**Schedule XIV Notes to Financial Statements**

Instructions:

The space below is provided for important notes regarding the financial statements or any account thereof. Furnish particulars as to any significant contingent assets or liabilities existing at the end of the year. Notes relating to financial statements shown elsewhere in this report may be indicated here by reference.

**Note 1 Summary of Significant Accounting Policies****A.****Organization of the Company**

LG&E Energy Services Inc. (the Company or SERVCO) is a wholly-owned subsidiary of LG&E Energy Corp. (LEC), registered under the Public Utility Holding Company Act of 1935 (PUHCA). The Company was authorized to conduct business as a service company for LEC and its various subsidiaries by order of the Securities and Exchange Commission (SEC) dated December 6, 2000, and commenced operations January 1, 2001. On July 1, 2002, E.ON AG (E.ON) completed its acquisition of Powergen plc, now Powergen Limited, which includes LEC for approximately £5.1 billion (\$7.3 billion). Following the acquisition, E.ON became a registered holding company under PUHCA and LEC continued to be subject to the additional regulation under PUHCA.

## Edgar Filing: E ON AG - Form U-13-60

The Company is organized along functional lines to accomplish its purpose of providing management, administrative, and technical services. These services are priced so that the Company operates on a break-even basis.

The Company maintains its accounts in accordance with PUHCA, as administered by the SEC, and has adopted a system of accounts consistent with that prescribed by the Federal Energy Regulatory Commission. The accounting policies of the Company conform to U.S. generally accepted accounting principles (GAAP).

### B.

#### Cash and Cash Equivalents

The Company considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents. Temporary cash investments are carried at cost, which approximates fair value.

### C.

#### Income Taxes

The Company accounts for income taxes pursuant to Statement of Financial Accounting Standards No. 109 "Accounting For Income Taxes" (FAS 109). This standard requires that deferred income taxes be recorded for all temporary differences between the financial statement and tax basis of assets, liabilities and loss carryforwards. Deferred tax balances are based on enacted tax laws at tax rates that are expected to be in effect when the temporary differences reverse. Through December 31, 2002, the Company was part of the Powergen US Investments Corp. consolidated Federal income tax return which includes LEC and all other eligible U.S. subsidiaries.

### D.

#### Management's Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported assets and liabilities and disclosure of contingent items at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

18

---

### E.

#### Fair Value of Financial Instruments

The carrying amounts of financial instruments on the Company's books are a reasonable estimate of their fair value.

#### Note 2 Common Stock

The Company is authorized to issue 100 shares of common stock at a par value of one dollar (\$1.00) per share. LEC holds all of the Company's common stock. At December 31, 2002 there were 100 shares outstanding.

#### Note 3 Related Party Transactions

The Company has transactions in the normal course of business with other LEC subsidiaries. These transactions are primarily composed of services received or rendered. Intercompany receivables were approximately \$88,058,418 at December 31, 2002. Intercompany payables totaled approximately \$22,300,033 at December 31, 2002.

19

Daniel K. Arbough	Treasurer

#### METHODS OF ALLOCATION

**Information Systems Chargeback Rates** Rates for services, including but not limited to software, consulting, mainframe and personal computer services, are based on the costs of labor, materials and information services overheads related to the provision of each service. Such rates are applied based on the specific equipment employed and the measured usage of services by Client entities. These rates will be determined annually based on actual experience and may be adjusted for any known and reasonably quantifiable events, or at such time as may be required due to significant changes.

49

**Number of Customers Ratio** A ratio based on the number of retail electric and/or gas customers. This ratio will be determined annually based on the actual number of customers at the end of the previous calendar year and may be adjusted for any known and reasonably quantifiable events, or at such time as may be required due to significant changes. In some cases, the ratio may be calculated based on the type of customer class being served (i.e. Residential, Commercial or Industrial).

**Number of Employees Ratio** A ratio based on the number of employees benefiting from the performance of a service. This ratio will be determined annually based on actual counts of applicable employees at the end of the previous calendar year and may be adjusted for any known and reasonably quantifiable events, or at such time as may be required due to significant changes. In some cases, a two-step assignment methodology is utilized to properly allocate SERVCO employee costs to the proper legal entity.

**Departmental Charge Ratio** A specific SERVCO department ratio based upon various factors such as labor hours, labor dollars, departmental or Client entity headcount, etc. The departmental charge ratio typically applies to indirectly attributable costs (defined in Section V, Cost Apportionment Methodology) such as departmental administrative, support, and/or material and supply costs that benefit more than one affiliate and that require allocation using general measures of cost causation. Methods for assignment are department-specific depending on the type of product or service being performed and are documented and monitored by the PUHCA Compliance Manager on a monthly basis to ensure consistent and proper application and periodic true-up, where necessary, for SERVCO billing purposes.

**Electric Peak Load Ratio** Based on the sum of the monthly electric maximum system demands for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company and the denominator of which is for all operating companies. This ratio will be determined annually, or at such time as may be required due to a significant change.

## Edgar Filing: E ON AG - Form U-13-60

**Revenue Ratio** Based on the sum of the revenue at the end of each month for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. This ratio will be determined annually, or at such time as may be required due to significant changes.

**Payroll Ratio** Based on the sum of the payroll at the end of each month for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. This ratio will be determined annually, or at such time as may be required due to significant changes.

**Total Assets Ratio** Based on the total assets at year end for the preceding year, the numerator of which is for an operating company or affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. This ratio will be determined annually, or at such time as may be required due to significant changes. In the event of joint ownership of a specific asset, asset ownership percentages will be utilized to assign costs.

**Contract Ratio** Based on the sum of the physical amount (i.e. tons of coal, cubic feet of natural gas) of the contract for both coal and natural gas at the end of each month for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. This ratio will be determined annually, or at such time as may be required due to significant changes.

**Shareholder Ratio** Based on the average number of preferred shareholders at the end of each month for the immediately preceding twelve consecutive calendar months, the numerator of which is

50

---

for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. This ratio will be determined on an annual basis, or at such time as may be required due to significant changes.

**Number of Meters Ratio** Ratio based on the number or types of meters being utilized by all levels of customer classes within the system for the immediately preceding twelve consecutive calendar months. The numerator is equal to the number of meters for a specific Client entity and the denominator is equal to such expenditures for all applicable client entities. This ratio will be determined annually, or at such time as may be required due to significant change.

**Number of Transactions Ratio** Based on the sum of transactions occurring in the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected would affiliate company and the denominator of which is for all operating companies and affected affiliate companies. This ratio will be determined on a monthly basis, or at such time as may be required due to significant changes. For example, services with regard to Procurement and Major Contracts define a transaction as the number of contracts negotiated. Services pertaining to Materials Logistics would define the transaction as the number of items ordered, picked and disbursed out of the warehouse. Services pertaining to Accounts Payable would define the transaction as the number of invoices processed. Similar to the Departmental Charge Ratio, defined previously, the PUHCA Compliance Manager is responsible for maintaining and monitoring specific product/service methodology documentation and periodic true-up requirements for actual transactions related to SERVCO billings.

**Retail Revenue Ratio** Based on utility revenues, excluding energy marketing revenues, for the immediate preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affiliate and the denominator of which is for all operating companies and affected affiliate companies. This ratio will be determined annually, or at such time as may be required due to a significant change.

**Energy Marketing Ratio** Based on the absolute value of equivalent megawatt hours purchased or sold for the immediate preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affiliate and the denominator of which is for all operating companies and affected affiliate companies. This ratio will be determined annually, or at such time as may be required due to a significant change.

**Regulatory Mandate Ratios** Based on Federal or state mandated percentage allocations based on regulatory proceedings and requirements. These ratios are typically developed in concert with regulatory authorities representing the results of merger or joint asset ownership negotiations and are supported by specific contracts regarding legal entity allocation requirements. Contract terms and periodic updates, if necessary, are maintained and monitored by the PUHCA Compliance Manager and SERVCO departmental management.

# Edgar Filing: E ON AG - Form U-13-60

**Project Ratio** Based on the total costs for any departmental or affiliate project at the end of each month for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. This ratio will be determined on a monthly basis, or at such time as may be required due to significant changes.

**Transportation Resource Management System Chargeback Rate** Rates for use of transportation equipment are based on the costs associated with providing and operating transportation fleet for all affiliated companies including developing fleet policy, administering regulatory compliance programs, managing repair and maintenance of vehicles and procuring vehicles. Such rates are applied based on the specific equipment employment and the measured usage of services by Client entities. These rates

will be determined annually based on actual experience and may be adjusted for any known and reasonably quantifiable events, or at such time as may be required due to significant changes.

**Non-Fuel Material and Services Expenditures** A ratio based on non-fuel material and services expenditures, net of reimbursements, for the immediately preceding twelve consecutive calendar months. The numerator is equal to such expenditures for a specific Client entity and/or line-of-business as appropriate and the denominator is equal to such expenditures for all applicable Client entities. This ratio will be determined annually, or at such time as may be required due to a significant change.

### Annual Statement of Compensation for Use of Capital Billed

Not Applicable

### Signature Clause

Pursuant to the requirements of the Public Utility Holding Company Act of 1935 and the rules and regulations of the Securities and Exchange Commission issued thereunder, the undersigned company has duly caused this report to be signed on its behalf by the undersigned officer thereunto duly authorized.

### Supplemental Service Transactions among the E.ON System and LG&E Energy Group

Instructions:

As stated in the merger order.

## Edgar Filing: E ON AG - Form U-13-60

Services rendered by members of the E.ON Group or the Powergen Group companies included the assessment of environmental control options for coal-fired plants, key design of replacement boiler pressure components for coal plant, specialist analysis of combustion turbine component failures, plant modeling and operational impact assessment of flue gas desulphurization retrofits on coal plant, analysis and resolution of plant operational, performance, availability and reliability issues for coal plant and combustion turbines, plant maintenance strategy development for coal boilers and combustion turbines, specialist non destructive evaluation of coal boiler condition, and training in assessing and preventing boiler tube failures at the LG&E Energy Group Plant facilities. In addition, several E.ON/Powergen employees are assigned to work in the US for the LG&E Energy Group. These salaries and expenses of the ex-patriot employees are reimbursed to E.ON/Powergen. Individual job descriptions are listed below.

Services rendered by individual LG&E Energy Group companies were mainly labor and general expenses of individuals doing specialized work for the E.ON/Powergen system companies. This work included regulatory filings, engineering policy, Information Technology Integration and Investment/Shareholder expenses. Also, several employees were assigned to work in UK at Powergen and in Germany at E.ON. Those salaries and expenses were reimbursed by Powergen and E.ON. Several items were expenses of Powergen and E.ON and were paid by the LG&E Energy Group companies, with reimbursement from Powergen and E.ON. Descriptions are on each line item below.
