TITANIUM METALS CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2009
(Unaudited)

Note 1 – Basis of presentation and organization

Basis of presentation. The unaudited Condensed Consolidated Financial Statements contained in this Quarterly Report have been prepared on the same basis as the audited Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2008 that we filed with the Securities and Exchange Commission (“SEC”) on February 26, 2009 (“2008 Annual Report”), except for the application of the presentation and disclosures requirements for noncontrolling interests beginning January 1, 2009, as discussed below. They include the accounts of Titanium Metals Corporation and its majority owned subsidiaries (collectively referred to as “TIMET”). Unless otherwise indicated, references in this report to “we”, “us” or “our” refer to TIMET and its subsidiaries, taken as a whole. All material intercompany transactions and balances with consolidated subsidiaries have been eliminated. In our opinion, we have made all necessary adjustments (which include only normal recurring adjustments) in order to state fairly, in all material respects, our consolidated financial position, results of operations and cash flows as of the dates and for the periods presented. We have condensed or omitted certain information and footnote disclosures (including those related to the Consolidated Balance Sheet at December 31, 2008) normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”). Our results of operations for the interim period ended September 30, 2009 may not be indicative of our operating results for the full year. The Condensed Consolidated Financial Statements contained in this Quarterly Report should be read in conjunction with the 2008 Consolidated Financial Statements contained in our 2008 Annual Report. Our first three fiscal quarters reported are the approximate 13-week periods ending on the Saturday generally nearest to March 31, June 30 and September 30. Our fourth fiscal quarter and fiscal year always end on December 31. For presentation purposes, our financial statements and the accompanying notes have been presented as ended on March 31, June 30, September 30 and December 31, as applicable. We evaluated the events occurring after the balance sheet for potential recognition and disclosure through November 5, 2009, the date the financial statements were issued.

Organization. At September 30, 2009, subsidiaries of Contran Corporation held 27.4% of our outstanding common stock. Substantially all of Contran's outstanding voting stock is held by trusts established for the benefit of certain children and grandchildren of Harold C. Simmons, of which Mr. Simmons is sole trustee, or is held by Mr. Simmons or persons or other entities related to Mr. Simmons. At September 30, 2009, Mr. Simmons and his spouse owned an aggregate of 16.5% of our common stock, and the Combined Master Retirement Trust (“CMRT”), a trust sponsored by Contran to permit the collective investment by trusts that maintain the assets of certain employee benefit plans adopted by Contran and certain related companies, held an additional 8.6% of our common stock. Mr. Simmons is the sole trustee of the CMRT and a member of the trust investment committee for the CMRT. Consequently, Mr. Simmons may be deemed to control each of Contran and us.

Fair value of financial instruments. Carrying amounts of certain of our financial instruments including, among others, cash and cash equivalents and accounts receivable, approximate fair value because of their short maturities. We carry our investments in marketable equity securities at fair value based upon quoted market prices, and the carrying value of our notes receivable from affiliates approximates fair value because the applicable interest rates are variable based upon stated market indices.

Index

Recent accounting pronouncements. Noncontrolling interest - On January 1, 2009, we adopted the accounting and disclosure requirements of Statement of Financial Accounting Standard (“SFAS”) No. 160, Noncontrolling Interests in Consolidated Financial Statements, an Amendment of ARB No. 51, which is now included with Accounting Standards Codification (“ASC”) Topic 810 Consolidation. This principle establishes a single method of accounting for changes in a parent’s ownership interest in a subsidiary that do not result in deconsolidation. On a prospective basis, any changes in ownership will be accounted for as equity transactions with no gain or loss recognized on the transactions unless there is a change in control. Previously, such changes in ownership would generally result either in the recognition of additional goodwill (for an increase in ownership) or a gain or loss included in the determination of net income (for a decrease in ownership). This principle also standardizes the presentation of noncontrolling interest as a component of equity on the balance sheet and on a net income basis in the statement of income and requires expanded disclosures in the consolidated financial statements that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners of a subsidiary. Upon applying the accounting and disclosure guidance, we reclassified our condensed consolidated balance sheet and statement of income to conform to the new presentation requirements for the noncontrolling interest in our 70%-owned French subsidiary. Subsequently, if our ownership of a less than wholly owned subsidiary increases for an amount of consideration that exceeds the then-carrying value of the noncontrolling interest related to the increased ownership, the amount of equity attributable to our shareholders will be reduced.

Fair value disclosures - As of June 30, 2009, we adopted Financial Accounting Standards Board (“FASB”) Staff Position (“FSP”) FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments, which is now included with ASC Topic 825 Financial Instruments and requires us to disclose the fair value of all financial instruments for which it is practicable to estimate that value, whether recognized or not recognized in the statement of financial position for interim as well as annual periods. Prior to the adoption of this principle, we were only required to disclose this information annually. We have included these required disclosures.

Other-than-temporary impairments - As of June 30, 2009, we adopted FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments, which is now included with ASC Topic 320 Investments - Debt and Equity Securities and amends existing guidance for the recognition and measurement of other-than-temporary impairments for debt securities classified as available-for-sale and held-to-maturity and expands the disclosure requirements for interim and annual periods for available-for-sale and held-to-maturity debt and equity securities to include additional information about investments in an unrealized loss position for which an other-than-temporary impairment has or has not been recognized. We have included these additional disclosures in Note 3.

Subsequent events – Beginning with the Quarterly Report for the period ending June 30, 2009, we adopted SFAS No. 165, Subsequent Events, which is now included with ASC Topic 855 Subsequent Events. This principle establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued, which are referred to as subsequent events. The principle clarifies existing guidance on subsequent events, including a requirement that a public entity should evaluate subsequent events through the issue date of the financial statements, the determination of when the effects of subsequent events should be recognized in the financial statements and disclosures regarding all subsequent events. The principle also requires a public entity to disclose the date through which the public entity has evaluated subsequent events but did not have a material effect on our Condensed Consolidated Financial Statements.

Index

Benefit plan asset disclosures - During the fourth quarter of 2008, the FASB issued FSP FAS 132 (R)-1, Employers' Disclosures about Postretirement Benefit Plan Assets, which is now included with ASC Subtopic 715-20 Compensation – Retirement Benefits – Defined Benefit Plans, which amends SFAS No. 87, 88 and 106 to require expanded disclosures about employers' pension plan assets. This principle will be effective for us beginning with our 2009 annual report, and we will provide the expanded disclosures about our pension plan assets at that time.

Revenue arrangements with multiple deliverables – In October 2009, the FASB issued Accounting Standards Update (“Update”) 2009-13 Multiple-Deliverable Revenue Arrangements, which will amend ASC Topic 605-25 Revenue Recognition – Multiple-Element Arrangements. Update 2009-13 eliminates the residual method of allocating revenue to each deliverable in a multiple deliverable arrangement and requires the use of the residual selling price method of allocation using the vendor’s best estimate of the selling price of a particular deliverable if vendor-specific and third-party evidence of a selling price do not exist. Update 2009-13 also increases disclosure requirements for these arrangements. We expect to adopt Update 2009-13 on a prospective basis for revenue arrangements with multiple deliverables entered into or modified beginning in 2011, and we do not expect the adoption to have a material effect on our condensed consolidated financial statements.

Other. From time to time, companies related to Contran will have loans and advances outstanding between them and various related parties pursuant to term and demand notes. These loans and advances are generally entered into for cash management purposes, in which the lender is generally able to earn a higher rate of return on the loan than would have been earned if the lender invested the funds in other investments, and the borrower is able to pay a lower rate of interest than would be paid if the borrower had incurred third-party indebtedness. While certain of these loans may be of a lesser credit quality than cash equivalent instruments otherwise available to the lender, the lender will evaluate the credit risks involved and appropriately reflect those credit risks in the terms of the applicable loan. In this regard, on November 4, 2009 we entered into an unsecured revolving credit facility pursuant to which Contran may borrow up to \$30 million from us. Our loans to Contran will bear interest at the prime rate minus 1.5% for the first \$15 million borrowed, and the prime rate for any amounts borrowed in excess of \$15 million, with all principal due on demand (and in any event no later than December 31, 2010). The amount of our outstanding loans we have to Contran at any time is solely at our discretion. On November 4, 2009, Contran borrowed and aggregate \$20.1 million pursuant to this facility.

Note 2 – Inventories

	December 31, 2008	September 30, 2009
	(In millions)	
Raw materials	\$138.0	\$130.4
Work-in-process	264.1	224.2
Finished products	119.8	108.1
Inventory consigned to customers	19.2	17.5
Supplies	28.6	32.3
Total inventories	\$569.7	\$512.5

Index

Note 3 – Marketable securities

Our marketable securities consist of investments in the publicly traded shares of related parties. NL Industries, Inc., Kronos Worldwide, Inc. and Valhi, Inc. are each majority owned subsidiaries of Contran. All of our marketable securities are classified as available-for-sale, which are carried at fair value using quoted market prices for each marketable security, representing inputs from the highest level (level 1) within the fair value hierarchy.

The following table summarizes our marketable securities:

Marketable security	Fair value measurement level	Market value	Cost basis (In millions)	Unrealized gains (losses)
As of December 31, 2008:				
Valhi	1	\$ 13.4	\$26.4	\$(13.0)
NL	1	3.0	2.5	0.5
Kronos	1	-	0.2	(0.2)
Total		\$ 16.4	\$29.1	\$(12.7)
As of September 30, 2009:				
Valhi	1	\$ 14.8	\$26.6	\$(11.8)
NL	1	1.5	2.5	(1.0)
Kronos	1	0.7	0.7	-
Total		\$ 17.0	\$29.8	\$(12.8)

During 2008 and the first nine months of 2009, we purchased 1.3 million shares of Valhi common stock in market transactions for an aggregate of \$26.6 million, and we held approximately 1.1% of Valhi common stock at September 30, 2009. Additionally, we held approximately 0.5% of NL's outstanding common stock and 0.2% of Kronos' outstanding common stock at September 30, 2009. Valhi and NL held an aggregate of approximately 95.2% of Kronos' outstanding common stock at September 30, 2009.

Because we have classified all of our marketable securities as available-for-sale, any unrealized gains or losses on the securities are recognized through other comprehensive income. With respect to our investment in Valhi common stock, we considered the decline in market price for Valhi common stock to be temporary at September 30, 2009. We considered all available evidence in reaching this conclusion. While our investment in Valhi common stock has been in a continuous unrealized loss position since August 2008, the positive evidence we considered to conclude the decline was temporary at September 30, 2009 includes (i) our ability and intent to hold the investment in Valhi common stock for a reasonable period of time sufficient for the recovery of fair value (as evidenced by the amount of liquidity we currently have with cash on hand and our borrowing availability) and (ii) the significant partial recovery of fair value as the quoted market price for Valhi common stock increased as much as 88% during the third quarter 2009 as compared to the 63% decline in Valhi's quoted market price during the period from August 2008 through June 2009. For our other investment in marketable securities that currently has a cost basis in excess of its market value, we currently believe the decline in market price of this security to be temporary in nature as a result of recent market volatility.

Index

We will continue to monitor the quoted market prices for these securities. If we conclude in the future that the decline in value of one or more of these securities was other than temporary, we would recognize an impairment through an income statement charge at that time. Such income statement impairment charge would be offset in other comprehensive income by the reversal of the previously recognized unrealized losses to the extent they were previously recognized in accumulated other comprehensive income.

Note 4 – Property and equipment

	December 31, 2008	September 30, 2009
	(In millions)	
Land and improvements	\$12.5	\$13.6
Buildings and improvements	57.8	70.8

-11-

Note 7 – Equity

During 2007, our board of directors authorized the repurchase of up to \$100 million of our common stock in open market transactions or in privately negotiated transactions, with the intention that any repurchased shares will be retired and cancelled. During the first nine months of 2009, we purchased 0.6 million shares of our common stock for an aggregate purchase price of \$5.9 million, which were cancelled prior to September 30, 2009. At September 30, 2009, we could purchase an additional \$57.6 million of our common stock under our board of directors' authorization.

Note 8 – Employee benefits

Defined benefit pension plans. The components of the net periodic pension expense are set forth below:

	Three months ended		Nine months ended	
	September 30, 2008	September 30, 2009	September 30, 2008	September 30, 2009
	(In millions)			
Service cost	\$1.2	\$0.9	\$3.6	\$2.4
Interest cost	4.3	3.9	13.1	11.0
Expected return on plan assets	(5.7)	(3.4)	(17.2)	(9.6)

Domestic manufacturing credit	(4.0)	(0.9)
Uncertain tax positions	2.1	2.1
Other, net	(0.1)	1.2
Total income tax expense	\$54.9	\$15.2

Note 10 – Commitments and contingencies

Environmental matters. As a result of Environmental Protection Agency (“EPA”) inspections, in April 2009 the EPA issued a Notice of Violation (“Notice”) to us alleging that we violated certain provisions of the Resource Conservation and Recovery Act and the Toxic Substances Control Act at our Henderson plant. We have submitted our response to the Notice to the EPA, including an outline of our actions already taken to address the issues raised by the EPA during the inspections and in the Notice and our planned actions to address any remaining allegations of non-compliance. The EPA has not replied to our response.

As part of our continuing environmental assessment with respect to our plant site in Henderson, Nevada, during 2008 we completed and submitted to the Nevada Department of Environmental Protection (“NDEP”) a Remedial Alternative Study (“RAS”) with respect to the groundwater located beneath the plant site. The RAS, which was submitted pursuant to an existing agreement between the NDEP and us, addressed the presence of certain contaminants in the plant site groundwater that require remediation. The NDEP completed its review of the RAS and our proposed remedial alternatives during 2008, and the NDEP issued its record of decision in February 2009, which selected our preferred groundwater remedial alternative action plan. We anticipate commencing the work to implement the plan in the first quarter of 2010.

As of September 30, 2009, we have \$3.1 million accrued for remediation activities anticipated at our Henderson plant site, including amounts accrued at the lower end of the range of estimated costs for the groundwater remedial action plan selected by the NDEP in its record of decision. We will continue evaluating alternative methods and timing for all of our remediation activities, and if necessary, we may revise our estimated costs in the future. We estimate the upper end of the range of reasonably possible costs related to all of our environmental matters, including the current accrual, to be approximately \$5.5 million. We expect these estimated costs to be incurred over a remediation period of at least five years.

Index

We accrue liabilities related to environmental remediation obligations when estimated future costs are probable and estimable. We evaluate and adjust our estimates as additional information becomes available or as circumstances change. We generally do not discount estimated future expenditures to their present value due to the uncertainty of the timing of the future payments. In the future, if the standards or requirements under environmental laws or regulations become more stringent, if our testing and analysis at our operating facilities identify additional environmental remediation, or if we determine that we are responsible for the remediation of hazardous substance contamination at other sites, then we may incur additional costs in excess of our current estimates. We do not know if actual costs will exceed our current estimates, if additional sites or matters will be identified which require remediation or if the estimated costs associated with previously identified sites requiring environmental remediation will become estimable in the future.

Legal proceedings. From time to time, we are involved in various employment, environmental, contractual, intellectual property, product liability, general liability and other claims, disputes and litigation relating to our business. In certain instances, we have insurance coverage for these items to eliminate or reduce our risk of loss (other than standard deductibles, which are generally \$1 million or less). We currently believe that the outcome of these matters, individually or in the aggregate, will not have a material adverse effect on our financial position, results of operations or liquidity. However, all such matters are subject to inherent uncertainties, and were an unfavorable outcome to occur with respect to several of these matters in a given period, it is possible that it could have a material adverse impact on our results of operations or cash flows in that particular period.

Note 11 – Earnings per share

Basic earnings per share is based on the weighted average number of unrestricted common shares outstanding during each period. Diluted earnings per share attributable to common stockholders reflects the dilutive effect of common stock options and the assumed conversion of our Series A Preferred Stock. A reconciliation of the numerator and denominator used in the calculation of basic and diluted earnings per share is presented in the following table:

	Three months ended September 30,		Nine months ended September 30,	
	2008	2009	2008	2009
	(In millions)			
Numerator:				
Net income attributable to TIMET common stockholders	\$40.2	\$1.1	\$127.8	\$29.4
Dividends on Series A Preferred Stock (1)	0.1	-	0.2	-
Diluted net income attributable to TIMET common stockholders	\$40.3	\$1.1	\$128.0	\$29.4
Denominator:				
Average common shares outstanding	181.0	180.6	181.6	180.9
Series A Preferred Stock (1)	1.0	-	1.0	-
Diluted shares	182.0	180.6	182.6	180.9

(1) Excludes the anti-dilutive effects from conversion of the outstanding Series A Preferred Stock in both 2009 periods.

Index

Note 12 – Business segment information

Our production facilities are located in the United States, United Kingdom, France and Italy, and our products are sold throughout the world. Our President functions as our chief operating decision maker (“CODM”), and the CODM receives consolidated financial information about us. He makes decisions concerning resource utilization and performance analysis on a consolidated and global basis. We have one reportable segment, our worldwide “Titanium melted and mill products” segment. The following table provides supplemental information to our Condensed Consolidated Financial Statements:

	Three months ended September 30,		Nine months ended September 30,	
	2008	2009	2008	2009
	(In millions, except product shipment data)			
Titanium melted and mill products:				
Melted product net sales	\$33.3	\$16.1	\$94.6	\$51.0
Mill product net sales	228.4	149.2	693.5	486.1
Other titanium product sales	33.7	16.1	98.2	53.4
Total net sales	\$295.4	\$181.4	\$886.3	\$590.5
Melted product shipments:				
Volume (metric tons)	1,115	675	3,060	1,915
Average selling price (per kilogram)	\$29.85	\$23.90	\$30.90	\$26.65
Mill product shipments:				
Volume (metric tons)	3,845	2,665	11,195	8,775
Average selling price (per kilogram)	\$59.40	\$56.00	\$61.95	\$55.40

Item 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The statements contained in this Quarterly Report on Form 10-Q (“Quarterly Report”) that are not historical facts, including, but not limited to, statements found in the Notes to Condensed Consolidated Financial Statements and Management’s Discussion and Analysis of Financial Condition and Results of Operations (“MD&A”), are forward-looking statements that represent management’s beliefs and assumptions based on currently available information. Forward-looking statements can generally be identified by the use of words such as “believes,” “intends,” “may,” “will,” “looks,” “should,” “could,” “anticipates,” “expects” or comparable terminology or by discussions of strategies or trends. Although we believe that the expectations reflected in such forward-looking statements are reasonable, we do not know if these expectations will prove to be correct. Such statements by their nature involve substantial risks and uncertainties that could significantly affect expected results. Actual future results could differ materially from those described in such forward-looking statements, and we disclaim any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Among the factors that could cause actual results to differ materially are the risks and uncertainties discussed in this Quarterly Report, including risks and uncertainties in those portions referenced above and those described from time to time in our other filings with the SEC which include, but are not limited to:

- the cyclical nature of the commercial aerospace industry;
- the performance of aerospace manufacturers and us under our long-term agreements;
- the existence or renewal of certain long-term agreements;
- the difficulty in forecasting demand for titanium products;
- global economic, financial and political conditions;
- global production capacity for titanium;
- changes in product pricing and costs;
- the impact of long-term contracts with vendors on our ability to reduce or increase supply;
- the possibility of labor disruptions;
- fluctuations in currency exchange rates;
- fluctuations in the market price of marketable securities;
- uncertainties associated with new product or new market development;
- the availability of raw materials and services;
- changes in raw material prices and other operating costs (including energy costs);
- possible disruption of business or increases in the cost of doing business resulting from terrorist activities or global conflicts;
- competitive products and strategies; and
- other risks and uncertainties.

Should one or more of these risks materialize (or the consequences of such a development worsen), or should the underlying assumptions prove incorrect, actual results could differ materially from those forecasted or expected.

The following discussion and analysis should be read in conjunction with our Condensed Consolidated Financial Statements and related notes included elsewhere in this Quarterly Report and with our Consolidated Financial Statements and the information under the heading “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” which are included in our 2008 Annual Report.

Index

SUMMARY

General overview. We are a vertically integrated producer of titanium sponge, melted products and a variety of mill products for commercial aerospace, military, industrial and other applications. We are one of the world's leading producers of titanium melted products (ingot, electrodes and slab) and mill products (billet, bar, plate, sheet and strip). We are the only producer with major titanium production facilities in both the United States and Europe, the world's principal markets for titanium.

RESULTS OF OPERATIONS

Quarter ended September 30, 2009 compared to quarter ended September 30, 2008

Summarized financial information. The following table summarizes certain information regarding our results of operations for the three months ended September 30, 2008 and 2009. Our reported average selling prices are a reflection of actual selling prices after the effects of currency exchange rates, customer and product mix and other related factors throughout the periods presented.

	Three months ended September 30,					
	2008	% of total net sales		2009	% of total net sales	
	(In millions, except product shipment data)					
Net sales:						
Melted products	\$33.3	11	%	\$16.1	9	%
Mill products	228.4	77	%	149.2	82	%
Other titanium products	33.7	12	%	16.1	9	%
Total net sales	295.4	100	%	181.4	100	%
Cost of sales	222.5	75	%	163.7	90	%
Gross margin	72.9	25	%	17.7	10	%
Selling, general, administrative and development expense	18.0	6	%	14.2	8	%
Other (expense) income, net	(2.0)	1	%	-	-	
Operating income	\$52.9	18	%	\$3.5	2	%
Melted product shipments:						
Volume (metric tons)	1,115			675		
Average selling price (per kilogram)	\$29.85			\$23.90		
Mill product shipments:						
Volume (metric tons)	3,845			2,665		
Average selling price (per kilogram)	\$59.40			\$56.00		

Index

Net sales. Our net sales were \$181.4 million for the third quarter of 2009 compared to net sales of \$295.4 million for the third quarter of 2008. The 39% decrease in net sales was principally the result of reduced volumes and, to a lesser extent, lower average selling prices in the third quarter of 2009 compared to the same period in 2008. Product shipment volumes decreased 39% for melted products and 31% for mill products from the third quarter of 2008 to the third quarter of 2009, as overall titanium demand remains low due to the weak global economy and production delays within the commercial aerospace sector. Additionally, as a result of these production delays, we believe many of our customers have implemented strategies to reduce excess inventories and to maximize operating cash flows. Average selling prices decreased 20% for melted products and 6% for mill products over these same periods due to competitive pricing pressures resulting from lower demand for titanium products and a decline in raw material costs, primarily titanium scrap. The decline in raw material costs has contributed to lower selling prices for certain products under long-term customer agreements, in part due to raw material indexed pricing adjustments included in certain of these agreements.

Gross margin. For the third quarter of 2009, our gross margin was \$17.7 million as compared to \$72.9 million for the third quarter of 2008, primarily reflecting the effects of lower volumes and average selling prices for our melted and mill products. Due to low utilization of our production capacity, the favorable impacts on our gross margin from declining raw material costs, primarily titanium scrap, were largely offset by higher per-unit overhead costs. In addition, abnormally low production throughout our major manufacturing operations resulted in unabsorbed overhead of \$9.4 million for the third quarter of 2009.

Operating income. Our operating income for the third quarter of 2009 was \$3.5 million compared to \$52.9 million for the same period of 2008, primarily reflecting the decline in gross margin.

Income taxes. Our effective income tax rate increased to 69% for the third quarter of 2009 compared to 28% for the third quarter of 2008 primarily due to the net effects of lower earnings, changes in foreign tax law that caused us to revise our judgments regarding our ability to utilize certain foreign tax attributes and incremental taxes on foreign earnings. We operate in multiple tax jurisdictions, and as a result, the geographic mix of our pre-tax income or loss can impact our overall effective tax rate. Our effective income tax rate in the 2008 period was lower than the U.S. statutory rate due to the implementation of an internal corporate reorganization prior to 2008. See Note 9 to the condensed consolidated financial statements for a tabular reconciliation of our statutory income tax expense to our actual tax expense.

Index

Edgar Filing: TITANIUM METALS CORP - Form 10-Q

Nine months ended September 30, 2009 compared to nine months ended September 30, 2008

Summarized financial information. The following table summarizes certain information regarding our results of operations for the nine months ended September 30, 2008 and 2009. Our reported average selling prices are a reflection of actual selling prices after the effects of currency exchange rates, customer and product mix and other related factors throughout the periods presented.

	Nine months ended September 30,					
	2008	% of total net sales		2009	% of total net sales	
(In millions, except product shipment data)						
Net sales:						
Melted products	\$94.6	11	%	\$51.0	9	%
Mill products	693.5	78	%	486.1	82	%
Other titanium products	98.2	11	%	53.4	9	%
Total net sales	886.3	100	%	590.5	100	%
Cost of sales	648.0	73	%	501.8	85	%
Gross margin	238.3	27	%	88.7	15	%
Selling, general, administrative and development expense	51.5	6	%	44.8	7	%
Other (expense) income, net	(2.3)	-		1.7	-	
Operating income	\$184.5	21	%	\$45.6	8	%
Melted product shipments:						
Volume (metric tons)	3,060			1,915		
Average selling price (per kilogram)	\$30.90			\$26.65		
Mill product shipments:						
Volume (metric tons)	11,195			8,775		
Average selling price (per kilogram)	\$61.95			\$55.40		

Net sales. Our net sales were \$590.5 million for the first nine months of 2009 compared to net sales of \$886.3 million for the first nine months of 2008. The 33% decrease in net sales was principally the result of reduced volumes and, to a lesser extent, lower average selling prices in the first nine months of 2009 compared to the same period in 2008. Product shipment volumes decreased 37% for melted products and 22% for mill products from the first nine months of 2008 to the same period of 2009, as overall titanium demand remains low due to the weak global economy and production delays within the commercial aerospace sector. Additionally, as a result of these production delays, we believe many of our customers have implemented strategies to reduce excess inventories and to maximize operating cash flows. Average selling prices decreased 14% for melted products and 11% for mill products over these same periods due to competitive pricing pressures resulting from lower demand for titanium products and a decline in raw material costs, primarily titanium scrap. The decline in raw material costs has contributed to lower selling prices for certain products under long-term customer agreements, in part due to raw material indexed pricing adjustments included in certain of these agreements.

Index

Gross margin. For the first nine months of 2009, our gross margin was \$88.7 million as compared to \$238.3 million for the first nine months of 2008, primarily reflecting the effects of lower volumes and average selling prices for our melted and mill products. Due to low utilization of our production capacity, the favorable impacts on our gross margin from declining raw material costs, primarily titanium scrap, were largely offset by higher per-unit overhead costs. In addition, abnormally low production throughout our major manufacturing operations resulted in unabsorbed overhead of \$15.7 million for the first nine months of 2009.

Operating income. Our operating income for the first nine months of 2009 was \$45.6 million compared to \$184.5 million for the same period of 2008, primarily reflecting the decline in gross margin.

Income taxes. Our effective income tax rate was 33% for the first nine months of 2009 compared to 29% for the first nine months of 2008. We operate in multiple tax jurisdictions, and as a result, the geographic mix of our pre-tax income or loss can impact our overall effective tax rate. Our effective income tax rates in both periods were lower than the U.S. statutory rate due to the implementation of an internal corporate reorganization prior to 2008. See Note 9 to the Condensed Consolidated Financial Statements for a tabular reconciliation of our statutory income tax expense to our actual tax expense.

European operations

We have substantial operations located in the United Kingdom, France and Italy. Approximately 35% of our sales originated in Europe for the nine months ended September 30, 2009, a portion of which were denominated in foreign currency, principally the British pound sterling or the euro. Certain raw material costs, principally purchases of titanium sponge and alloys for our European operations, are denominated in U.S. dollars, while labor and other production costs are primarily denominated in local currencies. The functional currencies of our European subsidiaries are those of their respective countries, and our European subsidiaries are subject to exchange rate fluctuations that may impact reported earnings and may affect the comparability of period-to-period operating results. Our European operations may incur borrowings denominated in U.S. dollars or in their respective functional currencies. Our export sales from the U.S. are denominated in U.S. dollars and are not subject to currency exchange rate fluctuations. We do not use currency contracts to hedge our currency exposures.

The translated U.S. dollar value of our foreign sales and operating results are subject to currency exchange rate fluctuations which may favorably or adversely impact reported earnings and may affect the comparability of period-to-period operating results. By applying the exchange rates prevailing during the prior year period to our local currency results of operations for the current year period, the translation impact of currency rate fluctuations can be calculated.

Index

As the U.S. dollar strengthened versus the euro and the British pound in the 2009 period compared to the 2008 period, fluctuations in foreign currency exchange rates had the following effects on our sales and operating income in the first three and nine months of 2009 as compared to the corresponding periods of 2008:

	Three months ended Sept 30, 2009 vs. 2008	Nine months ended Sept 30, 2009 vs. 2008
	(In millions)	
Increase (decrease) in:		
Net sales	\$(7.6)	\$(44.9)
Operating income	1.9	0.7

Outlook

Shipments of our titanium mill products for the first nine months of 2009 were 22% lower than shipments in the same period of 2008, which reflects the continuing softness in demand, particularly within the commercial aerospace sector. In addition to the ongoing weak global economy, circumstances within the commercial aerospace market continue to contribute to weak demand and lower prices for titanium products. Reduced passenger traffic and reduced financing available to commercial airlines and aircraft leasing companies have contributed to reduced production schedules for commercial aircraft. Further, excess supply chain inventories, particularly as a result of adjustments to production schedules for Boeing and Airbus, including delays in the completion of development and testing of the Boeing 787, continue to suppress customer demand for titanium products. Customer demand for our products is expected to remain soft until these factors begin to be resolved and inventory levels begin to stabilize.

Although we have long-term agreements with a majority of our major customers, many of which specify annual pricing mechanisms and minimum purchase commitments, we anticipate that overall sales volumes and average selling prices for the remainder of 2009 will remain consistent with levels achieved during the first nine months of 2009. Boeing recently announced an expected first test flight for the Boeing 787 in the fourth quarter of 2009 and first deliveries in the fourth quarter of 2010. If Boeing achieves this timeline, we anticipate production rates throughout the commercial aerospace supply chain will accelerate over the next two to three years, which should increase customer demand for our products and positively affect our sales. We continue to adjust our production rates, global workforce and cost structures in response to changes in demand for our products. Although per-unit costs for both melted and mill products have been favorably impacted by declining raw material costs, primarily titanium scrap, such cost reductions are currently being offset by higher per-unit production and overhead costs resulting from allocation of such costs over lower production volumes.

Through careful management of production rates and costs, as well as conservative capital investment, we continue to maintain positive cash flows and a strong balance sheet, including \$143.6 million of cash, borrowing availability under our bank credit agreements of approximately \$217.1 million and no bank debt as of September 30, 2009. While we will continue to adjust our cost structure and production rates as necessary to promote operating cash flow and preserve our financial strength, earnings for the remainder of the year are expected to be at or near earnings achieved in the third quarter of 2009 based on current volume expectations.

Index

Despite current challenges, we believe the overall industry outlook supports a long-term favorable trend in demand for titanium products for the foreseeable future. This trend is driven in part by the long-term demand in the commercial aerospace industry for a new generation of more fuel-efficient aircraft that require a significantly higher percentage of titanium than earlier models. In July 2009, The Airline Monitor, a leading aerospace publication, issued its semi-annual forecast for commercial aircraft deliveries. Aggregate annual deliveries for both Boeing and Airbus are expected to reach record numbers of aircraft during each year from 2009 through 2013 (totaling at least 960 aircraft deliveries each year during the period). Although forecasted deliveries for twin-aisle aircraft through 2013 have declined 4% from 1,450 to 1,390 since The Airline Monitor's January 2009 forecast primarily due to production delays on the Boeing 787, changes to production schedules for certain other commercial aircraft and global economic factors, The Airline Monitor's July 2009 forecast reflects a 22% increase in deliveries of Boeing and Airbus single-aisle aircraft through 2013, which has created a net increase to the expected titanium consumption over the next five years compared to The Airline Monitor's January 2009 forecast. Beyond 2013, projected aircraft deliveries remain strong as fuel efficiency and expansion of the global fleet in developing areas, such as Asia, provide key drivers of long-term demand. Although the duration of the current global recession may impact the timing of the demand recovery, this updated forecast supports our belief that long-term industry-wide demand trends will remain strong for the foreseeable future.

We continue to pursue our strategic plans to improve our production capabilities, with a focus on opportunities to improve our operating flexibility, efficiency and cost structure, to meet our customers' long-term needs. In particular, we continue to enhance our ability to meet our current and prospective customers' needs and strengthen our position as a reliable supplier in markets where technical ability and precision are critical. We have been successful over the last several years in establishing significant flexibility and cost advantages in our entire manufacturing process. We believe our efficient manufacturing processes and strong balance sheet have kept us well-positioned in the current economic environment, and we believe our financial strength will allow us to continue to invest in our business, fully serve our current and prospective customers and pursue strategic opportunities when appropriate.

LIQUIDITY AND CAPITAL RESOURCES

Our consolidated cash flows for the nine months ended September 30, 2008 and 2009 are presented below. The following should be read in conjunction with our Condensed Consolidated Financial Statements and notes thereto.

	Nine months ended September 30, 2008 2009 (In millions)	
Cash provided by (used in):		
Operating activities	\$128.0	\$129.5
Investing activities	(110.9)	(21.9)
Financing activities	(69.5)	(11.5)
Net cash (used in) provided by operating, investing and financing activities	\$(52.4)	\$96.1

Operating activities. Cash flow from operations is considered a primary source of our liquidity. Changes in pricing, production volume and customer demand, among other things, could significantly affect our liquidity. Cash provided by operating activities was \$128.0 million for the first nine months of 2008 and \$129.5 million for the first nine months of 2009. The net effects of the following significant items contributed to the cash provided by operating activities:

Index

- lower operating income of \$138.9 million in 2009;
- higher net cash provided by operations resulting from changes in receivables, inventories, payables and accrued liabilities of \$84.6 million in 2009 in response to changing working capital requirements primarily resulting from declining inventory levels and other affects from overall reduced demand for our products; and
- lower net cash paid for income taxes in 2009 of \$39.9 million primarily due to the lower earnings in 2009.

Investing activities. Cash flows used in our investing activities decreased from \$110.9 million in the first nine months of 2008 to \$21.9 million in the first nine months of 2009. Our capital expenditures were \$89.3 million during the first nine months of 2008 compared to \$24.9 million in 2009. Capital projects and other significant investing activities include the following:

- During 2008, we had construction underway for the first and second phases of our EB melt capacity expansion at our facility in Morgantown and other capacity expansion projects in the U.S. and Europe.
- Most of our capacity expansion projects are now substantially complete, and 2009 capital spending is limited to those required to properly maintain our equipment and facilities or complete active projects, such as the ongoing construction of a melt furnace at our Morgantown facility.
- We purchased \$26.4 million in marketable equity securities during the first nine months of 2008 and \$0.7 million during the first nine months of 2009.

Financing activities. We had the following significant items included in our cash flows from financing activities:

- We received cash from net borrowings of \$13.1 million in the first nine months of 2008.
- We paid dividends on our common stock of \$40.9 million in the first nine months of 2008.
- We purchased \$36.5 million of treasury stock during the first nine months of 2008 and \$5.9 million during the first nine months of 2009.

In February 2009, our board of directors suspended our quarterly common stock dividend after considering the current economic and financial environment.

Future cash requirements

Liquidity. Our primary source of liquidity on an ongoing basis is our cash flows from operating activities and borrowings under various credit facilities. We generally use these amounts to (i) fund capital expenditures, (ii) repay indebtedness incurred primarily for working capital purposes and (iii) provide for the payment of dividends. From time-to-time we will incur indebtedness, generally to (i) fund short-term working capital needs, (ii) refinance existing indebtedness, (iii) make investments in marketable and other securities (including the acquisition of securities issued by our subsidiaries and affiliates) or (iv) fund major capital expenditures or the acquisition of other assets outside the ordinary course of business.

Index

We routinely evaluate our liquidity requirements, capital needs and availability of resources in view of, among other things, our alternative uses of capital, debt service requirements, the cost of debt and equity capital and estimated future operating cash flows. As a result of this process, we have in the past, or in light of our current outlook, may in the future, seek to raise additional capital, modify our common and preferred dividend policies, restructure ownership interests, incur, refinance or restructure indebtedness, repurchase shares of common stock, sell assets, or take a combination of such steps or other steps to increase or manage our liquidity and capital resources. In the normal course of business, we investigate, evaluate, discuss and engage in acquisition, joint venture, strategic relationship and other business combination opportunities in the titanium, specialty metal and other industries. In the event of any future acquisition or joint venture opportunities, we may consider using then-available liquidity, issuing equity securities or incurring additional indebtedness.

At September 30, 2009, we had aggregate borrowing availability under our existing U.S. and European credit facilities of \$217.1 million, and we had an aggregate of \$143.6 million of cash and cash equivalents. Our U.S. credit facility matures in February 2011, and our U.K. revolving credit facility was recently extended and now matures in August 2012. Based upon our expectations of our operating performance, anticipated demands on our cash resources, borrowing availability under our existing credit facilities and anticipated borrowing capacity after the maturity of these credit facilities, we expect to have sufficient liquidity to meet our short-term (defined as the next twelve-month period) and long-term obligations, including the completion of our ongoing capacity expansion projects, some of which are discussed below. If actual developments differ from our expectations, our liquidity could be adversely affected.

Repurchases of common stock. At October 28, 2009, we had approximately \$52.6 million available for repurchase of our common stock under the authorizations described in Note 7 to our Condensed Consolidated Financial Statements.

Capital expenditures. We currently estimate we will invest a total of approximately \$30 million to \$40 million for capital expenditures during 2009. In response to current economic conditions, our planned capital expenditures are limited to those required to properly maintain our equipment and facilities or complete active projects. Capital spending for 2009 is expected to be funded by cash flows from operating activities or existing cash resources and available credit facilities.

While our planned capital expenditures will be primarily to maintain our current production levels, we continue to evaluate additional opportunities to improve or replace productive assets including capital projects, acquisitions or other investments which, if consummated, any required funding would be provided by borrowings under our U.S. or European credit facilities.

Contractual commitments. Other than fixed asset and raw material purchase orders entered into in the normal course of business, there have been no material changes to our contractual commitments discussed in our 2008 Annual Report.

Off-balance sheet arrangements. There have been no material changes to our off-balance sheet arrangements discussed in our 2008 Annual Report.

Recent accounting pronouncements. See Note 1 to our Condensed Consolidated Financial Statements.

Index

Critical accounting policies. For a discussion of our critical accounting policies, refer to Part I, Item 7 - "Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies and Estimates" in our 2008 Annual Report. There have been no changes in our critical accounting policies during the first nine months of 2009.

Affiliate transactions. Corporations that may be deemed to be controlled by or affiliated with Mr. Simmons sometimes engage in (i) intercorporate transactions such as guarantees, management and expense sharing arrangements, shared fee arrangements, joint ventures, partnerships, loans, options, advances of funds on open account, and sales, leases and exchanges of assets, including securities issued by both related and unrelated parties, and (ii) common investment and acquisition strategies, business combinations, reorganizations, recapitalizations, securities repurchases, and purchases and sales (and other acquisitions and dispositions) of subsidiaries, divisions or other business units, which transactions have involved both related and unrelated parties and have included transactions which resulted in the acquisition by one related party of a publicly-held minority equity interest in another related party. We continuously consider, review and evaluate such transactions, and understand that Contran and related entities consider, review and evaluate such transactions. Depending upon the business, tax and other objectives then relevant, it is possible that we might be a party to one or more such transactions in the future. See Note 3 to our Condensed Consolidated Financial Statements.

Item 3. **QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

We are exposed to market risk, including foreign currency exchange rates, commodity prices and security prices. There have been no material changes in these market risks since we filed our 2008 Annual Report, and we refer you to the report for a complete description of these risks.

Item 4. **CONTROLS AND PROCEDURES**

Evaluation of disclosure controls and procedures. We maintain a system of disclosure controls and procedures. The term "disclosure controls and procedures," as defined by Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), means controls and other procedures that are designed to ensure that information required to be disclosed in the reports that we file or submit to the SEC under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit to the SEC under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and our principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions to be made regarding required disclosure. Each of Steven L. Watson, our Chief Executive Officer, and James W. Brown, our Chief Financial Officer, have evaluated the design and operating effectiveness of our disclosure controls and procedures as of September 30, 2009. Based upon their evaluation, these executive officers have concluded that our disclosure controls and procedures were effective as of September 30, 2009.

Index

Scope of management's report on internal control over financial reporting. We also maintain internal control over financial reporting. The term "internal control over financial reporting," as defined by rule 13a-15(f) of the Exchange Act, means a process designed by, or under the supervision of, our principal executive and principal financial officers, or persons performing similar functions, and effected by our board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP, and includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our Consolidated Financial Statements.

Changes in internal control over financial reporting. There have been no changes to our internal control over financial reporting during the quarter ended September 30, 2009 that have materially affected our internal control over financial reporting.

PART II. – OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

Refer to Note 10 of the Condensed Consolidated Financial Statements and to our 2008 Annual Report for descriptions of certain previously reported legal proceedings.

Item 1A. RISK FACTORS

There have been no material changes in the first nine months of 2009 with respect to our risk factors presented in Item 1A in our 2008 Annual Report on Form 10-K.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

On November 12, 2007, our board of directors authorized the repurchase of up to \$100 million of our common stock in open market transactions, including block purchases, or in privately negotiated transactions, which may include transactions with our affiliates. We may repurchase our common stock from time to time as market conditions permit. The stock repurchase program does not include specific price targets or timetables and may be suspended at any time. Depending on market conditions, we may terminate the program prior to its completion. Repurchased shares will be retired and cancelled. See Note 7 to the Condensed Consolidated Financial Statements.

The following table discloses certain information regarding the shares of our common stock we purchased during the third quarter of 2009 (we made no purchases during September 2009). All of these purchases were made under the repurchase program in open market transactions.

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of the publicly announced plan	Maximum dollar value that may yet be purchased under the publicly announced plan (In millions)
July 1, 2009 to July 31, 2009	125,000	\$ 8.16	125,000	\$58.1
August 1, 2009 to August 31, 2009	60,250	\$ 8.34	60,250	\$57.6
