PROSPECTUS SUPPLEMENT SUMMARY

This summary highlights selected information about Corn Products and this offering. It does not contain all of the information that may be important to you in deciding whether to purchase notes. We encourage you to read the entire prospectus supplement, the accompanying prospectus and the documents that we have filed with the SEC that are incorporated by reference prior to deciding whether to purchase notes.

Corn Products International, Inc.

We were incorporated as a Delaware corporation in 1997 and our common stock is traded on the New York Stock Exchange. We, together with our subsidiaries, manufacture and sell a number of ingredients to a wide variety of food and industrial customers. We are one of the world's largest corn refiners and a major supplier of high-quality food ingredients and industrial products derived from wet milling and processing of corn and other starch-based materials.

We had consolidated net sales of approximately \$2.62 billion in 2006. Approximately 61 percent of our 2006 net sales were provided from our North American operations, while our South American and Asian/African operations contributed approximately 25 percent and 14 percent, respectively. Our products are derived primarily from the processing of corn and other starch-based materials, such as tapioca.

Corn refining is a capital-intensive, two-step process that involves the wet milling and processing of corn. During the front-end process, corn is steeped in a water-based solution and separated into starch and other co-products such as animal feed and germ. The starch is then either dried for sale or further processed to make sweeteners and other ingredients that serve the particular needs of various industries.

Our sweetener products include high fructose corn syrup, glucose corn syrups, high maltose corn syrups, caramel color, dextrose, polyols, maltodextrins and glucose and corn syrup solids. Our starch-based products include both industrial and food-grade starches. We supply a broad range of customers in many diverse industries around the world, including the food and beverage, pharmaceutical, paper products, corrugated, laminated paper, textile and brewing industries, as well as the global animal feed markets.

We believe our approach to production and service, which focuses on local management of our worldwide operations, provides us with a unique understanding of the cultures and product requirements in each of the geographic markets in which we operate bringing added value to our customers.

RISK FACTORS

*You should carefully consider the following risk factors and the information under the heading **Risk Factors** in the accompanying prospectus and in our annual report on Form 10-K for the year ended December 31, 2006 which is incorporated by reference into this prospectus supplement and the accompanying prospectus, as well as the other information included or incorporated by reference into this prospectus supplement and the accompanying prospectus, before making an investment decision. In addition, there may be other risks that a prospective investor should consider that are relevant to its own particular circumstances or generally.*

Risks Related to the Notes

The notes are effectively junior to the existing and future liabilities of our subsidiaries

The notes are our unsecured obligations and will rank equally in right of payment with all of our other existing and future unsecured, unsubordinated obligations. The notes are not secured by any of our assets. Any future claims of secured lenders with respect to assets securing their loans will be prior to any claim of the holders of the notes with respect to those assets.

Our subsidiaries are separate and distinct legal entities from us. Our subsidiaries have no obligation to pay any amounts due on the notes. In addition, any payment of dividends, loans or advances by our subsidiaries could be subject to statutory or contractual restrictions. Payments to us by our subsidiaries will also be contingent upon the subsidiaries' earnings and business considerations. Our right to receive any assets of any of our subsidiaries upon their bankruptcy, liquidation or reorganization, and therefore the right of the holders of the notes to participate in those assets, will be effectively subordinated to the claims of that subsidiary's creditors, including trade creditors. In addition, even if we are a creditor of any of our subsidiaries, our right as a creditor would be subordinate to any security interest in the assets of our subsidiaries and any indebtedness of our subsidiaries senior to that held by us. At December 31, 2006, we had approximately \$554 million of indebtedness outstanding on a consolidated basis, of which \$99 million of subsidiary indebtedness is structurally senior to the notes.

The indenture does not restrict the amount of additional debt that we may incur

The notes and indenture under which the notes will be issued do not place any limitation on the amount of unsecured debt that may be incurred by us. Our incurrence of additional debt may have important consequences for you as a holder of the notes, including making it more difficult for us to satisfy our obligations with respect to the notes, a loss in the market value of your notes, if any, and a risk that the credit rating of the notes is lowered or withdrawn.

Our credit ratings may not reflect all risks of your investments in the notes

Our credit ratings are an assessment by rating agencies of our ability to pay our debts when due. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of the notes. These credit ratings may not reflect the potential impact of risks relating to structure or marketing of the notes. Agency ratings are not a recommendation to buy, sell or hold any security, and may be revised or withdrawn at any time by the issuing organization. Each agency's rating should be evaluated independently of any other agency's rating.

If an active trading market does not develop for the notes, you may be unable to sell your notes or to sell your notes at a price that you deem sufficient

Each series of notes is a new issue of securities for which there currently is no established trading market. We do not intend to list either series of notes on a national securities exchange. While the underwriters of the notes have advised us that they intend to make a market in the notes, the underwriters will not be obligated to do so and may stop their market making at any time. No assurance can be given:

that a market for the notes will develop or continue;

S-5

Table of Contents

as to the liquidity of any market that does develop; or

as to your ability to sell any notes you may own or the price at which you may be able to sell your notes.

We may not be able to repurchase the notes upon a change of control

Upon the occurrence of specific kinds of change of control events, each holder of notes will have the right to require us to repurchase all or any part of such holder's notes at a price equal to 101% of their principal amount, plus accrued and unpaid interest, if any, to the date of repurchase. If we experience a Change of Control Repurchase Event, there can be no assurance that we would have sufficient financial resources available to satisfy our obligations to repurchase the notes. Our failure to repurchase a series of notes as required under the indenture governing that series of notes would result in a default under the indenture, which could have material adverse consequences for us and the holders of the notes. See Description of the Notes Repurchase at the Option of Holders Upon a Change of Control Repurchase Event.

USE OF PROCEEDS

The net proceeds to us from the sale of the notes will be approximately \$296.1 million (after underwriting discounts and our offering expenses). We intend to use the net proceeds for the payment at maturity of our \$255 million outstanding principal amount of 8.25% senior notes due July 15, 2007 (the 8.25% Senior Notes) and for general corporate purposes. The amount payable at maturity of the 8.25% Senior Notes, including accrued interest, is expected to be approximately \$265.5 million. Pending such application, the net proceeds from the sale of the notes will be invested in short-term-interest-bearing securities.
