PRESS RELEASES

On January 22, 2003, The Timken Company issued the following press release:

The Timken Company Reports

Improved Fourth Quarter and 2002 Results

CANTON, OH, January 22, 2003 - Improved fourth quarter performance versus 2001 capped a strong year for The Timken Company, which today reported increased sales and earnings for both the quarter and the full year.

Net income for the 2002 fourth quarter was \$36.5 million or \$0.57 per diluted share versus \$1.2 million or \$0.02 per diluted share in the fourth quarter a year ago, when the economy was particularly weak. Sales were \$644.9 million, 12 percent above the \$573.6 million recorded a year ago, despite a 2002 fourth quarter decline in U.S. industrial production and a still sluggish U.S.

Edgar Filing: TIMKEN CO - Form 8-K

and global economy. However, strong automotive markets in North America, the impact of our manufacturing strategy initiative and the benefits of the higher Continued Dumping and Subsidy Offset Act (CDSOA) payment improved results in the fourth quarter.

Excluding CDSOA income, restructuring and reorganization costs and adjustments for goodwill amortization, the company reported fourth quarter earnings of \$12 million or \$0.19 per diluted share versus a loss of \$11.4 million or \$0.19 per diluted share a year ago.

"While improved volumes related to a strong automotive industry helped sales growth, the transformation in all three of our company's business segments also contributed significantly to the bottom line," said James W. Griffith, president and CEO. "A continued emphasis on reducing costs, creating a network of focused factories and successfully introducing new products and services resulted in strengthened profitability despite a struggling economy."

For the year 2002, Timken reported sales of \$2.6 billion, a 4 percent increase from 2001. The company had income before the cumulative effect of an accounting change of \$51.4 million or \$0.83 per diluted share in 2002 versus a loss of \$41.7 million or \$0.69 per diluted share in 2001. Including a goodwill impairment write-off of \$12.7 million after taxes in the third quarter reflecting the cumulative effect of an accounting change, the company had net income of \$38.7 million or \$0.62 per diluted share in 2002.

Excluding CDSOA income, restructuring and reorganization costs, adjustments for goodwill amortization and the cumulative effect of the accounting change, the company reported net income of \$53.3 million or \$0.87 per diluted share versus \$0.7 million or \$0.01 per diluted share a year ago.

In 2002 and 2001, the company received payments resulting from the CDSOA, which requires that tariffs collected on dumped imports be directed to the industries harmed. This

-2-

special payment (net of expenses) was \$50.2 million in 2002 versus \$29.6 million in 2001. Despite World Trade Organization objections to the CDSOA payments, the company continues to believe the U.S. law is appropriate and justified. Payments under CDSOA are made to eligible domestic producers only when dumping continues after an anti-dumping order is issued.

Timken's manufacturing strategy and salaried workforce reduction initiatives announced in 2001 have met the \$80 million annual rate of savings projection targeted for 2002. The company expects to reach the \$120 million of annual savings projected for the end of 2004 from these initiatives. Restructuring and reorganization costs associated with these initiatives were completed in 2002. The cumulative program costs of \$107.4 million were within the range announced in the second quarter of 2001.

Net debt at the end of 2002 was \$379.2 million, down \$84.4 million from \$463.6 million at the end of 2001. This reduction resulted from improved profitability, prudent capital spending and the CDSOA payment.

As part of the company's long-term pension funding strategy, in 2002 Timken contributed \$106.4 million to its domestic pension plans, \$54.5 million of which was company common stock. As a result of a negative 6 percent return on the company's domestic pension investments and a reduction in its discount rate from 7.5 to 6.6 percent, Timken recorded a \$401.6 million minimum pension liability increase. This reduced shareholders' equity by \$254.3 million and

Edgar Filing: TIMKEN CO - Form 8-K

increased deferred tax assets by \$147.3 million. As a result of declines in the financial markets, the company is changing its assumption for expected rate of return on plan assets from 9.5 to 8.75 percent for 2003. This change, along with the lower discount rate, will result in an increase in 2003 pretax pension expense of approximately \$25 million.

The company's announced plan to acquire Torrington is proceeding as expected. Timken received U.S. antitrust approval for the acquisition under the Hart-Scott-Rodino Act in December. The transaction is expected to close during the first quarter of 2003, pending additional regulatory clearances outside the United States, successful completion of debt and equity financings and customary closing conditions. A dedicated team is in place, planning for the Torrington integration. In connection with the Torrington acquisition, the company believes it can achieve pretax savings of approximately \$80 million by the end of 2005 before implementation costs. This includes pretax savings of approximately \$20 million by the end of the first year following the acquisition. Timken also expects to utilize cash resources of approximately \$130 million for integration and implementation activities over the next four years.

The following segment results exclude CDSOA income, restructuring and reorganization costs and goodwill amortization.

Automotive Bearings' Results

Automotive fourth quarter EBIT was \$11.6 million on sales of \$210.8 million, compared to a loss of \$2.0 million on sales of \$185.3 million a year ago. Cost control, improved volumes, new product sales and a year-end LIFO adjustment contributed to Automotive's performance. Partially offsetting these positive items were increased costs due to manufacturing inefficiencies,

-3-

including those associated with servicing high product demand levels during the Duston, England, plant closing. For the year sales were \$840.8 million versus \$751.0 million last year. EBIT was \$32.6 million versus a loss of \$11.4 million in 2001. This resulted from strong markets, particularly in North America, coupled with sales on seven new vehicle platforms and the positive impact of the manufacturing strategy initiatives. Closing the Duston plant will contribute to improvements in the cost structure and asset utilization of the Automotive Business.

Industrial Bearings' Results

Fourth quarter Industrial EBIT was \$13.8 million on sales of \$225.3 million compared to EBIT of \$5.7 million on sales of \$204.2 million for the same period in 2001. Soft markets and reduced demand created challenges for the Industrial Business throughout 2002. However, the manufacturing transformation positively impacted the business by reducing costs and improving productivity, offsetting weak markets. In 2002, Industrial won new business and introduced a broader line of products and services to meet distributor needs. For the year, sales were \$883.5 million with EBIT of \$51.5 million versus \$882.3 million in sales and \$43.4 million in EBIT last year.

Steel Business Results

The Steel Business reported fourth quarter EBIT of \$0.2 million on sales of \$240.7 million, which includes intersegment sales of \$31.8 million. This compares with a loss of \$6.3 million on fourth quarter sales of \$216.1 million in 2001. Continued strong sales to the automotive industry and modest increases to industrial customers were tempered by weaknesses in the aerospace

Edgar Filing: TIMKEN CO - Form 8-K

specialty steel business. EBIT was hurt by raw material costs and holiday shutdowns and a year-end LIFO adjustment. For the year Steel's sales, including intersegment sales, increased 2 percent to \$981.3 million compared to \$960.4 million in 2001. EBIT in 2002 was \$32.5 million, up from \$13.4 million in 2001. Despite the modest increase in sales in 2002, the Steel Business more than doubled EBIT with tight cost control and improved productivity.

Outlook

The Timken Company continues to be concerned about the health of the economy, but is positioned to continue improving financial performance in 2003. We believe that output in the global automotive industry will be softer in 2003, while industrial markets should see some modest recovery over the course of the year. The company expects to continue to benefit from initiatives to reduce costs and from new product and service offerings that will improve profitability. We also expect that the Torrington acquisition, when completed, will provide additional opportunities to leverage financial performance.

Certain statements in this news release (including statements regarding the company's forecasts, beliefs and expectations) that are not historical in nature are "forward-looking" statements within the meaning of the Private Securities Litigation Reform Act of 1995. The company cautions that actual results may differ materially from those projected or implied in forward-looking statements due to a variety of important factors, including European Commission antitrust clearance, financing and other closing risks associated with the consummation of the acquisition of Torrington; the uncertainties in both timing and amount, if

-4-

any, of actual benefits realized through economies of scale, elimination of duplicative costs, operating efficiencies and enhanced productivity through the integration of Torrington with Timken's operations; risks associated with diversion of management's attention from routine operations during the integration process; risks associated with the greater level of debt associated with the combined companies; and the impact on operations of general economic conditions, the cyclical nature of the company's business, customer demand and the company's ability to achieve the benefits of its ongoing restructuring and cost-reduction programs. These and additional factors are described in greater detail in the company's 2001 Annual Report, page 39, the Annual Report on Form 10-K for the year ended December 31, 2001 and the quarterly reports on Form 10-Q for the periods ended March 31, June 30 and September 30, 2002. The company undertakes no obligation to update or revise any forward-looking statement.

The Timken Company (NYSE: TKR) (<http://www.timken.com/>) is a leading international manufacturer of highly engineered bearings, alloy and specialty steels and components, as well as a provider of related products and services. With operations in 24 countries, the company employs about 18,000 people worldwide. The company will conduct a teleconference on January 22 at 10 a.m. Eastern Daylight Time on its fourth quarter and year-end results. Dial 706-634-0975 (reference Timken) or link to www.timken.com for the Web cast. Replay will be available by calling 706-645-9291, beginning at 1 p.m. EDT, January 22 through 11:59 p.m. on January 31. Access Code is 7490552.
