UNITED NATURAL FOODS, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
May 2, 2015 (unaudited)

1. SIGNIFICANT ACCOUNTING POLICIES

(a) Nature of Business

United Natural Foods, Inc. and its subsidiaries (the "Company") is a leading distributor and retailer of natural, organic and specialty products. The Company sells its products primarily throughout the United States and Canada.

(b) Basis of Presentation

The accompanying unaudited condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany transactions and balances have been eliminated in consolidation.

The accompanying unaudited condensed consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the "SEC") for interim financial information, including the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, certain information and note disclosures normally required in complete financial statements prepared in conformity with accounting principles generally accepted in the United States have been condensed or omitted. In the Company's opinion, these condensed consolidated financial statements include all adjustments necessary for a fair presentation of the financial position, results of operations and cash flows for the interim periods presented. The results of operations for interim periods, however, may not be indicative of the results that may be expected for a full year. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended August 2, 2014.

Net sales consist primarily of sales of natural, organic and specialty products to retailers, adjusted for customer volume discounts, returns and allowances. Net sales also include amounts charged by the Company to customers for shipping and handling and fuel surcharges. The principal components of cost of sales include the amounts paid to manufacturers and growers for product sold, plus the cost of transportation necessary to bring the product to the Company's distribution facilities. Cost of sales also includes amounts incurred by the Company's manufacturing subsidiary, United Natural Trading LLC, which does business as Woodstock Farms Manufacturing, for inbound transportation costs and depreciation of manufacturing equipment offset by consideration received from suppliers in connection with the purchase or promotion of the suppliers' products. Operating expenses include salaries and wages, employee benefits (including payments under the Company's Employee Stock Ownership Plan), warehousing and delivery, selling, occupancy, insurance, administrative, share-based compensation and amortization expense. Operating expenses also include depreciation expense related to the wholesale and retail divisions. Other expense (income) includes interest on outstanding indebtedness, interest income, foreign exchange gains or losses and other miscellaneous income and expenses. Other income for the three and nine months ended May 2, 2015 includes a gain of \$4.2 million associated with a transfer of land at the Company's Prescott, Wisconsin facility.

As noted above, the Company includes shipping and handling fees billed to customers in net sales. Shipping and handling costs associated with inbound freight are generally recorded in cost of sales, whereas shipping and handling costs for selecting, quality assurance, and outbound transportation are recorded in operating expenses. Outbound shipping and handling costs, including allocated employee benefit expenses, totaled \$113.0 million and \$100.3 million for the three months ended May 2, 2015 and May 3, 2014, respectively. Outbound shipping and handling costs,

including allocated employee benefit expenses, totaled \$337.7 million and \$295.4 million for the nine months ended May 2, 2015 and May 3, 2014, respectively.

(c) Correction of Prior Period Errors

During the three months ended January 31, 2015, the Company recorded a cumulative prior period adjustment to net sales for \$7.7 million related to amounts owed to a customer resulting from an incorrect calculation of contractual obligations to that customer from fiscal year 2009 through fiscal year 2014. The aggregate amount of the reduction in net sales related to this incorrect calculation in fiscal 2015 was \$9.3 million. The Company reviewed the impact of these corrections in accordance with Securities and Exchange Commission Staff Accounting Bulletin No. 99 "Materiality," and determined that these corrections were not material to prior or current periods.

2. RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In April 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2015-03, Interest - Imputation of Interest (Subtopic 835-30) ("ASU 2015-03"), which simplifies the presentation of debt issuance costs. ASU 2015-03 requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with the presentation of debt discounts. ASU 2015-03 is effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years, which for the Company will be the first quarter of the fiscal year ending July 29, 2017, with early adoption permitted and retrospective application required. If the Company had adopted this standard in the third quarter of fiscal 2015, the result would have been the reclassification of \$4.4 million and \$3.1 million as of May 2, 2015 and August 2, 2014, respectively, from deferred financing costs to long-term debt in our condensed consolidated balance sheets.

In August 2014, the FASB issued ASU No. 2014-15, Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern. The new guidance requires management to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures as appropriate. The new pronouncement is effective for public companies with annual periods ending after December 15, 2016, and interim periods thereafter. We do not expect the adoption of this guidance to have a significant impact on the Company's consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers, (Topic 606). The core principle of the new guidance is that an entity will recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The new pronouncement is effective for public companies with annual periods, and interim periods within those periods, beginning after December 15, 2016, which for the Company will be the first quarter of the fiscal year ending July 28, 2018. We are in the process of evaluating the impact that this new guidance will have on the Company's consolidated financial statements.

In April 2014, the FASB issued ASU No. 2014-08, Presentation of Financial Statements (Topic 2015) and Property Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an entity. The new guidance raises the threshold for disposals that would qualify as discontinued operations and also requires additional disclosures regarding discontinued operations, as well as material disposals that do not meet the definition of discontinued operations. The amendments are effective for fiscal years, and interim periods within those years, beginning on or after December 15, 2014, which would be the Company's first quarter of the fiscal year ending July 30, 2016, and should be applied on a prospective basis. We do not expect the adoption of these provisions to have a significant impact on the Company's consolidated financial statements.

3. ACQUISITIONS

During the three months ended May 2, 2015, the Company recorded an adjustment to certain provisional amounts recorded as of the fiscal year ended August 2, 2014 related to the acquisition of all of the outstanding capital stock of Tony's Fine Foods ("Tony's") by the Company's wholly-owned subsidiary, United Natural Foods West, Inc. ("UNFI West") on July 15, 2014. This adjustment resulted in a decrease to goodwill of \$0.3 million related to a true-up of accounts receivable balances for amounts subsequently collected. This adjustment was in addition to those adjustments recorded in the first and second quarters of fiscal 2015, which included (i) an increase to the fair value of the non-competition agreement assets and a decrease to the fair value of the customer relationship intangible asset by \$0.9 million and \$0.7 million, respectively, recorded within intangible assets based on updated valuation information, (ii) a decrease to the opening value of the property and equipment acquired of \$0.8 million based on updated fair value information, (iii) a decrease to goodwill of \$0.1 million related to a preliminary working capital adjustment, (iv) a decrease to goodwill of \$3.1 million related to a settlement of a tax liability that was recorded as a payable as of

August 2, 2014, and (v) a decrease to goodwill of \$0.1 million related to the working capital adjustment settlement. The aforementioned adjustments decreased goodwill by a total of \$0.3 million in the third quarter of fiscal 2015 and \$3.0 million from the balance recorded as of August 2, 2014. While the Company is still completing the final valuation of the acquired fixed assets and intangibles and purchase accounting, the Company does not expect any material changes to the amounts recorded in the financial statements as of May 2, 2015. Net sales from the acquired business totaled approximately \$213.7 million and \$661.1 million for the three and nine months ended May 2, 2015, respectively, and are included within the Company's wholesale segment.

The cash portion of the purchase price paid for Tony's was financed through borrowings under the Company's amended and restated revolving credit facility. Acquisition costs related to the purchase have been expensed as incurred and are included within "Operating Expenses" in the Condensed Consolidated Statements of Income. The business was absorbed by the operations of the Company's broadline distribution business; therefore, the Company does not record the expenses separately from the rest of the broadline distribution business and it is not possible to provide complete financial results separately for the business.

4. EARNINGS PER SHARE

The following is a reconciliation of the basic and diluted number of shares used in computing earnings per share (in thousands):

	Three months ended		Nine months ended	
	May 2, 2015	May 3, 2014	May 2, 2015	May 3, 2014
Basic weighted average shares outstanding	50,079	49,635	49,998	49,577
Net effect of dilutive stock awards based upon the treasury stock method	269	296	248	283
Diluted weighted average shares outstanding	50,348	49,931	50,246	49,860

There were 241 anti-dilutive share-based awards outstanding for the three months ended May 2, 2015 and 5,634 anti-dilutive share-based awards outstanding for the three months ended May 3, 2014. For the nine months ended May 2, 2015 and May 3, 2014, there were 5,250 and 5,916 anti-dilutive share-based awards outstanding, respectively. These anti-dilutive share-based awards were excluded from the calculation of diluted earnings per share.

5. FAIR VALUE MEASUREMENTS OF FINANCIAL INSTRUMENTS

Interest Rate Swap Agreement

On January 23, 2015, the Company entered into a forward starting interest rate swap agreement with an effective date of August 3, 2015. The agreement provides for the Company to pay interest for a seven-year period at a fixed rate of 1.795% on an initial amortizing principal amount of \$140.0 million while receiving interest for the same period at the one-month London Interbank Offered Rate ("LIBOR") on the same notional amount. The interest rate swap has been entered into as a hedge against LIBOR movements on the current variable rate related to the Company's real-estate backed Term Loan Agreement entered into on August 14, 2014, explained in more detail in Note 7 "Long-Term Debt," to protect against rising interest rates. We expect that the interest rate swap will effectively fix the Company's interest rate payments on the \$140.0 million of debt. The swap agreement qualifies as an "effective" hedge under FASB Accounting Standards Codification ("ASC") 815, Derivatives and Hedging ("ASC 815").

Interest rate swap agreements are entered into for periods consistent with related underlying exposures and do not constitute positions independent of those exposures. The Company's interest rate swap agreement is designated as a cash flow hedge at May 2, 2015 and is reflected at fair value in the Condensed Consolidated Balance Sheet.

The Company uses the "Hypothetical Derivative Method" described in ASC 815 for quarterly prospective and retrospective assessments of hedge effectiveness, as well as for measurements of hedge ineffectiveness. Under this method, the Company assesses the effectiveness of each hedging relationship by comparing the changes in cash flows of the derivative hedging instrument with the changes in cash flows of the designated hedged transactions. The effective portion of changes in the fair value of the derivative is initially reported in other comprehensive income (outside of earnings) and subsequently reclassified to earnings in interest income when the hedged transactions affect earnings. Ineffectiveness resulting from the hedge is recorded as a gain or loss in the condensed consolidated statement of income as part of other income. The Company did not have any hedge ineffectiveness recognized in earnings during the three months ended May 2, 2015. The Company also monitors the risk of counterparty default on an ongoing basis.

Fuel Supply Agreements

The Company is party to several fixed price fuel supply agreements. During the first quarter of fiscal 2015, the Company entered into an agreement which requires it to purchase a portion of its diesel fuel each month at fixed prices through December 2015. These fixed price fuel agreements qualify for, and the Company has elected to utilize, the “normal purchase” exception under ASC 815 as physical deliveries will occur rather than net settlements, and therefore the fuel purchases under these contracts are expensed as incurred and included within operating expenses. During the nine months ended May 3, 2014, the Company was a party to several similar agreements which required it to purchase a portion of its diesel fuel each month at fixed prices through December 2014 and which also qualified and were accounted for using the “normal purchase” exception under ASC 815, and therefore the fuel purchases under those contracts were also expensed as incurred and included within operating expenses.

Financial Instruments

There were no financial assets and liabilities measured on a recurring basis as of August 2, 2014. The following table provides the fair value hierarchy for financial assets and liabilities measured on a recurring basis as of May 2, 2015:

(In thousands)	Fair Value at May 2, 2015		
	Level 1	Level 2	Level 3
Liabilities:			
Interest Rate Swap	—	\$420	—
	—	\$420	—

The fair value of the Company's other financial instruments including cash, cash equivalents, accounts receivable, notes receivable, accounts payable and certain accrued expenses approximate carrying amounts due to the short-term nature of these instruments. The Company believes its credit risk is similar to the overall market and variable rates have not moved significantly since it initiated the underlying borrowings therefore the fair value of notes payable approximate carrying amounts.

The following estimated fair value amounts for long-term debt have been determined by the Company using available market information and appropriate valuation methodologies including the discounted cash flow method, taking into account the instruments' interest rate, terms, maturity date and collateral, if any, in comparison to market rates for similar financial instruments and are, therefore, deemed Level 2 inputs. However, considerable judgment is required in interpreting market data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts that the Company could realize in a current market exchange.

(In thousands)	May 2, 2015		August 2, 2014

6. BUSINESS SEGMENTS

The Company has several operating divisions aggregated under the wholesale segment, which is the Company's only reportable segment. These operating divisions have similar products and services, customer channels, distribution methods and historical margins. The wholesale segment is engaged in the national distribution of natural, organic and specialty foods, produce and related products in the United States and Canada. The Company has additional operating divisions that do not meet the quantitative thresholds for reportable segments and are therefore aggregated under the caption of "Other." "Other" includes a retail division, which engages in the sale of natural foods and related products to the general public through retail storefronts on the east coast of the United States, a manufacturing division, which engages in importing, roasting, packaging, and distributing of nuts, dried fruit, seeds, trail mixes, granola, natural and organic snack items and confections, and the Company's branded product lines. "Other" also includes certain corporate operating expenses that are not allocated to operating divisions and are necessary to operate the Company's headquarters located in Providence, Rhode Island, which include depreciation, salaries, retainers, and other related expenses of officers, directors, corporate finance (including professional services), information technology, governance, legal, human resources and internal audit. As the Company continues to expand its business and serve its customers through a new national platform, these corporate expense amounts have increased, which is the primary driver behind the increasing operating losses within the "Other" category below. Non-operating expenses that are not allocated to the operating divisions are under the caption of "Unallocated Expenses." The Company does not record its revenues for financial reporting purposes by product group, and it is therefore impracticable for the Company to report them accordingly.

The following table reflects business segment information for the periods indicated (in thousands):

	Wholesale	Other	Eliminations	Unallocated	Consolidated
Three months ended May 2, 2015:

7. LONG-TERM DEBT

On August 14, 2014, the Company entered into a real-estate backed Term Loan Agreement (the "Term Loan Agreement") by and among the Company, its wholly-owned subsidiary Albert's Organics, Inc. ("Albert's," and together with the Company, the "Borrowers"), the financial institutions that are parties thereto as lenders (collectively, the "Lenders"), Bank of America, N.A. as administrative agent for the Lenders (the "Administrative Agent") and the other parties thereto. The total initial borrowings under the Term Loan Agreement were \$150.0 million. Borrowings under the Term Loan Agreement are guaranteed by most of the Company's wholly-owned subsidiaries who are not also Borrowers. The Borrowers are required to make \$2.5 million principal payments quarterly beginning on November 1, 2014. The Term Loan Agreement will terminate on the earlier of (a) August 14, 2022 and (b) the date that is ninety days prior to the termination date of the Company's amended and restated revolving credit agreement, as amended. Under the Term Loan Agreement, the Borrowers at their option may request the establishment of one or more new term loan commitments in increments of at least \$10.0 million, but not to exceed \$50.0 million in total, subject to the approval of the Lenders electing to participate in such incremental loans and the satisfaction of the conditions required by the Term Loan Agreement. The Borrowers will be required to make quarterly principal payments on these incremental borrowings in accordance with the terms of the Term Loan Agreement.

Borrowings under the Term Loan Agreement bear interest at rates that, at the Company's option, can be either: (1) a base rate generally defined as the sum of (i) the highest of (x) the Administrative Agent's prime rate, (y) the average overnight federal funds effective rate plus 0.50% and (z) one-month LIBOR plus one percent (1%) per annum and (ii) a margin of 1.50%; or, (2) a LIBOR rate generally defined as the sum of (i) LIBOR (as published by Reuters or other commercially available sources) for one, two, three or six months or, if approved by all affected lenders, nine months (all as selected by the Company), and (ii) a margin of 2.50%. Interest accrued on borrowings under the Term Loan Agreement is payable in arrears. Interest accrued on any LIBOR loan is payable on the last day of the interest period applicable to the loan and, with respect to any LIBOR loan of more than three (3) months, on the last day of every three (3) months of such interest period. Interest accrued on base rate loans is payable on the first day of every month. The Company is also required to pay certain customary fees to the Administrative Agent. The Borrowers' obligations under the Term Loan Agreement are secured by certain parcels of the Borrowers' real property.

As of May 2, 2015, the Company had borrowings of \$142.5 million under the Term Loan Agreement which is included in "Long-term debt" on the Condensed Consolidated Balance Sheet.

During the nine months ended May 2, 2015, the Company entered into an amendment to an existing lease agreement for the office space utilized as the Company's corporate headquarters in Providence, Rhode Island. The amendment provides for additional office space to be utilized by the Company and extends the lease term for an additional 10 years. The lease qualifies for capital lease treatment pursuant to FASB ASC 840, Leases, and the estimated fair value of the building is recorded on the Condensed Consolidated Balance Sheet with the capital lease obligation included in "Long-term debt." A portion of each lease payment reduces the amount of the lease obligation, and a portion is recorded as interest expense at an effective rate of approximately 12.38%. The capital lease obligation as of May 2, 2015 was \$13.6 million. The Company recorded \$0.4 million and \$0.5 million of interest expense during the three and nine months ended May 2, 2015, respectively.

During the fiscal year ended July 28, 2012, the Company entered into a lease agreement for a new distribution facility in Aurora, Colorado. At the conclusion of the fiscal year ended August 3, 2013, actual construction costs exceeded the construction allowance as defined by the lease agreement, and therefore, the Company determined it met the criteria for continuing involvement pursuant to FASB ASC 840, Leases, and applied the financing method to account for this transaction during the fourth quarter of fiscal 2013. Under the financing method, the book value of the distribution facility and related accumulated depreciation remains on the balance sheet. The construction allowance is recorded as a financing obligation in "Long-term debt." A portion of each lease payment reduces the amount of the financing

obligation, and a portion is recorded as interest expense at an effective rate of approximately 7.32%. The financing obligation as of May 2, 2015 was \$32.7 million. The Company recorded \$0.6 million of interest expense during each of the three months ended May 2, 2015 and May 3, 2014 and \$1.9 million during each of the nine months ended May 2, 2015 and May 3, 2014.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that involve substantial risks and uncertainties. In some cases you can identify these statements by forward-looking words such as "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "plans," "planned," "seek," "should," "will," and similar words. Statements that contain these words should be read carefully because they discuss future expectations, contain projections of future results of operations or of financial positions or state other "forward-looking" information.

Forward-looking statements involve inherent uncertainty and may ultimately prove to be incorrect or false. You are cautioned not to place undue reliance on forward-looking statements. Except as otherwise may be required by law, we undertake no obligation to update or revise forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or actual operating results. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of various factors, including, but not limited to:

- our dependence on principal customers;
- our sensitivity to general economic conditions, including the current economic environment;
- changes in disposable income levels and consumer spending trends;
- our ability to reduce our expenses in amounts sufficient to offset our increased focus on sales to conventional supermarkets and the shift in our product mix as a result of our acquisition of Tony's and the resulting lower gross margins on these sales;
- our reliance on the continued growth in sales of natural and organic foods and non-food products in comparison to conventional products;
- our ability to timely and successfully deploy our new warehouse management system throughout our distribution centers and our transportation management system across our Company;
- volatility in fuel costs;
- our sensitivity to inflationary and deflationary pressures;
- the relatively low margins and economic sensitivity of our business;
- the potential for disruptions in our supply chain by circumstances beyond our control;
- the risk of interruption of supplies due to lack of long-term contracts, severe weather, work stoppages or otherwise;
- consumer demand for natural and organic products outpacing suppliers' ability to produce those products;
- union-organizing activities that could cause labor relations difficulties and increased costs;
- the ability to identify and successfully complete acquisitions of other natural, organic and specialty food and non-food products distributors;
- management's allocation of capital and the timing of capital expenditures; and
- our ability to successfully deploy our operational initiatives to achieve synergies from the acquisition of Tony's.

This list of risks and uncertainties, however, is only a summary of some of the most important factors and is not intended to be exhaustive. You should carefully review the risks described under "Part I. Item 1A. Risk Factors" of our Annual Report on Form 10-K for the fiscal year ended August 2, 2014, "Part II. Item 1A. Risk Factors" of our Quarterly Report on Form 10-Q for the quarter ended January 31, 2015 and "Part II. Item 1A. Risk Factors" of this Quarterly Report on Form 10-Q and any cautionary language in this Quarterly Report on Form 10-Q or our other reports filed with the SEC from time to time, as the occurrence of any of these events could have an adverse effect, which may be material, on our business, results of operations and financial condition.

Overview

We believe we are a leading distributor based on sales of natural, organic and specialty foods and non-food products in the United States and Canada, and that our thirty-three distribution centers, representing approximately 7.9 million square feet of warehouse space, provide us with the largest capacity of any North American-based distributor in the natural, organic and specialty products industry. We offer more than 80,000 high-quality natural, organic and specialty foods and non-food products, consisting of national brands, regional brands, private label and master distribution products, in six product categories: grocery and general merchandise, produce, perishables and frozen foods, nutritional supplements and sports nutrition, bulk and food service products and personal care items. We serve more than 40,000 customer locations primarily located across the United States and Canada, the majority of which can be classified into one of the following categories: independently owned natural products retailers, which include buying clubs; supernatural chains, which consist solely of Whole Foods Market Inc. ("Whole Foods Market"); conventional supermarkets, which include mass market chains; and other, which includes foodservice and international customers.

Our operations are comprised of three principal operating divisions. These operating divisions are:

our wholesale division, which includes our broadline natural, organic and specialty distribution business in the United States, UNFI Canada, Inc. ("UNFI Canada"), which is our natural, organic and specialty distribution business in Canada, Tony's, which is a leading distributor of a wide array of specialty protein, cheese, deli, food service and bakery goods, principally throughout the Western United States, Albert's, which is a leading distributor within the United States of organically grown produce and non-produce perishable items, and Select Nutrition, which distributes vitamins, minerals and supplements;

our retail division, consisting of Earth Origins Market, which operates our thirteen natural products retail stores within the United States; and

our manufacturing division, consisting of Woodstock Farms Manufacturing, which specializes in the international importation, roasting, packaging and distribution of nuts, dried fruit, seeds, trail mixes, granola, natural and organic snack items, and confections, and our Blue Marble Brands product lines.

In recent years, our sales to existing and new customers have increased as a result of the continued growth of the natural and organic products industry in general; our high quality service and broader product selection, including specialty products; our acquisition of, or merger with, natural and specialty products distributors; the expansion of our existing distribution centers; the construction of new distribution centers; the introduction of new products and the development of our own line of natural and organic branded products. Through these efforts, we believe that we have been able to broaden our geographic penetration, expand our customer base and enhance and diversify our product selections. Beginning in fiscal 2009, our strategic plan has focused on increasing market share, particularly in our conventional supermarket channel. This channel typically generates lower gross margins than our independent retailer channel, but also typically has lower operating expenses. As part of our "one company" approach, we are in the process of rolling out a national warehouse management and procurement system to convert our existing facilities into a single warehouse management and supply chain platform ("WMS"). We have completed WMS system conversions at our Lancaster, Texas, Ridgefield, Washington, Auburn, Washington and Prescott, Wisconsin facilities. We have also implemented the WMS platform at our Sturtevant, Wisconsin, Montgomery, New York and Auburn, California facilities, and we expect to complete the roll-out to all existing facilities by the end of fiscal 2017. These steps and others are intended to promote operational efficiencies and further reduce our operating expenses as a percentage of net sales as we attempt to offset the lower gross margins we expect to generate by increased sales to the supernatural and conventional supermarket channels.

Inflation continues to impact our financial results. For the three months ended May 2, 2015, inflation in food prices was approximately 2.5% when compared to price levels in the three months ended May 3, 2014. Based on the recent trend, we believe that levels are stabilizing near 2% to 3%. Moderate levels of annual inflation, which we generally

consider to be between 2% and 4%, are beneficial to our results as the majority of our pricing is on a cost plus structure, and price changes up to 4% are more easily passed through the supply chain. We believe the current trend of moderate inflation will continue over the next 12 months.

We have been the primary distributor to Whole Foods Market for more than 16 years. We currently serve as the primary distributor to Whole Foods Market in all of its regions in the United States pursuant to our distribution agreement that expires on September 25, 2020. Whole Foods Market accounted for approximately 35% of our net sales for the three months ended May 2, 2015 and approximately 36% of our net sales for the three months ended May 3, 2014. Whole Foods Market accounted for approximately 34% and 36% of our net sales for the nine months ended May 2, 2015 and May 3, 2014, respectively.

In July 2014, we completed the acquisition of all of the outstanding capital stock of Tony's through our wholly-owned subsidiary, UNFI West, for consideration of approximately \$202.9 million. With the completion of the transaction, Tony's is now a wholly-owned subsidiary of the Company and continues to operate as Tony's Fine Foods. Founded in 1934 by the Ingoglia family, Tony's is headquartered in West Sacramento, California and is a leading distributor of perishable food products, including a wide array

of specialty protein, cheese, deli, food service and bakery goods to retail and specialty grocers, food service customers and other distribution companies principally located throughout the Western United States, as well as Alaska and Hawaii. We believe that the acquisition of Tony's accomplished certain of our strategic objectives as Tony's provides us with an immediate platform for expanding both our high-growth perishable product offerings and our distribution footprint in the Western Region of the United States.

The ability to distribute specialty food items (including gourmet & ethnic and kosher) has accelerated our expansion into a number of high-growth business markets and allowed us to establish immediate market share in the fast-growing specialty foods market. We have integrated specialty food products and natural and organic specialty non-food products into our broadline distribution centers across the United States and Canada. Due to our expansion into specialty foods, we were awarded new business with a number of conventional supermarkets over the past three fiscal years that we previously had not done business with because we did not distribute specialty products. We believe that distribution of these products enhances our conventional supermarket business channel and that our complementary product lines continue to present opportunities for cross-selling.

To maintain our market leadership and improve our operating efficiencies, we seek to continually:

- expand our marketing and customer service programs across regions;
- expand our national purchasing opportunities;
- offer a broader product selection than our competitors;
- offer operational excellence with high service levels and a higher percentage of on-time deliveries than our competitors;
- centralize general and administrative functions to reduce expenses;
- consolidate systems applications among physical locations and regions;
- increase our investment in people, facilities, equipment and technology;
- integrate administrative and accounting functions; and
- reduce the geographic overlap between regions.

Our continued growth has allowed us to expand our existing facilities and open new facilities in an effort to achieve increasing operating efficiencies. We have made significant capital expenditures and incurred considerable expenses in connection with the opening and expansion of our facilities. At May 2, 2015 our distribution capacity totaled approximately 7.9 million square feet. In fiscal 2014, we commenced operations at our new distribution center in Sturtevant, Wisconsin. Our multi-year expansion plan continues to progress as we commenced operations at our new Montgomery, New York distribution center in the first quarter of fiscal 2015, our new Prescott, Wisconsin facility in the third quarter of fiscal 2015, and we are currently constructing an additional facility in Gilroy, California, from which we expect to begin operations in the first quarter of fiscal 2016.

Our net sales consist primarily of sales of natural, organic and specialty products to retailers, adjusted for customer volume discounts, returns and allowances. Net sales also consist of amounts charged by us to customers for shipping and handling and fuel surcharges. The principal components of our cost of sales include the amounts paid to manufacturers and growers for product sold, plus the cost of transportation necessary to bring the product to our distribution facilities, offset by any consideration received from suppliers in connection with the purchase or promotion of the suppliers' products. Cost of sales also includes amounts incurred by us at our manufacturing subsidiary, Woodstock Farms Manufacturing, for inbound transportation costs and depreciation for manufacturing equipment. Our gross margin may not be comparable to other similar companies within our industry that may include all costs related to their distribution network in their costs of sales rather than as operating expenses as we include purchasing, receiving, selecting and outbound transportation expenses within our operating expenses rather than in our cost of sales. Total operating expenses include salaries and wages, employee benefits (including payments under our Employee Stock Ownership Plan), warehousing and delivery, selling, occupancy, insurance, administrative, share-based compensation, depreciation and amortization expense. Other expenses (income) include interest on our

outstanding indebtedness, interest income, foreign exchange gains or losses and other miscellaneous income and expenses. Other income for the three and nine months ended May 2, 2015 includes a gain of \$4.2 million associated with a transfer of land at the Company's Prescott, Wisconsin facility.

Critical Accounting Policies

The preparation of our condensed consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. The SEC has defined critical accounting policies as those that are both most important to the portrayal of our financial condition and results of operations and require our most difficult, complex or subjective judgments or estimates. Based on this definition and as further described in our Annual Report on Form 10-K for the year ended August 2, 2014, we believe our critical accounting policies include the following: (i) determining our allowance for doubtful accounts, (ii) determining our reserves for the self-insured portions of our workers' compensation and automobile liabilities, (iii) valuing business combinations, and (iv) valuing goodwill and intangible assets. For all financial statement periods presented, there have been no material modifications to the application of these critical accounting policies or estimates since our most recently filed Annual Report on Form 10-K.

Results of Operations

The following table presents, for the periods indicated, certain income and expense items expressed as a percentage of net sales:

	Three months ended		Nine months ended		
	May 2, 2015	May 3, 2014	May 2, 2015	May 3, 2014

Three Months Ended May 2, 2015 Compared To Three Months Ended May 3, 2014

Net Sales

Our net sales for the three months ended May 2, 2015 increased approximately 18.7%, or \$332.9 million, to \$2.1 billion from \$1.8 billion for the three months ended May 3, 2014. The year-over-year quarterly increase in net sales was primarily attributable to the inclusion of \$213.7 million of net sales resulting from our acquisition of Tony's in the fourth quarter of fiscal 2014, coupled with organic growth (sales growth excluding the impact of acquisitions) in our wholesale division from all of our channels. Our organic growth is due to the continued growth of the natural and organic products industry in general, increased market share as a result of our focus on service and value added services and the broader selection of products that we offer, including specialty foods. Net sales for the quarter ended

May 2, 2015 also benefited from food price inflation of approximately 2.5% compared to price levels in the third quarter of the prior fiscal year.

Our net sales by customer type for the three months ended May 2, 2015 and May 3, 2014 were as follows (in millions):

18

Customer Type	Net Sales for the Three Months Ended					
	May 2, 2015	% of Net Sales	May 3, 2014	% of Net Sales		
Independently owned natural products retailers	\$679	32	% \$581	33		%
Supernatural chains	736	35	% 641	36		%
Conventional supermarkets	548	26	% 449	25		%
Other	152	7	% 111	6		%
Total	\$2,115	100	% \$1,782	100		%

Net sales to our independent retailer channel increased by approximately \$98 million, or 17%, during the three months ended May 2, 2015 compared to the three months ended May 3, 2014, and accounted for 32% and 33% of our total net sales in the three months ended May 2, 2015 and May 3, 2014, respectively. The increase in net sales in this channel is primarily attributable to net sales by our Tony's business.

Whole Foods Market is our only supernatural chain customer, and net sales to Whole Foods Market for the three months ended May 2, 2015 increased by approximately \$95 million, or 15%, as compared to the three months ended May 3, 2014, and accounted for approximately 35% and 36% of our total net sales for the three months ended May 2, 2015 and May 3, 2014, respectively. The increase in net sales to Whole Foods Market is primarily due to increases in same-store sales as well as new store openings and net sales to Whole Foods Market by our Tony's business.

Net sales to conventional supermarkets for the three months ended May 2, 2015 increased by approximately \$99 million, or 22%, from the three months ended May 3, 2014, and represented approximately 26% and 25% of our total net sales in the three months ended May 2, 2015 and May 3, 2014, respectively. The increase in net sales to conventional supermarkets is due to continued success in our strategy of seeking to be the sole supplier of natural, organic and specialty products to our conventional supermarket customers, as well as net sales by our Tony's business.

Other net sales, which include sales to foodservice customers and sales from the United States to other countries, as well as sales through our retail division, manufacturing division, and our branded product lines, increased by approximately \$41 million, or 37%, for the three months ended May 2, 2015 compared to the three months ended May 3, 2014, and accounted for approximately 7% and 6% of our total net sales for the three months ended May 2, 2015 and May 3, 2014, respectively. The increase in other net sales is attributable to net sales from our Tony's business and expanded sales to our existing foodservice partners.

As we continue to pursue new customers and expand relationships with existing customers, we expect net sales for the remainder of fiscal 2015 to grow over net sales for the comparable period of fiscal 2014, driven largely by incremental sales from our Tony's business. We believe that the integration of our specialty business into our national platform has allowed us to attract customers that we would not have been able to attract without that business and will continue to allow us to pursue a broader array of customers as many customers seek a single source for their natural, organic and specialty products. We also expect that our ability to add products that Tony's has historically sold to our selection of products in our other markets will contribute to an increase in net sales. We believe that our projected net sales growth will come from both sales to new customers (including as a result of acquisitions) and an increase in the number of products that we sell to existing customers. We expect that most of this net sales growth will occur in our lower gross margin supernatural and conventional supermarket channels. Although sales to these customers typically generate lower gross margins than sales to customers within our independent retailer channel, they also typically carry a lower average cost to serve than sales to our independent customers.

Cost of Sales and Gross Profit

Our gross profit increased approximately 9.3%, or \$27.8 million, to \$325.9 million for the three months ended May 2, 2015, from \$298.1 million for the three months ended May 3, 2014. Our gross profit as a percentage of net sales was 15.4% for the three months ended May 2, 2015 compared to 16.7% for the three months ended May 3, 2014. The decline in gross profit as a percentage of net sales between the third quarter of fiscal 2015 and the comparable period in fiscal 2014 was primarily due to the dilution from Tony's net sales, the unfavorable foreign exchange rate for the Company's Canadian business, lower fuel surcharges, and the continued shift in mix of sales.

Our gross profits are generally higher on net sales to independently owned retailers and foodservice customers and lower on net sales in the supernatural and conventional supermarket channels. For the three months ended May 2, 2015, approximately 58%, or \$194 million, of our \$333 million total net sales growth was from increased net sales in the supernatural and conventional supermarket channels.

We anticipate net sales growth in the supernatural and conventional supermarket channels will continue to outpace growth in the independent retailer and other channels. We expect that our distribution relationship with Whole Foods Market as well as our opportunities in the conventional supermarket channel will continue to generate lower gross profit percentages than our historical rates. We will seek to fully offset these reductions in gross profit percentages by reducing our operating expenses as a percent of net sales primarily through improved efficiencies in our supply chain and improvements to our information technology infrastructure, including our ongoing WMS platform.

Operating Expenses

Our total operating expenses increased approximately 9.1%, or \$21.4 million, to \$256.9 million for the three months ended May 2, 2015, from \$235.5 million for the three months ended May 3, 2014. The increase in total operating expenses for the three months ended May 2, 2015 was primarily due to additional costs required to service higher sales volume and increased self insurance expenses, partially offset by a reduction in incentive based cash compensation expense. Operating expenses for the third quarter of fiscal 2015 also included startup costs of approximately \$0.5 million related to our Hudson Valley, New York and Prescott, Wisconsin facilities, offset by a \$0.6 million energy grant received as a result of incorporating eligible energy saving designs into our Hudson Valley, New York facility. Total operating expenses for the third quarter of fiscal 2014 included startup costs of approximately \$0.9 million related to the Company's Sturtevant, Wisconsin facility as well as \$0.6 million of acquisition costs related to the acquisition of Tony's.

Total operating expenses for the three months ended May 2, 2015 included share-based compensation expense of \$2.4 million, compared to \$3.6 million in the three months ended May 3, 2014. Share-based compensation expense was lower during the three months ended May 2, 2015 primarily due to a reduction in performance-based compensation expense related to our long-term incentive plan for members of our executive leadership team.

As a percentage of net sales, total operating expenses decreased to approximately 12.2% for the three months ended May 2, 2015, from approximately 13.2% for the three months ended May 3, 2014. The decrease in total operating expenses as a percentage of net sales was primarily attributable to the growth in the supernatural and conventional supermarket channels which generally have lower operating expenses and higher fixed cost coverage due to higher sales. We expect that we will be able to continue to reduce our operating expenses as a percentage of net sales as we continue the roll-out of our WMS platform. We have completed WMS system conversions at our Lancaster, Texas, Ridgefield, Washington and Auburn, Washington facilities. We have also implemented the WMS platform at our Sturtevant, Wisconsin, Montgomery, New York, Prescott, Wisconsin and Auburn, California facilities. We expect to complete the roll-out to all existing facilities by the end of fiscal 2017.

Operating Income

Reflecting the factors described above, operating income increased approximately 10.2%, or \$6.4 million, to \$69.0 million for the three months ended May 2, 2015, from \$62.6 million for the three months ended May 3, 2014. As a percentage of net sales, operating income was 3.3% for the three months ended May 2, 2015 compared to 3.5% for the three months ended May 3, 2014.

Other Expense (Income)

Other expense, net decreased \$2.6 million to \$0.6 million of income for the three months ended May 2, 2015, from \$2.0 million of expense for the three months ended May 3, 2014. Interest expense increased for the three months ended May 2, 2015 to \$3.9 million compared to \$2.3 million for the three months ended May 3, 2014 due to an increase in borrowings over the prior year and higher average interest rates. Interest income was \$0.1 million in each of the three months ended May 2, 2015 and May 3, 2014. Other income for the three months ended May 2, 2015

included a pre-tax gain of \$4.2 million associated with the transfer of land on which we constructed our Prescott, Wisconsin facility.

Provision for Income Taxes

Our effective income tax rate was 40.0% in each of the three months ended May 2, 2015 and May 3, 2014.

Net Income

Reflecting the factors described in more detail above, net income increased \$5.4 million to \$41.8 million, or \$0.83 per diluted share, for the three months ended May 2, 2015, compared to \$36.4 million, or \$0.73 per diluted share, for the three months ended May 3, 2014.

Nine Months Ended May 2, 2015 Compared To Nine Months Ended May 3, 2014

Net Sales

Our net sales increased approximately 21.7%, or \$1.1 billion, to \$6.1 billion for the nine months ended May 2, 2015, from \$5.0 billion for the nine months ended May 3, 2014. Net sales for the first nine months of fiscal 2015 were negatively impacted by \$9.3 million as a result of additional amounts owed to a customer from an incorrect calculation of contractual obligations to that customer from fiscal 2009 through fiscal 2014. The year-over-year increase in net sales was primarily due to the same factors that contributed to our net sales growth for the quarter ended May 2, 2015, including growth in our wholesale segment of \$1.1 billion. Our net sales growth is due to the continued growth of the natural and organic products industry in general, increased market share as a result of our focus on service and value added services and the inclusion of a broader selection of products, including specialty food products, in our distribution centers. Net sales also benefited from food price inflation of approximately 2.2% that we experienced in the nine months ended May 2, 2015 compared to price levels in the prior year comparable period.

Our net sales by customer type for the nine months ended May 2, 2015 and May 3, 2014 were as follows (in millions):

Customer Type	Net Sales for the Nine Months Ended					
	May 2, 2015	% of Net Sales		May 3, 2014	% of Net Sales	
Independently owned natural products retailers	\$1,976	32	%	\$1,636	33	%
Supernatural chains	2,109	34	%	1,818	36	%
Conventional supermarkets	1,621	27	%*	1,284	26	%
Other	418	7	%	292	5	%*
Total	\$6,124	100	%	\$5,030	100	%

* Total reflects rounding

Net sales to our independent retailer channel increased by approximately \$340 million, or 21%, during the nine months ended May 2, 2015 compared to the nine months ended May 3, 2014, and accounted for 32% and 33% of our total net sales for the nine months ended May 2, 2015 and May 3, 2014, respectively. The increase in net sales in this channel is primarily attributable to net sales by our Tony's business.

Net sales to the supernatural chain channel for the nine months ended May 2, 2015 increased by approximately \$291 million, or 16%, as compared to the prior fiscal year's comparable period, and accounted for approximately 34% of our total net sales for the nine months ended May 2, 2015 compared to 36% for the nine months ended May 3, 2014. The increase in net sales to Whole Foods Market is primarily due to increases in same-store sales as well as new store openings and net sales to Whole Foods Market by our Tony's business.

Net sales to conventional supermarkets for the nine months ended May 2, 2015 increased by approximately \$337 million, or 26%, from the nine months ended May 3, 2014, and represented approximately 27% of total net sales for the nine months ended May 2, 2015 compared to 26% for the nine months ended May 3, 2014. The increase in net sales to conventional supermarkets is primarily due to continued success in our strategy of seeking to be the sole supplier of natural, organic and specialty products to our conventional supermarket customers coupled with the inclusion of our Tony's business.

Other net sales, which include sales to foodservice and international customers, as well as sales through our retail division, manufacturing division, and the Company's branded product lines, increased by approximately \$126 million, or 43% during the nine months ended May 2, 2015 compared to the nine months ended May 3, 2014 and accounted for approximately 7% of total net sales for the nine months ended May 2, 2015 compared to 5% for the nine months

ended May 3, 2014. This growth is attributable to net sales from our Tony's business and expanded sales with our existing foodservice partners.

Cost of Sales and Gross Profit

Our gross profit increased approximately 12.7%, or \$106.6 million, to \$944.1 million for the nine months ended May 2, 2015, from \$837.5 million for the nine months ended May 3, 2014. Our gross profit as a percentage of net sales decreased to 15.4% for the nine months ended May 2, 2015 compared to 16.7% for the nine months ended May 3, 2014. The decline in gross profit as a percentage of net sales in fiscal 2015 is primarily due to the dilution from Tony's net sales, the adverse impact from the reduction in net sales attributable to the incorrect calculation of customer contractual obligations disclosed above, the impact of unfavorable foreign exchange on our Canadian business, and a shift in the mix of sales.

Our gross profits are generally higher on net sales to independently owned retailers and lower on net sales in our conventional supermarket and supernatural channels. For the nine months ended May 2, 2015 approximately \$628 million of our \$1.09 billion total net sales growth was from increased net sales in the conventional supermarket and supernatural channels. Approximately 61% and 62% of our total net sales in the nine months ended May 2, 2015 and May 3, 2014, respectively, were to the conventional supermarket and supernatural channels.

Operating Expenses

Our total operating expenses increased approximately 13.2%, or \$89.3 million, to \$767.2 million for the nine months ended May 2, 2015, from \$678.0 million for the nine months ended May 3, 2014. The increase in total operating expenses for the nine months ended May 2, 2015 was primarily due to additional costs required to service higher sales volume. As a percentage of net sales, total operating expenses decreased to approximately 12.5% for the nine months ended May 2, 2015, from approximately 13.5% for the nine months ended May 3, 2014. Total operating expenses for the nine months ended May 3, 2014 included startup costs of approximately \$2.4 million related to our Montgomery, New York, Auburn, California, and Prescott Wisconsin facilities, \$0.3 million in costs related to the Company's acquisition of Tony's, and \$0.8 million of restructuring and impairment charges as we ceased primary operations at our Canadian facility in Scotstown, Quebec, which was acquired in 2010, offset by a \$0.6 million gain recorded related to an energy grant received related to our Hudson Valley, New York facility.

Total operating expenses for the nine months ended May 2, 2015 include share-based compensation expense of \$12.0 million, compared to \$13.1 million in the nine months ended May 3, 2014. Share-based compensation expense was lower during the nine months ended May 2, 2015 primarily due to a reduction in performance-based compensation expense related to our long-term incentive plan for members of our executive leadership team offset in part by an increase in the number of employees eligible to receive equity compensation as a result of our growing workforce.

Operating Income

Reflecting the factors described above, operating income increased approximately 10.9%, or \$17.4 million, to \$176.9 million for the nine months ended May 2, 2015, from \$159.5 million for the nine months ended May 3, 2014. As a percentage of net sales, operating income was 2.9% for the nine months ended May 2, 2015 as compared to 3.2% for the nine months ended May 3, 2014.

Other Expense (Income)

Other expense, net was \$6.7 million and \$6.0 million for the nine months ended May 2, 2015 and May 3, 2014, respectively. Interest expense was \$10.7 million and \$5.9 million for the nine months ended May 2, 2015 and May 3, 2014, respectively. The increase in interest expense is primarily due to an increase in borrowings over the prior year and higher average interest rates. Interest income of \$0.3 million for the nine months ended May 2, 2015 is relatively consistent with the nine months ended May 3, 2014. Other income included for the nine months ended May 2, 2015

included a pre-tax gain of \$4.2 million associated with a transfer of land on which we constructed our Prescott, Wisconsin facility.

Provision for Income Taxes

Our effective income tax rate was 39.7% and 40.0% for the nine months ended May 2, 2015 and May 3, 2014, respectively. The decrease in the effective income tax rate for the nine months ended May 2, 2015 was primarily driven by a fiscal year 2015 benefit for a solar tax credit for which the Company did not have qualifying expenses to claim in fiscal 2014.

Net Income

Reflecting the factors described in more detail above, net income increased approximately \$10.5 million to \$102.6 million, or \$2.04 per diluted share, for the nine months ended May 2, 2015, compared to \$92.1 million, or \$1.85 per diluted share, for the nine months ended May 3, 2014.

Liquidity and Capital Resources

We finance our day to day operations and growth primarily with cash flows from operations, borrowings under our amended and restated revolving credit facility and term loan facility, operating leases, a finance lease, capital lease, trade payables and bank indebtedness. In addition, from time to time, we may issue equity and debt securities to finance our operations and acquisitions. We believe that our cash on hand and available credit through our amended and restated revolving credit facility as discussed below is sufficient to finance our operations and planned capital expenditures over the next 12 months. The condensed consolidated statement of cash flows presents proceeds from borrowings and repayments of borrowings related to our amended and restated revolving credit facility and real-estate backed Term Loan Agreement on a gross basis. We expect to generate an average of \$75 million to \$125 million in cash flow from operations per year for the 2015 and 2016 fiscal years. We intend to continue to utilize this cash generated from operations to fund acquisitions, fund investments in working capital and capital expenditure needs, including expansion of our distribution facilities, and reduce our debt levels. We intend to manage capital expenditures in the range of approximately 2 to 2.2% of net sales for fiscal 2015, excluding the impact of any potential sale-leaseback transactions, reflecting an increase over levels experienced in fiscal 2013 and fiscal 2014. In fiscal 2015 we completed construction on two new facilities located in New York and Wisconsin and are constructing another facility in California. We expect to finance these requirements with cash generated from operations and borrowings under our amended and restated revolving credit facility. Our planned capital projects will provide both new and expanded facilities as well as technology that we believe will provide us with increased efficiency and the capacity to continue to support the growth of our customer base. Future investments and acquisitions may be financed through equity, long-term debt or borrowings under our amended and restated revolving credit facility.

The Company has not recorded a tax provision for U.S. tax purposes on UNFI Canada profits as they have no assessable profits arising in or derived from the United States and we intend to indefinitely reinvest accumulated earnings in the UNFI Canada operations.

In May 2014, we entered into a First Amendment Agreement (the "Amendment") to our amended and restated revolving credit facility, which increased the maximum borrowings under the amended and restated revolving credit facility to \$600.0 million and extended the maturity date to May 21, 2019. Up to \$550.0 million is available to our U.S. subsidiaries and up to \$50.0 million is available to UNFI Canada. After giving effect to the Amendment, our amended and restated revolving credit facility provides a one-time option to increase the borrowing base by up to an additional \$150.0 million (but in not less than \$10.0 million increments) subject to certain customary conditions and the lenders committing to provide the increase in funding, and also permits us to enter into a real-estate backed term loan facility which shall not exceed \$200.0 million.

The borrowings of the U.S. portion of the amended and restated revolving credit facility, prior to and after giving effect to the Amendment, accrue interest, at our option, at either (i) a base rate (generally defined as the highest of (x) the Bank of America Business Capital prime rate, (y) the average overnight federal funds effective rate plus one-half percent (0.50%) per annum and (z) one-month LIBOR plus one percent (1%) per annum) plus an initial margin of 0.50%, or (ii) LIBOR for one, two, three or six months or, if approved by all affected lenders, nine months plus an initial margin of 1.50%. The borrowings for the Canadian portion of the credit facility for Canadian swing-line loans, Canadian overadvance loans or Canadian protective advances accrue interest, at our option, at either (i) a prime rate (generally defined as the highest of (x) 0.50% over 30-day Reuters Canadian Deposit Offering Rate ("CDOR") for bankers' acceptances, (y) the prime rate of Bank of America, N.A.'s Canada branch, and (z) a bankers' acceptance equivalent rate for a one month interest period plus 1.00% plus an initial margin of 0.50%), or (ii) a bankers' acceptance equivalent rate of the rate of interest per annum equal to the annual rates applicable to the Canadian Dollar bankers' acceptance on the "CDOR Page" of Reuter Monitor Money Rates Service, plus the CDOR rate, and an initial margin of 1.50%. All other borrowings on the Canadian portion of the amended and restated revolving credit facility,

prior to and after giving effect to the Amendment, must exclusively accrue interest under the CDOR rate plus the applicable margin. The amended and restated revolving credit facility includes an annual commitment fee in the amount of 0.30% if the average daily balance of amounts actually used (other than swing-line loans) is less than 40% of the aggregate commitments, or 0.25% if such average daily balance is 40% or more of the aggregate commitments. The amended and restated secured revolving credit facility supports our working capital requirements in the ordinary course of business and provides capital to grow our business organically or through acquisitions.

Our borrowing base under the amended and restated revolving credit facility is determined as the lesser of (1) \$600.0 million or (2) the fixed percentages of our previous fiscal month-end eligible accounts receivable and inventory levels. As of May 2, 2015, our borrowing base, which was calculated based on our eligible accounts receivable and inventory levels, was \$588.1 million. As of May 2, 2015, we had \$360.6 million of borrowings outstanding under our amended and restated revolving credit facility and \$36.3 million in letter of credit commitments and reserves which reduced our available borrowing capacity under our amended and restated revolving credit facility on a dollar for dollar basis. Our resulting remaining availability was \$191.2 million as of May 2, 2015.

The amended and restated revolving credit facility subjects us to a springing minimum fixed charge coverage ratio (as defined in the underlying credit agreement) of 1.0 to 1.0 calculated at the end of each of our fiscal quarters on a rolling four quarter basis when aggregate availability (as defined in the underlying credit agreement) is less than the greater of (i) \$50.0 million and (ii) 10% of the aggregate borrowing base. We were not subject to the fixed charge coverage ratio covenant during the three months ended May 2, 2015.

On August 14, 2014, we entered into a real-estate backed Term Loan Agreement by and among us, our wholly-owned subsidiary Albert's (together with the Company, the "Borrowers"), the financial institutions that are parties thereto as lenders (collectively, the "Lenders"), Bank of America, N.A. as administrative agent for the Lenders (the "Administrative Agent") and the other parties thereto. The total initial borrowings under the Term Loan Agreement were \$150.0 million. We are required to make \$2.5 million principal payments quarterly. The Term Loan Agreement will terminate on the earlier of (a) August 14, 2022 and (b) the date that is ninety days prior to the termination date of our amended and restated revolving credit facility, as amended. Under the Term Loan Agreement, we at our option may request the establishment of one or more new term loan commitments in increments of at least \$10.0 million, but not to exceed \$50.0 million in total, subject to the approval of the Lenders electing to participate in such incremental loans and the satisfaction of the conditions required by the Term Loan Agreement. We will be required to make quarterly principal payments on these incremental borrowings in accordance with the terms of the Term Loan Agreement. Proceeds from this Term Loan Agreement were used to pay down borrowings on our amended and restated revolving credit facility.

Borrowings under the Term Loan Agreement bear interest at rates that, at the Company's option, can be either: (1) a base rate generally defined as the sum of (i) the highest of (x) the Administrative Agent's prime rate, (y) the average overnight federal funds effective rate plus 0.50% and (z) one-month LIBOR plus one percent (1%) per annum and (ii) a margin of 1.50%; or, (2) a LIBOR rate generally defined as the sum of (i) LIBOR (as published by Reuters or other commercially available source) for one, two, three or six months or, if approved by all affected lenders, nine months (all as selected by the Company), and (ii) a margin of 2.50%. Interest accrued on borrowings under the Term Loan Agreement is payable in arrears. Interest accrued on any LIBOR loan is payable on the last day of the interest period applicable to the loan and, with respect to any LIBOR loan of more than three (3) months, on the last day of every three (3) months of such interest period. Interest accrued on base rate loans is payable on the first day of every month. The Company is also required to pay certain customary fees to the Administrative Agent. The Borrowers' obligations under the Term Loan Agreement are secured by certain parcels of the Borrowers' real property.

The Term Loan Agreement includes financial covenants that require (i) the ratio of our consolidated EBITDA (as defined in the Term Loan Agreement) minus the unfinanced portion of Capital Expenditures (as defined in the Term Loan Agreement) to our consolidated Fixed Charges (as defined in the Term Loan Agreement) to be at least 1.20 to 1.00 as of the end of any period of four fiscal quarters, (ii) the ratio of our Consolidated Funded Debt (as defined in the Term Loan Agreement) to our EBITDA for the four fiscal quarters most recently ended to be not more than 3.00 to 1.00 as of the end of any fiscal quarter and (iii) the ratio, expressed as a percentage, of our outstanding principal balance under the Loans (as defined in the Term Loan Agreement), divided by the Mortgaged Property Value (as defined in the Term Loan Agreement) to be not more than 75% at any time.

On January 23, 2015 we entered into a forward starting interest rate swap agreement with an effective date of August 3, 2015, which expires in August 2022 concurrent with the scheduled maturity of our Term Loan Agreement. This interest rate swap agreement has an initial notional amount of \$140.0 million and provides for us to pay interest for a seven-year period at a fixed rate of 1.795% while receiving interest for the same period at the one-month LIBOR on the same notional principal amount. The interest rate swap agreement has an amortizing notional amount which adjusts down on the dates payments are due on the underlying term loan. The interest rate swap has been entered into as a hedge against LIBOR movements on \$140.0 million of the current variable rate indebtedness under the Term Loan Agreement at one-month LIBOR plus 1.00% and a margin of 1.50%, thereby fixing our effective rate on the

notional amount at 4.295%. The swap agreement qualifies as an “effective” hedge under Accounting Standards Codification (ASC) 815 Derivatives and Hedging.

Net cash used in operations was \$6.2 million for the nine months ended May 2, 2015, a decrease of \$14.5 million from the \$20.6 million used in operations for the nine months ended May 3, 2014. The primary reasons for the net cash used in operations for the nine months ended May 2, 2015 were an increase in inventories of \$116.7 million and an increase in accounts receivable of \$67.2 million due to our sales growth during the year, including as a result of our acquisition of Tony's, partially offset by an increase in accounts payable of \$30.1 million and net income of \$102.6 million. The primary reasons for the net cash used in operations for the nine months ended May 3, 2014 were an increase in inventories of \$126.6 million and an increase in accounts receivable of \$81.5 million due to our sales growth during the year, partially offset by an increase in accounts payable of \$48.1 million and net income of \$92.1 million. Days in inventory decreased to 48 days at May 2, 2015, compared to 51 days at August 2, 2014. Days sales outstanding remained consistent at 22 days at May 2, 2015 compared to August 2, 2014. Working capital increased by \$145.0 million, or 17.0%, to \$999.4 million at May 2, 2015, compared to working capital of \$854.5 million at August 2, 2014.

Net cash used in investing activities decreased \$16.3 million to \$108.6 million for the nine months ended May 2, 2015, compared to \$124.9 million for the nine months ended May 3, 2014. The decrease from the nine months ended May 3, 2014 was primarily due to a reduction in cash paid for acquisitions compared to fiscal 2014 coupled with a \$9.4 million reduction in capital spending.

Net cash provided by financing activities was \$122.6 million for the nine months ended May 2, 2015. As noted above, we present proceeds from borrowings and repayments of borrowings related to our amended and restated revolving credit facility and term loan on a gross basis. The net cash provided by financing activities was primarily due to gross borrowings under our revolving credit line and long-term debt of \$567.8 million and \$150.0 million, respectively, partially offset by repayments of our revolving credit line and long-term debt of \$621.9 million and \$8.3 million, respectively, as well as increases in bank overdrafts of \$33.1 million. Net cash provided by financing activities was \$151.0 million for the nine months ended May 3, 2014, primarily due to gross borrowings under our revolving credit line of \$535.2 million, partially offset by repayments of our revolving credit line of \$397.1 million, as well as increases in bank overdrafts of \$12.7 million.

From time-to-time, we enter into fixed price fuel supply agreements. As of May 2, 2015, we had entered into agreements which require us to purchase a total of approximately 0.6 million gallons of diesel fuel at prices ranging from \$2.83 to \$3.92 per gallon through December 2015. As of May 3, 2014, we had entered into agreements which required us to purchase a total of approximately 8.9 million gallons of diesel fuel at prices ranging from \$3.17 to \$4.00 per gallon through December 2014. All of these fixed price fuel agreements qualify and are accounted for using the "normal purchase" exception under ASC 815, Derivatives and Hedging, as physical deliveries will occur rather than net settlements, and therefore the fuel purchases under these contracts have been and will be expensed as incurred and included within operating expenses.

Contractual Obligations

During the nine months ended May 2, 2015, the Company entered into the Term Loan Agreement. The total initial borrowings under the Term Loan Agreement were \$150.0 million. The Company is required to make \$2.5 million principal payments quarterly. The Term Loan Agreement will terminate on the earlier of (a) August 14, 2022 and (b) the date that is ninety days prior to the termination of our amended and restated revolving credit facility, as amended. Refer to Note 7 "Long-Term Debt" included in "Item 1. Notes to Condensed Consolidated Financial Statements" and "Liquidity and Capital Resources" above for further information regarding the Term Loan Agreement including the manner in which interest on borrowings under the Term Loan Agreement is calculated.

Proceeds from the Term Loan Agreement were used to pay down borrowings on our amended and restated revolving credit facility.

Except as noted above, there have been no material changes to our contractual obligations and commercial commitments during the nine months ended May 2, 2015 from those disclosed in our Annual Report on Form 10-K for the year ended August 2, 2014.

Seasonality

While we have historically seen an increase in our inventory during the first quarter of our fiscal year, generally, we do not experience any material seasonality. However, our sales and operating results may vary significantly from quarter to quarter due to factors such as changes in our operating expenses, management's ability to execute our operating and growth strategies, personnel changes, demand for natural products, supply shortages and general economic conditions.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our exposure to market risk results primarily from fluctuations in interest rates on our borrowings and price increases in diesel fuel. As more fully described in Note 5 to the condensed consolidated financial statements, during the second quarter of fiscal 2015 we entered into a forward starting interest rate swap agreement to fix our effective interest rate for a portion of the borrowings under our term loan. In addition, from time to time we have used fixed price purchase contracts to lock the pricing on a portion of our expected diesel fuel usage. Other than noted, there have been no material changes to our exposure to market risks from those disclosed in our Annual Report on Form 10-K for the year ended August 2, 2014.

Item 4. Controls and Procedures

In the first half of fiscal year 2015, management identified immaterial errors related to the understatement of contractual obligations due to a customer that occurred during fiscal years 2009 through 2014. The immaterial errors were a result of a lack of effective controls over the completeness and accuracy of the recognition and measurement of amounts due to a customer, including the underlying data and assumptions used in the calculation of amounts owed. The internal controls in place during this time were not responsive to changes in circumstances.

While the control deficiency did not result in a material misstatement to the Company's consolidated financial statements for any periods through and including the fiscal year ended August 2, 2014, or unaudited condensed consolidated financial statements for the first and second quarters of fiscal year 2015, it did represent a material weakness as of August 2, 2014, since there existed a reasonable possibility that a material misstatement of the Company's annual or interim financial statements would not be prevented or detected on a timely basis. The correction of these immaterial errors were recognized as out-of-period adjustments to the interim financial information as of and for the period ended January 31, 2015.

Evaluation of Disclosure Controls and Procedures.

The Company's Chief Executive Officer and its Chief Financial Officer evaluated the effectiveness of the Company's disclosure controls and procedures (as that term is defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of May 2, 2015. Our Chief Executive Officer and Chief Financial Officer concluded that, as a result of the material weakness in internal control over financial reporting described above, our disclosure controls and procedures were not effective as of May 2, 2015.

For purposes of Rule 13a-15(e), the term disclosure controls and procedures means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer's management, including its chief executive and chief financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Remediation and plans for remediation

The Company believes it has made significant progress toward remediation of the underlying causes of the material weakness. Following the identification of the foregoing material weakness in the first half of fiscal 2015, management implemented a remediation plan. Management believes that the implementation of this plan will remediate the material weakness described above.

The following steps of the remediation plan were completed as of May 2, 2015:

- implementation of management's review and analysis of the calculation including the cross-functional confirmation of the accuracy and completeness of the underlying data and assumptions; and
- implementation of the review and analysis on a quarterly basis.

Because the implementation of our remediation plan was ongoing as of May 2, 2015 and because there was insufficient time as of May 2, 2015 to demonstrate that the new controls implemented as part of the remediation plan were operating effectively as of that date, management concluded that the material weakness described above still existed as of May 2, 2015.

The Company and its Board of Directors are committed to maintaining a strong internal control environment, and believe that these remediation efforts represent significant improvements in our control environment. The identified material weakness in internal control will not be considered fully addressed until the internal controls over these areas have been in operation for a sufficient period of time for our management to conclude that the material weakness has been fully remediated. The Company will continue to work on implementing and testing the new controls in order to make this final determination.

Changes in Internal Controls Over Financial Reporting

No change in our internal control over financial reporting (as such term is defined in Exchange Act Rule 13a-15(f) or 15d-15(f)) occurred during the fiscal quarter ended May 2, 2015 that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

As discussed above, subsequent to the issuance of our consolidated financial statements as of and for the fiscal year ended August 2, 2014, immaterial errors related to prior periods were identified that indicated certain deficiencies existed in the Company's internal controls over financial reporting. The Company has concluded that these deficiencies when aggregated could have resulted in a material misstatement of the consolidated financial statements that would not have been prevented or detected on a timely basis, and as such, these control deficiencies result in a material weakness in our internal control over financial reporting. This material weakness did not result in any material misstatement of the Company's financial statements and disclosures for the fiscal years ended July 28, 2012, August 3, 2013 and August 2, 2014. As discussed above, we are taking actions to remediate the material weakness related to our internal controls over the calculations of the contractual obligations owing to a customer pursuant to the Company's distribution agreement with the customer, including new controls around the preparation and review of the calculation of amounts due to the customer. The identified material weakness in internal control over financial reporting will not be considered fully addressed until the internal controls over these areas have been in operation for a sufficient period of time for our management to conclude that the material weakness has been fully remediated. The Company will continue to work on implementing and testing the new controls in order to make this final determination.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

From time to time we are involved in routine litigation that arises in the ordinary course of our business. In the opinion of management, the outcome of pending litigation is not expected to have a material adverse effect on our results of operations or financial condition.

Item 1A. Risk Factors

Except as set forth in our Quarterly Report on Form 10-Q for the quarter ended January 31, 2015, there have been no material changes to our risk factors contained in Part I, Item 1A, "Risk Factors," of our Annual Report on Form 10-K for the fiscal year ended August 2, 2014.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

None.

Item 6. Exhibits
