MERCANTILE BANKSHARES CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

The consolidated financial statements, which include the accounts of Mercantile Bankshares Corporation (Bankshares) and all of its affiliates, are prepared in conformity with accounting principles generally accepted in the United States of America and follow general practice within the banking industry. In the opinion of management, the consolidated financial statements include all adjustments necessary for a fair presentation of the results for the interim period. These adjustments are of a normal recurring nature and include adjustments to eliminate all significant intercompany transactions. In view of the changing conditions in the national economy, the effect of actions taken by regulatory authorities and normal seasonal factors, the results for the interim period are not necessarily indicative of annual performance. For comparability, certain prior period amounts have been reclassified to conform with current period presentation.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and contingent assets and liabilities at the date of the financial statements, and the disclosure of revenues and expenses during the reporting period. These estimates and assumptions are based on information available as of the date of the financial statements and could differ from actual results.

2. Earnings Per Share

Basic earnings per share (EPS) is computed by dividing income available to common shareholders by weighted average common shares outstanding. Diluted EPS is computed using the same components as in basic EPS with the denominator adjusted for the dilutive effect of stock options and restricted stock awards. The following tables provide a reconciliation between the computation of basic EPS and diluted EPS for the nine months and quarters ended September 30, 2002 and 2001:

For the 9 Months Ended September 30,

	2002			2001		
	Net Income	Weighted Average Common Shares	EPS	Net Income	Weighted Average Common Shares	EPS
<i>(In thousands, except per share data)</i>

4. Impaired Loans

A loan is considered impaired, based on current information and events, if it is probable that Bankshares will not collect all principal and interest payments according to the contractual terms of the loan agreement. Generally, a loan is considered impaired once either principal or interest payments become 90 days past due at the end of a calendar quarter. A loan may be considered impaired sooner if, in management's judgment, such action is warranted. The impairment of a loan is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate, or the fair value of the collateral if the repayment is expected to be provided predominantly by the underlying collateral. A majority of Bankshares' impaired loans are measured by reference to the fair value of the collateral. Accrued interest on impaired loans is reversed and is recognized on the cash basis. Information with respect to impaired loans and the related valuation allowance (if the measure of the impaired loan is less than the recorded investment) at September 30 and June 30, 2002 and at the end of December 2001, is shown below. See Form 10-K for more details.

<i>(Dollars in thousands)</i>	September 30, 2002	June 30, 2002	December 31, 2001

Quarter-to-date average recorded investment in impaired loans during the period	\$	48,829	\$	54,777	\$	37,827
		<u> </u>		<u> </u>		<u> </u>

Note: Impaired loans do not include large groups of smaller balance homogeneous loans that are evaluated collectively for impairment (e.g., residential mortgages and consumer installment loans). The allowance for loan losses related to these loans is included in the allowance for loan losses applicable to other than impaired loans.

5. Commitments

Various commitments to extend credit (lines of credit) are made in the normal course of banking business. Total unused lines of credit approximated \$2,888,425,000, \$3,055,291,000 and \$2,803,080,000 at September 30, 2002, December 31, 2001 and

Mercantile Bankshares Corporation

September 30, 2001, respectively. In addition, letters of credit are issued for the benefit of customers by affiliated banks. Outstanding letters of credit were \$232,921,000 at September 30, 2002, \$197,546,000 at December 31, 2001 and \$194,510,000 at September 30, 2001.

6. Intangible Assets

The following table discloses the gross carrying amount and accumulated amortization of intangible assets subject to amortization at September 30, 2002 and December 31, 2001:

<i>(Dollars in thousands)</i>	September 30, 2002			December 31, 2001

The aggregate amortization expense was \$1,561,000 for the nine months ended September 30, 2002 and \$2,082,000 for the year ended December 31, 2001. The estimated aggregate amortization expense for each of the next five years is: 2003 \$1,716,000; 2004 \$1,463,000; 2005 \$1,463,000; 2006 \$1,463,000; 2007 \$1,261,000.

7. Comprehensive Income

The following table summarizes the related tax effect of unrealized gains (losses) on securities available-for-sale for the nine months ended September 30, 2002 and 2001. The net amount is included in accumulated other comprehensive income (loss) in the Statement of Changes in Consolidated Shareholders' Equity on Page 5.

8. Capital Adequacy

Bankshares and its bank affiliates are subject to various regulatory capital requirements administered by the federal and state banking agencies. These requirements include maintaining certain capital ratios above minimum levels. These capital ratios include Tier I capital and Total risk-based capital as percents of net risk-weighted assets and Tier I capital as a percent of adjusted average total assets (leverage ratio). The minimum ratios for capital adequacy purposes are 4.00%, 8.00% and 4.00%, for the Tier I capital, Total capital and leverage ratios, respectively.

Edgar Filing: MERCANTILE BANKSHARES CORP - Form 10-Q

To be categorized as *well capitalized*, a bank must maintain minimum ratios of 6.00%, 10.00% and 5.00%, for its Tier I capital, Total capital and leverage ratios, respectively. Management believes that, as of September 30, 2002, Bankshares and its bank affiliates exceeded all capital adequacy requirements to which they are subject.

Mercantile Bankshares Corporation

Capital ratios and the amounts used to calculate them are presented in the following table for Bankshares and Mercantile Safe Deposit & Trust Company (MSD&T), the lead bank, as of September 30, 2002 and December 31, 2001.

9. Segment Reporting

Operating segments are defined as components of an enterprise about which separate financial information is available that management relies on for decision making and performance assessment. Bankshares has three reportable segments its nineteen Community Banks, the Banking Division of Mercantile Safe Deposit & Trust Company (MSD&T) and the Trust Division of MSD&T.

The following tables present selected segment information for the nine months ended September 30, 2002 and 2001. The components in the Other column consist of amounts for the nonbank affiliates and intercompany eliminations. Certain expense amounts such as operations overhead have been reclassified from internal financial reporting in order to provide for full cost absorption. These reclassifications are shown in the Adjustments line. The amounts reported reflect the merger of The Sparks State Bank into MSD&T.

10. Derivative Instruments and Hedging Activities

Bankshares maintains an overall interest rate risk management strategy that incorporates the use of derivative instruments to minimize significant unplanned fluctuations in earnings that are caused by interest rate volatility. Derivative instruments that are used as part of the interest rate risk management strategy have been restricted to interest rate swaps. Interest rate swaps generally involve the exchange of fixed-rate and variable-rate interest payments between two parties, based on a common notional principal amount and maturity date. Bankshares has entered into interest rate swaps to convert fixed-rate loans made to borrowers to floating-rate loans and convert its nonprepayable fixed-rate debt to floating-rate debt.

The fair value of derivative instruments was \$13,563,000 at September 30, 2002, recorded in other assets, and \$14,625,000 at December 31, 2001, recorded in accrued expenses and other liabilities. For the nine months ended September 30, 2002, Bankshares recognized a net loss of \$12,000, included in interest and fees on loans, which represented the ineffective portion of the fair-value hedge of fixed-rate loans made to borrowers. For the year ended December 31, 2001, Bankshares recognized a net loss of \$28,000. The fair-value hedge of the nonprepayable fixed-rate debt was 100% effective for the reported periods.

11. Accounting Changes

In June 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standard (SFAS) No. 141, Business Combinations and SFAS No. 142, Goodwill and Other Intangible Assets. SFAS No. 141 requires that the purchase method of accounting be used for all business combinations initiated after June 30, 2001. Additionally, it further clarifies the criteria for the initial recognition and measurement of intangible assets separate from goodwill. SFAS No. 142 is effective for fiscal years beginning after December 15, 2001 and prescribes the accounting for goodwill and intangible assets subsequent to initial recognition. The provisions of SFAS No. 142 discontinue the amortization of goodwill and intangible assets with indefinite lives. Instead, these assets will be subject to at least an annual impairment review, and more frequently if certain impairment indicators are in evidence. SFAS No. 142 also requires that reporting units be identified for the purpose of assessing potential future impairments of goodwill.

Mercantile Bankshares Corporation adopted SFAS No. 142 on January 1, 2002. In preparing for its adoption of SFAS No. 142, Bankshares determined its reporting units and the amounts of goodwill and intangible assets to be allocated to those reporting units. Bankshares is not anticipating any reclassifications between goodwill and intangible assets or any changes in the useful lives of intangible assets. Application of the nonamortization provisions of the Statement is expected to result in additional net income of \$8.4 million for the year ended December 31, 2002.

SFAS No. 142 requires that goodwill be tested annually for impairment using a two-step process. The first step, which Bankshares completed during the first half of 2002, is to identify a potential impairment. The second step, which Bankshares will complete by the end of 2002, measures the amount of the impairment loss, if any. Based on current information, Bankshares is not expecting impairment charges for goodwill to impact the 2002 financial statements.

The following table presents a reconciliation of reported net income and earnings per share to amounts adjusted to exclude goodwill amortization, net of tax:

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**MERCANTILE BANKSHARES CORPORATION****Consolidated Financial Results**

Net income for the quarter ended September 30, 2002 was \$48,615,000, a 5.5% increase from net income of \$46,079,000 for the same period in 2001. For the quarter ended September 30, 2002, diluted net income per share was \$.69, an increase of 6.2% over the \$.65 reported for the third quarter last year. As a result of newly-adopted rules under Generally Accepted Accounting Principles, amortization of goodwill has been discontinued in 2002. Had the same rules been in effect in 2001, net income would have been \$.03 per share higher for the quarter ended September 30, 2001. The higher growth in earnings per share was also attributable to a decline in adjusted weighted average shares outstanding from 70,863,000 for the quarter ended September 30, 2001, to 70,111,000 for the quarter ended September 30, 2002. The decline in shares primarily resulted from activity under the share repurchase program, which had remaining repurchase authorization for 2.4 million shares at September 30, 2002.

For the first nine months of 2002, net income was \$141,735,000, an increase of 3.4% over the \$137,061,000 reported for the comparable period in 2001. Diluted net income per share for the first three quarters of 2002 was \$2.02, a 5.2% increase over the \$1.92 reported for the same period last year. Excluding goodwill amortization, net income would have been \$2.01 for the nine months ending September 30, 2001.

The return on average assets for the third quarter of 2002 was 1.87%, as compared with 2.06% for the third quarter of 2001. The return on average tangible equity was 16.45% and the ratio of average tangible equity to average tangible assets was 11.49% for the third quarter of 2002. For the third quarter 2001, the return on average tangible equity was 17.54% and the ratio of average tangible equity to average tangible assets was 11.88%.

Net Interest Income and Net Interest Margin

Net interest income for the quarter ended September 30, 2002 increased 7.0% to \$111,914,000 from \$104,599,000 for the third quarter last year. This represented the best quarterly performance over the prior year since the first quarter 2001, when the Federal Reserve began lowering short-term interest rates. The current quarter reflected a 1.3% growth over the \$110,425,000 reported for the prior quarter this year. The growth in net interest income was attributable to the growth in average earning assets, particularly investment securities. Average earning assets grew to \$9,789,103,000, a 10.8% increase over the previous year's \$8,837,624,000 quarterly average. The net interest margin at 4.60% for the third quarter 2002 was 17 basis points lower than the same quarter last year and 14 basis points lower than the prior quarter this year. The net interest margin was adversely affected by deposit growth that significantly exceeded loan demand. The excess was employed in lower yielding federal funds sold, which increased approximately \$160,000,000 from the prior quarter, accounting for 10 of the 14 basis point decline in the net interest margin.

Net interest income for the first nine months of 2002 increased to \$329,527,000 or 5.1% over the \$313,477,000 for the same period last year. The growth in net interest income was attributable to a 9.7% growth in average earning assets, partially offset by a 22 basis point decline in the net interest margin from 4.90% to 4.68%. See the Analysis of Interest Rates and Interest Differentials on pages 17 and 18 and Rate/Volume Analysis on page 19 for further details.

Interest income for the quarter decreased \$13,007,000 or 8.1% to \$148,037,000. For the first nine months of 2002, interest income decreased \$56,837,000 or 11.4% to \$441,122,000. On a tax-equivalent basis, interest income for the first nine months

of 2002 decreased \$57,113,000. This decline is attributable to the Federal Reserve's 475 basis point reduction in short-term interest rates last year. Reflective of the Federal Reserve's actions, the tax-equivalent yield on the loan portfolio declined 120 basis points from 7.83% last year to 6.63% in the current quarter and 153 basis points from 8.29% to 6.76% for the first three quarters of 2001 and 2002, respectively. Similarly, the tax-equivalent yield on the investment portfolio declined 75 basis points to 4.76% from 5.51% in the third quarter last year and 88 basis points from 5.78% to 4.90% for the first three quarters 2001 and 2002, respectively. The increase in interest income related to changes in volume is primarily attributable to the investment portfolio, which grew over the prior year by 32.8% and 35.1% for the quarter and nine months, respectively. In contrast, average loans grew by 3.9% and 3.3% for the three and nine months ended September 30, 2002 compared to the same periods last year.

Interest expense for the quarter ended September 30, 2002 decreased \$20,322,000 or 36.0% to \$36,123,000. For the first nine months of 2002, interest expense decreased \$72,887,000 or 39.5% to \$111,595,000. Although interest rates have generally stabilized since the fourth quarter 2001, the repricing upon maturity of longer duration certificates of deposit has continued to reduce interest expense. The average rate paid on time deposits \$100,000 and over during the third quarter 2002 was 3.10%, a decline of 222 basis points from the prior year. For the nine month period, the average rate paid declined 244 basis points to 3.31%. Other time deposits, primarily consumer certificates of deposit, declined 188 basis points and 193 basis points to an average rate paid of 3.39% and 3.65% for the three and nine months ended September 30, 2002, as compared to the same periods last year. Overall, the average rate paid on interest-bearing deposits declined 153 basis points and 171 basis points for the three and nine months ended September 30, 2002 when compared to the prior year. The average rate paid on short-term borrowings declined 168 basis points for the three months ended and 253 basis points for the nine months ended September 30, 2002, respectively. The increase in interest expense due to increased volume for both the quarter and nine months is attributable to the growth in long-term debt, short-term borrowings, savings and money market deposits. Average money market balances increased 32.6% compared to the third quarter 2001, and 30.8% for the nine month period. Comparing this quarter of 2002 with 2001, checking plus interest and savings account balances grew 13.8% and 15.2%, respectively, and the growth was 12.5% and 12.2% for the comparable nine month period.

Noninterest income decreased 6.2% to \$35,386,000 for the third quarter 2002 versus the comparable period in 2001. Included in noninterest income was a \$203,000 loss in third quarter 2002 and a \$1,596,000 gain in third quarter 2001 from the sale of investment securities. Excluding the securities gains and losses realized in the third quarter of 2002 and 2001, noninterest income declined 1.5%. Investment and wealth management revenues remained relatively unchanged for the quarter ended September 30, 2002. Mortgage banking revenues decreased 25.8% to \$2,306,000 due to lower volumes in commercial mortgage loan originations and outsourcing of the retail origination business. This quarter also reflects earnings of \$378,000 from the bank-owned life insurance program (BOLI) initiated through two \$25,000,000 investments in July and August. The other income component of noninterest income for the third quarter of 2002 reflects write-downs of investments in third-party private equity funds of \$1,456,000. See the Analysis of Financial Condition section for additional commentary. For the

Mercantile Bankshares Corporation

first nine months, excluding investment securities gains, noninterest income increased \$2,109,000, or 2.0%. Increased commercial checking and account analysis fees and the BOLI income account for the increase.

Noninterest expenses for the quarter ended September 30, 2002, increased 3.1% to \$68,637,000 from \$66,587,000 for the third quarter of 2001. Excluding goodwill amortization, noninterest expenses were \$64,453,000 for the third quarter of 2001. Excluding goodwill amortization, noninterest expenses for the third quarter 2002 increased by 6.5% over the third quarter 2001. Excluding \$1,700,000 in severance expenses related to investment and wealth management reorganization, recorded in the second quarter of 2002, noninterest expenses this quarter increased \$2,407,000 compared to the prior quarter. Other expenses provided the largest increase and included increases in professional fees, charitable contribution expense, and merchant card processing fees. Retiree medical insurance premiums also increased from last quarter. The principal contributor to the year over year increase in expenses was a \$1.3 million or 18.4% increase in employee benefits, primarily due to increases in pension expense and medical costs related to retiree insurance premiums. Net occupancy expense increased \$519,000 or 13.9% to \$4,245,000 for the current quarter from the quarter ending September 2001 due to growth in rent and utility costs. Other noninterest expense increases are a result of higher professional fees and a charitable contribution of appreciated equity securities with a cost of \$177,000. The gifting of these securities lowered the effective tax rate for the quarter.

Noninterest expenses for the first nine months of 2002 increased \$15,040,000, or 8.0%, after excluding the amortization of goodwill in 2001. The increase in expenses was attributable in part, to salaries and benefits related to severance expenses for the investment and wealth management reorganization, as discussed in the previous quarter. Also impacting this period was increased incentive compensation expenses and increased stock compensation related to stock options and restricted stock awards. The prior year's credit was due to directors' deferred compensation, which fluctuates based on the market price of Mercantile's stock. Additionally, the increase in occupancy expense is a function of increases in rental payments, repair and maintenance expenses associated with improvements at some branch locations and insurance costs. Mercantile continued to expand its internal use of its headquarters building causing a reduction in outside tenants in that building.

The efficiency ratio, a key measure of expense management, was 46.10% for year to date 2002 versus 44.49% for the comparable period in 2001.

Mercantile Bankshares Corporation

Analysis of Financial Condition

At September 30, 2002, total assets increased 11.8% to \$10,582,874,000 compared to \$9,468,004,000 one year earlier. Compared to the year ended December 31, 2001 at \$9,928,786,000, total assets increased 6.6%. Investment securities increased 28.0% to \$2,464,395,000 compared to \$1,925,284,000 at September 30, 2001. Total loans increased 4.4% to \$7,200,790,000 at September 30, 2002, compared to \$6,900,139,000 at September 30, 2001. The mix of the loan portfolio is relatively consistent, except for the expected decline in leases in the portfolio from 2.3% of outstandings at September 2001 to 2.2% at December 2001 to 1.7% currently.

Included in other assets is the investment in third-party equity investments of \$5,205,000 at September 30, 2002. The total commitment to these investments is \$23,000,000, of which \$9,605,000 has been advanced. These investments are carried at the lower of cost or fair value. Also included in other assets this quarter is the BOLI at cash surrender value of \$50,378,000 funded in July and August of this quarter. The BOLI investment was made to partially fund increasing costs of employee benefits.

Total deposits at September 30, 2002, were \$8,045,497,000 an increase of 11.0% from \$7,247,724,000 at the end of the third quarter 2001, and an 8.0% increase from the end of last year. Interest-bearing deposits were \$6,004,976,000, an increase of 10.0% from September 30, 2001, and a 7.9% increase from the end of 2001. Interest-bearing deposits were 74.6% of total deposits at September 30, 2002, which represented a decrease from the 75.3% at September 30, 2001 and remained relatively unchanged from 74.7% at the end of last year. Noninterest-bearing deposits increased as a percentage of total deposits. Noninterest-bearing deposits were 24.7% of deposits at September 2001, 25.3% at the end of 2001 and 25.4% for the current quarter. Noninterest-bearing deposits increased 14.0% to \$2,040,521,000 as of September 30, 2002, compared to \$1,789,489,000 at September 30, 2001, and increased 8.3% compared to \$1,883,878,000 at December 31, 2001.

Shareholders' equity at September 30, 2002, was \$1,330,421,000, an increase of 8.7% from \$1,224,144,000 at September 30, 2001 and an increase of 8.1% from \$1,230,206,000 at December 31, 2001. The Corporation, having repurchased 504,500 shares year to date, still has prior authorizations enabling it to repurchase up to 2.4 million shares. Asset Quality

Nonperforming Assets

Nonperforming assets consist of nonaccrual loans, renegotiated loans and other real estate owned (i.e., real estate acquired in foreclosure or in lieu of foreclosure). With respect to nonaccrual loans, Bankshares' policy is that, regardless of the value of the underlying collateral and/or guarantees, no interest is accrued on the entire balance once either principal or interest payments on any loan become 90 days past due at the end of a calendar quarter. All accrued and uncollected interest on such loans is eliminated from the income statement and is recognized only as collected. A loan may be put on nonaccrual status sooner than this standard if, in management's judgement, such action is warranted.

During the three months ended September 30, 2002, nonperforming assets declined \$5,701,000 to \$39,640,000. Nonperforming loans, one of the components of nonperforming assets, decreased \$5,761,000 while other real estate owned, the other component increased \$60,000. The decrease in nonperforming loans is a result of successful efforts in collection and sale of collateral. Nonperforming assets as a percent of period-end loans and other real estate owned was .55% at September 30, 2002, .64% at June 30, 2002 and .50% at September 30, 2001, respectively. The current decline resulted from actions taken to address credit quality issues, particularly in the leasing business. The leasing company's portfolio accounted for \$8,114,000 or 20.5% of nonperforming loans at September 30, 2002, as compared to 2.3% of the outstanding portfolio of loans and leases. At June 30, 2002, nonperforming assets in the leasing portfolio were \$10,073,000 or 22.2% of nonperforming loans. As a result of credit quality concerns about the leasing portfolio, management previously announced it was narrowing the focus of the leasing business and discontinuing certain activities. These concerns are reflected in the increased allocation to leasing of the allowance for loan losses, reflected in the 2001 Form 10-K. Excluding the leasing portfolio, nonperforming loans are .44% of period-end loans.

Mercantile Bankshares Corporation

The level of monitored loans, or loans with characteristics suggesting that they could be classified as nonperforming in the near future, also improved during the quarter. At September 30, 2002, monitored loans were \$1,940,000 compared to \$7,885,000 at June 30, 2002. One monitored loan of \$3,861,000 at June 2002, was moved to nonaccrual/impaired status at September 30, 2002 and a valuation reserve of \$2,894,000 was established.

The level of impaired loans improved during the quarter. Impaired loans are also given nonaccrual or nonperforming status. Impaired loans at September 30, 2002 reflected a net decrease of \$17,407,000 to \$36,935,000, from \$54,342,000 at December 31, 2001. This is largely the result of gross charge-offs of \$18,673,000 this year. At December 31, 2001, 88.3% of the total impaired loans had a valuation allowance, while 47.3% did at June 30, 2002. At September 30, 2002 the percentage has declined to 39.7%. The decline in the ratio at December 31, 2001 to September 30, 2002 was also due to charge-offs. The decline in the portion of loans with a valuation allowance in this quarter is a result of a charge-off taken and a sale of collateral. The loan involved was previously shown as impaired with a valuation allowance and the current balance is now less than the collateral proceeds to be received. Therefore, while the remaining portion of this loan is still nonaccrual and included in impaired, there is no valuation allowance assigned.

The table below presents a comparison of nonperforming assets at September 30 and June 30, 2002 and at the end of December 2001.

(1) Aggregate gross interest income of \$2,681,000, \$2,285,000 and \$3,737,000 for the first nine months of 2002, the first six months of 2002 and the year 2001, respectively, on nonaccrual and renegotiated loans, would have been recorded if these loans had been accruing on their original terms throughout the period or since origination if held for part of the period. The amount of interest income on the nonaccrual and renegotiated loans that was recorded totalled \$536,000, \$458,000 and \$1,593,000 for the first nine months of 2002, the first six months of 2002 and the year 2001, respectively.

Note: The Corporation was monitoring loans estimated to aggregate \$1,940,000 at September 30, 2002, \$7,885,000 at June 30, 2002 and \$15,940,000 at December 31, 2001, not classified as nonaccrual or renegotiated loans. These loans had characteristics which indicated they might result in such classification in the future.

Allowance and Provision for Loan Losses

Each Bankshares affiliate is required to maintain an allowance for loan losses adequate to absorb losses inherent in the loan portfolio. Management at each affiliate, along with Bankshares management, maintains a regular overview to assure that adequacy. On a periodic basis, significant credit exposures, nonperforming loans, impaired loans, historical losses by loan type and various statistical measurements of asset quality are examined to assure the adequacy of the allowance for loan losses.

Edgar Filing: MERCANTILE BANKSHARES CORP - Form 10-Q

The allowance for loan losses has been established through provisions for loan losses charged against income. The provision for loan losses for the third quarter of 2002 was \$3,244,000, a 4.6% increase over \$3,101,000 for the same period last year and 36.6% less than last quarter. The provision for the first nine months of 2002 was \$11,443,000, an increase of 24.0% over

Mercantile Bankshares Corporation

last year's provision of \$9,230,000. Loans deemed uncollectible are charged against the allowance for loan losses and any subsequent recoveries are credited to the allowance. Intensive collection efforts continue after charge-off in order to maximize recovery amounts. Charge-offs were lower in this quarter than the prior year and prior quarter. However, on a year to date basis, charge-offs increased over the prior year. There were no charge-offs related to the leasing business this quarter, but 43.5% of the charge-offs in 2002 were related to the leasing business. Net charge-offs were \$2,051,000 for the third quarter of 2002 compared to \$5,703,000 for the same period in 2001. Net charge-offs for the first three quarters of 2002 were \$16,319,000 compared to \$6,839,000 last year. The allowance for loan losses as a percent of period-end loans was 1.90% at September 30, 2002 and 2.04% at the end of the third quarter last year.

The following table presents a summary of the activity in the Allowance for Loan Losses for the nine months and quarters ended September 30, 2002 and 2001:
