economically dispose of the Oak Ridge facility. The audited consolidated financial statements and the notes thereto filed on Form 10-K for the year ending December 31, 2002 contains additional risk factors and an expanded disclosure of these risks. When the Company uses words like "may," "believes," "expects," "anticipates," "should," "estimate," "project," "plan," their opposites and similar expressions, the Company is making forward-looking statements. These terms are most often used in statements relating to business plans, strategies, anticipated benefits or projections about the anticipated revenues, earnings or other aspects of our operating results. The Company makes these statements in an effort to keep stockholders and the public informed about our business based on our current expectations about future events. Such statements should be viewed with caution and are not guarantees of future performance or events. Our business is subject to uncertainties, risks and other influences, many of which the Company has no control over. Additionally, these factors, either alone or taken together, could have a material adverse effect on the Company and could change whether any forward-looking statement ultimately turns out to be true. The Company undertakes no obligation to publicly release updates or revisions to these statements. The above discussion should be read in conjunction with the audited consolidated financial statements and the notes thereto filed on Form 10-K for the year ending December 31, 2002.
