USDATA CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. SIGNIFICANT ACCOUNTING POLICIES

The accompanying unaudited consolidated financial statements of USDATA and our subsidiaries for the three-month periods ended March 31, 2002 and 2001 have been prepared in accordance with generally accepted accounting principles in the United States of America. Significant accounting policies followed by USDATA were disclosed in the notes to the consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2001. In the opinion of our management, the accompanying consolidated financial statements contain the adjustments, consisting of normal recurring adjustments, necessary to present fairly our consolidated financial position at March 31, 2002 and the consolidated results of our operations and comprehensive loss, and cash flows for the periods ended March 31, 2002 and 2001. Operating results for the three months ended March 31, 2002 are not necessarily indicative of the results that may be expected for the year ending December 31, 2002.

2. NET LOSS PER SHARE OF COMMON STOCK

Net loss per share of common stock is presented in accordance with the provisions of SFAS No. 128, "Earnings Per Share." Under SFAS No. 128, basic loss per share excludes dilution for potentially dilutive securities and is computed by dividing income or loss available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted earnings (loss) per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. Potentially dilutive securities are excluded from the computation of diluted earnings (loss) per share when their inclusion would be antidilutive to the results of continuing operations.

Options to purchase 445,180 and 261,456 shares of common stock for 2002 and 2001, respectively, were not included in the computation of diluted earnings per share as their impact would be antidilutive. In addition, warrants to purchase 1.7 million shares of common stock and 2.3 million shares of common stock that may be received by the holders of our convertible preferred stock were not included in the computation of diluted earnings per share because their inclusion would be antidilutive.

3. SOFTWARE HELD FOR RESALE

We entered into a source code license agreement with the developer of the client graphics used within our FactoryLink(R) software product on March 20, 2002 (the "Effective Date"). We have a nonexclusive right to reproduce, modify and incorporate the licensed software into other computer software. In addition, the licensed software shall be marketed, distributed and sublicensed under one

Edgar Filing: USDATA CORP - Form 10-Q

or more of our and/or third party's trademarks, trade names or service marks. The purchase price of the licensed software was \$900,000 payable over three years as follows: (a) \$200,000 within 10 business days of the Effective Date; (b) \$200,000 six months after the Effective Date; (c) \$250,000 on March 20, 2003; and (d) \$250,000 on March 20, 2004. We capitalized the original purchase price of \$900,000 of the licensed software as software held for resale. \$650,000 is included in other current liabilities with the balance of \$250,000 included in other non-current liabilities.

4. SERIES C-1 PREFERRED STOCK PURCHASE AGREEMENT AMENDMENT

On March 30, 2001, we entered into a Series C Preferred Stock Purchase Agreement with SCP Private Equity Partners II, L.P. ("SCP") whereby we issued through a private placement 37,500 shares of our Series C-1 Convertible Preferred Stock ("Series C-1 Preferred") and a warrant to purchase up to 75,000 shares of Series C-2 Convertible Preferred Stock ("Series C-2 Preferred") to SCP for \$1.5 million. In addition, SCP committed to purchase an additional 37,500 shares of Series C-1 Preferred ("Option Stock") at \$40 per share or \$1.5 million. SCP and Safeguard 2000 Capital, L.P. ("Safeguard 2000") each hold warrants exercisable for 5,300,000 shares and 5,300,000 shares, respectively, of our discontinued operation eMake Corporation's ("eMake") Series A-1 and A-2 Preferred Stock, which are convertible into a total of 265,000 shares of our Series B Convertible Preferred Stock. As an additional condition to this equity

6

USDATA CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

financing, SCP and Safeguard 2000 agreed not to convert to our Series B Convertible Preferred Stock upon exercise of their eMake warrants to acquire Series A-1 and A-2 Preferred Stock, respectively.

On March 8, 2002, USDATA and SCP entered into a First Amendment to the Series C Preferred Stock Purchase Agreement (the "Agreement"). The Agreement extended the Option Stock exercise period from December 31, 2001 to December 31, 2002, deleted the specified monthly target provisions and provided for additional warrant coverage equal to 50% of the remaining Option Stock, or 10,625 shares. All other terms of the original Series C Preferred Stock Purchase Agreement were unchanged. The Agreement was unanimously approved by the disinterested members of our Board of Directors on March 8, 2002. As of March 31, 2002, we have not exercised our right to sell any shares of the Option Stock to SCP and have \$850,000 available under this equity arrangement.

5. OFFICE LEASE AGREEMENT AMENDMENT

We are party to an Office Lease Agreement, as amended (the "Lease"), under which we are the tenant of approximately 79,382 rentable square feet. On March 19, 2002, we entered into a Fourth Amendment to the Lease (the "Fourth Amendment") with Crescent Real Estate Funding VIII, L.P. (the "Landlord") to reduce our lease payment commitment obligations and our unused lease premises. Pursuant to the Fourth Amendment, the Landlord reacquired approximately 44,400 rentable square feet, reducing our headquarters' space to 34,982 rentable square feet ("Existing Premises"). We sublease approximately 14,802 square feet of the Existing Premises. The Fourth Amendment extended the lease term four months to December 31, 2010, and increased the base rental rate per square foot on the Existing Premises by \$1.00 each year beginning in 2003 and ending in 2005. In year 2006, the base rental rate per square foot increases by \$1.75 from year

Edgar Filing: USDATA CORP - Form 10-Q

2005 and remains constant through year 2010. In addition, we owed \$444,000 at March 31, 2002 to the Landlord representing rents due on the excess leased space for five months. The Landlord agreed to waive any claim to such amount owed contingent upon timely payment of all rent required to be paid on the Existing Premises. The \$444,000 will be reduced by \$51,000 per year over the remaining term of the lease. We also transferred to the Landlord our right, title and interest on excess office furniture, with a carrying value of approximately \$135,000 on March 31, 2002. In connection with the Fourth Amendment, we issued a Warrant, dated March 19, 2002, to the Landlord for the purchase of up to 243,902 shares of our common stock at an exercise price per share of \$2.05, the closing market price on the date of the Warrant. The Warrant is exercisable by the Landlord, in whole or in part, at any time commencing on March 19, 2002 and ending on March 18, 2007. In addition, under the Fourth Amendment, we released certain rights, such as our right to terminate the Lease in 2005, certain preferential rights to lease additional space and the right to extend the lease. The Fourth Amendment provides a cash savings to us of approximately \$1.0 million in lease costs during 2002.

We will compute rent expense to be recognized under the amended arrangement considering the increasing rent over the rent term and all amounts previously accrued for rent expense, including approximately \$1.1 million recorded in the third quarter of 2001 for unoccupied lease space, \$135,000 for the excess office furniture transferred to the Landlord and \$383,000 for the value of the Warrant issued on March 19, 2002. The \$1.1 million accrual will be accounted for as a lease incentive and amortized over the remaining lease term as an offset to rent expense and the carrying value of the excess office furniture will be amortized as an increase to rent expense.

6. REVOLVING CREDIT FACILITY

We maintain a revolving credit facility with JPMorgan Chase Bank to provide us with working capital assistance relating to timing of our cash flow. At March 31, 2002, we were not in compliance with two debt covenants under our revolving credit facility: (1) the tangible net worth covenant and (2) earnings before interest, taxes, depreciation and amortization ("EBITDA") covenant. Subsequently, on April 15, 2002, we received a waiver from the lending bank for these covenants and increased the tangible net worth covenant going forward, primarily to take into account the restructuring charge recorded in the first quarter of 2002. In addition, as of April 15, 2002, the interest rate increased by 75 basis points to prime plus 2.25% per annum. At March 31, 2002 and December 31, 2001, \$812,000 and \$1.1 million, respectively, was

7

USDATA CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

drawn on the credit facility and is included in current liabilities. Based on the qualifying borrowing base arrangement under the credit facility, total remaining availability at April 26, 2002 was \$418,000.

7. SEVERANCE AND OTHER RESTRUCTURING ACCRUALS

The following table summarizes by category the accrued liability balances at March 31, 2002 related to our 2000 restructuring plans.

Edgar Filing: USDATA CORP - Form 10-Q

(in thousands)	Amount Accrued at 12/31/01	Restructuring charge	Reverse accrued lease costs over lease term	200 Cas Paym
Employee-related costs	\$ 59	\$ --	\$ --	\$
Lease costs associated with vacated office space	1,114	--	(23)	
Other related costs	17	356		
	-----	-----	-----	-----
	\$ 1,190	\$ 356	\$ (23)	\$
	=====	=====	=====	=====

In the third quarter of 2001, we accrued \$1.1 million in restructuring charges representing an additional year of lease costs associated with the vacated office space resulting from our 2000 restructuring plans. On March 19, 2002, we entered into a Fourth Amendment to the Lease, described in Note 5, whereby the Landlord removed this excess office space under the facility lease. The \$1.114 million balance at December 31, 2001 will be accounted for as a lease incentive and amortized off over the remaining lease term as an offset to rent expense. In connection with the Fourth Amendment, we recorded \$356,000 in restructuring charges for the consultant who assisted us in the negotiations. One-third of the consulting fee was paid in April 2002 and the remaining two-thirds is payable monthly through September 2005.

The employee related costs are included in accrued compensation and benefits and the current portion of lease costs associated with vacated office space of \$144,000 and other related costs of \$68,000 are included in other accrued liabilities in the accompanying condensed consolidated balance sheets. The non-current portion of \$1.2 million is included in other non-current liabilities.

USDATA CORPORATION AND SUBSIDIARIES

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

OVERVIEW

USDATA is a global provider of software and services that give enterprises the knowledge and control needed to perfect the products we produce and the processes we manage. Based upon a tradition of flexible service, innovation and integration, our software currently operates in more than 60 countries around the globe, including 17 of the top 25 manufacturers. Our software heritage is born out of manufacturing and process automation solutions and has grown to encompass the industry's product knowledge and control solutions. We continue to innovate solutions that will support the integration of enterprise production and automation information into the supply chain. We have six offices worldwide and a global network of distribution and support partners.

Our software products are designed to enable manufacturers access to more accurate and timely information - whether they are on the plant floor, in the office, or around the globe. Our solutions span a wide range of

Edgar Filing: USDATA CORP - Form 10-Q

manufacturing processes, from monitoring equipment to tracking product flow, and are designed to integrate with customers' existing manufacturing and business software, as well as, help customers manage their business in real time, reduce operating costs, shorten cycle times and improve quality in their manufacturing operations. This combination of product breadth and ease of integration is intended to provide a total plant solution intended to improve manufacturing performance and give customers a competitive advantage.

Revenues have been generated primarily from licenses of our FactoryLink(R) and Xfactory(R) software and secondarily from technical support and service agreements, training classes and product related services. The support and service agreements are generally one-year, renewable contracts entitling a customer to certain software upgrades and technical support. Revenue from services represented approximately 18% and 14% of revenues during the three months ended March 31, 2002 and 2001, respectively.

FactoryLink(R) is a process knowledge and control solution used to develop custom supervisory control and data acquisition ("SCADA") and human machine interfaces ("HMI") for the supervision and control of a broad range of automated processes. FactoryLink(R) is a horizontal application tool set used by systems integrators and end customers to build automation and control applications for a wide variety of industrial markets such as electronics assembly, semiconductor, automotive, building automation, food and beverage, pharmaceuticals, metals, mining, cement, oil and gas, electricity generation, transmission and distribution and water and waste water transport. It allows customers to collect and monitor data from disparate process control systems and acts as a hub for real-time information that may be used by various decision makers interested in the real-time status of the production process.

Our latest releases of FactoryLink(R) include FactoryLink(R) 7, which is designed to have a lower total cost of ownership than other SCADA/HMI products on the market and FactoryLink(R)++. FactoryLink(R)++ is designed specifically to help new SCADA/HMI users to jump start application development, lower application maintenance and reduce project risk. FactoryLink(R)++ includes integrated modules, concepts, methods and tools designed to help end users, integrators, original equipment manufacturers and consultants achieve the maximum value out of the FactoryLink(R) software system.

Xfactory(R) is a product knowledge and control solution designed to capture and communicate real-time manufacturing data from the shop floor to the people and systems who need it, when they need it. The information is intended to help customers make better-informed decisions and reduce manufacturing costs and lead times. Xfactory(R) is designed to track all aspects of discrete manufacturing production maintaining historically accurate records as well as real-time production information, defect tracking, complete product

9

genealogy and integration into enterprise software systems. Xfactory(R) is intended to benefit manufacturing customers by reducing work in progress, lowering cost of errors, and lowering cost of compliance with government regulations, while limiting the amount of rework and increasing product revenue. The Xfactory(R) suite includes a process knowledge and control module based on our FactoryLink(R) product. In November 2001, we announced the worldwide release of our newest version of Xfactory(R). Xfactory (R) 2.0 is intended to enhance real-time visibility and decision-making, performance monitoring, analysis and reporting and data management.

We focus our sales efforts through selected distributors capable of

Edgar Filing: USDATA CORP - Form 10-Q

providing the level of support and expertise required in the industrial automation market. We currently have channel support locations in the United States and Europe. Our distributors have sales locations throughout North and South America, Europe, the Far East and the Middle East.

FORWARD LOOKING STATEMENTS

This document contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 regarding revenues, margins, operating expenses, earnings, growth rates and certain business trends that are subject to risks and uncertainties that could cause actual results to differ materially from the results described herein. Specifically, the ability to grow product and service revenues may not continue and we may not be successful in developing new products, product enhancements or services on a timely basis or in a manner that satisfies customers' needs or achieves market acceptance. Other factors that could cause actual results to differ materially are: competitive pricing and supply, market acceptance and success for service offerings, short-term interest rate fluctuations, general economic conditions, employee turnover, possible future litigation, and related uncertainties on future revenue and earnings as well as the risks and uncertainties set forth from time to time in our other public reports and filings and public statements. Recipients of this document are cautioned to consider these risks and uncertainties and to not place undue reliance on these forward-looking statements. See "Business" in Part I, Item 1 of our Annual Report on Form 10-K for the period ended December 31, 2001 for a discussion of other important factors that could affect the validity of any such forward-looking statement. All subsequent written and oral forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by these cautionary statements.

RESULTS OF OPERATIONS

The following table presents selected financial information relating to our financial condition and results of operations and should be read in conjunction with the consolidated financial statements and notes included herein. The table sets forth, for the periods indicated, our statement of operations as a percentage of revenues.

	THREE MONTHS ENDED MARCH 31,	
	2002	2001
	----	----

Interest expense	(1)%	(2)%

Edgar Filing: USDATA CORP - Form 10-Q

Other income, net	0%	0%
	----	----
Net loss	(34)%	(16)%
	----	----
Dividends on preferred stock, preferred stock warrant and beneficial conversion	(26)%	(234)%
	----	----
Net loss applicable to common stockholders	(60)%	(250)%
	=====	=====

10

Total revenues for the quarter ended March 31, 2002 were \$2.6 million, a decrease of \$866,000 when compared to \$3.5 million in revenues for the same period in 2001. Product licensing revenue decreased \$836,000 and revenue from services decreased \$30,000. The decrease in product licensing revenue is primarily due to longer cycle times for sales to close when compared to the first quarter of 2001. Purchases of software licenses continue to be delayed or downsized. This is attributed to the continuing uncertain economic environment, which showed no evidence of a sustainable recovery in the industrial automation market. This continued economic uncertainty could affect buying decisions going forward making revenue and operating results more difficult to forecast.

Selling and product materials expenses for the quarter ended March 31, 2002 were \$2.0 million, a decrease of \$291,000 when compared to \$2.3 million for the same period in 2001. The decrease is a result of decreased sales, marketing and technical support services totaling \$277,000 primarily attributed to decreases in travel, consulting services and personnel (2 employees in marketing and 1 in sales). In addition, capitalized software amortization decreased in the first quarter of 2002 when compared to 2001 due to software being fully amortized or written off after March 31, 2001. Selling and product materials expenses as a percentage of revenues increased to 77% for the quarter ended March 31, 2002 from 66% for the same period in 2001 due to the decrease in revenues.

Product development expenses for the quarter ended March 31, 2002, net of amounts capitalized, were \$379,000, a decrease of \$111,000 when compared to \$490,000 for the same period in 2001. Product development expenses consist primarily of labor costs. The decrease in 2002 is related to an increase in capitalized software development costs in engineering development activities related to the FactoryLink product line. We capitalized \$251,000 of development costs in the quarter ended March 31, 2002 and \$151,000 for the same period in 2001. Product development expenses as a percentage of revenues increased slightly to 15% for the quarter ended March 31, 2002 from 14% for the same period in 2001.

General and administrative expenses for the quarter ended March 31, 2002 were \$741,000, a decrease of \$431,000 when compared to \$1.172 million for the same period in 2001. The decrease in general and administrative expenses is due to the first quarter of 2001 including approximately \$200,000 in consulting fees related to providing us with operational assistance in executing the cost cutting initiatives resulting from the 2000 restructuring plans in addition to further cost cutting and revenue generating initiatives to be implemented throughout 2001. Information technology expenses decreased by over \$200,000 as a direct result of these cost cutting initiatives. General and administrative expenses as a percentage of revenues decreased to 28% for the quarter ended March 31, 2002 from 34% for the same period in 2001.

Edgar Filing: USDATA CORP - Form 10-Q

On March 19, 2002, we entered into a Fourth Amendment to our Office Lease Agreement with Crescent Real Estate Funding VIII, L.P. (the "Landlord") which provides for, among other things, the Landlord removing approximately 44,400 square feet of rentable excess office space. In connection with the Fourth Amendment, we recorded \$356,000 in a non-recurring restructuring charge for the consultant who assisted us in the negotiations.

As a result of the factors discussed above, we recorded a loss from operations of \$867,000 for the quarter ended March 31, 2002, compared to a loss from operations of \$478,000 for the same period in 2001.

CRITICAL ACCOUNTING POLICIES

In preparing our financial statements, management is required to make estimates and assumptions that, among other things, affect the reported amounts of assets and liabilities and reported amounts of revenues and expenses. These estimates are most significant in connection with our most critical accounting policies, namely our accounting policies that are most important to the portrayal of our financial condition and results and require management's most difficult, subjective or complex judgments. These judgments often result from the need to make estimates about the effects of matters that are inherently uncertain. The following is a brief discussion of the more critical accounting policies and methods that we use.

11

Significant Estimates and Assumptions

Our management has made a number of estimates and assumptions related to the reporting of assets and liabilities in preparation of the consolidated financial statements in conformity with generally accepted accounting principles in the United States of America. The most significant estimates relate to the allowance for doubtful accounts, the determination of the recoverability of property and equipment, capitalized software development costs, software held for resale, and the valuation of deferred tax assets.

In determining the adequacy of the allowance for doubtful accounts, management considers a number of factors, including the aging of the receivable portfolio, customer payment trends, financial condition of the customer, economic conditions in the customer's country and industry conditions. For the period ended March 31, 2002, we did not experience any charges to bad debt expense, however, due to the general weakening of the economy during 2001 and into 2002, there can be no assurance that this trend will continue. Actual amounts could differ significantly from management's estimates.

Management assesses the recoverability of property and equipment, capitalized software development costs and software held for resale by determining the estimated future cash flows related to such assets. Management reviews these assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is generally measured by a comparison of the carrying amount of an asset to future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is equal to the amount by which the carrying amounts of the assets exceed the fair values of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value, less costs to sell.

Management's estimates of future cash flows are based in part upon prior performance, industry conditions, economic conditions, technology trends

Edgar Filing: USDATA CORP - Form 10-Q

and customer relationships. Changes in these factors or other factors could result in significantly different cash flow estimates and an impairment charge.

In assessing the realizability of deferred income tax assets, management considers whether it is more likely than not that the deferred income tax assets will be realized. The ultimate realization of deferred income tax assets is dependent on the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred income tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Based on the level of historical taxable income and projections for future taxable income over the periods in which the deferred income tax assets are deductible, management has fully reserved all deferred tax assets to the extent such assets exceed deferred tax liabilities.

Revenue Recognition

We earn revenue primarily from license fees, maintenance fees and professional services sold through direct sales or through our channel partners. The license arrangements, do not provide for a right of return, and are primarily non-transferable and non-exclusive perpetual licenses. We offer two types of maintenance fees: one that provides the customer the right to telephone support and to receive error and bug fix releases and one that provides upgrade version releases of the product during the maintenance term.

We recognize revenue in accordance with Statement of Position 97-2, Software Revenue Recognition ("SOP 97-2"), as amended by SOP 98-9, and we generally recognize revenue when all of the following criteria are met as set forth in paragraph 8 of SOP 97-2: (1) persuasive evidence of an arrangement exists; (2) delivery has occurred; (3) the fee is fixed or determinable; and (4) collectibility is probable. Each of the four criteria above is defined as follows:

Persuasive evidence of an arrangement exists. It is customary practice to have a written contract, which is signed by both the customer and us or, in situations where a contract is not required, a customer purchase order has been received.

12

Delivery has occurred. Our software may be either physically or electronically delivered to the customer. Delivery is deemed to have occurred upon the delivery of the electronic code or the shipment of the physical product based on standard contractual committed shipping terms, whereby risk of loss passes to the customer when shipment is picked up by the carrier. If undelivered products or services exist in an arrangement that is essential to the functionality of the delivered product, delivery is not considered to have occurred until these products or services are delivered as described above.

The fee is fixed or determinable. Our customers generally pay a per-license fee that is based on the number of servers on which the software is installed, the size of the application that they will develop for the software, the options provided for those servers, and the number of client workstations that access with the server. Additional license fees are due when the total number of subscribers using our products increases beyond the specified number for which a license was purchased or when additional options are added. License fees are generally due within 30-45 days from product delivery in the United States and within 30 - 60 days from product delivery internationally.

Edgar Filing: USDATA CORP - Form 10-Q

Collectibility is probable. Collectibility is assessed on a customer-by-customer basis. We typically sell to customers with high credit ratings and solid payment practices. New customers are subjected to a credit review process, in which we evaluate the customers' financial position and ultimately their ability to pay. If it is determined from the outset of an arrangement that collectibility is not probable based upon our credit review process, revenue is recognized as cash payments are received.

We allocate revenue on software arrangements involving multiple elements to each element based on the relative fair value of each element. Our determination of fair value of each element in multiple element arrangements is based on vendor-specific objective evidence ("VSOE"). We limit our assessment of VSOE to the price charged when the same element is sold separately. We have analyzed all of the elements included in our multiple-element arrangements and determined that we have sufficient VSOE to allocate revenue to maintenance and support services and professional service components of our license arrangements. We sell our professional services separately, and have established VSOE on this basis. VSOE for maintenance and support services is based on the customer's annual renewal rates for these elements. Accordingly, assuming all other revenue recognition criteria are met, revenue from licenses is recognized on delivery using the residual method in accordance with SOP 98-9, and revenue from maintenance and support services is recognized ratably over the respective term.

Professional services generally are not essential to the functionality of the software. Our software products are fully functional upon delivery and implementation and do not require any significant modification or alteration. Customers purchase these professional services to facilitate the adoption of our technology and dedicate personnel to participate in the services being performed, but they may also decide to use their own resources or appoint other professional service organizations to provide these services. Software products are typically billed separately and independently from professional services, which are generally billed either on a time-and-materials or a milestone-achieved basis. We generally recognize revenue from professional services as the services are performed.

Capitalized Software Development

Software development costs incurred prior to establishing technological feasibility are charged to operations and included in product development costs. Software development costs incurred after establishing technological feasibility, and purchased software costs, are capitalized and amortized on a product-by-product basis when the product is available for general release to customers. We establish technological feasibility when we have completed all planning, designing, coding and testing activities necessary to determine that the final product meets its design specifications, specifically when we have completed a detail program design and are ready to begin coding. Annual amortization, which is charged to selling and product materials, is the greater of (i) the amount computed using the ratio that current gross revenues for a product bear to the total of current and anticipated future gross revenues for that product, or (ii) the straight-line method over the remaining estimated economic life of the product. We amortize capitalized software development and purchased software costs using the straight-line method over the remaining estimated economic life of the product, generally three years.

Edgar Filing: USDATA CORP - Form 10-Q

Our operating activities provided \$590,000 of cash during the first quarter ended March 31, 2002, compared to using \$721,000 for the same period in 2001. Contributing to cash provided by operations during the first quarter of 2002 was a \$630,000 decrease in accounts receivable and a \$100,000 increase in accounts payable, partially offset by a decrease in other assets and net cash used in discontinued operations. Contributing to cash used in operations during the first quarter of 2001 was a \$370,000 decrease in accrued compensation and benefits, primarily due to severance payments related to the 2000 restructuring plans, a \$937,000 decrease in accounts payable, a net loss of \$539,000 and \$1.2 million in net cash used in discontinued operations. This was partially offset by net collections on accounts receivable of \$1.3 million and 898,000 for depreciation and amortization.

Net cash used in investing activities was \$262,000 for the quarter ended March 31, 2002, compared to using \$2,000 for the same period in 2001. The increase in cash used in investing activities is partially due to a \$100,000 increase in capitalized software development cost from \$151,000 for the first quarter ended 2001 to \$251,000 for the same period in 2002. In addition, we received a \$209,000 leasehold improvement refund in the first quarter of 2001. Offsetting the increase in cash used in investing activities was a \$49,000 decrease in capital expenditures from \$60,000 for the first quarter ended 2001 to \$11,000 for the same period in 2002.

Net cash used in financing activities was \$506,000 for the quarter ended March 31, 2002, compared to net cash provided by financing activities of \$1.4 million for the same period in 2001. During 2002, we paid down \$655,000 on our debt obligations, of which \$333,000 related to our revolving line of credit, partially offset by other borrowings of \$138,000. Contributing to cash provided by financing activities during the first quarter of 2001 was \$1.4 million in net proceeds related to issuing 37,500 shares of our Series C-1 Convertible Preferred Stock and borrowing \$842,000 from our revolving line of credit, offset by \$1.0 million in payments on our debt obligations.

Our working capital requirements have been funded through internally generated funds, the \$3.0 million revolving line of credit and various equity and debt financings from SCP and Safeguard Scientifics, Inc. We currently anticipate that our ongoing working capital requirements will continue to be funded through internally generated funds, our revolving credit facility and \$850,000 available under the equity financing arrangement with SCP discussed below. We believe such source of funds will be sufficient to satisfy our operating and debt service cash needs for the foreseeable future. However, based on the conditional financing arrangements, there can be no assurance that we will be able to obtain any additional debt funding on terms acceptable to us, if at all. If necessary, we will delay certain operations and capital expenditures until adequate financing is obtained. In the event we are unable to secure sufficient debt or equity financing and our cash flows from operations are not sufficient to meet future cash requirements, our operations would be materially adversely affected.

Equity Financings

On March 30, 2001, we entered into a Series C Preferred Stock Purchase Agreement with SCP whereby we issued through a private placement 37,500 shares of our Series C-1 Preferred and a warrant to purchase up to 75,000 shares of Series C-2 Preferred to SCP for \$1.5 million. In addition, SCP committed to purchase an additional 37,500 shares of Series C-1 Preferred ("Option Stock") at \$40 per share or \$1.5 million. SCP and Safeguard 2000 Capital, L.P. ("Safeguard 2000") hold warrants exercisable for 5,300,000 shares and 5,300,000 shares, respectively, of eMake Series A-1 and A-2 Preferred Stock, which are convertible into a total of 265,000 shares of our Series B Convertible Preferred Stock. As an additional condition to this equity financing, SCP and Safeguard 2000 agreed not to convert upon exercise of eMake warrants to acquire Series A-1 and A-2

Edgar Filing: USDATA CORP - Form 10-Q

Preferred Stock, respectively.

On July 20, 2001, we exercised our right to sell 16,250 shares of the Option Stock to SCP. We received \$635,596 in cash, net of transaction costs, in exchange for the shares. As of March 31, 2002, 53,750 shares of Series C-1 Preferred are issued and outstanding, and we have received \$2.1 million, net of transaction costs, in total proceeds.

14

On March 8, 2002, USDATA and SCP entered into a First Amendment to the Series C Preferred Stock Purchase Agreement (the "Agreement"). The Agreement extended the Option Stock exercise period from December 31, 2001 to December 31, 2002, deleted the specified monthly target provisions and provided for additional warrant coverage equal to 50% of the remaining Option Stock, or 10,625 shares. All other terms of the original Series C Preferred Stock Purchase Agreement were unchanged. The Agreement was unanimously approved by the disinterested members of our Board of Directors on March 8, 2002. As of March 31, 2002, we have not exercised our right to sell any shares of the remaining Option Stock and have \$850,000 available under this equity arrangement.

As of March 31, 2002, we have issued 50,000 shares of our Series A Convertible Preferred Stock ("Series A Preferred") with a liquidation preference of \$100 per share, plus cumulative dividends; 265,000 shares of our Series B Convertible Preferred Stock ("Series B Preferred") with a liquidation preference of \$100 per share, plus cumulative dividends; 53,750 shares of our Series C-1 Preferred with a liquidation preference of \$80 per share, plus cumulative dividends; and a warrant for the purchase of 75,000 shares of our Series C-2 Preferred (and collectively, with the Series C-1 Preferred, the "Series C Preferred") with a liquidation preference of \$120 per share, plus cumulative dividends.

The Series C Preferred ranks senior to all other classes and series of our capital stock with respect to dividend rights, rights on liquidation, dissolution and winding up, and the Series B Preferred ranks senior to the holders of the Series A Preferred with respect to dividend rights, rights on liquidation, dissolution and winding up. In the event of any liquidation, merger, acquisition, dissolution or winding up of USDATA, whether voluntary or involuntary, the preferred stockholders shall be entitled to preferential distribution of up to approximately \$50.0 million in value, prior and in preference to any distribution of any of our assets or surplus funds to the holders of our common stock. For example on an as-converted basis, the holders of Series C Convertible Preferred Stock would be entitled to up to \$15.0 million in value prior to any distribution to common stockholders, the holders of Series B Convertible Preferred Stock would be entitled to up to \$29.0 million in value prior to any distribution to common stockholders, and the holders of Series A Convertible Preferred Stock would be entitled to up to \$6.0 million in value prior to any distribution to common stockholders.

Debt Financings

On January 15, 2002, we successfully renewed our revolving credit facility ("Credit Facility") with JPMorgan Chase. The Credit Facility provides for \$3.0 million in revolving credit availability through January 31, 2003 and bears interest at prime rate plus 1.5%, or 6.25% at March 31, 2002. The Credit Facility has a commitment fee of 1.5% per annum on the total commitment of up to \$3.0 million, is collateralized by certain of our foreign accounts receivable and is guaranteed by Export-Import Bank of the United States for 90% of principal and interest. Availability under the credit facility is subject to a

Edgar Filing: USDATA CORP - Form 10-Q

borrowing base calculation, which varies each month depending on billings and cash collections. In addition, we must be in compliance with certain debt covenants.

At March 31, 2002, we were not in compliance with two debt covenants under our Credit Facility: (1) the tangible net worth covenant and (2) earnings before interest, taxes, depreciation and amortization ("EBITDA") covenant. Subsequently, on April 15, 2002, we received a waiver from JPMorgan Chase for these covenants and increased the tangible net worth covenant going forward, primarily to take into account the restructuring charge recorded in the period ended March 31, 2002. In addition, as of April 15, 2002, the interest rate increased to prime plus 2.25% per annum. At March 31, 2002, \$812,000 was drawn on the Credit Facility and is included in current liabilities. Based on the qualifying borrowing base arrangement under the credit facility, total remaining availability at April 26, 2002 was \$418,000.

The following table summarizes our contractual obligations related to debt, capital leases and operating leases at March 31, 2002:

15

(in thousands)	Commitment Per Period				
	Total	2002	2003	2004	Thereafter
Revolving line of credit	\$ 812	\$ 812	\$ --	\$ --	\$ --
Long-term debt and other debt	881	529	281	71	--
Capital leases	216	40	66	66	44
Operating leases	7,393	599	792	798	5,204
	\$9,302	\$1,980	\$1,139	\$ 935	\$5,248
	=====	=====	=====	=====	=====

International Operations

Our international revenues represented approximately 67% of our total revenue during 2001. Revenues from international operations are subject to various political and economic risks including, but not limited to, the following: political instability; economic instability; currency controls; currency devaluations; exchange rate fluctuations; potentially unstable channels of distribution; increased credit risks; export control laws that might limit the markets we can enter; inflation; changes in laws related to foreign ownership of businesses abroad; foreign tax laws; trade disputes among nations; changes in cost of capital; changes in import/export regulations, including enforcement policies; "gray market" resales; tariffs and freight rates. Such risks and other factors beyond our control in any nation where we conduct business could have a material adverse effect on our operations.

NASDAQ COMPLIANCE NOTICES

On February 14, 2002, we received a letter from Nasdaq notifying us that over the previous 30 consecutive trading days, our common stock had not maintained a minimum market value of publicly held shares ("MVPHS") of \$5.0 million as required for continued listing on The Nasdaq National Market under

Edgar Filing: USDATA CORP - Form 10-Q

Marketplace Rule 4450(a)(2) (the "Rule"). In accordance with Nasdaq Marketplace Rule 4450(e)(1), we will be provided 90 calendar days, or until May 15, 2002, to regain compliance. If, at any time before May 15, 2002, the MVPHS of our common stock is \$5.0 million or greater for a minimum of 10 consecutive trading days, we will have achieved compliance with the Rule. There can be no assurance that we will be able to achieve compliance with the Rule. If we are unable to regain compliance with the Rule by May 15, 2002, we can either appeal Nasdaq's decision to a Nasdaq Listing Qualifications Panel or submit an application to transfer to the Nasdaq SmallCap Market.

As of May 8, 2002, we had not regained compliance with the Rule and applied to transfer our securities to the Nasdaq SmallCap Market. The initiation of the delisting proceedings will be stayed pending Nasdaq's review of our application. There can be no assurance that Nasdaq will approve our application for listing on the Nasdaq SmallCap Market.

RECENT ACCOUNTING PRONOUNCEMENTS

On June 30, 2001, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standard ("SFAS") No.s 141 and 142, "Business Combinations" and "Goodwill and Other Intangible Assets," respectively. SFAS No. 141 requires all business combinations initiated after June 30, 2001 to be accounted for using the purchase method. SFAS 142 requires that ratable amortization of goodwill be replaced with periodic fair-value based tests of the goodwill's impairment and that intangible assets other than goodwill be amortized over their useful lives. Additionally, under the provision of the new accounting standard, an acquired intangible asset should be separately recognized if the benefit of the intangible asset is obtained through contractual or other legal rights, or if the intangible asset can be sold, transferred, licensed, rented, or exchanged, regardless of the acquirer's intent to do so. SFAS 141 is effective for all business combinations initiated after June 30, 2001 and for all business combinations accounted for by the purchase method for which the date of acquisition is after June 30, 2001. The provisions of SFAS 142 are effective for fiscal years beginning after December 15, 2001, and we have adopted the provisions, as required, in fiscal year 2002. Adoption of SFAS No. 141 and No. 142 did not have a material impact on our consolidated results of operations or financial position.

In June 2001, the FASB issued Statement No. 143, "Accounting for Asset Retirement Obligations", which addresses financial accounting and reporting obligations associated with the retirement

of tangible long-lived assets and the associated asset retirement costs. The standard applies to legal obligations associated with the retirement of long-lived assets that result from the acquisition, construction, development and (or) normal use of the asset. Statement No. 143 requires that the fair value of a liability for an asset retirement obligation be recognized in the period in which it is incurred if a reasonable estimate of fair value can be made. The fair value of the liability is added to the carrying amount of the associated asset and this additional carrying amount is depreciated over the life of the asset. The liability is accreted at the end of each period through charges to operating expense. If the obligation is settled for other than the carrying amount of the liability, we will recognize a gain or loss on settlement. We are required to adopt the provisions of Statement No. 143 no later than the beginning of fiscal year 2003, with early adoption permitted. We do not expect the adoption of this statement to have a material effect on our consolidated results of operations or financial position.

Edgar Filing: USDATA CORP - Form 10-Q

In October 2001, the FASB issued Statement No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets", which addresses financial accounting and reporting for the impairment or disposal of long-lived assets. While Statement No. 144 supersedes FASB Statement No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of", it retains many of the fundamental provisions of that Statement. Statement No. 144 became effective for fiscal years beginning after December 15, 2001. Adoption of this statement did not have a material effect on our consolidated results of operations or financial position.

17

USDATA CORPORATION AND SUBSIDIARIES

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our exposure to market risk associated with changes in interest rates relates to our variable rate bank note payable of \$121,000 and our revolving line of credit of \$812,000. Interest rate risk is estimated as the potential impact on our results of operations or financial position due to a hypothetical change of 50 basis points in quoted market prices. This hypothetical change would not have a material effect on our results of operations and financial position.

A significant portion of our revenues is derived from foreign operations (67% at December 31, 2001). We primarily invoice and collect in U.S. dollars. Risk resulting from foreign currency exposure is therefore minimal.

PART II. OTHER INFORMATION

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K

(a) Exhibits (filed as part of this report).

None.

(b) Reports on Form 8-K

On March 14, 2002, we filed a current report on Form 8-K to announce that we had received a letter from The Nasdaq Stock Market, Inc. notifying us that over the 30 previous consecutive trading days, our common stock has not maintained a minimum market value of publicly held shares of \$5.0 million as required for continued listing on the Nasdaq National Market.
