VALMONT INDUSTRIES, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except per share amounts)

(Unaudited)

1. Summary of Significant Accounting Policies*Condensed Consolidated Financial Statements*

The Condensed Consolidated Balance Sheet as of June 30, 2012, the Condensed Consolidated Statements of Earnings and Comprehensive Income for the thirteen and twenty-six week periods ended June 30, 2012 and June 25, 2011, and the Condensed Consolidated Statements of Cash Flows and Shareholders' Equity for the twenty-six week periods then ended have been prepared by the Company, without audit. In the opinion of management, all necessary adjustments (which include normal recurring adjustments) have been made to present fairly the financial statements as of June 30, 2012 and for all periods presented.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. These Condensed Consolidated Financial Statements should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2011. The accounting policies and methods of computation followed in these interim financial statements are the same as those followed in the financial statements for the year ended December 31, 2011. The results of operations for the period ended June 30, 2012 are not necessarily indicative of the operating results for the full year.

Inventories

Approximately 39% and 40% of inventory is valued at the lower of cost, determined on the last-in, first-out (LIFO) method, or market as of June 30, 2012 and December 31, 2011, respectively. All other inventory is valued at the lower of cost, determined on the first-in, first-out (FIFO) method or market. Finished goods and manufactured goods inventories include the costs of acquired raw materials and related factory labor and overhead charges required to convert raw materials to manufactured and finished goods. The excess of replacement cost of inventories over the LIFO value is approximately \$48,562 and \$49,536 at June 30, 2012 and December 31, 2011, respectively.

Inventories consisted of the following:

	June 30, 2012	December 31, 2011
Raw materials and purchased parts	\$ 220,974	\$ 202,953
Work-in-process	39,356	28,053
Finished goods and manufactured goods	229,528	212,312
Subtotal	489,858	443,318
Less: LIFO reserve	48,562	49,536
	\$ 441,296	\$ 393,782

VALMONT INDUSTRIES, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Dollars in thousands, except per share amounts)

(Unaudited)

1. Summary of Significant Accounting Policies (Continued)*Income Taxes*

Earnings before income taxes and equity in earnings of nonconsolidated subsidiaries for the thirteen and twenty-six weeks ended June 30, 2012 and June 25, 2011, were as follows:

	Thirteen Weeks Ended		Twenty-six Weeks Ended	
	2012	2011	2012	2011
United States	\$ 68,132	\$ 36,203	\$ 130,827	\$ 62,320
Foreign	21,732	24,138	37,703	37,228
	\$ 89,864	\$ 60,341	\$ 168,530	\$ 99,548

Stock Plans

The Company maintains stock-based compensation plans approved by the shareholders, which provide that the Human Resource Committee of the Board of Directors may grant incentive stock options, nonqualified stock options, stock appreciation rights, non-vested stock awards and bonuses of common stock. At June 30, 2012, 623,496 shares of common stock remained available for issuance under the plans. Shares and options issued and available are subject to changes in capitalization.

Under the plans, the exercise price of each option equals the closing market price at the date of the grant. Options vest beginning on the first anniversary of the grant in equal amounts over three to six years or on the fifth anniversary of the grant.

Expiration of grants is from six to ten years from the date of grant. The Company's compensation expense (included in selling, general and administrative expenses) and associated income tax benefits related to stock options for the thirteen and twenty-six weeks ended June 30, 2012 and June 25, 2011, respectively, were as follows:

	Thirteen Weeks	Thirteen Weeks	Twenty-six Weeks	Twenty-six Weeks
	Ended	Ended	Ended	Ended
	June 30, 2012	June 25, 2011	June 30, 2012	June 25, 2011
Compensation expense	\$ 1,245	\$ 1,215	\$ 2,490	\$ 2,467
Income tax benefits	479	468	959	950

Fair Value

The Company applies the provisions of Accounting Standards Codification 820, *Fair Value Measurements* ("ASC 820") which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The provisions of ASC 820 apply to other accounting pronouncements that require or permit fair value measurements. As defined in ASC 820, fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Table of Contents

VALMONT INDUSTRIES, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Dollars in thousands, except per share amounts)

(Unaudited)

1. Summary of Significant Accounting Policies (Continued)

ASC 820 establishes a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. Financial assets and liabilities carried at fair value will be classified and disclosed in one of the following three categories:

Level 1: Quoted market prices in active markets for identical assets or liabilities.

Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data.

Level 3: Unobservable inputs that are not corroborated by market data.

The categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

Following is a description of the valuation methodologies used for assets and liabilities measured at fair value.

Trading Securities: The assets and liabilities recorded for the investments held in the Valmont Deferred Compensation Plan represent mutual funds, invested in debt and equity securities, classified as trading securities in accordance with Accounting Standards Codification 320, *Accounting for Certain Investments in Debt and Equity Securities*, considering the employee's ability to change investment allocation of their deferred compensation at any time. Quoted market prices are available for these securities in an active market and therefore categorized as a Level 1 input.

	Carrying Value June 30, 2012	Fair Value Measurement Using:		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Trading Securities	\$ 21,342	\$ 21,342	\$	\$

	Carrying Value December 31, 2011	Fair Value Measurement Using:		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Trading Securities	\$ 19,152	\$ 19,152	\$	\$

Comprehensive Income

Comprehensive income includes net income, currency translation adjustments, certain derivative-related activity and changes in net actuarial gains/losses from a pension plan. Results of operations for foreign subsidiaries are translated using the average exchange rates during the period. Assets and

VALMONT INDUSTRIES, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Dollars in thousands, except per share amounts)

(Unaudited)

2. Goodwill and Intangible Assets (Continued)

Amortization expense for intangible assets for the thirteen and twenty-six weeks ended June 30, 2012 and June 25, 2011, respectively was as follows:

	Thirteen Weeks Ended June 30, 2012	Thirteen Weeks Ended June 25, 2011	Twenty-six Weeks Ended June 30, 2012	Twenty-six Weeks Ended June 25, 2011
	\$ 3,624	\$ 3,664	\$ 7,169	\$ 7,196

Estimated annual amortization expense related to finite-lived intangible assets is as follows:

	Estimated Amortization Expense
2012	\$ 14,185
2013	13,170
2014	12,748
2015	11,865
2016	11,310

The useful lives assigned to finite-lived intangible assets included consideration of factors such as the Company's past and expected experience related to customer retention rates, the remaining legal or contractual life of the underlying arrangement that resulted in the recognition of the intangible asset and the Company's expected use of the intangible asset.

Non-amortized intangible assets

Intangible assets with indefinite lives are not amortized. The carrying values of trade names at June 30, 2012 and December 31, 2011 were as follows:

	June 30, 2012	December 31, 2011	Year Acquired
Webforge	\$ 16,864	\$ 16,659	2010
Newmark	11,111	11,111	2004
Ingal EPS/Ingal Civil Products	8,901	8,792	2010
Donhad	6,715	6,633	2010
PiRod	1,750	1,750	2001
Industrial Galvanizers	3,904	3,856	2010
Other	7,141	7,224	
	\$ 56,386	\$ 56,025	

In its determination of these intangible assets as indefinite-lived, the Company considered such factors as its expected future use of the intangible asset, legal, regulatory, technological and competitive factors that may impact the useful life or value of the intangible asset and the expected costs to maintain the value of the intangible asset. The Company expects that these intangible assets will maintain their value indefinitely. Accordingly, these assets are not amortized.

(Dollars in thousands, except per share amounts)

(Unaudited)

2. Goodwill and Intangible Assets (Continued)

The Company's trade names were tested for impairment in the third quarter of 2011. The values of the trade names were determined using the relief-from-royalty method. The Company determined that the value of its trade names were not impaired, except for the PiRod and Industrial Galvanizers of America trade names. The evaluations of these trade names were completed in the fourth quarter of 2011, which resulted in a write down of \$3,779.

Goodwill

The carrying amount of goodwill by segment as of June 30, 2012 and December 31, 2011 was as follows:

	Engineered Infrastructure Products Segment	Utility Support Structures Segment	Coatings Segment	Irrigation Segment	Other	Total
Balance December 31, 2011	\$ 151,558	\$ 77,141	\$ 64,820	\$ 2,576	\$ 18,567	\$ 314,662
Foreign currency translation	(618)		(932)	(71)	(264)	(1,885)
Balance June 30, 2012	\$ 150,940	\$ 77,141	\$ 63,888	\$ 2,505	\$ 18,303	\$ 312,777

The Company's goodwill was tested for impairment during the third quarter of 2011. As a result of that testing, the Company determined that its goodwill was not impaired. The valuation of reporting units exceeded their respective carrying values by a substantial margin, except the Webforge reporting unit in the Engineered Infrastructures Products segment, which has goodwill of \$64,500 and an excess of fair value over carrying value of \$3.1 million. The Company continues to monitor changes in the global economy that could impact future operating results of its reporting units. If such conditions arise, the Company will test a given reporting unit for impairment prior to the annual test.

3. Cash Flow Supplementary Information

The Company considers all highly liquid temporary cash investments purchased with an original maturity of three months or less at the time of purchase to be cash equivalents. Cash payments for interest and income taxes (net of refunds) for the twenty-six weeks ended June 30, 2012 and June 25, 2011 were as follows:

	2012	2011
Interest	\$ 15,494	\$ 17,409
Income taxes	73,105	18,639

4. Earnings Per Share

The following table provides a reconciliation between Basic and Diluted earnings per share (EPS):

	Basic EPS	Dilutive Effect of Stock Options	Diluted EPS
Thirteen weeks ended June 30, 2012:			
Net earnings attributable to Valmont Industries, Inc.	\$ 59,980	\$	\$ 59,980
Shares outstanding	26,467	291	26,758
Per share amount	\$ 2.27	\$ (0.03)	\$ 2.24
Thirteen weeks ended June 25, 2011:			
Net earnings attributable to Valmont Industries, Inc.	\$ 45,827	\$	\$ 45,827
Shares outstanding	26,333	252	26,585
Per share amount	\$ 1.74	\$ (0.02)	\$ 1.72
Twenty-six weeks ended June 30, 2012:			
Net earnings attributable to Valmont Industries, Inc.	\$ 112,305	\$	\$ 112,305
Shares outstanding	26,432	286	26,718
Per share amount	\$ 4.25	\$ (0.05)	\$ 4.20
Twenty-six weeks ended June 25, 2011:			
Net earnings attributable to Valmont Industries, Inc.	\$ 71,436	\$	\$ 71,436
Shares outstanding	26,302	259	26,561
Per share amount	\$ 2.72	\$ (0.03)	\$ 2.69

At June 30, 2012, there were no outstanding stock options with exercise prices exceeding the market price of common stock. At June 25, 2011 there were 16,828 of outstanding stock options with exercise prices exceeding the market price of common stock that were excluded from the computation of diluted earnings per share for the thirteen weeks and twenty-six weeks ended June 25, 2011.

5. Business Segments

The Company aggregates its operating segments into four reportable segments. Aggregation is based on similarity of operating segments as to economic characteristics, products, production processes, types or classes of customer and the methods of distribution. Net corporate expense is net of certain service-related expenses that are allocated to business units generally on the basis of employee headcounts and sales dollars.

Reportable segments are as follows:

ENGINEERED INFRASTRUCTURE PRODUCTS: This segment consists of the manufacture of engineered metal structures and components for the global lighting and traffic, wireless communication, roadway safety and access systems applications;

UTILITY SUPPORT STRUCTURES: This segment consists of the manufacture of engineered steel and concrete structures for the global utility industry;

COATINGS: This segment consists of galvanizing, anodizing and powder coating services on a global basis; and

IRRIGATION: This segment consists of the manufacture of agricultural irrigation equipment and related parts and services for the global agricultural industry.

In addition to these four reportable segments, the Company has other businesses and activities that individually are not more than 10% of consolidated sales. These include the manufacture of forged steel grinding media for the mining industry, tubular products for industrial customers, electrolytic manganese dioxide for disposable batteries and the distribution of industrial fasteners and are reported in the "Other" category.

The accounting policies of the reportable segments are the same as those described in Note 1. The Company evaluates the performance of its business segments based upon operating income and invested capital. The Company does not allocate interest expense, non-operating income and deductions, or income taxes to its business segments.

Summary by Business

	Thirteen Weeks Ended		Twenty-six Weeks Ended	
	June 30, 2012	June 25, 2011	June 30, 2012	June 25, 2011

6. Guarantor/Non-Guarantor Financial Information

The Company has \$450,000 principal amount of senior unsecured notes outstanding at a coupon interest rate of 6.625% per annum. The notes are guaranteed, jointly, severally, fully and unconditionally by certain of the Company's current and future direct and indirect domestic and foreign subsidiaries (collectively the "Guarantors"), excluding its other current domestic and foreign subsidiaries which do not guarantee the debt (collectively referred to as the "Non-Guarantors"). All Guarantors are 100% owned by the parent company.

Consolidated financial information for the Company ("Parent"), the Guarantor subsidiaries and the Non-Guarantor subsidiaries is as follows:

**VALMONT INDUSTRIES, INC. AND SUBSIDIARIES
PART 1. FINANCIAL INFORMATION**

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's discussion and analysis contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are based on assumptions that management has made in light of experience in the industries in which the Company operates, as well as management's perceptions of historical trends, current conditions, expected future developments and other factors believed to be appropriate under the circumstances. These statements are not guarantees of performance or results. They involve risks, uncertainties (some of which are beyond the Company's control) and assumptions. Management believes that these forward-looking statements are based on reasonable assumptions. Many factors could affect the Company's actual financial results and cause them to differ materially from those anticipated in the forward-looking statements. These factors include, among other things, risk factors described from time to time in the Company's reports to the Securities and Exchange Commission, as well as future economic and market circumstances, industry conditions, company performance and financial results, operating efficiencies, availability and price of raw materials, availability and market acceptance of new products, product pricing, domestic and international competitive environments, and actions and policy changes of domestic and foreign governments.

This discussion should be read in conjunction with the financial statements and notes thereto, and the management's discussion and analysis included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2011.

Table of Contents

Overview

On a consolidated basis, the increases in net sales in the second quarter and first half of 2012, as compared with 2011, were due to the following factors:

Unit sales volumes increased approximately \$118 million and \$259 million in the second quarter and first half of fiscal 2012, respectively, as compared with 2011. In the second quarter of 2012, all reportable segments except Coatings reported higher sales, as compared with the same period in 2011. All reportable segments experienced improved net sales in the first half of 2012, as compared with 2011. The most significant sales increases were in the Irrigation and Utility Support Structures segments.

Sales prices in the aggregate for the second quarter of 2012 were comparable with 2011. On a year-to-date basis, sales prices and mix in 2012 were higher than 2011 by approximately \$7 million.

Foreign currency translation, in the aggregate, resulted in lower net sales and operating income in the second quarter and first half of 2012, as compared with 2011, of approximately \$18.0 million and \$1.7 million, respectively. On average, the U.S. dollar strengthened against most currencies in the second quarter of 2012, as compared to 2011. The most significant currencies that contributed to this movement were the euro, Australian dollar and the South African Rand. On a segment basis, the currency effects on net sales and operating income in the second quarter and first half of 2012, as compared with 2011, were as follows:

	Net Sales	Operating Income
Engineered Infrastructure Products (EIP)	\$ (7.4)	\$ (0.3)
Coatings	(1.7)	(0.2)
Irrigation	(5.3)	(0.8)
Other	(3.6)	(0.4)
Total	\$ (18.0)	\$ (1.7)

Foreign currency translation factors did not have a significant effect on first quarter 2012 sales and operating profit, as compared with the same period in 2011.

The increase in gross profit margin (gross profit as a percent of sales) in fiscal 2012, as compared with 2011, was primarily due to improved sales pricing and mix and moderating raw material costs in 2012 as compared with 2011. In general, steel prices in the first half of 2012 were comparable with the same period in 2011. Average zinc costs were somewhat lower in 2012, as compared with 2011. LIFO expense in the second quarter and first half of 2012 was \$4.9 million and \$12.8 million, respectively, lower than the same period in 2011, contributing to comparatively the higher gross profit margin in 2012, as compared with 2011.

Selling, general and administrative (SG&A) spending in the second quarter and first half of 2012, as compared with 2011, increased mainly due to the following factors:

Increased employee incentive accruals of \$0.9 million and \$4.6 million, respectively, due to improved operating results;

Increased compensation expenses of \$4.2 million and \$8.3 million, respectively, associated with increased employment levels and salary increases;

Increased commissions of \$1.1 million and \$1.4 million, respectively, related to higher sales;

Table of Contents

Deferred compensation expense of \$1.0 million incurred in the first half of 2012 associated with the increase in deferred compensation plan liabilities. The corresponding increase in deferred compensation plan assets was recorded as a decrease in "Other" expense; and,

Australia stamp duty expense of \$1.2 million incurred in the first quarter of 2012 related to the legal restructuring that was completed in fiscal 2011. This expense was non-recurring in nature.

These increases were offset to a degree by settlements related to a property insurance claim and a settlement related to a vendor dispute aggregating \$2.3 million in the second quarter of 2012. These expense decreases were considered non-recurring in nature. SG&A expense also decreased in the second quarter and first half of 2012, as compared with 2011, due to foreign exchange translation effects of \$2.5 million and \$2.2 million, respectively.

The increase in operating income on a reportable segment basis in the second quarter and first half of 2012, as compared with 2011, was due to improved operating performance in all reportable segments. The "Other" category also reported improved operating profit in the second quarter and first half of 2012, as compared with 2011.

The decrease in net interest expense in the second quarter and first half of fiscal 2012, as compared with 2011, was attributable to interest savings realized from the refinancing of our \$150 million of senior subordinated debt in June 2011 and approximately \$2.8 million of expense incurred in the second quarter of 2011 related to the refinancing of our \$150 million of senior subordinated notes. We did not have any refinancing of debt during 2012. Average borrowing levels in 2012 were comparable with 2011.

The increase in "Other" expenses in the second quarter of fiscal 2012, as compared with 2011, was mainly due to foreign exchange transaction losses associated with the strengthening of the U.S. dollar. On a year-to-date basis, increased investment gains in the assets held in our deferred compensation plan of \$1.0 million were recorded as other income. The increase in the value of these assets was offset by a corresponding increase in our deferred compensation liabilities, which was reflected as an increase in SG&A expense. Accordingly, there was no effect on net earnings from these investment gains.

Our effective income tax rate in fiscal 2012 was higher than 2011, mainly due to a higher percentage of our total pre-tax earnings realized from U.S. operations, a \$4.1 million tax benefit in 2011 related to the acquisition of the 40% of our grinding media operation that we did not own and \$1.4 million of income tax contingencies that we reversed in 2011 due to the expiring of statutes of limitation. Income tax rates in the U.S. are higher than in other countries where we operate. As our share of earnings before income taxes from U.S. operations increases, the effective income tax rate normally increases as well. Going forward, depending on our geographic mix of earnings and currently enacted income tax rates in the countries in which we operate, we expect our tax rate to approximate 34%.

Earnings attributable to noncontrolling interests was lower in 2012, as compared with 2011, mainly due to our purchase of the noncontrolling interest in our grinding media operation in June 2011. This operation was previously 40% owned by noncontrolling interests. Earnings in non-consolidated subsidiaries improved in 2012, as compared with 2011, as our 49% owned manganese materials operation experienced improved profitability.

Our cash flows used by operations were approximately \$3.5 million in 2012, as compared with \$19.9 million provided by operations in 2011. The decrease in operating cash flow, despite increased net income in 2012, resulted from increased working capital associated with higher sales levels and timing of income tax payments, as compared with 2011.

Table of Contents

Engineered Infrastructure Products (EIP) segment

The increase in net sales in the second quarter and first half of fiscal 2012 as compared with 2011 was due to improved sales volumes of approximately \$10 million and \$31 million, respectively, and \$8 million and \$11 million, respectively, of favorable pricing and sales mix changes. These increases were offset to a degree in the second quarter and first half of 2012, as compared with 2011, by unfavorable foreign exchange translation effects of approximately \$8 million. Global lighting sales were slightly lower in the second quarter fiscal 2012, as compared with 2011, mainly due to lower sales in Europe. North America lighting sales in the second quarter of 2012 were modestly higher than 2011, while sales in the first half of 2012 were approximately 10% higher than last year. The increase in sales mainly resulted from higher sales prices and favorable sales mix. The transportation market for lighting and traffic structures continues to be challenging, as the lack of long-term highway funding legislation and state budget challenges we believe are limiting roadway project activity. Sales in other market channels such as sales to lighting fixture manufacturers and commercial construction projects were stronger in 2012, as compared with 2011. In Europe, sales in the second quarter and first half of fiscal 2012 were lower than the comparable periods in 2011. We divested of our Turkish and Italian operations in late 2011, resulting in lower sales in the second quarter and first half of 2012, as compared with 2011, of \$3.9 million and \$8.4 million, respectively. Despite current economic conditions in Europe, sales in other markets (in local currency) were up modestly in the second quarter and approximately \$6.7 million in the first half of 2012, as compared with 2011. Stronger sales in France, Scandinavia and the U.K. were offset somewhat by weaker sales volumes in northern Europe.

Communication product line sales in the second quarter and first half of fiscal 2012 were improved over 2011. North America sales in the second quarter and first half of 2012 were \$5.0 million and \$11.9 million, respectively, higher in 2012, as compared with 2011. The increase in sales was attributable to improved market conditions, favorable weather conditions in 2012 and the resolution of the proposed AT&T/T-Mobile merger, which we believe slowed sales activity for structures and components in 2011. In China, sales of wireless communication structures in 2012 were comparable with 2011.

Sales in the access systems product line in 2012 were improved as compared with 2011, as industrial production investments in the mining and energy economic sectors are increasing in the Asia Pacific region.

Sales of highway safety products in the second quarter and first half of 2012 were higher as compared with 2011. Floods in parts of Australia affected infrastructure spending in the first half of 2011, as public spending priorities shifted from roadway development to supporting recovery from the floods. The improvement in 2012 reflects a more normal demand pattern for this product line.

Operating income for the segment in the second quarter and first half of fiscal 2012 was higher than 2011. Improved operating income resulted from higher sales volumes, improved sales prices and moderating raw material costs (including \$1.9 million and \$3.0 million, respectively, of lower LIFO expense), offset somewhat by factory operational inefficiencies of \$3.9 million and \$7.1 million, respectively. The factory operational inefficiencies related mainly to start-up costs related to capacity expansion in the U.S. and volume-related inefficiencies in Europe. The increase in SG&A spending in the second quarter and first half of 2012, as compared with 2011, mainly was attributable to higher compensation costs of \$2.7 million and \$4.1 million, respectively, and increased employee incentives of \$1.0 million and \$1.7 million, respectively. These increases were offset to a degree by currency translation effects of \$1.4 million in the second quarter and \$1.2 million in the first half of fiscal 2012, as compared with the same periods in 2011.

Table of Contents

Utility Support Structures (Utility) segment

In the Utility segment, the sales increase in the second quarter and first half of 2012, as compared with 2011, was due to improved unit sales volumes in the U.S., offset to a degree by an unfavorable sales mix in the U.S. (approximately \$15 million and \$20 million, respectively) resulting from shipments on certain large orders that were taken in 2010, when market pricing was particularly low. Sales volumes in international markets in the second quarter and first half of 2012 was slightly lower than the same periods in 2011. In U.S. markets, electrical utility companies are increasing their investment in the electrical grid, as evidenced by a very high order rate throughout 2011 and record backlogs at December 31, 2011. Sales pricing on new orders is slowly improving but continues to be very competitive. In international markets, the sales decrease was mainly due to lower sales through our European operations, offset to a degree by higher sales in the Asia Pacific region.

Operating income in fiscal 2012, as compared with 2011, increased due to the substantial increase in North America sales volume, moderating raw material costs and operational leverage. These positive effects were offset to a degree in the second quarter and first half of 2012 by \$5.8 million and \$7.1 million, respectively, of additional costs associated with production inefficiencies and unanticipated costs related to one large order. The increase in SG&A expense for the segment in fiscal 2012 as compared with 2011, was mainly due to increased employee compensation (\$0.6 million and \$1.5 million, respectively) and sales commissions on higher sales volumes (\$0.6 million and \$1.0 million, respectively) associated with the increase in business levels and operating income.

Coatings segment

Net sales in the Coatings segment decreased slightly in the second quarter of fiscal 2012, as compared with 2011, mainly due to currency translation effects. Year-to-date sales for the segment increased modestly as compared with 2011. On a regional basis, stronger sales in the United States of \$6.9 million and \$10.1 million in the second quarter and first half of 2012, respectively, were offset by lower sales volumes in Asia Pacific. In the United States, we experienced broad-based improved demand from customers, especially in the agriculture, petrochemical and energy economic sectors. Asia Pacific volumes in the second quarter of 2012 were down from 2011, due to reduced demand from some of our larger customers, due to weather-related factors and some slowness in the Australian industrial economy not related to mining. Average selling prices in the second quarter and first half of 2012 were comparable with 2011.

The increase in segment operating income in the second quarter and first half of 2012, as compared with 2011, was mainly due to improved productivity and operating leverage through volume increases and lower zinc costs. The effect of lower zinc costs on operating income for the segment was approximately \$1.2 million and \$3.6 million, respectively. SG&A expenses for the segment in the second quarter and first half of 2012, as compared with 2011, were slightly lower, due to a \$0.9 million favorable dispute settlement with a vendor.

Irrigation segment

The increase in Irrigation segment net sales in the second quarter and first half of 2012, as compared with 2011, was mainly due to improved sales volumes of approximately \$6 million and \$45 million, respectively, and favorable pricing and sales mix of approximately \$8 million and \$17 million respectively. These increases were offset by unfavorable currency translation effects of \$5 million and \$7 million in the second quarter and first half of 2012, respectively, as compared with 2011. The pricing and sales mix effect was generally due to sales price increases that took effect after the first half of 2011 to recover higher material costs in early 2011. In global markets, the sales growth was due to very strong agricultural economies around the world. Farm commodity prices continue to be favorable, with a positive outlook for net farm income in most markets around the world. We believe

Table of Contents

that farm commodity prices have been favorable due to strong demand, including consumption in the production of ethanol and other fuels, and traditionally low inventories of major farm commodities. In addition, weather conditions in North America in the first half of 2012 were generally favorable, further enhancing delivery schedules for irrigation machines and demand for related service parts. In international markets, the sales improvement in fiscal 2012, as compared with 2011, was realized in most markets, also due to generally favorable economic conditions in the global farm economy.

Operating income for the segment improved in the second quarter and first half of 2012, as compared with 2011, due to improved sales unit volumes and improved sales prices in light of stable material costs. The higher average selling prices resulted from rising material costs in 2011, when sales price increases lagged material cost inflation. The stability in raw material purchase costs also resulted in \$0.3 million and \$5.2 million in lower LIFO expenses in the second quarter and first half of 2012, respectively, as compared with 2011. The most significant reasons for the increase in SG&A expense in the second quarter and first half 2012, as compared with 2011, was related to employee compensation costs to support the increase in sales activity (\$0.3 million and \$1.8 million, respectively), offset to a degree by currency translation effects of approximately \$0.5 million and \$0.7 million, respectively.

Other

This category includes the grinding media, industrial tubing, electrolytic manganese and industrial fasteners operations. The increase in sales and operating income in the second quarter and first half of fiscal 2012, as compared with 2011, was mainly due improved sales volumes in the tubing and electrolytic manganese dioxide operations. Sales in the first half of fiscal 2012 were due to improved sales in all operations.

Net corporate expense

Net corporate expense in the second quarter of 2012 was lower than 2011, mainly due insurance settlements related to a fire and storm damage to one of our galvanizing facilities in Australia of \$1.4 million and lower expenses in the Delta Pension Plan of \$0.5 million. On a year-to-date basis, expenses are slightly higher due to higher employee incentives associated with improved net earnings and share price, which affected long-term incentive plans (approximately \$2.1 million), higher deferred compensation expenses of \$1.0 million and stamp duties incurred in Australia related to the 2011 Delta legal restructuring of \$1.2 million. These increases were offset somewhat by lower expenses related to the Delta Pension Plan of \$1.0 million and the insurance settlement that occurred in the second quarter.

Liquidity and Capital Resources

Cash Flows

Working Capital and Operating Cash Flows Net working capital was \$931.0 million at June 30, 2012, as compared with \$844.9 million at December 31, 2011. The increase in net working capital in 2012 mainly resulted from increased receivables and inventories to support the increase in sales. Cash flow used by operations was \$3.5 million in fiscal 2012, as compared with \$19.9 million provided by operations in fiscal 2011. The decrease in operating cash flow in 2012 was the result of increased net working capital associated with higher sales and higher levels of business activity, especially in the Utility Support Structures and Irrigation businesses, and and timing of income tax payments, offset to an extent by higher net earnings in fiscal 2012, as compared with 2011. Accounts receivable turns in 2012 were improved over 2011. The increase in inventory at the end of the second quarter compared with December 31, 2011 is associated mainly with the Utility Support Structures and EIP segments and is related to general business levels and seasonal factors.

Table of Contents

Investing Cash Flows Capital spending in the fiscal 2012 was \$39.2 million, as compared with \$27.9 million in 2011. The most significant capital spending projects in 2012 included capacity expansions in the Utility segment. We expect our capital spending for the 2012 fiscal year to be approximately \$100 million, compared to \$83 million for the 2011 fiscal year. The increase in expected capital spending over 2011 is mainly due to capacity increases to meet the growing need for utility structures in the U.S. and additional manufacturing investment in the Irrigation segment.

Financing Cash Flows Our total interest-bearing debt increased slightly to \$491.2 million at June 30, 2012 from \$486.1 million at December 31, 2011. Financing cash flows in 2011 included the purchase of the 40% noncontrolling interest in our grinding operation for \$25.3 million, debt issuance costs of \$1.3 million and settlement of a financial derivative of \$3.6 million associated with the senior unsecured notes issued in the second quarter of 2011.

Financing and Capital

We have historically funded our growth, capital spending and acquisitions through a combination of operating cash flows and debt financing. We have an internal long-term objective to maintain long-term debt as a percent of invested capital at or below 40%. At June 30, 2012, our long-term debt to invested capital ratio was 25.2%, as compared with 26.8% at December 31, 2011. Subject to our level of acquisition activity and steel industry operating conditions (which could affect the levels of inventory we need to fulfill customer commitments), we plan to maintain this ratio below 40% in 2012.

Our debt financing at June 30, 2012 consisted primarily of long-term debt. We also maintain certain short-term bank lines of credit totaling \$60.2 million, \$47.9 million of which was unused at June 30, 2012. Our long-term debt principally consists of:

\$450 million face value (\$463 million carrying value) of senior unsecured notes that bear interest at 6.625% per annum and are due in April 2020. We are allowed to repurchase the notes at specified prepayment premiums. These notes are guaranteed by certain of our subsidiaries.

\$280 million revolving credit agreement with a group of banks. We may increase the credit facility by up to an additional \$100 million at any time, subject to participating banks increasing the amount of their lending commitments. The interest rate on our borrowings will be, at our option, either:

- (a) LIBOR (based on a 1, 2, 3 or 6 month interest period, as selected by us) plus 125 to 200 basis points (inclusive of facility fees), depending on our ratio of debt to earnings before taxes, interest, depreciation and amortization (EBITDA), or;
- (b) the higher of

The higher of (a) the prime lending rate and (b) the Federal Funds rate plus 50 basis points plus in each case, 25 to 100 basis points (inclusive of facility fees), depending on our ratio of debt to EBITDA, or

LIBOR (based on a 1 week interest period) plus 125 to 200 basis points (inclusive of facility fees), depending on our ratio of debt to EBITDA

At June 30, 2012 and December 31, 2011, we had no outstanding borrowings under the revolving credit agreement. The revolving credit agreement has a termination date of October 16, 2013, and contains certain financial covenants that may limit our additional borrowing capability under the agreement. At June 30, 2012, we had the ability to borrow an additional \$264.9 million under this facility. We are negotiating a new revolving credit agreement and expect to have the new agreement in place during the third quarter of 2012. We anticipate the agreement will be five years in length, with similar covenants as our current agreement.

Edgar Filing: VALMONT INDUSTRIES INC - Form 10-Q

Table of Contents

These debt agreements contain covenants that require us to maintain certain coverage ratios and may limit us with respect to certain business activities, including capital expenditures. Our key debt covenants are as follows:

Interest-bearing debt is not to exceed 3.75x EBITDA of the prior four quarters;

Senior interest-bearing debt is not to exceed 2.50x EBITDA over the prior four quarters; and,

Our EBITDA over our prior four quarters must be at least 2.50x our interest expense over the same period.

At June 30, 2012, we were in compliance with all covenants related to these debt agreements. The key covenant calculations at June 30, 2012 were as follows:

Interest-bearing debt	\$ 491,214
EBITDA last 12 months	410,902
Leverage ratio	1.20
Senior Interest-bearing debt	\$ 491,214
EBITDA last 12 months	410,902
Senior debt ratio	1.20
EBITDA last 12 months	\$ 410,902
Interest expense last 12 months	32,359
Interest earned ratio	12.70

The calculation of EBITDA last 12 months (June 25, 2011 - June 30, 2012) is as follows:

Net cash flows from operations	\$ 126,219
Interest expense	32,359
Income tax expense	36,309
Deferred income tax benefit	79,221
Noncontrolling interest	(6,931)
Equity in earnings of nonconsolidated subsidiaries	9,680
Stock-based compensation	(6,380)
Pension plan expense	(4,537)
Contribution to pension plan	12,524
Changes in assets and liabilities	133,206
Other	(768)
 EBITDA	 \$ 410,902
 Net earnings attributable to Valmont Industries, Inc.	 \$ 269,177
Interest expense	32,359
Income tax expense	36,309
Depreciation and amortization expense	73,057
 EBITDA	 \$ 410,902

Our businesses are cyclical, but we have diversity in our markets, from a product, customer and a geographical standpoint. We have demonstrated the ability to effectively manage through business cycles and maintain liquidity. We have consistently generated operating cash flows in excess of our capital expenditures. Based on our available credit facilities, recent issuance of senior unsecured notes and our history of positive operational cash flows, we believe that we have adequate liquidity to meet our needs.

We have not made any provision for U.S. income taxes in our financial statements on approximately \$547 million of undistributed earnings of our foreign subsidiaries, as we intend to

Table of Contents

reinvest those earnings. Of our cash balances at June 30, 2012, approximately \$299 million is held in entities outside the United States. If we need to repatriate foreign cash balances to the United States to meet our cash needs, income taxes would be paid to the extent that those cash repatriations were undistributed earnings of our foreign subsidiaries. The income taxes that we would pay if cash were repatriated depends on the amounts to be repatriated and from which country. If all of our cash outside the United States were to be repatriated to the United States, we estimate that we would pay approximately \$27.0 million in income taxes to repatriate that cash.

Financial Obligations and Financial Commitments

There have been no material changes to our financial obligations and financial commitments as described on page 39 in our Form 10-K for the fiscal year ended December 31, 2011.

Off Balance Sheet Arrangements

There have been no changes in our off balance sheet arrangements as described on page 39 in our Form 10-K for the fiscal year ended December 31, 2011.

Critical Accounting Policies

There have been no changes in our critical accounting policies as described on pages 41-44 in our Form 10-K for the fiscal year ended December 31, 2011 during the quarter ended June 30, 2012.

Item 3. Quantitative and Qualitative Disclosure about Market Risk

There were no material changes in the company's market risk during the quarter ended June 30, 2012. For additional information, refer to the section "Risk Management" on page 40 in our Form 10-K for the fiscal year ended December 31, 2011.

Item 4. Controls and Procedures

The Company carried out an evaluation under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Securities Exchange Act Rule 13a-15. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures are effective to provide reasonable assurance that information required to be disclosed by the Company in the reports the Company files or submits under the Securities Exchange Act of 1934 is (1) accumulated and communicated to management, including the Company's Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosures and (2) recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms.

No changes in the Company's internal control over financial reporting occurred during the quarter covered by this report that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents**PART II. OTHER INFORMATION****Item 2. Unregistered Sales of Equity Securities and Use of Proceeds****Issuer Purchases of Equity Securities**

Period	(a) Total Number of Shares Purchased	(b) Average Price paid per share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
April 1, 2012 to April 28, 2012	50,132	\$ 124.94		
April 29, 2012 to June 2, 2012	420	120.40		
June 3, 2012 to June 30, 2012				
Total	50,552	\$ 124.90		

During the second quarter, the only shares reflected above were those delivered to the Company by employees as part of stock option exercises, either to cover the purchase price of the option or the related taxes payable by the employee as part of the option exercise. The price paid per share was the market price at the date of exercise.
