OVERVIEW

LETTER TO SHAREHOLDERS
January 19, 2001

Dear Shareholder,

The year 2000 was an especially volatile one for the stock market. To manage one's portfolio during such unpredictable times requires investment-management experience, and the following pages should give you some insight into how we have performed in this difficult environment.

In this report, the portfolio managers will explain how your investment performed during the reporting period and describe the strategies they used to manage your fund during that span. The report will also show you how your investment has performed over time. Helpful charts summarize the fund's largest investments, and you can examine the complete portfolio to see all of your fund's holdings as of the end of your fund's reporting period.

At Van Kampen, we place a high priority on providing you and your financial advisor with the information you need to help you monitor your investments during all types of markets. With nearly four generations of investment-management experience, we've been around long enough to understand that by investing with Van Kampen you're

Edgar Filing: VAN KAMPEN BOND FUND - Form N-30D

entrusting us with much more than your money. Your investments may help make it possible to afford your next house, keep up with rising college costs, or enjoy a comfortable retirement.

No matter what your reasons for investing, we're thankful that you've chosen to place your investments with Van Kampen. We will continue to apply our generations of money-management experience to helping you pursue life's true wealth.

Sincerely,

[SIG]

Richard F. Powers, III
President and CEO
Van Kampen Asset Management Inc.

ECONOMIC SNAPSHOT

ECONOMIC GROWTH

ECONOMIC GROWTH, WHICH SPED TOWARD NEAR-RECORD HIGHS IN 1999, SLOWED TO A MORE SUSTAINABLE PACE IN 2000. GROSS DOMESTIC PRODUCT, THE PRIMARY MEASURE OF ECONOMIC GROWTH, WAS UP A MODEST 2.2 PERCENT FOR THE THIRD QUARTER ON AN ANNUALIZED BASIS--THE LATEST FIGURES AVAILABLE AT THE TIME THIS REPORT WAS PRINTED. BOTH BUSINESS AND CONSUMER DEMAND AND SPENDING ON EXPORTS EASED AS CONCERNS ABOUT THE COOLING ECONOMY MOUNTED--AND, IN DECEMBER, U.S. MANUFACTURING ACTIVITY DROPPED TO ITS LOWEST MONTHLY LEVEL IN NEARLY 10 YEARS. ALL OF THESE FACTORS POINTED TO A SLOWING ECONOMY, ALTHOUGH INDUSTRY ANALYSTS DISAGREE ABOUT WHETHER THIS SUGGESTS A "SOFT LANDING" OR A RECESSION.

CONSUMER SPENDING AND EMPLOYMENT

CONCERNS ABOUT A WEAKENING STOCK MARKET AND COOLING ECONOMY OVERSHADOWED THE HOLIDAY SHOPPING PERIOD AS CONSUMER SPENDING EASED INTO A MORE MODERATE PACE. THESE CONCERNS, COUPLED WITH RISING ENERGY PRICES, HELPED KEEP SPENDING IN CHECK AND INFLATION WORRIES AT BAY.

THE JOBLESS RATE CONTINUED TO HOLD AT HISTORICALLY LOW LEVELS, REMAINING AT 4.0 PERCENT IN DECEMBER FOR THE SECOND CONSECUTIVE MONTH. GROWTH IN OVERALL COMPENSATION COSTS (SUCH AS WAGES AND BENEFITS) CONTINUED TO SLOW, FURTHER RELIEVING INFLATIONARY PRESSURES.

INTEREST RATES AND INFLATION

THE CONSUMER PRICE INDEX, A COMMON MEASURE OF THE INFLATION RATE, ROSE A MODERATE 3.4 PERCENT FOR THE 12 MONTHS ENDED DECEMBER 31, 2000. AT THE BEGINNING OF THE YEAR, IN AN EFFORT TO WARD OFF INFLATION, THE FEDERAL RESERVE ATTEMPTED TO CURB ECONOMIC GROWTH WITH THREE INTEREST-RATE HIKES. BY THE LATTER HALF OF THE YEAR, THE ECONOMY BEGAN TO SHOW SIGNS THAT THE FED'S EFFORTS HAD ACHIEVED THE DESIRED EFFECTS. WITH INFLATION CONCERNS SUBSIDING, FED POLICYMAKERS GATHERED FOR THEIR DECEMBER MEETING AND OPTED NOT TO CHANGE INTEREST RATES--BUT THEY DID SUGGEST FUTURE RATE CUTS WERE POSSIBLE. (NOTE: THE FEDERAL RESERVE SURPRISED MANY OBSERVERS ON JANUARY 3, 2001, BY ANNOUNCING AN INTEREST-RATE CUT OF 0.50 PERCENT PRIOR TO ITS SCHEDULED LATE-JANUARY MEETING.)

PERFORMANCE SUMMARY

RETURN HIGHLIGHTS

(as of December 31, 2000)

NYSE Ticker Symbol	VBF
Six month total return based on market price(1)	8.14%
Six month total return based on NAV(2)	6.86%
Distribution rate as a % of closing common stock price(3)	7.80%
Net asset value	\$19.29
Closing common stock price	\$17.4375
Six month high common stock price (12/19/00)	\$18.2500
Six month low common stock price (10/18/00)	\$16.2500

(1) Total return based on market price assumes an investment at the market price at the beginning of the period indicated, reinvestment of all distributions for the period in accordance with the Fund's dividend reinvestment plan, and sale of all shares at the closing stock price at the end of the period indicated.

(2) Total return based on net asset value (NAV) assumes an investment at the beginning of the period indicated, reinvestment of all distributions for the period, and sale of all shares at the end of the period, all at NAV.

(3) Distribution rate represents the quarterly annualized distributions of the Fund at the end of the period and not the earnings of the Fund.

Past performance is no guarantee of future results. Investment return, stock price and net asset value will fluctuate with market conditions. As a result of recent market activity, current performance may vary from the figures shown. Fund shares, when sold, may be worth more or less than their original cost.

The solid line above represents the fund's net asset value (NAV), which indicates overall changes in value among the fund's underlying securities. The fund's market price is represented by the dashed line, which indicates the price the market is willing to pay for shares of the fund at a given time. Market price is influenced by a range of factors, including supply and demand and market conditions.

Q&A WITH YOUR PORTFOLIO MANAGERS

WE RECENTLY SPOKE WITH THE MANAGEMENT TEAM OF THE VAN KAMPEN BOND FUND ABOUT THE KEY EVENTS AND ECONOMIC FORCES THAT SHAPED THE MARKETS AND INFLUENCED THE FUND'S RETURN DURING THE PAST SIX MONTHS. THE TEAM IS LED BY KELLY GILBERT, PORTFOLIO MANAGER, WHO HAS MANAGED THE FUND SINCE JUNE 1999 AND HAS WORKED IN THE INVESTMENT INDUSTRY SINCE 1995. THE FOLLOWING DISCUSSION REFLECTS HER VIEWS ON THE FUND'S PERFORMANCE DURING THE SIX-MONTH PERIOD ENDED DECEMBER 31, 2000.

Q HOW WOULD YOU DESCRIBE THE MARKET ENVIRONMENT IN WHICH THE FUND OPERATED, AND HOW DID THE FUND PERFORM IN THAT ENVIRONMENT?

A The fund performed surprisingly well, considering that the past six months was one of the most difficult periods in the last decade for investment-grade corporate bonds.

Amid heightened uncertainty about the economy's health, corporate earnings, the presidential election, and other technical and fundamental factors, bond investors traded up in quality, favoring the highest-rated, most liquid corporate issues or opting instead for U.S. Treasury securities.

The government's decision to devote a portion of the federal budget surplus to buying back long-term debt helped boost the Treasury market, often at the expense of corporate bonds. At the same time, the Federal Reserve Board pushed short-term interest rates higher over the first half of 2000, which contributed to an inversion of the Treasury market yield curve (that is, short-term rates were higher than long-term rates). As a result, the yield spread between Treasuries and corporates hovered near a 10-year high by the close of the reporting period, indicating that Treasuries were outperforming corporate bonds.

Adding to the corporate market's uneasiness was an increase in the default rate, particularly in the high-yield market, and credit problems that led to unexpected ratings downgrades among some of the more prominent corporate bond issuers, such as JC Penney, Consec, Xerox and Dillard's. Stock market volatility and weakening corporate earnings also caused concern, as did soaring energy prices, which hit oil-reliant industries like chemicals and airlines especially hard.

Although the corporate market performed fairly well during the third quarter of 2000, the fourth quarter brought negative earnings announcements by pivotal companies, such as Lucent, Owens-Corning and Xerox. The last few months of the year were

haunted by fears that a slowing economy would further weaken corporate earnings and make it harder for companies to repay their debt.

These events made investors extremely sensitive to bad news, and they were quick to sell corporate bonds at the first sign of trouble. Furthermore, good news was virtually ignored. As market performance suffered, investors retreated into a "wait-and-see" mode and became reluctant to commit capital to the corporate bond market.

Despite this challenging environment, the fund continued to provide shareholders with an attractive level of income and a respectable total return.

Edgar Filing: VAN KAMPEN BOND FUND - Form N-30D

The fund's quarterly dividend of \$0.34 per share translates to a distribution rate of 7.80 percent based on the fund's closing market price on December 31, 2000. For the six months through December 31, 2000, the fund produced a total return of 8.14 percent based on market price, a figure that compares favorably to its benchmark--the Lehman Brothers BBB Corporate Bond Index. The fund's return reflects an increase in market price from \$16.7500 per share on June 30, 2000, to \$17.4375 per share on December 31, 2000. Of course, past performance is no guarantee of future results. As a result of recent market activity, current performance may vary from the figures shown. By comparison, the Lehman Brother BBB Corporate Bond Index posted a total return of 2.33 percent for the same period. This broad-based, unmanaged index, which reflects the general performance of corporate bonds, does not reflect any commissions or fees that would be paid by an investor purchasing the securities it represents. Such costs would lower performance. It is not possible to invest directly in an index. For additional performance results, please refer to the chart and footnotes on page 4.

Q WHAT SPECIFIC STRATEGIES DID YOU EMPLOY IN POSITIONING THE PORTFOLIO?

A Like most investors in this hostile market environment, we found it wise to allocate assets to the more liquid, higher-quality issuers, such as Disney, ConAgra and Unilever. While these names were well represented in the fund, we also added diversification across the spectrum of issuer size and industry. By year-end, the portfolio contained 127 issues, an increase of 17 since June 30, 2000.

Our selection of investments favored some of the more defensive sectors, such as energy, defense, and cable media. At the same time, we reduced the fund's exposure to some of the more economically sensitive sectors, like retail, and to oil-dependent industries such as chemicals.

Of course, the portfolio was not immune to the challenges of this difficult market. Credit problems surfaced in association with some of the fund's investments, such as downgrades in the credit rating of Conseco and Crown Cork & Seal (holdings that have since been sold out of the portfolio).

Nevertheless, the fund's broad diversification, its emphasis on quality and liquidity, and a relatively healthy credit-quality profile were all factors

8

10

that contributed to the fund's solid performance for the last six months.

Q WHAT IS YOUR OUTLOOK FOR THE MARKET AND THE FUND IN THE MONTHS AHEAD?

A The key to any rebound in the corporate bond market will be the strength of the economy. If the economy weakens too much, a rough road could lie ahead, because a recessionary period would make it more difficult for companies to repay their debt. We will continue to monitor the health of the economy, maintaining a broadly diversified portfolio and an emphasis on high-quality, liquid securities in primarily defensive market sectors.

We are cautiously optimistic as we look ahead to the upcoming year. The market has experienced a significant decline amid a laundry list of negative indicators, so we feel there is likely to be room for improvement in the near term.

Other positive signs that bode well for the corporate bond market include a

Edgar Filing: VAN KAMPEN BOND FUND - Form N-30D

low supply of newly issued bonds, light dealer inventories, and a fairly sizable level of available cash that has built up as investors waited on the sidelines for opportunities to reenter the market.

With corporate bonds trading at such wide spreads relative to Treasury securities, we will be on the lookout for opportunities to capitalize on attractive values from a total return perspective.

9

11

GLOSSARY OF TERMS

A HELPFUL GUIDE TO SOME OF THE COMMON TERMS YOU'RE LIKELY TO SEE IN THIS REPORT AND OTHER FINANCIAL PUBLICATIONS.

BOND: A debt security issued by a government or corporation that pays a bondholder a stated rate of interest and repays the principal at the maturity date.

DEFENSIVE INVESTMENT STRATEGY: A method of portfolio allocation and management aimed at minimizing the risk of losing principal. Defensive investors place a high percentage of their investable assets in bonds, cash equivalents, and stocks that are less volatile than average.

DIVERSIFICATION: A method of portfolio allocation and management aimed at balancing investment risk and return; a balanced portfolio may combine stocks, bonds, and cash equivalents.

FEDERAL RESERVE BOARD (THE FED): The governing body of the Federal Reserve System, which is the central bank of the United States. Its policy-making committee, called the Federal Open Market Committee, meets at least eight times a year to establish monetary policy and monitor the economic pulse of the United States.

LIQUIDITY: The ease with which an investor can buy or sell a security at a reasonable price.

YIELD CURVE: The pattern that results from viewing the yields of U.S. Treasury securities maturing in 1, 5, 10, and 30 years. When grouped together and graphed, a pattern of increasing yield is often reflected as the time to maturity extends. This pattern creates an upward sloping "curve." A "flat" yield curve represents little difference between short- and long-term interest rates, while a "negative" yield curve represents decreasing yields as the time to maturity extends.

YIELD SPREAD: The additional yield investors can earn by either investing in bonds with longer maturities or by investing in bonds with lower credit ratings. The spread is the difference in yield between bonds with short versus long maturities or the difference in yield between high-quality bonds and lower-quality bonds.

NOTES TO FINANCIAL STATEMENTS

December 31, 2000 (Unaudited)

1. SIGNIFICANT ACCOUNTING POLICIES

Edgar Filing: VAN KAMPEN BOND FUND - Form N-30D

Van Kampen Bond Fund (the "Fund") is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940, as amended. The Fund's investment objective is to provide current income with the preservation of capital through investing primarily in a diversified portfolio of debt securities.

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

A. SECURITY VALUATION Fixed income investments are stated at value using market quotations or indications of value obtained from an independent pricing service. Investments in securities listed on a securities exchange are valued at their sale price as of the close of such securities exchange. Unlisted securities and listed securities for which the last sales price is not available are valued at the mean of the bid and asked prices. For those securities where quotations or prices are not available, valuations are determined in accordance with procedures established in good faith by the Board of Trustees. Short-term securities with remaining maturities of 60 days or less are valued at amortized cost, which approximates market value.

B. SECURITY TRANSACTIONS Security transactions are recorded on a trade date basis. Realized gains and losses are determined on an identified cost basis. The Fund may purchase and sell securities on a "when-issued" or "delayed delivery" basis, with settlement to occur at a later date. The value of the security so purchased is subject to market fluctuations during this period. The Fund will maintain, in a segregated account with its custodian, assets having an aggregate value at least equal to the amount of the when-issued or delayed delivery purchase commitments until payment is made. At December 31, 2000, there were no when-issued or delayed delivery purchase commitments.

The Fund may invest in repurchase agreements, which are short-term investments whereby the Fund acquires ownership of a debt security and the seller agrees to repurchase the security at a future time and specified price. The Fund may invest independently in repurchase agreements, or transfer uninvested cash balances into a pooled cash account along with other investment companies

22

24

NOTES TO FINANCIAL STATEMENTS

December 31, 2000 (Unaudited)

advised by Van Kampen Asset Management Inc. (the "Adviser") or its affiliates, the daily aggregate of which is invested in repurchase agreements. Repurchase agreements are fully collateralized by the underlying debt security. The Fund will make payment for such securities only upon physical delivery or evidence of book entry transfer to the account of the custodian bank. The seller is required to maintain the value of the underlying security at not less than the repurchase proceeds due the Fund.

C. INVESTMENT INCOME Interest income is recorded on an accrual basis and dividend income is recorded on the ex-dividend date. Discounts are accreted over

Edgar Filing: VAN KAMPEN BOND FUND - Form N-30D

the expected life of each applicable security. Premiums on debt securities are not amortized.

In November 2000, the American Institute of Certified Public Accountants (AICPA) issued a revised version of the AICPA Audit and Accounting Guide for Investment Companies (the Guide). The revised version of the Guide is effective for annual financial statements issued for fiscal years beginning after December 15, 2000 and will require investment companies to amortize premiums and accrete discounts on fixed income securities. The Fund currently does not amortize premiums on fixed income securities. Upon adoption, the Fund will be required to record a cumulative effect adjustment to reflect the amortization of premiums. The adjustment will reduce accumulated undistributed net investment income and increase unrealized appreciation on securities and therefore will not impact total net assets. At this time, the Fund has not completed its analysis of the impact of this accounting change.

D. FEDERAL INCOME TAXES It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no provision for federal income taxes is required.

The Fund intends to utilize provisions of the federal income tax laws which allow it to carry a realized capital loss forward for eight years following the year of the loss and offset these losses against any future realized capital gains. At June 30, 2000, the Fund had an accumulated capital loss carryforward for tax purposes of \$636,020, which will expire on June 30, 2008. Net realized gains or losses may differ for financial reporting and tax purposes primarily as a result of the deferral of losses relating to wash sale transactions and post-October losses which may not be recognized for tax purposes until the first day of the following fiscal year.

At December 31, 2000, for federal income tax purposes, cost of long- and short-term investments is \$211,192,282, the aggregate gross unrealized appreciation is \$7,204,301 and the aggregate gross unrealized depreciation is \$3,627,601,

23

25

NOTES TO FINANCIAL STATEMENTS

December 31, 2000 (Unaudited)

resulting in net unrealized appreciation on long- and short-term investments of \$3,576,700.

E. DISTRIBUTION OF INCOME AND GAINS The Fund declares and pays quarterly dividends from net investment income. Net realized gains, if any, are distributed annually. Distributions from net realized gains for book purposes may include short-term capital gains and gains on option and futures transactions. All short-term capital gains and a portion of option and futures gains are included in ordinary income for tax purposes.

Due to inherent differences in the recognition of income, expenses and realized gain/losses under generally accepted accounting principles and federal income tax purposes, the amount of net investment income may differ between book and federal income tax purposes for a particular period. These differences are temporary in nature, but may result in book basis distributions in excess of net investment income for certain periods.

F. EXPENSE REDUCTIONS During the six months ended December 31, 2000, the Fund's

Edgar Filing: VAN KAMPEN BOND FUND - Form N-30D

custody fee was reduced by \$217 as a result of credits earned on overnight cash balances.

2. INVESTMENT ADVISORY AGREEMENT AND OTHER TRANSACTIONS WITH AFFILIATES

Under the terms of the Fund's Investment Advisory Agreement, the Adviser will provide investment advice and facilities to the Fund for an annual fee payable monthly as follows:

AVERAGE DAILY NET ASSETS	% PER ANNUM
First \$150 million.....	.50 of 1%
Next \$100 million.....	.45 of 1%
Next \$100 million.....	.40 of 1%
Over \$350 million.....	.35 of 1%

For the six months ended December 31, 2000, the Fund recognized expenses of approximately \$3,300 representing legal services provided by Skadden, Arps, Slate, Meagher & Flom (Illinois), counsel to the Fund, of which a trustee of the Fund is an affiliated person.

Under an Accounting Services agreement, the Adviser provides accounting services to the Fund. The Adviser allocates the cost of such services to each fund. For the six months ended December 31, 2000, the Fund recognized expenses of approximately \$9,200 representing Van Kampen Investments Inc.'s or its affiliates'

24

26

NOTES TO FINANCIAL STATEMENTS

December 31, 2000 (Unaudited)

(collectively "Van Kampen") cost of providing accounting services to the Fund, which are reported as part of other expenses in the statement of operations.

Certain officers and trustees of the Fund are also officers and directors of Van Kampen. The Fund does not compensate its officers or trustees who are officers of Van Kampen.

The Fund provides deferred compensation and retirement plans for its trustees who are not officers of Van Kampen. Under the deferred compensation plan, trustees may elect to defer all or a portion of their compensation to a later date. Benefits under the retirement plan are payable for a ten-year period and are based upon each trustee's years of service to the Fund. The maximum annual benefit per trustee under the plan is \$2,500.

3. INVESTMENT TRANSACTIONS

During the period, the cost of purchases and proceeds from sales of investments, excluding short-term investments, were \$89,800,860 and \$91,013,258, respectively.

25

27

Edgar Filing: VAN KAMPEN BOND FUND - Form N-30D

DIVIDEND REINVESTMENT PLAN

The Fund pays distributions in cash, but if you own more than 100 shares in your own name, you may elect to participate in the Fund's dividend reinvestment plan (the "Plan"). Under the Plan, shares will be issued by the Fund at net asset value on a date determined by the Board of Trustees between the record and payable dates on each distribution; however, if the market price including brokerage commissions, is less than the net asset value, the amount of the distribution will be paid to the Plan Agent, which will buy such shares as are available at prices below the net asset value. (If the market price is not significantly less than the net asset value, it is possible that open market purchases of shares may increase the market price so that such price plus brokerage commissions would equal or exceed the net asset value of such shares.) If the Plan Agent cannot buy the necessary shares at less than net asset value before the distribution date, the balance of the distribution will be made in authorized but unissued shares of the Fund at net asset value. The cost per share will be the average cost, including brokerage commissions, of all shares purchased. Since all shares purchased from the Fund are at net asset value, there will be no dilution, and no brokerage commissions are charged on such shares.

You will receive tax information annually for your personal records and to help you prepare your federal income tax return. The automatic reinvestment of dividends and capital gain distributions does not relieve you of any income tax which may be payable (or required to be withheld) on dividends or distributions.

You may begin or discontinue participation in the Plan at any time by written notice to the address below. If you withdraw from the Plan, you may rejoin at any time if you own the required 100 shares. Elections and terminations will be effective for distributions declared after receipt. If you withdraw from the Plan, a certificate for the whole shares and a check for the fractional shares, if any, credited to your Plan account will be sent as soon as practicable after receipt of your election to withdraw. Except for brokerage commissions, if any, which are borne by Plan participants, all costs of the Plan are borne by the Fund. The Fund reserves the right to amend or terminate the Plan on 30 days' written notice prior to the record date of the distribution for which such amendment or termination is effective.

Record stockholders should address all notices, correspondence, questions or other communications about the Plan to:

EQUISERVE LLP
P.O. BOX 43011
PROVIDENCE, RHODE ISLAND 02940-3011
1-800-821-1238

If your shares are not held directly in your name, you should contact your brokerage firm, bank or other nominee for more information and to see if your nominee will participate in the Plan on your behalf. If you participate through your broker and choose to move your account to another broker, you will need to re-enroll in the Plan through your new broker.
