- 
- \* Represents less than 0.1%.
- (1) Assumes conversion of all of the holder's notes at a conversion rate of 48.6914 shares of common stock per \$1,000 principal amount at maturity of the notes. This conversion rate is subject to adjustment, however, as described under "Description of the Notes--Conversion Rights" in the accompanying prospectus. As a result, the number of shares of common stock issuable upon conversion of the notes may increase or decrease in the future.
- (2) Includes shares of common stock issuable upon conversion of the notes. Assumes that any other holders of the notes or any future pledgees, donees, assignees, transferees or successors of or from any other such holders of the notes, do not beneficially own any shares of common stock other than the common stock issuable upon conversion of the notes at the initial conversion rate.
- (3) Calculated based on Rule 13d-3(d)(i) of the Exchange Act, using 29,373,994 common shares outstanding as of November 1, 2003. In calculating this amount for each holder, we treated as outstanding the number of shares of common stock issuable upon conversion of all that holder's notes, but we did not assume conversion of any other holder's notes.
- (4) Represents the number of shares of common stock into which \$140.0 million aggregate principal amount of notes would be convertible at the conversion rate described in footnote 1 above.
- (5) Represents the amount which the selling securityholders may sell under this prospectus divided by the sum of the common stock outstanding as of November 1, 2003, plus the 6,816,796 shares of common stock into which the \$140.0 million aggregate principal amount of notes is convertible.

Investing in the notes and our common stock issuable upon conversion of the notes involves risks that are described in the "Risk Factors" section of the accompanying prospectus beginning on page 8.
