FreightCar America, Inc.
Notes to Condensed Consolidated Financial Statements
(Unaudited)

(In thousands, except share and per share data)

Note 1 Description of the Business

FreightCar America, Inc. (FCA), through its direct and indirect wholly owned subsidiaries, JAC Intermedco, Inc. (Intermedco), JAC Operations, Inc. (Operations), Johnstown America Corporation (JAC), Freight Car Services, Inc. (FCS), JAIX Leasing Company (JAIX), JAC Patent Company (JAC Patent) and FreightCar Roanoke, Inc. (FCR) (herein collectively referred to as the Company), manufactures, rebuilds, repairs, sells and leases railroad freight cars used for hauling coal, other bulk commodities, steel and other metals, forest products, intermodal containers and automobiles and trucks. The Company has facilities in Danville, Illinois; Roanoke, Virginia; and Johnstown, Pennsylvania. The Company s operations comprise one operating segment. The Company and its direct and indirect wholly owned subsidiaries are all Delaware corporations.

Note 2 Basis of Presentation

The accompanying condensed consolidated financial statements include the accounts of FCA, Intermedco, Operations, JAC, FCS, JAIX, JAC Patent and FCR. All significant intercompany accounts and transactions have been eliminated in consolidation. The foregoing financial information has been prepared in accordance with the accounting principles generally accepted in the United States of America (GAAP) and rules and regulations of the Securities and Exchange Commission (the SEC) for interim financial reporting. The preparation of the financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from these estimates. The results of operations for the three months and nine months ended September 30, 2008 are not necessarily indicative of the results to be expected for the full year. The accompanying interim financial information is unaudited; however, the Company believes the financial information reflects all adjustments (consisting of items of a normal recurring nature) necessary for a fair presentation of financial position, results of operations and cash flows in conformity with GAAP. Certain information and note disclosures normally included in the Company s annual financial statements prepared in accordance with GAAP have been condensed or omitted. These interim financial statements should be read in conjunction with the audited financial statements contained in the Company s annual report on Form 10-K for the year ended December 31, 2007.

Reclassification

Certain prior year amounts on the condensed consolidated balance sheets have been reclassified to conform to the September 30, 2008 presentation.

Note 3 Recent Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 157, *Fair Value Measurements*. SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS No. 157 requires companies to disclose the fair value of their financial instruments according to a fair value hierarchy as defined in the standard. Additionally, companies are required to provide enhanced disclosure regarding financial instruments in one of the valuation categories, including a separate reconciliation of the beginning and ending balances for each major category of assets and liabilities. SFAS No. 157 is effective for financial assets and financial liabilities for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The FASB deferred the effective date of SFAS No. 157 for all nonfinancial assets and liabilities, except those that are recognized or disclosed at fair value in the financial statements on at least an annual basis, until January 1, 2009 for calendar year-end entities. Implementation of the provisions of SFAS No. 157 did not have a material impact on the Company s financial statements, as the Company does not currently hold financial assets and liabilities that are required to be marked to fair value.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*. SFAS No. 159 permits companies to measure certain financial instruments and certain other items at fair value. The standard requires that unrealized gains and losses on items for which the fair value option has been elected

be reported in earnings. The Company implemented SFAS No. 159 effective January 1, 2008, but elected not to apply the provisions of SFAS No. 159 to any of its existing financial assets or liabilities, therefore the provisions of SFAS No. 159 did not have an impact on the Company's financial statements.

Table of Contents

In December 2007, the FASB issued SFAS No. 141(R), *Business Combinations*, which retains the fundamental requirements in SFAS No. 141, including that the purchase method be used for all business combinations and for an acquirer to be identified for each business combination. SFAS No. 141(R) defines the acquirer as the entity that obtains control of one or more businesses in a business combination and establishes the acquisition date as the date that the acquirer achieves control instead of the date that the consideration is transferred. This standard requires an acquirer in a business combination to recognize the assets acquired, liabilities assumed, and any noncontrolling interest in the acquiree at the acquisition date, measured at their fair values as of that date. It also requires the recognition of assets acquired and liabilities assumed arising from certain contractual contingencies as of the acquisition date, measured at their acquisition-date fair values. SFAS No. 141(R) is effective for any business combination with an acquisition date on or after January 1, 2009. The Company is in the process of evaluating the requirements of SFAS No. 141(R), but expects only prospective impact on the Company's financial statements.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements—an amendment of ARB No. 51*. SFAS No. 160 amends Accounting Research Bulletin No. 51, *Consolidated Financial Statements*, to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. This standard defines a noncontrolling interest, sometimes called minority interest, as the portion of equity in a subsidiary not attributable, directly or indirectly to a parent. SFAS No. 160 requires, among other items, that a noncontrolling interest be included in the consolidated statement of financial position within equity separate from the parent's equity, consolidated net income be reported at amounts inclusive of both the parent's and the noncontrolling interest's shares and, separately, the amounts of consolidated net income attributable to the parent and the noncontrolling interest all on the consolidated statement of income. If a subsidiary is deconsolidated, SFAS No. 160 requires any retained noncontrolling equity investment in the former subsidiary be measured at fair value and a gain or loss to be recognized in net income based on such fair value. The Company implemented SFAS No. 160 effective January 1, 2008, but currently does not have any noncontrolling interests in subsidiaries, therefore the provisions of SFAS No. 160 did not have an impact on the Company's financial statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133*. SFAS No. 161 requires disclosures of how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for and how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. SFAS No. 161 is effective for fiscal years beginning after November 15, 2008, with early adoption permitted. The Company currently does not utilize derivative instruments or hedging activities. Other than the enhanced disclosures required if the Company engages in these activities in the future, the Company does not expect the provisions of SFAS No. 161 to have a material impact on the Company's financial statements.

In April 2008, the FASB issued FASB Staff Position (FSP) No. FAS 142-3, *Determination of the Useful Life of Intangible Assets*. FSP No. FAS 142-3 amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under SFAS No. 142, *Goodwill and Other Intangible Assets*. The intent of FSP No. FAS 142-3 is to improve the consistency between the useful life of a recognized intangible asset under SFAS No. 142 and the period of expected cash flows used to measure the fair value of the asset under other accounting principles generally accepted in the United States. FSP No. FAS 142-3 is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years. The guidance for determining the useful life of a recognized intangible asset shall be applied prospectively to intangible assets acquired after the effective date. Certain disclosure requirements will be applied prospectively to all intangible assets recognized as of, and subsequent to, the effective date. The Company will apply the guidance of FSP No. FAS 142-3 to intangible assets acquired after December 31, 2008. The Company does not expect the provisions of FSP No. FAS 142-3 to have a material impact on the Company's financial statements.

In May 2008, the FASB issued FSP No. APB 14-1, *Accounting for Convertible Debt Instruments That May Be Settled in Cash Upon Conversion (Including Partial Cash Settlement)*. FSP No. APB 14-1 specifies that issuers of convertible debt instruments that may be settled in cash upon conversion should separately account for the liability and equity components in a manner that will reflect the entity's nonconvertible debt borrowing rate. FSP No. APB 14-1 is

effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years. The Company has not issued convertible debt securities; therefore, the Company does not expect the provisions of FSP No. APB 14-1 to have a material impact on the Company's financial statements.

Table of Contents**Note 4 Accounts and Notes Receivable**

Accounts and notes receivable of \$68,320 at September 30, 2008 includes interest-bearing notes receivable of \$54,345, from customers in the normal course of our business. The notes receivable are payable in November 2008. The Company had no notes receivable at December 31, 2007.

Note 5 Inventories

Inventories are stated at the lower of first-in, first-out cost or market and include material, labor and manufacturing overhead. The components of inventories are as follows:

	September 30, 2008	December 31, 2007
Work in progress	\$ 82,446	\$ 48,088
Finished new railcars	30,295	1,757
Used railcars held for sale	1,645	
Total inventories	\$ 114,386	\$ 49,845

Management established a reserve of \$214 and \$1,177 relating to slow-moving inventory for raw materials or work in progress at September 30, 2008 and December 31, 2007, respectively.

Note 6 Leased Railcars

In response to competitive market conditions, the Company began offering railcar leasing to its customers on a selective and limited basis during the first quarter of 2008. These transactions are being packaged and offered for sale to the Company's leasing company customers. The Company believes that its leasing activity will improve its ability to service its customers and compete effectively during this phase of the railcar cycle.

The Company periodically evaluates leased railcars to determine whether it is probable that the leased railcars will be sold within one year. When the Company believes it is probable that the leased railcars will be sold within one year, the leased railcars are treated as assets held for sale and classified as current assets on the balance sheet. Leased railcars held for sale are carried at the lower of cost or market value and are not depreciated. When the Company believes it is not probable that leased railcars will be sold within one year, the leased railcars are included in railcars on operating leases on the balance sheet and are depreciated. The Company recognizes operating lease revenue on leased railcars on a straight-line basis over the life of the lease. The Company recognizes revenue from the sale of railcars under operating leases on a gross basis as manufacturing sales and cost of sales if the railcars are sold within 12 months and on a net basis in leasing revenue as a gain (loss) on sale of leased railcars if the railcars are held in excess of 12 months.

Leased railcars at September 30, 2008 include leased railcars classified as held for sale of \$705 and railcars on operating leases classified as long-term assets of \$35,156. Due to current market conditions, leased railcars of \$7,777 previously classified as held for sale were reclassified as long-term assets during the third quarter of 2008. An impairment write-down of \$97 related to these railcars on operating leases was recorded during the three months ended September 30, 2008. Leased railcars at September 30, 2008 are subject to lease agreements with external customers with terms of up to three years. The Company had no leased railcars at December 31, 2007.

Future minimum rental revenues on leases at September 30, 2008 are as follows:

Three months ending December 31, 2008	\$ 763
Year ending December 31, 2009	2,324
Year ending December 31, 2010	2,012
Year ending December 31, 2011	1,071
	\$ 6,170

Table of Contents**Note 7 Property, Plant and Equipment and Railcars on operating leases**

Property, plant and equipment consists of the following:

	September 30, 2008	December 31, 2007
Land	\$ 701	\$ 701
Buildings and improvements	20,717	20,559
Machinery and equipment	42,578	40,228
Cost of buildings, improvements, machinery and equipment	63,295	60,787
Less: Accumulated depreciation and amortization	(38,373)	(35,697)
Buildings, improvements, machinery and equipment, net of accumulated depreciation and amortization	24,922	25,090
Construction in process	4,561	1,130
Total property, plant and equipment, net	\$ 30,184	\$ 26,921

Railcars on operating leases consist of the following:

	September 30, 2008	December 31, 2007
Cost of railcars on operating leases	\$ 35,340	\$
Less: Accumulated depreciation and amortization	(184)	
Railcars on operating leases, net	\$ 35,156	\$

Note 8 Goodwill and Intangible Assets

The Company performs the goodwill impairment test required by SFAS No. 142, *Goodwill and Other Intangible Assets*, as of January 1 of each year. The valuation uses a combination of methods to determine the fair value of the Company (which consists of one reporting unit) including prices of comparable businesses, a present value technique and recent transactions involving businesses similar to the Company. There was no adjustment required based on the annual impairment tests for 2008 and 2007.

Goodwill and intangible assets consist of the following:

	September 30, 2008	December 31, 2007
Patents	\$ 13,097	\$ 13,097
Accumulated amortization	(8,458)	(8,014)
Patents, net of accumulated amortization	4,639	5,083
Goodwill	21,521	21,521
Total goodwill and intangible assets	\$ 26,160	\$ 26,604

Patents are being amortized on a straight-line method over their remaining legal life from the date of acquisition. The weighted average remaining life of the Company's patents is nine years. Amortization expense related to patents, which is included in cost of sales, was \$148 for each of the three months ended September 30, 2008 and 2007, \$444 for the nine months ended September 30, 2008 and \$443 for the nine months ended September 30, 2007. The Company estimates amortization expense for each of the three years in the period ending December 31, 2010 will be approximately \$590 and for each of the two years in the period ending December 31, 2012 will be approximately \$586.

Note 9 Product Warranties

Warranty terms are based on the negotiated railcar sales contracts and typically are for periods of one to five years. The changes in the warranty reserve for the three and nine months ended September 30, 2008 and 2007, are as follows:

Table of Contents

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2008	2007	2008	2007
Balance at the beginning of the period	\$ 10,916	\$ 12,617	\$ 10,551	\$ 12,051
Warranties issued during the period	925	680	2,641	2,779
Reductions for payments, cost of repairs and other	(538)	(1,519)	(1,889)	(3,052)
Balance at the end of the period	\$ 11,303	\$ 11,778	\$ 11,303	\$ 11,778

Note 10 Revolving Credit Facilities

On September 30, 2008, certain of the Company's wholly owned subsidiaries, JAC, FCS, Operations, JAIX and FCR (each, a Co-Borrower and collectively, the Co-Borrowers), entered into the First Amendment to the Second Amended and Restated Credit Agreement (the Credit Agreement Amendment) with the lenders party thereto (collectively, the Lenders). The Credit Agreement Amendment amends the Second Amended and Restated Credit Agreement (the Original Credit Agreement) and, as amended by the Credit Agreement Amendment, the Credit Agreement) dated as of August 24, 2007.

The Credit Agreement Amendment amends the Original Credit Agreement, by: (1) reducing the Lenders commitments to a \$50,000 senior secured revolving credit facility, including a sub-facility for a swing line loan in an amount not to exceed \$5,000; (2) increasing the interest rate to LIBOR plus an applicable margin of between 1.50% and 2.25% depending on Revolving Loan Availability (as defined in the Credit Agreement); and (3) releasing JAIX as a Co-Borrower under the Credit Agreement. The Co-Borrowers were required to pay an amendment fee of 0.20% of each Lender's commitment. Borrowings under the Credit Agreement remain collateralized by substantially all of the assets of the Company and the remaining Co-Borrowers. Additionally, JAIX guaranteed the Revolving Credit Facility. The proceeds of the revolving credit facility are available to finance the working capital requirements of the Company through direct borrowings and the issuance of stand-by-letters of credit. The amount available under the revolving credit facility is based on the lesser of (1) \$50,000 or (2) an amount equal to a percentage of eligible accounts receivable plus a percentage of eligible finished inventory plus a percentage of semi-finished inventory. The revolving credit facility has a term ending on May 31, 2012. The Company is required to pay an annual commitment fee of between 0.175% and 0.25% based on Revolving Loan Availability. The Credit Agreement Amendment has both affirmative and negative covenants, including, a minimum fixed charge coverage ratio and limitations on debt, liens, dividends, investments, acquisitions and capital expenditures.

As of September 30, 2008 and December 31, 2007, the Company had no borrowings under the revolving credit facility. The Company had \$15,560 and \$8,828 in outstanding letters of credit under the letter of credit sub-facility as of September 30, 2008 and December 31, 2007, respectively and the ability to borrow \$34,440 under the revolving credit facility as of September 30, 2008. Under the revolving credit facility, the Company's subsidiaries are permitted to pay dividends and transfer funds to the Company without restriction.

JAIX Revolving Credit Facility

Also on September 30, 2008, JAIX entered into a Credit Agreement (the JAIX Credit Agreement) with the lenders party thereto (collectively, the JAIX Lenders). The JAIX Credit Agreement consists of a \$60,000 senior secured revolving credit facility. The JAIX Credit Agreement has a term ending on March 31, 2012 and bears interest at the Eurodollar Loan Rate (as defined in the JAIX Credit Agreement) plus 2.00% for the first two years of the JAIX Credit Agreement (the Revolving Period) and plus 2.50% for the remainder of the term until the termination date. JAIX is required to pay an annual commitment fee of 0.30% during the Revolving Period. Borrowings under the JAIX Credit Agreement are collateralized by substantially all of the assets of JAIX. Additionally, FCA guaranteed the JAIX revolving Credit Facility.

Availability under the JAIX Revolving Credit Facility is based on a percentage of the Eligible Railcar Leases (as defined in the agreement) held under the JAIX Revolving Credit Facility. For the first two years the facility requires interest only payments, thereafter the amount drawn on each group of Eligible Railcars under lease is required to be

repaid in equal installments at the 6, 12 and 18 month anniversaries of such leases. The Revolving Credit Agreement has both affirmative and negative covenants, including, without limitation, a minimum fixed charge coverage ratio, a minimum tangible net worth, a requirement to deposit restricted cash and limitations on debt, liens, dividends, investments, acquisitions and capital expenditures. The JAIX Credit Agreement also provides for customary events of default. As of September 30, 2008 the Company had no borrowings under the JAIC Revolving Credit Agreement.

Table of Contents

As of September 30, 2008, the Company was in compliance with all covenant requirements under its revolving credit facilities.

Note 11 Stock-Based Compensation

On January 10, 2008 and January 13, 2008, respectively, the Company awarded 11,500 and 29,925 shares of restricted stock to certain employees of the Company pursuant to its 2005 Long Term Incentive Plan. The restricted stock awarded on January 10, 2008 will vest in five equal annual installments beginning on January 10, 2009 while the restricted stock awarded on January 13, 2008 will vest in three equal annual installments beginning on January 13, 2009, with the continued vesting of each award subject to the recipient's continued employment with the Company. Stock compensation expense will be recognized over the vesting period based on the fair market value of the stock on the date of the award based on traded market prices for the Company's stock.

On January 13, 2008, the Company awarded 190,100 non-qualified stock options to certain employees of the Company pursuant to its 2005 Long Term Incentive Plan. The stock options will vest in three equal annual installments beginning on January 13, 2009 and have a contractual term of 10 years. The exercise price of each option is \$30.47, which was the fair market value of the Company's stock on the date of the grant. The Company recognizes stock compensation expense based on the fair value of the award on the grant date using the Black-Scholes option valuation model. The estimated fair value of \$12.36 per option will be recognized over the period during which an employee is required to provide service in exchange for the award, which is usually the vesting period. The following assumptions were used to value the 2008 stock options: expected lives of the options of 6 years; expected volatility of 40.78%; risk-free interest rate of 3.08%; and expected dividend yield of 0.79%. Expected life in years was determined using the simplified method allowed by the Securities and Exchange Commission in accordance with Staff Accounting Bulletin No. 110. Expected volatility was based on the historical volatility of the Company's stock. The risk-free interest rate was based on the U.S. Treasury bond rate for the expected life of the option. The expected dividend yield was based on the latest annualized dividend rate and the current market price of the underlying common stock on the date of the grant.

On May 14, 2008, the Company awarded 7,122 shares of restricted stock to certain individuals for service on the Company's Board of Directors pursuant to its 2005 Long Term Incentive Plan. The restricted stock awarded on May 14, 2008 will vest on May 15, 2009. Stock compensation expense will be recognized over the vesting period based on the fair market value of the stock on the date of the award based on traded market prices for the Company's stock.

As of September 30, 2008, there was \$2,724 of unearned compensation expense related to the stock options and restricted stock granted during the nine months ended September 30, 2008, which will be recognized over the average remaining requisite service period of 28 months.

Note 12 Comprehensive Income (Loss)

Comprehensive income (loss) is defined as the change in equity of a business enterprise during a period from transactions and other events and circumstances from non-owner sources. Comprehensive income (loss) consists of net operating income (loss) and the unrecognized pension and postretirement costs, which are shown net of tax. Net operating income (loss) reported in the Condensed Consolidated Statements of Operations to total comprehensive income (loss) is reconciled as follows:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2008	2007	2008	2007
Net operating income (loss)	\$ 7,389	\$ 8,681	\$ (3,713)	\$ 43,086
Other comprehensive income:				
Amortization of prior service costs and actuarial losses, net of tax	64	518	295	1,560
Total comprehensive income (loss)	\$ 7,453	\$ 9,199	\$ (3,418)	\$ 44,646

Table of Contents**Note 13 Employee Benefit Plans**

The Company has qualified, defined benefit pension plans covering substantially all of the employees of JAC, Operations and JAIX. The Company uses a measurement date of December 31 for all of its employee benefit plans. Generally, contributions to the plans are not less than the minimum amounts required under the Employee Retirement Income Security Act and not more than the maximum amount that can be deducted for federal income tax purposes. The plans' assets are held by independent trustees and consist primarily of equity and fixed income securities. The Company also provides certain postretirement health care benefits for certain of its salaried and hourly retired employees. Generally, employees may become eligible for health care benefits if they retire after attaining specified age and service requirements. These benefits are subject to deductibles, co-payment provisions and other limitations. The components of net periodic benefit cost for the three months and nine months ended September 30, 2008 and 2007, are as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Pension Benefits				
Service cost	\$ 282	\$ 557	\$ 846	\$ 1,671
Interest cost	842	693	2,526	2,078
Cost included in special charges			9,826	
Expected return on plan assets	(940)	(879)	(2,819)	(2,637)
Amortization of prior service cost		178		534
Amortization of unrecognized net loss	7	110	21	331
	\$ 191	\$ 659	\$ 10,400	\$ 1,977
	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Postretirement Benefit Plan				
Service cost	\$ 17	\$ 170	\$ 51	\$ 512
Interest cost	808	737	2,424	2,210
Cost included in special charges			8,889	
Amortization of prior service cost	56	431	168	1,293
Amortization of unrecognized net loss	41	94	123	281
	\$ 922	\$ 1,432	\$ 11,655	\$ 4,296

On June 24, 2008, the Company announced a tentative global settlement relating to the closing of its Johnstown, Pennsylvania manufacturing facility. See Note 16. If the settlement receives court approval, (which the Company believes is probable), certain employees of the Company's Johnstown facility will be entitled to additional service credit and contractual termination benefits for pension and postretirement purposes, which resulted in the Company recording additional pension and postretirement benefit costs under SFAS No. 88 and SFAS No. 106 of \$9,826 and \$8,889, respectively, during the nine months ended September 30, 2008.

The Company made contributions to the Company's defined benefit pension plans of \$6,750 and \$0, respectively, for the three months ended September 30, 2008 and 2007, and \$6,750 and \$5,373, respectively, for the nine months ended September 30, 2008 and 2007. The Company made payments to the Company's postretirement benefit plan of approximately \$928 and \$710, respectively, for the three months ended September 30, 2008 and 2007, and \$2,738 and \$2,103, respectively, for the nine months ended September 30, 2008 and 2007. Total payments to the Company's

postretirement benefit plan in 2008 are expected to be approximately \$5,188. As of December 31, 2007, the Company's benefit obligations under its defined benefit pension plans and its postretirement benefit plan were \$55,393 and \$53,078, respectively, which exceeded the fair value of plan assets by \$10,420 and \$53,078, respectively. The Company also maintains qualified defined contribution plans which provide benefits to employees based on employee contributions, years of service, employee earnings or certain subsidiary earnings, with discretionary contributions allowed. Expenses related to these plans were \$339 and \$286 for the three months ended September 30, 2008 and 2007, respectively, and \$1,166 and \$1,121 for the nine months ended September 30, 2008 and 2007, respectively.

Table of Contents**Note 14 Risks and Contingencies**

The Company is involved in various warranty and repair claims and related threatened and pending legal proceedings with its customers in the normal course of business. In the opinion of management, the Company's potential losses in excess of the accrued warranty provisions, if any, are not expected to be material to the Company's financial condition, results of operations or cash flows.

The Company relies upon third-party suppliers for railcar heavy castings, wheels and other components for its railcars. In particular, it purchases a substantial percentage of its railcar heavy castings and wheels from subsidiaries of one entity. The Company also relies upon a single supplier to manufacture all of its cold-rolled center sills for its railcars. Any inability by these suppliers to provide the Company with components for its railcars, any significant decline in the quality of these components or any failure of these suppliers to meet the Company's planned requirements for such components may have a material adverse impact on the Company's financial condition, results of operations or cash flows. While the Company believes that it could secure alternative manufacturing sources for these components, the Company may incur substantial delays and significant expense in doing so, the quality and reliability of these alternative sources may not be the same and the Company's operating results may be significantly affected.

On June 24, 2008, the Company announced a tentative global settlement relating to its Johnstown, Pennsylvania manufacturing facility. The settlement, with the United Steelworkers of America (USWA) and the plaintiffs in the Sowers/Hayden class action litigation, was ratified by the Johnstown USWA membership on June 26, 2008, but remains subject to court approval. The Company believes that court approval of the settlement is probable. However, if the settlement is not approved and no alternative settlement is reached that is acceptable to the USWA and the court, then the Sowers/Hayden class action litigation and various other legal proceedings and disputes relating to the Johnstown facility may resume and/or be commenced. Management is currently unable to assess whether the ultimate outcomes of any such resumed and/or commenced proceedings and disputes would have a material adverse effect on the Company's financial condition, results of operations or cash flows in excess of the amounts previously recorded. In addition to the foregoing, the Company is involved in certain threatened and pending legal proceedings, including commercial disputes and workers' compensation and employee matters arising out of the conduct of our business. Commercial disputes include a contract dispute with a component parts supplier. While the ultimate outcome of these legal proceedings cannot be determined at this time, it is the opinion of management that the resolution of these actions will not have a material adverse effect on the Company's financial condition, results of operations or cash flows.

On a quarterly basis, the Company evaluates the potential outcome of all significant contingencies utilizing guidance provided in FASB Statement No. 5, *Accounting for Contingencies*. As required by FASB No. 5, the Company estimates the likelihood that a future event or future events will confirm the loss of an asset or incurrence of a liability. When information available prior to issuance of the Company's financial statements indicates that in management's judgment, it is probable that an asset had been impaired or a liability had been incurred at the date of the financial statements and the amount of loss can be reasonably estimated, the contingency is accrued by a charge to income. During the fourth quarter of 2007, the Company recorded contingency losses of \$3,884, related to all of the above matters.

Prices for steel and aluminum have risen significantly and remain volatile. In addition, the price of certain railcar components that are products of steel and aluminum has been adversely affected by raw material price increases. This has caused railcar component suppliers to rapidly increase surcharges. Material price increases and surcharges have caused the total cost of certain railcars under fixed price sales contracts to exceed the amounts originally anticipated and, in some cases, the contractual sales price of the railcar. When the anticipated loss on production of railcars in the backlog is both probable and estimable, the Company accrues a loss contingency. As a result of the rapid increase in material costs, a loss contingency reserve of \$2,323 was accrued during the nine months ended September 30, 2008 and included in the cost of sales line on the Condensed Consolidated Statement of Operations.

Note 15 Earnings (Loss) Per Share

Shares used in the computation of the Company's basic and diluted earnings (loss) per common share are reconciled as follows:

Table of Contents

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2008	2007	2008	2007
Weighted average common shares outstanding	11,809,024	11,918,890	11,776,503	12,245,504
Dilutive effect of employee stock options and nonvested share awards	32,212	36,937		86,841
Weighted average diluted common shares outstanding	11,841,236	11,955,827	11,776,503	12,332,345

Weighted average diluted common shares outstanding include the incremental shares that would be issued upon the assumed exercise of stock options and the assumed vesting of nonvested share awards. For the three months ended September 30, 2008, there were 10,000 stock options and 36,667 shares of nonvested share awards which were anti-dilutive and not included in the above calculation. Because the Company had a net loss for the nine months ended September 30, 2008, all stock options and shares of nonvested share awards were anti-dilutive and not included in the above calculation for the nine months ended September 30, 2008. For each of the three and nine months ended September 30, 2007, there were 10,000 stock options and 77,746 shares of nonvested share awards which were anti-dilutive and not included in the above calculation.

Note 16 Special Charges

In December 2007, the Company announced that it planned to close its manufacturing facility located in Johnstown, Pennsylvania. This action was taken to further the Company's strategy of optimizing production at its low-cost facilities and continuing its focus on cost control. The Company had entered into decisional bargaining with the USWA, but did not reach an agreement with the USWA that would have allowed the Company to continue to operate the facility in a cost-effective way. In December 2007, the Company recorded curtailment and impairment charges of \$30,836 related to these actions.

On May 6, 2008, an arbitrator issued a ruling in a grievance proceeding brought against the Company by the USWA. The grievance proceeding, which was first filed by the USWA on April 1, 2007, surrounded the interpretation of provisions in the collective bargaining agreement (CBA) covering employees at the Johnstown facility. The dispute involved the interpretation of language regarding the classification of employees' years of service and the Company's obligations to employees based on their years of service. The arbitrator's ruling held the Company responsible for providing back pay and appropriate benefits to affected employees, a group that included over one-half of the workers who were employed at the Johnstown facility at the time the grievance was filed. As a result of the ruling, the Company recorded an additional amount for the Company's estimate of the probable cost of the back pay and benefits under the ruling during the three months ended March 31, 2008. On June 4, 2008 the Company filed a lawsuit against the USWA asking the court to vacate the arbitrator's ruling.

On June 24, 2008, the Company announced a tentative global settlement which would resolve all legal disputes relating to the Johnstown facility and its workforce, including the current Sowers/Hayden class action litigation, the above-mentioned contested arbitration ruling, and other pending grievance proceedings. The settlement, with the USWA and the plaintiffs in the Sowers/Hayden lawsuit, was ratified by the Johnstown USWA membership on June 26, 2008 but remains subject to court approval. Under the terms of the settlement, the collective bargaining agreement between the Company and the USWA would be terminated effective May 15, 2008 and the Johnstown facility would be closed. The settlement would provide special pension benefits to certain workers at the Johnstown facility and deferred vested benefits to other workers, as well as healthcare benefits, severance pay and/or settlement bonus payments to workers depending on their years of service at the facility. The Company believes that court approval of the settlement is probable and has recorded the estimated incremental settlement costs for the nine months ended September 30, 2008 related to these actions. It is anticipated that payments for employee salaries and benefits will be made during the first quarter of 2009, while pension benefits will be funded through plan assets and future Company contributions to the pension plans. Payments for postretirement benefits will be made from future operating

cash flows.

Table of Contents

	Total Costs Incurred to Date As of September 30, 2008
Pension plan costs	\$ 24,304
Postretirement plan costs	22,093
Employee termination benefits	1,829
Other related costs	1,793
Impairment charge for plant building and land	950
Total	\$ 50,969

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

OVERVIEW

You should read the following discussion in conjunction with our condensed consolidated financial statements and related notes included elsewhere in this quarterly report on Form 10-Q. This discussion contains forward-looking statements that are based on management's current expectations, estimates and projections about our business and operations. Our actual results may differ materially from those currently anticipated and expressed in such forward-looking statements. See Cautionary Statement Regarding Forward-Looking Statements.

We are the leading manufacturer of aluminum-bodied railcars and coal-carrying railcars in North America, based on the number of railcars delivered. We also refurbish and rebuild railcars and sell forged, cast and fabricated parts for the railcars we produce, as well as those manufactured by others. Our primary customers are shippers, railroads and financial institutions.

Our facilities are located in Danville, Illinois, Johnstown, Pennsylvania and Roanoke, Virginia. Each of our facilities has the capability to manufacture a variety of types of railcars, including aluminum-bodied and steel-bodied railcars. During the three months ended September 30, 2008, we delivered 2,845 new railcars, including delivery of 2,223 cars sold and delivery of 622 leased cars. During the three months ended September 30, 2007, we also delivered 237 used railcars. This compared to our delivery of 1,921 new railcars during the three months ended September 30, 2007. Our total backlog of firm orders was 4,401 units at September 30, 2008, compared with 4,917 units at June 30, 2008 and 4,930 units at September 30, 2007. Our backlog at September 30, 2008, included 240 units under firm operating leases with independent third parties and 196 rebuild/refurbishment cars. Our backlog of unfilled orders at September 30, 2008 was affected by cancelled orders for 426 units. The backlog as of September 30, 2008 represented estimated sales of \$362.7 million, while the backlog as of September 30, 2007 represented estimated sales of \$390.8 million. The North American railcar market is highly cyclical and the trends in the railcar industry are closely related to the overall level of economic activity. We expect railroads and utilities to continue to upgrade their fleets of aging steel-bodied coal-carrying railcars to lighter and more durable aluminum-bodied coal-carrying railcars. We believe that the long-term outlook for railcar demand is positive, due to increased rail traffic and the replacement of aging railcar fleets. We also believe that the long-term outlook for our business, including the demand for our coal-carrying railcars, is positive, based on our long-term supply agreements, our expanding product portfolio, our operational efficiency in manufacturing railcars and our international opportunities. However, U.S. economic conditions may not result in a sustained economic recovery, and our business is subject to these and significant other risks that may cause our current positive outlook to change.

On June 24, 2008, we announced a tentative global settlement relating to the closing of our Johnstown, Pennsylvania manufacturing facility. The settlement, with the USWA and the plaintiffs in the current Sowers/Hayden class action litigation, was ratified by the Johnstown USWA membership on June 26, 2008 but remains subject to court approval. If approved by the court, the settlement would resolve all existing legal disputes relating to the facility and its workforce, including the Sowers/Hayden litigation, a contested grievance arbitration award, and other pending grievance proceedings. The collective bargaining agreement between us and the USWA would be terminated effective May 15, 2008 and the Johnstown manufacturing facility would be closed. The settlement would provide special pension benefits to certain workers at the Johnstown facility and deferred vested benefits to other workers, as well as healthcare benefits, severance pay and/or settlement bonus payments to workers depending on their years of service at the facility. As a result of the tentative global settlement discussed above, total plant shut-down costs incurred to date as of September 30, 2008 were \$51.0 million.

During the third quarter of 2008, we launched a project to replace several legacy systems in which all of our business transactions are recorded and processed with a new enterprise-wide reporting and management software platform (ERP) system. This system is expected to provide us with improved transactional processing, control and management tools compared to the systems that we are currently using. We believe that once fully implemented and operational, our new ERP system will facilitate better transactional reporting and oversight, improve our internal control over financial reporting and function as an important component of our disclosure controls and procedures. Since the project is still in the development stage there have been no changes to our disclosure controls and procedures or internal controls over financial reporting during the third quarter of 2008 related to the ERP system.

Table of Contents**RESULTS OF OPERATIONS****Three Months Ended September 30, 2008 compared to Three Months Ended September 30, 2007****Sales**

Our sales revenue for the third quarter of 2008 was \$238.0 million compared to \$162.1 million for the same period in 2007. The increase is attributed primarily to higher demand for coal cars. Railcar deliveries totaled 3,082 units in the quarter, including delivery of 2,460 cars sold (new and used) and delivery of 622 leased cars, compared to 1,921 units in the same period of 2007. The railcar sector was affected by aggressive pricing competition as well as below market lease rates. Average selling prices decreased in the third quarter of 2008 compared with the third quarter of 2007 reflecting a shift in our product mix to car types with different material costs and pricing pressures dictated by the current market conditions.

Gross Profit

Our gross margin for the quarter was \$18.4 million, compared to \$19.4 million for the third quarter of 2007, a decrease of \$1.0 million. The corresponding margin rate was 7.7%, compared with 12.0% generated in the third quarter of 2007. The change in margin rate was driven primarily by the recent sharp cost increases on raw material inputs and the aggressive pricing environment in which we are operating.

Selling, General and Administrative Expenses

Selling, general and administrative expenses for the three months ended September 30, 2008 were \$7.2 million compared to \$7.6 million for the three months ended September 30, 2007, representing a decrease of \$0.4 million. Selling, general and administrative expenses were 3.0% of our sales for the three months ended September 30, 2008 compared to 4.7% for the three months ended September 30, 2007. The decrease in selling, general and administrative expenses for the three months ended September 30, 2008 compared to the 2007 period is primarily attributable to reductions in employee compensation costs and decreases in outside professional services costs.

Special Charges

Special charges for the three months ended September 30, 2008 represent the incremental costs associated with of our decision, in December 2007, to close our Johnstown, Pennsylvania manufacturing facility. These costs include charges related to professional fees relative to the employee termination and related plant closure. See Note 16 to the condensed consolidated financial statements.

Interest Expense/Income

Total interest expense was \$0.3 million and \$0.2 million for the three months ended September 30, 2008 and 2007, respectively. For the three months ended September 30, 2008 and 2007, interest expense consisted of third-party interest expense and amortization of deferred financing costs. Interest income for the three months ended September 30, 2008 was \$0.9 million, compared to \$1.9 million for the three months ended September 30, 2007. Interest income represents income earned on cash equivalent balances, which decreased compared to the three months ended September 30, 2007, and income earned on notes receivable, which increased over the same time period. Interest income for the three months ended September 30, 2008 was also negatively impacted by lower interest rates for the 2008 period compared to the same period of 2007.

Income Taxes

The provision for income taxes was \$4.2 million for the three months ended September 30, 2008, compared to \$4.9 million for the three months ended September 30, 2007. The effective tax rate for the three months ended September 30, 2008 was 36.2% compared to an effective tax rate of 35.9% for the three months ended September 30, 2007. The effective tax rate for the three months ended September 30, 2008 was higher than the statutory U.S. federal income tax rate of 35% due to the addition of a 3.8% blended state rate less 1.9% effect for domestic manufacturing deductions and less a 0.7% effect from other permanent differences. The effective tax rate for the three months ended September 30, 2007 was higher than the statutory U.S. federal income tax rate of 35% due to the addition of a 2.9% blended state rate less a 2.3% effect for domestic manufacturing deductions and plus a 0.3% effect from other permanent differences.

Table of Contents**Net Income (Loss)**

As a result of the foregoing, net income was \$7.4 million for the three months ended September 30, 2008, compared to net income of \$8.7 million for the three months ended September 30, 2007. For the three months ended September 30, 2008, our basic and diluted net income per share was \$0.63 and \$0.62, respectively, on basic and diluted shares outstanding of 11,809,024 and 11,841,221, respectively. For the three months ended September 30, 2007, our basic and diluted net income per share was \$0.73, on basic and diluted shares outstanding of 11,918,890 and 11,955,827, respectively.

Nine Months Ended September 30, 2008 compared to Nine Months Ended September 30, 2007**Sales**

Our sales revenue for the nine months ended September 30, 2008 was \$474.4 million compared to \$679.9 million for the same period in 2007. The decrease is attributed primarily to lower industry volume, as well as lower demand for coal cars. In addition, the railcar sector was affected by aggressive pricing competition as well as below market lease rates. Railcar deliveries totaled 6,695 units for the nine months ended September 30, 2008, including delivery of 4,858 new cars sold and delivery of 1,527 leased cars as well as delivery of 237 used cars sold and 73 rebuild/refurbishment cars sold, compared to 8,677 units in the same period of 2007.

Gross Profit

Our gross margin for the nine months ended September 30, 2008 was \$34.3 million, compared to \$88.2 million for the nine months ended September 30, 2007, a decrease of \$53.9 million. The corresponding margin rate was 7.2%, compared with 13.0% generated in the first nine months of 2007. The change in margin rate was driven primarily by the recent sharp cost increases on raw material inputs, lower volume and related leverage and the aggressive pricing environment in which we are operating. Prices for aluminum, steel and related components rose sharply during the second quarter of 2008 and remain volatile. Material price increases and surcharges have caused the total cost of certain railcars under fixed price sales contracts to exceed the amounts originally anticipated and, in some cases, the actual contractual sales price of the railcar. When the anticipated loss on the production of railcars in the backlog is both probable and estimatable, we accrue a loss contingency. A loss contingency reserve of \$2.3 million related to these cost increases is accrued as of September 30, 2008.

Selling, General and Administrative Expenses

Selling, general and administrative expenses for the nine months ended September 30, 2008 were \$23.1 million compared to \$26.5 million for the nine months ended September 30, 2007, representing a decrease of \$3.4 million. Selling, general and administrative expenses were 4.9% of our sales for the nine months ended September 30, 2008 compared to 3.9% for the nine months ended September 30, 2007. The decrease in selling, general and administrative expenses for the nine months ended September 30, 2008 compared to the 2007 period is primarily attributable to reductions in management transition expenses of \$1.8 million, decreases in outside professional services costs of \$1.0 million and decreases in insurance costs of \$0.5 million.

Special Charges

Special charges for the nine months ended September 30, 2008 represent the incremental costs associated with our decision, in December 2007, to close our Johnstown, Pennsylvania manufacturing facility. As a result of the tentative global settlement discussed above, total plant shut down costs incurred to date as of September 30, 2008 were \$51.0 million. These costs include charges arising under our pension and postretirement benefit plans as well as employee termination and related closure costs. See Note 16 to the condensed consolidated financial statements.

Interest Expense/Income

Total interest expense was \$0.5 million and \$0.6 million for the nine months ended September 30, 2008 and 2007, respectively. For the nine months ended September 30, 2008 and 2007, interest expense consisted of third-party interest expense and amortization of deferred financing costs. Interest income for the nine months ended September 30, 2008 was \$3.0 million, compared to \$6.6 million for the nine months ended September 30, 2007. Interest income represents income earned on cash equivalent balances, which decreased compared to the nine months ended September 30, 2008, and income earned on notes receivable, which increased over the same time period. Interest income for the nine months ended September 30, 2008 was also negatively impacted by lower interest rates for the 2008 period compared to the same period of 2007.

Table of Contents**Income Taxes**

The provision for income taxes was a benefit of \$2.6 million for the nine months ended September 30, 2008, as compared to a provision of \$24.6 million for the nine months ended September 30, 2007. The effective tax rate for the nine months ended September 30, 2008 was 41.6% compared to 36.4% for the nine months ended September 30, 2007. The effective tax rate for the nine months ended September 30, 2008 was higher than the statutory U.S. federal income tax rate of 35% due to the addition of a 6.4% blended state rate and a 6.1% effect from a discrete item, less a 2.8% effect for goodwill, less a 1.9% effect for domestic manufacturing deductions and less a 1.2% effect from other permanent differences. The discrete item for the nine months ended September 30, 2008 represented the tax effect of the incremental special charges described above. The effective tax rate for the nine months ended September 30, 2007 was higher than the statutory U.S. federal income tax rate of 35% due to the addition of a 3.3% blended state rate and a 0.1% effect from other differences, less a 2.0% deduction from domestic manufacturing deductions.

Net Income (Loss)

As a result of the foregoing, net loss was \$(3.7) million for the nine months ended September 30, 2008, reflecting a decrease of \$46.8 million from net income of \$43.1 million for the nine months ended September 30, 2007. For the nine months ended September 30, 2008, our basic and diluted net loss per share was \$(0.32) on basic and diluted shares outstanding of 11,776,503. For the nine months ended September 30, 2007, our basic and diluted net income per share was \$3.52 and \$3.49, respectively, on basic and diluted shares outstanding of 12,245,504 and 12,332,345, respectively.

LIQUIDITY AND CAPITAL RESOURCES

Our primary source of liquidity for the nine months ended September 30, 2008 and 2007 was our cash generated by cash flows from operations in prior periods. See Cash Flows.

On September 30, 2008, we entered into the First Amendment to the Second Amended and Restated Credit Agreement. The Credit Agreement Amendment amends the Original Credit Agreement, by: (1) reducing the Lenders commitments to a \$50.0 million senior secured revolving credit facility, including a sub-facility for a swing line loan to be made by LaSalle in an amount not to exceed \$5.0 million; (2) increasing the interest rate to LIBOR plus an applicable margin of between 1.50% and 2.25% depending on Revolving Loan Availability (as defined in the Credit Agreement); and (3) releasing JAIX as a Co-Borrower under the Credit Agreement and the collateral pledged by JAIX to secure the commitments of the Lenders under the Credit Agreement. We were required to pay an amendment fee of 0.20% of each Lender's commitment. Borrowings under the Credit Agreement remain collateralized by substantially all of our assets. Additionally, JAIX guaranteed the Revolving Credit Facility.

The proceeds of the revolving credit facility are available to finance our working capital requirements through direct borrowings and the issuance of stand-by-letters of credit. The amount available under the revolving credit facility is based on the lesser of (1) \$50.0 million or (2) an amount equal to a percentage of eligible accounts receivable plus a percentage of eligible finished inventory plus a percentage of semi-finished inventory. The revolving credit facility has a term ending on May 31, 2012. We are required to pay an annual commitment fee of between 0.175% and 0.25% based on Revolving Loan Availability. The Credit Agreement Amendment has both affirmative and negative covenants, including, a minimum fixed charge coverage ratio and limitations on debt, liens, dividends, investments, acquisitions and capital expenditures.

As of September 30, 2008 and December 31, 2007, we had no borrowings under the revolving credit facility. We had \$15.6 million and \$8.8 million in outstanding letters of credit under the letter of credit sub-facility as of September 30, 2008 and December 31, 2007, respectively and the ability to borrow \$34.4 million under the revolving credit facility as of September 30, 2008. Under the revolving credit facility, our subsidiaries are permitted to pay dividends and transfer funds to the Company without restriction.

Also on September 30, 2008, JAIX entered into a Credit Agreement (the JAIX Credit Agreement) to be used to fund our leasing operations. The JAIX Credit Agreement consists of a \$60 million senior secured revolving credit facility. The JAIX Credit Agreement has a term ending on March 31, 2012 and bears interest at the Eurodollar Loan Rate (as defined in the JAIX Credit Agreement) plus 2.00% for the first two years of the JAIX Credit Agreement (the Revolving Period) and plus 2.50% for the remainder of the term until the termination date. JAIX is required to pay an annual commitment fee of 0.30% during the Revolving Period. Borrowings under the JAIX Credit Agreement are

collateralized by substantially all of the assets of JAIX. Additionally, FCA guaranteed the JAIX Revolving Credit Facility.

Table of Contents

Availability under the JAIX Revolving Credit Facility is based on a percentage of the Eligible Railcar Leases (as defined in the agreement) held under the JAIX Revolving Credit Facility. For the first two years the facility requires interest only payments, thereafter the amount drawn on each group of Eligible Railcars under lease is required to be repaid in equal installments at the 6, 12 and 18 month anniversaries of such leases. The Revolving Credit Agreement has both affirmative and negative covenants, including, without limitation, a minimum fixed charge coverage ratio, a minimum tangible net worth, a requirement to deposit restricted cash and limitations on debt, liens, dividends, investments, acquisitions and capital expenditures. The JAIX Credit Agreement also provides for customary events of default. As of September 30, 2008 we had no borrowings under the JAIX Revolving Credit Agreement.

As of September 30, 2008, we were in compliance with all covenant requirements under our revolving credit facilities. Based on our current level of operations, we believe that our proceeds from operating cash flows and our cash balances, together with amounts available under our revolving credit facilities, will be sufficient to meet our anticipated liquidity needs for 2008. Our long-term liquidity is contingent upon future operating performance and our ability to continue to meet financial covenants under our revolving credit facilities and any other indebtedness. We may also require additional capital in the future to fund organic growth opportunities and cost reduction programs, including new plant and equipment, development of railcars, joint ventures and acquisitions, and these capital requirements could be substantial. Management continuously evaluates manufacturing facility requirements based upon market demand and may elect to make capital investments at higher levels in the future. We are also exploring product diversification initiatives and international and other opportunities.

Our long-term liquidity needs also depend to a significant extent on our obligations related to our pension and welfare benefit plans. We provide pension and retiree welfare benefits to certain salaried and hourly employees upon their retirement. The most significant assumptions used in determining our net periodic benefit costs are the discount rate used on our pension and postretirement welfare obligations and expected return on pension plan assets. Our management expects that any future obligations under our pension plans that are not currently funded will be funded out of our future cash flow from operations. As of December 31, 2007, our benefit obligation under our defined benefit pension plans and our postretirement benefit plan was \$55.4 million and \$53.1 million, respectively, which exceeded the fair value of plan assets by \$10.4 million and \$53.1 million, respectively. As disclosed in Note 13 to the condensed consolidated financial statements, as of September 30, 2008, we have made contributions relating to our defined benefit pension plans of approximately \$6.8 million in 2008. We may elect to adjust the level of contributions to our pension plans based on a number of factors, including performance of pension investments, changes in interest rates and changes in workforce compensation. In August 2006, President Bush signed the Pension Protection Act of 2006 into law. Included in this legislation are changes to the method of valuing pension plan assets and liabilities for funding purposes, as well as minimum funding levels required by 2008. Our defined benefit pension plans are in compliance with the minimum funding levels established in the Pension Protection Act. Funding levels will be affected by future contributions, investment returns on plan assets, growth in plan liabilities and interest rates. Assuming that the plans are fully funded as that term is defined in the Pension Protection Act, we will be required to fund the ongoing growth in plan liabilities on an annual basis. We anticipate funding pension contributions with cash from operations.

Based upon our operating performance, capital requirements and obligations under our pension and welfare benefit plans, we may, from time to time, be required to raise additional funds through additional offerings of our common stock and through long-term borrowings. There can be no assurance that long-term debt, if needed, will be available on terms attractive to us, or at all. Furthermore, any additional equity financing may be dilutive to stockholders and debt financing, if available, may involve restrictive covenants. Our failure to raise capital if and when needed could have a material adverse effect on our results of operations and financial condition.

Contractual Obligations

The following table summarizes our contractual obligations as of September 30, 2008, and the effect that these obligations and commitments would be expected to have on our liquidity and cash flow in future periods:

working investment normalizes from its current peak, changes in accounts payable balances will reduce future cash flows.

Investing Activities. Net cash used in investing activities for the nine months ended September 30, 2008 was \$39.6 million as compared to \$5.2 million for the nine months ended September 30, 2007. Net cash used in investing activities for the nine months ended September 30, 2008 included the cost of railcars on operating leases produced or acquired of \$35.4 million and capital expenditures of \$4.1 million. Net cash used in investing activities for the nine months ended September 30, 2007, consisted primarily of capital expenditures.

Table of Contents

Financing Activities. Net cash used in financing activities for the nine months ended September 30, 2008 was \$2.7 million, compared to \$49.6 million for the nine months ended September 30, 2007. Net cash used in financing activities for the nine months ended September 30, 2008 included \$2.1 million of cash dividends to our stockholders, \$1.0 million in deferred financing costs and \$0.2 million of excess tax benefit from stock-based compensation, partially offset by the \$0.6 million of treasury stock issued for stock options exercised. Net cash used in financing activities for the nine months ended September 30, 2007 included \$50.0 million of stock repurchases under our stock repurchase program and \$2.2 million of cash dividends paid to stockholders, partially offset by the issuance of common stock of \$2.1 million and the excess tax benefit from stock-based compensation of \$0.8 million.

Capital Expenditures

Our capital expenditures were \$4.1 million in the nine months ended September 30, 2008 as compared to \$5.2 million in the nine months ended September 30, 2007. For the nine months ended September 30, 2008, capital expenditures were comprised of equipment expenditures to enable us to build wheel and truck assembly in-house as well as side sheet assembly. For the nine months ended September 30, 2007 capital expenditures were comprised of expenditures for the expansion of production capacity to accommodate the manufacture of hybrid stainless steel/aluminum coal-carrying cars in addition to general maintenance expenditures for machinery and equipment and facility upgrades.

Excluding unforeseen expenditures, management expects that capital expenditures will be approximately \$3.1 million for the remainder of 2008. Management continuously evaluates manufacturing facility requirements based upon market demand and may elect to make additional capital investments at higher levels in the future. We are also exploring product diversification initiatives, and international and other opportunities.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This quarterly report on Form 10-Q contains certain forward-looking statements including, in particular, statements about our plans, strategies and prospects. We have used the words may, will, expect, anticipate, believe, estimate, plan, intend and similar expressions in this report to identify forward-looking statements. We have based these forward-looking statements on our current views with respect to future events and financial performance. Our actual results could differ materially from those projected in the forward-looking statements.

Our forward-looking statements are subject to risks and uncertainties, including:

the cyclical nature of our business;

adverse economic and market conditions;

fluctuating costs of raw materials, including steel and aluminum, and delays in the delivery of raw materials;

our ability to maintain relationships with our suppliers of railcar components;

our reliance upon a small number of customers that represent a large percentage of our sales;

the variable purchase patterns of our customers and the timing of completion, delivery and acceptance of customer orders;

the highly competitive nature of our industry;

risks relating to our relationship with our unionized employees and their unions;

our ability to manage our health care and pension costs;

our reliance on the sales of our aluminum-bodied coal-carrying railcars;

shortages of skilled labor;

the risk of lack of acceptance of our new railcar offerings by our customers;

the cost of complying with environmental laws and regulations;

the costs associated with being a public company;

potential significant warranty claims; and

various covenants in the agreements governing our indebtedness that limit our management's discretion in the operation of our businesses.

Our actual results could be different from the results described in or anticipated by our forward-looking statements due to the inherent uncertainty of estimates, forecasts and projections and may be better or worse than anticipated. Given these uncertainties, you should not rely on forward-looking statements. Forward-looking statements represent our estimates and assumptions only as of the date that they were made. We expressly disclaim any duty to provide updates to forward-looking statements, and the estimates and assumptions associated with them, in order to reflect changes in circumstances or expectations or the occurrence of unanticipated events except to the extent required by applicable securities laws. All of the

Table of Contents

forward-looking statements are qualified in their entirety by reference to the factors discussed under Item 1A. Risk Factors in our annual report on Form 10-K for the year ended December 31, 2007 filed with the Securities and Exchange Commission.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

We have a \$50.0 million revolving credit facility, which provides for financing of our working capital requirements and contains a sub-facility for letters of credit and a \$5.0 million sub-facility for a swing line loan. As of September 30, 2008, there were no borrowings under the revolving credit facility and we had issued approximately \$15.6 million in letters of credit under the sub-facility for letters of credit. We are exposed to interest rate risk on the borrowings under the revolving credit facility and do not plan to enter into swaps or other hedging arrangements to manage this risk, because we do not believe this interest rate risk to be significant.

We have a \$60.0 million revolving credit facility, which provides for the financing of the production or acquisition of railcars to be leased. As of September 30, 2008, there were no borrowings under this credit facility. On an annual basis, a 1% change in the interest rate in our revolving credit facilities will increase or decrease our interest expense by \$10,000 for every \$1.0 million of outstanding borrowings.

We are exposed to price risks associated with the purchase of raw materials, especially aluminum and steel. The cost of aluminum, steel and all other materials used in the production of our railcars represents a significant component of our direct manufacturing costs. Our business is subject to the risk of price increases and periodic delays in the delivery of aluminum, steel and other materials, all of which are beyond our control. The prices for steel and aluminum, the primary raw material inputs of our railcars, increased over the past four years as a result of strong demand, limited availability of production inputs for steel and aluminum, including scrap metal, industry consolidation and import trade barriers. In addition, the price and availability of other railcar components that are made of steel have been adversely affected by the increased cost and limited availability of steel. Any fluctuations in the price or availability of aluminum or steel, or any other material used in the production of our railcars, may have a material adverse effect on our business, results of operations or financial condition. In addition, if any of our suppliers were unable to continue its business or were to seek bankruptcy relief, the availability or price of the materials we use could be adversely affected. Deliveries of our materials may also fluctuate depending on supply and demand for the material or governmental regulation relating to the material, including regulation relating to the importation of the material. Given the significant increases in the price of raw materials, this exposure can affect our costs of production. We currently do not plan to enter into any hedging arrangements to manage the price risks associated with raw materials. In response to cost increases for manufacturing materials we have selectively forward purchased materials to the extent possible to secure prices. The current high cost of the raw materials that we use to manufacture railcars, especially aluminum and steel, and delivery delays associated with these raw materials may adversely affect our financial condition and results of operations.

To the extent that we are unsuccessful in passing on increases in the cost of aluminum and steel to our customers, a 1% increase in the cost of aluminum and steel would increase our average cost of sales by approximately \$240 per railcar, which, for the nine months ended September 30, 2008, would have reduced income before income taxes by approximately \$1.6 million.

We are not exposed to any significant foreign currency exchange risks as our policy is to denominate foreign sales and purchases in U.S. dollars.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, our management evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this quarterly report on Form 10-Q (the Evaluation Date). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of the Evaluation Date, our disclosure controls and procedures are effective to ensure that information required to be disclosed in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes In Internal Controls

There has been no change in our internal control over financial reporting during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

We have previously disclosed a pension-related lawsuit (the Sowers/Hayden class action litigation) filed against us in the U.S. District Court for the Western District of Pennsylvania by certain members of the United Steelworkers of America (the USWA) on behalf of themselves and others similarly situated. We have also previously disclosed a contested ruling against us in a grievance proceeding first filed against us on April 1, 2007 by the USWA. On June 24, 2008, we announced a tentative global settlement with the USWA and the plaintiffs in the Sowers/Hayden class action litigation. The settlement was ratified by the Johnstown USWA membership on June 26, 2008, but remains subject to court approval. If approved by the court, the settlement would resolve all legal existing disputes relating to our Johnstown, Pennsylvania manufacturing facility and its workforce, including the Sowers/Hayden class action litigation, the contested grievance ruling and other pending grievance proceedings.

In addition to the foregoing, we are involved in certain other threatened and pending legal proceedings, including commercial disputes and workers' compensation and employee matters arising out of the conduct of our business. Current commercial disputes include a contract dispute with a component parts supplier. While the ultimate outcome of these other legal proceedings cannot be determined at this time, it is the opinion of management that the resolution of these other actions will not have a material adverse effect on our financial condition, results of operations or cash flows.

Item 1A. Risk Factors.

The following amendment and addition to the risk factors included under this Item 1A reflect the current conditions of the capital markets, which present uncertainties to all companies that rely on capital markets for liquidity or financing. The information in this Item 1A should be considered in conjunction with the other risk factors identified in our annual report on Form 10-K for the year ended December 31, 2007 and the statements under the caption "Cautionary Statement Regarding Forward Looking Statements" in Item 2 of Part I of this report.

We May Be Affected by General Economic Conditions.

Prolonged negative changes in domestic and global economic conditions or disruptions of either or both of the financial and credit markets may affect our suppliers and customers and the producers and consumers of the commodities carried by our products and may have a material adverse effect on our results of operations, financial condition and liquidity.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

None

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Submission of Matters to a Vote of Security Holders.

None.

Item 5. Other Information.

None.

Item 6. Exhibits.

(a) Exhibits filed as part of this Form 10-Q:

- 10.1 First Amendment to Second Amended and Restated Credit Agreement dated as of September 30, 2008 by and among Johnstown America Corporation, Freight Car Services, Inc., JAC Operations, Inc., JAIX Leasing Company and FreightCar Roanoke, Inc., as the Co-Borrowers, the lenders party
