thousands)	
New manufactured homes	\$ 51,756	\$42,547
Raw materials	33,629	25,953
Work-in-process	7,997	6,204
Other inventory	30,630	24,120
	<u>\$124,012</u>	<u>\$98,824</u>

Other inventory consists of pre-owned manufactured homes, land and park spaces and improvements.

6. The Company's manufacturing operations generally provide retail homebuyers with a twelve-month warranty from the date of purchase. Estimated warranty costs are accrued as cost of sales at the time of sale. The warranty provision and reserves are based on estimates of the amounts necessary to settle existing and future claims for homes sold by the manufacturing operations as of the balance sheet date. The following table summarizes the changes in accrued product warranty obligations during the nine months ended October 2, 2004. A portion of warranty reserves was classified as other long-term liabilities in the consolidated balance sheet.

**Accrued
Warranty
Obligations**

(In thousands)

Edgar Filing: CHAMPION ENTERPRISES INC - Form 10-Q

Reserves at January 3, 2004	\$ 47,058
Warranty expense provided, net	34,327
Cash warranty payments	(40,078)
	<hr/>
Reserves at October 2, 2004	\$ 41,307
	<hr/>

7. Long-term debt by component consisted of the following:

	October 2, 2004	January 3, 2004
	<hr/>	<hr/>
	(In thousands)	
7.625% Senior Notes due 2009	\$ 89,273	\$113,715
11.25% Senior Notes due 2007	97,510	111,010
Obligations under industrial revenue bonds	12,430	18,145
Other debt	2,110	2,598
	<hr/>	<hr/>
	\$201,323	\$245,468
	<hr/>	<hr/>

No Senior Notes or industrial revenue bonds were retired during the quarter ended October 2, 2004 or September 27, 2003. During the quarter ended July 3, 2004, the Company purchased and retired \$10.9 million of its Senior Notes

Table of Contents

due 2009 for cash payments of \$10.4 million, resulting in a pretax gain of \$0.5 million. During the first quarter of 2004, the Company purchased and retired \$13.5 million of the Senior Notes due 2009 and \$13.5 million of the Senior Notes due 2007 in exchange for Company common stock totaling 3.9 million shares, resulting in a pretax loss of \$3.2 million. Also during the first quarter of 2004, the Company repaid a \$5.7 million obligation under an industrial revenue bond. During the six months ended June 28, 2003 the Company purchased and retired \$35.5 million of its Senior Notes due 2009 and \$15.0 million of the Senior Notes due 2007 for cash payments of \$35.8 million, resulting in a pretax gain of \$13.8 million.

In January 2003, Champion Home Builders Co. (CHB), a wholly-owned subsidiary of the Company, entered into a three-year, \$75 million revolving credit facility to be used in support of letters of credit and for general corporate purposes. Availability under the credit facility is subject to a borrowing base calculated as percentages of eligible accounts receivable, inventory and fixed assets. The facility agreement contains certain financial covenants that require the Company, only in the event that its liquidity, as defined, falls below \$35 million, to maintain certain levels of consolidated earnings before interest, taxes, depreciation, amortization, non-cash restructuring costs and gains from extinguishment of Senior Notes and certain ratios of earnings to fixed charges, as defined. The line of credit is collateralized by accounts receivable, inventories, property, plant, and equipment, cash and other assets. As of October 2, 2004, facility availability was \$65.1 million, of which \$60.8 million was used for letters of credit issued under the facility. There were no borrowings outstanding and the Company's liquidity was \$128 million, which was in excess of \$35 million such that no financial covenants were in effect.

The Company has two floor plan facilities with total availability of \$19.6 million of which \$13.9 million was outstanding at October 2, 2004. A \$15 million floor plan financing facility contains a covenant requiring the maintenance of a minimum \$35 million of liquidity, as defined in the facility, at each fiscal month end. In the event of non-compliance with this covenant, the lender could terminate the credit line and cause the debt to become immediately due and payable. As of October 2, 2004, the Company had approximately \$10.3 million outstanding under this facility and was in compliance with the covenant.

8. During the first quarter of 2004, the preferred shareholder exercised its right to purchase \$12 million of Series B-2 preferred stock. At October 2, 2004 redeemable convertible preferred stock consisted of \$8.75 million of Series C and \$12 million of Series B-2 with mandatory redemption dates of April 2, 2009 and July 3, 2008, respectively. Both Series have a 5% annual dividend that is payable quarterly, at the Company's option, in cash or common stock.

During the first quarter of 2003, terms of the Series C preferred stock were amended to accelerate the modification of the conversion price to \$5.66 and the preferred shareholder agreed to convert \$16.25 million of the Series C cumulative convertible preferred stock by March 12, 2003. Upon conversion, 2.9 million shares of common stock were issued. This amendment to the preferred stock terms was accounted for as an induced conversion, resulting in a charge to retained earnings of \$3.5 million during the first quarter of 2003.

In connection with the issuance of the Series C preferred stock in 2002, the Company issued to the preferred shareholder a warrant, which is currently exercisable based on approximately 2.2 million shares at a strike price of \$11.52 per share. Annually, on April 2 of each year, the warrant strike price increases by \$0.75 per share. The warrant expires on April 2, 2009 and is exercisable only on a non-cash, net basis, whereby the warrant holder would receive shares of common stock as payment for any net gain upon exercise. During the quarter and nine months ended October 2, 2004, as a result of changes in the Company's common stock price, the Company recorded mark-to-market charges of \$2.3 million and \$3.5 million, respectively, for the change in estimated fair value of the warrant.

9. The majority of the Company's manufacturing sales to independent retailers are made pursuant to repurchase agreements with lending institutions that provide wholesale floor plan financing to the retailers. Pursuant to these agreements, generally for a period of up to 24 months from invoice date of the sale of the homes and upon default by

the retailers and repossession by the financial institution, the Company is obligated to purchase the related floor plan loans or repurchase the homes from the lender. The contingent repurchase obligation at October 2, 2004 was estimated to be approximately \$250 million, without reduction for the resale value of the homes. Losses under repurchase obligations are determined by the difference between the repurchase price and the estimated net proceeds from the resale of the homes. Repurchase losses incurred on homes repurchased totaled \$0.2 million for the nine months ended October 2, 2004 and \$0.8 million for the nine months ended September 27, 2003. During the first quarter of 2003, wholesale repurchase reserves were increased \$3.2 million in connection with the extension of repurchase terms to 24 months for certain national lenders and for the negative effects of market conditions on the Company's largest independent retailer. During the second quarter of 2003, the Company agreed to extend both repurchase terms and the timing of required principal curtailment payments by this independent retailer to respective floor plan lenders resulting in a slightly higher repurchase exposure to the Company for a longer period of time.

Table of Contents

At October 2, 2004 the Company was contingently obligated for approximately \$61.1 million under letters of credit, primarily comprised of \$15.1 million to support insurance reserves, \$12.6 million to support long-term debt, \$27.7 million to secure surety bonds and \$5.0 million to support floor plan facilities of independent retailers. Champion was also contingently obligated for \$31.8 million under surety bonds, generally to support insurance and license and service bonding requirements. Approximately \$27.8 million of the letters of credit and \$20.8 million of the surety bonds support insurance reserves and long-term debt that are reflected as liabilities in the consolidated balance sheet.

At October 2, 2004 certain of the Company's subsidiaries were guarantors of \$5.6 million of debt of unconsolidated subsidiaries, none of which was reflected in the consolidated balance sheet. These guarantees are several or joint and several and are related to indebtedness of certain manufactured housing community developments which are collateralized by the properties being developed.

The Company has provided various representations, warranties and other standard indemnifications in the ordinary course of its business, in agreements to acquire and sell business assets and in financing arrangements. The Company is subject to various legal proceedings and claims which arise in the ordinary course of its business.

Management believes the ultimate liability with respect to these contingent obligations will not have a material effect on the Company's financial position, results of operations or cash flows.

10. Earnings per share calculations for 2004 include an allocation of income to participating securities pursuant to the provisions of EITF 03-6, Participating Securities and the Two-Class Method under FASB Statement No. 128 as discussed in Note 14. Prior periods have been restated, as necessary, to conform.

The Company's potentially dilutive securities consist of outstanding stock options and awards, deferred purchase price obligations, convertible preferred stock and common stock warrants. Convertible preferred stock and common stock warrants were not considered in determining the denominator for diluted earnings per share (EPS) in any period presented because the effect would have been antidilutive. Outstanding stock options and deferred purchase price obligations were not considered in determining the denominator for diluted earnings per share (EPS) for the three and nine months ended September 27, 2003 because the effect would have been antidilutive. A reconciliation of the numerators and denominators used in the Company's basic and diluted EPS calculations follows:

Table of Contents

	Three Months Ended		Nine Months Ended	
	October 2, 2004	September 27, 2003	October 2, 2004	September 27, 2003

Income (loss) from continuing operations before income taxes	\$ 7,680	\$ (81,688)
	<u> </u>	<u> </u>

For the three and nine months ended September 27, 2003, manufacturing segment income (loss) included \$20.6 million of charges for restructurings announced during the third quarter and \$2.1 million of additional warranty expense for manufacturing facilities closed in prior years. Manufacturing segment income (loss) for the nine months ended September 27, 2003 also includes a \$3.2 million increase in wholesale repurchase reserves in connection with the extension of repurchase terms to 24 months for certain national lenders and for the negative effects of market conditions on our largest independent retailer.

For the three and nine months ended September 27, 2003, retail segment loss included \$8.4 million of restructuring charges incurred for the closure of 35 retail sales centers. Retail floor plan interest expense not charged to retail segment income (loss) totaled \$0.3 million and \$0.9 million for the three and nine months ended October 2, 2004, respectively, and \$0.2 million and \$1.1 million for the three and nine months ended September 27, 2003, respectively.

In the third quarter of 2003, certain of the Company's executive officers terminated employment with the Company.

Table of Contents

These terminations resulted in severance and contract-related charges totaling \$4.4 million, which are included in general corporate expenses.

12. In 2003 the Company exited its consumer finance business. Income from discontinued operations for the nine months ended October 2, 2004 consisted primarily of a favorable adjustment from the settlement of remaining contractual obligations. The loss from discontinued operations for the three months ended September 27, 2003 included a goodwill impairment charge of \$4.1 million and other exit costs. In addition, the loss from discontinued operations for the nine months ended September 27, 2003 included charges totaling \$5.4 million to value its finance loans receivable at the lower of cost or market as well as operating losses.

13. Commencing June 30, 2003, the Company engaged AlixPartners, LLC, a consulting firm, one of whose Principals, Albert A. Koch, served until July 31, 2004 as the Company's Chairman of the Board of Directors, President and Chief Executive Officer. On August 17, 2004 Mr. Koch resigned as a member of the Company's Board of Directors. During the three and nine months ended October 2, 2004, the Company recorded expenses of \$1.3 million and \$3.7 million and paid fees of \$0.9 million and \$2.4 million, respectively, to AlixPartners, LLC and AP Services, LLC, its affiliate, for services rendered, including the services of Mr. Koch. Related expenses and payments in the quarter ended September 27, 2003 were \$1.3 million and \$0.8 million, respectively.

14. In January 2003, the Financial Accounting Standards Board (FASB) issued Interpretation No. 46, Consolidation of Variable Interest Entities. Under previous practice, entities were included in consolidated financial statements generally based on controlling voting interests or in other special situations. Under this Interpretation, certain previously unconsolidated entities (often referred to as special purpose entities) will be included in the consolidated financial statements of the primary beneficiary as a result of non-voting financial interests, which are established through contractual or other means. The adoption of Interpretation No. 46 by the Company in the first quarter of 2004 had no material impact on the Company's financial statements for the three and nine months ended October 2, 2004.

In March 2004, the Emerging Issues Task Force (EITF) issued EITF Abstract 03-6, Participating Securities and the Two-Class method under FASB Statement No. 128 (EITF 03-6). EITF 03-6 requires the use of the two-class method of computing earnings per share for those enterprises with participating securities or multiple classes of common stock. Participating securities are those securities that may participate in dividends paid on common stock. Allocation of earnings is made according to a pre-determined formula with, at times, an upper limit on the extent of participation, regardless of whether earnings would actually be distributed and whether there are limitations on a company's ability to pay dividends. EITF 03-6 became effective on March 31, 2004 and was implemented by the Company in the quarter ended July 3, 2004. Prior periods have been restated, as necessary, to conform, which resulted in the allocation of income to participating securities holders in periods with net income. See Note 10.

15. During the second quarter of 2004, the Company issued 29,000 shares of common stock in payment of preferred stock dividends totaling \$0.3 million. During the first quarter of 2004, the Company purchased and retired \$13.5 million of its Senior Notes due 2009 and \$13.5 million of its Senior Notes due 2007 in exchange for 3.9 million shares of Company common stock. In addition, during the three and nine months ended October 2, 2004, the Company issued 214,000 shares and 683,000 shares of common stock, respectively, in payment of \$2.0 million and \$6.0 million, respectively, of deferred purchase price obligations. During the three and nine months ended September 27, 2003, the Company issued 470,000 and 1,440,000 shares of common stock, respectively, in payment of \$2.0 million and \$6.0 million, respectively, of deferred purchase price obligations.

16. As of October 15, 2004, the Company sold the assets and business of its Western retail region, comprised of four traditional sales centers and four other sales locations that had sales of \$11.9 million for the nine months ended October 2, 2004. The assets sold consisted primarily of new homes and other inventory. The sale price was cash of approximately \$4.1 million and the buyer assumed certain liabilities of the business totaling approximately \$0.3

million. No significant gain or loss will result from this transaction.

17. Substantially all subsidiaries of CHB are guarantors and the Company is a subordinated guarantor of the Senior Notes due 2007. In addition, CHB is a guarantor and substantially all of its subsidiaries are guarantors of the Senior Notes due 2009 on a basis subordinated to their guarantees of the Senior Notes due 2007. The non-guarantor subsidiaries include the Company's foreign operations, its development companies and certain finance subsidiaries.

Table of Contents

Separate financial statements for each guarantor subsidiary are not included in this filing because each guarantor subsidiary is 100%-owned and the guarantees are full and unconditional, as well as joint and several, for the Senior Notes due 2009 and for the Senior Notes due 2007. There were no significant restrictions on the ability of the parent company or any guarantor subsidiary to obtain funds from its subsidiaries by dividend or loan.

The following condensed consolidating financial information presents the financial position, results of operations and cash flows of (i) the Company (Parent) and CHB, as parents, as if they accounted for their subsidiaries on the equity method; (ii) the guarantor subsidiaries, and (iii) the non-guarantor subsidiaries.

Item 2. Management's Discussion and Analysis of
Financial Condition and Results of Operations.

CHAMPION ENTERPRISES, INC.

Results of Operations
Three and Nine Months Ended October 2, 2004
versus the Three and Nine Months Ended September 27, 2003

Overview

We are a leading producer of factory-built housing in the U.S. As of October 2, 2004, we operated 29 homebuilding facilities in 14 states and two provinces in western Canada. As of October 2, 2004, our manufactured homes were sold through 81 Company-owned sales centers in 21 states, consisting of 58 traditional locations and 23 other sales locations. Our homes are also sold through approximately 2,400 independent sales centers across the U.S. and western Canada and directly to an estimated 500 builders and developers. More than 825 of the independent retailer locations were members of our Champion Home Centers (CHC) retail distribution network.

Our pretax income from continuing operations in the third quarter of 2004 increased by \$82.0 million over the third quarter of 2003, of which \$61.1 million was related to 2003 charges for goodwill impairment and restructurings. Our results for the quarter showed improvements in the manufacturing and retail segments as compared to results in the third quarter of 2003, partly as a result of our restructuring actions in 2003 and prior years to eliminate under-performing operations and rationalize our operations and capacity in light of industry conditions. In addition, our manufacturing operations showed improved results in the quarter versus the third quarter of 2003 as a result of improved pricing and purchasing, as well as production efficiencies from operating many of our plants with stronger backlogs.

Net interest expense in the quarter was lower by \$2.4 million due to debt reduction. During the nine months ended October 2, 2004, we continued to focus on improving our financial position and reducing debt. We purchased and retired \$37.9 million of our Senior Notes in exchange for payments of our common stock totaling 3.9 million shares and cash totaling \$10.4 million, resulting in a net pretax loss of \$2.8 million. We also repaid a \$5.7 million industrial revenue bond. Since the beginning of 2003, we have reduced indebtedness by approximately \$180 million.

According to data reported by the Institute for Building Technology and Safety (IBTS), U.S. industry manufacturing shipments of HUD code homes for the first eight months of 2004 declined by 4.3% from shipments in the comparable 2003 period. According to data reported by Manufactured Housing Institute, U.S. industry manufacturing shipments of modular homes for the first six months of 2004 increased 15% from shipments in the comparable 2003 period.

We are focusing on matching our manufacturing capacity and number of Company-owned retail sales centers to industry conditions, and improving or eliminating under-performing manufacturing facilities and retail sales centers. We continually review our manufacturing capacity and the number and locations of Company-owned retail sales centers and will make further adjustments as deemed necessary.

Operating income (loss)	2.5%	(7.2%)	

Net sales for the quarter and nine months ended October 2, 2004 increased from the comparable period in 2003 due primarily to sales price increases in both segments, partially offset by selling fewer homes as a result of operating fewer manufacturing facilities and retail sales centers. During the quarter ended October 2, 2004, we operated 29 manufacturing facilities and an average of 80 retail sales centers compared to 34 manufacturing facilities and an average of 98 sales centers during the third quarter of 2003.

Gross margin for the three and nine months ended October 2, 2004 increased \$18.5 million and \$25.1 million, respectively, from the comparable periods of 2003. A portion of the improvement was due to \$6.8 million of manufacturing and retail restructuring costs and a warranty provision of \$2.1 million for previously closed plants included in 2003 results. Additionally, manufacturing gross margin increased significantly due to improved pricing and purchasing, as well as production efficiencies from operating many of our plants with stronger backlogs in 2004 and the closure of under-performing plants in 2003. In addition, in the third quarter of 2004 closed plant warranty reserves were reduced by \$1.0 due to better than expected experience.

Table of Contents

SG&A for the three and nine months ended October 2, 2004 declined by \$6.7 million and \$20.8 million, respectively, from the comparable periods of 2003 primarily due to \$4.4 million of executive severance costs in 2003 and the operation of fewer manufacturing facilities and retail sales centers in 2004.

During the quarter and nine months ended October 2, 2004, as a result of changes in the Company's common stock price, the Company recorded mark-to-market charges of \$2.3 million and \$3.5 million, respectively, for the increase in estimated fair value of an outstanding common stock warrant. In the comparable periods of 2003, a mark-to-market charge of \$2.5 million was recorded. During the nine months ended October 2, 2004, operating results included a net loss of \$2.8 million for the purchase and retirement of \$37.9 million of Senior Notes in exchange for 3.9 million shares of Company common stock and \$10.4 million of cash. During the nine months ended September 27, 2003, we purchased and retired \$35.6 million of Senior Notes due 2009 and \$15.0 of Senior Notes due 2007 for cash totaling approximately \$35.8 million, resulting in a gain of \$13.8 million.

Manufacturing Operations

We evaluate the performance of our manufacturing segment based on income (loss) before interest, income taxes and general corporate expenses.

	Three Months Ended		%
	October 2, 2004	September 27, 2003	
Manufacturing segment net sales (in millions)	\$ 269.5	\$ 261.0	3%
Manufacturing segment income (loss) (in millions)	\$ 22.1	\$ (10.1)	318%
Manufacturing segment margin %	8.2%	(3.9%)	
Homes sold	6,039	6,787	(11%)
Floors sold	11,582	12,837	(10%)
Multi-section mix	84%	83%	
Average home price	\$43,000	\$ 37,000	16%

	Nine Months Ended		%
	October 2, 2004	September 27, 2003	
Manufacturing segment net sales (in millions)	\$ 748.5	\$ 733.3	2%
Manufacturing segment income (loss) (in millions)	\$ 44.3	\$ (4.0)	1221%
Manufacturing segment margin %	5.9%	(0.5%)	
Homes sold	17,398	19,383	(10%)
Floors sold	33,343	36,686	(9%)
Multi-section mix	85%	84%	
Average home price	\$41,500	\$ 36,400	14%
Manufacturing facilities at period end	29	34	(15%)

Manufacturing net sales for the quarter and nine months ended October 2, 2004 increased slightly compared to the comparable periods of 2003 resulting from an increase in the average home selling price partially offset by selling fewer homes. We operated five fewer manufacturing facilities during the third quarter of 2004 versus 2003. For the quarter ended October 2, 2004, our shipments of HUD code homes declined 16% and our shipments of non-HUD code homes, consisting primarily of modular and Canadian code homes, increased by 20% as compared to shipments in the third quarter of 2003. Average manufacturing selling prices increased in the 2004 third quarter as compared to the year ago quarter as a result of price increases to offset rising material costs and increased sales of higher priced modular homes.

Manufacturing segment income for the three and nine months ended October 2, 2004 increased over the comparable periods of 2003 by \$32.2 million and \$48.3 million, respectively, on comparable sales while operating five fewer plants. Third quarter of 2003 results included \$20.6 million of restructuring charges and a warranty provision of \$2.1 million for previously closed plants. The additional improvement in manufacturing segment income of \$9.5 million and \$25.6 million, respectively, for the three and nine months ended October 2, 2004, was primarily due to production efficiencies from the closure of under performing plants in 2003 and operating many of

Table of Contents

our plants with stronger backlogs in 2004 and improved pricing and purchasing. In addition, closed plant warranty reserves were reduced by \$1.0 million due to better than expected experience and manufacturing SG&A was lower primarily due to operating fewer plants in 2004. Manufacturing SG&A in the first nine months of 2003 included a \$3.2 million charge to increase repurchase reserves, partially offset by a gain of \$1.6 million from the sale of two idle manufacturing facilities.

Although retailer orders can be cancelled at any time without penalty, and unfilled orders are not necessarily an indication of future business, our unfilled manufacturing orders for homes at October 2, 2004 totaled approximately \$116 million at the 29 plants operated, compared to \$64 million at 34 plants at September 27, 2003.

Retail Operations

We evaluate the performance of our retail segment based on income (loss) before interest, income taxes and general corporate expenses.

	Three Months Ended		
	October 2, 2004	September 27, 2003	% Change
Retail segment net sales (in millions)	\$ 73.0	\$ 74.9	(3%)
Retail segment income (loss) (in millions)	\$ 1.6	\$ (9.4)	117%
Retail segment margin %	2.2%	(12.5%)	
New homes sold	639	1,014	(37%)
Pre-owned homes sold	309	327	(6%)

% Champion-produced new homes sold	89%	96%	
New home multi-section mix	93%	88%	
Average new home retail price *	\$106,100	\$79,100	34%
Average number of new homes retail sold per sales center per month *	2.7	2.8	(4%)
Average number of total homes retail sold per sales center per month *	4.0	3.9	3%
Average number of sales centers during the period	80	98	(18%)

	Nine Months Ended		
	October 2, 2004	September 27, 2003	% Change
Retail segment net sales (in millions)	\$ 186.7	\$ 203.1	(8%)
Retail segment income (loss) (in millions)	\$ 3.4	\$ (12.8)	126%
Retail segment margin %	1.8%	(6.3%)	
New homes sold	1,744	2,612	(33%)
Pre-owned homes sold	900	927	(3%)
Total homes sold	2,644	3,539	(25%)
% Champion-produced new homes sold	90%	95%	
New home multi-section mix	92%	86%	

Edgar Filing: CHAMPION ENTERPRISES INC - Form 10-Q

Average new home retail price *	\$98,800	\$75,700	31%
Average number of new homes retail sold per sales center per month *	2.5	2.4	4%
Average number of total homes retail sold per sales center per month *	3.7	3.4	9%
Average number of new homes in inventory per sales center at period end	12.2	16.3	(25%)
Average number of sales centers during the period	79	111	(29%)
Sales centers at period end	81	80	1%

* excluding bulk sales in 2003

Retail sales for the three and nine months ended October 2, 2004 decreased versus the comparable periods last year due to operating a lower average number of sales centers, partially offset by a higher average selling price per home. During the third quarter, we operated an average of 80 sales centers compared to the average of 98 sales

Table of Contents

centers operated in the third quarter of 2003. The 34% increase in average new home selling price resulted from the sale of a greater proportion of larger, higher-priced multi-section homes, including modular homes, and homes with more add-ons, improvements and amenities. Additionally, our retail operations have increased selling prices to offset higher prices from the manufacturers due to rising material costs.

Retail segment income for the three and nine months ended October 2, 2004 improved by \$11.0 million and \$16.2 million, respectively, compared to the same periods in 2003 primarily due to \$8.4 million of restructuring charges in 2003 and reduced SG&A from operating fewer sales centers in 2004.

Discontinued Operations

In the third quarter of 2003, we exited our consumer finance business. Income from discontinued operations for the nine months ended October 2, 2004 consisted primarily of a favorable adjustment from the settlement of remaining contractual obligations during the first quarter. Loss from discontinued operations for the three months ended September 27, 2003 included goodwill impairment charges of \$4.1 million and other exit costs. In addition, losses for the nine months ended September 27, 2003 included charges totaling \$5.4 million to value our finance loans receivable at the lower of cost or market as well as operating losses.

Restructuring Charges

During the nine months ended October 2, 2004 we closed one manufacturing facility and incurred no significant restructuring costs. We closed no manufacturing facilities in the third quarter of 2004. As of October 2, 2004, accrued but unpaid restructuring costs totaled \$4.4 million compared to \$8.1 million at January 3, 2004, primarily consisting of warranty reserves for closed manufacturing plants.

During the quarter ended September 27, 2003, the Company announced the closure of four manufacturing facilities, the relocation of one manufacturing facility and the closure of 35 retail sales centers and recorded \$26.9 million of restructuring charges. Manufacturing charges totaled \$20.6 million and included \$15.1 million of fixed asset impairment charges, \$3.3 million of additional warranty accruals and inventory write downs of \$1.0 million. Retail charges totaled \$8.4 million and included \$4.6 million of inventory write downs and \$2.0 million of fixed asset impairment charges. The inventory charges, net of intercompany profit elimination of \$2.1 million (credit), and the warranty accruals were included in cost of sales. All other charges were included in restructuring charges.

Interest Expense

Interest expense decreased by \$2.1 million and \$6.7 million for the three and nine months ended October 2, 2004, respectively, versus the comparable periods in 2003 as a result of 2007 and 2009 Senior Note retirements in 2004 and 2003, as well as retirement of an industrial revenue bond in 2004.

Income Taxes

We currently provide a 100% valuation allowance for our deferred tax assets. Deferred tax assets will continue to require a 100% valuation allowance until we have demonstrated their realizability through sustained profitability and/or from other factors. Current federal income tax regulations provide for a two-year carryback of net operating losses. We have no taxable income available during this period and, as a result, net operating losses incurred in 2003 became tax loss carryforwards that are available to offset certain future taxable income. The effective tax rate for the three and nine months ended October 2, 2004 and September 27, 2003 differed from the 35% federal statutory rate partially because of this 100% valuation allowance for deferred taxes. The 2004 tax rate was also affected by the

\$12 million decrease in the deferred tax valuation allowance for tax adjustments as a result of the finalization of certain tax examinations. The 2003 tax rate was also affected by a \$3.0 million tax benefit for a reduction in the valuation allowance as a result of receiving a tax refund in 2003 that exceeded the amount estimated as of December 28, 2002.

Liquidity and Capital Resources

Unrestricted cash balances totaled \$132.7 million at October 2, 2004. For the nine months ended October 2, 2004, net cash of \$15.9 million was used for operating activities, including \$42.1 million used to increase working

Table of Contents

capital. During the period, accounts receivable increased by \$26.4 million due to seasonally low balances at January 3, 2004. Inventories increased by \$25.2 million in part due to rising commodity costs, expanded California retail operations and seasonality. Accounts payable increased by \$9.5 million due to seasonality and higher inventory levels. Cash provided during the period included \$12.0 million from issuance of convertible preferred stock, \$5.2 million from stock option exercises, \$3.6 million from the disposal of fixed assets, and \$7.9 million from decreases in restricted cash balances. Cash used during the period included \$16.7 million to reduce long-term debt, primarily for retiring Senior Notes and an industrial revenue bond, and \$6.5 million for capital expenditures. Also during the period we purchased and retired \$13.5 million of our Senior Notes due 2009 and \$13.5 million of our Senior Notes due 2007 in exchange for 3.9 million shares of the Company's common stock.

We have a committed \$75 million revolving credit facility for letters of credit and general corporate purposes which expires in January 2006. Availability under this credit facility is limited to a borrowing base, and is collateralized by accounts receivable, inventories, property, plant and equipment, cash and other assets. As of October 2, 2004, facility availability was \$65.1 million of which \$60.8 million was used for letters of credit. We expect to continue to utilize availability under this facility principally for letters of credit. The facility contains financial covenants that are in effect only in the event that our liquidity, as defined, falls below \$35 million. These covenants include required earnings, as defined, of \$45.2 million and a required ratio of earnings to fixed charges, as defined, of 1.0 to 1 for each 12 month period ending on a fiscal quarter. For the 12 months ended October 2, 2004, our earnings, as defined, were \$49.1 million and our ratio of earnings to fixed charges was 1.3 to 1. At October 2, 2004 our liquidity, as defined, was \$127.5 million, which was in excess of \$35 million such that these financial covenants were not in effect. We expect to maintain liquidity at or in excess of the \$35 million threshold over the next 12 months.

We continuously evaluate our capital structure. Strategies considered include without limitation, purchasing, refinancing, exchanging, or otherwise retiring our outstanding indebtedness, restructuring of obligations, new financings, and issuances of securities, whether in the open market or by other means and to the extent permitted by our existing financing arrangements. We evaluate all potential transactions in light of existing and expected market conditions. The amounts involved in any such transactions, individually or in the aggregate, may be material.

The debt incurrence covenant in the indenture governing the Senior Notes due 2007 currently limits additional debt to: i) a working capital line of credit up to a borrowing base equal to 60% of otherwise unencumbered inventories and 75% of otherwise unencumbered accounts receivable; ii) warehouse financing meeting certain parameters up to \$200 million; iii) other debt up to \$30 million; and iv) ordinary course indebtedness and contingent obligations that includes non-speculative hedging obligations, floor plan financing, letters of credit, surety bonds, bankers acceptances, repurchase agreements related to retailer floor plan financing and guarantees of additional debt otherwise permitted to be incurred. The resulting effect at October 2, 2004, when combined with limits in our Senior Notes due 2009, was a working capital line of credit limit of approximately \$97 million of which no more than approximately \$31 million of cash borrowings could be secured debt, as defined.

We have two floor plan facilities with total availability of \$19.6 million, of which \$13.9 million was outstanding at October 2, 2004. A \$15 million floor plan financing facility contains a covenant requiring the maintenance of \$35 million of liquidity, as defined in the facility, at each fiscal month end. If we were to be out of compliance with this covenant, the lender could terminate the credit line and cause the debt to become immediately due and payable. As of October 2, 2004, we had approximately \$10.3 million outstanding under this facility and were in compliance with the covenant.

We expect to spend less than \$10 million in 2004 on capital expenditures. We do not plan to pay cash dividends on our common stock in the near term.

Contingent liabilities and obligations including repurchase obligations

We had significant contingent liabilities and obligations at October 2, 2004, including surety bonds and letters of credit totaling \$92.9 million, guarantees by certain of our consolidated subsidiaries of \$5.6 million of debt of unconsolidated subsidiaries and estimated wholesale repurchase obligations.

We are contingently obligated under repurchase agreements with certain lending institutions that provide floor plan financing to our independent retailers. We use information, which is generally available only from the primary national floor plan lenders, to estimate our contingent repurchase obligations. With the exit of certain national floor plan lenders from the industry and the shift to alternative inventory financing sources, this estimate of our contingent repurchase obligation may not be precise. We estimate our contingent repurchase obligation was approximately \$250 million, without reduction for the resale value of the homes as of October 2, 2004. As of

Table of Contents

October 2, 2004, our largest independent retailer, a nationwide retailer, had approximately \$10.4 million of inventory subject to repurchase for up to 30 months from date of invoice. As of October 2, 2004 our next 24 largest independent retailers had an aggregate of approximately \$46.9 million of inventory subject to repurchase for up to 24 months from date of invoice, with individual amounts ranging from approximately \$0.5 million to \$6.1 million per retailer. For the nine months ended October 2, 2004, we paid \$1.2 million to repurchase 35 homes and recorded related losses of \$0.2 million. In the same period last year, we paid \$4.3 million and incurred losses of \$0.8 million related to the repurchase of 118 homes.

We have provided various representations, warranties and other standard indemnifications in the ordinary course of our business, in agreements to acquire and sell business assets and in financing arrangements. We are also subject to various legal proceedings and claims which arise in the ordinary course of our business.

Management believes the ultimate liability with respect to these contingent liabilities and obligations will not have a material effect on our financial position, results of operations or cash flows.

Summary of liquidity and capital resources

At October 2, 2004, our unrestricted cash balances totaled \$132.7 million and we had unused availability of \$5.7 million under our two floor plan facilities and \$4.3 million of unused availability under our \$75 million credit facility. Total cash available from these sources was approximately \$143 million. In the first nine months of 2004, continuing operating activities used cash of \$15.9 million and cash used for capital expenditures was \$6.5 million. Currently, we expect annual cash flow from operating activities for 2004 and 2005 to be adequate to fund the operations and capital expenditures of the Company. Annual capital expenditures are currently expected to be less than \$10 million in 2004 and \$15 million in 2005. In addition, we have less than \$2 million of scheduled cash payments for debt due in the remainder of 2004 and 2005. Therefore, cash availability is projected to be substantially in excess of cash needed to operate our businesses through 2005. In the event one or more of our capital resources were expected to become unavailable, we would modify our operating strategies.

Critical Accounting Policies

The preparation of financial statements in conformity with generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Assumptions and estimates of future earnings and cash flow are used in the periodic analyses of the recoverability of goodwill, deferred tax assets, and property, plant and equipment. Historical experience and trends are used to estimate reserves, including reserves for self-insured risks, warranty costs and wholesale repurchase losses. Following is a description of each accounting policy requiring significant judgments and estimates:

Reserves for Self-Insured Risks

We are self-insured for a significant portion of our workers' compensation, general and products liability, auto liability, health and property insurance. Under our current self-insurance programs, we are generally responsible for up to \$500,000 per claim for workers' compensation (\$750,000 per claim in California) and automobile liability claims, up to \$1.5 million per claim for product liability and general liability claims and up to \$1.0 million per claim for property insurance claims including business interruption losses. We maintain excess liability and property insurance with outside insurance carriers to minimize our risks related to catastrophic claims. Under our current self-insurance program we are responsible for up to \$150,000 per contract per year for health insurance claims. Estimated insurance costs are accrued for incurred claims and claims incurred but not yet reported. Factors considered

in estimating our insurance reserves are the nature of outstanding claims including the severity of the claims, estimated costs to settle existing claims, loss history, and inflation, as well as estimates provided by our outside insurance broker and carrier, and third party actuaries. Significant changes in the factors described above could have a material adverse impact on future operating results.

Warranty Reserves

Our manufacturing operations generally provide the retail homebuyer with a twelve-month warranty. Estimated warranty costs are accrued as cost of sales at the time of sale. Our warranty reserve is based on estimates of the amounts necessary to settle existing and future claims on homes sold by the manufacturing operations as of the balance sheet date. Factors used to calculate the warranty obligation are the estimated number of homes still under warranty, including homes in retailer inventories and homes purchased by consumers still within the twelve-

Table of Contents

month warranty period, and the historical average costs incurred to service a home. Significant changes in these factors could have a material adverse impact on future operating results.

Property, Plant and Equipment

The recoverability of property, plant and equipment is evaluated whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable, primarily based on estimated selling prices, appraised values or projected undiscounted cash flows. Our cash flow estimates are based on historical results adjusted for estimated current industry trends, the economy and operating conditions. Additionally, we use estimates of fair market values to establish impairment reserves for permanently closed facilities that are held for sale. Past evaluations of closed facilities have resulted in significant impairment charges. Significant changes in these estimates and assumptions could result in additional impairment charges in the future.

Income Taxes: Deferred Tax Assets and Income Tax Refunds

Deferred tax assets and liabilities are determined based on temporary differences between the financial statement balances and the tax bases of assets and liabilities using enacted tax rates in effect in the years in which the differences are expected to reverse. We periodically evaluate the realizability of our deferred tax assets based on the requirements established in SFAS No. 109, Accounting for Income Taxes, which requires the recording of a valuation allowance when it is more likely than not that some portion or all of the deferred tax assets will not be realized. We incurred pretax losses in 2000 through 2003. We currently have a 100% valuation allowance against our deferred tax assets. Deferred tax assets will continue to require a 100% valuation allowance until the Company has demonstrated their realizability through sustained profitability and/or from other factors. The valuation allowance will be reversed to income in future periods to the extent that the related deferred tax assets are realized as a reduction of taxes otherwise payable on any future earnings or a portion or all of the valuation allowance is otherwise no longer required.

Goodwill

We test for goodwill impairment in accordance with SFAS No. 142, Goodwill and Other Intangible Assets. We evaluate the manufacturing segment's fair value versus its carrying value annually as of the end of each fiscal year or more frequently if events or changes in circumstances indicate that the carrying value may exceed the fair value of the reporting unit. When estimating fair value, we calculate the present value of future cash flows based on forecasted sales volumes, number of homebuilding facilities in operation, current industry and economic conditions, historical results and inflation. Past evaluations of goodwill have resulted in significant impairment charges. Significant changes in the estimates and assumptions used in calculating the fair value of goodwill or differences between estimates and actual results could result in additional impairment charges in the future.

Wholesale Repurchase Reserves

The majority of our manufacturing sales to independent retailers are made pursuant to repurchase agreements with the providers of floor plan financing. Potential losses under repurchase obligations are determined by calculating the difference between the repurchase price and the estimated net resale value of the homes. Probable losses under repurchase agreements are accrued based on the historical number of homes repurchased, the cost of such repurchases and the historical losses incurred as well as the current inventory levels held at our independent retailers. In addition, we monitor the risks associated with our independent retailers and consider these risks in our evaluation of the wholesale repurchase reserves. Significant changes in these factors could have a material adverse impact on future operating results.

Impact of Recently Issued Accounting Pronouncements

For information regarding the impact of recently issued accounting pronouncements, see Note 14 of Notes to Consolidated Financial Statements in Item 1 of this Report.

Forward Looking Statements

Certain statements contained in this Report, including our plans and beliefs regarding availability of liquidity and financing, anticipated capital expenditures, outlook for the manufactured housing industry in particular and the economy in general, availability of wholesale and consumer financing and characterization of and our ability to control our contingent liabilities, could be construed to be forward looking statements within the meaning of the Securities Exchange Act of 1934. In addition, we or persons acting on our behalf may from time to time publish or

Table of Contents

communicate other items that could also be construed to be forward looking statements. Statements of this sort are or will be based on our estimates, assumptions and projections, and are subject to risks and uncertainties, including those specifically listed below that could cause actual results to differ materially from those included in the forward looking statements. We do not undertake to update our forward looking statements or risk factors to reflect future events or circumstances. The following risk factors could materially affect our operating results or financial condition.

Significant leverage *Our significant debt could limit our ability to obtain additional financing, require us to dedicate a substantial portion of our cash flows from operations for debt service and prevent us from fulfilling our debt obligations. If we are unable to pay our debt obligations when due, we could be in default under our debt agreements and our lenders could accelerate our debt or take other actions which could restrict our operations.*

As discussed in Note 7 of the Notes to Consolidated Financial Statements in Item 1 of this Report, we have a significant amount of debt outstanding, which consists primarily of long-term debt. This indebtedness could, among other things:

limit our ability to obtain future financing for working capital, capital expenditures, acquisitions, debt service requirements, surety bonds or other requirements;

require us to dedicate a substantial portion of our cash flows from operations to the payment of principal and interest on our indebtedness and reduce our ability to use our cash flows for other purposes;

limit our flexibility in planning for, or reacting to, changes in our business and the manufactured housing industry;

place us at a competitive disadvantage to competitors with less indebtedness; and

make us more vulnerable in the event of a further downturn in our business or in general economic conditions.

In addition, our future cash flows may be insufficient to meet our debt service and other obligations. Our business may not generate cash flows from operations in amounts sufficient to pay our debt or to fund other liquidity needs. The factors that affect our ability to generate cash can also affect our ability to raise additional funds through the sale of equity securities, the refinancing of debt or the sale of assets.

We may need to refinance all or a portion of our debt on or before maturity. We may not be able to refinance any of our debt on commercially reasonable terms or at all. If we are unable to refinance our debt obligations, we could be in default under our debt agreements and our lenders could accelerate our debt or take other actions which could restrict our operations.

General industry conditions *As a result of the downturn in the manufactured housing industry which began in 1999, we have experienced a decline in sales and incurred operating losses and costs for the closures or consolidations of operations, fixed asset impairment charges and goodwill impairment charges. If industry conditions continue to deteriorate, our sales could decline further and our operating results and cash flows could suffer.*

Since mid-1999 the manufactured housing industry has experienced declining manufacturing shipments and retail sales, tightened consumer credit standards, reduced availability of consumer financing, high levels of homes repossessed from consumers, higher interest rates on manufactured housing loans relative to those generally available to site-built homebuyers, a reduced number of consumer and floor plan lenders and reduced floor plan availability. We estimate approximately half of the industry retail sales locations and manufacturing facilities have closed since mid-1999 as a result of these industry conditions. Since the beginning of the industry downturn, we have closed a

significant number of homebuilding facilities and retail sales locations in an attempt to return to profitability. From 2000 through 2003, we reported significant net losses including goodwill impairment charges, a valuation allowance of 100% of our deferred tax assets and restructuring charges, which are each discussed in more detail in Item 7 of our Form 10-K for 2003. If the current downturn in the industry continues, our sales could decline further, our operating results and cash flows could suffer and we may incur further losses including additional costs for the closures or consolidations of existing operations, fixed asset impairment charges and goodwill impairment charges.

Common stock and Senior Notes values Our common stock price has been volatile and may continue to be volatile given current industry and economic conditions. Our Senior Notes have traded at significant discounts to face value and may trade at discounts in the future.

Table of Contents

Our Company's closing common stock price was \$27.38 on December 31, 1998, before the industry downturn began in mid-1999. The trading value per share of our stock has ranged from \$1.65 to \$11.68 during 2003 and the first nine months of 2004. Additionally, our two issuances of Senior Notes have traded at discounts to their respective face values. The market prices of our common stock and Senior Notes are affected by many factors including: general economic and market conditions, interest rates, current manufactured housing industry forecasts, Champion's and our competitors' operating results, our ability to pay our debt obligations, consumer and wholesale financing availability, the market's perception of our strategies and the overall market fluctuations unrelated to our Company or the manufactured housing industry. All of these factors may adversely impact the market prices of our common stock and Senior Notes in the future.

Fluctuations in operating results *The cyclical and seasonal nature of the manufactured housing market has caused our sales and operating results to fluctuate. We expect these fluctuations to continue in the future, which could result in operating losses during downturns.*

The manufactured housing industry is highly cyclical and is influenced by many national and regional economic and demographic factors, including:

terms and availability of financing for homebuyers and retailers;

consumer confidence;

interest rates;

population and employment trends;

income levels;

housing demand; and

general economic conditions, including inflation and recessions.

In addition, the manufactured housing industry is affected by seasonality. Sales during the period from March to November are traditionally higher than in other months. As a result of the foregoing factors, our sales and operating results fluctuate, and we expect that they will continue to fluctuate in the future. Moreover, we may experience operating losses during cyclical and seasonal downturns in the manufactured housing market.

Consumer financing availability *Tightened credit standards and loan terms, curtailed lending activity, and increased interest rates among consumer lenders have reduced our sales. If consumer financing were to become further curtailed or unavailable, our sales could decline further and our operating results and cash flows could suffer.*

The consumers who buy our homes have historically secured consumer financing from third party lenders. The availability, terms and costs of consumer financing depend on the lending practices of financial institutions, governmental regulations and economic and other conditions, all of which are beyond our control. A consumer seeking to finance the purchase of a manufactured home without land will generally pay a higher interest rate and have a shorter loan term than a consumer seeking to finance the purchase of land and the home. Manufactured home consumer financing is at times more difficult to obtain than financing for site-built homes. Since 1999, consumer lenders have tightened the credit underwriting standards and loan terms and increased interest rates for loans to purchase manufactured homes, which have reduced lending volumes and caused our sales to decline.

The poor performance of portfolios of manufactured housing consumer loans in recent years has made it more difficult for industry consumer finance companies to obtain long-term capital in the asset-backed securitization market. As a result, consumer finance companies have curtailed their industry lending and many have exited the manufactured housing market. Additionally, the industry has seen certain traditional real estate mortgage lenders tighten terms or discontinue financing for manufactured housing.

If consumer financing for manufactured homes were to become further curtailed or unavailable, we would likely experience further retail and manufacturing sales declines and our operating results and cash flows would suffer.

Floor plan financing availability *A reduced number of floor plan lenders and reduced credit availability to manufactured housing retailers may result in lower retail inventory levels as well as fewer sales centers. As a result, our manufacturing sales could decline further and our operating results and cash flows could suffer.*

Independent retailers of our manufactured homes generally finance their inventory purchases with floor plan financing provided by lending institutions. The number of floor plan lenders and their lending limits affect the availability of wholesale financing to retailers. During the past five years several major national floor plan lenders

Table of Contents

have exited the industry or curtailed their floor plan operations. The remaining floor plan lenders or new floor plan lenders entering the industry may change the terms of their loans as compared to previously available terms for such floor plan loans. These changes could include higher interest rates, lower advance rates, earlier or more significant principal payments or longer repurchase periods for the manufacturers. In addition, weaker retailers may not qualify for floor plan financing at all. Reduced availability of floor plan lending or tighter floor plan terms may affect our independent retailers' inventory levels of new homes, the number of retail sales centers and related wholesale demand. Retail sales to consumers at our independent retailers could also be affected by reduced retail inventory levels or a reduced number of sales centers. As a result, we could experience manufacturing sales declines or a higher level of retailer defaults and our operating results and cash flows could suffer.

Contingent liabilities We have, and will continue to have, significant contingent wholesale repurchase obligations and other contingent obligations, some of which could become actual obligations that we must satisfy. We may incur losses under these wholesale repurchase obligations or be required to fund these or other contingent obligations that would reduce our cash flows.

In connection with a floor plan arrangement for our manufacturing shipments to independent retailers, the financial institution that provides the retailer financing customarily requires us to enter into a separate repurchase agreement with the financial institution. Under this separate agreement, generally for a period up to 24 months from the date of our sale to the retailer, upon default by the retailer and repossession of the home by the financial institution, we are generally obligated to purchase from the lender the related floor plan loan or the home at a price equal to the unpaid principal amount of the loan, plus certain administrative and handling expenses, reduced by the cost of any damage to the home and any missing parts or accessories. Our estimated aggregate contingent repurchase obligation at October 2, 2004 was significant and includes significant contingent repurchase obligations relating to our largest independent retail customers. For additional discussion see Contingent Repurchase Obligations in Item 2 of this Report and in Item 7 of our Form 10-K for 2003. We may be required to honor some or all of our contingent repurchase obligations in the future, which would result in operating losses and reduced cash flows.

At October 2, 2004, we also had contingent debt obligations related to surety bonds and letters of credit. In addition, we had guarantees by certain of our consolidated subsidiaries of debt of unconsolidated subsidiaries. For additional detail and discussion, see Liquidity and Capital Resources in Item 2 of this Report. If we were required to fund a material amount of these contingent obligations, we would have reduced cash flows and could incur losses.

Dependence upon independent retailers If we are unable to establish or maintain relationships with independent retailers who sell our homes, our sales could decline and our operating results and cash flows could suffer.

During 2003, approximately 78% of our manufacturing shipments of homes were made to independent retail locations throughout the United States and western Canada. As is common in the industry, independent retailers may sell manufactured homes produced by competing manufacturers. We may not be able to establish relationships with new independent retailers or maintain good relationships with independent retailers that sell our homes. Even if we do establish and maintain relationships with independent retailers, these retailers are not obligated to sell our manufactured homes exclusively, and may choose to sell our competitors' homes instead. The independent retailers with whom we have relationships can cancel these relationships on short notice. In addition, these retailers may not remain financially solvent as they are subject to the same industry, economic, demographic and seasonal trends that we face. If we do not establish and maintain relationships with solvent independent retailers in the markets we serve, sales in those markets could decline and our operating results and cash flows could suffer.

Effect on liquidity Current industry conditions and our recent operating results have limited our sources of capital. If this situation does not improve and if we are unable to locate alternative sources of capital, we may be

unable to maintain or expand our business.

We depend on our cash balances, cash flows from operations, revolving credit facility, and floor plan facilities to finance our operating requirements, capital expenditures and other needs. The downturn in the manufactured housing industry, combined with our recent operating results and other changes, has decreased sources of financing.

If our cash balances, cash flows from operations, and availability under our revolving credit facility and floor plan facilities are insufficient to finance our operations and alternative capital is not available or if surety bonds become unavailable to us, we may not be able to expand our business or maintain our existing operations, or we may need to curtail or limit our existing operations.

Table of Contents

We have a significant amount of surety bonds representing collateral for our self-insurance programs and for general operating purposes. We are required to provide collateral in support of our surety bond programs in the form of letters of credit. For additional detail and information concerning the amounts of our surety bonds and letters of credit, see Note 9 of Notes to Consolidated Financial Statements in Item 1 of this Report. If our current surety bond provider were to terminate these programs, we would seek alternative providers. The inability to retain our current provider or obtain alternative bonding sources could require us to post cash collateral, reduce the amount of cash available for our operations or cause us to curtail or limit existing operations.

Competition *The manufactured housing industry is very competitive. If we are unable to effectively compete, our growth could be limited, our sales could decline and our operating results and cash flows could suffer.*

The manufactured housing industry is highly competitive at both the manufacturing and retail levels, with competition based, among other things, on price, product features, reputation for service and quality, merchandising, terms of retailer promotional programs and the terms of consumer financing. Numerous companies produce manufactured homes in our markets. A number of our manufacturing competitors also have captive retail distribution systems and consumer finance operations. In addition, there are many independent manufactured housing retail locations in most areas where we have retail operations. Because barriers to entry for manufactured housing retailers are low, we believe that it is relatively easy for new retailers to enter our markets as competitors. In addition, our products compete with other forms of low to moderate-cost housing, including site-built homes, panelized homes, apartments, townhouses and condominiums. If we are unable to effectively compete in this environment, our retail sales and manufacturing shipments could be reduced. As a result, our sales could decline and our operating results and cash flows could suffer.

Zoning *If the manufactured housing industry is not able to secure favorable local zoning ordinances, our sales could decline and our operating results and cash flows could suffer.*

Limitations on the number of sites available for placement of manufactured homes or on the operation of manufactured housing communities could reduce the demand for manufactured homes and our sales. Manufactured housing communities and individual home placements are subject to local zoning ordinances and other local regulations relating to utility service and construction of roadways. In the past, property owners often have resisted the adoption of zoning ordinances permitting the use of manufactured homes in residential areas, which we believe has restricted the growth of the industry. Manufactured homes may not receive widespread acceptance and localities may not adopt zoning ordinances permitting the development of manufactured home communities. If the manufactured housing industry is unable to secure favorable local zoning ordinances, our sales could decline and our operating results and cash flows could suffer.

Dependence upon executive officers and other key personnel *The loss of any of our executive officers or other key personnel could reduce our ability to manage our businesses and achieve our business plan, which could cause our sales to decline and our operating results and cash flows to suffer.*

We depend on the continued services and performance of our executive officers and other key personnel. If we lose the service of any of our executive officers or other key personnel, it could reduce our ability to manage our businesses and achieve our business plan, which could cause our sales to decline and our operating results and cash flows to suffer.

Certain elements of our business strategy may not succeed *Our business strategy may not adequately address the issues currently facing our Company and the manufactured housing industry or correctly identify future trends in the industry. Any failure of our business strategy could cause our sales to decline and our operating results and cash flows to suffer.*

Since mid-1999, retail sales and manufacturing shipments of new manufactured homes have decreased as a result of high consumer repossession levels, tightened consumer credit standards, excess retail locations and inventory, a reduced number of consumer lenders in the industry, higher interest rates on consumer loans and a reduced number of floor plan lenders in the industry. As a result, our sales have declined, we have experienced operating losses and we have closed a significant number of manufacturing facilities and retail sales centers. We are implementing strategies designed to address these issues. These strategies may not be successful because the reasons for the decline in demand or future trends in the industry may not be correctly identified, and our operating results may not improve. In addition, factors beyond our control, such as increased competition, reductions in consumer demand or continued economic downturn, may offset any improved operating results that are attributable to our strategy. Any failure of our business strategy could cause our sales to decline and our operating results and cash flows to suffer or cause us to incur additional and potentially substantial losses to close and liquidate unsuccessful operations or lines of business.

Table of Contents

Restrictive covenants *The terms of our debt place operating restrictions on us and our subsidiaries and contain various financial performance and other covenants with which we must remain in compliance. If we do not remain in compliance with these covenants, certain of our debt facilities could be terminated and the amounts outstanding thereunder could become immediately due and payable.*

The documents governing the terms of our Senior Notes, primarily the Senior Notes due 2007, contain covenants that place restrictions on us and our subsidiaries. The terms of our debt agreements include covenants that, to varying degrees, restrict our and our subsidiaries' ability to:

incur additional indebtedness, contingent liabilities and liens;

issue additional preferred stock;

pay dividends or make other distributions on our common stock;

redeem or repurchase common stock and redeem, repay or repurchase subordinated debt;

make investments in subsidiaries that are not restricted subsidiaries;

enter into joint ventures;

use assets as security in other transactions;

sell certain assets or enter into sale and leaseback transactions;

restrict the ability of our restricted subsidiaries to pay dividends or make other distributions on their common stock;

engage in new lines of business;

guarantee or secure indebtedness;

consolidate with or merge with or into other companies; and

enter into transactions with affiliates.

We have a \$75 million revolving credit facility to use for letters of credit and general corporate purposes. Availability under this credit facility is limited to a borrowing base, and is collateralized by accounts receivable, inventories, property, plant and equipment, cash and other assets. The agreement contains certain financial covenants that require us, only in the event that our liquidity, as defined, falls below \$35 million, to maintain certain levels of earnings, as defined, and certain ratios of earnings to fixed charges, as defined in the agreement. In addition, the facility contains covenants that limit our ability to incur additional indebtedness and liens, sell assets and, if liquidity falls below \$35 million, make certain investments, pay dividends and purchase or redeem our common stock. For additional detail and discussion concerning these financial covenants see "Liquidity and Capital Resources" in Item 2 of this Report.

One of our floor plan financing facilities contains a covenant requiring the maintenance of \$35 million of liquidity, as defined in the facility, at each month end. If we were to be out of compliance with this covenant, the lender could terminate the credit line and cause the related debt to become immediately due and payable. For additional detail and discussion concerning this facility and the amounts outstanding under this facility see "Liquidity and Capital Resources

in Item 2 of this Report.

If we fail to comply with any of these covenants, the lenders could cause our debt to become due and payable prior to maturity. If our debt were accelerated, our assets might not be sufficient to repay our debt in full.

Potential Dilution *Outstanding preferred stock that is convertible into common stock and redeemable for common stock (and in some cases, at our option, for cash), a warrant to acquire common stock, a deferred purchase price obligation that is payable, at our option, in cash or common stock, and other potential capital or debt reduction transactions could result in potential dilution and impair the price of our common stock.*

At October 2, 2004 there was \$8.75 million of Series C preferred stock outstanding, which is convertible into common stock at a rate of \$5.66 per share, and \$12 million of Series B-2 preferred stock outstanding, which is convertible into common stock at a rate of \$7.92 per share. The Series C and B-2 preferred stock have mandatory redemption dates of April 2, 2009 and July 3, 2008, respectively. Our preferred shareholder has the right to redeem this preferred stock for common stock, and, at our option, partially for cash.

We pay a quarterly dividend on the preferred stock at a rate of 5% per annum. The dividend is payable in cash or shares of our common stock, at our option. The number of shares issuable in payment of these dividends depends on the market value of the common stock at the time of issuance (subject to certain limitations). As a result, assuming we elected to pay any dividend in shares of common stock, the preferred shareholder would receive a greater number of shares of common stock in payment of those dividends if our common stock price decreases.

Table of Contents

We have a warrant outstanding which is exercisable based on approximately 2.2 million shares of common stock at a current strike price of \$11.52 per share. The warrant strike price increases annually in April by \$0.75 per share. The warrant expires on April 2, 2009. The warrant is exercisable only on a non-cash, net basis, whereby the warrant holder would receive shares of common stock as payment for the net gain upon exercise.

As of October 2, 2004, we had \$4 million of a deferred purchase price obligation which is payable in quarterly installments of \$2 million through January 3, 2005. Quarterly installments may be made in cash or shares of common stock, at our option. The number of shares to be issued in any quarterly payment depends on the market value of the common stock. As a result, assuming we elected to pay any quarterly installment in shares of common stock, as we have in the past, the recipients would receive a greater number of shares of common stock in payment of those installments if our common stock price decreases.

In a series of transactions during the fourth quarter of 2003 and the first quarter of 2004, we purchased and retired \$71.7 million of our Senior Notes due 2007 and 2009 in exchange for 10.4 million shares of our common stock.

To the extent that the preferred shareholder elects to convert or redeem the preferred stock into common stock, or we elect to make dividend payments on preferred stock or the deferred purchase price obligation payments in common stock, or we reduce debt obligations through the issuance of common shares, our then existing common shareholders would experience dilution in their percentage ownership interests. The additional shares of common stock that could be available for sale upon conversion or redemption of the preferred stock, as dividends on the preferred stock, in payment of the deferred purchase price obligation, or in payment of our outstanding debt, may have a negative impact on the market price of our common stock. In addition, sale of substantial amounts of our common stock in the public market by the preferred shareholder, the recipients of the deferred purchase price payments, or the exchangers of Senior Notes, or the perception that these sales might occur, could depress the price of our common stock. Such selling shareholders may determine the timing, structure and terms of any disposition of our common stock, all of which could affect the market price of our common stock.

We may seek additional sources of capital and financing in the future or issue securities in connection with retiring our outstanding indebtedness, the terms of which may result in additional potential dilution.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Our floor plan borrowings and obligations under industrial revenue bonds are subject to variable rates of interest based on the U.S. prime interest rate, short-term tax exempt rate indices and LIBOR, respectively. Without consideration of the minimum rate of interest on certain of the floor plan borrowings, a 100 basis point increase in the underlying interest rates would result in additional annual interest cost of approximately \$0.3 million, assuming average related debt of \$26.4 million, the amount of outstanding borrowings at October 2, 2004.

Item 4. Controls and Procedures.

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15 of the Securities Exchange Act of 1934. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective to cause material information required to be disclosed by the Company in the reports that we file or submit under the Securities Exchange Act of 1934 to be recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms. During the quarter ended October 2, 2004, there were no changes in our internal control over financial reporting which materially affected, or would have been reasonably likely to have materially affected, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

On January 5, 2004, April 5, 2004, July 6, 2004, and October 4, 2004 we issued 275,996 shares, 193,047 shares, 214,361 shares, and 196,250 shares of our common stock, respectively, in connection with each of the \$2.0 million quarterly installment payments under convertible promissory notes issued June 21, 2001. These notes represent a deferred purchase price obligation of the Company. Although these shares of common stock were issued in private placements in reliance on the exemption from registration contained in Section 4(2) of the Securities Exchange Act of 1933, such shares of common stock have been registered for resale under the Securities Exchange Act of 1933, pursuant to effective registration statements.

On March 2, 2004, we completed the sale of 12,000 shares of Series B-2 Cumulative Convertible Preferred Stock to Fletcher International, Ltd. (Fletcher), an accredited investor, in reliance upon Section 4(2) of the Securities Act of 1933, as amended. The sale was pursuant to the exercise by Fletcher of its right to purchase \$12 million of preferred stock under an agreement dated as of June 29, 2001, by and between Fletcher and the Company. The Series B-2 preferred stock is convertible into our common stock at a rate of \$7.92 per share through the mandatory redemption date of July 3, 2008. The aggregate purchase price for this preferred stock was \$12 million and the proceeds were used for general corporate purposes.

Item 5. Other Information

On June 30, 2003, in connection with the appointment of Albert A. Koch as Chairman of the Board, President and Chief Executive Officer, the Company entered into a letter agreement with AP Services, LLC, pursuant to which AP Services provided interim management services to the Company, including the services of Mr. Koch. Also on June 30, 2003, the Company entered into a letter agreement with AlixPartners, LLC, pursuant to which AlixPartners provided financial and operational consulting services to the Company. These agreements were approved by all of the independent members of the Board. Mr. Koch is a Principal of AlixPartners, LLC. The services of Mr. Koch provided under the AP Services agreement ended on July 31, 2004 and Mr. Koch resigned from the Board on August 17, 2004.

The Board formed a review committee comprised solely of independent directors to (i) review, oversee and monitor the services provided to the Company by AP Services and AlixPartners pursuant to the June 30, 2003 agreements or under other Board approved agreements; (ii) review, monitor and approve invoices for services provided by either AP Services or AlixPartners under Board approved agreements; (iii) review and make recommendations to the full Board concerning any proposals for additional services to the Company by AP Services or AlixPartners; (iv) review, monitor and take appropriate action concerning any questions or issues that may arise in connection with services provided by AP Services or AlixPartners; and (v) make regular reports to the Board concerning the performance and progress of AP Services and AlixPartners under all such Board approved agreements. The review committee performed these functions through August 17, 2004.

During the three and nine months ended October 2, 2004, we recorded expenses of \$1.3 million and \$3.7 million and paid fees of \$0.9 million and \$2.4 million, respectively, for services rendered under all of the arrangements with AP Services and AlixPartners, including the services of Mr. Koch.

In an effort to better align our operations and further improve our cost structure, in October 2004 we reorganized our retail and manufacturing operations into five geographic regions, each with a single regional president. As a result, in October 2004 we eliminated the position of President, Retail Operations and terminated the employment of Mark Cole. Management will continue to focus on improving the profitability of its retail segment.

As of October 15, 2004 we sold the assets and business of our western retail region, comprised of four traditional sales centers and four other sales locations, for cash of approximately \$4.1 million. No significant gain or loss will be recorded as a result of this transaction. We may consider disposition of additional locations as part of our strategy to improve the profitability of our retail operations.
