No. 58 West-North 4th Ring,
Beijing, 100080, People's Republic of China**

(Name, Telephone, Email and/or Facsimile number and Address of Company Contact Person)

Securities registered or to be registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Each Exchange on Which Registered
Class A ordinary shares, par value US\$0.00005 per share	The NASDAQ Stock Market LLC* (The NASDAQ Global Select Market)

* Not for trading, but only in connection with the listing on The NASDAQ Global Select Market of American depositary shares, each representing one Class A ordinary share.

**Securities registered or to be registered pursuant to Section 12(g) of the Act:
None**

(Title of Class)

**Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:
None**

(Title of Class)

Indicate the number of outstanding shares of each of the Issuer's classes of capital or common stock as of the close of the period covered by the annual report.

25,641,847 Class A ordinary shares and 8,873,986 Class B ordinary shares, par value US\$0.00005 per share, as of December 31, 2008.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP

International Financial Reporting Standards as issued by the International Accounting Standards

Board

Other

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow.

Item 17

Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

(APPLICABLE ONLY TO ISSUERS INVOLVED IN BANKRUPTCY PROCEEDINGS DURING THE PAST FIVE YEARS)

Edgar Filing: Baidu, Inc. - Form 20-F

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Sections 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court. Yes No

INTRODUCTION

In this annual report, except where the context otherwise requires and for purposes of this annual report only:

we, us, our company, our, and Baidu refer to Baidu, Inc., its subsidiaries, and, in the context of describing operations and consolidated financial information, also include Baidu Netcom Science Technology Co., Ltd., Beijing Perusal Technology Co., Ltd. and BaiduPay Science and Technology Co., Ltd., our consolidated affiliated entities in China;

user traffic or traffic refers generally to page views and the reach of a website; when used in the context of Alexa.com website traffic rankings, user traffic refers to a combined measure of the page views and the reach of a website averaged over a specified period of time; page views measure the number of web pages viewed by Internet users over a specified period of time except that multiple page views of the same page viewed by the same user on the same day are counted only once; reach measures the number of Internet users and is typically expressed as the percentage of all Internet users who visit a given website;

China or PRC refers to the People's Republic of China, and solely for the purpose of this annual report, excluding Taiwan, Hong Kong and Macau;

shares or ordinary shares refers to our ordinary shares, which include both Class A ordinary shares and Class B ordinary shares; convertible preferred shares refers to and includes our Series A, Series B and Series C redeemable convertible preferred shares, all of which were converted into the same number of Class B ordinary shares upon the completion of our initial public offering on August 10, 2005; preferred shares refers to our preferred shares, none of which is issued and outstanding;

ADSs refers to our American depositary shares, each of which represents one Class A ordinary share;

U.S. GAAP refers to generally accepted accounting principles in the United States;

all references to RMB or Renminbi are to the legal currency of China and all references to \$, dollars, US\$ or U.S. dollars are to the legal currency of the United States;

the MIIT refers to the PRC Ministry of Industry and Information Technology and, before its formal establishment in 2008, its predecessor, the Ministry of Information Industry; and

all discrepancies in any table between the amounts identified as total amounts and the sum of the amounts listed therein are due to rounding.

FORWARD-LOOKING INFORMATION

This annual report on Form 20-F contains statements of a forward-looking nature. These statements are made under the safe harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. You can identify these forward-looking statements by words or phrases such as may, will, expect, anticipate, aim, estimate, intend, believe, is/are likely to or other similar expressions. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy and financial needs. These forward-looking statements include, but are not limited to:

our anticipated growth strategies;

our future business development, results of operations and financial condition;

our ability to attract and retain users and customers;

the outcome of ongoing or any future litigation, including those relating to copyright or other intellectual property rights;

competition in the Chinese language and Japanese language Internet search markets;

the expected growth of the Chinese language Internet search market and the number of Internet and broadband users in China;

Table of Contents

PRC governmental regulations and policies relating to the Internet and Internet search providers; and development of PRC tax law reforms that may have uncertain implications on high and new technology companies.

We would like to caution you not to place undue reliance on forward-looking statements and you should read these statements in conjunction with the risk factors disclosed in Item 3D of this annual report, Key Information Risk Factors. Those risks are not exhaustive. We operate in an emerging and evolving environment. New risk factors emerge from time to time and it is impossible for our management to predict all risk factors, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statement. We do not undertake any obligation to update or revise the forward-looking statements except as required under applicable law.

Table of Contents**Item 3. Key Information****A. Selected Financial Data**

The following table presents the selected consolidated financial information for our company. The selected consolidated statements of income data for the three years ended December 31, 2006, 2007 and 2008 and the consolidated balance sheet data as of December 31, 2007 and 2008 have been derived from our audited consolidated financial statements, which are included in this annual report beginning on page F-1. The selected consolidated balance sheet data for the year ended December 31, 2006 have been derived from our audited consolidated balance sheet as of December 31, 2006, which is not included in this annual report. The selected consolidated statements of income data for the years ended December 31, 2004 and 2005 and the selected consolidated balance sheet data as of December 31, 2004 and 2005 have been derived from our audited consolidated financial statements for the years ended December 31, 2004 and 2005, which are not included in this annual report. Our historical results do not necessarily indicate results expected for any future periods. The selected consolidated financial data should be read in conjunction with, and are qualified in their entirety by reference to, our audited consolidated financial statements and related notes and Item 5. Operating and Financial Review and Prospects below. Our audited consolidated financial statements are prepared and presented in accordance with U.S. GAAP.

Table of Contents

	For the Year Ended December 31,					2008	US\$
	2004	2005	2006	2007	2008		
	RMB	RMB	RMB	RMB	RMB		
	(In thousands except per share and per ADS data)						
Net income per Class A ordinary share, per Class B ordinary share and per ADS(1):							
Basic:							
Basic (prior to cumulative effect of change in accounting principle)	1.09	2.40	8.92	18.57	30.63		4.49
Cumulative effect of change in accounting principle			0.14				
Basic (after cumulative effect of change in accounting principle)	1.09	2.40	9.06	18.57	30.63		4.49
Diluted:							
Diluted (prior to cumulative effect of change in accounting principle)	0.43	1.49	8.62	18.11	30.19		4.43
Cumulative effect of change in accounting principle			0.13				
Diluted (after cumulative effect of change in accounting principle)	0.43	1.49	8.75	18.11	30.19		4.43
Pro forma net earnings per share on an as-converted basis for Class A and Class B ordinary shares (unaudited)(2):							
Basic	0.45	1.58	9.06	18.57	30.63		4.49
Diluted	0.43	1.49	8.75	18.11	30.19		4.43
Pro forma weighted average aggregate number of ordinary shares on an as-converted basis used in per share calculations for Class A ordinary shares (unaudited)(2):							
Basic	26,696	30,214	33,291	33,873	34,217		34,217
Diluted	28,124	32,044	34,507	34,724	34,717		34,717

- (1) As holders of Class A and Class B ordinary shares have the same dividend right and the same participation right in our undistributed earnings, the basic and diluted net income per share of Class A and Class B ordinary shares are the same for all the periods presented during which there were two classes of ordinary shares. Prior to the creation of the two classes of ordinary shares in May 2005, we only had one class of ordinary shares. For the periods during which there were two classes of ordinary shares, the weighted average number of ordinary shares represents the sum of the weighted average number of Class A and Class B ordinary shares. Please see *Earnings per Share* under Note 2 to our audited consolidated financial statements included in this annual report for additional information regarding the computation of the per share amount and the weighted average numbers of Class A and Class B ordinary shares.
- (2) As holders of Class A and Class B ordinary shares have the same dividend right and the same participation right in our undistributed earnings, the basic and diluted pro forma earnings per share of Class A and Class B ordinary shares are the same for all the periods presented.

Exchange Rate Information

Our business is primarily conducted in China and substantially all of our revenues are denominated in RMB. However, periodic reports made to shareholders will include current period amounts translated into U.S. dollars using the then current exchange rates, for the convenience of the readers. The conversion of RMB into U.S. dollars in this annual report is based on the noon buying rate in The City of New York for cable transfers of RMB as certified for customs purposes by the Federal Reserve Bank of New York. Unless otherwise noted, all translations from RMB to U.S. dollars and from U.S. dollars to RMB in this annual report were made at a rate of RMB6.8225 to US\$1.00, the noon buying rate in effect as of December 31, 2008. We make no representation that any RMB or U.S. dollar amounts could have been, or could be, converted into U.S. dollars or RMB, as the case may be, at any particular rate, or at all. The PRC government imposes control over its foreign currency reserves in part through direct regulation of the conversion of RMB into foreign exchange and through restrictions on foreign trade. On April 3, 2009, the noon buying rate was RMB6.8343 to US\$1.00.

The following table sets forth information concerning exchange rates between the RMB and the U.S. dollar for the periods indicated.

Period	Period-End	Noon Buying Rate		
		Average(1) (RMB per U.S. dollar)	Low	High
2004	8.2765	8.2768	8.2774	8.2764
2005	8.0702	8.1826	8.2765	8.0702
2006	7.8041	7.9579	8.0702	7.8041
2007	7.2946	7.5806	7.8127	7.2946
2008	6.8225	6.9193	7.2946	6.7800

D. Risk Factors

Risks Related to Our Business

If online marketing is not more widely adopted in China, our ability to increase revenue and profitability could be materially and adversely affected.

The use of the Internet as a marketing channel is at an early stage in China. Internet and broadband penetration rates in China are both relatively low as compared to those in most developed countries. Many of our current and potential customers have limited experience with the Internet as a marketing channel, and historically have not devoted a significant portion of their marketing budgets to online marketing and promotion. As a result, they may not consider the Internet an effective channel to promote their products and services as compared to traditional print and broadcast media. Our ability to increase revenue and profitability may be negatively impacted by a number of factors, many of which are beyond our control, including:

difficulties associated with developing a larger user base with demographic characteristics attractive to customers;

increased competition and potential downward pressure on online marketing prices;

higher customer acquisition costs due in part to the limited experience of small to medium-sized enterprises, or SMEs, with the Internet as a marketing channel;

failure to develop an independent and reliable means of verifying online traffic;

ineffectiveness of our online marketing delivery, tracking and reporting systems; and

lack of increase in Internet usage in China.

Our business depends on a strong brand, and if we are not able to maintain and enhance our brand, our business and operating results may be harmed.

We believe that our brand Baidu has contributed significantly to the success of our business. We also believe that maintaining and enhancing the Baidu brand is critical to increasing the numbers of our users, customers and Baidu Union members. As our market becomes increasingly competitive, maintaining and enhancing our brand will depend largely on our ability to remain as an Internet search leader in China, which may be increasingly difficult and expensive.

Historically, we developed our user base primarily by word-of-mouth and incurred limited brand promotion expenses. Our initial public offering in 2005 has significantly enhanced our brand recognition. We have also conducted marketing and brand promotion activities in recent years, but we cannot assure you that these activities will achieve the brand promotion effect expected by us. If we fail to maintain and further promote the Baidu brand, or if we incur excessive expenses in this effort, our business and results of operations may be materially and adversely affected. In addition, any negative publicity about our products and services, regardless of its veracity, could harm our brand image and in turn adversely affect our business and operating results.

We face significant competition and may suffer from a loss of users and customers as a result.

We face significant competition in almost every aspect of our business, particularly from other companies that seek to provide Internet search services to users and provide online marketing services to customers. In the Chinese Internet search market, our main competitors include U.S.-based Internet search providers providing Chinese language Internet search services such as Google and Yahoo! and Chinese Internet companies. These Chinese competitors include Netease, Sina, Sohu, Tencent and Alibaba. We compete with these entities for both users and customers on the basis of user traffic, quality (relevance) and quantity (index size) of the search results, availability and ease of use of products and services, the number of customers, distribution channels and the number of

Table of Contents

associated third-party websites. In addition, we may face greater competition from our U.S.-based competitors as a result of, among other things, a relaxation on the foreign ownership restrictions of PRC Internet content and advertising companies, improvements in online payment systems and Internet infrastructure in China and our U.S.-based competitors' increased business activities in China.

Many of our competitors have significantly greater financial resources than we do. They also have longer operating histories and more experience in attracting and retaining users and managing customers than we do. They may use their experience and resources to compete with us in a variety of ways, including by competing more heavily for users, customers, distributors, strategic partners and networks of third-party websites, investing more heavily in research and development and making acquisitions. If any of our competitors provides comparable or better Chinese language search experience, our user traffic could decline significantly. Any such decline in traffic could weaken our brand, result in loss of customers and users and have a material adverse effect on our results of operations.

We also face competition from other types of advertising media, such as newspapers, magazines, yellow pages, billboards and other forms of outdoor media, television and radio. Most large companies in China allocate, and will likely continue to allocate, most of their marketing budgets to traditional advertising media and only a small portion of their budgets to online marketing and other forms of advertising media. If these companies do not devote a larger portion of their marketing budgets to online marketing services provided by us, or if our existing customers reduce the amount they spend on online marketing, our results of operations and future growth prospects could be adversely affected.

We launched trial (or beta) versions of Baidu Youa, our consumer-to-consumer, or C2C, service and Baidu Hi, our instant messaging, or IM, service in 2008. We face competition from C2C platforms such as Taobao, Paipai and Eachnet, and from IM service providers such as QQ and MSN Messenger. If we continue to invest in C2C, IM and other new services, but cannot compete effectively against the existing leading providers in those areas, we may not be able to develop a sufficiently large customer and user base for our new services and eventually achieve profitability from those services, and as a result, our future results of operations and growth prospect could be materially and adversely affected. Additionally, our Japanese search service faces substantial competition. See [Risks Related to Our Business](#). Our recent expansion into the Japanese market may not be successful.

If we fail to continue to innovate and provide products and services to attract and retain users, we may not be able to generate sufficient user traffic levels to remain competitive.

Our success depends on providing products and services that enable users to have a high-quality Internet experience. We must continue to invest significant resources in research and development to enhance our Internet search technology and our existing products and services and introduce additional high-quality products and services to attract and retain users and compete against our competitors. If we are unable to anticipate user preferences or industry changes, or if we are unable to modify our products and services on a timely basis, we may lose users and customers. Our operating results may also suffer if our innovations do not respond to the needs of our users and customers, are not appropriately timed with market opportunities or are not effectively brought to market. As search technology continues to develop, our competitors may be able to offer search results that are, or that are perceived to be, substantially similar to or better than those generated by our search services. This may force us to expend significant resources in order to remain competitive.

If we fail to retain existing customers or attract new customers for our online marketing services, our business and growth prospects could be seriously harmed.

In 2007 and 2008, we generated approximately 99.8% and 99.9% of our total revenues from online marketing services, respectively, a substantial majority of which was generated from our P4P services. Our online marketing

customers will not continue to do business with us if their investment does not generate sales leads and ultimately consumers, or if we do not deliver their web pages in an appropriate and effective manner. Our P4P customers may discontinue their business with us at any time and for any reason as they are not subject to fixed-term contracts. In addition, we have in the past removed, and may in the future again remove, questionable paid search listings of some customers to safeguard the quality of our search results. Such removal, whether temporary or permanent, may cause

Table of Contents

the affected customers to discontinue their business with us. Failure to retain our existing customers or attract new customers for our online marketing services could seriously harm our business and growth prospects. In addition, third parties may develop and use certain technologies to block the display of our customers' advertisements and other marketing products on our baidu.com website, which may in turn cause us to lose our customers and adversely affect our operating results.

We may not be able to manage our expanding operations effectively.

We commenced operations in 2000 and have significantly expanded our operations since then. We expect this expansion trend to continue as we grow our user and customer base and explore new market opportunities. To manage the expansion of our business and potential growth of our operations and personnel, we will be required to improve operational and financial systems, procedures and controls, and expand, train and manage our growing employee base. In addition, our management will be required to maintain and expand our relationships with other websites, Internet companies and other third parties. We cannot assure you that our current and planned personnel, systems, procedures and controls will be adequate to support our expanding operations.

In addition to expanding our core Chinese language search and online marketing operations, we launched the trial (or beta) versions of Baidu Youa, our C2C service, and Baidu Hi, our IM service, in 2008 and intend to continue to develop and provide new products and services to our users and customers in the future. Expansion into new businesses may present operating and marketing challenges that are different from those that we currently encounter. If we cannot successfully address these new challenges, we may not be able to recover costs we have incurred or will incur from developing and marketing new products and services, and our results of operations and growth prospect may be materially and adversely affected.

We may face intellectual property infringement claims and other related claims that could be time-consuming and costly to defend and may result in our inability to continue providing certain of our existing services.

Internet, technology and media companies are frequently involved in litigation based on allegations of infringement of intellectual property rights, unfair competition, invasion of privacy, defamation and other violations of other parties' rights. The validity, enforceability and scope of protection of intellectual property in Internet-related industries, particularly in China, are uncertain and still evolving. As we face increasing competition and as litigation becomes more common in China in resolving commercial disputes, we face a higher risk of being the subject of intellectual property infringement claims.

Our products and services link to materials in which third parties may claim ownership of trademarks, copyrights or other rights. From time to time, we may be subject to trademark or copyright infringement or related claims, in China and internationally. For example, we provide search engine facilities capable of finding and accessing links to downloadable audio, videos, images and other multimedia files and other items hosted on third-party websites, including search facilities enabling our users to search for files in various ways such as by artist, title, or via lists of most-searched-for titles and artists. Some of these contents found using our search engine facilities may be protected by copyright.

In China, uncertainties still exist with respect to the legal standards as well as the judicial interpretation of such standards for determining liabilities of Internet search providers for providing links to content on third-party websites that infringe upon others' copyrights. In December 2007, the People's High Court of Beijing upheld a lower court's ruling in our favor in a case originally filed against us by seven music record companies in 2005 alleging that our MP3 search services had infringed upon their copyrights. The court ruled that our service, which only provides links to online music hosted on third parties' websites, does not constitute infringement. In the same month, however, the People's High Court of Beijing upheld the decision by another lower court in favor of the record companies in a suit

originally filed by 11 record companies against Yahoo! China, one of our competitors, in July 2006. In the Yahoo! China case, the court held that Yahoo! China was negligent in failing to remove all links to the infringing content after receiving notice from copyright holders, including those links that it should have known to have infringing content. In December 2008, the People's High Court of Beijing, as the trial court, reiterated in another case filed against us that our MP3 search services do not constitute infringement. The plaintiff has filed an appeal, which remains pending, with the People's Supreme Court of China.

Table of Contents

Although prior court rulings in China have only limited precedential value, the ruling of the People's High Court of Beijing in the Yahoo! China case seems to suggest that the courts in future cases may place the burden on Internet search providers to remove not only links that have been specifically mentioned in notices of infringement from right holders, but also links they should have known to contain infringing content. Such an interpretation of the applicable law could subject Internet search providers like us to significant administrative burdens and litigation risks.

In the United States, the legal standards for determining indirect liability for copyright infringement have been strengthened by the United States Supreme Court in the decision *Metro-Goldwyn-Mayer Studios Inc. v. Grokster, Ltd.*, et al., 125 S. Ct. 2764 (2005), or *Grokster*. The implications of the *Grokster* decision for search engine services, such as our MP3 search service, are uncertain and may increase the risk of legal liability. Although we conduct our business operations outside the United States, we may be subject to U.S. copyright laws, including the legal standards established by *Grokster*, by virtue of our listing on the Nasdaq, the ownership of our ADSs or ordinary shares by U.S. investors, the extraterritorial application of U.S. law by U.S. courts or otherwise. Moreover, we cannot assure you that *Grokster* will not influence the legal standards for determining indirect copyright infringement in other jurisdictions, including China.

In light of the above cases and the associated publicity, copyright owners may monitor their copyrighted materials more closely worldwide and in China and may seek to enforce their rights under theories of indirect liability, constructive knowledge of infringing content or otherwise. As a result, we may face increased risks of being subject to copyright infringement claims relating to our MP3 search service. Furthermore, this same consideration may also lead to decreased availability of third-party MP3 websites. A portion of our traffic is generated by users of our MP3 search service. According to Alexa.com, approximately 3.3% of our traffic went to mp3.baidu.com, our MP3 search platform, as of March 31, 2009. Should we face (as a result of the foregoing considerations or otherwise) a need or decision to substantially modify, limit, or terminate our MP3 search service, the user experience could be materially affected, and this in turn may have material adverse impact on our business.

Like many other Internet websites, we provide links to and host certain song lyrics on our websites which may be protected by copyright. As a result, we may be subject to copyright infringement claims. Moreover, we may be subject to administrative actions brought by the PRC State Copyright Bureau for alleged copyright infringement, and as a result may be subject to fines and other penalties and be required to discontinue infringing activities. In addition, we provide links to images of celebrities and other persons, and may face claims for misappropriation of publicity rights. To address these and other risks relating to intellectual property infringement, we may be required to change our business model and service offerings to minimize this risk, which could adversely affect our business prospects.

Intellectual property litigation is expensive and time-consuming and could divert resources and management attention from the operations of our business. We are currently named as a defendant in a number of copyright infringement suits in China in connection with our MP3 and other search services, including a suit filed by three record companies and a suit filed by the Music Copyright Society of China. See Item 8A. Financial Information Consolidated Statements and Other Financial Information Legal Proceedings. If there is a successful claim of infringement, we may be required to pay substantial fines and damages or enter into royalty or license agreements that may not be available on commercially acceptable terms, if at all. Our failure to obtain a license of the rights on a timely basis could harm our business. Any intellectual property litigation and/or any negative publicity by third parties alleging our intellectual property infringement could have a material adverse effect on our business, reputation, financial condition or results of operations.

We have been and may continue to be subject to claims based on the content found on our websites or the results in our paid search listings.

In addition to the content developed by ourselves and posted on our websites, our users are free to post information on Baidu Post Bar, Baidu Knows, Baidu Encyclopedia and other sections of our websites, and our P4P customers may create text-based descriptions and other phrases to be used as text or keywords in our search listings. We have been and may continue to be subject to claims for defamation, negligence or other legal theories based on the content found on our websites. Claims for defamation, negligence or other legal theories based on the content

Table of Contents

found on our websites, with or without merit, may result in diversion of the attention of our management personnel and our financial resources and negative publicity on our brand and reputation. Furthermore, if the content posted on our websites contains information that government authorities find objectionable, our websites may be shut down and we may be subject to other penalties. See **Risks Related to Doing Business in China** Regulation and censorship of information disseminated over the Internet in China may adversely affect our business and subject us to liability for information linked to our websites.

PRC advertising laws and regulations require advertisers, advertising operators and advertising distributors, including online advertising publishers such as us, to ensure that the content of the advertisements they prepare or distribute are fair and accurate and are in full compliance with applicable law. Violation of these laws or regulations may result in penalties, including fines, confiscation of advertising fees, orders to cease dissemination of the advertisements and orders to publish an advertisement correcting the misleading information. In circumstances involving serious violations, the PRC government may force the violator to terminate its advertising operation or even revoke its business license. Furthermore, advertisers, advertising operators or advertising distributors may be subject to civil liability if they infringe on the legal rights and interests of third parties.

Under PRC advertising laws and regulations, we are obligated to monitor the advertising content posted on our websites. In addition, where a special government review is required for specific categories of advertisements before posting, we are obligated to confirm that such review has been performed and approval has been obtained. Our reputation could be hurt and our results of operations could be adversely affected if advertisements shown on our websites are provided to us by our advertising clients in violation of relevant PRC advertising laws and regulations, or if the supporting documentation and government approvals provided to us by our advertising clients in connection with such advertising content are not complete.

Our P4P services are not subject to PRC advertising laws and regulations because PRC laws and regulations currently do not classify P4P services as a form of online advertising. However, we cannot assure you that the PRC government will not classify P4P as a form of online advertising in the future. If P4P services are classified as a form of online advertising, we would have to examine the content of our P4P customers' listings on our websites, as required by PRC advertising laws, and such examinations could be very burdensome. Moreover, we have been and in the future may again be subject to claims or negative publicity based on the results in our paid search listings. In November 2008, China Central Television, or CCTV, the largest state-owned television network in China, reported that we had been including websites of medical companies that do not hold proper licenses in our paid search listings for some popular medical terms. Shortly after the report, we removed paid search listings of certain customers, particularly medical and pharmaceutical customers without documentations on file with us, and later allowed a large portion of those customers to resume access to our P4P platform after their relevant documentations were provided to and reviewed by us. The removal of these questionable paid search listings adversely affected our revenues for the fourth quarter of 2008. Claims and negative publicity based on the results in our paid search listings, regardless of their merit, may divert management attention, severely disrupt our operations, adversely affect our results of operations and harm our reputation.

We may be subject to patent infringement claims with respect to our P4P platform.

Our technologies and business methods, including those relating to our pay-for-performance, or P4P, platform, may be subject to third-party claims or rights that limit or prevent their use. In June 2005, we applied for a patent in China for our P4P platform, but our application was rejected on the ground that it is not patentable. Overture Services Inc., or Overture, a subsidiary of Yahoo!, had applied for a patent in China relating to a P4P platform prior to our patent application in China covering a P4P platform. Based on a search conducted by an intellectual property agency in China, as of March 23, 2009, no patent covering a P4P platform had been issued in China. The application and interpretation of China's patent laws and the procedures and standards for granting patents in China are still evolving

and involve a certain degree of uncertainty. We cannot assure you that Overture or another party will not obtain a patent in China relevant to P4P platforms that may result in potential infringement by our P4P platform. Moreover, certain U.S.-based companies, including Overture, have been granted patents in the United States relating to P4P platforms and similar business methods and related technologies. Based on publicly available information, we are aware that Overture has brought patent infringement claims in the United States against third parties, and while we believe that we are not subject to U.S. patent laws since we conduct our business operations

Table of Contents

outside of the United States, we cannot assure you that U.S. patent laws would not be applicable to our business operations, or that holders of patents relating to a P4P platform would not seek to enforce such patents against us in the United States or China.

In addition, many parties are actively developing and seeking protection for Internet-related technologies, including seeking patent protection. There may be patents issued or pending that are held by others that relate to certain aspects of our technologies, products, business methods or services. Any patent infringement claims, regardless of their merits, could be time-consuming and costly to us. If we were sued for patent infringement claims and were found to infringe such patents and were not able to adopt non-infringing technologies, we may be severely limited in our ability to operate our P4P platform, which would have a material adverse effect on our results of operations and business prospects.

If we fail to keep up with rapid technological changes, our future success may be adversely affected.

The online marketing industry is subject to rapid technological changes. Our future success will depend on our ability to respond to rapidly changing technologies, adapt our services to evolving industry standards and improve the performance and reliability of our services. Our failure to adapt to such changes could harm our business. New marketing media could also adversely affect us. For example, the number of people accessing the Internet through devices other than personal computers, including mobile telephones and hand-held devices, has increased in recent years. If we are slow to develop products and technologies that are more compatible with non-PC communications devices, or if the products and services we develop for people accessing the Internet through non-PC communications devices do not meet their needs, we may not be able to capture a significant share of this increasingly important market for media and other services. In addition, the widespread adoption of new Internet, networking or telecommunications technologies or other technological changes could require substantial expenditures to modify or adapt our products, services or infrastructure. If we fail to keep up with rapid technological changes to remain competitive in our rapidly evolving industry, our future success may be adversely affected.

Our business may be adversely affected by third-party software applications or practices that interfere with our receipt of information from, or provision of information to, our users, which may impair our users' experience.

Our business may be adversely affected by third-party malicious or unintentional software applications that make changes to our users' computers and interfere with our products and services. These software applications may change our users' Internet experience by hijacking queries to our websites, altering or replacing our search results, or otherwise interfering with our ability to connect with our users. The interference often occurs without disclosure or consent from users, resulting in a negative experience that users may associate with Baidu.com. These software applications may be difficult or impossible to remove or disable, may reinstall themselves and may circumvent other applications' efforts to block or remove them. In addition, our business may be adversely affected by the practices of third-party website owners which interfere with our ability to crawl and index their web pages. The ability to provide a superior user experience is critical to our success. If we are unable to successfully combat third-party software applications that interfere with our products and services, our reputation may be harmed. If a significant number of website owners prevent us from indexing and including their web pages in our search results, the quality of our search results may be impaired.

We are subject to risks and uncertainties faced by companies with limited operating history in a rapidly evolving industry.

We commenced operations in 2000 and first achieved profitability in the quarter ended March 31, 2004. Accordingly, you should consider our future prospects in light of the risks and uncertainties experienced by companies with limited operating history in evolving industries such as the Internet industry in China. Some of these risks and uncertainties

relate to our ability to:

maintain our leading position in the Chinese language Internet search market;

offer new and innovative products to attract and retain a larger user base;

Table of Contents

attract additional customers and increase spending per customer;

further enhance our brand recognition;

maintain the quality of our products and services and continue to develop user and customer loyalty;

respond to competitive market conditions;

respond to changes in the regulatory environment;

manage risks associated with intellectual property rights;

maintain effective control of our costs and expenses;

attract, retain and motivate qualified personnel;

build profitable operations in new markets such as the Japanese Internet search market; and

upgrade our technology to support increased traffic and expanded services.

If we are unsuccessful in addressing any of these risks and uncertainties, our business may be materially and adversely affected.

Our historical growth rate may not be indicative of our future growth rate.

We have experienced substantial growth in recent years. Our total revenues and net income grew at a compound annual growth rate, or CAGR, of 128.4% and 205.7%, respectively, from 2004 to 2008. Our growth was driven in part by the growth in China's Internet and online marketing industries, which may not be indicative of future growth or be sustainable. We cannot assure you that our past growth rate is indicative of our future growth rate.

Our operating results may fluctuate, which makes our results difficult to predict and could cause our results to fall short of expectations.

Our operating results may fluctuate as a result of a number of factors, many of which are outside of our control. For these reasons, comparing our operating results on a period-to-period basis may not be meaningful, and you should not rely on our past results as an indication of our future performance. Our quarterly and annual revenues and costs and expenses as a percentage of our revenues may be significantly different from our historical or projected rates. Our operating results in future quarters may fall below expectations. Any of these events could cause the price of our ADSs to fall. Any of the risk factors listed in this Risk Factors section and, in particular, the following risk factors, could cause our operating results to fluctuate from quarter to quarter:

general economic conditions in China and economic conditions specific to the Internet, Internet search and online marketing;

our ability to continue to attract users to our website;

our ability to attract additional customers and increase spending per customer;

the announcement or introduction of new or enhanced products and services by us or our competitors;

the amount and timing of operating costs and capital expenditures related to the maintenance and expansion of our businesses, operations and infrastructure;

the results of our acquisitions of, or investments in, other businesses or assets;

PRC regulations or actions pertaining to activities on the Internet, including MP3 music, news, gambling, online games and other forms of entertainment;

unforeseen events, such as negative publicity arising from reports by influential media outlets and other sources; and

Table of Contents

geopolitical events, natural disasters or epidemics such as war, threat of war, avian influenza, Severe Acute Respiratory Syndrome, or SARS, or other public health epidemics.

Because of our limited operating history and our rapidly growing business, our historical operating results may not be useful to you in predicting our future operating results. Our user traffic tends to be seasonal. For example, we generally experience less user traffic during public holidays and other special event periods in China. In addition, advertising and other marketing spending in China has historically been cyclical, reflecting overall economic conditions as well as budgeting and buying patterns. Our rapid growth has lessened the impact of the cyclicity and seasonality of our business. As we continue to grow, we expect that the cyclicity and seasonality in our business may cause our operating results to fluctuate.

The global financial and economic crisis, particularly the slowdown in the Chinese economy, may adversely affect our business, results of operations and financial condition.

The global financial markets have experienced significant disruptions recently, and most of the world's major economies have entered into recession. The Chinese economy has also slowed down significantly since the second half of 2008 and this trend may continue for the rest of 2009 and beyond. Since we derive most of our revenues from online marketing customers in China, any prolonged slowdown in the Chinese economy may have negative impact on our business, operating results and financial condition in a number of ways. For example, our customers may decrease or delay spending with us, while we may have difficulty expanding our customer base fast enough, or at all, to offset the impact of decreased spending by our existing customers. In addition, to the extent we offer credit to any customer and such customer experiences financial difficulties due to the economic slowdown, we could have difficulty collecting payment from such customer.

We may not be able to prevent others from unauthorized use of our intellectual property, which could harm our business and competitive position.

We rely on a combination of copyright, trademark and trade secret laws, as well as nondisclosure agreements and other methods to protect our intellectual property rights. The protection of intellectual property rights in China may not be as effective as those in the United States or other countries. The steps we have taken may be inadequate to prevent the misappropriation of our technology. Reverse engineering, unauthorized copying or other misappropriation of our technologies could enable third parties to benefit from our technologies without paying us. Moreover, unauthorized use of our technology could enable our competitors to offer products and services that are comparable to or better than ours, which could harm our business and competitive position. From time to time, we may have to enforce our intellectual property rights through litigation. Such litigation may result in substantial costs and diversion of resources and management attention.

Because we rely to a large extent on distributors in providing our P4P services, our failure to retain key distributors or attract additional distributors could materially and adversely affect our business. Moreover, there is no assurance that our direct sales model in some key geographic markets will continue to be successful.

Online marketing is at an early stage of development in China and is not as widely accepted by or available to businesses in China as in the United States. As a result, we rely to a large extent on a nationwide distribution network of third-party distributors for our sales to, and collection of payment from, our P4P customers. If our distributors do not provide quality services to our P4P customers or otherwise breach their contracts with our P4P customers, we may lose customers and our results of operations may be materially and adversely affected. We do not have long-term agreements with any of our distributors, including our key distributors, and cannot assure you that we will continue to maintain favorable relationships with them. If we fail to retain our key distributors or attract additional distributors on

terms that are commercially reasonable, our business and results of operations could be materially and adversely affected.

We have transitioned to using our direct sales force to serve our P4P customers in some key geographic markets, including Shanghai, Beijing and selected cities in Guangdong Province, including Guangzhou, Shenzhen and Dongguan. There is no assurance that our direct sales model in those markets will continue to be successful. If

Table of Contents

we fail to maintain an adequate direct sales force, retain existing customers and continue to attract new customers in those markets, our business, results of operations and prospects could be materially and adversely affected.

We rely on our Baidu Union members for a significant portion of our revenues. If we fail to retain existing Baidu Union members or attract additional members, our revenue growth and profitability may be adversely affected.

We pay our Baidu Union members a portion of our revenues generated from click-throughs by users of our Baidu Union members' property. We consider our Baidu Union critical to the future growth of our revenues. Some of our Baidu Union members, however, may compete with us in one or more areas of our business. Therefore, they may decide in the future to terminate their relationships with us. If our Baidu Union members decide to use a competitor's or their own Internet search services, our user traffic may decline, which may adversely affect our revenues. If we fail to attract additional Baidu Union members, our revenue growth may be adversely affected. In addition, if we have to share a larger portion of our revenues to retain existing Baidu Union members or attract additional members, our profitability may be adversely affected.

Our strategy of acquiring complementary businesses, assets and technologies may fail.

As part of our business strategy, we have pursued, and intend to continue to pursue, selective strategic acquisitions of businesses, assets and technologies that complement our existing business. For example, we acquired certain online application platform businesses and customer lists from distributors in 2006 and 2007. We may make other acquisitions in the future if suitable opportunities arise. Acquisitions involve uncertainties and risks, including:

potential ongoing financial obligations and unforeseen or hidden liabilities;

failure to achieve the intended objectives, benefits or revenue-enhancing opportunities;

costs and difficulties of integrating acquired businesses and managing a larger business; and

diversion of resources and management attention.

Our failure to address these risks successfully may have a material adverse effect on our financial condition and results of operations. Any such acquisition may require a significant amount of capital investment, which would decrease the amount of cash available for working capital or capital expenditures. In addition, if we use our equity securities to pay for acquisitions, we may dilute the value of our ADSs and the underlying ordinary shares. If we borrow funds to finance acquisitions, such debt instruments may contain restrictive covenants that could, among other things, restrict us from distributing dividends. Such acquisitions may also generate significant amortization expenses related to intangible assets.

Our recent expansion into the Japanese market may not be successful.

We formally launched our Japanese search service in January 2008, after completing a 10-month Beta test for the service. Therefore, we only have limited experience operating in the Japanese market. Moreover, our Japan operation has incurred operating losses since its inception in December 2006, and there is no assurance when it will become profitable, if at all. Additional future losses in our Japan operation could have a material adverse effect on our overall results of operations.

The Japanese search market is highly competitive and currently is dominated by two companies, Yahoo! and Google. These companies have significantly greater financial resources, longer operating history and more experience in the Japanese search market than we do. Moreover, other local providers of competing search services may also have a

substantial advantage over us in attracting users due to more established branding in Japan, greater knowledge with respect to the tastes and preferences of Japanese users and their focus on the Japanese market. If we cannot compete successfully with these competitors in the Japanese language search market, our business in Japan could be adversely affected.

Table of Contents

In addition to uncertainty about our ability to compete successfully in Japan, there are certain risks inherent in doing business internationally, including:

trade barriers and changes in trade regulations;

difficulties in developing, staffing and simultaneously managing a foreign operation as a result of distance, language and cultural differences;

stringent local labor laws and regulations;

longer customer payment cycles;

currency exchange rate fluctuations;

political or social unrest or economic instability;

seasonal volatility in business activity;

risks related to government regulations or required compliance with local laws and changes in such laws and regulations; and

potentially adverse tax consequences.

One or more of these factors could harm our Japanese operations and consequently, could harm our overall operating results.

Our success depends on the continuing and collaborative efforts of our senior management team and other key personnel, and our business may be harmed if we lose their services.

Our future success depends heavily upon the continuing services of the members of our senior management team, in particular our chairman and chief executive officer, Robin Yanhong Li. If one or more of our senior executives or other key personnel are unable or unwilling to continue in their present positions, we may not be able to replace them easily or at all, and our business may be disrupted and our financial condition and results of operations may be materially and adversely affected. Competition for senior management and key personnel is intense, the pool of qualified candidates is very limited, and we may not be able to retain the services of our senior executives or key personnel, or attract and retain high-quality senior executives or key personnel in the future. In addition, most of our current senior executives joined us in 2008 and have worked together only for a relatively short period of time. As a result, it may be difficult for you to evaluate how well our senior executives will work together as a team.

If any member of our senior management team or any of our other key personnel joins a competitor or forms a competing company, we may lose customers, distributors, know-how and key professionals and staff members. Each of our executive officers and key employees has entered into an employment agreement with us, containing confidentiality and non-competition provisions. If any disputes arise between any of our senior executives or key personnel and us, we cannot assure you the extent to which any of these agreements may be enforced.

We rely on highly skilled personnel and, if we are unable to retain or motivate them or hire qualified personnel, we may not be able to grow effectively.

Our performance and future success depends on the talents and efforts of highly skilled individuals. We will need to continue to identify, hire, develop, motivate and retain highly skilled personnel for all areas of our organization. Competition in our industry for qualified employees is intense. Our continued ability to compete effectively depends on our ability to attract new employees and to retain and motivate our existing employees.

As competition in our industry intensifies, it may be more difficult for us to hire, motivate and retain highly skilled personnel. If we do not succeed in attracting additional highly skilled personnel or retaining or motivating our existing personnel, we may be unable to grow effectively.

Table of Contents

If we are unable to adapt or expand our existing technology infrastructure to accommodate greater traffic or additional customer requirements, our business may be harmed.

Our Baidu.com website regularly serves a large number of users and customers and delivers a large number of daily page views. Our technology infrastructure is highly complex and may not provide satisfactory service in the future, especially as the number of customers using our P4P services increases. We may be required to upgrade our technology infrastructure to keep up with the increasing traffic on our websites, such as increasing the capacity of our hardware servers and the sophistication of our software. If we fail to adapt our technology infrastructure to accommodate greater traffic or customer requirements, our users and customers may become dissatisfied with our services and switch to our competitors' websites, which could harm our business.

If we fail to detect fraudulent click-through, we could lose the confidence of our customers and our revenues could decline.

We are exposed to the risk of click-through fraud on our paid search results. Click-through fraud occurs when a person clicks paid search results for a reason other than to view the underlying content of search results. If we find evidence of past fraudulent clicks, we may have to issue refunds to our customers. If we fail to detect fraudulent clicks or otherwise are unable to prevent this fraudulent activity, the affected customers may experience a reduced return on their investment in our online marketing services and lose confidence in the integrity of our systems. If this happens, we may be unable to retain existing customers and attract new customers for our online marketing services and our online marketing revenues could decline. In addition, affected customers may also file legal actions against us claiming that we have over-charged or failed to refund them. Any such claims or similar claims, regardless of their merits, could be time-consuming and costly to us and could also adversely affect our brand image and our customers' confidence in the integrity of our systems.

The successful operation of our business depends upon the performance and reliability of the Internet infrastructure and fixed telecommunications networks in China.

Our business depends on the performance and reliability of the Internet infrastructure in China. Almost all access to the Internet is maintained through state-owned telecommunication operators under the administrative control and regulatory supervision of the Ministry of Industry and Information Technology, or the MIIT. In addition, the national networks in China are connected to the Internet through international gateways controlled by the PRC government. These international gateways are the only channels through which a domestic user can connect to the Internet. We cannot assure you that a more sophisticated Internet infrastructure will be developed in China. We may not have access to alternative networks in the event of disruptions, failures or other problems with China's Internet infrastructure. In addition, the Internet infrastructure in China may not support the demands associated with continued growth in Internet usage.

We also rely on China Telecommunications Corporation, or China Telecom, China United Network Communications Group Company Limited, or China Unicom, and China Mobile Communications Corporation, or China Mobile, to provide us with data communications capacity primarily through local telecommunications lines and Internet data centers to host our servers. We do not have access to alternative services in the event of disruptions, failures or other problems with the fixed telecommunications networks of China Telecom, China Unicom and China Mobile, or if these companies otherwise fail to provide such services. In July 2008, due to power failures at a China Telecom Internet data center that hosted our servers, we were unable to provide service for approximately five hours. Any unscheduled service interruption could damage our reputation and result in a decrease in our revenues. Furthermore, we have no control over the costs of the services provided by China Telecom, China Unicom and China Mobile. If the prices that we pay for telecommunications and Internet services rise significantly, our gross margins could be adversely affected. In addition, if Internet access fees or other charges to Internet users increase, our user traffic may

decrease, which in turn may harm our revenues.

Table of Contents

Interruption or failure of our information technology and communications systems could impair our ability to effectively provide our products and services, which could damage our reputation and harm our operating results.

Our ability to provide our products and services depends on the continuing operation of our information technology and communications systems. Any damage to or failure of our systems could interrupt our service. Service interruptions could reduce our revenues and profits, and damage our brand if our system is perceived to be unreliable. Our systems are vulnerable to damage or interruption as a result of terrorist attacks, war, earthquakes, floods, fires, power loss, telecommunications failures, computer viruses, interruptions in access to our websites through the use of denial of service or similar attacks, hacking or other attempts to harm our systems, and similar events. Our servers, which are hosted at third-party Internet data centers, are also vulnerable to break-ins, sabotage and vandalism. Some of our systems are not fully redundant, and our disaster recovery planning does not account for all possible scenarios. The occurrence of a natural disaster or a closure of an Internet data center by a third-party provider without adequate notice could result in lengthy service interruptions.

In September 2006, our Internet search services were disrupted for approximately half an hour as a result of attacks to our Baidu.com website from unknown hackers. If we experience frequent or persistent system failures on our websites, our reputation and brand could be permanently harmed. The steps we plan to take to increase the reliability and redundancy of our systems are expensive, reduce our operating margin and may not be successful in reducing the frequency or duration of service interruptions.

Our business could be adversely affected if our software contains bugs.

Our online systems, including our websites, could contain undetected errors or bugs that could adversely affect their performance. We regularly update and enhance our website and our other online systems. The occurrence of errors in any of these may cause us to lose market share, damage our reputation and brand name, and materially and adversely affect our business.

Concerns about the security of electronic commerce transactions and confidentiality of information on the Internet may reduce use of our network and impede our growth.

A significant barrier to electronic commerce and communications over the Internet in general has been a public concern over security and privacy, including the transmission of confidential information. If these concerns are not adequately addressed, they may inhibit the growth of the Internet and other online services generally, especially as a means of conducting commercial transactions. If a well-publicized Internet breach of security were to occur, general Internet usage could decline, which could reduce traffic to our destination websites and impede our growth.

If we fail to maintain an effective system of internal control over financial reporting, we may lose investor confidence in the reliability of our financial statements.

We are subject to reporting obligations under the U.S. securities laws. The SEC, as required by Section 404 of the Sarbanes-Oxley Act of 2002, adopted rules requiring every public company to include a management report on such company's internal control over financial reporting in its annual report, which contains management's assessment of the effectiveness of the company's internal control over financial reporting. In addition, an independent registered public accounting firm must attest to and report on the effectiveness of the company's internal control over financial reporting. We have been subject to these requirements since the fiscal year ended December 31, 2006.

Our management has concluded that our internal control over financial reporting is effective as of December 31, 2008. See Item 15. Control and Procedures. Our independent registered public accounting firm has issued an attestation report, which has concluded that our internal control over financial reporting is effective in all material aspects.

However, if we fail to maintain effective internal control over financial reporting in the future, our management and our independent registered public accounting firm may not be able to conclude that we have effective internal control over financial reporting at a reasonable assurance level. This could in turn result in the loss of investor confidence in the reliability of our financial statements and negatively impact the trading price of our

Table of Contents

ADSs. Furthermore, we have incurred and anticipate that we will continue to incur considerable costs, management time and other resources in an effort to comply with Section 404 and other requirements of the Sarbanes-Oxley Act.

We have limited business insurance coverage.

The insurance industry in China is still at an early stage of development. Insurance companies in China offer limited business insurance products. We do not have any business liability or disruption insurance coverage for our operations in China. Any business disruption may result in our incurring substantial costs and the diversion of our resources.

Risks Related to Our Corporate Structure

PRC laws and regulations governing our businesses and the validity of certain of our contractual arrangements are uncertain. If we are found to be in violation, we could be subject to sanctions. In addition, changes in such PRC laws and regulations or changes in interpretations thereof may materially and adversely affect our business.

There are substantial uncertainties regarding the interpretation and application of PRC laws and regulations, including, but not limited to, the laws and regulations governing our business, or the enforcement and performance of our contractual arrangements with our affiliated Chinese entities, Baidu Netcom Science Technology Co., Ltd., or Baidu Netcom, Beijing Perusal Technology Co., Ltd., or Beijing Perusal, and Beijing BaiduPay Science and Technology Co., Ltd., or BaiduPay, and their shareholders. We and our PRC subsidiaries, Baidu Online Network Technology (Beijing) Co., Ltd., or Baidu Online, Baidu (China) Co., Ltd., or Baidu China and Baidu.com Times Technology (Beijing) Co. Ltd., or Baidu Times, are considered foreign persons or foreign-invested enterprises under PRC law. As a result, we and our PRC subsidiaries are subject to PRC legal restrictions on foreign ownership of Internet and online advertising companies. These laws and regulations are relatively new and may be subject to change, and their official interpretation and enforcement may involve substantial uncertainty. New laws and regulations that affect existing and proposed future businesses may also be applied retroactively.

The PRC government has broad discretion in dealing with violations of laws and regulations, including levying fines, revoking business and other licenses and requiring actions necessary for compliance. We cannot predict the effect of the interpretation of existing or new PRC laws or regulations on our businesses. We cannot assure you that our current ownership and operating structure would not be found in violation of any current or future PRC laws or regulations. As a result, we may be subject to sanctions, including fines, and could be required to restructure our operations or cease to provide certain services. Any of these or similar actions could significantly disrupt our business operations or restrict us from conducting a substantial portion of our business operations, which could materially and adversely affect our business, financial condition and results of operations.

If the PRC government were to classify P4P services as a form of online advertising or as part of Internet content provider services, we may have to conduct our P4P business through Baidu Netcom, which would increase our effective tax rate, and we might be subject to sanctions and required to pay delinquent taxes.

PRC laws and regulations do not currently classify P4P as a form of online advertising or as part of ICP services requiring an ICP license. We conduct our P4P business through our subsidiaries in the PRC, none of which has the qualification to operate online advertising business or holds an ICP license. However, we cannot assure you that the PRC government will not classify P4P as a form of online advertising or as part of ICP services in the future. If new regulations characterize P4P as a form of online advertising or as part of ICP services, we may have to conduct our P4P business through Baidu Netcom, which is qualified to operate online advertising business and holds an ICP license. This would increase our consolidated effective tax rate for two reasons. First, advertising revenues generated by Baidu Netcom are subject to a 3% construction fee for culture undertakings in addition to the 5% business tax. Second, Baidu Netcom is currently subject to a 25% enterprise income tax rate, as compared to the lower preferential

enterprise income tax rates that our PRC subsidiaries are subject to as of the date of this annual report. See Item 5A. Operating and Financial Review and Prospects Operating Results Taxation for more information on PRC business and enterprise income tax as applicable to our subsidiaries and affiliated entities in the PRC. Moreover, if the change in classification of P4P were to be retroactively applied, we might be subject to

Table of Contents

sanctions, including payment of delinquent taxes and fines. In addition, the classification of P4P as a form of online advertising could subject us to an obligation to monitor the content of listings of our P4P customers on our websites and the associated risks. See **Risks Related to Our Businesses** We may be subject to claims based on the content found on our websites or the results in our paid search listings. Any change in the classification of P4P by the PRC government may significantly disrupt our operations and materially and adversely affect our business, results of operations and financial conditions.

We may be adversely affected by complexity, uncertainties and changes in PRC regulation of Internet business and companies, including limitations on our ability to own key assets such as our websites.

The PRC government extensively regulates the Internet industry, including foreign ownership of, and the licensing and permit requirements pertaining to, companies in the Internet industry. These Internet-related laws and regulations are relatively new and evolving, and their interpretation and enforcement involve significant uncertainty. As a result, in certain circumstances it may be difficult to determine what actions or omissions may be deemed to be violations of applicable laws and regulations. Issues, risks and uncertainties relating to PRC government regulation of the Internet industry include, but are not limited to, the following:

We only have contractual control over our websites. We do not own the websites due to the restriction of foreign investment in businesses providing value-added telecommunication services in China, including online information services.

There are uncertainties relating to the regulation of the Internet business in China, including evolving licensing practices. This means that permits, licenses or operations at some of our companies may be subject to challenge, or we may not be able to obtain or renew certain permits or licenses, including without limitation an Internet news license issued by the State Council News Office, an Internet culture business permit issued by the Ministry of Culture and an audio/video program transmission license issued by the State Administration of Radio, Film and Television. This may significantly disrupt our business, or subject us to sanctions, requirements to increase capital or other conditions or enforcement, or compromise enforceability of related contractual arrangements, or have other harmful effects on us.

Certain PRC government authorities have stated publicly that they are in the process of promulgating new laws and regulations that will regulate Internet activities, including online advertising and online payment. Other aspects of our online operations may be regulated in the future. If these new laws and regulations are promulgated, additional licenses may be required for our online operations. If our operations do not comply with these new regulations at the time they become effective, or if we fail to obtain any licenses required under these new laws and regulations, we could be subject to penalties.

In July 2006, the MIIT (then known as the Ministry of Information Industry) issued the Notice of the Ministry of Information Industry on Intensifying the Administration of Foreign Investment in Value-added Telecommunications Services, or the July 2006 Notice. The July 2006 Notice prohibits domestic telecommunication services providers from leasing, transferring or selling telecommunications business operating licenses to any foreign investor in any form, or providing any resources, sites or facilities to any foreign investor for their illegal operation of a telecommunications business in China. According to the July 2006 Notice, either the holder of a value-added telecommunication business operating license or its shareholders must directly own the domain names and trademarks used by such license holders in their provision of value-added telecommunication services. The July 2006 Notice also requires each license holder to have the necessary facilities, including servers, for its approved business operations and to maintain such facilities in the regions covered by its license.

Baidu Netcom, our PRC affiliated entity that holds the ICP license necessary to conduct our business in China, received a letter from the MIIT requiring self-assessment and responded timely. In order to comply with the July 2006 Notice, we have transferred certain domain names primarily used in our business to Baidu Netcom and Beijing Perusal, respectively. In addition, we are in the process of transferring certain trademarks, including pending trademark applications made by Baidu Online, to Baidu Netcom, Beijing Perusal and BaiduPay, respectively.

As we enter into new businesses, we may encounter additional regulatory uncertainties. For example, it remains unclear whether the provision of online payment services by BaiduPay will require BaiduPay to apply for a

Table of Contents

value-added telecommunications business operating license for online data processing and transaction processing businesses as provided in the Catalog of Telecommunications Businesses promulgated by the MIIT.

In addition, there are currently no regulations requiring a non-financial institution that provides third-party online payment services, such as BaiduPay, to apply for licensing from the People's Bank of China, or the PBOC. However, in 2005, the PBOC published Draft Measures Concerning the Administration of Payment and Settlement Organizations, or the Draft Measures, for public comment. According to the Draft Measures, non-financial institutions engaging in activities related to payment and settlement services, including services such as providing electronic instructions and calculations to financial institutions, individuals and other entities, shall be required to obtain a license from the PBOC or its relevant branches in order to provide payment and settlement services. The Draft Measures have not yet taken effect. If the Draft Measures are officially adopted by the PBOC and become applicable to BaiduPay, it may be necessary for us to obtain approvals or licenses to engage in our online payment business. We cannot assure you that we will be able to obtain these approvals or licenses.

Furthermore, in December 2007, the Standing Committee of Beijing Municipal People's Congress adopted Beijing Municipal Regulations on Promotion of Informatization, which provide that any individual or enterprise that conducts business operations through the Internet shall obtain a business license and/or other necessary licenses prior to operation. The operator of an online marketplace shall be responsible for checking such individual or enterprise's licenses. In July 2008, the Beijing Administration for Industry and Commerce, or Beijing AIC, promulgated certain rules for implementing the above mentioned regulations. According to these rules, any individual or enterprise failing to obtain a business license may be prohibited from doing business on an e-commerce marketplace operating in Beijing, such as Baidu Youa, and violation of these rules may lead to penalties on either the individual/enterprise or the operator of the e-commerce marketplace. Substantial uncertainties exist in terms of the implementation of these rules, and there are very few public reports regarding actions taken by the Beijing AIC against any violators in this regard. We cannot predict to what extent these rules will affect our business operations or future strategy.

The interpretation and application of existing PRC laws, regulations and policies and possible new laws, regulations or policies relating to the Internet industry have created substantial uncertainties regarding the legality of existing and future foreign investments in, and the businesses and activities of, Internet businesses in China, including our business.

In order to comply with PRC laws and regulations limiting foreign ownership of Internet and online advertising businesses, we conduct our ICP and online advertising businesses through our consolidated affiliated entities in China by means of contractual arrangements. If the PRC government determines that these contractual arrangements do not comply with applicable regulations, our business could be adversely affected.

The PRC government restricts foreign investment in Internet and online advertising businesses. Accordingly, we operate our websites and our online advertising business in China through Baidu Netcom, a company wholly-owned by our chairman, chief executive officer and co-founder Robin Yanhong Li and our co-founder Eric Yong Xu, Beijing Perusal, a company wholly-owned by two individuals designated by our company, and BaiduPay, a company wholly-owned by Baidu Netcom and an individual designated by our company. All of the individual shareholders of Baidu Netcom, Beijing Perusal and BaiduPay are PRC citizens. Baidu Netcom and Beijing Perusal hold the licenses and approvals necessary to operate our websites and our online advertising business in China. We have contractual arrangements with Baidu Netcom, Beijing Perusal, BaiduPay and their individual shareholders that allow us to substantially control Baidu Netcom, Beijing Perusal and BaiduPay. We cannot assure you, however, that we will be able to enforce these contracts.

Although we believe we comply with current PRC regulations, we cannot assure you that the PRC government would agree that these operating arrangements comply with PRC licensing, registration or other regulatory requirements,

with existing policies or with requirements or policies that may be adopted in the future. If the PRC government determines that we do not comply with applicable law, it could revoke our business and operating licenses, require us to discontinue or restrict our operations, restrict our right to collect revenues, block our websites, require us to restructure our operations, impose additional conditions or requirements with which we may not be

Table of Contents

able to comply, impose restrictions on our business operations or on our customers, or take other regulatory or enforcement actions against us that could be harmful to our business.

Our contractual arrangements with our consolidated affiliated entities in China and their individual shareholders may not be as effective in providing control over these entities as direct ownership.

Since PRC law restricts foreign equity ownership in Internet and online advertising companies in China, we operate our ICP and online advertising businesses through our consolidated affiliated entities in China, Baidu Netcom, Beijing Perusal and BaiduPay. We have no equity ownership interest in any of these entities and must rely on contractual arrangements to control and operate such businesses. These contractual arrangements may not be as effective in providing control over these entities as direct ownership. For example, Baidu Netcom, Beijing Perusal or BaiduPay could fail to take actions required for our business or fail to maintain our websites despite its contractual obligation to do so. If they fail to perform under their respective agreements with us, we may have to rely on legal remedies under PRC law, which may not be effective. In addition, we cannot assure you that any of their respective individual shareholders would always act in our best interests.

The new PRC Property Rights Law may affect the perfection of the pledge in our equity pledge agreements with our consolidated affiliated entities and their individual shareholders.

Under the equity pledge agreements among Baidu Online and our consolidated affiliated entities, Baidu Netcom, Beijing Perusal and BaiduPay, and their respective individual shareholders, the individual shareholders of Baidu Netcom, Beijing Perusal and BaiduPay have pledged all of their equity interests therein to Baidu Online by recording the pledge on the shareholder registers of the respective entities. However, according to the PRC Property Rights Law, which became effective as of October 1, 2007, a pledge is not effective without being registered with the relevant local administration for industry and commerce. The State Administration for Industry and Commerce, or SAIC, and the Beijing AIC have adopted registration procedures with respect to the registration of equity interest pledge according to the Property Rights Law. However, it remains unclear under the PRC Property Rights Law whether Baidu Netcom and Beijing Perusal are required to register their pledges, which were created before October 1, 2007. Baidu Netcom, Beijing Perusal and BaiduPay are in the process of registering the equity pledge with the Beijing AIC. We cannot assure you that they will be able to register the pledge. If they are unable to do so, the pledges may be deemed ineffective under the PRC Property Rights Law. If any individual shareholder of Baidu Netcom, Beijing Perusal or BaiduPay breaches his or her obligations under the agreement with Baidu Online, there is a risk that Baidu Online may not be able to successfully enforce the pledge and would need to resort to legal proceedings to enforce its contractual rights.

Our contractual arrangements with our consolidated affiliated entities in China may result in adverse tax consequences to us.

As a result of our corporate structure and the contractual arrangements between Baidu Online and each of our consolidated affiliated entities in China, we are effectively subject to the 5% PRC business tax on both revenues generated by Baidu Netcom's, Beijing Perusal's and BaiduPay's operations in China and revenues derived from Baidu Online's contractual arrangements with these entities. Moreover, we would be subject to adverse tax consequences if the PRC tax authorities were to determine that the contracts between Baidu Online and these entities were not on an arm's length basis and therefore constitute a favorable transfer pricing. As a result, the PRC tax authorities could request that Baidu Netcom, Beijing Perusal and BaiduPay adjust their taxable income upward for PRC tax purposes. Such a pricing adjustment could adversely affect us by increasing Baidu Netcom's, Beijing Perusal's and BaiduPay's tax expenses without reducing Baidu Online's tax expenses, which could subject Baidu Netcom, Beijing Perusal and BaiduPay to interest due on late payments and other penalties for under-payment of taxes.

The new PRC Enterprise Income Tax Law became effective on January 1, 2008. This new tax law specifies special adjustments to taxation. In particular, an enterprise must submit its annual tax return together with information on related party transactions to the tax authorities. The tax authorities may impose reasonable adjustments on taxation if they have identified any related party transactions that are inconsistent with arm's-length principles.

Table of Contents

We may have exposure to greater than anticipated tax liabilities.

We are subject to income tax, business tax and other taxes in many provinces and cities in China and our tax structure is subject to review by various local tax authorities. The determination of our provision for income tax and other tax liabilities requires significant judgment and in the ordinary course of our business, there are many transactions and calculations where the ultimate tax determination is uncertain. Although we believe our estimates are reasonable, the ultimate decisions by the relevant tax authorities may differ from the amounts recorded in our financial statements and may materially affect our financial results in the period or periods for which such determination is made.

The principal shareholder of Baidu Netcom has potential conflicts of interest with us, which may adversely affect our business.

Robin Yanhong Li, our chairman and chief executive officer, is also the principal shareholder of Baidu Netcom. Conflicts of interests between his duties to our company and Baidu Netcom may arise. As Mr. Li is a director and executive officer of our company, he has a duty of loyalty and care to us under Cayman Islands law when there are any potential conflicts of interests between our company and Baidu Netcom. Additionally, Mr. Li has executed an irrevocable power of attorney to appoint the individual designated by us to be his attorney-in-fact to vote on his behalf on all Baidu Netcom matters requiring shareholder approval. We cannot assure you, however, that when conflicts of interest arise, Mr. Li will act completely in our interests or that conflicts of interests will be resolved in our favor. In addition, Mr. Li could violate his employment agreement with us or his legal duties by diverting business opportunities from us to others. If we cannot resolve any conflicts of interest between us and Mr. Li, we would have to rely on legal proceedings, which could be expensive, time-consuming and result in the disruption of our business.

Our corporate actions are substantially controlled by our principal shareholders and affiliated entities.

Our principal shareholders and their affiliated entities own more than a majority of our voting power due to our dual-class ordinary share structure. These shareholders, acting individually or as a group, could exert substantial influence over matters such as electing directors and approving mergers or other business combination transactions. This concentration of voting power may also discourage, delay or prevent a change in control of our company, which could deprive our shareholders of an opportunity to receive a premium for their shares as part of a sale of our company and might reduce the price of our ADSs.

We may be unable to collect long-term loans to the shareholders of our consolidated affiliated entities in China.

As of December 31, 2008, we had made long-term loans in an aggregate principal amount of RMB100.0 million (US\$14.7 million), RMB1.0 million (US\$0.1 million) and RMB9.0 million (US\$1.3 million) to the individual shareholders of Baidu Netcom, Beijing Perusal and BaiduPay, respectively. We extended these loans to enable the shareholders to fund the initial capitalization of Baidu Netcom, Beijing Perusal and BaiduPay, respectively, and in the case of Baidu Netcom, subsequent increases in its registered capital. As of the date of this annual report, all of the registered capital of our consolidated affiliated entities in China has been fully funded. We may in the future provide additional loans to the individual shareholders of our consolidated affiliated entities in China in connection with any increase in their capitalization to the extent necessary and permissible under applicable law. Our ability to ultimately collect these loans will depend on the profitability of these consolidated affiliated entities and their operational needs, which are uncertain.

Risks Related to Doing Business in China

Adverse changes in economic and political policies of the PRC government could have a material adverse effect on the overall economic growth of China, which could adversely affect our business.

Most of our business operations are conducted in China. Accordingly, our results of operations, financial condition and prospects are subject to a significant degree to economic, political and legal developments in China. China's economy differs from the economies of most developed countries in many respects, including with respect

Table of Contents

to the amount of government involvement, level of development, growth rate, control of foreign exchange and allocation of resources. While the PRC economy has experienced significant growth in the past 30 years, growth has been uneven across different regions and among various economic sectors of China. The PRC government has implemented various measures to encourage economic development and guide the allocation of resources. Some of these measures benefit the overall PRC economy, but may also have a negative effect on us. For example, our financial condition and results of operations may be adversely affected by government control over capital investments or changes in tax regulations that are applicable to us. In addition, future measures to control the pace of economic growth may cause a decrease in the level of economic activity in China, which in turn could adversely affect our results of operations and financial condition.

Regulation and censorship of information disseminated over the Internet in China may adversely affect our business and subject us to liability for information displayed on or linked to our websites.

The PRC government has adopted regulations governing Internet access and the distribution of news and other information over the Internet. Under these regulations, Internet content providers and Internet publishers are prohibited from posting or displaying over the Internet content that, among other things, violates PRC laws and regulations, impairs the national dignity of China, or is reactionary, obscene, superstitious, fraudulent or defamatory. Failure to comply with these requirements may result in the revocation of licenses to provide Internet content and other licenses and the closure of the concerned websites. In the past, failure to comply with such requirements has resulted in the closure of certain websites. The website operator may also be held liable for such censored information displayed on or linked to the website.

In addition, the MIIT has published regulations that subject website operators to potential liability for content displayed on their websites and the actions of users and others using their systems, including liability for violations of PRC laws and regulations prohibiting the dissemination of content deemed to be socially destabilizing. The Ministry of Public Security has the authority to order any local Internet service provider to block any Internet website at its sole discretion. From time to time, the Ministry of Public Security has stopped the dissemination over the Internet of information which it believes to be socially destabilizing. The State Secrecy Bureau is also authorized to block any website it deems to be leaking State secrets or failing to meet the relevant regulations relating to the protection of State secrets in the dissemination of online information. Furthermore, we are required to report any suspicious content to relevant governmental authorities, and to undergo computer security inspections. If we fail to implement the relevant safeguards against security breaches, our websites may be shut down and our business and ICP licenses may be revoked. In addition, Internet companies which provide bulletin board systems, chat rooms or similar services must apply for specific approval from relevant authorities.

Although we attempt to monitor the content in our search results and on our online communities such as Baidu Post Bar, we are not able to control or restrict the content of other Internet content providers linked to or accessible through our websites, or content generated or placed on our Baidu Post Bar message boards or our other online communities by our users. To the extent that PRC regulatory authorities find any content displayed on our websites objectionable, they may require us to limit or eliminate the dissemination of such information on our websites. If third-party websites linked to or accessible through our websites operate unlawful activities such as online gambling on their websites, PRC regulatory authorities may require us to report such unlawful activities to relevant authorities and to remove the links to such websites, or they may suspend or shut down the operation of such websites. PRC regulatory authorities may also temporarily block access to certain websites for a period of time for reasons beyond our control. Any of these actions may reduce our user traffic and adversely affect our business. In addition, we may be subject to penalties for violations of those regulations arising from information displayed on or linked to our websites, including a suspension or shutdown of our online operations.

Intensified government regulation of Internet cafes could restrict our ability to maintain or increase user traffic to our website.

In April 2001, the PRC government began tightening its regulation of Internet cafes. In particular, a large number of unlicensed Internet cafes have been closed. In addition, the PRC government has imposed higher capital and facility requirements for the establishment of Internet cafes. Furthermore, the PRC government's policy, which encourages the development of a limited number of national and regional Internet cafe chains and discourages the

Table of Contents

establishment of independent Internet cafes, may slow down the growth of Internet cafes. In June 2002, the Ministry of Culture, together with other government authorities, issued a joint notice, and in February 2004, the SAIC issued another notice, suspending the issuance of new Internet cafe licenses. In May 2007, the SAIC reiterated its position not to register any new Internet cafes in 2007. So long as Internet cafes are one of the primary venues for our users to access our websites, any reduction in the number, or any slowdown in the growth, of Internet cafes in China could limit our ability to maintain or increase user traffic to our websites.

If our PRC subsidiaries Baidu Online and Baidu Times fail to maintain qualification as high and new technology enterprise under the PRC Enterprise Income Tax Law, or if our PRC subsidiary Baidu China fails to retain its 50% reduced rate tax holiday, or if our PRC subsidiaries declare and distribute dividends to their respective offshore parent companies, we will be required to pay more taxes, which could have a material adverse effect on our result of operations.

According to the PRC Enterprise Income Tax Law, or the EIT Law, which became effective on January 1, 2008, as further clarified by subsequent tax regulations implementing the EIT Law, foreign-invested enterprises and domestic enterprises are subject to EIT at a uniform rate of 25%. The EIT rate of enterprises established before March 16, 2007 that were eligible for preferential tax rates according to then effective tax laws and regulations will gradually transition to the uniform 25% EIT rate by January 1, 2013. In addition, certain enterprises may still benefit from a preferential tax rate of 15% under the EIT Law if they qualify as high and new technology enterprises strongly supported by the State, subject to certain general factors described in the EIT Law and the related regulations.

In December 2008, our PRC subsidiaries Baidu Online and Baidu Times were designated by the Beijing Municipal Science and Technology Commission as high and new technology enterprise under the EIT Law. In February 2009, Baidu Online and Baidu Times received the high and new technology enterprise certificates jointly issued by the Beijing Municipal Science and Technology Commission, Beijing Finance Bureau, and Beijing State and Local Tax Bureaus. Therefore, Baidu Online and Baidu Times are entitled to enjoy a preferential tax rate of 15% as long as they maintain their qualification as high and new technology enterprise. If either or both of them fail to maintain the high and new technology enterprise qualification, their applicable EIT rate may increase to up to 25%, which could have a material adverse effect on our results of operations. We cannot assure you that we will be able to maintain our current effective tax rate in the future.

In 2006, our PRC subsidiary Baidu China was designated as a software enterprise by the Shanghai Municipal Information Commission and was entitled to a full exemption from the EIT from 2006 to 2007 and a 50% reduced rate from 2008 to 2010 based on then-effective tax laws and regulations. With the promulgation of the EIT Law, all preferential EIT treatments granted prior to January 1, 2008, other than those treatments specified under the EIT Law and related regulations, were repealed. Accordingly, the preferential tax treatment granted to Baidu China as a software enterprise was no longer effective as of January 1, 2008. However, we have been informed by the Shanghai Pudong State Tax Bureau that Baidu China may continue to enjoy a 50% reduced EIT rate, or a rate of 12.5%, from 2008 to 2010 as a software enterprise. If such preferential tax treatment granted by local tax authorities is repealed by higher state authorities, Baidu China's effective EIT rate for 2008 to 2010 may be increased, which could adversely affect our results of operations.

In addition, under the EIT Law and related regulations, dividends, interests, rent or royalties payable by a foreign-invested enterprise, such as our PRC subsidiaries, to any of its foreign non-resident enterprise investors, and proceeds from the disposition of assets (after deducting the net value of such assets) by such foreign enterprise investor, shall be subject to a 10% withholding tax unless such foreign enterprise investor's jurisdiction of incorporation has a tax treaty with China that provides for a reduced rate of withholding tax. Undistributed profits earned by foreign-invested enterprises prior to January 1, 2008 are exempted from any withholding tax. The British Virgin Islands, where the direct parent company of our PRC subsidiary Baidu Online is incorporated, does not have

such a tax treaty with China. Baidu (Hong Kong) Limited, or Baidu Hong Kong, which directly owns our PRC subsidiaries Baidu China and Baidu Times, was incorporated in Hong Kong. Hong Kong has a tax treaty with China that provides for a 5% withholding tax.

Table of Contents

Our PRC subsidiaries historically have not paid dividends to us. If they declare and distribute dividends in the future, such dividend payments will be subject to withholding tax, which will increase our tax liability and reduce the amount of cash available to our company.

We may be deemed a PRC resident enterprise under the EIT Law, which could subject us to PRC taxation on our global income, and which may have a material adverse effect on our results of operations.

Under the EIT Law and related regulations, an enterprise established outside of the PRC with de facto management bodies within the PRC is considered a PRC resident enterprise and is subject to the EIT at the rate of 25% on its worldwide income. The related regulations define the term de facto management bodies as establishments that carry out substantial and overall management and control over the manufacturing and business operations, personnel, accounting, properties, etc. of an enterprise. If we are deemed a PRC resident enterprise, we may be subject to the EIT at 25% on our global income, except that the dividends we receive from our PRC subsidiaries may be exempt from the EIT to the extent such dividends are deemed as dividends among qualified PRC resident enterprises. If we are considered a resident enterprise and earn income other than dividends from our PRC subsidiaries, a 25% EIT on our global income could significantly increase our tax burden and materially and adversely affect our cash flow and profitability.

Under the EIT Law, dividends payable by us and gains on the disposition of our shares or ADSs may be subject to PRC taxation.

If we were considered a PRC resident enterprise under the EIT Law, our shareholders and ADS holders who are deemed non-resident enterprises may be subject to the EIT at the rate of 10% upon the dividends payable by us or upon any gains realized from the transfer of our shares or ADSs, if such income is deemed derived from China, provided that (i) such foreign enterprise investor has no establishment or premises in China, or (ii) it has establishment or premises in China but its income derived from China has no real connection with such establishment or premises. If we were required under the EIT Law to withhold PRC income tax on our dividends payable to our non-PRC enterprise shareholders and ADS holders, or if any gains realized from the transfer of our shares or ADSs by our non-PRC enterprise shareholders and ADS holders were subject to the EIT, your investment in our shares or ADSs would be materially and adversely affected.

Our subsidiaries and affiliated entities in China are subject to restrictions on paying dividends and making other payments to us.

We are a holding company incorporated in the Cayman Islands and do not have any assets or conduct any business operations other than our investments in our subsidiaries and affiliated entities. As a result of our holding company structure, we currently rely entirely on dividend payments from our subsidiaries in China. However, PRC regulations currently permit payment of dividends only out of accumulated profits, as determined in accordance with PRC accounting standards and regulations. Our subsidiaries and consolidated affiliated entities in China are also required to set aside a portion of their after-tax profits according to PRC accounting standards and regulations to fund certain reserve funds. The PRC government also imposes controls on the conversion of RMB into foreign currencies and the remittance of currencies out of China. We may experience difficulties in completing the administrative procedures necessary to obtain and remit foreign currency. See Government control of currency conversion may affect the value of your investment. Furthermore, if our subsidiaries or consolidated affiliated entities in China incur debt on their own in the future, the instruments governing the debt may restrict their ability to pay dividends or make other payments. If we or any of our subsidiaries in China are unable to receive all of the revenues from our operations through these contractual or dividend arrangements, we may be unable to pay dividends on our ordinary shares and ADSs.

Uncertainties with respect to the PRC legal system could adversely affect us.

We conduct our business primarily through our subsidiaries and affiliated entities in China. Our operations in China are governed by PRC laws and regulations. Our subsidiaries are generally subject to laws and regulations applicable to foreign investments in China and, in particular, laws applicable to wholly foreign owned enterprises.

Table of Contents

The PRC legal system is based on written statutes. Prior court decisions may be cited for reference but have limited precedential value.

PRC legislation and regulations have significantly enhanced the protections afforded to various forms of foreign investments in China for the past three decades. However, China has not developed a fully integrated legal system and recently-enacted laws and regulations may not sufficiently cover all aspects of economic activities in China. In particular, because these laws and regulations are relatively new, and because of the limited volume of published decisions and their nonbinding nature, the interpretation and enforcement of these laws and regulations involve uncertainties. Furthermore, the PRC legal system is based in part on government policies and internal rules (some of which are not published on a timely basis or at all) that may have a retroactive effect. As a result, we may not be aware of our violation of these policies and rules until some time after the violation. In addition, any litigation in China may be protracted and result in substantial costs and diversion of resources and management attention.

Governmental control of currency conversion may affect the value of your investment.

The PRC government imposes controls on the convertibility of RMB into foreign currencies and, in certain cases, the remittance of currency out of China. We receive substantially all of our revenues in RMB. Under our current structure, our income is primarily derived from dividend payments from our PRC subsidiaries. Shortages in the availability of foreign currency may restrict the ability of our PRC subsidiaries and affiliated entities to remit sufficient foreign currency to pay dividends or other payments to us, or otherwise satisfy their foreign currency denominated obligations. Under existing PRC foreign exchange regulations, payments of current account items, including profit distributions, interest payments and expenditures from trade-related transactions, can be made in foreign currencies without prior approval from the PRC State Administration of Foreign Exchange, or SAFE, by complying with certain procedural requirements. However, approval from appropriate government authorities is required where RMB is to be converted into foreign currency and remitted out of China to pay capital expenses such as the repayment of bank loans denominated in foreign currencies. The PRC government may also at its discretion restrict access in the future to foreign currencies for current account transactions. If the foreign exchange control system prevents us from obtaining sufficient foreign currency to satisfy our currency demands, we may not be able to pay dividends in foreign currencies to our shareholders, including holders of our ADSs.

PRC regulations relating to the establishment of offshore special purpose companies by PRC residents and registration requirements for employee stock ownership plans or share option plans may subject our PRC resident beneficial owners or the plan participants to personal liability, limit our ability to inject capital into our PRC subsidiaries, limit our subsidiaries' ability to increase their registered capital or distribute profits to us, or may otherwise adversely affect us.

SAFE has promulgated several regulations, including SAFE Circular No. 75, effective from November 2005, and its implementation rule issued in May 2007, that require PRC residents and PRC corporate entities to register with local branches of SAFE in connection with their direct or indirect offshore investment in an overseas special purpose vehicles, or SPV, for the purposes of overseas equity financing activities. These regulations apply to our shareholders who are PRC residents and may apply to any offshore acquisitions that we make in the future.

Under these SAFE regulations, PRC residents who make, or have previously made, direct or indirect investments in an SPV are required to register those investments. In addition, any PRC resident who is a direct or indirect shareholder of an SPV is required to update the previously filed registration with the local branch of SAFE, with respect to that SPV, to reflect any material change involving its round-trip investment, capital variation, such as an increase or decrease in capital, transfer or swap of shares, merger, division, long-term equity or debt investment or creation of any security interest. Moreover, the PRC subsidiaries of that SPV are required to urge the PRC resident shareholders to update their SAFE registration with the local branch of SAFE when such updates are required under applicable SAFE

regulations. If any PRC shareholder fails to make the required SAFE registration or file or update the registration, the PRC subsidiaries of that SPV may be prohibited from distributing their profits and the proceeds from any reduction in capital, share transfer or liquidation, to their SPV, and the SPV may also be prohibited from injecting additional capital into their PRC subsidiaries. Moreover, failure to comply with the various SAFE registration requirements described above could result in liability under PRC laws for evasion of applicable foreign exchange restrictions.

Table of Contents

We have notified holders of ordinary shares of our company whom we know are PRC residents to register with the local SAFE branch and update their registrations as required under the SAFE regulations described above. We are aware that our major shareholders who are PRC residents have registered with the relevant local SAFE branch. We, however, cannot provide any assurances that all of our shareholders who are PRC residents will make or obtain any applicable registrations or approvals required by these SAFE regulations. The failure or inability of our PRC resident shareholders to comply with the registration procedures set forth therein may subject such PRC resident shareholders to fines and legal sanctions, restrict our cross-border investment activities, or limit our PRC subsidiaries' ability to distribute dividends or obtain foreign exchange-dominated loans to our company.

As it is uncertain how the SAFE regulations described above will be interpreted or implemented, we cannot predict how these regulations will affect our business operations or future strategy. For example, we may be subject to more stringent review and approval process with respect to our foreign exchange activities, such as remittance of dividends and foreign currency-denominated borrowings, which may adversely affect our results of operations and financial condition. In addition, if we decide to acquire a PRC domestic company, we cannot assure you that we or the owners of such company, as the case may be, will be able to obtain the necessary approvals or complete the necessary filings and registrations required by the SAFE regulations. This may restrict our ability to implement our acquisition strategy and could adversely affect our business and prospects.

In December 2006, the People's Bank of China promulgated the Administrative Measures of Foreign Exchange Matters for Individuals, setting forth the respective requirements for foreign exchange transactions by PRC individuals under either the current account or the capital account. In January 2007, SAFE issued implementing rules for the Administrative Measures of Foreign Exchange Matters for Individuals, which, among other things, specified approval requirements for certain capital account transactions such as a PRC citizen's participation in the employee stock ownership plans or stock option plans of an overseas publicly listed company. On March 28, 2007, SAFE promulgated the Application Procedure of Foreign Exchange Administration for Domestic Individuals Participating in Employee Stock Holding Plan or Stock Option Plan of Overseas-Listed Company, or the Stock Option Rule. Under the Stock Option Rule, PRC citizens who are granted stock options by an overseas publicly listed company are required, through a PRC agent or PRC subsidiary of such overseas publicly-listed company, to register with SAFE and complete certain other procedures. We and our PRC employees who have been granted stock options are subject to these regulations. We have designated our PRC subsidiary Baidu Online to handle the registration and other procedures required by the Stock Option Rule. If we or our PRC optionees fail to comply with these regulations in the future, we or our PRC optionees and their local employers may be subject to fines and legal sanctions.

A regulation adopted in August 2006 establishes more complex procedures for acquisitions conducted by foreign investors, which could make it more difficult for us to pursue growth through acquisitions.

On August 8, 2006, six PRC regulatory agencies, namely, the PRC Ministry of Commerce, or the MOC, the State Assets Supervision and Administration Commission, the State Administration for Taxation, the SAIC, the China Securities Regulatory Commission and SAFE, jointly adopted the Regulations on Mergers and Acquisitions of Domestic Enterprises by Foreign Investors, which became effective on September 8, 2006. Among other things, the new regulations established additional procedures and requirements that could make merger and acquisition activities by foreign investors more time-consuming and complex, including requirements in some instances that the MOC be notified in advance of any change-of-control transaction in which a foreign investor takes control of a PRC domestic enterprise. We may grow our business in part by directly acquiring complementary businesses in China. Complying with the requirements of the new regulations to complete such transactions could be time-consuming, and any required approval processes, including obtaining approval from the MOC, may delay or inhibit our ability to complete such transactions, which could affect our ability to expand our business or maintain our market share.

Fluctuation in the value of the RMB may have a material adverse effect on your investment.

The value of the RMB against the U.S. dollar and other currencies may fluctuate and is affected by, among other things, changes in political and economic conditions. On July 21, 2005, the PRC government changed its decade-old policy of pegging the value of the RMB to the U.S. dollar. Under the current policy, the RMB is

Table of Contents

permitted to fluctuate within a narrow and managed band against a basket of certain foreign currencies. This change in policy has resulted in an approximately 17.4% appreciation of the RMB against the U.S. dollar between July 21, 2005 and April 3, 2009. On May 19, 2007, the People's Bank of China announced a policy to expand the maximum daily floating range of the RMB trading prices against the U.S. dollar in the inter-bank spot foreign exchange market from 0.3% to 0.5%. With this increased floating range, the RMB's value may appreciate or depreciate significantly against the U.S. dollar in the long term. However, under the current global financial and economic conditions, we are not able to predict with any certainty how the RMB will move vis-à-vis the U.S. dollar in the future.

Our revenues and costs are mostly denominated in RMB, while a significant portion of our financial assets are denominated in U.S. dollars. We currently rely entirely on dividends and other fees paid to us by our subsidiaries and consolidated affiliated entities in China. Any significant revaluation of RMB may materially and adversely affect our cash flows, revenues, earnings and financial position, and the value of, and any dividends payable on, our ADSs in U.S. dollars. For example, an appreciation of RMB against the U.S. dollar would make any new RMB denominated investments or expenditures more costly to us, to the extent that we need to convert U.S. dollars into RMB for such purposes. An appreciation of RMB against the U.S. dollar would also result in foreign currency translation losses for financial reporting purposes when we translate our U.S. dollar denominated financial assets into RMB, as RMB is our reporting currency. Conversely, a significant depreciation of the RMB against the U.S. dollar may significantly reduce the U.S. dollar equivalent of our earnings, which in turn could adversely affect the price of our ADSs.

We face risks related to health epidemics and other outbreaks.

Our business could be adversely affected by the effects of avian influenza, SARS or another epidemic or outbreak. In recent years, there have been reports on the occurrences of avian influenza in various parts of China, including a few confirmed human cases. Any prolonged recurrence of avian influenza, SARS or other adverse public health developments in China may have a material adverse effect on our business operations. For instance, health or other government regulations adopted in response to an epidemic or outbreak may require temporary closure of Internet cafes, which is where many users access our websites, or of our offices. Such closures would severely disrupt our business operations and adversely affect our results of operations. We have not adopted any written preventive measures or contingency plans to combat any future outbreak of avian influenza, SARS or any other epidemic.

We may incur substantial administrative and staffing cost due to the promulgation of the new labor contract law.

On June 29, 2007, the Standing Committee of the National People's Congress of China enacted the Labor Contract Law, which became effective on January 1, 2008. The Labor Contract Law contains substantial provisions with a view to improve job security and to protect the rights and interests of employees. In order to fully comply with the legal requirements under the Labor Contract Law, we may incur substantial administrative and staffing cost.

Risks Related to Our ADSs***The trading price of our ADSs has been volatile and may continue to be volatile regardless of our operating performance.***

The trading price of our ADSs has been and may continue to be subject to wide fluctuations. During the period from August 5, 2005, the first day on which our ADSs were listed on the Nasdaq, until April 8, 2009, the trading prices of our ADSs ranged from \$44.44 to \$429.19 per ADS and the closing sale price on April 8, 2009 was \$182.59 per ADS. The market price for our ADSs may continue to be volatile and subject to wide fluctuations in response to factors including the following:

actual or anticipated fluctuations in our quarterly operating results;

changes in financial estimates by securities research analysts;

conditions in Internet search and online marketing markets;

Table of Contents

changes in the economic performance or market valuations of other Internet search or Internet companies that are perceived to be comparable to us;

announcements by us or our competitors of new products, acquisitions, strategic partnerships, joint ventures or capital commitments;

addition or departure of key personnel;

fluctuations of exchange rates between RMB and the U.S. dollar;

intellectual property litigation; and

general economic or political conditions in China or elsewhere in the world.

In addition, the stock market in general, and the market prices for Internet-related companies and companies with operation in China in particular, have experienced volatility that often has been unrelated to the operating performance of such companies. In particular, the global financial crisis and the ensuing deteriorating global economic conditions have contributed and may continue to contribute to extreme volatility in the global stock markets. These broad market and industry fluctuations may adversely affect the price of our ADSs, regardless of our operating performance. Volatility or a lack of positive performance in our stock price may also adversely affect our ability to retain key employees, most of whom have been granted options or other equity incentives.

Substantial future sales or the perception of sales of our ADSs in the public market could cause the price of our ADSs to decline.

Sales of our ADSs in the public market, or the perception that these sales could occur, could cause the market price of our ADSs to decline. Such sales also might make it more difficult for us to sell equity or equity-related securities in the future at a time and price that we deem appropriate. If any existing shareholder or shareholders sell a substantial amount of ADSs, the prevailing market price for our ADSs could be adversely affected.

In addition, we may issue additional ordinary shares for future acquisitions. If we pay for our future acquisitions in whole or in part with additionally issued ordinary shares, your ownership interests in our company would be diluted and this, in turn, could have a material adverse effect on the price of our ADSs.

You may not have the same voting rights as the holders of our ordinary shares and may not receive voting materials in time to be able to exercise your right to vote.

Except as described in this annual report and in the deposit agreement, holders of our ADSs will not be able to exercise voting rights attaching to the shares evidenced by our ADSs on an individual basis. Holders of our ADSs will appoint the depositary or its nominee as their representative to exercise the voting rights attaching to the shares represented by the ADSs. You may not receive voting materials in time to instruct the depositary to vote, and it is possible that you, or persons who hold their ADSs through brokers, dealers or other third parties, will not have the opportunity to exercise a right to vote. Upon our written request, the depositary will mail to you a shareholder meeting notice which contains, among other things, a statement as to the manner in which your voting instructions may be given, including an express indication that such instructions may be given or deemed given to the depositary to give a discretionary proxy to a person designated by us if no instructions are received by the depositary from you on or before the response date established by the depositary. However, no voting instruction shall be deemed given and no such discretionary proxy shall be given with respect to any matter as to which we inform the depositary that (i) we do

not wish such proxy given, (ii) substantial opposition exists, or (iii) such matter materially and adversely affects the rights of shareholders.

You may not be able to participate in rights offerings and may experience dilution of your holdings as a result.

We may from time to time distribute rights to our shareholders, including rights to acquire our securities. Under the deposit agreement for the ADSs, the depository will not offer those rights to ADS holders unless both the rights and the underlying securities to be distributed to ADS holders are either registered under the Securities Act, or exempt from registration under the Securities Act with respect to all holders of ADSs. We are under no obligation to

Table of Contents

file a registration statement with respect to any such rights or underlying securities or to endeavor to cause such a registration statement to be declared effective. In addition, we may not be able to take advantage of any exemptions from registration under the Securities Act. Accordingly, holders of our ADSs may be unable to participate in our rights offerings and may experience dilution in their holdings as a result.

You may be subject to limitations on transfer of your ADSs.

Your ADSs are transferable on the books of the depository. However, the depository may close its transfer books at any time or from time to time when it deems expedient in connection with the performance of its duties. In addition, the depository may refuse to deliver, transfer or register transfers of ADSs generally when our books or the books of the depository are closed, or at any time if we or the depository deems it advisable to do so because of any requirement of law or of any government or governmental body, or under any provision of the deposit agreement, or for any other reason.

You may face difficulties in protecting your interests, and your ability to protect your rights through the U.S. federal courts may be limited, because we are incorporated under Cayman Islands law, conduct most of our operations in China and all of our officers reside outside the United States.

We are incorporated in the Cayman Islands, and conduct most of our operations in China through our wholly-owned subsidiaries in China. All of our officers reside outside the United States and some or all of the assets of those persons are located outside of the United States. As a result, it may not be possible to effect service of process within the United States or elsewhere outside China upon our senior executive officers, including with respect to matters arising under U.S. federal securities laws or applicable state securities laws.

It may also be difficult or impossible for you to bring an action against us or against these individuals in the Cayman Islands or in China in the event that you believe that your rights have been infringed under the securities laws or otherwise. Even if you are successful in bringing an action of this kind, the laws of the Cayman Islands and of China may render you unable to enforce a judgment against our assets or the assets of our directors and officers. There is no statutory recognition in the Cayman Islands of judgments obtained in the United States, although the courts of the Cayman Islands will generally recognize and enforce a non-penal judgment of a foreign court of competent jurisdiction without retrial on the merits. Moreover, our PRC counsel has advised us that the PRC does not have treaties with the United States or many other countries providing for the reciprocal recognition and enforcement of judgment of courts.

Our corporate affairs are governed by our memorandum and articles of association and by the Companies Law (2007 Revision) and common law of the Cayman Islands. The rights of shareholders to take legal action against our directors and us, actions by minority shareholders and the fiduciary responsibilities of our directors to us under Cayman Islands law are to a large extent governed by the common law of the Cayman Islands. The common law of the Cayman Islands is derived in part from comparatively limited judicial precedent in the Cayman Islands as well as from English common law, which has persuasive, but not binding, authority on a court in the Cayman Islands. The rights of our shareholders and the fiduciary responsibilities of our directors under Cayman Islands law are not as clearly established as they would be under statutes or judicial precedents in the United States. In particular, the Cayman Islands has a less developed body of securities laws as compared to the United States, and provides significantly less protection to investors. In addition, Cayman Islands companies may not have standing to initiate a shareholder derivative action before the federal courts of the United States.

As a result of all of the above, our public shareholders may have more difficulty in protecting their interests through actions against our management, directors or major shareholders than would shareholders of a corporation incorporated in a jurisdiction in the United States.

Our dual-class ordinary share structure with different voting rights could discourage others from pursuing any change of control transactions that holders of our Class A ordinary shares and ADSs may view as beneficial.

Our ordinary shares are divided into Class A ordinary shares and Class B ordinary shares. Holders of Class A ordinary shares are entitled to one vote per share, while holders of Class B ordinary shares are entitled to 10 votes

Table of Contents

per share. We issued Class A ordinary shares represented by our ADSs in our initial public offering. Certain of our major shareholders, including our co-founder, chairman and chief executive officer, Robin Yanhong Li, who acquired our shares prior to our initial public offering, hold our Class B ordinary shares. Each Class B ordinary share is convertible into one Class A ordinary share at any time by the holder thereof. Class A ordinary shares are not convertible into Class B ordinary shares under any circumstances. Upon any transfer of Class B ordinary shares by a holder thereof to any person or entity which is not an affiliate of such holder, such Class B ordinary shares shall be automatically and immediately converted into the equal number of Class A ordinary shares. In addition, if at any time Robin Yanhong Li and his affiliates collectively own less than 5% of the total number of the issued and outstanding Class B ordinary shares, each issued and outstanding Class B ordinary share shall be automatically and immediately converted into one share of Class A ordinary share, and we shall not issue any Class B ordinary shares thereafter.

Due to the disparate voting powers attached to these two classes, certain shareholders have significant voting power over matters requiring shareholder approval, including election of directors and significant corporate transactions, such as a merger or sale of our company or our assets. This concentrated control could discourage others from pursuing any potential merger, takeover or other change of control transactions that holders of Class A ordinary shares and ADSs may view as beneficial.

Our articles of association contain anti-takeover provisions that could adversely affect the rights of holders of our ordinary shares and ADSs.

Our articles of association include certain provisions that could limit the ability of others to acquire control of our company, and deprive our shareholders of the opportunity to sell their shares at a premium over the prevailing market price by discouraging third parties from seeking to obtain control of our company in a tender offer or similar transactions, including the following provisions:

A dual-class ordinary share structure.

Our board of directors has the authority, without approval by the shareholders, to issue up to a total of 10,000,000 preferred shares in one or more series. Our board of directors may establish the number of shares to be included in each such series and may fix the designations, preferences, powers and other rights of the shares of a series of preferred shares.

Our board of directors has the right to elect directors to fill a vacancy created by the increase of the board of directors or the resignation, death or removal of a director, which prevents shareholders from having the sole right to fill vacancies on our board of directors.

We may be classified as a passive foreign investment company, which could result in adverse U.S. federal income tax consequence to U.S. Holders.

Based on the price of the ADSs and our ordinary shares, the composition of our income and assets and our operations, we believe that we were not a passive foreign investment company, or PFIC, for United States federal income tax purposes for our taxable year ended December 31, 2008. However, we must make a separate determination each year as to whether we are a PFIC (after the close of each taxable year) and we cannot assure you that we will not be a PFIC for our current taxable year ending December 31, 2009 or any taxable year. A non-U.S. corporation will be considered a PFIC for any taxable year if either (1) at least 75% of its gross income is passive income or (2) at least 50% of the value of its assets (based on an average of the quarterly values of the assets during a taxable year) is attributable to assets that produce or are held for the production of passive income. The future value of our assets is generally determined by reference to the market price of our ADSs and ordinary shares, which may fluctuate considerably. If we were treated as a PFIC for any taxable year during which a U.S. Holder held an ADS or an ordinary share, certain

adverse U.S. federal income tax consequences could apply to the U.S. Holder. See Item 10.E Additional Information
Taxation United States Federal Income Taxation Passive Foreign Investment Company.

Item 4. *Information on the Company*

A. History and Development of the Company

We were incorporated in the Cayman Islands in January 2000. Since our inception, we have conducted our operations in China principally through Baidu Online, our wholly-owned subsidiary in Beijing, China. We also have conducted part of our operations in China through Baidu Netcom, a consolidated affiliated entity in Beijing, China, which holds the licenses and approvals necessary to operate our websites and provide online advertising services. In addition, we have established three PRC subsidiaries and assisted in establishing two PRC consolidated affiliated entities in recent years. We formally launched a Japanese search service in January 2008 and now have three subsidiaries in Japan.

On August 5, 2005, we listed our ADSs on The Nasdaq National Market (later renamed The Nasdaq Global Market) under the symbol BIDU. We and certain selling shareholders of our company completed the initial public offering of 4,604,224 ADSs, each representing one Class A ordinary share, on August 10, 2005. Our ADSs currently trade on The Nasdaq Global Select Market, a segment of The Nasdaq Global Market.

In December 2008, our shareholders approved our name change from Baidu.com, Inc. to Baidu, Inc.

Our principal executive offices are located at 12/F, Ideal International Plaza, No. 58 West-North 4th Ring, Beijing 100080, People's Republic of China. Our telephone number at this address is +86 (10) 8262-1188.

B. Business Overview

We are the leading Chinese language Internet search provider. As a technology-based media company, we aim to provide the best way for people to find information. In addition to serving Internet search users, we provide an effective platform for businesses to reach potential customers. According to a market survey announced by iResearch Consulting Group, a third-party market research firm, our search engine Baidu.com processed approximately 1.1 trillion Chinese language web search requests in 2008, accounting for 73.2% of the total Chinese language web search market in China. According to Alexa.com, our Baidu.com website was the largest website in China, as measured by user traffic during the three-month period ended December 31, 2008.

We serve three types of online participants:

Users. We primarily offer a Chinese language search platform on our website www.baidu.com. We provide Chinese language Internet search services to enable users to find relevant information online, including web pages, news, images and multimedia files, through links provided on our websites. We also offer online community-based products and entertainment platforms such as Baidu Post Bar, Baidu Knows and Baidu Space. In addition, we currently offer beta versions of Baidu Hi, our IM service and Baidu Youa, our C2C service.

Customers. We design and deliver our online marketing services on our website www.baidu.com to our P4P customers and other customers who require our tailored online marketing solutions. Our auction-based P4P services enable our customers to bid for priority placement of their links in keyword search results. We believe we were the first auction-based P4P service provider in China. Our online advertising services allow customers to use both query sensitive and non-query sensitive advertising services, including text links, graphical advertisements and other forms of online advertising. Our P4P customers are those who primarily use our auction-based P4P services, and our tailored solutions customers are those to whom we provide marketing solutions, which may consist of one or more forms of our online advertising services as well as P4P services. In the fourth quarter of 2008, we had over 197,000 active online marketing customers.

Baidu Union Members. Baidu Union includes a large number of third-party web content and software providers. Baidu Union members typically incorporate a Baidu search box into their websites. We provide high-quality and relevant search to their users, and in return gain the benefit of increased traffic. We have also launched programs through which we display online advertisements of our customers on Baidu Union members' websites and share the fees generated by these advertisements with the owners of these Baidu Union websites.

We established our Japanese subsidiary Baidu Japan in December 2006 and offered a trial version of our Japanese search services beginning in March 2007. In January 2008, we formally launched our Japanese search

Table of Contents

services at www.baidu.jp, run by Baidu Japan. Our Japanese search services enable users to find relevant information online, including web pages, images, multimedia files and blogs, through links provided on our websites.

Products and Services for Users

We focus on offering products and services that enable our users to find relevant information quickly and easily. We offer the following services at Baidu.com to users free of charge:

Baidu Web Search. Baidu's web search allows users to locate information, products and services using Chinese language search terms. Through our search software, we build and continuously refine a large database of Chinese synonyms and closely associated phrases, which is essential for accurate and efficient execution of Chinese language searches. The Baidu.com home page prominently features a search box that is designed to load quickly. After entering a search query, users are generally presented with a list of search results, which may include our customers' links marked as sponsored links. Users can then access the desired websites by clicking on the hypertext links displayed in the search results.

In addition to providing access to billions of indexed Chinese language web pages, we have integrated additional features into our web search that help users find information more easily. The Baidu web search includes the following features:

Related Search provides alternative search terms based on the original queries to help users find relevant web pages quickly;

Search in Results enables users to conduct additional searches within the initial search results;

Search by Chinese Phonetics (Pinyin) enables users to conduct quick searches by entering Chinese phonetics with letters of the English alphabet instead of Chinese characters;

Advanced Search enables users to create more focused queries by employing techniques such as narrowing results to specified words or phrases, document formats, geographic regions, time frames or websites;

Snapshots provides snapshots of web pages taken when the pages were indexed, allowing users to view web pages that cannot be quickly or easily opened;

Spell Checker suggests alternate search terms when a search appears to contain misspellings or typing errors;

Stock Quotes provides links to stock information of companies listed on the stock exchanges in China;

News, Knows, Postbar, MP3, Images, Video, and Space Information displays search results from other Baidu products including Baidu News, Baidu Knows, Baidu Postbar, Baidu MP3 Search, Baidu Image Search and Baidu Video Search;

Weather, Train and Flight Schedules and Other Local Information enables users to check weather, domestic train and flight schedules as well as schedules of international flights departing from or arriving in China.

Baidu Post Bar. Baidu Post Bar provides users with a query-based searchable community to exchange views and share knowledge and experiences. The community can be further expanded by users posting new topics that have not been covered in the community before. In Baidu Post Bar, users can search, read and browse Internet message boards and post messages to other members of the community. Baidu Post Bar covers a broad range of topics and interest

areas, such as society, technology, sports, entertainment and fashion. Users also can access Baidu Post Bar using wireless application protocol, or WAP, -enabled mobile phones. Baidu Post Bar also provides video-sharing capabilities, which allow users to post and share video clips in approximately 80,000 online communities.

Baidu News. Baidu News provides links to an extensive selection of local, national and international news and presents news stories in a searchable format, typically within minutes of their publication on the web. Baidu News uses an automated process to display links to related headlines, which enables people to see many different

Table of Contents

viewpoints on the same story. Baidu News is typically updated every three to six minutes throughout the day. Users also can choose to have links of specific types of news articles (e.g., financial news) or news articles containing specific key words delivered to their email accounts. In December 2006, we obtained a license to provide Internet news services issued by the State Council News Office.

Baidu Knows. Baidu Knows provides users with a query-based searchable community to share knowledge and experience. Through Baidu Knows, registered members of Baidu Knows can post specific questions for other members to respond and also answer questions of other members. Any users of our websites can also search, read and browse questions and answers by registered members of Baidu Knows. Baidu Knows contains a broad range of subjects. Users also can access Baidu Knows through WAP-enabled mobile phones.

Baidu MP3 Search. Baidu MP3 Search provides algorithm-generated links to songs and other multimedia files provided by Internet content providers. The user can also sort Baidu MP3 Search links by various categories, including lists of top songs and artists, which are updated automatically, generally every week, based on the number of clicks. In March 2008, we launched Baidu Online Radio Alliance, which is our online radio channel providing users with radio programs from over one hundred national and regional broadcast stations. In November 2008, we and seven record labels jointly launched Baidu New Song Debut, which offers users the newest content from some artists of these labels in streaming format.

Baidu Image Search. Baidu Image Search enables users to search millions of images on the Internet. Baidu Image Search offers advanced features, such as search by image size and by image file type. Image listings are organized by various categories which are updated automatically through algorithms.

Baidu Video Search. Baidu Video Search enables users to search for and access through hyperlinks of online video clips that are hosted on third parties' websites.

Baidu Space. Baidu Space allows registered users to create personalized homepages in a query-based searchable community. Registered users can post their Web logs, or blogs, photo album and certain personal information on their homepages and establish their own communities of friends who are also registered users. Registered users also can set limit on the access to certain content on their homepages.

Other Search and Community Products. We are continuously developing and introducing new products to make Baidu.com more attractive to our users. We currently offer a variety of online search and community products, including the following:

Baidu Encyclopedia. Baidu Encyclopedia is an evolving encyclopedia compiled by registered Internet users. Registered users can share their knowledge by adding new terms and new content in Baidu Encyclopedia. Any users of our Baidu.com website can also search, read and browse all terms and content contributed by registered users of Baidu Encyclopedia.

Baidu Search Ranking and Search Index. Baidu Search Ranking provides listings of top search terms based on daily search queries entered on Baidu.com. The listings are organized by categories and allow users to easily locate popular search terms on topics of interest. We also offer a trial version of Baidu Search Index, which provides indices in various categories calculated based on searches conducted using Baidu Web Search and searches conducted in Baidu News.

Baidu Web Directory. Baidu Web Directory enables users to browse and search through websites that have been organized into categories. We also operate Hao123.com, a popular Chinese web directory navigation site in China.

Baidu Map Search. We offer a trial version of Baidu Map Search, which enables users to search online maps of over 90 major cities in China. Users have the option to type search terms into a single search box to find a particular place, points of interest, such as restaurants, hotels, schools, banks, etc., near a particular place, or get driving directions and public transportation routes.

Baidu Yellow Page Search. We offer a trial version of Baidu Yellow Page Search. Jointly developed with China Telecom, Baidu Yellow Page Search allows users to conduct online searches for local business

Table of Contents

information in specific localities in China. The information is derived from yellow page phone books published by China Telecom.

Baidu Ancient Chinese Literature Search. Jointed developed by us and Beijing Guoxue Times Culture Transmission Co., Ltd., Baidu Ancient Chinese Literature Search allows users to search and peruse ancient Chinese masterpieces covering literature, history, religion, philosophy, arts and other essential components of the traditional Chinese culture within our online database. We have created the first online database of ancient Chinese literature in the world to serve and benefit users who appreciate the profound Chinese culture.

Baidu Government Information Search. Baidu Government Information Search allows users to search various regulations, rules, notices and other information announced by PRC government entities.

Baidu Postal Code Search. Baidu Postal Code Search enables our users to search postal codes in 354 cities in China.

Baidu Educational Website Search and University Search. Baidu Educational Website Search allows users to limit their searches to the websites of educational institutions. Baidu University Search allows users to search information on or browse through the websites of specific universities in China.

Baidu Legal Search. Baidu Legal Search, which was jointly developed by Chinalawinfo.com and us, enables users to search a database that contains national and local laws and regulations, cases, legal decisions, and law dictionaries.

Baidu Frequently Used Information Search. Baidu Frequently Used Information Search enables users to quickly search certain frequently used information, e.g., weather, map, train and flight schedules, television schedules, stock prices, etc.

Baidu Local Search. Baidu Local Search allows users to limit their searches to specific provinces in China.

Baidu Mobile Search. Baidu Mobile Search enables users to access our search services using WAP-enabled mobile phones and personal digital assistants.

Baidu Blog Search. We offer a trial version of Baidu Blog Search, which allows users to confine their searches to Chinese language blogs on the Internet.

Baidu Search and Store. We offer a trial version of Baidu Search and Store, which is a free online bookmarking service that allows registered users to bookmark, store and organize website links in an online space and conduct searches within the bookmarked websites.

Baidu Love. Baidu Love is a query-based searchable community where registered users can write and post messages to loved ones.

Baidu Patent Search. Baidu Patent Search is operated in cooperation with the China Patent Information Center under the State Intellectual Property Office of the PRC. Baidu Patent Search enables users to search for specific Chinese patents and provides basic patent information in the search results, including the patent's name, application number, filing date, issue date, inventor information and brief description of the patent.

Baidu Voice Search. We began public testing of a new voice-based search service in March 2008, which is available to both fixed-line and mobile phone users. By calling a designated phone number, users can request our customer service personnel to conduct searches for them. Our customer service representatives will convey the search results to the caller over the phone or send the results to the caller via short messaging service, or SMS.

Baidu Games. Baidu Games is an online channel that allows users to search or browse through game-related news and content. In a section called Baidu Wanba, registered users can play web and online games provided by our online game operator partners.

Baidu-Hexun Finance. In October 2008, we introduced our new financial information website, Baidu-Hexun Finance, in collaboration with Hexun.com, a financial information service provider in China with news

Table of Contents

reporting and securities consulting licenses. Users can search or browse through economic and financial news, information relating to personal wealth management and related market statistics.

Baidu Statistics Search. Baidu Statistics Search enables users to search statistics that have been published by the PRC government since 1949. The statistics are provided to us by a third party in Beijing.

Baidu Entertainment. Baidu Entertainment is an online channel devoted exclusively to entertainment-related news and content. Users can search or browse through news and other information relating to specific stars, movies, television series and music.

Baidu Dictionary. Baidu Dictionary provides users with lookup and text translation services between Chinese and English.

Other Products Offered by Baidu

Baidu Hi. In June 2008, we launched a trial version of our IM service, Baidu Hi. In addition to the major IM functions of chat, grouping, and personalization, Baidu Hi also integrates the search services, online communities and various other features that we provide.

Baidu Youa. In October 2008, we launched a trial version of our online C2C platform, Baidu Youa. Baidu Youa is an online shopping platform through which merchants can sell their products and services at Baidu-registered stores. Customers can use a Baidu-branded online payment system, BaiduPay, to make purchases. BaiduPay was created in-house by Baidu's research and development team.

Baidu Safety Center. In February 2008, we launched Baidu Safety Center, which provides users with free virus scanning, system repair and online security evaluations.

Baidu Desktop Search. Baidu Desktop Search is a free, downloadable software which enables users to search all files saved on their computer without launching a web browser.

Baidu Sobar. Baidu Sobar is a free, downloadable software which, once installed, shows up on a browser's tool bar and makes our search function readily available on every web page that a user browses.

Baidu Anti-Virus. Baidu Anti-Virus is an online marketplace where we collaborate with major Chinese and international anti-virus software companies to offer our users the latest anti-virus software products and computer virus-related news.

Baidu Internet TV. Baidu Internet TV (also known as Baidu Movies) allows users to search, watch and download free movies, television series, cartoons, variety shows and certain other programs hosted on our servers. The programs have been provided to us by content providers, which have represented to us that they have valid copyrights to those programs. Pursuant to agreements entered into in September 2008, we will transfer assets related to the operation of the Baidu Internet TV Channel to UiTV, operator of the largest Internet television platform in China. Following this transaction, Baidu Internet TV Channel will continue to be hosted on our website at movie.baidu.com but will be operated by UiTV. This transaction has not been closed as of the date of this annual report, pending completion of transfer of certain intellectual property rights.

Baidu Japanese Language Search. In January 2008, after completing a Beta test that last nearly a year, we formally launched our Japanese search services at www.baidu.jp, run by our Japanese subsidiary, Baidu Japan. Our Japanese search services currently offer web search, image search, video search and blog search capabilities. In December

2008, we launched, in collaboration with Japanese personal handy-phone system (PHS) operator Willcom Inc., Chinese-language voice assistant search services for Chinese speakers visiting Japan.

Products and Services for Customers

We focus on providing customers with cost-effective and targeted marketing solutions. We generate revenues primarily from online marketing services.

Table of Contents

Online Marketing Services

P4P. Our P4P platform enables our customers to reach users who search for information related to their products or services. Customers may use our automated online tools to create text-based descriptions of their web pages and bid on keywords that trigger the display of their web page information and link. Our P4P platform features an automated online sign-up process that allows customers to activate their accounts at any time.

Our P4P platform is an online marketplace that introduces Internet search users to customers who bid for priority placement in the search results. We engage third-party distributors to sell some of our online marketing services to end customers and offer discounts to distributors as consideration for their services. Prior to September 2006, links to customers' websites were listed in descending order of customers' bids, with the highest bidder appearing as the first search result. In September 2006, we implemented an intelligent ranking system, which takes into consideration the quality factor of a keyword in addition to the price bid on the keyword. The quality factor of a keyword is determined based on the relevance of a keyword and certain other factors. The relevance of a keyword is determined based on our analysis of past search and click-through results. Links to customers' websites now are ranked according to a comprehensive ranking index, calculated based on both the quality factor of a keyword and the price bid on that keyword.

Our P4P online marketing customers may choose to set a daily limit on the amount spent and may also choose to target only users accessing our website from specified regions in China. In addition, they can see the competing bids on the same keywords. This transparent bidding process creates competition among customers.

We offer certain customers value-added consultative services that help to maximize their return on investment, or ROIs, including:

Keyword Suggestions We suggest synonyms and associated phrases to use as keywords or text in search listings. These suggestions can improve click-through rates of the customer's listing and increase the likelihood that a user will enter into a transaction with the customer;

Account Management We help manage customers' P4P accounts by, among other things, adjusting keywords from time to time at their request to help increase the click-through rate for their listings; and

Performance Reporting We provide our customers online daily reports of the number of click-throughs, clicked keywords and the total costs incurred, as well as statistical reports organized by geographic region.

In November 2008, we announced Phoenix Nest, a new online marketing system currently in beta testing phase. Phoenix Nest is designed to improve relevance in paid search and increase value for customers, thus driving monetization efficiency. Phoenix Nest will achieve these objectives through an enhanced algorithm that generates more relevant advertisements and provides customers with additional tools and information that can help them better manage their spending to achieve higher ROI.

ProTheme. We offer ProTheme services to some of our Baidu Union members. Our services enable these Baidu Union members to display on their properties our customers' promotional links that are relevant to the subject and content of such members' properties. We generate revenues from our ProTheme services based on the number of clicks on our customers' links and share the revenues with our Baidu Union members in accordance with pre-agreed terms.

Fixed Ranking. Our fixed ranking services allow our customers to display query sensitive text links at a designated location on our search results pages. Our customers pay us an amount based primarily on the location of their text links on our web pages.

Targetizement. Our Targetizement services enable our customers to reach their targeted Internet users by displaying their advertisements only when their targeted Internet users browse Baidu's certain web pages. The customers pay us a fee based on the number of clicks on their advertisements.

Baidu TV. We operate our advertising service, Baidu TV, in partnership with Ads it! Media Corporation, an online advertising agency and technology company. Baidu TV provides advertisers access to the websites of our Baidu Union members, allowing advertisers to choose websites on which they post their video advertisements with the aid of our advertisement targeting and matching system. The customers pay us a fee based on the number of

Table of Contents

effective views on their advertisements. An effective view is counted when a video advertisement runs at least five seconds before a viewer closes it.

Brand-Link. We offer a brand advertising service, Brand-Link. When Internet users conduct a key word search using brand names of our customers who subscribe to our Brand-Link services, the search will generate a wide range of brand-specific content, including news reports, promotional announcements, product information and marketing campaigns. The customers pay us a fee based on the duration of the placement of the brand-specific content.

My Marketing Center. In June 2008, we launched My Marketing Center, a customized platform integrating industry information, market trends and business and industry news and reports to assist existing customers in their sales and marketing efforts. The platform combines our vast resources in online information search and aggregation to help customers make better use of search marketing tools to improve customer targeting, increase sales and enhance brand impact.

Other Forms of Online Advertising. Other forms of our online advertising services allow customers to display query sensitive and non-query sensitive advertisements on our websites, including graphical advertisements. Our advertising contracts are generally short-term. Standard rates for online advertisements vary depending on several factors, including the term of the contract, channel and traffic reach and the size and position of the advertisement on our web pages.

Other Services

Prior to July 2006, our other services primarily included enterprise search software and related services to companies and government agencies in China. We developed, marketed and sold software that employed our search technology to search and manage information on our customers' intranet and on the Internet. In July 2006, we decided to phase out the enterprise search software business as part of a strategic shift to focus on our core online marketing services. This phase-out was completed in March 2008.

We provided our search engine to selected Chinese Internet portals that offered search results to their own users without displaying our brand during the early stage of our development. We discontinued our portal search services in 2006.

Baidu Union

Our Baidu Union consists of a large number of third-party websites and software applications. Our Baidu Union members typically incorporate a Baidu search box or toolbar and match our sponsored links with the content on their properties. Their users can conduct search via the Baidu search box or toolbar and can click the sponsored links located on their properties. Our relationships with Baidu Union members allow them to provide high-quality and relevant search results to their users without the costs associated with building and maintaining advanced search capabilities in-house. Moreover, our Baidu Union members can monetize their traffic and content through revenue sharing arrangement with us, which is based on the number of click-throughs from their users. We have also launched programs through which we display the online advertising of our customers on Baidu Union websites and share the fees generated by these advertisements with the owners of these Baidu Union websites. We intend to recruit additional Baidu Union members to further increase traffic to our Baidu.com website.

Our Customers

Online Marketing. We serve a broad range of online marketing customers consisting of SMEs throughout China, large domestic corporations and Chinese divisions or subsidiaries of large, multinational corporations. We have a

diverse customer base in terms of industries and geographical locations. The industries in which our customers operate include e-commerce, information technology services, consumer products, electronic products, machinery, manufacturing, medical, entertainment, education, franchising, financial services, real estate, ticketing, tourism and other industries. Although we have customers located throughout China, we have a more active and larger customer base in coastal regions, reflecting the current general economic demographics in China.

Table of Contents

Our online marketing customers are increasingly seeking marketing solutions with measurable results in order to maximize their ROI. In response to this trend, we manage our sales activities for our online marketing services around two key customer categories: P4P customers and tailored solutions customers.

P4P Customers Our P4P customers are those who primarily use our auction-based P4P services. They are generally SMEs with modest marketing budgets and, as a result, require cost-effective online marketing solutions to reach their potential customers. Our P4P platform allows them, directly or through our distributors, to easily manage their online marketing spending on a prepaid basis.

Tailored Solutions Customers Our tailored solutions customers generally seek solutions to meet certain pre-determined performance metrics, such as number of click-throughs, duration of placement, number of converted users and number of telephone calls. They are generally medium and large enterprises with dedicated online marketing budgets. Depending on their objectives and desired end results, we design customized performance-based solutions comprising of P4P, fixed ranking and other query and non-query sensitive marketing services.

Sales and Distribution

We sell our online marketing services directly and through our distribution network. We have historically acquired our P4P customers primarily through our nationwide network of distributors and, to a lesser extent, through our direct sales force. In early 2005, we started to establish direct sales offices in a number of major cities in China. Currently we have direct sales presence in Shanghai, Beijing and major cities in Guangdong Province, including Shenzhen, Guangzhou, and Dongguan.

Our distributors provide numerous services, including identifying customers, collecting payments, assisting customers in setting up accounts with us, suggesting keywords to maximize ROI and engaging in other marketing and educational services aimed at acquiring customers. We have relied on distributors for several reasons. Our P4P customer base in China is geographically diverse and fragmented as most of our P4P customers are SMEs located in different regions in China. Moreover, SMEs are generally less experienced with online marketing as compared to large companies and therefore benefit from the extensive services provided by distributors. Finally, secure online payment and credit card systems are at early stages of development in China. Distributors serve as an efficient and effective channel to reach SME customers throughout China and collect payments from them.

We offer our tailored marketing solutions to medium and large corporate customers primarily through our direct sales force. We have local sales staff in Beijing, Shanghai and major cities in Guangdong Province, including Shenzhen, Guangzhou, and Dongguan, covering the largest regional markets for our online advertising services.

Marketing

Historically, our user base grew primarily through word-of-mouth. We focus on continuously improving the quality of our products and services as we believe satisfied users and customers are more likely to recommend our products and services to others. Through these efforts and the increased use of the Internet in China, we have built our brand with modest marketing expenditures.

Our initial public offering in 2005 has significantly enhanced our brand recognition. In addition, we have implemented a number of marketing initiatives designed to promote our brand awareness among potential users and customers. For example, we purchased advertisements shown during CCTV's 2009 Spring Festival Gala, the most watched show on China's largest nationwide television network. We have also conducted cross-marketing activities with a number of leading consumer brands.

In addition, with the assistance from our distributors, we conduct localized marketing activities tailored to potential customers in various regions. We also organize and sponsor seminars and discussion forums targeted at existing and potential customers.

Table of Contents

Strategic Relationships

In 2008, we entered into several strategic relationships to further expand our user base and cooperate with more leading global companies.

In February 2008, we entered into a cooperation agreement with China Netcom (Group) Company Limited. Pursuant to this agreement, users of China Netcom's Internet connection services will be directed to a search page featuring a Baidu search box after they input an incorrect or nonexistent Internet address. We also entered into a cooperation agreement with Omniture Inc., a leading provider of online business optimization software. Under this agreement, we will integrate our technology with Omniture to allow Omniture's clients direct access to the Chinese online market.

In March 2008, we entered into a cooperation agreement with Qingdao Haier to jointly promote online media television services. Under this agreement, we will provide Internet services and technology support to Haier's online television scheme, which enables Chinese television users to access Baidu's services with a remote control.

In April 2008, we entered into a cooperation agreement with Nokia to strengthen our existing collaboration with Nokia. Under this agreement, users of certain Nokia mobile phone models will be able to access Baidu search services via Widsets, Nokia's wireless Internet platform.

In July 2008, we entered into a cooperation agreement with Waseda University, a Japanese university specializing in science and technology. Under this agreement, Baidu and Waseda jointly established a research and development program to explore and develop Japanese language search technology.

In November 2008, we entered into a cooperation agreement with Willcom Inc., a leading Japanese mobile phone provider and operator. Under this agreement, travelers in Japan will be able to access Chinese-language voice search services through Willcom's personal handy-phone system.

Competition

The Internet search industry in China is rapidly evolving and highly competitive. Our primary competitors include U.S.-based Internet search providers providing Chinese language Internet search services and Chinese Internet companies. We compete with these entities for both users and customers on the basis of user traffic, quality (relevance) and quantity (index size) of search results, availability and ease of use of our products and services, the number of customers, distribution channels and the number of associated third-party websites. We also face competition from traditional advertising media. Furthermore, our new IM and C2C services face competition from leading providers of these services in China.

U.S.-based Internet Search Providers. U.S.-based Internet search providers such as Google and Yahoo! have a strong global presence, well-established brand names, more users and customers and significantly greater financial resources than we do. Google's Chinese website google.cn is our major competitor in Chinese language search. We may face more intense competition from our U.S.-based competitors as the regulatory environment in China evolves, online payment systems and Internet infrastructure in China mature, and our U.S.-based competitors increase their business activities in China.

Chinese Internet Companies. Chinese Internet portals such as Sina, Sohu, Netease and Tencent offer a broad range of online services, including news, wireless value-added services, email, online shopping, blogs, chat rooms and community networks. Sina has its own search engine, iAsk, and Sohu also has its own search engine, Sogou. Each of our Chinese Internet portal competitors has generated significant traffic, a loyal user base and a large and broad customer base. These portals have widely recognized brand names in China and some have greater financial resources

than we do. We compete with these portals primarily for user traffic and online advertising. In addition, we compete with B2B service providers such as Alibaba.

Other Advertising Media. Other advertising media, such as newspapers, yellow pages, magazines, billboards and other forms of outdoor media, television and radio, compete for a share of our customers' marketing budgets. Large enterprises currently spend a relatively small percentage of their marketing budgets on online marketing as compared to the percentage they spend on other advertising media.

Table of Contents

IM and C2C Service Providers. Baidu Hi, our new IM service, competes primarily with Tencent's QQ and MSN Messenger. Baidu Youa, our new C2C platform, faces competition primarily from C2C service providers such as Alibaba's Taobao, Tencent's Paipai and EachNet, a joint venture of eBay and Tom Online.

Technology

We provide our web search and P4P technology using our network of computers running customized software developed in-house. Our key technologies include:

Web Search Technology

Our web search technology applies a combination of techniques to determine the importance of a web page independent of a particular search query and the relevance of that page to a particular search query.

Link Analysis Techniques. Link analysis is a technique that determines the relevance between a user query and a web page by evaluating the combination of the anchor texts and the number of web pages linked to that web page. We treat a link from web page A to web page B as a "vote" by page A in favor of page B. The subject of the "vote" is described in the anchor texts of that link. The more "votes" a web page gets, the higher the relevance. We compare search queries with the content of web pages to help determine relevance. Our text-based scoring techniques do more than count the number of times a search term appears on a web page. For example, our technology determines the proximity of individual search terms to each other on a given web page, and prioritizes results that have the search terms near each other. Other aspects of a page's content are also considered. By combining link analysis with our information extraction techniques, we are able to deliver relevant search results.

Information Extraction Techniques. We extract information from a web page using high performance algorithms and information extraction techniques. Our techniques enable us to understand web page content, delete extraneous data, build link structures, identify duplicate and junk pages and decide whether to include or exclude a web page based on its quality. Our techniques can process millions of web pages quickly. In addition, our anti-spamming algorithms and tools can identify and respond to spamming web pages quickly and effectively.

Web Crawling Techniques. Our powerful computer clusters and intelligent scheduling algorithms allow us to crawl Chinese web pages efficiently. We can easily scale up our system to collect billions of Chinese web pages. Our spider technology enables us to refresh web indices at intervals ranging from every few minutes to every few weeks. We set the index refresh frequency rate based on our knowledge of Internet search users' needs and the nature of the information. For example, our news index is typically updated every three to six minutes throughout the day given the importance of timely information for news. We also mine multimedia and other forms of files from web page repositories.

In December 2008, we announced Project Aladdin, an ongoing research and development effort aimed at uncovering useful parts of the "Hidden Web," the part of the Internet that existing search engine technology may not be able to index, in order to enrich search results for our users.

Chinese Language Processing Techniques. We analyze and understand Chinese web pages by processing word-segmentation and utilizing an encoding method based on Chinese language characteristics. For example, we can identify Chinese names on a web page. When a user searches for a person based on the person's Chinese name, we can display the web pages that are specifically related to that person. We also mine user behavior and search interests from our large search query logs. We provide additional web search features such as advanced search, spell check and search by Chinese phonetics (Pinyin).

P4P Technology

Our P4P platform serves millions of relevant, targeted sponsored links each day based on search terms users enter or content they view on the web page. Our key P4P technology includes:

P4P Auction System. We use a web-based auction system to enable customers to bid for positions and automatically deliver relevant, targeted promotional links on Baidu's properties and Baidu Union members' properties. The system starts by screening the relevance between the sponsored links and a particular query. Our

Table of Contents

intelligent ranking system takes into consideration the quality factor of a keyword in addition to the price bid on the keyword. The quality factor of a keyword is determined based on the relevance of the keyword and certain other factors. The relevance of a keyword is determined based on the analysis of past search and click-through results. Links to customers' websites are ranked according to a comprehensive ranking index, calculated based on both the quality factor of a keyword and the price bid on that keyword. We employ a dynamic mechanism for the determination of the minimum bidding price for each keyword. For determination of cost per click, or CPC, the system allows customers to set fixed CPCs or choose an automatic price reducing mechanism which automatically lowers the CPC to the minimum needed to maintain the desired position.

In November 2008, we announced the development of Phoenix Nest, a new keyword auction system. Unlike our current auction system, Phoenix Nest will be a sealed auction system, which provides customers with more keyword choices to bid on, more tools for budget management and more data for the effective measurement of ROI. We also expect the new system to improve Baidu's monetization efficiency. We are currently testing Phoenix Nest with select customers on an invitation-only basis.

P4P Billing System. We record every click and charge customers a fee by multiplying the number of clicks by the CPC. Our system is designed to detect fraudulent clicks based on factors such as click patterns and timestamps. This system also computes the amount a Baidu Union member or a distributor should be paid. The billing information is integrated with our internal Oracle ERP financial system.

P4P Customer Service System. This system manages customer information such as targeted keywords, costs per click and performance analysis.

ProTheme Contextual Promotion Technology. Our ProTheme technology employs techniques that consider factors such as theme finding, keyword analysis, word frequency and the overall link structure of the web to analyze the content of individual web pages and to match sponsored links in our P4P platform to the web pages almost instantaneously. With this targeting technology, we can automatically provide contextually relevant promotional links. For example, our technology can provide links offering tickets to fans of a specific sports team or a news story about that team.

Branded Advertising Technology

Targetization Technology. Our Targetization technology matches our customers' advertisements with their targeted Internet users. Our automatic algorithm can analyze a user's interests based on his or her past search experience and display advertisements that the user may be interested in viewing.

Large-Scale Systems Technology

We currently use a combination of off-the-shelf and custom software running on clusters of low-cost computers. Our investment in our large-scale system infrastructure has several key benefits: simplification of the storage and processing of large amounts of data, facilitation of the deployment and operation of large-scale products and services, and automation of much of the administration of large-scale clusters of computers. Moreover, this large infrastructure is easily scalable to increases in traffic and dataset volume.

Our large-scale system infrastructure uses distributed software and high performance parallel computing technologies to provide high-quality web search services and web page collection with low cost computer clusters on a Linux operating system. We also have management information systems that enable us to perform tasks such as service operations, administration, trouble-shootings and filtering with relative ease and efficiency. In addition, we have software systems that can test new ideas with real search queries to evaluate the actual effects without affecting live

services.

Our infrastructure significantly improves the relevance of our search and advertising results by allowing us to apply superior search and retrieval algorithms that are computationally intensive. We believe this infrastructure also shortens our product development cycle and allows us to innovate more cost-effectively. We also constantly evaluate new hardware alternatives and software techniques to help further reduce our computational costs.

Table of Contents**Intellectual Property**

We rely on a combination of trademark, copyright and trade secret protection laws in China and other jurisdictions, as well as confidentiality procedures and contractual provisions to protect our intellectual property and our brand. We have six issued patents in China and intend to apply for more patents to protect our core technologies. We also enter into confidentiality, non-compete and invention assignment agreements with our employees and consultants and nondisclosure agreements with selected third parties. [Baidu](#), which is our company's name Baidu in Chinese, has been recognized as a well-known trademark in China by the Trademark Office under the SAIC. In addition to owning the trademark [Baidu](#) and the related logo, we have applied for registration of additional trademarks and logos, including [Baidu.com](#), [Baidu.com.cn](#), [hao123.com](#), [youa.com](#) and certain other websites with China National Network Information Center, or CNNIC. We also have registered certain trademarks in Hong Kong, including [Baidu.com.hk](#) and our company logo. In addition, we have registered our domain name Baidu.com with register.com, Baidu.jp with humeia.co.jp and Baidu.cn, Baidu.com.cn, hao123.com, youa.com and certain other websites with China National Network Information Center, or CNNIC.

Internet, technology and media companies are frequently involved in litigation based on allegations of infringement or other violations of intellectual property rights. Furthermore, the application of laws governing intellectual property rights in China and abroad is uncertain and evolving and could involve substantial risks to us. See [Item 3D. Key Information Risk Factors Risks Related to Our Business](#). We may face intellectual property infringement claims and other related claims that could be time-consuming and costly to defend and may result in our inability to continue providing certain of our existing services and [Baidu.com](#). We may be subject to patent infringement claims with respect to our P4P platform.

Regulation

The PRC government extensively regulates the telecommunications industry, including the Internet sector. The State Council, the MIIT and other relevant government authorities have promulgated an extensive regulatory scheme governing Internet-related services. This section summarizes the principal PRC laws and regulations relating to our business.

In the opinion of Haiwen & Partners, our PRC legal counsel: (1) the ownership structure of our company, Baidu Online, Baidu China, Baidu Times, Baidu Netcom, Beijing Perusal and BaiduPay complies with current PRC laws and regulations; (2) subject to the risks disclosed under [Item 3D. Key Information Risk Factors Risks Related to Our Corporate Structure](#) In order to comply with PRC laws and regulations limiting foreign ownership of Internet and online advertising businesses, we conduct our ICP and online advertising businesses through our consolidated affiliated entities in China by means of contractual arrangements. If the PRC government determines that these contractual arrangements do not comply with applicable regulations, our business could be adversely affected. [Baidu.com](#) and [Baidu.com.cn](#) PRC laws and regulations governing our businesses and the validity of certain of our contractual arrangements are uncertain. If we are found to be in violation, we could be subject to sanctions. In addition, changes in such PRC laws and regulations or changes in interpretations thereof may materially and adversely affect our business. [Baidu.com](#), our contractual arrangements with Baidu Netcom, Beijing Perusal, BaiduPay and their shareholders are valid and binding on all parties to these arrangements and do not violate existing PRC laws or regulations; and (3) subject to the completion of the transfers of certain trademarks from Baidu Online to Baidu Netcom, Beijing Perusal and BaiduPay, the business operations of our company, Baidu Online, Baidu China, Baidu Times, Baidu Netcom, Beijing Perusal and BaiduPay comply with current PRC laws and regulations in all material respects.

China's Internet industry and online advertising market are at an early stage of development. There are substantial uncertainties regarding the interpretation and application of existing or proposed PRC laws and regulations. We cannot assure you that the PRC regulatory authorities would find that our corporate structure and our business operations comply with PRC laws and regulations. If the PRC government finds us to be in violation of PRC laws and regulations, we may be required to pay fines and penalties, obtain certain licenses or permits and change, suspend or

discontinue our business operations until we comply with applicable PRC laws and regulations.

Table of Contents

Regulations on Value-Added Telecommunications Services and Internet Content Services

In September 2000, the State Council promulgated the Telecommunications Regulations, or the Telecom Regulations. The Telecom Regulations categorize all telecommunications businesses in the PRC as either basic or value-added. Internet content services, or ICP services, are classified as value-added telecommunications businesses. Under the Telecom Regulations, commercial operators of value-added telecommunications services must first obtain an operating license from the MIIT or its provincial level counterparts.

In September 2000, the State Council issued the Administrative Measures on Internet Information Services, or the Internet Measures. According to the Internet Measures, commercial ICP service operators must obtain an ICP license from the relevant government authorities before engaging in any commercial ICP operations within the PRC. In November 2000, the MIIT promulgated the Internet Electronic Messaging Service Administrative Measures, or the BBS Measures. BBS services include electronic bulletin boards, electronic forums, message boards and chat rooms. The BBS Measures require ICP operators to obtain specific approvals before providing BBS services.

In December 2001, the MIIT promulgated the Administrative Measures for Telecommunications Business Operating License, or the Telecom License Measures. In March 2009, the MIIT issued a revised Telecom License Measures, which will take effect on April 10, 2009. The Telecom License Measures set forth the types of licenses required to operate value-added telecommunications services and the qualifications and procedures for obtaining such licenses. For example, an ICP operator providing value-added services in multiple provinces is required to obtain an inter-regional license, whereas an ICP operator providing the same services in one province is required to obtain a local license.

National security considerations are an important factor in the regulation of Internet content in China. The National People's Congress, the PRC's national legislature, has enacted laws with respect to maintaining the security of Internet operation and Internet content. According to these laws, as well as the Internet Measures, violators may be subject to penalties, including criminal sanctions, for Internet content that:

- opposes the fundamental principles stated in the PRC constitution;
- compromises national security, divulges state secrets, subverts state power or damages national unity;
- harms the dignity or interests of the state;
- incites ethnic hatred or racial discrimination or damages inter-ethnic unity;
- undermines the PRC's religious policy or propagates heretical teachings or feudal superstitions;
- disseminates rumors, disturbs social order or disrupts social stability;
- disseminates obscenity or pornography, encourages gambling, violence, murder or fear or incites the commission of a crime;
- insults or slanders a third party or infringes upon the lawful rights and interests of a third party; or
- is otherwise prohibited by law or administrative regulations.

ICP operators are required to monitor their websites, including electronic bulletin boards. They may not post or disseminate any content that falls within these prohibited categories and must remove any such content from their

websites.

The PRC government may shut down the websites of ICP license holders that violate any of the above-mentioned content restrictions and revoke their ICP licenses.

Restrictions on Foreign Ownership in Value-Added Telecommunications Services

According to the Provisions on Administration of Foreign Invested Telecommunications Enterprises, or the FITE Provisions, promulgated by the State Council in December 2001 and amended in September 2008, the ultimate foreign equity ownership in a value-added telecommunications services provider must not exceed 50%. Moreover, for a foreign investor to acquire any equity interest in a value-added telecommunication business in

Table of Contents

China, it must satisfy a number of stringent performance and operational experience requirements, including demonstrating good track records and experience in operating value-added telecommunication business overseas. Foreign investors that meet these requirements must obtain approvals from the MIIT and the MOC (or MOC's authorized local counterparts), which retain considerable discretion in granting approvals. According to publicly available information, the PRC government has issued telecommunications business operating licenses to only a limited number of foreign invested companies, all of which are Sino-foreign joint ventures engaging in the value-added telecommunication business. We believe that it would be impracticable for us to acquire any equity interest in Baidu Netcom, Beijing Perusal or BaiduPay without diverting management attention and resources. In addition, we believe that our contractual arrangements with Baidu Netcom, Beijing Perusal, BaiduPay and their individual shareholders provide us with sufficient and effective control over Baidu Netcom, Beijing Perusal and BaiduPay. Accordingly, we currently do not plan to acquire any equity interest in Baidu Netcom, Beijing Perusal or BaiduPay.

In July 2006, the MIIT issued the Notice of the MIIT on Intensifying the Administration of Foreign Investment in Value-added Telecommunications Services, or the July 2006 Notice. The July 2006 Notice prohibits domestic telecommunication services providers from leasing, transferring or selling telecommunications business operating licenses to any foreign investor in any form, or providing any resources, sites or facilities to any foreign investor for their illegal operation of a telecommunications business in China. According to the July 2006 Notice, either the holder of a value-added telecommunication business operating license or its shareholders must directly own the domain names and trademarks used by such license holders in their provision of value-added telecommunication services. The July 2006 Notice further requires each license holder to have the necessary facilities, including servers, for its approved business operations and to maintain such facilities in the regions covered by its license. In addition, all value-added telecommunication service providers are required to maintain network and Internet security in accordance with the standards set forth in relevant PRC regulations. If a license holder fails to comply with the requirements in the July 2006 Notice and cure such non-compliance, the MIIT or its local counterparts have the discretion to take measures against such license holders, including revoking their value-added telecommunication business operating licenses.

To comply with these PRC regulations, we operate our websites through Baidu Netcom and Beijing Perusal, our PRC affiliated entities. In February 2008, we assisted in establishing another consolidated affiliated entity, BaiduPay, which operate an online payment platform. Baidu Netcom is wholly owned by our chairman, chief executive officer and co-founder Robin Yanhong Li and our co-founder Eric Yong Xu, both of whom are PRC citizens. Beijing Perusal is wholly owned by two PRC citizens designated by our company. BaiduPay is wholly owned by Baidu Netcom and a PRC citizen designated by our company. Each of Baidu Netcom and Beijing Perusal holds a value-added telecommunications business operating license. It remains unclear whether the provision of online payment services by BaiduPay will require BaiduPay to apply for a value-added telecommunications business operating license for online data processing and transaction processing businesses as provided in the Catalog of Telecommunications Businesses promulgated by the MIIT.

To comply with the July 2006 Notice, we have transferred certain domain names primarily used in our business to Baidu Netcom and Beijing Perusal, respectively. We are also in the process of transferring certain trademarks, including pending trademark applications made by Baidu Online, to Baidu Netcom, Beijing Perusal and BaiduPay, respectively. See Item 3D. Key Information Risk Factors Risks Related to Our Corporate Structure We may be adversely affected by complexity, uncertainties and changes in PRC regulation of Internet business and companies, including limitations on our ability to own key assets such as our websites.

Regulations on News Display

Displaying news on a website and disseminating news through the Internet are highly regulated in the PRC. In November 2000, the State Council News Office and the MIIT promulgated the Provisional Measures for Administrating Internet Websites Carrying on the News Displaying Business. These measures require an ICP operator (other than a government authorized news unit) to obtain State Council News Office approval to post news on its website or disseminate news through the Internet. Furthermore, the disseminated news must come from government-approved sources pursuant to contracts between the ICP operator and these sources, copies of which must be filed with the relevant government authorities.

Table of Contents

On September 25, 2005, the State Council News Office and the MIIT jointly issued the Provisions on the Administration of Internet News Information Services, requiring Internet news information service organizations to provide services as approved by the State Council News Office, subject to annual inspection under the new provisions. These Provisions also provide that no Internet news information service organizations may take the form of a foreign invested enterprise, whether a joint venture or a wholly foreign owned enterprise and no cooperation between Internet news information service organizations and foreign invested enterprise is allowed prior to the security evaluation by the State Council News Office.

In December 2006, Baidu Netcom obtained the Internet news license, which permits it to publish Internet news pursuant to the relevant PRC laws and regulations. The Internet news license is subject to annual inspection by relevant government authorities.

Regulation on Internet Culture Activities

On May 10, 2003, the Ministry of Culture promulgated the Internet Culture Administration Tentative Measures, or the Internet Culture Measures, which was revised in July 2004. The Internet Culture Measures require ICP operators engaging in Internet culture activities to obtain a permit from the Ministry of Culture. The term Internet culture activities includes, among other things, online dissemination of Internet cultural products (such as audio-video products, gaming products, performances of plays or programs, works of art and cartoons) and the production, reproduction, importation, sale (wholesale or retail), leasing and broadcasting of Internet cultural products. We have hosted certain audio/video programs on the Baidu Movie channel since 2006. Baidu Netcom was granted an Internet culture business permit in April 2007.

On November 20, 2006, the Ministry of Culture issued Several Suggestions of the Ministry of Culture on the Development and Administration of the Internet Music, or the Suggestions, which became effective on November 20, 2006. The Suggestions, among other things, reiterate the requirement for the Internet service provider to obtain the Internet culture business permit to carry on any business of Internet music products. In addition, foreign investors are prohibited from engaging in the Internet culture business operation.

Regulation on Broadcasting Audio/Video Programs through the Internet

On July 6, 2004, the State Administration of Radio Film and Television, or the SARFT, promulgated the Rules for the Administration of Broadcasting of Audio/Video Programs through the Internet and Other Information Networks, or the A/V Broadcasting Rules. The A/V Broadcasting Rules apply to the opening, broadcasting, integration, transmission or download of audio/video programs via the Internet and other information networks. Anyone who wishes to engage in Internet broadcasting activities must first obtain an audio/video program transmission license, with a term of two years, issued by the SARFT and operate pursuant to the scope as provided in such license. Foreign invested enterprises are not allowed to engage in the above business.

On April 13, 2005, the State Council announced Several Decisions on Investment by Non-state-owned Companies in Culture-related Business in China. These decisions encourage and support non-state-owned companies to enter certain culture-related business in China, subject to restrictions and prohibitions for investment in audio/video broadcasting, website news and certain other businesses by non-state-owned companies. These decisions authorize the Ministry of Culture, the SARFT and the General Administration of Press and Publication to adopt detailed implementation rules according to these decisions.

On December 20, 2007, the SARFT and the MIIT jointly issued the Rules for the Administration of Internet Audio and Video Program Services, commonly known as Document 56, which came into effect as of January 31, 2008. Document 56 reiterates the requirement set forth in the A/V Broadcasting Rules that online audio/video service

providers must obtain a license from the SARFT. Furthermore, Document 56 requires all online audio/video service providers to be either wholly state-owned or state-controlled. According to relevant official answers to press questions published on the SARFT's website dated February 3, 2008, officials from the SARFT and the MIIT clarified that online audio/video service providers that already had been operating lawfully prior to the issuance of Document 56 may re-register and continue to operate without becoming state-owned or controlled, provided that such providers have not engaged in any unlawful activities. This exemption will not be granted to online audio/video service providers established after Document 56 was issued. We have hosted on the Baidu Internet TV

Table of Contents

channel on our website certain audio/video programs since 2006. Baidu Netcom is in the process of applying for an audio/video program transmission license. We cannot assure you that we will obtain this license in a timely manner, or at all. See Item 3D. Key Information Risk Factors Risks Related to Our Corporate Structure We may be adversely affected by complexity, uncertainties and changes in PRC regulation of Internet business and companies, including limitations on our ability to own key assets such as our websites.

Regulations on Advertisements

The PRC government regulates advertising, including online advertising, principally through the SAIC, although there are no national PRC laws or regulations specifically regulating online advertising business. Under the Rules for Administration of Foreign Invested Advertising Enterprise, promulgated by the SAIC and the MOC in March 2004 and amended in October 2008, foreign investors are permitted to own equity interests in PRC advertising companies. However, foreign investors in wholly foreign-owned and joint venture Chinese advertising companies are required to have at least three years and two years, respectively, of direct operations in the advertising industry outside of China. Since we have not been involved in advertising outside of China for the required number of years, we cannot hold direct equity interests in PRC companies engaged in advertising business. We conduct our online advertising business through our consolidated affiliated entities in China, Baidu Netcom and Beijing Perusal.

On November 30, 2004, the SAIC issued the Administrative Regulations for Advertising Operation Licenses, taking effect as of January 1, 2005, granting a general exemption to enterprises (other than radio stations, television stations, newspapers and magazines, non-corporate entities and other entities specified in laws or administrative regulations) from the previous requirement to obtain an advertising operation license in addition to a business license. We conduct our online advertising business through Baidu Netcom and Beijing Perusal, each of which holds a business license that includes online advertising in its business scope.

Advertisers, advertising operators and advertising distributors are required by PRC advertising laws and regulations to ensure that the contents of the advertisements they prepare or distribute are true and in full compliance with applicable laws and regulations. In addition, where a special government review is required for certain categories of advertisements before publishing, the advertisers, advertising operators and advertising distributors are obligated to confirm that such review has been performed and that relevant approval has been obtained. Violation of these regulations may result in penalties, including fines, confiscation of advertising income, orders to cease dissemination of the advertisements and orders to publish an advertisement correcting the misleading information. In circumstances involving serious violations, the SAIC or its local branches may force the violator to terminate its advertising operation or even revoke its business license. Furthermore, advertisers, advertising operators or advertising distributors may be subject to civil liability if they infringe on the legal rights and interests of third parties.

Regulation on Software Products

On October 27, 2000, the MIIT issued the Administrative Measures on Software Products, or the Software Measures, to strengthen the regulation of software products and to encourage the development of the PRC software industry. On March 1, 2009, the MIIT issued an amended Software Measures, which will become effective on April 10, 2009. The Software Measures provide a registration and filing system with respect to software products made in or imported into China. These software products may be registered with the competent local authorities in charge of software industry administration. Registered software products may enjoy preferential treatment status granted by relevant software industry regulations. Software products can be registered for five years, and the registration is renewable upon expiration.

In order to further implement the Computer Software Protection Regulations promulgated by the State Council on December 20, 2001, the State Copyright Bureau issued the Computer Software Copyright Registration Procedures on

February 20, 2002, which apply to software copyright registration, license contract registration and transfer contract registration.

Table of Contents

Regulations on Intellectual Property Rights

China has adopted legislation governing intellectual property rights, including trademarks, patents and copyrights. China is a signatory to the main international conventions on intellectual property rights and became a member of the Agreement on Trade Related Aspects of Intellectual Property Rights upon its accession to the WTO in December 2001.

Patent. The National People's Congress adopted the Patent Law in 1984, and amended it in 1992, 2000 and 2008. The purpose of the Patent Law is to protect and encourage invention, foster applications of invention and promote the development of science and technology. To be patentable, invention or utility models must meet three conditions: novelty, inventiveness and practical applicability. Patents cannot be granted for scientific discoveries, rules and methods for intellectual activities, methods used to diagnose or treat diseases, animal and plant breeds, substances obtained by means of nuclear transformation or a design which has major marking effect on the patterns or colors of graphic print products or a combination of both patterns and colors. The Patent Office under the State Council is responsible for receiving, examining and approving patent applications. A patent is valid for a term of twenty years in the case of an invention and a term of ten years in the case of utility models and designs. A third-party user must obtain consent or a proper license from the patent owner to use the patent. Otherwise, the use constitutes an infringement of patent rights.

Copyright. The National People's Congress adopted the Copyright Law in 1990 and amended it in 2001 to widen the scope of works and rights that are eligible for copyright protection. The amended Copyright Law extends copyright protection to Internet activities, products disseminated over the Internet and software products. In addition, there is a voluntary registration system administered by the China Copyright Protection Center.

To address copyright issues relating to the Internet, the PRC Supreme People's Court on November 22, 2000 adopted the Interpretations on Some Issues Concerning Applicable Laws for Trial of Disputes over Internet Copyright, or the Interpretations, which were subsequently amended on December 23, 2003 and November 20, 2006. The Interpretations establish joint liability for ICP operators if they knowingly participate in, assist in or incite infringing activities or fail to remove infringing content from their websites after receiving notice from the rights holder. In addition, any act intended to bypass circumvention technologies designed to protect copyrights constitutes copyright infringement. Upon request, the ICP operators must provide the rights holder with registration information of the alleged violator, provided that such rights holder has produced relevant identification, copyright certificate and evidence of infringement. An ICP operator is exempted from any liabilities as long as it removes the alleged infringing content after receiving the rights holder's notice accompanied with proper evidence.

To address the problem of copyright infringement related to the content posted or transmitted over the Internet, the PRC National Copyright Administration and the MIIT jointly promulgated the Measures for Administrative Protection of Copyright Related to Internet on April 29, 2005. This measure became effective on May 30, 2005.

This measure applies to situations where an ICP operator (i) allows another person to post or store any works, recordings, audio or video programs on the websites operated by such ICP operator or (ii) provides links to, or search results for, the works, recordings, audio or video programs posted or transmitted by such person, without editing, revising or selecting the content of such material. Upon receipt of an infringement notice from a legitimate copyright holder, an ICP operator must take remedial actions immediately by removing or disabling access to the infringing content. If an ICP operator knowingly transmits infringing content or fails to take remedial actions after receipt of a notice of infringement harming public interest, the ICP operator could be subject to administrative penalties, including: cessation of infringement activities; confiscation by the authorities of all income derived from the infringement activities; and payment of a fine of up to three times the unlawful income or, in cases where the amount of unlawful income cannot be determined, a fine of up to RMB100,000. An ICP operator is also required to retain all

infringement notices for a minimum of six months and to record the content, display time and IP addresses or the domain names related to the infringement for a minimum of 60 days. Failure to comply with this requirement could result in an administrative warning and a fine of up to RMB30,000.

On May 18, 2006, the State Council promulgated the Protection of the Right of Communication through Information Network, which became effective on July 1, 2006. Under this regulation, an Internet service provider may be exempted from liabilities for providing links to infringing or illegal content if it does not know that such

Table of Contents

content is infringing upon other parties' rights or is illegal. However, if the legitimate owner of the content notifies the Internet service provider and requests removal of the links to the infringing content, the Internet service provider would be deemed to have constructive knowledge upon receipt of such notification but would be exempted from liabilities if it removes or disconnects the links to the infringing content at the request of the legitimate owner. At the request of the alleged violator, the Internet service provider should immediately restore links to content previously disconnected upon receipt of initial non-infringing evidence.

We have adopted measures to mitigate copyright infringement risks. For example, our policy is to remove links to web pages if we know these web pages contain materials that infringe third-party rights or if we are notified by the legitimate copyright holder of the infringement with proper evidence.

Trademark. The PRC Trademark Law, adopted in 1982 and revised respectively in 1993 and 2001, protects registered trademarks. The Trademark Office under the SAIC handles trademark registrations and grants a term of ten years to registered trademarks. Trademark license agreements must be filed with the Trademark Office for record. is recognized as a well-known trademark in China by the Trademark Office under the SAIC. In addition to owning the trademark and the related logo, we have applied for registration of additional trademarks and logos, including , .

In September 2002, the CNNIC issued the Implementing Rules for Domain Name Registration setting forth detailed rules for registration of domain names. On November 5, 2004, the MIIT promulgated the Measures for Administration of Domain Names for the Chinese Internet, or Domain Name Measures. The Domain Name Measures regulate the registration of domain names, such as the first tier domain name .cn. In February 2006, CNNIC issued the Measures on Domain Name Disputes Resolution and its implementing rules, pursuant to which CNNIC can authorize a domain name dispute resolution institution to decide disputes. We have registered Baidu.cn, Baidu.com.cn, hao123.com and certain other domain names with CNNIC.

Regulation on Information Security

The National People's Congress has enacted legislation that prohibits use of the Internet that breaches the public security, disseminates socially destabilizing content or leaks state secrets. Breach of public security includes breach of national security and infringement on legal rights and interests of the state, society or citizens. Socially destabilizing content includes any content that incites defiance or violations of PRC laws or regulations or subversion of the PRC government or its political system, spreads socially disruptive rumors or involves cult activities, superstition, obscenities, pornography, gambling or violence. State secrets are defined broadly to include information concerning PRC national defense, state affairs and other matters as determined by the PRC authorities.

According to other relevant regulations, ICP operators must complete mandatory security filing procedures and regularly update information security and censorship systems for their websites with local public security authorities, and must also report any public dissemination of prohibited content.

In addition, the State Secrecy Bureau has issued provisions authorizing the blocking of access to any website it deems to be leaking state secrets or failing to comply with the relevant legislation regarding the protection of state secrets during online information distribution. Specifically, Internet companies in China with bulletin boards, chat rooms or similar services must apply for specific approval prior to operating such services.

On November 23, 2005, the Ministry of Public Security promulgated Provisions on Technological Measures for Internet Security Protection, or Internet Protection Measures. The Internet Protection Measures require all ICP operators to keep records of certain information about its users (including user registration information, log-in and log-out time, IP address, content and time of posts by users) for at least 60 days and submit the above information as required by laws and regulations.

As Baidu Netcom and Beijing Perusal are ICP operators, they are subject to the regulations relating to information security. They have taken measures to comply with such regulations. They are registered with the relevant government authority in accordance with the mandatory registration requirement. Baidu Netcom's policy is to remove links to web pages which to its knowledge contain information that would be in violation of PRC laws or regulations. In addition, we monitor our websites to ensure our compliance with such laws and regulations.

Table of Contents

Regulations on Internet Privacy

The PRC Constitution states that PRC law protects the freedom and privacy of communications of citizens and prohibits infringement of such rights. In recent years, PRC government authorities have enacted legislation on Internet use to protect personal information from any unauthorized disclosure. The Internet Measures prohibit an ICP operator from insulting or slandering a third party or infringing upon the lawful rights and interests of a third party. Pursuant to the BBS Measures, ICP operators that provide electronic messaging services must keep users' personal information confidential and must not disclose such personal information to any third party without the users' consent or unless required by law. The regulations further authorize the relevant telecommunications authorities to order ICP operators to rectify unauthorized disclosure. ICP operators are subject to legal liability if the unauthorized disclosure results in damages or losses to users. The PRC government, however, has the power and authority to order ICP operators to turn over personal information if an Internet user posts any prohibited content or engages in illegal activities on the Internet.

Regulations on Foreign Exchange

Foreign Currency Exchange

Pursuant to the Foreign Currency Administration Rules promulgated in 1996 and amended in 1997 and 2008 and various regulations issued by SAFE and other relevant PRC government authorities, RMB is freely convertible to the extent of current account items, such as trade related receipts and payments, interest and dividends. Capital account items, such as direct equity investments, loans and repatriation of investment, unless expressly exempted by laws and regulations, still require prior approval from SAFE or its provincial branch for conversion of RMB into a foreign currency, such as U.S. dollars, and remittance of the foreign currency outside the PRC.

Payments for transactions that take place within the PRC must be made in RMB. Unless otherwise approved or permitted, PRC companies must repatriate foreign currency payments received from abroad. The foreign exchange received by PRC companies, including foreign invested enterprises, may be retained in their foreign exchange accounts without being exchanged into RMB to the extent permitted by relevant laws and regulations.

Dividend Distribution

The principal regulations governing dividend distributions by wholly foreign owned enterprises and Sino-foreign equity joint ventures include:

Wholly Foreign Owned Enterprise Law (1986), as amended;

Wholly Foreign Owned Enterprise Law Implementing Rules (1990), as amended;

Sino-foreign Equity Joint Venture Enterprise Law (1979), as amended;

Sino-foreign Equity Joint Venture Enterprise Law Implementing Rules (1983), as amended;

PRC Enterprise Income Tax Law (2007); and

Implementation Rules of the PRC Enterprise Income Tax Law (2007).

Under these regulations, wholly foreign owned enterprises and Sino-foreign equity joint ventures in the PRC may pay dividends only out of their accumulated profits, if any, as determined in accordance with PRC accounting standards

and regulations. Additionally, these foreign-invested enterprises are required to set aside certain amounts of their accumulated profits each year, if any, to fund certain reserve funds. These reserves are not distributable as cash dividends.

Foreign Exchange Registration of Offshore Investment by PRC Residents

Pursuant to SAFE's Notice on Relevant Issues Concerning Foreign Exchange Administration for PRC Residents to Engage in Financing and Inbound Investment via Overseas Special Purpose Vehicles, or Circular No. 75, issued on October 21, 2005, and its implementation rules issued in May 2007, (i) a PRC resident, including a PRC resident natural person or a PRC company, is required to register with the local branch of SAFE before it

Table of Contents

establishes or controls an overseas SPV, or SPV, for the purpose of overseas equity financing (including convertible debt financing); (ii) when a PRC resident contributes the assets of or its equity interests in a domestic enterprise into an SPV, or engages in overseas financing after contributing assets or equity interests into an SPV, such PRC resident shall register his or her interest in the SPV and the change thereof with the local branch of SAFE; and (iii) when the SPV undergoes a material event outside of China, such as change in share capital or merger and acquisition, the PRC resident must, within 30 days from the occurrence of such event, register such change with the local branch of SAFE. PRC residents who are shareholders of SPVs that were established and which have completed their inbound investment before November 1, 2005 were required to register with the local SAFE branch before March 31, 2006.

Under Circular No. 75, failure to comply with the registration procedures set forth above may result in penalties, including restrictions on a PRC subsidiary's foreign exchange activities and its ability to distribute dividends to the SPV.

On December 25, 2006, the People's Bank of China promulgated the Measures for the Administration of Individual Foreign Exchange, and on January 5, 2007 SAFE further promulgated the implementation rules on those measures. Both became effective on February 1, 2007. According to the implementation rules, if individuals in the PRC participate in any employee stock ownership plan or stock option plan of an overseas listed company, those individuals must apply as a group through the company or a domestic agency to SAFE or the appropriate local branch for approval for any foreign exchange-related transactions concerning that plan.

On March 28, 2007, SAFE promulgated the Application Procedure of Foreign Exchange Administration for Domestic Individuals Participating in Employee Stock Holding Plan or Stock Option Plan of Overseas-Listed Company. Under this rule, PRC citizens who are granted stock options by an overseas publicly listed company are required, through a PRC agent or PRC subsidiary of such overseas publicly-listed company, to register with SAFE and complete certain other procedures.

Regulations on Labor

On June 29, 2007, the National People's Congress of China enacted the Labor Contract Law, which became effective on January 1, 2008. Compared to the Labor Law, the Labor Contract Law establishes more restrictions and increases costs for employers, including specific provisions related to fixed-term employment contracts, temporary employment, probation, consultation with the labor union and employee assembly, employment without a contract, dismissal of employees, compensation upon termination and overtime work, and collective bargaining. According to the Labor Contract Law, an employer is obliged to sign labor contract with unlimited term with an employee if the employer continues to hire the employee after the expiration of two consecutive fixed-term labor contracts. The employer has to compensate the employee upon the expiration of a fixed-term labor contract, unless the employee refuses to renew such contract on terms the same as or better than those contained in the expired contract. The employer also has to indemnify an employee if the employer terminates a labor contract without a cause permitted by law. In addition, under the Regulations on Paid Annual Leave for Employees, which became effective on January 1, 2008, employees who have served more than one year for an employer are entitled to a paid vacation ranging from 5 to 15 days, depending on their length of service. Employees who waive such vacation time at the request of employers shall be compensated for three times their regular salaries for each waived vacation day.

Regulations on Taxation

For a discussion of applicable PRC tax regulations, see Item 5.A. Operating and Financial Review and Prospects Operating Results Taxation.

Regulations in Japan

Although current Japanese law and regulations contain no provisions expressly directed toward legal control of Internet search services such as those operated by our Japanese subsidiary in Japan, certain existing Japanese law and regulations may nonetheless affect such services. The application to our Japanese subsidiary of existing Japanese law and regulations relating to issues such as intellectual property ownership and infringement, obscenity and other content regulation, user privacy and data protection, defamation, consumer protection and quality of services in many instances is unclear or unsettled. In all such cases, there is a possibility that providing, editing and

Table of Contents

processing by an Internet search service of links to web pages which contain material in violation of applicable Japanese law could result in civil or criminal legal liability on the part of such Internet search service. In addition to the foregoing, there is political and social support within Japan for the adoption of legislation expressly directed to the legal control of harmful information on the Internet. With this support, a law which aims to protect juveniles from harmful information on the Internet is being introduced, and it is difficult to predict how much impact such a law will have on the operation of our Internet search services in Japan.

C. Organizational Structure

The following is a list of our subsidiaries and consolidated affiliated entities established since our inception:

Name	Time of Formation	Place of Formation	Relationship
Baidu Online Network Technology (Beijing) Co. Ltd.	January 2000	China	Wholly-owned subsidiary
Baidu Holdings Limited	February 2000	British Virgin Islands	Wholly-owned subsidiary
Baidu Netcom Science Technology Co., Ltd.	June 2001	China	Consolidated affiliated entity
Baidu (China) Co., Ltd.	June 2005	China	Wholly-owned subsidiary
Baidu.com Times Technology (Beijing) Co., Ltd.	April 2006	China	Wholly-owned subsidiary
Beijing Perusal Technology Co., Ltd.	June 2006	China	Consolidated affiliated entity
Baidu, Inc.	December 2006	Japan	Wholly-owned subsidiary
Baidu (Hong Kong) Limited	November 2007	Hong Kong	Wholly-owned subsidiary
Beijing BaiduPay Science and Technology Co., Ltd.	February 2008	China	Consolidated affiliated entity
Baido, Inc.	April 2008	Japan	Wholly-owned subsidiary
Hyakudo, Inc.	April 2008	Japan	Wholly-owned subsidiary
Baidu Interaction (Shenzhen) Network Technology Co., Ltd.	February 2009	China	Wholly-owned subsidiary

PRC laws and regulations restrict foreign ownership of ICP and advertising businesses. To comply with PRC laws, Baidu Netcom was formed by Robin Yanhong Li and Eric Yong Xu on June 5, 2001. Baidu Netcom holds the licenses and permits necessary to operate our websites and provide our online advertising services in China. Our relationships with Baidu Netcom and its shareholders are governed by a series of contractual arrangements. We are the primary beneficiary of Baidu Netcom and are able to substantially control Baidu Netcom through these contractual arrangements.

In June 2006, we assisted in establishing Beijing Perusal, which is directly owned by two individuals designated by us. We extended an interest-free loan in an aggregate amount of RMB1.0 million to the shareholders of Beijing

Perusal solely in connection with the initial capitalization of Beijing Perusal. We entered into a series of agreements with Beijing Perusal and its shareholders in order to be the primary beneficiary of, and substantially control, Beijing Perusal. Beijing Perusal became our consolidated affiliated entity as a result of these contractual arrangements. Beijing Perusal holds the necessary permits to conduct online advertising services in China.

In February 2008, we assisted in establishing BaiduPay, which is directly owned by Baidu Netcom and an individual designated by our company. We extended an interest-free loan in an aggregate amount of RMB9.0 million

Table of Contents

to the individual shareholder solely in connection with the initial capitalization of BaiduPay. We entered into a series of agreements with BaiduPay and the individual shareholder in order to be the primary beneficiary of, and substantially control, BaiduPay. BaiduPay became our consolidated affiliated entity as a result of these contractual arrangements. BaiduPay operates an online payment platform.

D. Property, Plant and Equipment

Our principal executive offices are located on premises comprising approximately 29,600 square meters in Beijing, China. We have branch offices in Shanghai and selected cities in Guangdong Province. We lease our premises from unrelated third parties. Our servers in China are hosted at the Internet data centers of China Telecom, China Unicom and China Mobile in Beijing, Tianjin and Shenzhen. In March 2007, we established servers at an Internet data center of Asia Network Company in Tokyo, Japan.

In late 2005, we made an initial payment for the land use right in Beijing to build our new corporate headquarters with total floor area of approximately 44,000 square meters. The floor area was increased to 59,000 square meters in 2006. We are building a new information and technology center on the premises and plan to move our principal executive offices, information and technology center, online marketing services center and administrative and support facilities to the new premises. We have obtained the necessary governmental approvals for the proposed development and use of the land, and our new office building is currently under construction.

Item 4A. Unresolved Staff Comments

None.

Item 5. Operating and Financial Review and Prospects

The following discussion of our financial condition and results of operations is based upon and should be read in conjunction with our consolidated financial statements and their related notes included in this annual report on Form 20-F. This report contains forward-looking statements. See *Forward-Looking Information*. In evaluating our business, you should carefully consider the information provided under the caption *Item 3D. Key Information Risk Factors* in this annual report on Form 20-F. We caution you that our businesses and financial performance are subject to substantial risks and uncertainties.

A. Operating Results

Overview

Our operations are primarily based in China, where we derive substantially all of our revenues. Total revenues in 2008 were RMB3.2 billion (US\$468.8 million), an 83.3% increase over 2007. Operating profit in 2008 was RMB1.1 billion (US\$160.8 million), a 100.4% increase over 2007. Net income in 2008 was RMB1.0 billion (US\$153.6 million), a 66.6% increase over 2007.

Our total assets as of December 31, 2008 were RMB3.9 billion (US\$577.2 million), of which cash and cash equivalent amounted to RMB2.4 billion (US\$346.2 million). Our total liabilities were RMB849.3 million (US\$124.5 million), accounting for 21.6% of total liabilities and shareholders' equity. As of December 31, 2008, our retained earnings accumulated to RMB2.0 billion (US\$290.2 million).

The major factors affecting our results of operations and financial condition are discussed below.

Revenues

Revenue Generation

We derive revenues primarily from online marketing services, which accounted for 98.9%, 99.8% and 99.9% of our total revenues in 2006, 2007 and 2008, respectively.

Table of Contents

We provide online marketing services to our P4P customers and tailored solutions customers. We generated approximately 99.9% of our total revenues in 2008 from online marketing services, a substantial majority of which was derived from our P4P services.

Our P4P platform is an online marketplace that introduces Internet search users to customers who bid or pay a fixed fee based on click-throughs for priority placement of their links in the search results. We recognize P4P revenues when a user clicks on a customer's link in the search results, based on the amount that the customer has agreed to pay for each click-through or, in some cases, other pre-determined performance measures.

We provide tailored solutions customers with marketing solutions which may include one or more forms of online advertising services such as text links and graphical advertisements, as well as P4P services. Our agreements with these customers generally have a term of no more than one year. Our tailored solutions customers generally pay us based on pre-determined performance metrics, such as number of click-throughs, duration of placement, number of converted users and number of telephone calls. Some of our large tailored solutions customers have increasingly used our auction-based P4P services as one of the means to meet their online marketing needs. We expect to continue to experience such trend in the near future.

The most significant factors that directly or indirectly affect our online marketing revenues are:

the number of our users and online marketing customers;

the number of searches initiated on our websites and our Baidu Union members' properties;

the rate at which users click on paid search results;

the competitiveness of bidding for keywords by P4P customers;

the total online marketing budgets of our customers; and

the total number of sponsored links and advertisements displayed on our websites and the bidding price for click-through.

Our P4P services revenues have primarily been driven by the increase in the number of page views, the increase in the number of P4P customers, and by our success in optimizing the display of sponsored links. We believe that an increase in the number of active P4P customers generally leads to an increase in the number of sponsored links and a higher average price per click-through for selected keywords. Our P4P customer growth has primarily been driven by the adoption of our P4P services by SMEs and, to a lesser extent, large enterprises. Our online advertising services have historically been driven by the general increase in our customers' online marketing budgets. Most of our tailored solutions customers are medium and large enterprises. We expect the number of our online marketing customers to grow and, as a result, our customer mix may change. However, we expect our online marketing customer base to remain diverse for the foreseeable future. The current economic slowdown in China may cause our customers to decrease or delay their online marketing spending, hamper our efforts to grow our customer base, or result in fewer clicks by our users on sponsored links or advertisements displayed on our or Baidu Union members' websites. Any of these consequences could negatively affect our online marketing revenues.

In November 2008, we removed paid search listings of certain customers, particularly medical and pharmaceutical customers without documentations on file with us, in response to CCTV reports that we had been including websites of medical companies that did not hold proper licenses in our paid search listings for some popular medical terms. A large portion of those customers have since resumed using our services after providing their relevant documentations

to us. However, the removal of certain questionable sponsored links in November 2008 may result in a loss of revenues in future periods.

Our online marketing customers are increasingly seeking marketing solutions with measurable results in order to maximize their ROI. To meet our customers' needs, we will continue to evaluate the effectiveness of our various products and services and adjust the mix of our service offerings to optimize our customers' ROI. We expect that we will continue to earn a substantial majority of our revenues from our online marketing services. As a result, we plan to continue focusing most of our resources on expanding our online marketing services.

Table of Contents

Prior to July 2006, we had provided enterprise search software and related services. We decided to phase out our enterprise search software business in July 2006. This phase-out was completed in 2008.

Revenue Collection

We collect payments for our P4P services both from our customers directly and through our distributors. We have expanded our direct sales effort in several major cities in China, including Beijing, Shanghai, Guangzhou and Shenzhen and, as a result, an increasing portion of P4P payments is collected through our direct sales. We require our P4P distributors or direct customers to pay a deposit before using our P4P services, to maintain a minimum balance in their accounts, and to replenish the accounts immediately or in some cases, within certain grace periods after their account balance falls below the designated amount. We deduct the amount due to us from the deposit paid by a distributor or a customer when a user clicks on the customer's link in the search results.

We offer payment terms to our tailored solutions and online-marketing services customers and longer payment terms to certain qualified agents, consistent with industry practice.

As of December 31, 2008, we had accounts receivable of RMB92.8 million (US\$13.6 million), net of allowance of RMB8.6 million (US\$1.3 million), mainly due from tailored solutions customers.

Operating Costs and Expenses

Our operating costs and expenses consist of cost of revenues, selling, general and administrative expenses, and research and development expenses. Share-based compensation expenses are allocated among the above three categories of operating costs and expenses, based on the nature of the work of the employees who have received share-based compensation. Costs and expenses related to our Japan operations, which started in December 2006, are included in our cost of revenues, selling, general and administrative expenses and research and development expenses. Our total operating costs and expenses increased significantly from 2006 to 2008 due to the growth of our business. However, if we excluded the costs and expenses related to our Japan operations, our total operating costs and expenses have declined as a percentage of our total revenues from 2006 to 2008 mainly due to economies of scale and the revenue growth we have achieved.

Cost of Revenues

The following table sets forth the components of our cost of revenues both in absolute amount and as a percentage of total revenues for the periods indicated.

	2006		For the Year Ended December 31,			2008	
	RMB	%	RMB	%	RMB	US\$	%
Total revenues	837,838	100.0	1,744,425	100.0	3,198,252	468,780	100
Cost of revenues:							
Business tax and surcharges	(51,833)	6.2	(108,783)	6.2	(200,085)	(29,327)	6.2
Traffic acquisition costs	(75,180)	9.0	(204,693)	11.7	(418,474)	(61,337)	13.1
Bandwidth costs	(40,005)	4.8	(117,554)	6.8	(178,651)	(26,186)	5.6

Edgar Filing: Baidu, Inc. - Form 20-F

Depreciation of servers and other equipment	(51,574)	6.1	(147,115)	8.4	(225,799)	(33,096)	7.1
Operational expenses	(25,481)	3.0	(65,544)	3.8	(127,906)	(18,748)	4.0
Share-based compensation expenses	(1,416)	0.2	(1,717)	0.1	(4,542)	(666)	0.1
Total cost of revenues	(245,489)	29.3	(645,406)	37.0	(1,155,457)	(169,360)	36.1

Traffic Acquisition Costs. Traffic acquisition costs represent the portion of our online marketing revenues that we share with our Baidu Union members. We typically pay a Baidu Union member, based on a pre-agreed

Table of Contents

arrangement, a portion of the online marketing revenues generated from valid click-throughs by users of that member's properties.

Bandwidth Costs. Bandwidth costs are the fees we pay to telecommunications carriers such as China Telecom and China Unicom for telecommunications services and for hosting our servers at their Internet data centers. We expect our bandwidth costs, as variable costs, to increase with the traffic on our websites. Our bandwidth costs could also increase if the telecommunications carriers increase their service charges.

Depreciation of Servers and Other Equipment. We include depreciation expenses within our cost of revenues for servers and other computer hardware that are directly related to our business operations and technical support.

Operational Expenses. Operational expenses include primarily salary and benefits expenses and travel and other expenses incurred by our operating and technical support personnel. Salary and benefits expenses include wages, bonuses, and medical insurance, unemployment insurance and pension benefits.

Operating Expenses

The following table sets forth the components of our operating expenses both in absolute amount and as a percentage of total revenues for the periods indicated.

	2006		For the Year Ended December 31, 2007			2008	
	RMB	%	RMB	%	RMB	US\$	%
Total revenues	837,838	100.0	1,744,425	100.0	3,198,252	468,780	100
Cost of revenues	(245,489)	29.3	(645,406)	37.0	(1,155,457)	(169,360)	36.1
Selling, general and administrative	(250,240)	29.9	(411,163)	23.6	(659,804)	(96,710)	20.6
Selling and marketing	(149,856)	17.9	(275,283)	15.8	(452,245)	(66,288)	14.1
General and administrative	(100,384)	12.0	(135,880)	7.8	(207,559)	(30,422)	6.5
Research and development	(79,231)	9.4	(140,702)	8.1	(286,256)	(41,958)	9.0
Total costs and operating expenses	(574,960)	68.6	(1,197,271)	68.7	(2,101,517)	(308,028)	65.7

Selling, General and Administrative Expenses

Our selling and marketing expenses primarily consist of salaries and benefits and commissions for our sales and marketing personnel and promotional and marketing expenses. We expect to incur higher selling and marketing expenses as we intensify our brand-promotion efforts. To the extent that our direct sales force sells a greater proportion of our online marketing services, we expect that our selling expense will increase as a result of increased sales commissions.

Our general and administrative expenses primarily consist of salaries and benefits for our general and administrative personnel and fees and expenses for legal, accounting and other professional services.

Research and Development Expenses

Research and development expenses primarily consist of salaries and benefits for research and development personnel. We expense research and development costs as they are incurred, except for capitalized software development costs that fulfill the capitalization criteria under SOP 98-1, Accounting for the Costs of Computer Software Developed or Obtained for Internal Use.

Share-based Compensation Expenses

We grant options to our employees as a type of share-based compensation award. As of December 31, 2008, there was RMB43.5 million (US\$6.4 million) unrecognized share-based compensation cost related to options. That

Table of Contents

deferred cost is expected to be recognized over a weighted-average vesting period of 2.04 years. To the extent the actual forfeiture rate is different from our original estimate, actual share-based compensation cost related to these awards may be different from our expectation.

In addition to options, we started awarding restricted shares to employees in 2006. As of December 31, 2008, there was RMB57.6 million (US\$8.4 million) unrecognized share-based compensation cost related to restricted shares. That deferred cost is expected to be recognized over a weighted-average vesting period of 1.32 years. To the extent the actual forfeiture rate is different from our original estimate, actual share-based compensation cost related to these awards may be different from our expectation.

We also granted options to consultants and accounted for such options under the fair value method. We amortize share-based compensation expenses over the vesting periods of the related options, which are generally four years long.

The following table sets forth the allocation of our share-based compensation expenses both in absolute amount and as a percentage of total share-based compensation expenses among our employees based on the nature of work which they were assigned to perform.

	2006		For the Year Ended December 31, 2007				2008	
	RMB	%	RMB	%	RMB	US\$	%	
	(In thousands, except percentages)							
Allocation of Share-based Compensation Expenses								
Cost of revenues	1,416	2.9	1,717	4.3	4,542	666	5.4	
Selling, general and administrative	32,970	68.3	17,371	43.6	41,651	6,105	49.6

Total share-based compensation expenses	48,280	100.0	39,848	100.0	83,977	12,309	100.0	

Taxation

Under the current laws of the Cayman Islands and the British Virgin Islands, we and Baidu Holdings are not subject to income or capital gains tax. Under the current laws of Hong Kong, Baidu Hong Kong is exempted from income tax on its foreign-derived income. Additionally, dividend payments made by any of these companies are not subject to withholding tax in those jurisdictions.

PRC Enterprise Income Tax

Pursuant to the applicable PRC tax laws and regulations effective before January 1, 2008, foreign-invested enterprises established in China were generally subject to a state and local enterprise income tax, or EIT, at statutory rates of 30% and 3%, respectively. An enterprise qualified as a high and new technology enterprise and located in a national high-tech development zone was entitled to a preferential EIT rate of 15%. In addition, an enterprise qualified as a high and new technology enterprise located in the Beijing New Technology Industry Development Zone was entitled

to a preferential EIT rate of 15% and would enjoy an exemption from the EIT for the first three years of its establishment and, upon approval, a 50% reduction of the EIT for the succeeding three years.

In 2006, Baidu Online obtained an advanced technology enterprise certificate from the Beijing Municipal Bureau of Commerce, which qualified Baidu Online for a 10% EIT rate from 2006 to 2007, followed by a 15% tax rate so long as it continued to qualify as a high and new technology enterprise. Baidu Times, which was a certified foreign-invested high and new technology enterprise located in Beijing Zhongguancun Science Park (part of the Beijing New Technology Industry Development Zone), was entitled to a three-year exemption from EIT from 2006 to 2008 and a 7.5% EIT rate for another three years from 2009 to 2011, followed by a 15% tax rate so long as it continued to qualify as a high and new technology enterprise. Baidu China was granted software enterprise status by the Shanghai Municipal Information Commission in 2006 and thus was entitled to a full exemption from EIT from 2006 to 2007 and a 50% tax reduction from 2008 to 2010.

Table of Contents

On March 16, 2007, the National People's Congress of China enacted the Enterprise Income Tax Law, or the EIT Law, which became effective on January 1, 2008. On December 6, 2007, the State Council issued the Implementation Rules of the Enterprise Income Tax Law, or the Implementation Rules, which also became effective on January 1, 2008. On December 26, 2007, the State Council issued the Notice on Implementation of Enterprise Income Tax Transition Preferential Policy under the EIT Law, or the Transition Preferential Policy Circular, which became effective simultaneously with the EIT Law.

According to the EIT Law, as further clarified by the Implementation Rules and the Transition Preferential Policy Circular, FIEs and domestic enterprises are subject to EIT at a uniform rate of 25%. The EIT rate of enterprises established before March 16, 2007 that were eligible for preferential tax rate according to then effective tax laws and regulations will gradually transition to the uniform 25% EIT rate by January 1, 2013. In addition, certain enterprises may still benefit from a preferential tax rate of 15% under the EIT Law if they qualify as high and new technology enterprises strongly supported by the State, subject to certain general factors described therein.

Under the Notice on Several Preferential Policies in Respect of Enterprise Income Tax promulgated jointly by the Ministry of Finance and the State Administration of Taxation on February 22, 2008, or the Caishui No. 1 Notice, other than the preferential EIT treatments specified under the EIT Law, the Implementation Rules and certain other tax regulations, all preferential EIT treatments granted prior to January 1, 2008 are eliminated. Accordingly, the preferential tax treatments granted to Baidu Online as an advanced technology enterprise and to Baidu China as a software enterprise were eliminated as of January 1, 2008. However, we have been informed by the Shanghai Pudong State Tax Bureau that Baidu China may continue to enjoy a 50% reduced EIT rate, or a rate of 12.5%, from 2008 to 2010 as a software enterprise.

On April 14, 2008, the Ministry of Science and Technology, the Ministry of Finance and the State Administration of Taxation jointly issued the Administrative Measures on the Recognition of High and New Technology Enterprises, or the Recognition Rules, effective on January 1, 2008. According to the Recognition Rules, the provincial counterparts of the Ministry of Science and Technology, the Ministry of Finance and the State Administration of Taxation shall jointly determine whether an enterprise is qualified as a high and new technology enterprise under the EIT Law. In making such determination, these government agencies shall consider, among other factors, ownership of core technology, whether the products or services fall within the scope of high and new technology strongly supported by the state as specified in the Recognition Rules, the ratios of technical personnel and research and development (R&D) personnel to total personnel, the ratio of R&D expenditures to annual sales revenues, the ratio of revenues attributed to high and new technology products or services to total revenues, and other measures set forth in relevant guidance.

In December 2008, our PRC subsidiaries Baidu Online and Baidu Times were designated by relevant government authorities as high and new technology enterprise under the EIT Law. In February 2009, Baidu Online and Baidu Times received the high and new technology enterprise certificates jointly issued by the Beijing Municipal Science and Technology Commission, the Beijing Finance Bureau, and the Beijing State and Local Tax Bureaus. Therefore, Baidu Online and Baidu Times are entitled to enjoy a preferential tax rate of 15% as long as they maintain their qualification as high and new technology enterprises under the EIT Law. In addition, Baidu Times will continue to benefit from the remaining tax holidays granted to it under the applicable PRC tax laws and regulations effective before January 1, 2008.

If Baidu Online or Baidu Times fails to maintain the high and new technology enterprise qualification under the EIT Law, or if favorable tax treatment granted to Baidu China by local tax authorities for 2008 to 2010 becomes unavailable, their tax rates will be increased, which could have a material adverse effect on our results of operations.

Under the EIT Law and the Implementation Rules, dividends, interests, rent or royalties payable by an FIE, such as our PRC subsidiaries, to any of its foreign non-resident enterprise investors, and proceeds from the disposition of

assets (after deducting the net value of such assets) by such foreign enterprise investor, shall be subject to a 10% withholding tax unless such foreign enterprise investor's jurisdiction of incorporation has a tax treaty with China that provides for a reduced rate of withholding. The Caishui No. 1 Notice issued on February 22, 2008 further clarifies that undistributed profits earned by FIEs prior to January 1, 2008 will be exempted from any withholding tax. The British Virgin Islands, where our wholly-owned subsidiary Baidu Holdings, which is the sole

Table of Contents

shareholder of our PRC subsidiary Baidu Online, is incorporated, does not have such a tax treaty with China. Baidu Hong Kong, our wholly-owned subsidiary and the sole shareholder of our PRC subsidiaries Baidu China and Baidu Times, was incorporated in Hong Kong, which has a tax treaty with China that provides for a lower withholding tax rate of 5%.

Our PRC subsidiaries historically have not paid dividends to us. If they declare and distribute dividends to us in the future, such dividend payments will be subject to withholding tax, which will increase our tax liability and reduce the amount of cash available to our company.

Under the EIT Law and the Implementation Rules, an enterprise established outside of the PRC with de facto management bodies within the PRC is considered a resident enterprise and will be subject to the EIT at the rate of 25% on its worldwide income payable to the tax authority where such de facto management bodies locate. The Implementation Rules define the term de facto management bodies as establishments that carry out substantial and overall management and control over the manufacturing and business operations, personnel, accounting, properties, etc. of an enterprise. If we are deemed a resident enterprise, we may be subject to the EIT at 25% on our global income, except that the dividends we receive from our PRC subsidiary may be exempt from the EIT to the extent such dividends are deemed dividends among qualified resident enterprises. If we are considered a resident enterprise and earn income other than dividends from our PRC subsidiaries, a 25% EIT on our global income could significantly increase our tax burden and materially and adversely affect our cash flow and profitability.

The EIT Law and the Implementation Rules have made an effort to scrutinize transactions between related parties. Pursuant to the EIT Law and the Implementation Rules, the tax authorities may impose mandatory adjustment on tax due to the extent a related party transaction is not in line with arm's-length principle or was entered into with a purpose to reduce, exempt or delay the payment of tax. On January 8, 2009, the State Administration of Taxation issued the Implementation Measures for Special Tax Adjustments (Trial). The measures set forth tax-filing disclosure and documentation requirements, clarify the definition of related party, guide the selection and application of transfer pricing methods, and outline the due process procedures for transfer pricing investigation and assessment.

If Baidu Online, Baidu Times or Baidu China no longer qualifies for the preferential tax treatment, we will consider available options under applicable law that would enable us to qualify for further preferential tax treatment. To the extent we are unable to offset the impact of the expiration of Baidu Online's, Baidu Times' or Baidu China's preferential tax treatment with new tax exemptions, tax incentives or other tax benefits, the expiration of their preferential tax treatment may cause our effective tax rate to increase. The amount of income tax payable by our PRC subsidiaries in the future will depend on various factors, including, among other things, the results of operations and taxable income of, and the statutory tax rate applicable to, each of the subsidiaries. Our effective tax rate depends partially on the extent of the relative contribution of each of our subsidiaries to our consolidated taxable income. In 2007 and 2008, our consolidated effective tax rate was -2.1% and 9.97%, respectively.

If P4P were classified as a form of advertising in the future, we may have to conduct our P4P business through Baidu Netcom in order to comply with PRC laws and regulations that limit foreign ownership of online advertising companies. As a result, our consolidated effective tax rate would increase, as Baidu Netcom is subject to a 25% statutory enterprise income tax rate as of the date of this annual report.

PRC Business Tax

Revenues from our P4P services are subject to a 5% PRC business tax. Revenues from our online advertising services are subject to business taxes, surcharges and cultural business construction fees totaling approximately 8.5% of the online advertising revenues. Revenues from our other services are also subject to a 5% business tax.

PRC Value-added Tax

Other than providing online marketing services, Baidu Online sold proprietary software before July 2006, which was subject to PRC value-added tax, or VAT. In July 2006, we decided to phase out the enterprise search

Table of Contents

software business. Since the phase-out of this business has been completed, Baidu Online is no longer subject to the VAT relating to software sales.

Results of Operations

The following table sets forth a summary of our consolidated results of operations for the periods indicated. Our business has evolved rapidly since we commenced operations in 2000. Our limited operating history makes it difficult to predict future operating results. We believe that period-to-period comparisons of operating results should not be relied upon as indicative of future performance.

Year Ended December 31, 2008 Compared to Year Ended December 31, 2007

Revenues. Our total revenues increased by 83.3% from RMB1.7 billion in 2007 to RMB3.2 billion (US\$468.8 million) in 2008. This increase was primarily due to a substantial increase in our revenues from online marketing services. Our online marketing revenues increased by 83.5% from RMB1.7 billion in 2007 to RMB3.2 billion (US\$468.2 million) in 2008. This increase was mainly attributable to the increase in the number of our online marketing customers from approximately 214,000 in 2007 to over 284,000 in 2008, and the increase in the average revenue per customer from approximately RMB8,100 in 2007 to approximately RMB11,200 (US\$1,642) in 2008. The increase in our online marketing customers was mainly due to our effective distribution network and our expanded direct sales, especially in Beijing, Shanghai, Guangzhou and Shenzhen. The increase in the average revenue per customer was primarily attributable to the increase in the number of paid clicks, and the

Table of Contents

higher price per click as more customers participated in our P4P auction platform. The number of paid clicks increased by approximately 48% from 2007 to 2008.

Operating Costs and Expenses. Our total operating costs and expenses increased by 75.5% from RMB1.2 billion in 2007 to RMB2.1 billion (US\$308 million) in 2008. This increase was primarily due to the expansion of our business.

Cost of Revenues. Our cost of revenues increased by 79.0% from RMB645.4 million in 2007 to RMB1.2 billion (US\$169.4 million) in 2008. This increase was primarily due to the following factors:

Traffic Acquisition Costs. Our traffic acquisition costs increased by 104.4% from RMB204.7 million in 2007 to RMB418.5 million (US\$61.3 million) in 2008. This was primarily due to the growth of revenue contribution from our Baidu Union members.

Bandwidth Costs and Depreciation Expenses. Our bandwidth costs increased by 52.0% from RMB117.6 million in 2007 to RMB178.7 million (US\$26.2 million) in 2008. Our depreciation expenses of servers and other computer hardware increased by 53.5% from RMB147.1 million in 2007 to RMB225.8 million (US\$33.1 million) in 2008. The absolute increases in these costs were due to the expansion of our business. However, these costs in 2008 accounted for a lower percentage of total revenues than in 2007. The decreases in bandwidth costs and depreciation expenses as percentages of total revenues reflect our improved efficiency as well as increased scalability of capital expenditures.

Business Tax and Surcharges. Our business tax and surcharges increased by 83.9% from RMB108.8 million in 2007 to RMB200.1 million (US\$29.3 million) in 2008, primarily as a result of increase in our online marketing revenues.

Operational Expenses. Our operational expenses increased by 95.1% from RMB65.5 million in 2007 to RMB127.9 million (US\$18.7 million) in 2008, primarily due to the increase in the number and compensation levels of our operating and technical support employees to meet the needs of our growing operations.

Selling, General and Administrative Expenses. Our selling, general and administrative expenses increased by 60.5% from RMB411.2 million in 2007 to RMB659.8 million (US\$96.7 million) in 2008. This increase was primarily due to the following factors:

total salaries and benefits and staff-related expenses increased by 61.8% from RMB218.7 million in 2007 to RMB353.8 million (US\$51.9 million) in 2008, primarily due to the increased direct sales and administrative headcount to support our expanded online marketing services;

share-based compensation expenses allocated to selling, general and administrative expenses increased by 139.8% from RMB17.4 million in 2007 to RMB41.7 million (US\$6.1 million) in 2008 primarily due to share-based awards granted to the new senior management personnel hired in 2008;

total office operating expenses increased by 37.6% from RMB56.1 million in 2007 to RMB77.2 million (US\$11.3 million) in 2008, as a result of increase and expansion of our direct sales offices;

total traveling, communication and entertainment expenses increased by 46.6% from RMB16.3 million in 2007 to RMB23.9 million (US\$3.5 million) in 2008, primarily due to the increased administrative and direct sales headcount and activities to support our expanded online marketing services; and

Research and Development Expenses. Our research and development expenses increased by 103.4% from RMB140.7 million in 2007 to RMB286.3 million (US\$42.0 million) in 2008, primarily due to an increase in the number and compensation levels of research and development staff.

Operating Profit. As a result of the foregoing, we generated an operating profit of RMB1.1 billion (US\$160.8 million) in 2008, a 100.4% increase from 2007.

Taxation. Our income tax expenses were RMB116.1 million (US\$17.0 million) in 2008, compared to an income tax benefit of RMB12.8 million in 2007. The income tax expenses in 2008 were primarily due to one of our PRC subsidiaries being subject to an EIT rate of 12.5% in 2008, after the expiration of its full exemption from the

Table of Contents

EIT. Our income tax benefit in 2007 was primarily due to receipt of an incentive tax refund of RMB21.2 million arising from capital reinvestment in one of our PRC subsidiaries.

Other income, net, including exchange gains or losses. Our other income, net, including exchange gains or losses was RMB19.8 million (US\$2.9 million) in 2008, compared to RMB20.1 million in 2007.

Net Income. As a result of the foregoing, we had net income of RMB1.0 billion (US\$153.6 million) in 2008, a 66.6% increase from RMB629.0 million in 2007.

Year Ended December 31, 2007 Compared to Year Ended December 31, 2006

Revenues. Our total revenues increased by 108.2% from RMB837.8 million in 2006 to RMB1.7 billion in 2007. This increase was primarily due to a substantial increase in our revenues from online marketing services. Our online marketing revenues increased by 110.1% from RMB828.5 million in 2006 to RMB1.7 billion in 2007. This increase was mainly attributable to the increase in the number of our online marketing customers from approximately 143,000 in 2006 to over 214,000 in 2007, and the increase in the average revenue per customer from approximately RMB5,800 in 2006 to approximately RMB8,100 in 2007. The increase in our online marketing customers was mainly due to our effective distribution network and our expanded direct sales, especially in Beijing, Shanghai, Guangzhou and Shenzhen. The increase in the average revenue per customer was primarily attributable to the increase in the number of paid clicks, and the higher price per click as more customers participated in our P4P auction platform. The number of paid clicks increased by 77.6% from 2006 to 2007.

Operating Costs and Expenses. Our total operating costs and expenses increased by 108.2% from RMB575.0 million in 2006 to RMB 1.2 billion in 2007. This increase was primarily due to increases in our cost of revenues, and, to a lesser extent, an increase in our selling, general and administrative expenses as well as research and development expenses.

Cost of Revenues. Our cost of revenues increased by 162.9% from RMB245.5 million in 2006 to RMB645.4 million in 2007. This increase was primarily due to the following factors:

Business Tax and Surcharges. Our business tax and surcharges increased by 109.9% from RMB51.8 million in 2006 to RMB108.8 million in 2007, primarily as a result of increase in our online marketing revenues.

Traffic Acquisition Costs. Our traffic acquisition costs increased by 172.3% from RMB75.2 million in 2006 to RMB204.7 million in 2007. This was primarily due to the growth of revenue contribution from our Baidu Union members.

Bandwidth Costs. Our bandwidth costs increased by 193.8% from RMB40.0 million in 2006 to RMB117.6 million in 2007, as a result of increased bandwidth to support increased traffic in our existing market in China and the new Japan market.

Depreciation Expenses of Servers and Other Equipment. Our depreciation expenses of servers and other computer hardware increased by 185.3% from RMB51.6 million in 2006 to RMB147.1 million in 2007, as we acquired more servers, network equipment and computer hardware to meet increased user traffic and accommodate growing online marketing services.

Operational Expenses. Our operational expenses increased by 157.2% from RMB25.5 million in 2006 to RMB65.5 million in 2007, primarily due to the increase in the number and compensation levels of our operating and technical support employees to meet the needs of our growing operations.

Selling, General and Administrative Expenses. Our selling, general and administrative expenses increased by 64.3% from RMB250.2 million in 2006 to RMB411.2 million in 2007. This increase was primarily due to the following factors:

total salaries and benefits and staff-related expense increased by 96.0% from RMB111.6 million in 2006 to RMB218.7 million in 2007, primarily due to the increased direct sales and administrative headcount to support our expanded online marketing services;

Table of Contents

total office operating expenses increased by 69.2% from RMB33.2 million in 2006 to RMB56.1 million in 2007, as a result of increase and expansion of our direct sales offices; and

total traveling, communication and entertainment expenses increased by 58.1% from RMB10.3 million in 2006 to RMB16.3 million in 2007, primarily due to the increased administrative and direct sales headcount to support our expanded online marketing services.

The above increases were offset by a 47.3% decrease in share-based compensation expenses for staff performing selling, general and administrative functions from RMB33.0 million in 2006 to RMB17.4 million in 2007, primarily due to a decrease in the amount of share-based awards granted.

Research and Development Expenses. Our research and development expenses increased by 77.6% from RMB79.2 million in 2006 to RMB140.7 million in 2007, primarily as a result of the increased headcount and increased compensation levels.

Operating Profit. As a result of the foregoing, we generated an operating profit of RMB547.2 million in 2007, a 108.1% increase from 2006.

Taxation. Our income tax benefit was RMB12.8 million in 2007, which was primarily due to our receipt of an incentive tax refund of RMB21.2 million arising from capital reinvestment in one of our PRC subsidiaries in the fourth quarter of 2007.

Other income, net, including exchange gains or losses. The increase in 2007 was due primarily to our receipt of RMB14.6 million in government subsidies in 2007.

Cumulative effect of change in accounting principle. The cumulative benefit of RMB4.6 million in 2006 was due to the adoption of SFAS 123R, which reflects the net cumulative impact of estimating future forfeitures for the options granted in the third and fourth quarters of 2005. There was no cumulative effect in adopting FIN 48.

Net Income. As a result of the foregoing, we had net income of RMB629.0 million in 2007, a 108.4% increase compared to net income of RMB301.8 million in 2006.

Inflation

Inflation in China has not materially impacted our results of operations. According to the National Bureau of Statistics of China, the change of consumer price index in China was 1.6%, 4.8% and 5.9% in 2006, 2007 and 2008, respectively. Although we were not materially affected by inflation in the past, we can provide no assurance that we will not be affected in the future by potentially higher rates of inflation in China. For example, certain operating costs and expenses, such as employee compensation and office operating expenses may increase as a result of higher inflation. Additionally, because a substantial portion of our assets consists of cash and cash equivalents and short-term investments, high inflation could significantly reduce the value and purchasing power of these assets. We are not able to hedge our exposure to higher inflation in China.

Foreign Currency

The average exchange rate between U.S. dollar and RMB has declined from RMB8.2264 per U.S. dollar in July 2005 to RMB6.8539 per U.S. dollar in December 2008. The functional currency of our subsidiaries in Japan is the Japanese yen, and their reporting currency is RMB. During 2008, the Japanese yen appreciated by approximately 15% against

RMB. As of December 31, 2008, we recorded RMB27.6 million (US\$4.0 million) of net foreign currency translation loss in accumulated other comprehensive loss as a component of shareholders' equity. We have not hedged exposures to exchange fluctuations using any hedging instruments. See also Item 3D. Key Information Risk Factors Risks Related to Doing Business in China Fluctuation in the value of the RMB may have a material adverse effect on your investment. and Item 11. Quantitative and Qualitative Disclosures About Market Risk Foreign Exchange Risk.

Table of Contents

Critical Accounting Policies

We prepare financial statements in accordance with U.S. GAAP, which requires us to make judgments, estimates and assumptions that affect the reported amounts of our assets and liabilities and the disclosure of our contingent assets and liabilities at the end of each fiscal period and the reported amounts of revenues and expenses during each fiscal period. We continually evaluate these judgments and estimates based on our own historical experience, knowledge and assessment of current business and other conditions, our expectations regarding the future based on available information and assumptions that we believe to be reasonable, which together form our basis for making judgments about matters that are not readily apparent from other sources. Since the use of estimates is an integral component of the financial reporting process, our actual results could differ from those estimates. Some of our accounting policies require a higher degree of judgment than others in their application.

The selection of critical accounting policies, the judgments and other uncertainties affecting application of those policies and the sensitivity of reported results to changes in conditions and assumptions are factors that should be considered when reviewing our financial statements. For further information on our significant accounting policies, see Note 2 to our consolidated financial statements. We believe the following accounting policies involve the most significant judgments and estimates used in the preparation of our financial statements.

Revenue Recognition

We recognize revenues based on the following principles:

Online Marketing Services

(1) Auction-based P4P Services

Our auction-based P4P platform enables a customer to place its website link and related description on our search result list. The customers make bids to determine how much they are willing to pay for each click to their listings in the search results listed on our website. The amount of the customer's bid will influence the ranking of the customer's listing in the search results. The customer pays us only when a user clicks on one of its website links. Revenue is recognized when a user clicks on one of the customer-sponsored website links, there is persuasive evidence of an arrangement, the fee is fixed or determinable and collection is reasonably assured, as prescribed by SEC Staff Accounting Bulletin No. 104, or SAB 104.

For certain P4P customers engaged through direct sales, we may provide certain value-added consultative services to help our customers better utilize its P4P online marketing system. Fees for such services are recognized as revenue on a pro-rata basis over the contracted service period.

(2) Other Performance-based Online Marketing Services

To the extent we provide online marketing services based on performance criteria other than click-throughs, such as the number of telephone calls brought to our customers, the number of users registered with our customers, or the minimum number of click-throughs, revenue is recognized when the specified performance criteria are met together with satisfaction of other applicable revenue recognition criteria as prescribed by SAB 104.

(3) Time-based Online Advertising Services

For time-based online advertising services such as text links, banners or other forms of graphical advertisements, we recognize revenue, in accordance with SAB 104, on a pro-rata basis over the contractual term commencing on the date

the customer's advertisement is displayed in a specified webpage. For certain time-based contractual agreements, we may also provide certain performance guarantees, in which cases revenue is recognized at the later of the completion of the time commitment or performance guarantee.

(4) Online Marketing Services Involving Baidu Union

Baidu Union is the program through which we expand distribution of our customers' sponsored links or advertisements by leveraging traffic of the Baidu Union members' Internet properties. We make payments to Baidu

Table of Contents

Union members for acquisition of traffic. We recognize gross revenue for the amount of fees we receive from our customers. Payments made to Baidu Union members are included in cost of revenues as traffic acquisition costs.

(5) Barter Transactions

We may engage in barter transactions from time to time and in such situations follow the provisions of Accounting Principles Board No. 29, *Accounting for Nonmonetary Transactions*. While nonmonetary transactions are generally recorded at fair value, if such value is not determinable within reasonable limits, we recognize the transaction based on the carrying value of the product or services we provide. The amount of revenues recognized for barter transactions was insignificant for each of the periods presented.

In addition, we recognized revenues for barter transactions involving advertising in accordance with Emerging Issues Task Force, or EITF 99-17, *Accounting for Advertising Barter Transactions*. However, neither the amount recognized nor the volume of such transactions not qualified for income recognition was material for any of the periods presented.

According to EITF 00-8, *Accounting by a Grantee for an Equity Instrument to Be Received in Conjunction with Providing Goods or Services*, if we provide services in exchange for equity instruments, we are required to measure the fair value of those equity instruments for revenue recognition purposes as of the earlier of either of the following dates:

The date the parties come to a mutual understanding of the terms of the equity-based compensation arrangement and a commitment for performance by us to earn the equity instruments is reached; or

The date at which our performance necessary to earn the equity instruments is completed.

If as of the measurement date, the fair value of the equity instruments received is not determinable within reasonable limits, the transaction is recognized based on the fair value of the services provided. If the fair value of both the equity instruments received and the services provided cannot be determined, no revenue is to be recognized for the services provided and the equity instrument received is to be recorded at zero carrying value. The amount of revenues recognized for such transactions was not material for any of the years presented.

(6) Other Revenue Recognition Related Policies

If a sales contract stipulates more than one of the services described in (1), (2) and (3), and the services are considered as multiple accounting units in accordance with EITF 00-21, *Revenue Arrangements with Multiple Deliverables*, the total revenue on such arrangements is allocated to the individual deliverables based on their relative fair values. If sufficient vendor-specific objective evidence of fair value does not exist for the allocation of revenue, the fee for the entire arrangement is recognized ratably over the term of the arrangement.

We engage third party distributors to deliver some of our online marketing services to end customers. In this context, we may provide cash incentives to distributors. The cash incentives are accounted for as a reduction of revenue in accordance with EITF 01-9, *Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products)*.

Cash received in advance from customers is recorded as customer deposits. The unused cash balances remaining in customers' accounts are included as a liability of our company. Deferred revenue is recorded when the services are provided before the applicable revenue recognition criteria set forth in SAB 104 are fulfilled.

Share-based Compensation Expenses

We account for share-based compensation in accordance with SFAS No. 123R, *Share-Based Payment*, or SFAS 123R. Under the provisions of SFAS 123R, share-based compensation cost is estimated at the grant date based on the award's fair value as calculated by the Black-Scholes-Merton (BSM) option-pricing model and is recognized as expense over the requisite service period. The BSM model requires various highly judgmental assumptions including volatility and expected option life. If any of the assumptions used in the BSM model change significantly, share-based compensation expense may differ materially in the future from that recorded in the current period. In addition, we are required to estimate the expected forfeiture rate and only recognize expense for

Table of Contents

those shares expected to vest. We estimate the forfeiture rate based on historical experience. Further, to the extent our actual forfeiture rate is different from our estimate, stock-based compensation expense is adjusted accordingly.

Income Taxes

We are subject to income taxes in the PRC and Japan. Significant judgment is required in evaluating our uncertain tax positions and determining our provision for income taxes.

The Financial Accounting Standard Board Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* an interpretation of FASB Statement No. 109, or FIN 48, contains a two-step approach to recognizing and measuring uncertain tax positions accounted for in accordance with Statement of Financial Accounting Standards No. 109, *Accounting for Income Taxes*, or SFAS 109. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely of being realized upon settlement.

Although we believe we have adequately reserved for our uncertain tax positions, no assurance can be given that the final tax outcome of these matters will not be different. In general, tax filings within the last five years are subject to examination by the PRC and Japanese tax authorities. Accordingly, our PRC subsidiaries and affiliated entities tax filings for the tax years 2004 to 2008 and our Japanese subsidiary's tax filings for the tax years 2006 to 2008 remain open to examination by the respective taxing jurisdictions.

We do not believe that net deferred tax assets related with our Japan and Hong Kong operations are more likely than not to be realized. Consequently, we have provided full valuation allowances on the related net deferred tax assets.

Allowance for Doubtful Accounts

Accounts receivable are recognized and carried at original invoiced amount less an allowance for any potential uncollectible amounts. An estimate for doubtful debts is made when collection of the full amount is no longer probable. Bad debts are written off as incurred. We generally do not require collateral from our customers.

We maintain allowances for doubtful accounts for estimated losses resulting from the failure of customers to make payments on time. We review the accounts receivable on a periodic basis and make general and specific allowances when there is doubt as to the collectibility of individual balances. In evaluating the collectibility of individual receivable balances, we consider many factors, including the age of the balance, the customer's past payment history, its current credit-worthiness and current economic trends.

Impairment of Long-Lived Assets

We evaluate long-lived assets, such as property and equipment and purchased or internally developed intangible assets with finite lives, for impairment whenever events or changes in circumstances indicate the carrying value of an asset may not be recoverable in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. We assess the recoverability of an asset group based on the undiscounted future cash flows the asset group is expected to generate and recognize an impairment loss when the estimated undiscounted future cash flows expected to result from the use of the asset group plus net proceeds expected from the disposition of the asset group, if any, are less than the carrying value of the asset group. If we identify an impairment, we reduce the carrying amount of the asset group to its estimated fair value based on a discounted cash flow approach or, when available and appropriate, to comparable market values. We use estimates and judgments in our impairment tests and if different estimates or judgments had been utilized, the timing or the amount of any impairment charges could be different.

Impairment of Goodwill and Intangible Assets with Indefinite Life

We assess goodwill and non-amortized intangible assets for impairment in accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*, which requires that goodwill and non-amortized intangible assets be tested for impairment at the reporting unit level at least annually and more frequently upon the occurrence of certain

Table of Contents

events, as defined by SFAS No. 142. Intangible assets with an indefinite useful life are not amortized. In accordance with this policy, one of the domain name assets, which was acquired in July 2006, and the Baidu trademark are not subject to amortization, as the remaining useful life is indefinite. Based on our business activities and operational management perspective, we have determined that there is only one reporting unit. Goodwill and non-amortized intangible assets were tested for impairment in the annual impairment tests on December 31 in each of the years 2006, 2007, and 2008 using the two-step process required by SFAS No. 142. First, we reviewed the carrying amount of the reporting unit compared to the fair value of the reporting unit based on quoted market prices of our ordinary shares. If such comparison reflected potential impairment, we would then prepare the discounted cash flow analyses. Such analyses are based on cash flow assumptions that are consistent with the plans and estimates being used to manage the business. An excess of the carrying value of the goodwill over the fair value of the goodwill would indicate that the goodwill may be impaired. Finally, if we determined that goodwill may be impaired, the implied fair value of the goodwill, as defined by SFAS No. 142, would be compared to its carrying amount to determine the impairment loss, if any. There has been no impairment of goodwill in any of the years presented.

Recent Accounting Pronouncements

In December 2007, the Financial Accounting Standard Board, or FASB, issued SFAS Statement No. 141 (revised 2007), *Business Combinations*, or SFAS 141R. This statement establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, any non-controlling interest in the acquiree and the goodwill acquired. SFAS 141R also establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. SFAS 141R is effective for fiscal years beginning on or after December 15, 2008. The impact of the adoption of SFAS 141R on our consolidated results of operations and financial condition will be largely dependent on the size and nature of the business combinations completed after the adoption of this statement.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51*, or SFAS 160. This statement affects the entities that have an outstanding non-controlling interest in one or more subsidiaries or that deconsolidate a subsidiary. SFAS 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. We do not expect that the adoption of SFAS 160 will have a material impact on our consolidated results of operations and financial condition.

In February 2008, the FASB issued FASB Staff Position, or FSP, No. FAS 157-1, *Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements for Purposes of Lease Classification or Measurement under Statement 13* and FSP No. 157-2, *Effective Date of FASB Statement No. 157*, which collectively remove certain leasing transactions from the scope of SFAS 157 and partially delay the effective date of SFAS 157 for one year for certain non-financial assets and liabilities. In October 2008, the FASB issued FSP No. 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active*, which clarifies the application of SFAS No. 157 in an inactive market and illustrates how an entity would determine fair value when the market for a financial asset is not active. We do not expect that the adoption of FSP No. 157-1, FSP No. 157-2 and FSP No. 157-3 will have a material impact on our consolidated results of operations and financial condition.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133*, or SFAS 161. SFAS 161 applies to all derivative instruments and related hedged items accounted for under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, or SFAS 133. SFAS 161 requires entities to provide greater transparency about how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under SFAS 133 and its related interpretations, and how derivative instruments and related hedged items affect an entity's financial position, results of

operations and cash flows. SFAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. We do not expect the adoption of SFAS 161 to have any material effect on our consolidated results of operations and financial condition.

In April 2008, the FASB issued FSP No. FAS 142-3, *Determination of the Useful Life of Intangible Assets*, or FSP 142-3. FSP142-3 amends the factors an entity should consider in developing renewal or extension assumptions

Table of Contents

used in determining the useful life of recognized intangible assets under SFAS 142, and applies to (1) intangible assets that are acquired individually or with a group of other assets and (2) both intangible assets acquired in business combinations and asset acquisitions. FSP 142-3 also requires entities to disclose information for all intangible assets, recognized as of and subsequent to the effective date of FSP 142-3 to provide effects of the entity's intent or ability to renew or extend the arrangement associated with the intangible assets on expected cash flows associated with the intangible assets. FSP 142-3 is effective for intangible assets acquired after December 15, 2008 and early application is prohibited. We are currently evaluating whether the adoption of FSP 142-3 will have a significant effect on our consolidated results of operations and financial condition.

In May 2008, the FASB issued SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles*, or SFAS 162. SFAS 162 identifies the sources of accounting principles and the framework for selecting the principles used in the preparation of financial statements of nongovernmental entities that are presented in conformity with U.S. GAAP (the GAAP hierarchy). SFAS 162 became effective November 15, 2008. We do not expect the adoption of SFAS 162 to have a material effect on our consolidated results of operations and financial condition.

In June 2008, the EITF issued EITF Issue No. 07-5, *Determining Whether an Instrument (or Embedded Feature) Is Indexed to an Entity's Own Stock*, or EITF 07-5. EITF 07-5 clarifies the determination of whether an instrument (or an embedded feature) is indexed to an entity's own stock, which would qualify as a scope exception under SFAS 133, *Accounting for Derivative Instruments and Hedging Activities*. EITF 07-5 is effective for financial statements issued for fiscal years beginning after December 15, 2008. EITF 07-5 does not permit early adoption for an existing instrument. We do not expect the adoption of EITF 07-5 will have a material effect on our consolidated results of operations and financial condition.

In June 2008, the FASB issued FSP EITF Issue No. 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities*, or FSP EITF 03-6-1. FSP EITF 03-6-1 clarifies that share-based payment awards that entitle their holders to receive non-forfeitable dividends or dividend equivalents before vesting should be considered participating securities. FSP EITF 03-6-1 is effective for fiscal years beginning after December 15, 2008 on a retrospective basis. We have not granted any share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents before vesting since incorporation. We are currently evaluating the potential impact, if any, of the adoption of FSP EITF 03-6-1 on our consolidated results of operations and financial condition.

In November 2008, the FASB ratified EITF Issue No. 08-7, *Accounting for Defensive Intangible Assets*, or EITF 08-7. EITF 08-7 applies to defensive intangible assets, which are acquired intangible assets that the acquirer does not intend to actively use but intends to hold to prevent its competitors from obtaining access to them. As these assets are separately identifiable, EITF 08-7 requires an acquiring entity to account for defensive intangible assets as a separate unit of accounting. Defensive intangible assets must be recognized at fair value in accordance with SFAS 141R and SFAS 157. EITF 08-7 is effective for defensive intangible assets acquired in fiscal years beginning on or after December 15, 2008. We are currently evaluating the potential impact, if any, of the adoption of EITF 08-7 on our consolidated results of operations and financial condition.

B. Liquidity and Capital Resources

Our principal sources of liquidity are our cash, cash equivalents and short-term investments, which comprise primarily of fixed rate and adjustable rate fixed income investments maturing within one year, as well as the cash flow generated from our operations. We believe that our current cash, cash equivalents, short-term investments and anticipated cash flow from operations will be sufficient to meet our anticipated cash needs, including our cash needs for working capital and capital expenditures for at least the next 12 months. We may, however, require additional cash due to changing business conditions or other future developments, including any investments or acquisitions we may

decide to pursue. If our existing cash is insufficient to meet our requirements, we may seek to sell additional equity securities, debt securities or borrow from banks.

Table of Contents***Cash Flows and Working Capital***

The following table sets forth a summary of our cash flows for the periods indicated:

	For the Year Ended December 31,			US\$
	2006	2007	2008	
	RMB	RMB	RMB	
	(In thousands)			
Net cash generated from operating activities	440,805	935,152	1,746,199	255,948

Operating Activities

Net cash generated from operating activities increased to RMB1.7 billion (US\$255.9 million) in 2008 from RMB935.2 million in 2007. This increase was mainly attributable to several factors, including (i) the substantial increase in net income to RMB1.0 billion (US\$153.6 million) in 2008 compared to net income of RMB629.0 million in 2007; (ii) the increase in add-back of non-cash expenses, mainly consisting of share-based compensation and depreciation expenses; (iii) the increase in customer deposits resulting from the increased number of P4P customers; and (iv) the increase in accrued expenses and other liabilities, partially offset by an increase of RMB47.8 million (US\$7.0 million) in other non-current assets primarily due to deposits for new offices we rent.

Net cash generated from operating activities increased to RMB935.2 million in 2007 from RMB440.8 million in 2006. This increase was mainly attributable to several factors, including (i) the substantial increase in net income to RMB629.0 million in 2007 compared to net income of RMB301.8 million in 2006; (ii) the increase in add-back of non-cash expenses, mainly consisting of share-based compensation and depreciation expenses; (iii) the increase in customer deposits resulting from the increased number of P4P customers; and (iv) the increase in accrued expenses and other liabilities, partially offset by an increase of RMB24.6 million in other non-current assets primarily due to deposits for new offices we rent.

Investing Activities

Net cash used in investing activities decreased from RMB713.2 million in 2007 to RMB661.1 million (US\$96.9 million) in 2008, primarily due to less spending on acquisition of fixed assets and no further spending on land use right for our new corporate headquarters in 2008.

Net cash used in investing activities increased from RMB208.9 million in 2006 to RMB713.2 million in 2007, primarily due to our purchase of additional servers in China and Japan, cash used in acquisitions (including

investments in several privately held entities for less than 5% of equity interests in each of these entities), investment in marketable securities, additional payment for the acquisition of the land use right for our new corporate headquarters, and investment in connection with the construction of the corporate headquarters.

Financing Activities

Net cash outflow from financing activities was RMB35.6 million (US\$5.2 million) in 2008, compared to a net cash inflow of RMB40.7 million in 2007, primarily due to an upfront cash payment of US\$10 million made under a structured share repurchase transaction entered into in December 2008, partially offset by the proceeds received from exercise of our share options in 2008. Net cash inflow from financing activities increased to RMB40.7 million in 2007 from RMB32.2 million in 2006 due to the net proceeds received from the exercise of our share options in 2007.

Table of Contents

We are a holding company with no operations of our own. We conduct our operations in China primarily through our indirect wholly-owned subsidiaries, Baidu Online, Baidu China and Baidu Times, and our consolidated affiliated entities, Baidu Netcom and Beijing Perusal. As a result, our ability to pay dividends and to finance any debt we may incur depends upon dividends paid by Baidu Online, Baidu China and Baidu Times and license and service fees paid by Baidu Netcom and Beijing Perusal. If Baidu Online, Baidu China, Baidu Times or any newly formed subsidiaries incur debt on their own behalf in the future, the instruments governing their debt may restrict their ability to pay dividends to us. In addition, our PRC subsidiaries are permitted to pay dividends to us only out of their retained earnings, if any, as determined in accordance with PRC accounting standards and regulations. Under PRC law, our subsidiaries and affiliated entities in the PRC are required to set aside at least 10% of their after-tax profit each year to fund a statutory reserve fund until the amount of the reserve fund reaches 50% of such entity's registered capital. Although these statutory reserve funds can be used, among other ways, to increase the registered capital and eliminate future losses in excess of retained earnings of the respective companies, these reserve funds are not distributable as cash dividends except in the event of a solvent liquidation of the companies. See Note 14 to our consolidated financial statements.

Capital Expenditures

We made capital expenditures of RMB127.5 million, RMB569.1 million and RMB417.9 million (US\$61.3 million) in 2006, 2007 and 2008, respectively, representing 15.2%, 32.6% and 13.1% of our total revenues, respectively. Our capital expenditures were used primarily to purchase servers, network equipment and other computer hardware for our business, the acquisition of the land use right and the construction for our new corporate headquarters. We funded our capital expenditures primarily with net cash flow from operating activities.

In late 2005, we entered into an agreement to acquire the land use right in Beijing to build our new corporate headquarters with a floor space of approximately 44,000 square meters. The floor space was increased to 59,000 square meters in 2006. We made a total payment of RMB97.6 million for the land use right. We have obtained necessary governmental approvals for the proposed development and use of the land, and our new office building is currently under construction. Our capital expenditures in connection with construction of our office building were RMB102.1 million in 2007 and RMB172.3 million (US\$25.3 million) in 2008, excluding the above-mentioned payment for land use right. Our capital expenditures may increase substantially in the near term as our business continues to grow and as we expand and improve our network infrastructure.

C. Research and Development

We have a team of experienced engineers who are mostly based at our headquarters in Beijing. We recruit most of our engineers locally and have established various recruiting and training programs with leading universities in China. We have also recruited experienced engineers from overseas. We compete aggressively for engineering talent to help us address challenges such as Chinese language processing, information retrieval and high performance computing. In each of the three years ended December 31, 2006, 2007 and 2008, our research and development expenditures, including share-based compensation expenses for research and development staff, were RMB79.2 million, RMB140.7 million and RMB286.3 million (US\$42.0 million), representing 9.5%, 8.1% and 9.0% of our total revenues for 2006, 2007 and 2008, respectively.

D. Trend Information

Other than as disclosed elsewhere in this annual report, we are not aware of any trends, uncertainties, demands, commitments or events for the year ended December 31, 2008 that are reasonably likely to have a material adverse effect on our net revenues, income, profitability, liquidity or capital resources, or that would cause the disclosed financial information to be not necessarily indicative of future operating results or financial conditions.

E. Off-Balance Sheet Arrangements

We have not entered into any financial guarantees or other commitments to guarantee the payment obligations of any third parties. We have not entered into any off-balance sheet derivative instruments. Furthermore, we do not have any retained or contingent interest in assets transferred to an unconsolidated entity that serves as credit,

Table of Contents

liquidity or market risk support to such entity. We do not have any variable interest in any unconsolidated entity that provides financing, liquidity, market risk or credit support to us or engages in leasing, hedging or research and development services with us.

F. Contractual Obligations

The following table sets forth our contractual obligations as of December 31, 2008:

	Total	Payment Due by Period			
		Less than 1 Year (in RMB thousands)	1-3 Years	3-5 Years	More than 5 Years
Operating lease obligations(1)	328,728	194,665	134,063		
Capital commitments(2)	149,408	149,408			
Total	478,136	344,073	134,063		

(1) Operating lease obligations represent the lease obligations for our premises and bandwidth obligations.

(2) Capital commitments relate primarily to leasehold improvements and building construction.

We do not have any long-term debt obligations, capital (finance) lease obligations or purchase obligations.

Item 6. *Directors, Senior Management and Employees***A. Directors and Senior Management**

The following table sets forth information regarding our executive officers and directors as of the date of this annual report.

Directors and Executive Officers	Age	Position/Title
Robin Yanhong Li	40	Chairman and Chief Executive Officer
Jennifer Li	41	Chief Financial Officer
Peng Ye	48	Chief Operating Officer
Yinan Li	39	Chief Technology Officer
William I. Chang	45	Chief Scientist
William Decker	62	Independent Director
James Ding	44	Independent Director
Nobuyuki Idei	71	Independent Director
Greg Penner	39	Independent Director

Robin Yanhong Li is a co-founder of our company. Mr. Li has served as our chairman of the board since our inception in January 2000 and as our chief executive officer since January 2004. Mr. Li served as our president from February 2000 to December 2003. Prior to founding our company, Mr. Li worked as a staff engineer for Infoseek, a pioneer in

the Internet search engine industry, from July 1997 to December 1999. Mr. Li was a senior consultant for IDD Information Services from May 1994 to June 1997. Mr. Li currently serves as an independent director, chairman of the compensation committee and member of the audit and nominating and corporate governance committees of the board of directors of New Oriental Education & Technology Group Inc., an NYSE-listed company that provides private educational services in China. Mr. Li received a bachelor's degree in information science from Peking University and a master's degree in computer science from the State University of New York at Buffalo.

Jennifer Li has served as our chief financial officer since March 2008. Prior to joining our company, Ms. Li served as controller of General Motors Acceptance Corporation's North American Operations from 2005 to 2008. Prior to GMAC, Ms. Li worked at General Motors China, where she was responsible for overseeing finance functions of General Motors' wholly-owned and joint venture businesses in China from 2001 to 2004, with the last post as its chief financial officer. From 1994 to 2001, she held several other finance positions at General Motors in China, Singapore, the United States and Canada. Ms. Li holds an MBA degree from the University of British Columbia in Vancouver, B.C., Canada and a bachelor of arts degree from Tsinghua University in China.

Table of Contents

Peng Ye has served as our chief operating officer since April 2008. From June 2006 to March 2008, Mr. Ye served as country general manager of Apple China. Prior to that, Mr. Ye worked at ND SatCom AG, a leading global supplier of innovative satellite-based communications solutions, as its global vice president and China managing director from November 2005 to May 2006, and for Motorola Mobile Device Business as its vice president of Asia Pacific and general manager of New Wireless Carrier Operations from April 2003 to October 2005. Mr. Ye also worked at Nortel China and Nortel Europe for seven years in several senior management and product development positions from April 1996 to March 2003. Mr. Ye holds a Ph.D. degree in information and software engineering from the University of Ulster in the United Kingdom, an EMBA degree from China Europe International Business School, a master of information system engineering degree from the National University of Defense Technology in China and a bachelor of computer communications degree from Nanjing University of Post and Telecommunications in China.

Yinan Li has served as our chief technology officer since October 2008. From 2006 to 2008, Mr. Li served as chief telecommunications scientist and vice president of Huawei Technologies, a leading telecom solutions provider in China. From 2001 to 2006, Mr. Li was the chief executive officer of Harbour Networks, a developer of intelligent security systems. Prior to his work at Harbour Networks, Mr. Li held various positions at Huawei Technologies including product manager, director of R&D, and president of R&D. Mr. Li holds master and bachelor of science degrees in optical engineering from Huazhong University of Science and Technology in China.

William I. Chang has served as our chief scientist since January 2007. Dr. Chang is a recognized expert in search technology, online community and advertising business models. From 2001 to January 2007, he served as chairman, president and chief executive officer of the Affini, Inc., a search technology and software company he founded. Since January 2007, he has served as chairman of Affini, Inc. From 2000 to 2001, Dr. Chang served as chief technology officer at Sentius Corporation, a hypertext software company, where he created a contextual advertising product. From 1998 to 1999, Dr. Chang served as vice president of Go Network. From 1997 to 1998, he was the chief technology officer of Infoseek, where he created the Infoseek natural language search engine for both the Internet search and enterprise applications. From 1991 to 1995, Dr. Chang worked as a postdoctoral fellow and associate staff researcher with the Cold Spring Harbor Laboratory, where he mapped a genome and invented a protein sequence search methodology. Dr. Chang received a bachelor's degree in mathematics from Harvard University and a Ph.D. in computer science from the University of California, Berkeley.

William Decker has served as our independent director since October 2005. Mr. Decker currently serves as an independent director and the chairman of the audit committee of VisionChina Media Inc., a Nasdaq-listed company that operates an out-of-home advertising network in China. He is a retired partner of PricewaterhouseCoopers LLP. Prior to his retirement in July 2005, Mr. Decker was the senior partner in charge of PricewaterhouseCoopers LLP's Global Capital Markets Group. He led a team of more than 300 professionals in 25 countries to provide technical support to non-U.S. companies on SEC regulations and U.S. GAAP reporting and assistance with the Sarbanes-Oxley Act compliance work. He was also one of PricewaterhouseCoopers' lead authorities on the Sarbanes-Oxley Act. Mr. Decker received a bachelor's degree in accounting from Fairleigh Dickinson University in New Jersey.

James Ding has served as our independent director since our initial public offering in August 2005. Mr. Ding is a managing director of GSR Ventures, a venture capital fund focusing on early stage technology companies in China. He also has served as the chairman of the board of directors of AsiaInfo Holdings, Inc., a Nasdaq-listed company, since April 2003 and has served as a member of the board of AsiaInfo since its inception. He served as AsiaInfo's chief executive officer from May 1999 to April 2003. He was AsiaInfo's senior vice president for business development and chief technology officer from 1997 to 1999. Mr. Ding received a master's degree in information science from the University of California, Los Angeles and a bachelor's degree in chemistry from Peking University.

Nobuyuki Idei has served as our independent director since June 2007. An experienced director, Mr. Idei also currently serves as chairman of the advisory board of Sony Corporation, director of Accenture, director of Red Herring and

chairman of the National Conference on Fostering Beautiful Forests in Japan. Mr. Idei is founder and CEO of Quantum Leaps Corporation, a specialist consultancy that advises private and public institutions on the changing role of technology in the 21st century. From 2000 to 2005, Mr. Idei was chairman and CEO of Sony Corporation. Prior to that, he held a range of leadership positions at Sony including general manager of the audio division, senior general manager of the home video group, and president and representative director. Mr. Idei has also served in a number of other advisory positions including as counselor to the Bank of Japan, member of Japan's

Table of Contents

national IT Strategy Council, and as vice chairman of Nippon Keidanren. Mr. Idei received a bachelor of science degree in economics and politics from Waseda University in Tokyo.

Greg Penner has served as our director since July 2004. Mr. Penner is a general partner of Madrone Capital Partners, an investment firm based in Menlo Park, California. From 2002 to 2004, he was the senior vice president and chief financial officer of Wal-Mart Japan, and was a director of The Seiyu, Ltd., a Japanese retailer from 2002 to 2008 when the company was acquired by Wal-Mart Stores, Inc. From 2000 to 2002, Mr. Penner was responsible for the business development, legal and finance affairs of Walmart.com, Wal-Mart's Internet business based in California. Prior to joining Wal-Mart, Mr. Penner was a general partner at Peninsula Capital, an early stage venture capital fund. In addition to Baidu, Mr. Penner also serves as a director of Wal-Mart Stores, Inc., the Global Hyatt Corporation, where he is a member of the audit committee, Cuil, Inc., a privately-held Internet search engine developer and 99Bill Corporation, based in Shanghai, China. Mr. Penner received a bachelor's degree in international economics from the School of Foreign Service at Georgetown University and an M.B.A. degree from the Stanford Graduate School of Business.

B. Compensation of Directors and Executive Officers

In 2008, we paid an aggregate of approximately RMB6.9 million (US\$1.0 million) and approximately RMB0.8 million (US\$0.1 million) in cash compensation to our executive officers and non-executive directors, respectively. No executive officer is entitled to any severance benefits upon termination of his or her employment with our company.

Our board of directors and shareholders approved the issuance of up to 5,040,000 ordinary shares upon exercise of awards granted under our 2000 option plan. As of March 31, 2009, an aggregate of 382,363 ordinary shares were issuable upon exercise of outstanding awards granted under our 2000 option plan. At the annual general meeting held on December 16, 2008, our shareholders approved a new 2008 share incentive plan, which has an additional 3,428,777 ordinary shares reserved for awards to be granted in the future. As of the date of this annual report, no awards have been granted under the 2008 share incentive plan.

The following table summarizes, as of March 31, 2009, the outstanding options and restricted shares that we granted to our current directors and executive officers and to other individuals as a group under our 2000 option plan.

Name	Ordinary Shares Underlying	Exercise Price (US\$/Share)	Grant Date	Expiration Date
	Outstanding Options			
Robin Yanhong Li	22,050	49.25	February 15, 2006	February 15, 2011
	393(1)		February 15, 2006	N/A

Table of Contents

* The options and restricted shares in aggregate held by each of these directors and officers represent less than 1% of our total outstanding shares.

- (1) Restricted shares.
- (2) Ms. Jennifer Li joined us in March 2008 and was granted some options and restricted shares on April 16, 2008. In February 2009, Ms. Li voluntarily surrendered all of the options previously granted to her. The surrendered options have been cancelled. The options listed in the table above were granted to Ms. Li in February 2009.
- (3) Mr. Peng Ye joined us in April 2008 and was granted some options and restricted shares on April 25, 2008. In February 2009, Mr. Ye voluntarily surrendered all of the options previously granted to him. The surrendered options have been cancelled. The options listed in the table above were granted to Mr. Ye in February 2009.
- (4) Mr. Yinan Li joined us in October 2008 and was granted some options and restricted shares on October 16, 2008. In February 2009, Mr. Li voluntarily surrendered all of the options previously granted to him. The surrendered options have been cancelled. The options listed in the table above were granted to Mr. Li in February 2009.

The following paragraphs summarize the key terms of our 2000 option plan, which was amended and restated on December 16, 2008, and our newly adopted 2008 share incentive plan.

2000 Option Plan

Types of Awards. We may grant the following types of awards under our 2000 option plan:

our ordinary shares;

options to purchase our ordinary shares; and

any other securities with value derived from the value of our ordinary shares.

Plan Administration. Our board of directors, or a committee designated by our board of directors, administers our 2000 option plan. In each case, our board of directors or the committee, will determine the provisions and terms and conditions of each award grant. These include, among other things, the option vesting schedule, repurchase provisions, rights of first refusal, forfeiture provisions, form of payment upon settlement of an award, payment contingencies and satisfaction of any performance criteria.

Award Agreement. Awards granted under our 2000 option plan are evidenced by an award agreement that sets forth the terms, conditions and limitations for each award. In addition, in the case of options, the award agreement also specifies whether the option constitutes an incentive stock option, or ISO, or a non-qualifying stock option.

Eligibility. We may grant awards to employees, directors and consultants of our company or any of our related entities, which include our subsidiaries or any entities in which we hold a substantial ownership interest. However, we may grant ISOs only to our employees and employees of our majority-owned subsidiaries.

Acceleration of Awards upon Corporate Transactions. The outstanding awards will accelerate upon occurrence of a change-of-control corporate transaction in which the successor entity does not assume our outstanding awards under our 2000 option plan. In such event, each outstanding award will become fully vested and immediately exercisable, the transfer restrictions on the awards will be released (other than those applicable to ISOs), and the repurchase or

forfeiture rights will terminate immediately before the date of the change-of-control transaction. If the successor entity assumes our outstanding awards and later terminates the grantee's employment or service without cause, or if the grantee resigns voluntarily with good cause within 12 months of the change-of-control transaction, the outstanding awards automatically become fully vested and exercisable.

Exercise Price and Term of Awards. If we grant an ISO to an employee, who, at the time of that grant, owns shares representing more than 10% of the voting power of all classes of our share capital, the exercise price cannot be less than 110% of the fair market value of our ordinary shares on the date of that grant. To the extent not prohibited by applicable law or exchange rules, a downward adjustment of the exercise price per share subject to an

Table of Contents

outstanding option may be made in the absolute discretion of the plan administrator without the approval of our shareholders or the affected grantees.

The term of each award is stated in the award agreement. The term may not exceed ten years from the date of the grant, except that five years is the maximum term of an ISO granted to an employee who holds more than 10% of the voting power of our share capital.

Vesting Schedule. In general, the plan administrator determines, or the award agreement specifies, the vesting schedule. Options generally vest over a four-year period beginning from one year after the grant date. The award agreements may provide that grantees may elect at any time during their employment or service to exercise any part or all of the awards prior to full vesting of the awards. But such early exercise may be subject to a repurchase right as determined by the plan administrator. When an optionee's employment or service is terminated, the optionee may exercise his or her options that have vested as of the termination date within three months of termination or as determined by our plan administrator.

Repurchase Rights. If an award agreement provides for repurchase rights upon termination of a grantee's employment or service, it must (or may, with respect to awards granted to officers, directors or consultants) provide that (i) such repurchase right must be exercised within 90 days of termination of the grantee's employment or service (or, in the case of exercise of awards after termination of the grantee's employment or service, within 90 days following such exercise), (ii) the repurchase price must be equal to the original purchase price paid by the grantee for each such share, and (iii) the right to repurchase will lapse at the rate of at least 20% of the shares subject to the award per year over five years from the date the award is granted (without respect to the date the award was exercised or became exercisable).

Amendment and Termination. Our board of directors may at any time amend, suspend or terminate our 2000 option plan. Amendments to our 2000 option plan are subject to shareholder approval, to the extent required by law, or by stock exchange rules or regulations. Any amendment, suspension or termination of our 2000 option plan must not adversely affect awards already granted without written consent of the recipient of such awards. Unless terminated earlier, our 2000 option plan shall continue in effect for a term of ten years from the date of adoption.

2008 Share Incentive Plan

Types of Awards. We may grant the following types of awards under our 2008 share incentive plan:

options;

restricted shares;

restricted share units; and

any other form of award granted to a participant pursuant to the 2008 plan.

Plan Administration. The compensation committee of our board of directors administers our 2008 share incentive plan, but may delegate to a committee of one or more members of our board of directors the authority to grant or amend awards to participants other than independent directors and executive officers. The compensation committee will determine the provisions and terms and conditions of each award grant, including, but not limited to, the exercise price, the grant price or purchase price, any restrictions or limitations on the award, any schedule for lapse of forfeiture restrictions or restrictions on the exercisability of an award, and accelerations or waivers thereof, any provisions related to non-competition and recapture of gain on an award, based in each case on such considerations as

the committee in its sole discretion determines. The compensation committee has the sole power and discretion to cancel, forfeit or surrender an outstanding award (whether or not in exchange for another award or combination of awards).

Award Agreement. Awards granted under our 2008 share incentive plan are evidenced by an award agreement that sets forth the terms, conditions and limitations for each award which may include the term of an award, the provisions applicable in the event the participant's employment or service ends, and our authority to unilaterally or bilaterally amend, modify, suspend, cancel or rescind an award.

Table of Contents

Eligibility. We may grant awards to employees, directors and consultants of our company or any of our related entities, which include our subsidiaries or any entities in which we hold a substantial ownership interest. However, we may grant ISOs only to our employees and employees of our majority-owned subsidiaries.

Acceleration of Awards upon Corporate Transactions. The outstanding awards will accelerate upon occurrence of a change-of-control corporate transaction in which the successor entity does not assume our outstanding awards under our 2008 share incentive plan, provided that the plan participant remains an employee, consultant or member of our board of directors on the effective date of the corporate transaction. In such event, each outstanding award will become fully exercisable and all forfeiture restrictions on such award will lapse immediately prior to the specified effective date of the corporate transaction.

If the successor entity assumes our outstanding awards and later terminates the grantee's employment or service without cause, or if the grantee resigns voluntarily with good reason within 12 months of the corporate transaction, the outstanding awards automatically will become fully vested and exercisable. The compensation committee may also, in its sole discretion, upon or in anticipation of a corporate transaction, accelerate awards, purchase the awards from the plan participants, replace the awards, or provide for the payment of the awards in cash.

Exercise Price and Term of Awards. The exercise price per share subject to an option may be amended or adjusted in the absolute discretion of the compensation committee, the determination of which shall be final, binding and conclusive. To the extent not prohibited by applicable laws or exchange rules, a downward adjustment of the exercise prices of options mentioned in the preceding sentence shall be effective without the approval of our shareholders or the approval of the affected grantees. If we grant an ISO to an employee, who, at the time of that grant, owns shares representing more than 10% of the voting power of all classes of our share capital, the exercise price cannot be less than 110% of the fair market value of our ordinary shares on the date of that grant. The compensation committee will determine the time or times at which an option may be exercised in whole or in part, including exercise prior to vesting. The term may not exceed ten years from the date of the grant, except that five years is the maximum term of an ISO granted to an employee who holds more than 10% of the voting power of our share capital.

Restricted Shares and Restricted Share Units. The compensation committee is also authorized to make awards of restricted shares and restricted share units. Except as otherwise determined by the compensation committee at the time of the grant of an award or thereafter, upon termination of employment or service during the applicable restriction period, restricted shares that are at the time subject to restrictions shall be forfeited or repurchased in accordance with the respective award agreements. At the time of grant for restricted share units, the compensation committee shall specify the date on which the restricted share units shall become fully vested and nonforfeitable, and may specify such conditions to vesting as it deems appropriate.

Amendment and Termination. With the approval of our board of directors, the compensation committee may at any time amend, suspend or terminate our 2008 share incentive plan. Amendments to our 2008 share incentive plan are subject to shareholder approval, to the extent required by law, or by stock exchange rules or regulations. Any amendment, suspension or termination of our 2008 share incentive plan must not adversely affect in any material way awards already granted without written consent of the recipient of such awards. Unless terminated earlier, our 2008 share incentive plan shall continue in effect for a term of ten years from the date of adoption.

C. Board Practices

Board of Directors

Our board of directors has five directors. A director is not required to hold any shares in the company by way of qualification. A director may vote with respect to any contract, proposed contract or arrangement in which he is

materially interested. A director may exercise all the powers of the company to borrow money, mortgage its undertakings, property and uncalled capital, and issue debentures or other securities whenever money is borrowed or as security for any obligation of the company or of any third party. The remuneration to be paid to the directors are determined by the board of directors. There is no age limit requirement for directors.

Table of Contents

Committees of the Board of Directors

We have three committees under the board of directors: an audit committee, a compensation committee and a corporate governance and nominating committee. We have adopted a charter for each of the three committees.

Audit Committee

Our audit committee consists of Messrs. William Decker, James Ding and Greg Penner, all of whom satisfy the independence requirements of Rule 4350 of the Nasdaq Stock Market Marketplace Rules and Rule 10A-3 under the Securities Exchange Act of 1934, as amended. Our board of directors has determined that Mr. Decker is an audit committee financial expert as defined in the instructions to Item 16A of the Form 20-F. The audit committee oversees our accounting and financial reporting processes and the audits of the financial statements of our company. The audit committee is responsible for, among other things:

appointing, retaining and overseeing the work of the independent auditors, including resolving disagreements between the management and the independent auditors relating to financial reporting;

pre-approving all auditing and non-auditing services permitted to be performed by the independent auditors;

reviewing annually the independence and quality control procedures of the independent auditors;

reviewing and approving all proposed related party transactions;

discussing the annual audited financial statements with the management;

meeting separately with the independent auditors to discuss critical accounting policies, management letters, recommendations on internal controls, the auditor's engagement letter and independence letter and other material written communications between the independent auditors and the management; and

attending to such other matters that are specifically delegated to our audit committee by our board of directors from time to time.

In 2008, our audit committee held meetings and passed resolutions by unanimous written consent five times.

Compensation Committee

Our compensation committee consists of Messrs. James Ding and Greg Penner, both of whom satisfy the independence requirements of Rule 4350 of the Nasdaq Stock Market Marketplace Rules. The compensation committee assists the board in reviewing and approving our compensation structure, including all forms of compensation relating to our directors and executive officers. Our chief executive officer may not be present at any committee meeting while his compensation is deliberated. The compensation committee is responsible for, among other things:

reviewing and approving executive compensation;

reviewing periodically and approving any long-term incentive compensation or equity plans, programs or similar arrangements, annual bonuses, employee pension and welfare benefit plans;

determining our policy with respect to change of control or parachute payments; and

managing and reviewing director and executive officer indemnification and insurance matters.

In 2008, our compensation committee held meeting and passed resolutions by unanimous written consent once.

Corporate Governance and Nominating Committee

Our corporate governance and nominating committee consists of Messrs. James Ding and Greg Penner, both of whom satisfy the independence requirements of Rule 4350 of the Nasdaq Stock Market Marketplace Rules. The corporate governance and nominating committee assists the board of directors in selecting individuals qualified to

Table of Contents

become our directors and in determining the composition of the board and its committees. The corporate governance and nominating committee is responsible for, among other things:

recommending to the board nominees for election or re-election to the board or for appointments to fill any vacancies;

reviewing annually the performance of each incumbent director in determining whether to recommend such director for an additional term;

overseeing the board in the board's annual review of its own performance and the performance of the management; and

considering, preparing and recommending to the board such policies and procedures with respect to corporate governance matters as may be required or required to be disclosed under the applicable laws or otherwise considered to be material.

In 2008, our corporate governance and nominating committee passed resolutions by unanimous written consent once.

Terms of Directors and Executive Officers

All directors hold office until their successors have been duly elected and qualified. Director nomination is subject to the approval of our corporate governance and nominating committee. Our shareholders may remove any director by ordinary resolution and may in like manner appoint another person in his stead. A valid ordinary resolution requires a majority of the votes cast at a shareholder meeting that is duly constituted and meets the quorum requirement. Officers are elected by and serve at the discretion of the board of directors.

D. Employees

We had 3,113, 6,252 and 6,387 employees as of December 31, 2006, 2007 and 2008, respectively. As of December 31, 2008, we had 6,387 employees, including 492 in management and administration, 1,381 in research and development, 659 in operation and service, and 3,855 in sales and marketing. We also hire temporary employees and contractors from time to time. Our employees are not covered by any collective bargaining agreement. We consider our relations with our employees to be good.

E. Share Ownership

The following table sets forth information with respect to the beneficial ownership of our shares as of March 31, 2009 by:

each of our current directors and executive officers; and

each person known to us to own beneficially more than 5.0% of our shares (except that, for Morgan Stanley, the number of shares beneficially owned was as of December 31, 2008, as reported in its Schedule 13G/A filing).

Table of Contents

See B. Compensation of Directors and Executive Officers for more details on options and restricted shares granted to our directors and executive officers.

	Shares Beneficially Owned	
	Number(1)	%(2)

Morgan Stanley(14)	1,765,818	5.1%

* Less than 1% of our total outstanding shares.

- (1) The number of shares beneficially owned by each named director and executive officer includes the shares beneficially owned by such person, the shares underlying all options held by such person that have vested or will vest within 60 days after March 31, 2009, and restricted shares held by such person that have vested or will vest within 60 days after March 31, 2009. The options and restricted shares were granted under our 2000 option plan.
- (2) Percentage of beneficial ownership of each named director and executive officer is based on 34,552,169 ordinary shares (consisting of 25,678,183 Class A ordinary shares and 8,873,986 Class B ordinary shares) of the company outstanding as of March 31, 2009, the number of ordinary shares underlying options that have vested or will vest within 60 days after March 31, 2009, and the number of restricted shares that have vested or will vest within 60 days after March 31, 2009, each as held by such person as of that date.
- (3) Includes (i) 37,665 Class A ordinary shares held by Mr. Li, (ii) 34,000 Class A ordinary shares in the form of ADSs held by Mr. Li, (iii) 26,666 Class A ordinary shares issuable upon exercise of options held by Mr. Li, (iv) 2,893 restricted shares held by Mr. Li, and (v) 5,490,000 Class B ordinary shares held by Handsome Reward Limited, a company wholly-owned and controlled by Mr. Li. Excludes 1,676,667 Class B ordinary shares held by Melissa Ma, Mr. Li's wife, of which Mr. Li disclaims beneficial ownership. The business address for Mr. Li is c/o Baidu, Inc., Ideal International Plaza, 12/F, No. 58 West-North 4th Ring, Beijing, 100080, PRC.
- (4) The business address for Ms. Li is c/o Baidu, Inc., Ideal International Plaza, 12/F, No. 58 West-North 4th Ring, Beijing, 100080, PRC.
- (5) The business address for Mr. Ye is c/o Baidu, Inc., Ideal International Plaza, 12/F, No. 58 West-North 4th Ring, Beijing, 100080, PRC.

- (6) The business address for Mr. Li is c/o Baidu, Inc., Ideal International Plaza, 12/F, No. 58 West-North 4th Ring, Beijing, 100080, PRC.
- (7) The business address for Mr. Chang is Baidu, Inc., Ideal International Plaza, 12/F, No. 58 West-North 4th Ring, Beijing, 100080, PRC.
- (8) The address of Mr. Decker is 24 Nordic Way, Saranac Lake, NY, 12983, USA.

Table of Contents

- (9) The business address of Mr. Ding is 4/F, Zhongdian Information Tower No. 6 Zhongguancun South Street, Haidian District, Beijing 100086, PRC.
- (10) The business address of Mr. Idei's address is Tokyo Ginko Kyoukai Building 16F,1-3-1, Marunouchi, Chiyoda-ku, Tokyo, 100-0005, Japan.
- (11) Includes (i) 15,520 Class A ordinary shares in the form of ADSs held by Mr. Penner, (ii) 434 restricted shares, (iii) 200,000 Class A ordinary shares in the form of ADSs held by Madrone Partners, LP, a fund for which Mr. Penner serves as a managing member of the sole manager; and (iv) 967,683 Class B ordinary shares held by Peninsula Capital Fund I, LLC. Mr. Penner is the sole manager of Peninsula Capital Fund I, LLC, and has sole voting and dispositive power over all the shares held by Peninsula Capital Fund I, LLC. Mr. Penner disclaims beneficial ownership of the shares held by Madrone Partners, LP and Peninsula Capital Fund I, LLC, except to the extent of his pecuniary interest therein. The business address for Mr. Penner is 3000 Sand Hill Road, Building 1, Suite 150, Menlo Park, California 94025, U.S.A.
- (12) Includes ordinary shares, ordinary shares issuable upon exercise of options and restricted shares, held by all of our directors and executive officers as a group.
- (13) Represents 5,490,000 Class B ordinary shares held by Handsome Reward Limited, a British Virgin Island company wholly-owned and controlled by Mr. Robin Yanhong Li. The business address of Handsome Reward Limited is c/o Robin Yanhong Li, Baidu, Inc., Ideal International Plaza, 12/F, No. 58 West-North 4th Ring, Beijing, 100080, PRC.
- (14) Represents 1,765,818 Class A ordinary shares in the form of ADSs beneficially owned by Morgan Stanley, as reported on two Schedule 13G/As filed by Morgan Stanley on February 17, 2009. The business address of Morgan Stanley is 1585 Broadway, New York, NY 10036, U.S.A.

Our ordinary shares are divided into Class A ordinary shares and Class B ordinary shares. Holders of Class A ordinary shares are entitled to one vote per share, while holders of Class B ordinary shares are entitled to 10 votes per share. We issued Class A ordinary shares represented by our ADSs in our initial public offering in 2005. Holders of our Class B ordinary shares may choose to convert their Class B ordinary shares into the same number of Class A ordinary shares at any time. We are not aware of any arrangement that may, at a subsequent date, result in a change of control of our company. See Item 3D. Key Information Risk Factors Risks Related to Our ADSs Our dual-class ordinary share structure with different voting rights could discourage others from pursuing any change of control transactions that holders of our Class A ordinary shares and ADSs may view as beneficial.

As of March 31, 2009, 34,552,169 of our ordinary shares were issued and outstanding. To our knowledge, approximately 78% of our total outstanding ordinary shares were held by five record shareholders in the United States, including approximately 74% held by The Bank of New York Mellon, the depository of our ADS program. The number of beneficial owners of our ADSs in the United States is likely to be much larger than the number of record holders of our ordinary shares in the United States.

Item 7. Major Shareholders and Related Party Transactions

A. Major Shareholders

Please refer to Item 6E. Directors, Senior Management and Employees Share Ownership.

B. Related Party Transactions

Contractual Arrangements with Baidu Netcom and Its Shareholders

PRC law currently limits foreign equity ownership of companies that provide Internet content and advertising businesses. To comply with these foreign ownership restrictions, we operate our websites and provide online advertising services in China through a series of contractual arrangements with Baidu Netcom and its shareholders, Robin Yanhong Li and Eric Yong Xu. In March 2005, we restructured these contractual arrangements as follows:

Exclusive Technology Consulting and Services Agreement. Pursuant to the exclusive technology consulting and services agreement between Baidu Online and Baidu Netcom, Baidu Online has the exclusive right to provide to Baidu Netcom technology consulting and services related to the maintenance of servers,

Table of Contents

software development and design of advertisements. Baidu Online also seconded employees to Baidu Netcom for whom Baidu Netcom bears the costs and expenses. Baidu Online owns the intellectual property rights related to the software developed by Baidu Online for Baidu Netcom. Baidu Netcom pays monthly service fees to Baidu Online based upon a pre-agreed formula, which takes into account the number of monthly page views and the basic fee for every one thousand page views of advertisements displayed on our websites. The basic fee for every one thousand page views is subject to periodic adjustment. The current rate of the basic fee is RMB1.444. The term of this agreement is ten years from the date thereof.

Business Cooperation Agreement. Pursuant to the business cooperation agreement between Baidu Netcom and Baidu Online, Baidu Netcom provides Internet information services, Internet advertising services and related services to Baidu Online to enable Baidu Online to provide P4P services on the websites owned and operated by Baidu Netcom, and Baidu Online provides search engine technology services to Baidu Netcom. Baidu Online agrees to pay a monthly fee of RMB10,000 to Baidu Netcom. The term of this agreement is ten years from the date thereof.

Operating Agreement. Pursuant to the operating agreement among Baidu Online, Baidu Netcom and the shareholders of Baidu Netcom, Baidu Online provides guidance and instructions on Baidu Netcom's daily operations and financial affairs. The shareholders of Baidu Netcom must designate the candidates recommended by Baidu Online as their representatives on Baidu Netcom's board of directors. Baidu Online has the right to appoint senior executives of Baidu Netcom. In addition, Baidu Online agrees to guarantee Baidu Netcom's performance under any agreements or arrangements relating to Baidu Netcom's business arrangements with any third party. Baidu Netcom, in return, agrees to pledge its accounts receivable and all of its assets to Baidu Online. Moreover, Baidu Netcom agrees that without the prior consent of Baidu Online, Baidu Netcom will not engage in any transactions that could materially affect the assets, liabilities, rights or operations of Baidu Netcom, including, without limitation, incurrence or assumption of any indebtedness, sale or purchase of any assets or rights, incurrence of any encumbrance on any of its assets or intellectual property rights in favor of a third party or transfer of any agreements relating to its business operation to any third party. The term of this agreement is ten years from the date thereof.

Software License Agreement. Under the software license agreement, Baidu Online granted Baidu Netcom a non-exclusive, non-assignable and non-transferable right to use Baidu Chinese Search Engine and Baidu Internet P4P System software. Baidu Netcom can only use the software on its designated operating systems to process its internal data. The annual license fee for each software is RMB5.0 million. When deciding the amount of the annual license fee, Baidu Online and Baidu Netcom considered several factors, including functionality and quality of the software, past and ongoing research and development costs incurred by Baidu Online in developing and upgrading the software, license fees of other portal search software applications, Baidu Online's enterprise search application license fees, and Baidu Netcom's financial resources and projected operating results. The term of the license agreement is five years from the date thereof.

Other License Agreements. Under these license agreements, Baidu Online granted Baidu Netcom the exclusive right to use the registered domain names and trademarks owned by Baidu Online and the web layout owned by Baidu Online for the websites operated by Baidu Netcom. The annual license fee under each license agreement is RMB10,000, subject to certain adjustments. The term of each license agreement is five years from the date thereof. The domain name license agreement was terminated upon the completion of the transfers of certain domain names primarily used in our business from our company or Baidu Online to Baidu Netcom in May 2008. After the transfers of certain trademarks (including pending trademark applications) from Baidu Online to Baidu Netcom are completed, the trademark license agreement will be amended or terminated. We do not expect the termination of these license agreements to have any material effect on our operations.

Proxy Agreement. Pursuant to the proxy agreement among Baidu Online, Baidu Netcom and the shareholders of Baidu Netcom, the shareholders of Baidu Netcom agree to entrust all the rights to exercise their voting power to the

person(s) appointed by Baidu Online. The term of the proxy agreement is 10 years from the date thereof.

Table of Contents

Equity Pledge Agreement. Under the equity pledge agreement between the shareholders of Baidu Netcom and Baidu Online, the shareholders of Baidu Netcom pledged all of their equity interests in Baidu Netcom to Baidu Online to guarantee their obligations under the loan agreement and Baidu Netcom's performance of its obligations under the technology consulting agreement. If Baidu Netcom or either of its shareholders breaches its respective contractual obligations, Baidu Online, as pledgee, will be entitled to certain rights, including the right to sell the pledged equity interests. The shareholders of Baidu Netcom agreed not to dispose of the pledged equity interests or take any actions that would prejudice Baidu Online's interest. The equity pledge agreement will expire two years after expiration of the term for fulfillment by Baidu Netcom and its shareholders of their respective obligations under the exclusive technology consulting service agreement and the loan agreement.

Exclusive Equity Purchase Option Agreement. Under the exclusive equity purchase option agreement between the shareholders of Baidu Netcom and Baidu Online, the shareholders of Baidu Netcom irrevocably granted Baidu Online or its designated person an exclusive option to purchase, to the extent permitted under PRC law, all or part of the equity interests in Baidu Netcom for the cost of the initial contributions to the registered capital or the minimum amount of consideration permitted by applicable PRC law. Baidu Online or its designated person has sole discretion to decide when to exercise the option, whether in part or in full. The term of this agreement is ten years from the date thereof.

Loan Agreement. Under the loan agreement between the shareholders of Baidu Netcom and Baidu Online, the parties confirmed that Baidu Online had made an RMB2.0 million interest-free loan to the shareholders of Baidu Netcom solely for the latter to fund the capitalization of Baidu Netcom. The loan can be repaid only with the proceeds from sale of the shareholder's equity interest in Baidu Netcom to Baidu Online. The term of the agreement is ten years from the date thereof.

Irrevocable Power of Attorney. The shareholders of Baidu Netcom have each executed an irrevocable power of attorney to appoint Xuyang Ren as their attorney-in-fact to vote on their behalf on all Baidu Netcom matters requiring shareholder approval. The appointment of Xuyang Ren as attorney-in-fact will terminate if Xuyang Ren is no longer employed by Baidu Online. The term of the power of attorney is ten years from the date thereof.

In February 2006 and March 2008, we extended two additional interest-free loans of RMB8.0 million and RMB90.0 million (US\$13.2 million), respectively, to Robin Yanhong Li for the sole purpose of increasing the registered capital of Baidu Netcom. In connection with each loan, we entered into the following agreements with Mr. Li:

a loan agreement;

an equity pledge agreement between Robin Yanhong Li and Baidu Online; and

an exclusive equity purchase option agreement among Robin Yanhong Li, Baidu Netcom and Baidu Online.

The terms of these agreements are similar to the terms of the original agreements between Baidu Online and the shareholders of Baidu Netcom entered into in March 2005. In addition, under the terms of the original proxy agreement entered into in March 2005, Mr. Li is required to entrust all the rights to exercise the additional voting power he acquired as a result of his additional investment in the registered capital of Baidu Netcom to the person(s) appointed by Baidu Online.

Contractual Arrangements with Beijing Perusal and Its Shareholders

We entered into a series of contractual arrangements with Beijing Perusal and its shareholders in 2006 and, with respect to the proxy agreements, 2008. These agreements include:

loan agreements for interest-free loans in an aggregate amount of RMB1.0 million to the shareholders of Beijing Perusal;

equity pledge agreements between the shareholders of Beijing Perusal and Baidu Online;

Table of Contents

exclusive equity purchase option agreements among Beijing Perusal, Baidu Online and the shareholders of Beijing Perusal;

a proxy agreement between the shareholders of Beijing Perusal and Baidu Online;

an exclusive technology consulting and services agreement between Beijing Perusal and Baidu Online;

an operating agreement among Beijing Perusal, Baidu Online, and the shareholders of Beijing Perusal; and

various license agreements between Beijing Perusal and Baidu Online, including domain name license agreements, trademark license agreements and webpage copyright license agreements. The domain name license agreement was terminated in May 2008 because Beijing Perusal already owns the domain names primarily used in its business. After the transfers of certain pending trademark applications from Baidu Online to Beijing Perusal are completed, the trademark license agreement will be terminated. We do not expect the termination of these license agreements to have any material effect on our operations.

The terms of these contractual arrangements are similar to the terms of our contractual arrangements with Baidu Netcom and its shareholders.

Contractual Arrangements with BaiduPay and Its Individual Shareholder

We entered into a series of contractual arrangements with BaiduPay and its individual shareholder in 2008. These agreements include:

a loan agreement for interest-free loan in an aggregate amount of RMB9.0 million to the individual shareholder of BaiduPay;

an equity pledge agreement between the individual shareholder of BaiduPay and Baidu Online;

an exclusive equity purchase option agreement among BaiduPay, Baidu Online and the individual shareholder of BaiduPay;

a proxy agreement between the individual shareholder of BaiduPay and Baidu Online;

an exclusive technology consulting and services agreement between BaiduPay and Baidu Online;

operating agreement among BaiduPay, Baidu Online and the shareholders of BaiduPay; and

a trademark license agreement and a webpage copyright license agreement between BaiduPay and Baidu Online. After the transfer of a pending trademark application from Baidu Online to BaiduPay is completed, the trademark license agreement will be terminated. We do not expect the termination of this agreement to have any material effect on our operations.

The terms of these contractual arrangements are similar to the terms of our contractual arrangements with Baidu Netcom and its shareholders.

Share Options

Please refer to Item 6B. Directors, Senior Management and Employees Compensation of Directors and Executive Officers.

Transaction with UiTV

In September 2008, we entered into agreements with UiTV, operator of an Internet television platform in China. Under these agreements, we will contribute assets related to the operation of Baidu Internet TV Channel to UiTV in exchange for an 8.3% stake in UiTV and US\$15 million. James Ding, one of our independent directors, is the chairman of UiTV and owns approximately 17.6% of the equity interests in UiTV. This transaction has not been closed as of the date of this annual report, pending completion of transfer of certain intellectual property rights.

Table of Contents

C. Interests of Experts and Counsel

Not applicable.

Item 8. *Financial Information*

A. Consolidated Statements and Other Financial Information

We have appended consolidated financial statements filed as part of this annual report.

Legal Proceedings

From time to time, we have been involved in litigation or other disputes regarding, among other things, copyright and trademark infringement, defamation, unfair competition and labor disputes. Our search results provide links to materials, and our Baidu Post Bar, Baidu Knows, Baidu Space and other Baidu communities may contain materials, in which others may allege to own copyrights, trademarks or image rights or which others may claim to be defamatory or objectionable. We have received notice letters from third parties asserting copyright infringement, unfair competition, defamation, breach of contract and labor-related claims against us.

As of March 31, 2009, we were involved in 29 cases pending in various PRC courts, including the cases summarized below. The aggregate amount of compensation sought under these cases is approximately RMB73 million (US\$10.7 million).

In March 2008, we received complaints filed by three record companies and the Music Copyright Society of China against us, alleging, among other things, that we have aided illegal online copying of music or song lyrics by providing links to pirated music or song lyrics. We expect that the Protection of the Right of Communication through Information Network, which was promulgated by the State Council and became effective on July 1, 2006, will be applied to these cases. Because these cases are still pending, we cannot predict their outcomes. See Item 3D. Key Information Risk Factors Risks Related to Our Business We may face intellectual property infringement claims and other related claims that could be time-consuming and costly to defend and may result in our inability to continue providing certain of our existing services.

In January 2009, we received a complaint filed by a medical company alleging that Baidu abused its dominant market position by screening out the website of the medical company. Because the case is still at an early stage and there has been no ruling on such cases by PRC courts since the promulgation of the new Anti-Monopoly Law, we cannot predict its outcome.

Although we cannot predict with certainty the results of pending litigation and claims, we believe that the final outcome of pending litigation and claims will not have a material adverse effect on our business and results of operations. Regardless of the outcome, however, any litigation can result in substantial costs and diversion of management resources and attention.

Dividend Policy

We have never declared or paid any dividends, nor do we have any present plan to pay any cash dividends on our ordinary shares in the foreseeable future. We currently intend to retain most, if not all, of our available funds and any future earnings to operate and expand our business.

Our board of directors has complete discretion whether to distribute dividends. Even if our board of directors decides to pay dividends, the form, frequency and amount of our dividends will depend upon our future operations and earnings, capital requirements and surplus, financial condition, contractual restrictions and other factors that our board of directors may deem relevant. If we pay any dividends, we will pay our ADS holders to the same extent as holders of our ordinary shares, subject to the terms of the deposit agreement, including the fees and expenses payable thereunder. Cash dividends on our ordinary shares, if any, will be paid in U.S. dollars.

Table of Contents**B. Significant Changes**

Except as disclosed elsewhere in this annual report, we have not experienced any significant changes since the date of our audited consolidated financial statements included in this annual report.

Item 9. The Offer and Listing**A. Offering and Listing Details.**

Our ADSs, each representing one Class A ordinary share, have been listed on The Nasdaq Global Market since August 5, 2005. Our ADSs currently trade on The Nasdaq Global Select Market under the symbol BIDU.

The following table provides the high and low trading prices for our ADSs on the Nasdaq for (1) the years 2005 (from August 5, 2005), 2006, 2007 and 2008, (2) each of the four quarters of 2007 and 2008 and the first quarter of 2009 and (3) each of the past six months.

	Sales Price	
	High	Low
Annual High and Low		
2005 (from August 5, 2005)	153.98	60.00
2006	128.68	44.44

B. Memorandum and Articles of Association

The following are summaries of material provisions of our third amended and restated memorandum and articles of association, as well as the Companies Law (2007 Revision) insofar as they relate to the material terms of our ordinary shares.

Registered Office and Objects

The Registered Office of our company is at the offices of Maples Corporate Services Limited, PO Box 309, Ugland House, Grand Cayman, KY1-1104, Cayman Islands or at such other place as our board of directors may from time to time decide. The objects for which our company is established are unrestricted and we have full power and authority to carry out any object not prohibited by the Companies Law (2007 Revision), as amended from time to time, or any other law of the Cayman Islands.

Board of Directors

See Item 6.C. Board Practices Board of Directors.

Ordinary Shares

General. Our ordinary shares are divided into Class A ordinary shares and Class B ordinary shares. Holders of Class A ordinary shares and Class B ordinary shares have the same rights except for voting and conversion rights. All of our outstanding ordinary shares are fully paid and non-assessable. Certificates representing the ordinary shares are issued in registered form. Our shareholders who are nonresidents of the Cayman Islands may freely hold and vote their shares.

Dividends. The holders of our ordinary shares are entitled to such dividends as may be declared by our board of directors subject to the Companies Law.

Conversion. Each Class B ordinary share is convertible into one Class A ordinary share at any time by the holder thereof. Class A ordinary shares are not convertible into Class B ordinary shares under any circumstances. Upon any

transfer of Class B ordinary shares by a holder thereof to any person or entity which is not an affiliate of such holder (as defined in our articles of incorporation), such Class B ordinary shares shall be automatically and immediately converted into the equal number of Class A ordinary shares. In addition, if at any time our chairman and chief executive officer, Robin Yanhong Li, and his affiliates collectively own less than 5% of the total number of the issued and outstanding Class B ordinary shares, each issued and outstanding Class B ordinary share shall be automatically and immediately converted into one share of Class A ordinary share, and we shall not issue any Class B ordinary shares thereafter.

Voting Rights. All of our shareholders have the right to receive notice of shareholders meetings and to attend, speak and vote at such meetings. In respect of matters requiring shareholders vote, each Class A ordinary

Table of Contents

share is entitled to one vote, and each Class B ordinary share is entitled to 10 votes. A shareholder may participate at a shareholders meeting in person, by proxy or by telephone conference or other communications equipment by means of which all the shareholders participating in the meeting can communicate with each other. At any shareholders meeting, a resolution put to the vote of the meeting shall be decided on a poll conducted by the chairman of the meeting.

A quorum for a shareholders meeting consists of one or more shareholders holding at least one third of the paid up voting share capital present in person or by proxy or, if a corporation or other non-natural person, by its duly authorized representative. We shall, if required by the Companies Law, hold a general meeting of shareholders as our annual general meeting and shall specify the meeting as such in the notices calling it. Our board of directors may call extraordinary general meetings, and they must on shareholders requisition convene an extraordinary general meeting. A shareholder requisition is a requisition of shareholders holding at the date of deposit of the requisition not less than a majority of the voting power represented by the issued shares of our company as at that date carries the right of voting at general meetings of our company. Advance notice of at least five days is required for the convening of our annual general meeting and other shareholders meetings.

An ordinary resolution to be passed by the shareholders requires the affirmative vote of a simple majority of the votes attaching to the ordinary shares cast in a general meeting, while a special resolution requires the affirmative vote of no less than two-thirds of the votes cast attaching to the ordinary shares cast in a general meeting. A special resolution is required for matters such as a change of name. Holders of the ordinary shares may effect certain changes by ordinary resolution, including consolidating and dividing all or any of our share capital into shares of larger amount than our existing share capital and canceling any shares.

Transfer of Shares. Subject to the restrictions of our memorandum and articles of association, as applicable, any of our shareholders may transfer any or all of his or her ordinary shares by an instrument of transfer in the usual or common form or any other form approved by our board of directors.

Our board of directors may, in their absolute discretion (except with respect to a transfer from a shareholder to its affiliate(s)), decline to register any transfer of shares without assigning any reason therefor. If our board of directors refuses to register a transfer they shall notify the transferee within two months of such refusal. Notwithstanding the foregoing, if a transfer complies with the holder's transfer obligations and restrictions set forth under applicable law (including but not limited to U.S. securities law provisions related to insider trading) and our articles of association, our board of directors shall promptly register such transfer. Further, any director is authorized to confirm in writing addressed to the registered office to authorize a share transfer and to instruct that the register of members be updated accordingly, provided that the transfer complies with the holder's transfer obligations and restrictions set forth under applicable law and our articles of association and such holder is not the director who authorizes the transfer or an entity affiliated with such director. Any director is authorized to execute a share certificate in respect of such shares for and on behalf of our company.

The registration of transfers may be suspended at such time and for such periods as our board of directors may from time to time determine, provided, however, that the registration of transfers shall not be suspended for more than 45 days in any year.

Liquidation. On a return of capital on winding up or otherwise (other than on conversion, redemption or purchase of shares), assets available for distribution among the holders of ordinary shares may be distributed among the holders of the ordinary shares as determined by the liquidator, subject to sanction of a special resolution of our company. If our assets available for distribution are insufficient to repay all of the paid-up capital, the assets will be distributed so that the losses are borne by our shareholders proportionately to the capital paid up, or which ought to have been paid up, at the commencement of the winding up on the shares held by such shareholders respectively.

Calls on Shares and Forfeiture of Shares. Our board of directors may from time to time make calls upon shareholders for any amounts unpaid on their shares in a notice served to such shareholders at least 14 days prior to the specified time and place of payment. The shares that have been called upon and remain unpaid on the specified time are subject to forfeiture.

Table of Contents

Redemption of Shares. Subject to the provisions of the Companies Law and our articles of association, we may issue shares on terms that are subject to redemption, at our option or at the option of the holders, on such terms and in such manner as our board of directors may determine.

Repurchase of Shares. Subject to the provisions of the Companies Law and our articles of association, our board of directors may authorize repurchase of our shares in accordance with the manner of purchase specified in our articles of association without seeking shareholder approval.

Variations of Rights of Shares. All or any of the special rights attached to any class of shares may, subject to the provisions of the Companies Law, be varied either with the written consent of the holders of a majority of the issued shares of that class or with the sanction of a special resolution passed at a general meeting of the holders of the shares of that class.

Inspection of Books and Records. No holders of our ordinary shares who is not a director shall have any right of inspecting any of our accounts, books or documents except as conferred by the Companies Law or authorized by the directors or by us in general meeting. However, we will make this annual report, which contains our audited financial statements, available to shareholders and ADS holders. See Item 10.H. Documents on Display.

Preferred Shares

Our board of directors have the authority, without shareholder approval, to issue up to a total of 10,000,000 shares of preferred shares in one or more series. Our board of directors may establish the number of shares to be included in each such series and may set the designations, preferences, powers and other rights of the shares of a series of preferred shares. While the issuance of preferred shares provides us with flexibility in connection with possible acquisitions or other corporate purposes, it could, among other things, have the effect of delaying, deferring or preventing a change of control transaction and could adversely affect the market price of our ADSs. We have no current plan to issue any preferred shares.

C. Material Contracts

We have not entered into any material contracts other than in the ordinary course of business and other than those described in Item 4. Information on the Company or elsewhere in this annual report on Form 20-F.

D. Exchange Controls

See Item 4.B. Information on the Company Business Overview Regulation Regulations on Foreign Exchange.

E. Taxation

The following summary of the material Cayman Islands and United States federal income tax consequences of an investment in our ADSs or ordinary shares is based upon laws and relevant interpretations thereof in effect as of the date of this annual report, all of which are subject to change. This summary does not deal with all possible tax consequences relating to an investment in our ADSs or ordinary shares, such as the tax consequences under state, local and other tax laws.

Cayman Islands Taxation

According to Maples and Calder, our Cayman Islands counsel, the Cayman Islands currently levies no taxes on individuals or corporations based upon profits, income, gains or appreciation and there is no taxation in the nature of

inheritance tax or estate duty. There are no other taxes likely to be material to us levied by the Government of the Cayman Islands except for stamp duties which may be applicable on instruments executed in, or brought within, the jurisdiction of the Cayman Islands. The Cayman Islands is not party to any double tax treaties. There are no exchange control regulations or currency restrictions in the Cayman Islands.

Table of Contents

United States Federal Income Taxation

The following discussion describes the material United States federal income tax consequences to U.S. Holders (defined below) under present law of an investment in the ADSs or ordinary shares. This summary applies only to investors that hold the ADSs or ordinary shares as capital assets and that have the U.S. dollar as their functional currency. This discussion is based on the tax laws of the United States as in effect on the date of this Form 20-F and on United States Treasury regulations in effect or, in some cases, proposed, as of the date of this Form 20-F, as well as judicial and administrative interpretations thereof available on or before such date. All of the foregoing authorities are subject to change, which change could apply retroactively and could affect the tax consequences described below.

The following discussion does not deal with the tax consequences to any particular investor or to persons in special tax situations such as:

banks;

financial institutions;

insurance companies;

broker dealers;

traders that elect to mark to market;

tax-exempt entities;

persons liable for alternative minimum tax;

persons holding an ADS or ordinary share as part of a straddle, hedging, conversion or integrated transaction;

persons that actually or constructively own 10% or more of our voting shares;

persons holding ADSs or ordinary shares through partnerships or other pass-through entities; or

persons who acquired ADSs or ordinary shares pursuant to the exercise of any employee share option or otherwise as consideration.

U.S. Holders are urged to consult their tax advisors about the application of the United States federal tax rules to their particular circumstances as well as the state and local and foreign tax consequences to them of the purchase, ownership and disposition of ADSs or ordinary shares.

The discussion below of the United States federal income tax consequences to U.S. Holders will apply if you are the beneficial owner of ADSs or ordinary shares and you are, for United States federal income tax purposes,

a citizen or individual resident of the United States;

a corporation (or other entity taxable as a corporation for United States federal income tax purposes) organized under the laws of the United States, any State or the District of Columbia;

an estate whose income is subject to United States federal income taxation regardless of its source; or

a trust that (1) is subject to the supervision of a court within the United States and the control of one or more United States persons or (2) has a valid election in effect under applicable United States Treasury regulations to be treated as a United States person.

The discussion below assumes that the representations contained in the deposit agreement are true and that the obligations in the deposit agreement and any related agreement will be complied with in accordance with their terms. If you hold ADSs, you will be treated as the holder of the underlying ordinary shares represented by those ADSs for United States federal income tax purposes.

The U.S. Treasury has expressed concerns that parties to whom ADSs are pre-released may be taking actions that are inconsistent with the claiming, by U.S. Holders of ADSs, of foreign tax credits for United States federal

Table of Contents

income tax purposes. Such actions would also be inconsistent with the claiming of the reduced rate of tax applicable to dividends received by certain non-corporate U.S. Holders, as described below. Accordingly, the availability of the reduced tax rate for dividends received by certain non-corporate U.S. Holders could be affected by future actions that may be taken by the U.S. Treasury or parties to whom ADSs are pre-released.

Taxation of Dividends and Other Distributions on the ADSs or Ordinary Shares

Subject to the passive foreign investment company rules discussed below, the gross amount of all our distributions to you with respect to the ADSs or ordinary shares will be included in your gross income as dividend income on the date of receipt by the depositary, in the case of ADSs, or by you, in the case of ordinary shares, but only to the extent that the distribution is paid out of our current or accumulated earnings and profits (computed under United States federal income tax principles). The dividends will not be eligible for the dividends-received deduction allowed to corporations in respect of dividends received from other U.S. corporations.

With respect to non-corporate U.S. Holders (including individual U.S. Holders) for taxable years beginning before January 1, 2011, dividends may be taxed at the lower applicable capital gains rate (qualified dividend income) provided that (1) the ADSs or ordinary shares are readily tradable on an established securities market in the United States or we are eligible for the benefit of the income tax treaty between the United States and the PRC, (2) we are not a passive foreign investment company (as discussed below) for either our taxable year in which the dividend was paid or the preceding taxable year, and (3) certain holding period requirements are met. For this purpose, ADSs listed on the Nasdaq National Market will be considered to be readily tradable on an established securities market in the United States. You should consult your tax advisor regarding the availability of the lower rate for dividends paid with respect to our ADSs or ordinary shares.

Dividends will constitute foreign source income for foreign tax credit limitation purposes. If the dividends are qualified dividend income (as discussed above), the amount of the dividend taken into account for purposes of calculating the foreign tax credit limitation will be limited to the gross amount of the dividend, multiplied by the reduced rate divided by the highest rate of tax normally applicable to dividends. The limitation on foreign taxes eligible for credit is calculated separately with respect to specific classes of income. For this purpose, dividends distributed by us with respect to ADSs or ordinary shares generally will constitute passive category income but could, in the case of certain U.S. Holders, constitute general category income. If PRC withholding taxes apply to dividends paid to you with respect to the ADSs or ordinary shares, you may be able to obtain a reduced rate of PRC withholding taxes under the income tax treaty between the United States and the PRC if certain requirements are met. In addition, subject to certain conditions and limitations, PRC withholding taxes on dividends may be treated as foreign taxes eligible for credit against your U.S. federal income tax liability. U.S. Holders should consult their own tax advisors regarding the creditability of any PRC tax.

To the extent that the amount of the distribution exceeds our current and accumulated earnings and profits, it will be treated first as a tax-free return of your tax basis in your ADSs or ordinary shares, and to the extent the amount of the distribution exceeds your tax basis, the excess will be taxed as capital gain. We do not intend to calculate our earnings and profits for United States federal income tax purposes. Therefore, a U.S. Holder should expect that a distribution will be reported as a dividend.

Taxation of Disposition of Shares

Subject to the passive foreign investment company rules discussed below, you will recognize taxable gain or loss on any sale, exchange or other taxable disposition of an ADS or ordinary share equal to the difference between the amount realized (in U.S. dollars) for the ADS or ordinary share and your tax basis (in U.S. dollars) in the ADS or ordinary share. The gain or loss will be capital gain or loss. If you are a non-corporate U.S. Holder, including an

individual U.S. Holder, who has held the ADS or ordinary share for more than one year, you will be eligible for reduced tax rates. The deductibility of capital losses is subject to limitations. Any such gain or loss that you recognize generally will be treated as United States source income or loss (in the case of losses, subject to certain limitations). However, in the event we are deemed to be a Chinese resident enterprise under PRC tax law, we may be eligible for the benefits of the income tax treaty between the United States and the PRC. In such event, if PRC tax were to be imposed on any gain from the disposition of the ADSs or ordinary shares, a U.S. Holder that is eligible for

Table of Contents

the benefits of the income tax treaty between the United States and the PRC may elect to treat such gain as PRC source income. U.S. Holders should consult their own tax advisors regarding the creditability of any PRC tax.

Passive Foreign Investment Company

Based on the market value of our ADSs and ordinary shares, the composition of our assets and income and our operations, we believe that for our taxable year ended December 31, 2008, we were not a passive foreign investment company (PFIC) for United States federal income tax purposes. However, our PFIC status for the current taxable year ending December 31, 2009 will not be determinable until its close, and, accordingly, there is no guarantee that we will not be a PFIC for the current taxable year (or any future taxable year). A non-U.S. corporation is considered a PFIC for any taxable year if either:

at least 75% of its gross income is passive income (the income test), or

at least 50% of the value of its assets (based on an average of the quarterly values of the assets during a taxable year) is attributable to assets that produce or are held for the production of passive income (the asset test).

We will be treated as owning our proportionate share of the assets and earning our proportionate share of the income of any other corporation in which we own, directly or indirectly, more than 25% (by value) of the shares.

We must make a separate determination each year as to whether we are a PFIC. As a result, our PFIC status may change. In particular, because the total value of our assets for purposes of the asset test generally will be calculated using the market price of our ADSs and ordinary shares, our PFIC status will depend in large part on the market price of our ADSs and ordinary shares which may fluctuate considerably. Accordingly, fluctuations in the market price of the ADSs and ordinary shares may result in our being a PFIC for any year. If we are a PFIC for any year during which you hold ADS or ordinary shares, we will continue to be treated as a PFIC for all succeeding years during which you hold ADS or ordinary shares. However, if we cease to be a PFIC, provided that you have not made a mark-to-market election, as described below, you may avoid some of the adverse effects of the PFIC regime by making a deemed sale election with respect to the ADSs or ordinary shares, as applicable.

If we are a PFIC for any taxable year during which you hold ADSs or ordinary shares, you will be subject to special tax rules with respect to any excess distribution that you receive and any gain you realize from a sale or other disposition (including a pledge) of the ADSs or ordinary shares, unless you make a mark-to-market election as discussed below. Distributions you receive in a taxable year that are greater than 125% of the average annual distributions you received during the shorter of the three preceding taxable years or your holding period for the ADSs or ordinary shares will be treated as an excess distribution. Under these special tax rules:

the excess distribution or gain will be allocated ratably over your holding period for the ADSs or ordinary shares,

the amount allocated to the current taxable year, and any taxable year prior to the first taxable year in which we became a PFIC, will be treated as ordinary income, and

the amount allocated to each other taxable year will be subject to the highest tax rate in effect for that taxable year and the interest charge generally applicable to underpayments of tax will be imposed on the resulting tax attributable to each such taxable year.

The tax liability for amounts allocated to years prior to the year of disposition or excess distribution cannot be offset by any net operating losses for such years, and gains (but not losses) realized on the sale of the ADSs or ordinary

shares cannot be treated as capital, even if you hold the ADSs or ordinary shares as capital assets.

Alternatively, a U.S. Holder of marketable stock (as defined below) in a PFIC may make a mark-to-market election for such stock of a PFIC to elect out of the tax treatment discussed in the two preceding paragraphs. If you make a valid mark-to-market election for the ADSs or ordinary shares, you will include in income each year an amount equal to the excess, if any, of the fair market value of the ADSs or ordinary shares as of the close of your taxable year over your adjusted basis in such ADSs or ordinary shares. You are allowed a deduction for the excess, if any, of the adjusted basis of the ADSs or ordinary shares over their fair market value as of the close of the taxable

Table of Contents

year. However, deductions are allowable only to the extent of any net mark-to-market gains on the ADSs or ordinary shares included in your income for prior taxable years. Amounts included in your income under a mark-to-market election, as well as gain on the actual sale or other disposition of the ADSs or ordinary shares, are treated as ordinary income. Ordinary loss treatment also applies to the deductible portion of any mark-to-market loss on the ADSs or ordinary shares, as well as to any loss realized on the actual sale or disposition of the ADSs or ordinary shares, to the extent that the amount of such loss does not exceed the net mark-to-market gains previously included for such ADSs or ordinary shares. Your basis in the ADSs or ordinary shares will be adjusted to reflect any such income or loss amounts. If you make such a mark-to-market election, tax rules that apply to distributions by corporations which are not PFICs would apply to distributions by us (except that the lower applicable capital gains rate would not apply).

The mark-to-market election is available only for marketable stock which is stock that is traded in other than *de minimis* quantities on at least 15 days during each calendar quarter (regularly traded) on a qualified exchange or other market, as defined in applicable Treasury regulations. We expect that the ADSs will continue to be listed on the Nasdaq National Market, which is a qualified exchange for these purposes, and, consequently, assuming that the ADSs are regularly traded, if you are a holder of ADSs, it is expected that the mark-to-market election would be available to you were we to become a PFIC.

If you hold ADSs or ordinary shares in any year in which we are a PFIC, you will be required to file Internal Revenue Service Form 8621 regarding distributions received on the ADSs or ordinary shares and any gain realized on the disposition of the ADSs or ordinary shares.

You are urged to consult your tax advisor regarding the application of the PFIC rules to your investment in ADSs or ordinary shares.

Information Reporting and Backup Withholding

Dividend payments with respect to ADSs or ordinary shares and proceeds from the sale, exchange or redemption of ADSs or ordinary shares may be subject to information reporting to the Internal Revenue Service and possible United States backup withholding at a current rate of 28%. Backup withholding will not apply, however, to a U.S. Holder who furnishes a correct taxpayer identification number and makes any other required certification or who is otherwise exempt from backup withholding. U.S. Holders who are required to establish their exempt status must provide such certification on Internal Revenue Service Form W-9. U.S. Holders should consult their tax advisors regarding the application of the United States information reporting and backup withholding rules.

Backup withholding is not an additional tax. Amounts withheld as backup withholding may be credited against your United States federal income tax liability, and you may obtain a refund of any excess amounts withheld under the backup withholding rules by filing the appropriate claim for refund with the Internal Revenue Service and furnishing any required information.

F. Dividends and Paying Agents

H. Documents on Display

Edgar Filing: Baidu, Inc. - Form 20-F

We previously filed with the SEC our registration statement on Form F-1, as amended and prospectus under the Securities Act of 1933, with respect to our ordinary shares.

We are subject to the periodic reporting and other informational requirements of the Securities Exchange Act of 1934, as amended, or the Exchange Act. Under the Exchange Act, we are required to file reports and other information with the SEC. Specifically, we are required to file annually a Form 20-F: (1) within six months after the end of each fiscal year, which is December 31, for fiscal years ending before December 15, 2011; and (2) within four months after the end of each fiscal year for fiscal years ending on or after December 15, 2011. Copies of reports and

Table of Contents

other information, when so filed, may be inspected without charge and may be obtained at prescribed rates at the public reference facilities maintained by the Securities and Exchange Commission at 100 F Street, N.E., Room 1580, Washington, D.C. 20549. The public may obtain information regarding the Washington, D.C. Public Reference Room by calling the Commission at 1-800-SEC-0330. The SEC also maintains a website at www.sec.gov that contains reports, proxy and information statements, and other information regarding registrants that make electronic filings with the SEC using its EDGAR system. As a foreign private issuer, we are exempt from the rules under the Exchange Act prescribing the furnishing and content of quarterly reports and proxy statements, and officers, directors and principal shareholders are exempt from the reporting and short-swing profit recovery provisions contained in Section 16 of the Exchange Act.

We will furnish The Bank of New York Mellon, the depository of our ADSs, with our annual reports, which will include a review of operations and annual audited consolidated financial statements prepared in conformity with U.S. GAAP, and all notices of shareholders' meetings and other reports and communications that are made generally available to our shareholders. The depository will make such notices, reports and communications available to holders of ADSs and, upon our request, will mail to all record holders of ADSs the information contained in any notice of a shareholders' meeting received by the depository from us.

In accordance with Nasdaq Marketplace Rule 4350(b), we will post this annual report on Form 20-F on our website at <http://ir.baidu.com>. In addition, we will provide hardcopies of our annual report free of charge to shareholders and ADS holders upon request.

I. Subsidiary Information

For a listing of our subsidiaries, see Item 4C. Information on the Company Organizational Structure.

Item 11. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk

Our exposure to interest rate risk primarily relates to excess cash invested in short-term fixed income instruments with original maturities of less than a year. Investments in both fixed rate and floating rate interest earning instruments carry a degree of interest rate risk. Fixed rate securities may have their fair market value adversely impacted due to a rise in interest rates, while floating rate securities may produce less income than expected if interest rates fall. Due in part to these factors, our future investment income may fall short of expectations due to changes in interest rates or we may suffer losses in principal if we have to sell securities which have declined in market value due to changes in interest rates. We have not been, and do not expect to be, exposed to material interest rate risks, and therefore have not used any derivative financial instruments to manage our interest risk exposure.

We had RMB301.2 million (US\$44.2 million) short-term investments as of December 31, 2008, with a weighted average duration of approximately 0.29 year. A hypothetical one percentage point (100 basis-point) increase in interest rates would have resulted in a decrease of approximately RMB0.9 million (US\$0.1 million) in the fair value of our fixed-income investments at December 31, 2008.

Foreign Exchange Risk

Most of our revenues and costs are denominated in RMB, while a significant portion of our cash and cash equivalents and short-term financial assets are denominated in U.S. dollars and held by the Cayman holding company. Our exposure to foreign exchange risk primarily relates to those financial assets denominated in U.S. dollars, mainly as a result of our past issuances of convertible preferred shares through private placements and proceeds from our initial

public offering. In addition, we commenced operation in Japan in late 2007. Until our Japan operation becomes self-sufficient, we will need to make capital injections into our Japan operation by converting U.S. dollars into Japanese Yen. We have not hedged exposures denominated in foreign currencies using any derivative financial instruments. Any significant revaluation of RMB against the U.S. dollar may materially affect our revenues, earnings and financial position, and the value of, and any dividends payable on, our ADS in

Table of Contents

U.S. dollars. See Item 3D. Key Information Risk Factors Risks Related to Doing Business in China Fluctuation in the value of the RMB may have a material adverse effect on your investment.

The RMB appreciated by 6.47% against the U.S. dollar in 2008. A 10% decrease in the exchange rate of the U.S. dollar against the RMB would have resulted in a decrease of RMB43.6 million (US\$6.4 million) in the value of our U.S. dollar- denominated financial assets at December 31, 2008.

Item 12. *Description of Securities Other than Equity Securities*

Not Applicable.

PART II

Item 13. *Defaults, Dividend Arrearages and Delinquencies*

None.

Item 14. *Material Modifications to the Rights of Security Holders and Use of Proceeds*

None.

Item 15. *Controls and Procedures*

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, has performed an evaluation of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) as of the end of the period covered by this report, as required by Rule 13a-15(b) under the Exchange Act.

Based upon that evaluation, our management has concluded that, as of December 31, 2008, our disclosure controls and procedures were effective in ensuring that the information required to be disclosed by us in the reports that we file and furnish under the Exchange Act was recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms, and that the information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our chief executive officer and chief financial officer, to allow timely decisions regarding required disclosure.

Management's Annual Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rule 13a-15(f) under the Exchange Act. Our management evaluated the effectiveness of our internal control over financial reporting, as required by Rule 13a-15(c) of the Exchange Act, based on criteria established in the framework in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, our management has concluded that our internal control over financial reporting was effective as of December 31, 2008.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. In addition, projections of any evaluation of effectiveness of our internal control over financial reporting to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the

degree of compliance with the policies and procedures may deteriorate.

Our independent registered public accounting firm, Ernst & Young Hua Ming, has audited the effectiveness of our internal control over financial reporting as of December 31, 2008, as stated in its report, which appears on page F-2 of this annual report on Form 20-F.

Table of Contents**Changes in Internal Control over Financial Reporting**

There were no changes in our internal controls over financial reporting that occurred during the period covered by this annual report on Form 20-F that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 16A. *Audit Committee Financial Expert*

Our board of directors has determined that Mr. William Decker, an independent director (under the standards set forth in Nasdaq Marketplace Rule 4350(d) and Rule 10A-3 under the Exchange Act) and member of our audit committee, is an audit committee financial expert.

Item 16B. *Code of Ethics*

Our board of directors adopted a code of business conduct and ethics that applies to our directors, officers, employees and advisors in July 2005. We have posted a copy of our code of business conduct and ethics on our website at <http://ir.baidu.com>.

Item 16C. *Principal Accountant Fees and Services*

The following table sets forth the aggregate fees by categories specified below in connection with certain professional services rendered by Ernst & Young Hua Ming, our principal external auditors, for the periods indicated.

	2007	2008
Audit fees(1)	US\$ 858,000	US\$ 870,000
Audit-related fees		
Tax fees(2)		US\$ 21,866
All other fees		

- (1) **Audit fees** means the aggregate fees billed in each of the fiscal years listed for professional services rendered by our principal auditors for the audit of our annual financial statements. In 2007 and 2008, the audit refers to integrated audit, including financial audit and audit pursuant to Section 404 of the Sarbanes-Oxley Act of 2002.
- (2) **Tax fees** means the aggregate fees billed in each of the fiscal years listed for professional services rendered by our principal auditors for tax compliance, tax advice, and tax planning. In 2008, the tax fees refer to fees paid to our principal auditors to review the compliance of our tax documentation.

All audit and non-audit services provided by our independent auditors must be pre-approved by our audit committee. Our audit committee has adopted a combination of two approaches in pre-approving proposed services: general pre-approval and specific pre-approval. With general approval, proposed services are pre-approved without consideration of specific case-by-case services; with specific approval, proposed services require the specific pre-approval of the audit committee. Unless a type of service has received general pre-approval, it will require specific pre-approval by our audit committee. Any proposed services exceeding pre-approved cost levels or budgeted amounts will also require specific pre-approval by our audit committee.

All requests or applications for services to be provided by our independent auditors that do not require specific approval by our audit committee will be submitted to our chief financial officer and must include a detailed description of the services to be rendered. The chief financial officer will determine whether such services are included within the list of services that have received the general pre-approval of the audit committee. The audit committee will be informed on a timely basis of any such services. Requests or applications to provide services that require specific approval by our audit committee will be submitted to the audit committee by both our independent auditors and our chief financial officer and must include a joint statement as to whether, in their view, the request or application is consistent with the SEC's rules on auditor independence.

Table of Contents

Item 16D. *Exemptions from the Listing Standards for Audit Committees*

Not applicable.

Item 16E. *Purchases of Equity Securities by the Issuer and Affiliated Purchasers*

No equity securities of our company were purchased by or on behalf of our company or any affiliated purchaser (as such term is defined in Rule 10b-18 under the Exchange Act) of our company in the year ended December 31, 2008. In 2008, we received authorizations and approvals from our board of directors and shareholders to repurchase up to US\$200 million of our ordinary shares represented by ADSs by the end of 2009.

As part of our share repurchase plan, in late December 2008, we entered into a structured share repurchase transaction with a major financial institution. Under this transaction, we made an upfront cash payment of US\$10 million in exchange for the right to receive either a number of our ADSs or a cash settlement amount (which is equal to our upfront cash payment plus a pre-determined premium) upon the expiration of the three-month term of the transaction, depending on the volume weighted average price (VWAP) of our ADSs at such expiration date. On the settlement date for this transaction in March 2009, we received US\$10.84 million in cash, including a pre-determined premium of US\$0.84 million. In March 2009, we entered into a similar transaction with the same financial institution with an upfront payment of US\$20 million.

Furthermore, we commenced repurchase of our ADSs in the open market in the first quarter of 2009 pursuant to a Rule 10b5-1 share repurchase plan. As of March 31, 2009, we have purchased a total of 32,470 of our ADSs at an average price of \$109.0679 per ADS, including transaction costs. The ordinary shares underlying the repurchased ADSs will be canceled in accordance with Cayman Islands law. As of March 31, 2009, approximately US\$196.5 million of our ADSs may still be repurchased by the end of 2009.

Item 16F. *Change in Registrant's Certifying Accountant*

Not applicable.

Item 16G. *Corporate Governance*

Nasdaq Marketplace Rule 4350(e) requires each issuer to hold an annual meeting of shareholders no later than one year after the end of the issuer's fiscal year-end. However, Nasdaq Marketplace Rule 4350(a)(1) permits foreign private issuers like us to follow home country practice in certain corporate governance matters. Maples and Calder, our Cayman Islands counsel, has provided a letter to the Nasdaq Stock Market certifying that under Cayman Islands law, we are not required to hold annual shareholder meetings every year.

We may follow home country practice with respect to annual meetings. We held an annual meeting of shareholders in December 2008 for the purposes of obtaining shareholders' approvals on certain corporate matters requiring shareholders' approvals. We may hold additional annual shareholder meetings in the future if there are significant issues that require shareholders' approvals.

Other than the annual meeting requirements, we have followed and intend to continue to follow the applicable corporate governance standards under Nasdaq Marketplace Rules.

PART III

Item 17. *Financial Statements*

We have elected to provide financial statements pursuant to Item 18.

Item 18. *Financial Statements*

The consolidated financial statements of Baidu, Inc. and its subsidiaries are included at the end of this annual report.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders

Baidu, Inc.

We have audited the accompanying consolidated balance sheets of Baidu, Inc. (the Company) and subsidiaries as of December 31, 2007 and 2008, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2008. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Baidu, Inc. and subsidiaries at December 31, 2007 and 2008, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2008, in conformity with U.S. generally accepted accounting principles.

As discussed in Note 2 to these consolidated financial statements, in 2006, the Company changed its method of accounting for share-based payments in accordance with the guidance provided in the Statement of Financial Accounting Standards No. 123(R), *Share-Based Payment*.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Baidu, Inc.'s internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated April 7, 2009 expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders

Baidu, Inc.

We have audited Baidu, Inc.'s internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Baidu, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Baidu, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2008, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the accompanying consolidated balance sheets of Baidu, Inc. and subsidiaries as of December 31, 2007 and 2008, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2008, and our report dated April 7, 2009, expressed an unqualified opinion thereon.

/s/ Ernst & Young Hua Ming
