ENGELHARD OFFERS TO  
ACQUIRE COLETICA, S.A.

ISELIN, NJ, March 1, 2005 - Engelhard Corporation (NYSE: EC) announced today

## Edgar Filing: ENGELHARD CORP - Form 8-K

that it has made an offer, subject to certain conditions, to acquire a majority stake in Coletica, S.A., a publicly traded, high-growth company that develops performance-based, skin-care compounds and related technologies for the cosmetic and personal care industries.

The acquisition would further strengthen Engelhard's position as a leading global supplier of materials technology to the cosmetic and personal care industries. It would expand the company's existing capabilities in the growing market for skin-care materials used in such applications as anti-wrinkle creams, sun protectants, moisturizers and materials that improve the overall complexion of the skin.

"We continue to broaden our competencies in surface and materials science and expand our portfolio of applications and markets served by our growing personal care materials business," said Barry W. Perry, Engelhard's chairman and chief executive officer. "This acquisition would be modestly accretive to earnings, provide positive cash flow from operations and would be consistent with our objective to improve our business mix."

If approval is granted, Engelhard would purchase 77.87% of Coletica's outstanding shares held by a group led by Coletica's founder and president. Engelhard then would make a tender offer for the remaining publicly held

shares at a price of (euro)37.10 per share. The offer translates into a purchase price of (euro)65.85 million for 100% ownership.

Coletica was started in 1985 in Lyon, France. As part of the proposed transaction, Engelhard would acquire the company's two facilities in Lyon, sales offices in Paris, New York and Tokyo and its more than 120 employees.

Coletica has a portfolio of catalogue products that offer the global skin-care market the substantiated performance that drives new product development for their customers. In addition, Coletica develops specific ingredients for its customers on an exclusive basis using its library of more than 2,500 active ingredients and employs in-vitro testing to substantiate claims for its customers' consumer products.

Engelhard's expertise in materials technology positions the company as a leading supplier to the cosmetic and personal care industries. In addition to its broad product offering, full-spectrum testing and product-development services, Engelhard also provides a complete line of effect and color-enhancing pigments as well as specialized inorganic materials for cosmetic and personal care products. The company's effect pigments and special-effect films also deliver eye-catching properties to the packaging of cosmetic and personal care products.

Engelhard Corporation is a surface and materials science company that develops technologies to help customers improve their products and processes. A Fortune 500 company, Engelhard is a world-leading provider of technologies for environmental, process, appearance and performance applications.
