SS&C TECHNOLOGIES, INC. AND SUBSIDIARIES
Notes to Condensed Consolidated Financial Statements
(unaudited)

1. Basis of Presentation

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. These accounting principles were applied on a basis consistent with those of the audited consolidated financial statements contained in the Company s Annual Report on Form 10-K for the year ended December 31, 2008, filed with the Securities and Exchange Commission. In the opinion of the Company, the accompanying unaudited condensed consolidated financial statements contain all adjustments (consisting of only normal recurring adjustments, except as noted elsewhere in the notes to the condensed consolidated financial statements) necessary to state fairly its financial position as of March 31, 2009, the results of its operations for the three months ended March 31, 2009 and 2008 and its cash flows for the three months ended March 31, 2009 and 2008. These statements do not include all of the information and footnotes required by generally accepted accounting principles for annual financial statements. The financial statements contained herein should be read in conjunction with the audited consolidated financial statements and footnotes as of and for the year ended December 31, 2008 which were included in the Company s Annual Report on Form 10-K. The December 31, 2008 consolidated balance sheet data were derived from audited financial statements, but do not include all disclosures required by generally accepted accounting principles for annual financial statements. The results of operations for the three months ended March 31, 2009 are not necessarily indicative of the expected results for the full year.

2. The Transaction

SS&C Technologies, Inc. (the Company or SS&C) was acquired on November 23, 2005 through a merger transaction with SS&C Technologies Holdings, Inc. (Holdings), a Delaware corporation formed by investment funds associated with The Carlyle Group and formerly known as Sunshine Acquisition Corporation. The acquisition was accomplished through the merger of Sunshine Merger Corporation into the Company, with the Company being the surviving company and a wholly-owned subsidiary of Holdings (the Transaction).

3. Equity and Stock-based Compensation

In April 2008, the Board of Directors of Holdings approved a 7.5-for-1 stock split of the common stock of Holdings to be effected in the form of a stock dividend, effective as of April 23, 2008. In January 2009, the Board of Directors of Holdings approved a 1-for-7.5 reverse stock split of the common stock of Holdings to be effected in the form of a stock dividend, effectively reversing the April 2008 forward split. All share data in this Form 10-Q have been retroactively revised to reflect the reverse stock split.

In February 2009, the Board of Directors of Holdings approved the immediate vesting of the 2006, 2007 and 2008 performance-based options that did not otherwise vest during 2006, 2007 or 2008 and established the Company s annual EBITDA target range for 2009. As of that date, the Company estimated the weighted-average fair value of the performance-based options that were vested by the Board and those that vest upon the attainment of the 2009 EBITDA target range to be $31.00. In estimating the common stock value, the Company valued the Company using the income approach and the guideline company method. The Company used the following weighted-average assumptions to estimate the option value: expected term to exercise of 2.5 years; expected volatility of 38.0%; risk-free interest rate of 1.2%; and no dividend yield. Expected volatility is based on the historical volatility of the Company s peer group. Expected term to exercise is based on the Company s historical stock option exercise experience, adjusted for the Transaction.

During the three months ended March 31, 2009, the Company recorded total stock-based compensation expense of $1.3 million, of which $0.1 million related to the performance-based options that were immediately vested by the Board of Directors of Holdings and $0.3 million related to the performance-based options based upon management s assessment of the probability that the Company s EBITDA for 2009 will fall within the targeted range. The annual EBITDA targets for 2010 and 2011 will be determined by the Board of Directors of Holdings at the beginning of each respective year. Time-based options represented the remaining $0.9 million of compensation expense recorded during the three months ended March 31, 2009.

Table of Contents

During the three months ended March 31, 2008, the Company recorded total stock-based compensation expense of $1.3 million, of which $0.4 million related to the performance-based options based upon management s assessment of the probability that the Company s EBITDA for 2008 would fall within the targeted range and $0.9 million related to time-based options.

The amount of stock-based compensation expense recognized in the Company s condensed consolidated statements of operations for the three months ended March 31, 2009 and 2008 was as follows (in thousands):

	2009	2008
Statements of operations classification		
Cost of maintenance	$ 25	$ 24
Cost of professional services	47	41
Cost of software-enabled services	253	293
Total cost of revenues	325	358
Selling and marketing	237	207
Research and development	134	133
General and administrative	573	591
Total operating expenses	944	931
Total stock-based compensation expense	$ 1,269	$ 1,289

A summary of stock option activity as of and for the three months ended March 31, 2009 is as follows:

	Shares of Holdings Under Option
Outstanding at January 1, 2009	1,513,193
Granted	30,005
Cancelled/forfeited	(11,836)
Exercised	(10,225)
Outstanding at March 31, 2009	1,521,137

4. Comprehensive Income (Loss)

SFAS No. 130, Reporting Comprehensive Income , requires that items defined as comprehensive income, such as foreign currency translation adjustments and unrealized gains (losses) on interest rate swaps, be separately classified in the financial statements and that the accumulated balance of other comprehensive income be reported separately from retained earnings and additional paid-in capital in the equity section of the balance sheet.

The following table sets forth the components of comprehensive income (loss) (in thousands):

	Three Months Ended March 31,	
	2009	2008
Net income	$ 3,898	$ 3,736
Foreign currency translation losses	(7,105)	(5,987)
Unrealized gains (losses) on interest rate swaps, net of tax	351	(2,566)

Total comprehensive loss	$ (2,856)	$ (4,817)

5. Debt

At March 31, 2009 and December 31, 2008, debt consisted of the following (in thousands):

	March 31, 2009	December 31, 2008
Senior credit facility, term loan portion, weighted-average interest rate of 3.22% and 3.54%, respectively	$ 202,055	$ 203,726
11 3/4% senior subordinated notes due 2013	205,000	205,000
Capital leases	445	
	407,500	408,726
Current portion of long-term debt	(2,343)	(2,101)
Long-term debt	$ 405,157	$ 406,625

Capitalized financing costs of $0.6 million were amortized to interest expense during each of the three months ended March 31, 2009 and 2008.

6. Derivatives and Hedging Activities

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133 (SFAS 161). SFAS 161 requires entities to provide enhanced disclosure about how and why the entity uses derivative instruments, how the instruments and related hedged items are accounted for under SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, (SFAS 133) and how the instruments and related hedged items affect the financial position, results of operations, and cash flows of the entity. The Company adopted SFAS 161 during the quarter ended March 31, 2009.

The Company uses interest rate swap agreements to manage the floating rate portion of its debt portfolio and follows the provisions of SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended (SFAS 133). SFAS 133 requires that all derivative instruments be recorded on the balance sheet at fair value.

The gains and losses on the Company s derivative instrument during the three months ended March 31, 2009 were as follows (in thousands):

	Amount of Gain Recognized in AOCI, net of tax	Income Statement Classification of the Loss Reclassified from AOCI into Income	Amount of Loss Recognized in Income
Interest rate swap	$ 351	Interest Expense	$ (839)

The market value of the swaps recorded in accumulated other comprehensive income (AOCI) may be recognized in the statement of operations if certain terms of the senior credit facility change, if the loan is extinguished or if the swaps agreements are terminated prior to maturity. As of March 31, 2009, the notional value of the Company s receive-variable/pay-fixed interest rate swap was $100 million.

On January 1, 2008, the Company adopted the provisions of SFAS No. 157, Fair Value Measurements (SFAS 157), with respect to the valuation of its interest rate swap agreements. The Company did not adopt the provisions of SFAS No. 157 as they relate to nonfinancial assets pursuant to FSP FAS 157-2, Effective Date of FASB Statement No. 157 . The major categories of assets that are measured at fair value for which the Company has not applied the provisions of SFAS 157 include the measurement of fair value in the first step of a goodwill impairment test under SFAS No. 142, Goodwill and Other Intangible Assets . SFAS No. 157 clarifies how companies are required to use a fair value measure for recognition and disclosure by establishing a common definition of fair value, a framework for measuring fair value, and expanding disclosures about fair value measurements. The adoption of SFAS 157 did not have a material impact on the Company s results of operations or financial position. In October 2008, the FASB issued FSP FAS 157-3 Determining the Fair Value of a Financial Asset When the Market for That Asset is Not Active (FSP FAS 157-3), which is effective upon issuance for all financial statements that have not been issued. FSP FAS 157-3 clarifies the application of SFAS 157 in a market that is not active. The Company has adopted FSP FAS 157-3 effective with this filing. FSP FAS 157-3 does not have a material impact on the Company s financial position, financial performance or cash flows.

SFAS No. 157 establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions. The Company determines the fair value of its interest rate swaps based on the amount at which it could be settled, which is referred to in SFAS No. 157 as the exit price. This price is based upon observable market assumptions and appropriate valuation adjustments for credit risk. The Company has categorized its interest rate swaps as Level 2 under SFAS No. 157. The fair value of the Company s remaining interest rate swap was a liability of $6.1 million and $6.6 million at March 31, 2009 and December 31, 2008, respectively. Of these amounts, $3.1 million and $3.3 million, respectively, is included in other accrued expenses and $3.0 million and $3.3 million, respectively, is

included in other long-term liabilities.

7. Commitments and Contingencies

From time to time, the Company is subject to legal proceedings and claims that arise in the normal course of its business. In the opinion of management, the Company is not involved in any such litigation or proceedings by third parties that management believes could have a material adverse effect on the Company or its business.

8. Acquisitions

On March 20, 2009, the Company purchased substantially all the assets of Evare, LLC (Evare), for approximately $3.5 million in cash, plus the costs of effecting the transaction, and the assumption of certain liabilities. Evare is a managed utility service provider for financial data acquisition, enrichment, transformation and delivery.

Table of Contents

The net assets and results of operations of Evare have been included in the Company s consolidated financial statements from March 21, 2009. The purchase price was allocated to tangible and intangible assets based on their fair value at the date of acquisition. The fair value of the intangible assets, consisting of trade name and client relationships and client contracts, was determined using the income approach. Specifically, the relief-from-royalty method was utilized for the trade name and the discounted cash flows method was utilized for the contractual relationships. The intangible assets are amortized each year based on the ratio that current cash flows for the intangible asset bear to the total of current and expected future cash flows for the intangible asset. The trade name is amortized over approximately seven years, and the contractual relationships are amortized over approximately four years, the estimated lives of the assets. The remainder of the purchase price was allocated to goodwill.
The following summarizes the preliminary allocation of the purchase price for the acquisition of Evare (in thousands):

Accounts receivable, net of $11 reserve	$ 928
Tangible assets acquired, net of cash received	1,100
Trade name	150
Acquired client relationships and contracts	1,720
Goodwill	487
Deferred revenue	(27)
Other liabilities assumed	(843)
Consideration paid, net of cash received	$ 3,515

The Company reported revenues of $0.3 million from Evare from the acquisition date through March 31, 2009. The following unaudited pro forma condensed consolidated results of operations is provided for illustrative purposes only and assumes that the acquisition of Evare occurred on January 1, 2008. This unaudited pro forma information (in thousands) should not be relied upon as being indicative of the historical results that would have been obtained if the acquisition had actually occurred on that date, nor of the results that may be obtained in the future.

	Three Months Ended March 31,	
	2009	2008
Revenues	$ 65,544	$ 70,573
Net income	3,950	3,598

9. Product and Geographic Sales Information
The Company operates in one reportable segment, as defined by SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information . The Company manages its business primarily on a geographic basis. The Company attributes net sales to an individual country based upon location of the customer. The Company s geographic regions consist of the United States, Canada, Americas, excluding the United States and Canada, Europe and Asia Pacific and Japan. The European region includes European countries as well as the Middle East and Africa.
Revenues by geography were (in thousands):

	Three Months Ended March 31,	
	2009	2008
United States	$ 40,930	$ 39,891
Canada	9,716	11,289
Americas excluding United States and Canada	2,278	2,500
Europe	9,472	13,028
Asia Pacific and Japan	1,326	1,815

	$ 63,722	$ 68,523

Table of Contents

Revenues by product group were (in thousands):

	Three Months Ended March 31,	
	2009	2008
Portfolio management/accounting	$ 50,413	$ 54,954
Trading/treasury operations	7,095	7,156

Property management	1,269	1,384
Money market processing	833	945
Training	745	661
	$ 63,722	$ 68,523

10. Supplemental Guarantor Condensed Consolidating Financial Statements

On November 23, 2005, in connection with the Transaction, the Company issued $205 million aggregate principal amount of 11 3/4% senior subordinated notes due 2013. The senior subordinated notes are jointly and severally and fully and unconditionally guaranteed on an unsecured senior subordinated basis, in each case, subject to certain exceptions, by substantially all wholly owned domestic subsidiaries of the Company (collectively Guarantors). All of the Guarantors are 100% owned by the Company. All other subsidiaries of the Company, either direct or indirect, do not guarantee the senior subordinated notes (Non-Guarantors). The Guarantors also unconditionally guarantee the senior secured credit facilities. There are no significant restrictions on the ability of the Company or any of the subsidiaries that are Guarantors to obtain funds from its subsidiaries by dividend or loan.

Condensed consolidating financial information as of March 31, 2009 and December 31, 2008 and the three months ended March 31, 2009 and 2008 are presented. The condensed consolidating financial information of the Company and its subsidiaries are as follows:

Table of Contents

12. Recent Accounting Pronouncements

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1. This FSP amends SFAS No. 107, Disclosures about Fair Value of Financial Instruments, to require disclosures about fair value of financial instruments not measured on the balance sheet at fair value in interim financial statements as well as in annual financial statements. Prior to this FSP, fair values for these assets and liabilities were only disclosed annually. This FSP applies to all financial instruments within the scope of SFAS 107 and requires all entities to disclose the method(s) and significant assumptions used to estimate the fair value of financial instruments. This FSP shall be effective for interim periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. An entity may early adopt this FSP only if it also elects to early adopt FSP FAS 157-4 and FSP FAS 115-2 and FAS 124-2. This FSP does not require disclosures for earlier periods presented for comparative purposes at initial adoption. In periods after initial adoption, this FSP requires comparative disclosures only for periods ending after initial adoption. The Company is currently evaluating the disclosure requirements of this new FSP.

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

CRITICAL ACCOUNTING POLICIES

Certain of our accounting policies require the application of significant judgment by our management, and such judgments are reflected in the amounts reported in our consolidated financial statements. In applying these policies, our management uses its judgment to determine the appropriate assumptions to be used in the determination of estimates. Those estimates are based on our historical experience, terms of existing contracts, management s observation of trends in the industry, information provided by our clients and information available from other outside sources, as appropriate. Actual results may differ significantly from the estimates contained in our consolidated financial statements. There have been no material changes to our critical accounting estimates and assumptions or the judgments affecting the application of those estimates and assumptions since the filing of our Annual Report on Form 10-K for the year ended December 31, 2008. Our critical accounting policies are described in our annual filing on Form 10-K and include:

Revenue Recognition

Allowance for Doubtful Accounts

Long-Lived Assets, Intangible Assets and Goodwill

Acquisition Accounting

Income Taxes

Stock-based compensation

Results of Operations for the Three Months Ended March 31, 2009 and 2008

The following table sets forth revenues (in thousands) and changes in revenues for the periods indicated:

	Three months ended March 31,		Percentage
	2009	2008	Change
Revenues:			
Software licenses	$ 5,820	$ 6,655	-13%
Maintenance	15,540	16,357	-5%
Professional services	5,196	5,268	-1%
Software-enabled services	37,166	40,243	-8%
Total revenues	$ 63,722	$ 68,523	-7%

The following table sets forth the percentage of our revenues represented by each of the following sources of revenues for the periods indicated:

	Three months ended March 31,	
	2009	2008
Revenues:		
Software licenses	9%	10%
Maintenance	25%	24%
Professional services	8%	7%
Software-enabled services	58%	59%

Total revenues	100%	100%

Revenues

Our revenues consist primarily of software-enabled services and maintenance revenues, and, to a lesser degree, software license and professional services revenues. As a general matter, our software license and professional services revenues tend to fluctuate based on the number of new licensing clients, while fluctuations in our software-enabled services revenues are attributable to the number of new software-enabled services clients as well as the number of outsourced transactions

provided to our existing clients and total assets under management in our clients portfolios. Maintenance revenues vary based on the rate by which we add or lose maintenance clients over time and, to a lesser extent, on the annual increases in maintenance fees, which are generally tied to the consumer price index.
Revenues for the three months ended March 31, 2009 were $63.7 million, decreasing 7% from $68.5 million in the same period in 2008. The decrease in revenues in the three months ended March 31, 2009 includes the unfavorable impact from foreign currency translation of $4.2 million resulting from the strength of the U.S. dollar relative to currencies such as the Canadian dollar, the British pound, the Australian dollar and the euro. This impact was partially offset by revenues from products and services that we acquired through our acquisitions of MDS in October 2008 and Evare in March 2009, which added $2.0 million in the aggregate. Excluding these items, revenues for businesses and products that we have owned for at least 12 months, or organic revenues, decreased 3.8%. Contributing to this decrease was a decline of $3.3 million in our software-enabled services revenues. Maintenance revenues, software license revenues and professional services revenues decreased $1.4 million, $1.3 million and $0.8 million, respectively.
Software Licenses. Software license revenues were $5.8 million and $6.7 million for the three months ended March 31, 2009 and 2008, respectively. Revenues of $0.4 million from acquisitions partially offset a decrease of $1.3 million in organic software license revenues. Software license revenues will vary depending on the timing, size and nature of our license transactions. For example, the average size of our software license transactions and the number of large transactions may fluctuate on a period-to-period basis. For the three months ended March 31, 2009, the average size of perpetual license transactions increased from those for the three months ended March 31, 2008, however the number of transactions was fewer. Revenues from term licenses increased approximately 5% from the prior year period. Additionally, software license revenues will vary among the various products that we offer, due to differences such as the timing of new releases and variances in economic conditions affecting opportunities in the vertical markets served by such products.
Maintenance. Maintenance revenues were $15.5 million and $16.4 million for the three months ended March 31, 2009 and 2008, respectively. Organic maintenance revenues decreased $1.4 million, partially due to the unfavorable impact of foreign currency translation. Additionally, client maintenance renewals and annual maintenance fee increases, which are generally tied to the percentage change in the consumer price index, were not as favorable as they have been historically. These decreases were partially offset by acquisitions, which contributed $0.5 million. We typically provide maintenance services under one-year renewable contracts that provide for an annual increase in fees. Future maintenance revenue growth is dependent on our ability to retain existing clients, add new license clients, and increase average maintenance fees.
Professional Services. Professional services revenues were $5.2 million and $5.3 million for the three months ended March 31, 2009 and 2008, respectively. Revenues of $0.7 million from acquisitions partially offset a decrease of $0.8 million in organic professional services revenues. The decrease of $0.8 million was primarily due to one significant professional services project that commenced during the first quarter of 2008 and was completed during 2008. Our overall software license revenue levels and market demand for professional services will continue to have an effect on our professional services revenues.
Software-Enabled Services. Software-enabled services revenues were $37.2 million and $40.2 million for the three months ended March 31, 2009 and 2008, respectively. Organic software-enabled services revenues decreased $3.3 million as our clients experienced the impact of the economic downturn, their assets under management declined and redemptions exceeded in-flows at money managers and hedge funds. The unfavorable impact of foreign currency translation also contributed to the decrease. These decreases were partially offset by our March 2009 acquisition of Evare, which added $0.3 million. Future software-enabled services revenue growth is dependent on our ability to retain existing clients, add new clients and increase average fees.

Cost of Revenues

The total cost of revenues was $33.1 million and $34.9 million for the three months ended March 31, 2009 and 2008, respectively. The gross margin was 48% for the three months ended March 31, 2009 compared to 49% for the comparable period in 2008. Primarily as a result of our workforce reduction in the fourth quarter of 2008, we reduced our costs of revenues by $2.3 million, mainly in cost of software-enabled services revenues, as we aligned our costs

with the anticipated decline in revenues. Amortization expense decreased by $0.4 million, as a lower percentage of current revenues was deemed associated with technology that existed at the date of the Transaction. These cost reductions were partially offset by our acquisitions, which added costs of $0.9 million.

Cost of Software Licenses. Cost of software license revenues consists primarily of amortization expense of completed technology, royalties, third-party software, and the costs of product media, packaging and documentation. The cost of software licenses was $2.0 million and $2.3 million for the three months ended March 31, 2009 and 2008, respectively. The decrease in cost of software license revenues was primarily due to a decrease in amortization expense, as a lower percentage of current license revenues was deemed associated with technology that existed at the date of the Transaction. Cost of software license revenues as a percentage of such revenues was 35% for both the 2009 and 2008 periods.

Cost of Maintenance. Cost of maintenance revenues consists primarily of technical client support, costs associated with the distribution of products and regulatory updates and amortization of intangible assets. The cost of maintenance revenues was $6.5 million and $6.6 million for the three months ended March 31, 2009 and 2008, respectively. The decrease in costs was due to reductions of $0.2 million, primarily personnel-related, partially offset by acquisitions, which added $0.1 million in costs. Cost of maintenance revenues as a percentage of these revenues was 42% for the three months ended March 31, 2009 compared to 40% for the three months ended March 31, 2008.

Cost of Professional Services. Cost of professional services revenues consists primarily of the cost related to personnel utilized to provide implementation, conversion and training services to our software licensees, as well as system integration, custom programming and actuarial consulting services. The cost of professional services revenues was $4.0 million and $3.6 million for the three months ended March 31, 2009 and 2008, respectively. Our acquisitions added $0.7 million in costs, partially offset by a reduction of $0.3 million in costs.

Cost of Software-Enabled Services. Cost of software-enabled services revenues consists primarily of the cost related to personnel utilized in servicing our software-enabled services clients and amortization of intangible assets. The cost of software-enabled services revenues was $20.6 million and $22.4 million for the three months ended March 31, 2009 and 2008, respectively. Primarily as a result of our workforce reduction in the fourth quarter of 2008, we reduced our costs by $1.7 million. Additionally, amortization of intangible assets decreased by $0.2 million. These decreases were partially offset by our acquisitions, which added $0.1 million in costs.

Operating Expenses

Total operating expenses were $16.2 million and $17.8 million for the three months ended March 31, 2009 and 2008, respectively. The decrease in total operating expenses was primarily due to a reduction of $2.2 million in costs, as we reduced spending in anticipation of the decrease in organic revenues. Our acquisitions of MDS and Evare added $0.4 million in costs, and amortization expense increased by $0.2 million. Total operating expenses as a percentage of total revenues decreased to 25% for the three months ended March 31, 2009 from 26% for the three months ended March 31, 2008.

Selling and Marketing. Selling and marketing expenses consist primarily of the personnel costs associated with the selling and marketing of our products, including salaries, commissions and travel and entertainment. Such expenses also include amortization of intangible assets, the cost of branch sales offices, trade shows and marketing and promotional materials. Selling and marketing expenses were $5.2 million and $5.0 million for the three months ended March 31, 2009 and 2008, respectively, representing 8% and 7% of total revenues in those periods, respectively. The increase in selling and marketing expenses was primarily due to an increase of $0.2 million in amortization expense. Additionally, a reduction of $0.3 million in costs was offset by our acquisitions, which added $0.3 million in costs.

Research and Development. Research and development expenses consist primarily of personnel costs attributable to the enhancement of existing products and the development of new software products. Research and development expenses were $5.9 million and $7.0 million for the three months ended March 31, 2009 and 2008, respectively, representing 9% and 10% of total revenues in those periods, respectively. A decrease of $1.2 million in costs was partially offset by our acquisitions, which added $0.1 million in costs.

General and Administrative. General and administrative expenses consist primarily of personnel costs related to management, accounting and finance, information management, human resources and administration and associated overhead costs, as well as fees for professional services. General and administrative expenses were $5.1 million and $5.8 million for the three months ended March 31, 2009 and 2008, respectively, representing 8% of total revenues in each of those periods. The decrease in general and administrative expenses was primarily related to a reduction of $0.7 million in costs, primarily personnel-related and information technology costs.

17

Interest Expense. Net interest expense for the three months ended March 31, 2009 and 2008 was $9.4 million and $10.4 million, respectively, and primarily related to interest expense on debt outstanding under our senior credit facility and 11 3/4% senior subordinated notes due 2013. The decrease in interest expense is due to a decrease in outstanding debt and lower average interest rates for the period.

Other Income, Net. Other income, net for the three months ended March 31, 2009 and 2008 consists primarily of foreign currency gains.

Provision for Income Taxes. We had effective tax rates of 31.4% and 33.5% for the three months ended March 31, 2009 and 2008, respectively. The effective tax rate for the balance of the year is expected to be between 30% and 35%.

Liquidity and Capital Resources

Our principal cash requirements are to finance the costs of our operations pending the billing and collection of client receivables, to fund payments with respect to our indebtedness, to invest in research and development and to acquire complementary businesses or assets. We expect our cash on hand, cash flows from operations and availability under the revolving credit portion of our senior credit facilities to provide sufficient liquidity to fund our current obligations, projected working capital requirements and capital spending for at least the next twelve months.

Our cash and cash equivalents at March 31, 2009 were $35.5 million, an increase of $6.2 million from $29.3 million at December 31, 2008. Cash provided by operations was partially offset by net repayments of debt, cash used for an acquisition and capital expenditures.

Net cash provided by operating activities was $11.0 million for the three months ended March 31, 2009. Cash provided by operating activities was primarily due to net income of $3.9 million adjusted for non-cash items of $8.7 million partally offset by changes in our working capital accounts totaling $1.6 million. The changes in our working capital accounts were driven by an increase in accounts receivable, and decreases in accrued expenses and income taxes payable, partially offset by an increase in deferred revenues. The increase in deferred revenues was primarily due to the collection of annual maintenance fees. The increase in accounts receivable was primarily due to an increase in days sales outstanding. The decrease in accrued expenses was primarily due to the payment of annual employee bonuses, offset in part by an increase in interest payable related to our notes.

Investing activities used net cash of $3.7 million for the three months ended March 31, 2009, primarily related to the $3.5 million cash paid for our acquisition of Evare, LLC.

Financing activities used net cash of $0.7 million for the three months ended March 31, 2009, representing net repayments of debt under our senior credit facilities and the repurchase of Holdings common stock in connection with stock option exercises.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

Senior Credit Facilities

Our borrowings under the senior credit facilities bear interest at either a floating base rate or a Eurocurrency rate plus, in each case, an applicable margin. In addition, we pay a commitment fee in respect of unused revolving commitments at a rate that will be adjusted based on our leverage ratio. We are obligated to make quarterly principal payments on the term loan totaling $2.1 million per year. Subject to certain exceptions, thresholds and other limitations, we are required to prepay outstanding loans under the senior credit facilities with the net proceeds of certain asset dispositions and certain debt issuances and 50% of our excess cash flow (as defined in the agreements governing our senior credit facilities), which percentage will be reduced based on our reaching certain leverage ratio thresholds.

The obligations under our senior credit facilities are guaranteed by Holdings and all of our existing and future material wholly-owned U.S. subsidiaries, with certain exceptions as set forth in our credit agreement. The obligations of the Canadian borrower are guaranteed by Holdings, us and each of our U.S. and Canadian subsidiaries, with certain exceptions

as set forth in the credit agreement. The obligations under the senior credit facilities are secured by a perfected first priority security interest in all of our capital stock and all of the capital stock or other equity interests held by Holdings, us and each of our existing and future U.S. subsidiary guarantors (subject to certain limitations for equity interests of foreign subsidiaries and other exceptions as set forth in our credit agreement) and all of Holdings and our tangible and intangible assets and the tangible and intangible assets of each of our existing and future U.S. subsidiary guarantors, with certain exceptions as set forth in the credit agreement. The Canadian borrower s borrowings under the senior credit facilities and all guarantees thereof are secured by a perfected first priority security interest in all of our capital stock and all of the capital stock or other equity interests held by Holdings, us and each of our existing and future U.S. and Canadian subsidiary guarantors, with certain exceptions as set forth in the credit agreement, and all of Holdings and our tangible and intangible assets and the tangible and intangible assets of each of our existing and future U.S. and Canadian subsidiary guarantors, with certain exceptions as set forth in the credit agreement.

The senior credit facilities contain a number of covenants that, among other things, restrict, subject to certain exceptions, our (and our restricted subsidiaries) ability to incur additional indebtedness, pay dividends and distributions on capital stock, create liens on assets, enter into sale and lease-back transactions, repay subordinated indebtedness, make capital expenditures, engage in certain transactions with affiliates, dispose of assets and engage in mergers or acquisitions. In addition, under the senior credit facilities, we are required to satisfy and maintain a maximum total leverage ratio and a minimum interest coverage ratio. We were in compliance with all covenants at March 31, 2009.

11 3/4% Senior Subordinated Notes due 2013

The 11 3/4% senior subordinated notes due 2013 are unsecured senior subordinated obligations that are subordinated in right of payment to all existing and future senior debt, including the senior credit facilities. The senior subordinated notes will be pari passu in right of payment to all future senior subordinated debt.

The senior subordinated notes are redeemable in whole or in part, at our option, at any time at varying redemption prices that generally include premiums, which are defined in the indenture. In addition, upon a change of control, we are required to make an offer to redeem all of the senior subordinated notes at a redemption price equal to 101% of the aggregate principal amount thereof plus accrued and unpaid interest.

The indenture governing the senior subordinated notes contains a number of covenants that restrict, subject to certain exceptions, our ability and the ability of our restricted subsidiaries to incur additional indebtedness, pay dividends, make certain investments, create liens, dispose of certain assets and engage in mergers or acquisitions.

Covenant Compliance

Under the senior credit facilities, we are required to satisfy and maintain specified financial ratios and other financial condition tests. As of March 31, 2009, we were in compliance with the financial and non-financial covenants. Our continued ability to meet these financial ratios and tests can be affected by events beyond our control, and we cannot assure you that we will meet these ratios and tests. A breach of any of these covenants could result in a default under the senior credit facilities. Upon the occurrence of any event of default under the senior credit facilities, the lenders could elect to declare all amounts outstanding under the senior credit facilities to be immediately due and payable and terminate all commitments to extend further credit.

Consolidated EBITDA is a non-GAAP financial measure used in key financial covenants contained in our senior credit facilities, which are material facilities supporting our capital structure and providing liquidity to our business. Consolidated EBITDA is defined as earnings before interest, taxes, depreciation and amortization (EBITDA), further adjusted to exclude unusual items and other adjustments permitted in calculating covenant compliance under our senior credit facilities. We believe that the inclusion of supplementary adjustments to EBITDA applied in presenting Consolidated EBITDA is appropriate to provide additional information to investors to demonstrate compliance with the specified financial ratios and other financial condition tests contained in our senior credit facilities.

Management uses Consolidated EBITDA to gauge the costs of our capital structure on a day-to-day basis when full financial statements are unavailable. Management further believes that providing this information allows our investors greater transparency and a better understanding of our ability to meet our debt service obligations and make capital expenditures.

The breach of covenants in our senior credit facilities that are tied to ratios based on Consolidated EBITDA could result in a default under that agreement, in which case the lenders could elect to declare all amounts borrowed due and payable and to terminate any commitments they have to provide further borrowings. Any such acceleration would also result in a default under

Table of Contents

our indenture. Any default and subsequent acceleration of payments under our debt agreements would have a material adverse effect on our results of operations, financial position and cash flows. Additionally, under our debt agreements, our ability to engage in activities such as incurring additional indebtedness, making investments and paying dividends is also tied to ratios based on Consolidated EBITDA.

Consolidated EBITDA does not represent net income or cash flow from operations as those terms are defined by GAAP and does not necessarily indicate whether cash flows will be sufficient to fund cash needs. Further, our senior credit facilities require that Consolidated EBITDA be calculated for the most recent four fiscal quarters. As a result, the measure can be disproportionately affected by a particularly strong or weak quarter. Further, it may not be comparable to the measure for any subsequent four-quarter period or any complete fiscal year.

Consolidated EBITDA is not a recognized measurement under GAAP, and investors should not consider Consolidated EBITDA as a substitute for measures of our financial performance and liquidity as determined in accordance with GAAP, such as net income, operating income or net cash provided by operating activities. Because other companies may calculate Consolidated EBITDA differently than we do, Consolidated EBITDA may not be comparable to similarly titled measures reported by other companies. Consolidated EBITDA has other limitations as an analytical tool, when compared to the use of net income (loss), which is the most directly comparable GAAP financial measure, including:

- Consolidated EBITDA does not reflect the provision of income tax expense in our various jurisdictions;
- Consolidated EBITDA does not reflect the significant interest expense we incur as a result of our debt leverage;
- Consolidated EBITDA does not reflect any attribution of costs to our operations related to our investments and capital expenditures through depreciation and amortization charges;
- Consolidated EBITDA does not reflect the cost of compensation we provide to our employees in the form of stock option awards; and
- Consolidated EBITDA excludes expenses that we believe are unusual or non-recurring, but which others may believe are normal expenses for the operation of a business.

The following is a reconciliation of net income to Consolidated EBITDA as defined in our senior credit facilities.

	Three Months Ended March 31,		Twelve Months Ended March 31
	2009	2008	2009
Net income	$ 3,898	$ 3,736	$ 18,963
Interest expense	9,350	10,428	40,052
Income taxes	1,782	1,883	7,045
Depreciation and amortization	8,573	8,998	34,613
EBITDA	23,603	25,045	100,673
Purchase accounting adjustments (1)	(51)	(79)	(261)
Unusual or non-recurring charges (2)	(472)	(225)	1,233
Acquired EBITDA and cost savings (3)	221		2,015
Stock-based compensation	1,269	1,289	7,303
Capital-based taxes	334	416	1,130
Other (4)	345	393	1,298

Consolidated EBITDA	$ 25,249	$ 26,839	$ 113,391

(1) Purchase accounting adjustments include an adjustment to increase rent expense by the amount that would have been recognized if lease obligations were not adjusted to fair value at the date of the Transaction.

(2) Unusual or non-recurring charges include foreign currency gains and losses, expenses related to the withdrawn public offering, severance expenses associated with workforce reduction, equity earnings and losses on investments, proceeds from legal and other settlements and other one-time expenses.

Table of Contents

(3) Acquired EBITDA and cost savings reflects the EBITDA impact of significant businesses that were acquired during the period as if the acquisition occurred at the beginning of the period and cost savings to be realized from such acquisitions.

(4) Other includes management fees and related expenses paid to Carlyle and the non-cash portion of straight-line rent expense.

Our covenant restricting capital expenditures for year ending December 31, 2009 limits expenditures to $16.9 million. Actual capital expenditures through March 31, 2009 were $0.1 million. Our covenant requirements for total leverage ratio and minimum interest coverage ratio and the actual ratios for the twelve months ended March 31, 2009 are as follows:

	Covenant Requirements	**Actual Ratios**
Maximum consolidated total leverage to Consolidated EBITDA Ratio	5.50x	3.33x
Minimum Consolidated EBITDA to consolidated net interest coverage ratio	2.00x	3.00x

Recent Accounting Pronouncements

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1. This FSP amends SFAS No. 107, Disclosures about Fair Value of Financial Instruments, to require disclosures about fair value of financial instruments not measured on the balance sheet at fair value in interim financial statements as well as in annual financial statements. Prior to this FSP, fair values for these assets and liabilities were only disclosed annually. This FSP applies to all financial instruments within the scope of SFAS 107 and requires all entities to disclose the method(s) and significant assumptions used to estimate the fair value of financial instruments. This FSP shall be effective for interim periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. An entity may early adopt this FSP only if it also elects to early adopt FSP FAS 157-4 and FSP FAS 115-2 and FAS 124-2. This FSP does not require disclosures for earlier periods presented for comparative purposes at initial adoption. In periods after initial adoption, this FSP requires comparative disclosures only for periods ending after initial adoption. We are

currently evaluating the disclosure requirements of this new FSP.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We do not use derivative financial instruments for trading or speculative purposes. We have invested our available cash in short-term, highly liquid financial instruments, having initial maturities of three months or less. When necessary we have borrowed to fund acquisitions.

At March 31, 2009, excluding capital leases, we had total debt of $407.1 million, including $202.1 million of variable interest rate debt. We have entered into an interest rate swap agreement having a notional value of $100 million that effectively fixes our interest rate at 6.78% and expires in December 2010. During the period when this swap agreement is effective, a 1% change in interest rates would result in a change in interest expense of approximately $1.0 million per year. Upon the expiration of the interest rate swap agreement in December 2010, a 1% change in interest rates would result in a change in interest expense of approximately $2.0 million per year.

At March 31, 2009, $35.2 million of our debt was denominated in Canadian dollars. We expect that our foreign denominated debt will be serviced through our Canadian operations.

During 2008, approximately 39% of our revenues were from clients located outside the United States. A portion of the revenues from clients located outside the United States is denominated in foreign currencies, the majority being the Canadian dollar. Revenues and expenses of our foreign operations are denominated in their respective local currencies. We continue to monitor our exposure to foreign exchange rates as a result of our foreign currency denominated debt, our acquisitions and changes in our operations.

The foregoing risk management discussion and the effect thereof are forward-looking statements. Actual results in the future may differ materially from these projected results due to actual developments in global financial markets. The analytical methods used by us to assess and minimize risk discussed above should not be considered projections of future events or losses.

Item 4T. Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures as of March 31, 2009. The term disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company s management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of March 31, 2009, our chief executive officer and chief financial officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

There have not been any changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the quarter ended March 31, 2009, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1A. Risk Factors

There have been no material changes to our Risk Factors as previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2008.

Item 6. Exhibits

The exhibits listed in the Exhibit Index immediately preceding such exhibits are filed as part of this Report.
