NOTE CONCERNING FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K, including the Management's Discussion and Analysis of Financial Condition and Results of Operations, contains statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including statements relating to trends in operations and financial results and the business and the products of the Registrant and its subsidiaries, as well as other statements including words such as "anticipate," "believe," "plan," "estimate," "expect," "intend" and other similar expressions. Forward-looking statements are made based upon management's current expectations and beliefs concerning future developments and their potential effects on us. Such forward-looking statements are not guarantees of future performance.

Actual results may differ materially from those included in the forward-looking statements as a result of risks and uncertainties. Those risks and uncertainties include, but are not limited to, the risk factors listed in Item 1A. "Risk Factors."

Table of Contents

PART I

Item 1. Business

Principal Financial Group, Inc. ("PFG") is a leader in global investment management offering businesses, individuals and institutional clients a wide range of financial products and services, including retirement, asset management and insurance through our diverse family of financial services companies. We had \$591.6 billion in assets under management ("AUM") and approximately 22.1 million customers worldwide as of December 31, 2016.

Our global asset management businesses serve a broad range of investors in 76 countries through offices in 19 countries, including in the major financial centers worldwide. We provide long-term investment strategies to institutional, retirement, high net worth and retail clients by offering a range of capabilities including equity, fixed income, real estate and other alternative investments, as well as fund offerings.

In the U.S., we primarily focus on small and medium-sized businesses, which we define as companies with fewer than 1,000 employees, by offering a broad array of retirement and employee benefit solutions and individual insurance solutions to meet the needs of the business owner and their employees. We are a leading provider of corporate defined contribution plans. We are also a leading employee stock ownership plan consultant. In addition, we are a leading provider of nonqualified plans, defined benefit plans and plan termination annuities. We are also one of the largest providers of specialty benefits insurance product solutions. We believe small and medium-sized businesses are an underserved market, offering attractive growth opportunities in the retirement and employee benefit markets.

Additionally, we believe we have a significant opportunity to leverage our U.S. retirement expertise in select international markets that have adopted or are moving toward private sector defined contribution pension systems. Our international asset management and accumulation businesses focus on the opportunities created as aging populations around the world drive increased demand for retirement accumulation, retirement asset management and retirement income management solutions.

Our Reportable Segments

We organize our businesses into the following reportable segments:

Retirement and Income Solutions;

Principal Global Investors;

Principal International and

U.S. Insurance Solutions.

We also have a Corporate segment, which consists of the assets and activities that have not been allocated to any other segment.

See Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 16, Segment Information" for financial results of our segments.

Retirement and Income Solutions Segment

Our asset accumulation activities in the U.S. date back to the 1940s when we first began providing pension plan products and services. We now offer a comprehensive portfolio of products and services for retirement savings and retirement income:

To businesses of all sizes with a concentration on small and medium-sized businesses, we offer products and services for defined contribution plans, including 401(k) and 403(b) plans, defined benefit pension plans, nonqualified executive benefit plans, employee stock ownership plan ("ESOP") services and full service payout services. For more basic retirement services, we offer SIMPLE Individual Retirement Accounts ("IRA") and payroll deduction plans;

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

To large institutional clients, we also offer investment only products, including investment only guaranteed investment contracts ("GICs"); and

To employees of businesses and other individuals, we offer the ability to accumulate savings for retirement and other purposes through mutual funds, individual annuities and bank products.

We organize our Retirement and Income Solutions operations into two business groupings:

Retirement and Income Solutions Fee: includes full service accumulation, trust services and individual variable annuities;
and

Retirement and Income Solutions Spread: includes individual fixed annuities, investment only, full service payout and
banking services.

Table of Contents

Retirement and Income Solutions Fee

Full Service Accumulation

We offer a wide variety of investment and administrative products and services for defined contribution plans, including 401(k) and 403(b) plans; defined benefit pension plans; nonqualified executive benefit plans and ESOPs. A 403(b) plan is a plan described in Section 403(b) of the Internal Revenue Code that provides retirement benefits for employees of tax-exempt organizations and public schools.

Products

Full service accumulation products respond to the needs of plan sponsors seeking both administrative and investment services for defined contribution plans or defined benefit plans. The investment component of both the defined contribution and defined benefit plans may be in the form of a guaranteed account, separate account, a mutual fund offering or a collective investment trust. In addition, defined contribution plan sponsors may also offer their own employer securities as an investment option under the plan.

We deliver both administrative and investment services to our defined contribution plan and defined benefit plan customers through annuity contracts, collective investment trusts and mutual funds. Group annuity contracts and collective investment trusts used to fund qualified plans are not required to be registered with the United States Securities and Exchange Commission ("SEC"). Our mutual fund service platform is called Principal Advantage. It is a qualified plan service package based on our series mutual fund, Principal Funds, Inc. ("PFI"). We offer investments covering the full range of stable value, equity, fixed income, real estate and international investment options managed by our Principal Global Investors segment as well as third party asset managers. In addition, full service accumulation offers plan sponsors trust services through an affiliated trust company.

As of December 31, 2016, we provided full service accumulation products to (a) over 35,900 defined contribution plans, of which over 30,900 were 401(k) plans, including \$134.3 billion in assets and covering 4.6 million eligible plan participants, and (b) to over 2,100 defined benefit plans, including \$19.3 billion in assets and covering over 306,400 eligible plan participants. As of December 31, 2016, approximately 56% of our full service accumulation account values were managed by our Principal Global Investors segment. Third party asset managers provide asset management services with respect to the remaining assets. As it relates to our full service accumulation account values, 28% were managed entirely by the third party asset managers that were not under contract to sub-advise a PFG product, 9% were sub-advised and 7% represented employer securities.

Markets and Distribution

We offer our full service accumulation products and services to plans, including qualified and nonqualified defined contribution plans and defined benefit plans. Our primary target market is plans sponsored by small and medium-sized businesses, which we believe remains under-penetrated. According to Retirement Resources, Inc., in 2015, only 24% of businesses with between 10 and 49 employees, 51% of businesses with between 50 and 99 employees, 61% of businesses with between 100 and 249 employees and 73% of businesses with between 250 and 499 employees offered a 401(k) plan. The same study indicates that 81% of employers with between 500 and 999 employees, 95% of employers with between 1,000 and 4,999 employees and 95% of employers with 5,000 or more employees offered a 401(k) plan in 2015.

We distribute our full service accumulation products and services nationally, primarily through a captive retirement services sales force. As of December 31, 2016, 108 retirement services sales representatives in 41 offices, operating as a wholesale distribution network, maintained relationships with over 16,000 independent advisors, consultants and agents. Retirement services sales representatives are an integral part of the sales process alongside the referring consultant or independent advisor. We compensate retirement services sales representatives through a blend of salary and production-based incentives, while we pay independent advisors, consultants and agents a commission or fee.

As of December 31, 2016, we had a separate staff of over 260 service and education specialists located in the sales offices. These specialists play a key role in the ongoing servicing of plans by providing local services to our customers, such as reviewing plan performance, investment options and plan design; communicating the customers' needs and feedback to us and helping employees understand the benefits of their plans. The following summarizes our distribution channels:

We distribute our annuity-based products through intermediaries who are primarily state licensed individuals.

Principal Advantage platform is targeted at defined contribution plans through broker-dealer distribution channels. Principal Advantage gives us access to Financial Industry Regulatory Authority-registered distributors who are not traditional sellers

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

of annuity-based products and broadens opportunities for us in the investment advisor and broker-dealer distribution channels.

Through our Retire Secure strategy we provide financial education and other assistance to individual investors who are participants/members of employer-based accumulation solutions to help them achieve financial security.

We believe our approach to full service accumulation plan services distribution, which gives us a local sales and service presence, differentiates us from many of our competitors. We have also established a number of marketing and distribution relationships to increase the sales of our products and services.

Table of Contents**Individual Variable Annuities**

We offer variable annuities to individuals and plans. Individual variable annuities are savings vehicles through which the customer makes one or more deposits of varying amounts and intervals.

Products

Our individual variable deferred annuities provide customers with the flexibility to allocate their deposits to mutual funds managed by the Principal Global Investors segment or unaffiliated third party asset managers. As of December 31, 2016, 92% of our \$9.4 billion in variable annuity account balances was allocated to mutual funds managed by the Principal Global Investors segment and our guaranteed option. The remaining 8% was allocated to mutual funds managed by unaffiliated third party asset managers. Generally speaking, the customers bear the investment risk for the variable options and have the right to allocate their assets among various separate mutual funds. The value of the annuity fluctuates in accordance with the experience of the mutual funds chosen by the customer. Customers have the option to allocate all or a portion of their account to our guaranteed option, in which case we credit interest at rates we determine, subject to contractual minimums.

Customers may elect a living benefit guarantee (commonly known in the industry as a guaranteed minimum withdrawal benefit, or "GMWB"). We bear the GMWB investment risk. Our goal is to hedge the GMWB investment risk through the use of sophisticated risk management techniques. As of December 31, 2016, \$6.3 billion of the \$9.0 billion of variable annuity separate account values had the GMWB rider. Our major source of revenue from variable annuities is mortality and expense fees we charge to the customer, generally determined as a percentage of the market value of the assets held in a separate investment sub-account. Account balances of variable annuity contracts with the GMWB rider were invested in separate account investment options as follows:

	December 31, 2016	December 31, 2015
	<i>(in millions)</i>	
Balanced funds	\$ 5,898.2	\$ 5,403.1
Equity funds	258.6	292.7
Bond funds	138.5	163.0
Money market funds	3.8	6.3
Specialty funds	1.2	1.4
Total	\$ 6,300.3	\$ 5,866.5
Percent of total variable annuity separate account values	70%	68%

Markets and Distribution

Our target markets for individual variable annuities include owners, executives and employees of small and medium-sized businesses and individuals seeking to accumulate and/or eventually receive distributions of assets for retirement. We market variable annuities to individuals for both qualified and nonqualified retirement savings.

We sell our individual variable annuity products through our affiliated financial representatives, who accounted for 96%, 95% and 93% of annuity sales for the years ended December 31, 2016, 2015 and 2014, respectively. The remaining sales were made through banks, brokerage general agencies, mutual fund companies, Principal Connection and unaffiliated broker-dealer firms. Principal Connection is our direct response distribution channel for retail financial services products to individuals. Principal Connection's services are available over the phone, on the internet or by mail. Affiliated financial representatives continued to be the primary distribution channel of our variable deferred annuities.

Retirement and Income Solutions Spread**Individual Fixed Annuities**

Individual fixed annuities may be categorized in two ways: (1) deferred, in which case assets accumulate until the contract is surrendered, the customer dies or the customer begins receiving benefits under an annuity payout option, or (2) payout, in which case payments are made for

a fixed period of time or for life.

Products

Fixed Deferred Annuities. Our individual fixed deferred annuities consist of both single premium deferred annuity contracts and flexible premium deferred annuity contracts ("FPDAs"). Some FPDA contracts limit the period of time deposits are allowed (e.g., only one year). For certain contracts, the principal amount is guaranteed. We credit the customer's account with a fixed interest rate for a specified number of years. Thereafter, we reset the interest rate credited to the contract based upon our discretion, subject to contractual minimums, by taking into account market and other conditions. We also offer a fixed deferred annuity where the interest credited is linked to an external equity index, subject to maximum and minimum values. One source of income from fixed deferred annuities is the difference between the investment income earned on the underlying general account assets and the interest rate credited to the contracts. We bear the investment risk because, while we credit customers' accounts with a stated interest rate, we cannot be certain the

Table of Contents

investment income we earn on our general account assets will exceed that rate. The Principal Global Investors segment manages the assets supporting these contracts.

Fixed Income Annuities. Our individual fixed income annuities consist of single premium immediate annuity contracts ("SPIAs") and deferred income annuity contracts ("DIAs"). SPIAs and DIAs are products where the customer pays a premium in return for periodic benefit payments. SPIA payments begin immediately and DIA payments begin after a deferral period, during which a return-of-premium death benefit is included. Payments may be contingent upon the survival of one or two individuals or payments may be fixed, meaning payments are contractually guaranteed and do not depend on the continuing survival of any individual. Our major source of income from fixed immediate annuities is the difference between the investment income earned on the underlying general account assets and the interest rate implied in the calculation of annuity benefit payments. We bear the investment risk because we cannot be certain the investment income we earn on our general account assets will exceed the rate implied in the SPIA and DIA contracts. The Principal Global Investors segment manages the assets supporting these contracts.

Markets and Distribution

Our target markets for individual fixed annuities include owners, executives and employees of small and medium-sized businesses and individuals seeking to accumulate and/or eventually receive distributions of assets for retirement. We market fixed annuities to individuals for both qualified and nonqualified retirement savings.

We sell our individual fixed annuity products through our affiliated financial representatives, who accounted for 7%, 6% and 11% of annuity sales for the years ended December 31, 2016, 2015 and 2014, respectively. The remaining sales were made through banks, brokerage general agencies, mutual fund companies, Principal Connection and unaffiliated broker-dealer firms. The majority of overall annuity sales, however, were from non-affiliated distribution channels, as a result of focused efforts to increase fixed annuity sales through these channels.

Investment Only

Products

The two primary products for which we provide investment only services are: GICs and funding agreements.

GICs and funding agreements pay a specified rate of return. The rate of return can be a floating rate based on an external market index or a fixed rate. Our investment only products contain provisions disallowing or limiting early surrenders, including penalties for early surrenders and minimum notice requirements.

Deposits to investment only products are predominantly in the form of single payments. As a result, the level of new deposits can fluctuate from one fiscal quarter to another. The amounts earned by us are derived in part from the difference between the investment income earned by us and the amount credited to the customer. The Principal Global Investors segment manages the assets supporting the contractual promises.

Markets and Distribution

We issue GICs and funding agreements primarily to plan sponsors and other institutions. We also offer GICs as part of our full service accumulation products. We issue our GICs primarily to tax-qualified retirement plans. We sell our funding agreements directly to institutions that may or may not be pension funds and unconsolidated special purpose vehicles domiciled either in the U.S. or offshore for funding agreement-backed note programs. The funding agreements issued as part of these funding agreement-backed note programs work by having investors purchase debt obligations from the special purpose vehicle which, in turn, purchases the funding agreement from us with terms similar to those of the debt obligations. The strength of this market is dependent on debt capital market conditions. As a result, our sales through this channel can vary widely from one quarter to another. The special purpose vehicle issues the funding agreement-backed notes to U.S. and foreign institutional investors.

Full Service Payout

Products

Full service payout products respond primarily to the needs of pension plan sponsors in the form of single premium group annuities, which are immediate or deferred annuities that provide a current or future specific income amount, fully guaranteed by us. The majority of our business originates from defined benefit plans that are being terminated. In these situations, the plan sponsor transfers all its obligations under the plan to an insurer by paying a single premium. Generally, plan sponsors restrict their purchases to insurance companies with superior or excellent

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

financial quality ratings because the Department of Labor has mandated that annuities be purchased only from the "safest available" insurers.

Since premium received from full service payout products is generally in the form of single payments, the level of premiums can fluctuate depending on the number of large-scale annuity sales in a particular quarter. The Principal Global Investors segment manages the assets supporting full service payout account values.

Table of Contents

Markets and Distribution

Our primary distribution channel for full service payout products is comprised of several specialized home office sales consultants working through consultants and brokers that specialize in this type of business. Our sales consultants also make sales directly to institutions. Our nationally dispersed retirement services sales representatives act as a secondary distribution channel for these products.

Banking Services

IRAs are provided by Principal Bank, primarily funded by retirement savings rolled over from qualified retirement plans. Principal Bank is a federal savings bank that formed in February 1998. As of December 31, 2016, Principal Bank had nearly 348,000 customers and approximately \$2.4 billion in assets. Principal Bank operates under a limited purpose charter and may only accept deposits held in a fiduciary capacity, may not hold demand deposits or own commercial loans and cannot originate loans.

Products

The IRAs offered by Principal Bank provide Federal Deposit Insurance Corporation ("FDIC")-insured retirement solutions for its customers. The IRAs are held in savings accounts, money market accounts and certificates of deposit. The deposit products provide a relatively stable source of funding and liquidity for Principal Bank and are backed by purchases of investment securities and residential mortgage loans.

Markets and Distribution

Principal Bank offers bank products and services to participants rolling out of qualified retirement plans primarily serviced by affiliates of PFG. Principal Bank services customers through the telephone, mail and internet.

Principal Global Investors Segment

Our Principal Global Investors segment manages assets for sophisticated investors around the world, using a multi-boutique strategy that provides diverse investment capabilities including equity, fixed income, real estate and other alternative investments. We also have experience in asset allocation, stable value management and other structured investment strategies. We focus on providing services to our other segments in addition to our retail mutual fund and third party institutional clients. We maintain offices in Australia, Brazil, China, Germany, Hong Kong, Japan, the Netherlands, Singapore, Switzerland, the United Arab Emirates, the United Kingdom and the United States.

We deliver our products and services through our network of specialized investment groups and boutiques including Principal Global Equities; Principal Global Fixed Income; Aligned Investors; Principal Real Estate Investors, LLC; Principal Enterprise Capital, LLC; Spectrum Asset Management, Inc.; Post Advisory Group, LLC; Columbus Circle Investors; Edge Asset Management, Inc.; Morley Financial Services, Inc.; Macro Currency Group; Finisterre Capital LLP; Origin Asset Management LLP; and Principal Portfolio Strategies. As of December 31, 2016, Principal Global Investors and its boutiques managed \$390.5 billion in assets.

We have been providing mutual funds to customers since 1969. We offer mutual funds to individuals, businesses and institutional investors for use within variable life contracts, variable annuity contracts and employer-sponsored pension plans; as a rollover investment option and for general investment purposes. We plan to grow into a top advisor-sold mutual fund company with a sales force focused on multiple channels. As of December 31, 2016, as reported by the Strategic Insight, we are ranked 14th according to AUM (long-term funds) of the intermediary sold mutual fund companies.

We also maintain various other domestic and global fund platforms, separately managed accounts and segregated accounts for some larger institutional and retail investors.

Our products and services are provided for a fee as defined by client mandates. Our fees are generally driven by AUM.

Boutiques

Our multi-boutique strategy is diversified across the following primary asset classes and service delivery options.

Equity Investments. As of December 31, 2016, Principal Global Equities, Aligned Investors and Principal Real Estate Investors, LLC along with Columbus Circle Investors, Edge Asset Management, Inc. and Origin Asset Management LLP managed \$143.1 billion in global equity assets. Our equity capabilities encompass large-cap stocks, mid-cap stocks, small-cap stocks and real estate investment trusts in

developed and emerging markets worldwide.

Fixed Income Investments. As of December 31, 2016, Principal Global Fixed Income and Principal Real Estate Investors, LLC along with Spectrum Asset Management, Inc.; Post Advisory Group, LLC; Edge Asset Management, Inc. and Morley Financial Services, Inc. managed \$184.3 billion in global fixed income assets. Collectively, our experience in fixed income management spans multiple economic and credit market cycles and encompasses all major fixed income sectors, including commercial mortgage-backed securities ("CMBS"), and security types. Our research and risk

Table of Contents

management capabilities in worldwide debt markets provide a strong foundation for broadly diversified "multi-sector" portfolios, tailored to specific client objectives.

Alternative Investments. We offer products and services through other alternative asset classes including managing private real estate equity, commercial mortgages and bridge/mezzanine loans through Principal Real Estate Investors, LLC; managing real estate operating companies through Principal Enterprise Capital, LLC; managing currency mandates through our Macro Currency Group boutique and managing hedge fund mandates through the Finisterre Capital LLP and Columbus Circle Investors boutiques. As of December 31, 2016, we managed \$59.1 billion in alternative asset classes.

Principal Portfolio Strategies. Principal Portfolio Strategies is a specialized asset allocation boutique offering multi-asset and/or multi-manager portfolio construction services that aim to deliver reliable, risk-adjusted investment outcomes to individual investors, institutional investors and participants in employer-sponsored plans.

Products and Services

Products offered by the Principal Global Investors segment include individually managed accounts, separately managed accounts for high net worth individuals and several fund platforms for retail and institutional investors, as described below.

Principal Funds, Inc. PFI is a series mutual fund that, as of December 31, 2016, offered 84 investment options for defined contribution plans, individuals, institutional investors, adviser fee-based programs, and other retirement plan clients. We report the results for this fund in the Retirement and Income Solutions segment or Principal Global Investors segment based on the distribution channel associated with the AUM.

Principal Variable Contracts Funds, Inc. Principal Variable Contracts Funds, Inc. is a series mutual fund that provides investment options for variable annuity and variable life insurance contracts issued by the Principal Life Insurance Company ("Principal Life") and other insurance companies not affiliated with Principal Life. AUM backing our variable annuity contracts is reported in the Retirement and Income Solutions segment. AUM backing our variable life insurance contracts is reported in the U.S. Insurance Solutions segment.

Other Principal Global Investors Funds. Principal Global Investors maintains various fund platforms including Qualifying Investor Alternative Fund and Undertaking for Collective Investment in Transferable Securities funds domiciled in Dublin, Collective Investment Trusts, Business Trusts and other boutique sponsored funds. These funds are generally managed by our boutiques.

Markets and Distribution

Our products and services are distributed through various channels to reach and meet the needs of a broad investor base. We distribute our services through institutional and retail sales representatives, relationship management, and client service professionals who work with consultants and directly with investors to acquire and retain institutional clients, retail clients and other investors. We also maintain relationships with independent broker-dealers to distribute our products and services, maintaining relationships with over 61,000 independent brokers, consultants and agents. As of December 31, 2016, Principal Global Investors and its boutiques had 869 third party institutional clients in 42 countries with \$130.6 billion of AUM.

Principal International Segment

Our Principal International segment has operations in Latin America and Asia. We focus on locations with growing middle classes, favorable demographics and increasing long-term savings, ideally with defined contribution retirement markets. We entered these locations through acquisitions, start-up operations and joint ventures.

The activities of our Principal International segment reflect our efforts to accelerate the growth of our AUM by capitalizing on the international trend toward private sector defined contribution pension systems and individual long-term savings. We offer pension accumulation products and services, mutual funds, asset management, income annuities and life insurance accumulation products.

Markets, Products and Distribution

Latin America

Brazil. We offer pension accumulation and income annuity products through a co-managed joint venture, Brasilprev Seguros e Previdência S.A. ("Brasilprev"). We owned 25% of the economic interest and 50.01% of the voting shares as of December 31, 2016. The partner is Banco do Brasil ("Banco"), which had approximately 5,400 Brazilian branches as of September 30, 2016.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Brasilprev has the exclusive distribution rights of its pension accumulation and income annuity products through the Banco network until October 2032. Our joint venture provides products for the retirement needs of individuals and employers. Banco's employees sell these products directly to individual clients through its bank branches. In addition, our joint venture reaches corporate clients through two wholesale distribution channels: (1) a network of independent brokers who sell to the public and (2) Banco's corporate account executives who sell to existing and prospective corporate clients.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Table of Contents

We offer mutual fund and asset management services through Claritas Administração de Recursos Ltda. ("Claritas"), our wholly owned Brazilian mutual fund and asset management company. The company manages equity funds, balanced funds, managed accounts and other strategies for affluent clients and institutions and sells through its multi-channel distribution network.

Chile. We offer a complete array of pension accumulation and income annuity products. We also offer mutual fund, asset management services and life insurance accumulation products.

We offer mandatory employee-funded pension and voluntary savings plans through Administradora de Fondos de Pensiones Cuprum S.A. ("Cuprum"). We owned 97.97% of Cuprum as of December 31, 2016, and the rest is publicly floated. Cuprum's products are sold through a proprietary sales network of approximately 920 sales employees as of December 31, 2016.

We offer income annuity and life insurance accumulation products through Principal Compañía de Seguros de Vida Chile S.A., our wholly owned life insurance company. The annuity products are distributed through a network of brokers and independent agents. Life insurance accumulation products are also offered to individuals through brokers and financial advisors.

We offer voluntary savings plans and mutual funds through Principal Administradora General de Fondos S.A., our wholly owned mutual fund company. Products are distributed to retail clients through our proprietary sales force, financial advisors, brokerage houses and alliances with financial institutions.

We offer asset management services through Principal Asset Management Chile S.A. This wholly owned company sells its products through a proprietary sales force.

Mexico. We offer pension accumulation, mutual funds, income annuities and asset management services through our wholly owned companies.

We offer mandatory pension plans through Principal Afore, S.A. de C.V., Principal Grupo Financiero. We manage and administer individual retirement accounts under the mandatory privatized social security system for all employees in Mexico. As of December 31, 2016, we had approximately 2.8 million individual retirement accounts. We distribute products and services through a proprietary sales force of approximately 450 sales representatives as of December 31, 2016, as well as independent brokers who sell directly to individuals. In addition, we have an agreement for the exclusive distribution of Principal Afore's products through HSBC Bank's extensive network in Mexico through September 2017.

We offer mutual funds and asset management services through Principal Fondos de Inversión, S.A. de C.V., Operadora de Fondos de Inversión, Principal Grupo Financiero. We distribute products and services through a sales force of approximately 110 employees as of December 31, 2016, and through distribution agreements with other financial entities. We offer both domestic and international products, typically sold directly to clients.

We also administer previously sold income annuities and life products.

Asia

China. We offer mutual funds and asset management services to individuals and institutions through a joint venture, CCB Principal Asset Management Co., Ltd. We owned 25% and China Construction Bank ("CCB") is the majority partner with 65% ownership as of December 31, 2016. CCB provides widespread distribution support for the joint venture via its extensive network of approximately 15,000 branch outlets as of December 31, 2015, and brand awareness.

Hong Kong SAR. We offer both pension saving and mutual fund products to corporate and retail clients through wholly owned companies.

We offer two types of pension saving schemes, Mandatory Provident Fund ("MPF") and Occupational Retirement Schemes Ordinance ("ORSO"). We distribute products through a proprietary sales force that maintains relationships with third party intermediaries such as insurance companies, independent financial advisors, brokers and employee benefit consultants. In addition, we have an agreement for the exclusive distribution of pension products through AXA's extensive agency network in Hong Kong through 2030. We also target individual account holders who have changed jobs or are looking to consolidate their retirement accounts. We serviced approximately 570,000 accounts as of December 31, 2016.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

We sell mutual funds to retail customers seeking to accumulate assets for retirement and other long-term investment needs. Our mutual funds are distributed through a proprietary sales force that maintains relationships with third party intermediaries such as banks, insurance companies, independent financial advisors, securities brokers, direct-to-customer fund platforms and private wealth management firms.

India. We offer mutual funds and asset management services to both retail and corporate customers through our joint venture Principal Pnb Asset Management Company Private Limited. We owned 78.6% as of December 31, 2016, and the partner is Punjab National Bank, a large Indian commercial bank with a network of approximately 6,800 branches as of June 30, 2016. Mutual funds are sold through bank branches, proprietary sales offices, independent distributors and direct sales.

Table of Contents

We also have a proprietary distribution company, Principal Retirement Advisors Private Limited, that focuses on promoting and advising on retirement and long-term investment products in the India market.

Southeast Asia. We offer mutual funds, asset management services and pension accumulation products through our joint venture CIMB-Principal Asset Management Berhad ("CPAM"). We owned 40% in CIMB-Principal and 50% in CIMB Principal Islamic as of December 31, 2016, and the partner is CIMB Group, which has a strong presence in many Asian countries. CPAM also manages a significant amount of institutional asset mandates.

CPAM has wholly owned subsidiaries in Singapore (CIMB-Principal Asset Management (S) Pte. Ltd.), Indonesia (PT CIMB-Principal Asset Management) and Thailand (CIMB-Principal Asset Management Company Limited).

CPAM distributes conventional and Islamic mutual funds through the branches of its partner bank (approximately 1,000 bank branches throughout Malaysia, Indonesia, Thailand and Singapore) and through an agency sales force of approximately 6,000 agents selling to retail customers as of December 31, 2016. CPAM also distributes its mutual funds through third party institutions including other banks and security houses.

U.S. Insurance Solutions Segment

Our U.S. Insurance Solutions segment offers group and individual insurance solutions. We focus on providing comprehensive insurance solutions for small and medium-sized businesses and their owners and executives. We organize our operations into two divisions: Specialty Benefits Insurance and Individual Life Insurance. However, we share key resources in our core areas such as strategic leadership, distribution and marketing.

Specialty Benefits Insurance

Specialty benefits insurance, which includes group dental, vision, life and disability insurance and individual disability insurance, is an important component of the employee benefit offering at small and medium-sized businesses. We offer traditional employer sponsored and voluntary products for group dental, vision, life and disability. We also offer group dental, vision and disability on a fee-for-service basis. Our individual disability insurance is also sold on an individual or multi-life basis.

Products and Services

Group Dental and Vision Insurance. We began selling group dental and vision insurance in the late 1960s. Our plans provide partial reimbursement for dental and vision expenses. As of December 31, 2016, we had over 48,000 group dental and vision insurance policies in force covering nearly 1.3 million employee lives. According to Life Insurance and Market Research Association ("LIMRA"), we were the 7th largest group dental insurer in terms of number of contracts/employer groups in force in 2015. In addition to indemnity and preferred provider organization dental offered on both an employer paid and voluntary basis, we offer a prepaid dental plan in Arizona through our Employers Dental Services, Inc. subsidiary. We also offer a discount dental product nationally. Our indemnity vision product and our managed care vision product are offered on both an employer paid and voluntary basis.

Group Life Insurance. Group life insurance was one of our first group products beginning in the early 1940s. Our group life insurance provides coverage to employees and their dependents for a specified period. As of December 31, 2016, we had nearly 57,000 group policies providing \$140 billion of group life insurance in force to approximately 2.3 million employee lives. According to LIMRA, in 2015 we were ranked 3rd in the U.S. in terms of the number of group life insurance contracts in force. We currently sell traditional group life insurance that does not provide for accumulation of cash values on both an employer paid and voluntary basis. Our group life insurance business remains focused on the traditional, annually renewable term product. Group term life and group universal life accounted for 98% and 2%, respectively, of our total group life insurance in force as of December 31, 2016. We no longer market group universal life insurance to new employer groups.

Group Disability Insurance. Group disability insurance has also been sold since the early 1940s. Our group disability insurance provides a benefit to insured employees who become disabled. In most instances, this benefit is in the form of a monthly income. Our group disability products include both short-term and long-term disability, offered on both an employer paid and voluntary basis. As of December 31, 2016, long-term disability represented 62% of total group disability premium, while short-term disability represented 38% of total group disability premium. In addition, we provide disability management services, also called rehabilitation services, to assist individuals in returning to work as quickly as possible following disability. We also work with disability claimants to improve the approval rate of Social Security benefits, thereby reducing payment of benefits by the amount of Social Security payments received. As of December 31, 2016, we served approximately 1.8 million employee lives through more than 43,000 contracts. According to LIMRA, our group short-term disability business was ranked 5th and our group long-term disability business was ranked 4th in the U.S. as of December 31, 2015, in terms of number of contracts/employer

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

groups in force. We also offer voluntary critical illness insurance, which provides a lump-sum cash benefit to pay for additional expenses associated with the five most common critical illnesses.

Individual Disability Insurance. Individual disability insurance has been sold since the early 1950s. Our individual disability insurance products provide income protection to the insured member and/or business in the event of disability. In most instances, this benefit is in the form of a monthly income. In addition to income replacement, we offer products

Table of Contents

to pay business-related costs such as overhead expenses for a disabled business owner, buy-out costs for business owners purchasing a disabled owner's interest in the business, expenditures for replacement of a key person and business loan payments. We also offer a product to protect retirement savings in the event of disability. As of December 31, 2016, we served approximately 184,000 individual disability policyholders. According to LIMRA, our individual disability business was ranked 5th in the U.S. in terms of premium in force in the non-cancellable segment of the market and 5th overall, as of December 31, 2015.

Fee-for-Service. We offer administration of group dental, disability and vision benefits on a fee-for-service basis.

Individual Life Insurance

We began as an individual life insurer in 1879 when we began selling traditional life insurance products to individuals. We now specialize in providing solutions for small to medium-sized companies to protect against risk and loss, assist with succession planning and wealth transfer and to build and protect wealth for retirement. We also provide solutions to meet the personal needs of business owners, executives and affluent individuals. Our U.S. operations administered approximately 588,000 individual life insurance policies with over \$295 billion of individual life insurance in force as of December 31, 2016.

Products and Services

Our Business Owner and Executive Solutions platform as well as our nonqualified deferred compensation offering combines administration and consulting to service our clients' needs. We target the business and personal insurance needs of owners and executives of small and medium-sized businesses with an increasing focus on providing insurance solutions for nonqualified executive benefits. In addition, we market our products to meet traditional retail insurance needs. We offer a variety of individual life insurance products, including universal life insurance, variable universal life insurance and traditional life insurance.

Universal and Variable Universal Life Insurance. Universal and variable universal life insurance products offer the policyholder the option of adjusting both the premium and the death benefit amounts of the insurance contract. Universal life insurance typically includes a cash value account that accumulates at a credited interest rate based on the investment returns of the block of business. Variable universal life insurance is credited with the investment returns of the various investment options selected. For the year ended December 31, 2016, 61% of individual life insurance annualized first year premium sales were generated from universal and variable universal life insurance products. Universal and variable universal life insurance represented 29% of individual life insurance in force as of December 31, 2016.

After a deduction for policy level expenses, we credit net deposits to an account maintained for the policyholder. For universal life contracts, the entire account balance is invested in the general account. Interest is credited to the policyholder's account based on the earnings on general account investments, subject to contractual minimums. For variable universal life contracts, the policyholder may allocate the account balance among our general account and a variety of mutual funds underlying the contract. Interest is credited on amounts allocated to the general account in the same manner as for universal life. Net investment performance on mutual funds is allocated directly to the policyholder accounts; the policyholder bears the investment risk. Some of our universal life and variable universal life insurance contracts contain what are commonly referred to as "secondary" or "no-lapse" guarantee provisions. A no-lapse guarantee keeps the contract in force, even if the contractholder's account balance is insufficient to cover all of the contract charges, provided that the contractholder has continually paid a specified minimum premium.

Traditional Life Insurance. Traditional life insurance includes participating whole life, adjustable life products and non-participating term life insurance products. Participating products and non-participating term life insurance products represented 39% of our individual life insurance annualized first year premium sales for the year ended December 31, 2016, and 71% of individual life insurance in force as of December 31, 2016. Adjustable life insurance products provide a guaranteed benefit in return for the payment of a fixed premium and allow the policyholder to set the coverage period, premium and face amount combination. Term insurance products provide a guaranteed death benefit for a specified period of time in return for the payment of a fixed premium. Policyholder dividends are not paid on term insurance.

U.S. Insurance Solutions Markets and Distribution

For each of our products, administration and distribution channels are customized to meet customer needs and expectations for that product.

We market our group life, disability, dental and vision insurance products to small and medium-sized businesses, primarily targeting our sales toward owners and human resources professionals. We sell our group life, disability, dental and vision products in all 50 states and the District of Columbia. We continually adapt our products and pricing to meet local market conditions. We market our fee-for-service capabilities to employers that self-insure their employees' dental, disability and vision benefits. We market our fee-for-service businesses in all 50 states and the District of Columbia.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

The group insurance market continues to see a shift to voluntary/worksites products due to various pressures on employers. In keeping with this market change, which shifts the funding of such products from the employer to the employee, we continue to place an enhanced focus on our voluntary benefits platform. We believe the voluntary/worksites market presents growth opportunities and we will continue to develop strategies to capitalize on this expanding market.

Table of Contents

As of December 31, 2016, we had 130 sales representatives and 149 service representatives in 28 local markets. Our sales representatives accounted for 98% of our group insurance sales for the year ended December 31, 2016. The service representatives play a key role in servicing the case by providing local, responsive services to our customers and their brokers, such as renewing contracts, revising plans, solving administrative issues and communicating the customers' needs and feedback to us.

We sell our individual life and individual disability income products in all 50 states and the District of Columbia, primarily targeting owners and executives of small and medium-sized businesses. Small and medium-sized business sales represented 52% of individual life sales and 62% of individual disability sales for the year ended December 31, 2016. Much of our life insurance sales efforts focus on the Business Owner and Executive Solutions market. This strategy offers solutions to address business owner financial challenges such as exiting the business, business transition, retaining key employees and retirement planning. Key employees also have needs to supplement retirement income, survivor income, and business protection. We believe the Business Owner and Executive Solutions segment offers growth opportunities and we will continue to develop strategies to capitalize on this expanding market.

We distribute our individual life and individual disability insurance products through our affiliated financial representatives and independent brokers, as well as other marketing and distribution alliances. Affiliated financial representatives were responsible for 23% of individual life insurance sales based on first year annualized premium and 14% of individual disability sales for the year ended December 31, 2016. We had 1,161 affiliated financial representatives in 33 offices as of December 31, 2016. Although they are independent contractors, we have a close tie with affiliated financial representatives and we offer them benefits, training and access to tools and expertise. To meet the needs of the various marketing channels, particularly the independent brokers, we employ wholesale distributors Regional Vice Presidents for individual life and Regional Vice Presidents for individual disability. A key differentiator in the nonqualified executive benefit sale is our Regional Vice Presidents-Nonqualified Plans, who are not only wholesalers but also consultants and subject-matter experts providing point-of-sale support in closing cases.

Corporate Segment

During fourth quarter 2016, we decided to move long-term care, a business we exited and fully reinsured in 1997, from the U.S. Insurance Solutions segment to the Corporate segment to align it with the management of other exited businesses in the Corporate segment. This change has been applied retrospectively to our segment financial information but did not impact our consolidated financial statements.

Our Corporate segment manages the assets representing capital that has not been allocated to any other segment. Financial results of the Corporate segment primarily reflect our financing activities (including financing costs and preferred stock dividends), income on capital not allocated to other segments, inter-segment eliminations, income tax risks and certain income, expenses and other adjustments not allocated to the segments based on the nature of such items. Results of Principal Securities, Inc., our retail broker-dealer and registered investment advisor, and our exited group medical and long-term care insurance businesses are reported in this segment.

Competition

Competition in our segments is based on a number of factors including: scale, service, product features, price, investment performance, commission structure, distribution capacity, financial strength ratings and name recognition. We compete with a large number of financial services companies such as banks, mutual funds, broker-dealers, insurers and asset managers. Some of these companies offer a broader array of products, more competitive pricing, greater diversity of distribution sources, better brand recognition or, with respect to insurers, higher financial strength ratings. Some may also have greater financial resources with which to compete or may have better investment performance at various times. We believe we distinguish ourselves from our competitors through our:

full service platform;

strong customer relationships;

focus on investment performance and

expansive product portfolio.

Ratings

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Insurance companies are assigned financial strength ratings by rating agencies based upon factors relevant to policyholders. Financial strength ratings are generally defined as opinions as to an insurer's financial strength and ability to meet ongoing obligations to policyholders. Information about ratings provides both industry participants and insurance consumers meaningful insights on specific insurance companies. Higher ratings generally indicate financial stability and a stronger ability to pay claims.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Table of Contents

Principal Life and Principal National Life Insurance Company ("PNLIC") have been assigned the following insurer financial strength ratings:

Rating Agency	Financial Strength Rating	Rating Structure
A.M. Best Company, Inc.	A+ ("Superior") with a stable outlook	Second highest of 13 rating levels
Fitch Ratings Ltd.	AA- ("Very Strong") with a stable outlook	Fourth highest of 19 rating levels
Moody's Investors Service	A1 ("Good") with a stable outlook	Fifth highest of 21 rating levels
S&P Global	A+ ("Strong") with a stable outlook	Fifth highest of 20 rating levels

A.M. Best's ratings for insurance companies range from "A++" to "S". A.M. Best indicates that "A++" and "A+" ratings are assigned to those companies that in A.M. Best's opinion have superior ability to meet ongoing insurance obligations. Fitch's ratings for insurance companies range from "AAA" to "C". Fitch "AA" ratings indicate very strong capacity to meet policyholder and contract obligations. Moody's Investors Service ("Moody's") ratings for insurance companies range from "Aaa" to "C". Moody's indicates that "A" ratings are assigned to those companies that offer good financial security. S&P Global's ("S&P") ratings for insurance companies range from "AAA" to "NR". S&P indicates that "A" ratings are assigned to those companies that have strong financial security characteristics. In evaluating a company's financial and operating performance, these rating agencies review its profitability, leverage and liquidity, as well as its book of business, the adequacy and soundness of its reinsurance, the quality and estimated market value of its assets, the adequacy of its policy reserves, the soundness of its risk management programs, the experience and competency of its management and other factors.

A.M. Best, Moody's and Fitch have all changed their outlook on the U.S. life insurance sector to 'negative' from 'stable' in 2016. Continued low interest rates, an uncertain regulatory environment, exposure to asset management and international risks and low domestic growth are pressuring the sector.

S&P is the only rating agency to maintain a 'stable' outlook on the U.S. life insurance sector. S&P's view is that continued low interest rates will pressure insurers' bottom lines, but strong capitalization will offset the credit quality impact.

We believe our strong ratings are an important factor in marketing our products to our distributors and customers, as ratings information is broadly disseminated and generally used throughout the industry. Our ratings reflect each rating agency's opinion of our financial strength, operating performance and ability to meet our obligations to policyholders and are not evaluations directed toward the protection of investors. Such ratings are neither a rating of securities nor a recommendation to buy, hold or sell any security, including our common stock. For more information on ratings, see Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources – Financial Strength and Credit Ratings."

Regulation

Our businesses are subject to regulation and supervision by U.S. federal and state regulatory authorities as well as non-U.S. regulatory authorities for our operations outside the U.S., which can have a significant effect on our business. Our businesses are also affected by U.S. federal, state and local tax laws as well as tax laws for jurisdictions outside the U.S.

PFG, our parent holding company, is not licensed as an insurer, investment advisor, broker-dealer, bank or other regulated entity. However, because it is the holding company for all of our operations, it is subject to regulation of our regulated entities, including as an insurance holding company. We are subject to legal and regulatory requirements applicable to public companies, including public reporting and disclosure, securities trading, accounting and financial reporting and corporate governance.

U.S. Insurance Regulation

We are subject to the insurance holding company laws in the states where our insurance companies are domiciled. Principal Life and PNLIC are domiciled in Iowa and their principal insurance regulatory authority is the Insurance Division of the Department of Commerce of the State of Iowa. Our other U.S. insurance companies are principally regulated by the insurance departments of the states in which they are domiciled. These laws generally require each insurance company directly or indirectly owned by the holding company to register with the insurance department in the insurance company's state of domicile and to furnish financial and other information about the operations of the companies within the holding company system. Transactions affecting the insurers in the holding company system must be fair and at arm's length. Most states have insurance laws that require regulatory approval of a direct or indirect change in control of an insurer or an insurer's holding company and laws that require prior notification of state insurance departments of a change in control of a non-domiciliary insurance company doing business in that state.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Annually, our U.S. insurance companies must submit an opinion from a board-appointed qualified actuary to state insurance regulators, where licensed, on whether the statutory assets held backing statutory reserves are sufficient to meet contractual obligations and related expenses of the insurer. If such an opinion cannot be rendered noting the sufficiency of assets, the insurance company must set up additional statutory reserves drawing from available statutory surplus until such an opinion can be given.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Table of Contents

State insurance departments have broad administrative powers over the insurance business, including insurance company licensing and examination, agent licensing, establishment of reserve requirements and solvency standards, premium rate regulation, admittance of assets to statutory surplus, policy form approval, unfair trade and claims practices regulation and other matters. State insurance statutes also typically place restrictions and limitations on the amount of dividends or other distributions payable by insurance company subsidiaries to their parent companies. See Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources" for further details.

In order to enhance the regulation of insurer solvency, the National Association of Insurance Commissioners ("NAIC") has established risk-based capital standards. The standards require life insurers to submit a report to state regulators on an annual basis regarding their risk-based capital based upon four categories of risk: asset risk, insurance risk, interest rate risk and business risk. As of December 31, 2016, the statutory surplus of each of our U.S. life insurance companies exceeded the minimum risk-based capital requirements.

State and federal insurance and securities regulatory authorities and other state law enforcement agencies and attorneys general regularly make inquiries and conduct examinations or investigations regarding our compliance with, among other things, insurance laws and securities laws.

Each state has insurance guaranty association laws under which insurers doing business in a state can be assessed, up to prescribed limits, in order to cover contractual benefit obligations of insolvent insurance companies. The guaranty associations levy assessments on each member insurer in a jurisdiction on the basis of the proportionate share of the premiums written by such insurer in the lines of business in which the insolvent insurer is engaged. Some jurisdictions permit the member insurers to recover the assessments paid through full or partial premium tax offsets.

Securities Regulation

Insurance and investment products such as variable annuities, variable life insurance and some funding agreements that constitute securities and mutual fund products are subject to securities laws and regulations, including state securities regulation as well as federal regulation under the SEC, the Financial Industry Regulatory Authority and other regulatory authorities. These regulations affect investment advice, sales and related activities for these products.

We also have entities that are registered as investment advisers with the SEC under the Investment Advisers Act of 1940.

Employee Retirement Income Security Act

As we provide products and services for U.S. employee benefit plans, we are subject to regulation under the Employee Retirement Income Security Act ("ERISA"). ERISA provisions include reporting and disclosure requirements and standards of conduct.

Banking Regulation

Principal Bank, a wholly owned subsidiary, is a federal savings bank regulated by the Office of the Comptroller of the Currency. Principal Bank's deposits are insured by the FDIC, making the Bank subject to certain of the FDIC's regulations.

Environmental Regulation

As we own and operate real property, we are subject to federal, state and local environmental laws and could be subject to environmental liabilities and costs associated with required remediation of our properties. We routinely have environmental assessments performed for real estate being acquired or used as collateral for commercial mortgages we use for investment.

Regulation of International Businesses

Our international businesses are supervised by regulatory authorities in the jurisdictions in which they operate.

Risk Management

Like all financial services companies, we are exposed to a wide variety of financial, operational and other risks, as described in Item 1A. "Risk Factors." Effective enterprise risk management is, therefore, a key component of our business model.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Enterprise risk management helps us to manage risk to meet our customer obligations, satisfy regulatory requirements, adequately provide for contingencies in case of stress, optimize shareholder returns, support our core values and maintain our reputation.

We utilize an integrated risk management framework to help us identify, assess, monitor, report, manage and aggregate our material risks within established risk appetites and risk tolerances. The framework delivers important perspective that is used in strategic and tactical decision making and is adaptable to changes in our businesses and in the

Table of Contents

external environments in which we operate. Our approach also requires a commitment to continuous improvement and periodic validation.

Our governance structure includes Board of Directors oversight, internal risk committees, a corporate risk management function and embedded risk professionals in our business units and functional areas. Our Board of Directors, Audit Committee, Finance Committee, Human Resource Committee and Nominating and Governance Committee provide oversight no less frequently than quarterly, addressing relevant aspects of our risk profile.

Our internal risk committees meet on a regular and frequent basis to discuss various issues and review profile status. Each business unit and key functional area has its own committee that is responsible for oversight of the material risks within the unit or area. These committees may include corporate leaders. We also have internal committees that provide oversight around a certain risk or group of related risks across the organization. This matrix approach helps us maintain comprehensive risk coverage and preserve an integrated view of risks. The Enterprise Risk Management Committee, comprised of members from the executive management team, exercises enterprise-wide oversight for our most significant risk profiles.

The business units and functional areas are responsible for identifying, assessing, monitoring, reporting and managing their own risks. Chief Risk Officers embedded within each business unit or risk professionals in functional areas help align risk management practice with the strategies of the unit as well as with enterprise-wide objectives. The Corporate Chief Risk Officer and supporting staff are separate from the business units and provide objective oversight, framework enablement and aggregated risk analysis. Internal Audit provides independent assurance around effective risk management design and control execution.

Risk appetites, tolerances and limits have been established from an enterprise-wide and business unit perspective for specific risk categories, where appropriate. We monitor a variety of risk metrics on an ongoing basis and take the appropriate steps to manage our established risk appetites and tolerances. Quarterly risk reporting provides a feedback loop between business units, functional areas, our internal risk committees and the corporate risk management function. This reporting also includes perspectives on emerging risk. To the extent potentially significant business activities or operational initiatives are considered, analysis of the possible impact on our risk profile takes place. This analysis includes, but is not limited to, the capital implications; the impact on near term and long-term earnings; the ability to meet our targets with respect to return on equity, liquidity, debt/capital, cash coverage, business risk and operational risk; and the impact to our reputation.

Employees

As of December 31, 2016, we had 14,854 employees. None of our employees are subject to collective bargaining agreements except a group of employees within our Cuprum organization in Chile. We believe that our employee relations are satisfactory.

Internet Website

Our internet website can be found at www.principal.com. We make available free of charge, on or through our internet website, access to our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 as soon as reasonably practicable after such material is filed with or furnished to the SEC. Also available free of charge on our internet website is our code of business conduct and ethics, corporate governance guidelines and charters for the Audit, Finance, Human Resources and Nominating and Governance committees of our Board of Directors. Also see Item 10. "Directors, Executive Officers and Corporate Governance."

Item 1A. Risk Factors

This section provides an overview of the risks that may impact our performance in the future.

Risks relating to economic conditions, market conditions and investments

Adverse capital and credit market conditions may significantly affect our ability to meet liquidity needs, as well as our access to capital and cost of capital.

Our results of operations, financial condition, cash flows and statutory capital position could be materially adversely affected by volatility, uncertainty and disruption in the capital and credit markets.

We maintain a level of cash and securities which, combined with expected cash inflows from investments and operations, is believed adequate to meet anticipated short-term and long-term benefit and expense payment obligations. However, withdrawal and surrender levels may differ from anticipated levels for a variety of reasons, such as changes in economic conditions or changes in our claims paying ability and

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

financial strength ratings. For additional information regarding our exposure to interest rate risk and the impact of a downgrade in our financial strength ratings, see " Changes in interest rates or credit spreads or a sustained low interest rate environment may adversely affect our results of operations, financial condition and liquidity, and our net income can vary from period to period" and " A downgrade in our financial strength or credit ratings may increase policy surrenders and withdrawals, reduce new sales

Table of Contents

and terminate relationships with distributors, impact existing liabilities and increase our cost of capital, any of which could adversely affect our profitability and financial condition." In addition, mark-to-market adjustments on our derivative instruments may lead to fluctuations in our reported statutory capital. These fluctuations may result in the need for additional capital to maintain a targeted level of statutory capital relative to the NAIC's risk-based capital requirements. In the event our current internal sources of liquidity do not satisfy our needs, we may have to seek additional financing and, in such case, we may not be able to successfully obtain additional financing on favorable terms, or at all. The availability of additional financing will depend on a variety of factors such as market conditions, the general availability of credit, the volume of trading activities, the overall availability of credit to the financial services industry, our credit ratings and credit capacity, as well as customers' or lenders' perception of our long- or short-term financial prospects. Similarly, our access to funds may be impaired if regulatory authorities or rating agencies take negative actions against us.

Disruptions, uncertainty or volatility in the capital and credit markets may limit our access to capital required to operate our business, most significantly our insurance operations. Such market conditions may limit our ability to replace, in a timely manner, maturing liabilities; satisfy statutory capital requirements; fund redemption requests on insurance or other financial products; generate fee income and market-related revenue to meet liquidity needs and access the capital necessary to grow our business. As such, we may be forced to delay raising capital, issue shorter tenor securities than we prefer, utilize available internal resources or bear an unattractive cost of capital, which could decrease our profitability and significantly reduce our financial flexibility and liquidity.

In addition, we maintain credit facilities with various financial institutions as a potential source of excess liquidity. These facilities are in place to bridge timing in cash flows to minimize the cost of meeting our obligations, particularly during periods when alternative sources of liquidity are limited. Our ability to borrow funds under these facilities is conditioned on our satisfaction of covenants and other requirements contained in the facilities. Our failure to comply with these covenants, or the failure of lenders to fund their lending commitments, would restrict our ability to access these credit facilities and, consequently, could limit our flexibility in meeting our cash flow needs.

For further discussion on liquidity risk management, see Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources."

Conditions in the global capital markets and the economy generally may materially and adversely affect our business and results of operations.

Our results of operations are materially affected by conditions in the global capital markets and the economy generally, both in the U.S. and elsewhere around the world. Adverse economic conditions may result in a decline in our AUM and revenues and erosion of our profit margins. In addition, in the event of extreme prolonged market events and economic downturns, we could incur significant losses. Even in the absence of a market downturn, we are exposed to substantial risk of loss due to market volatility.

Factors such as consumer spending, business investment, government spending, the volatility and strength of the capital markets, investor and consumer confidence, foreign currency exchange rates and inflation levels all affect the business and economic environment and, ultimately, the amount and profitability of our business. In an economic downturn characterized by higher unemployment, lower family income, lower corporate earnings, lower business investment, negative investor sentiment and lower consumer spending, the demand for our financial and insurance products could be adversely affected. In addition, we may experience an elevated incidence of claims and lapses or surrenders of policies. Our policyholders may choose to defer paying insurance premiums or stop paying insurance premiums altogether. In addition, reductions in employment levels of our existing employer customers may result in a reduction in membership levels and premium income for our specialty benefits products. Participants within the retirement plans for which we provide administrative services may elect to reduce or stop their payroll deferrals to these plans, which would reduce AUM and revenues. In addition, reductions in employment levels may result in a decline in employee deposits into retirement plans. Adverse changes in the economy could affect net income negatively and could have a material adverse effect on our business, results of operations and financial condition.

An economic downturn may also lead to weakening of foreign currencies against the U.S. dollar, which would adversely affect the translation of segment pre-tax operating earnings and equity of our international operations into our consolidated financial statements. For further discussion on foreign currency exchange risk, see Item 7A. "Quantitative and Qualitative Disclosures About Market Risk – Foreign Currency Risk."

Volatility or declines in the equity, bond or real estate markets could reduce our AUM and may result in investors withdrawing from the markets or decreasing their rates of investment, all of which could reduce our revenues and net income.

Because the revenues of our asset management and accumulation businesses are, to a large extent, based on the value of AUM, a decline in domestic and global equity, bond or real estate markets will decrease our revenues. Turmoil in these markets could lead investors to withdraw from these markets, decrease their rates of investment or refrain from making new investments, which may reduce our net income, revenues and AUM. As we continue to shift toward a more fee-based business model, our revenues and net income may become more sensitive to fluctuations

in the equity, bond, and real estate markets.

Table of Contents

For further discussion on equity risk management, see Item 7A. "Quantitative and Qualitative Disclosures About Market Risk Equity Risk."

Changes in interest rates or credit spreads or a sustained low interest rate environment may adversely affect our results of operations, financial condition and liquidity, and our net income can vary from period to period.

In recent years, interest rates have remained at or near historically low levels. During periods of declining interest rates or sustained low interest rates, the interest rates we earn on our assets may be lower than the rates assumed in pricing our products, thereby reducing our profitability. For some of our products, such as GICs and funding agreements, we are unable to lower the rate we credit to customers in response to the lower return we will earn on our investments. In addition, guaranteed minimum interest rates on our life insurance and annuity products may constrain our ability to lower the rate we credit to customers. If interest rates remain low over a sustained period of time, this may result in increases in our reserves and true-ups or unlocking of our deferred acquisition cost ("DAC") asset and other actuarial balances. During periods of declining interest rates, borrowers may prepay or redeem mortgages and bonds that we own, which would force us to reinvest the proceeds at lower interest rates. Furthermore, declining interest rates may reduce the rate of policyholder surrenders and withdrawals on our life insurance and annuity products, thus increasing the duration of the liabilities and creating asset and liability duration mismatches. Low interest rates may also increase the cost of hedging our GMWB rider. Declining interest rates or a sustained low interest rate environment may also result in changes to the discount rate used for valuing our pension and other postretirement benefit ("OPEB") obligations, which could negatively impact our results of operations and financial condition. In addition, certain statutory capital and reserve requirements are based on formulas or models that consider interest rates and a prolonged period of low interest rates may increase the statutory capital we are required to hold as well as the amount of assets we must maintain to support statutory reserves.

Increases in market interest rates may also adversely affect our results of operations, financial condition, and liquidity. During periods of increasing market interest rates, we may offer higher crediting rates on our insurance and annuity products in order to keep these products competitive. Because returns on our portfolio of invested assets may not increase as quickly as current interest rates, we may have to accept lower spreads, thus reducing our profitability. Rapidly rising interest rates may also result in an increase in policy surrenders, withdrawals and requests for policy loans as customers seek to achieve higher returns. In addition, rising interest rates would cause a decrease in the value of financial assets held at fair value on our consolidated statements of financial position. Despite our efforts to reduce the impact of rising interest rates, we may be required to sell assets to raise the cash necessary to respond to an increase in surrenders, withdrawals and loans, thereby realizing capital losses on the assets sold. An increase in policy surrenders and withdrawals may also require us to accelerate amortization of our DAC asset relating to these products, which would further reduce our profitability. Rising interest rates may also cause a decline in the value of the fixed income assets we manage, resulting in a reduction in our fee revenue in the short term. In addition, a significant increase in interest rates may cause a reduction in the fair value of intangible assets in our reporting units, potentially leading to an impairment of goodwill or other intangible assets.

For discussion about interest rate risk management, see Item 7A. "Quantitative and Qualitative Disclosures About Market Risk Interest Rate Risk."

Our exposure to credit spreads primarily relates to market price variability and reinvestment risk associated with changes in credit spreads. A widening of credit spreads would cause unrealized losses in our investment portfolio, would increase losses associated with credit-based derivatives we have sold that do not qualify or have not been designated for hedge accounting where we assume credit exposure and, if issuer credit spreads increase as a result of fundamental credit deterioration, would likely result in higher other-than-temporary impairments. Credit spread tightening will reduce net investment income associated with new purchases of fixed maturities. Credit spread tightening may also cause an increase in the reported value of certain liabilities that are valued using a discount rate that reflects our own credit spread. In addition, market volatility may make it difficult to value certain of our securities if trading becomes less frequent. As such, valuations may include assumptions or estimates that may have significant period-to-period changes from market volatility, which could have a material adverse effect on our results of operations or financial condition.

Our investment portfolio is subject to several risks that may diminish the value of our invested assets and the investment returns credited to customers, which could reduce our sales, revenues, AUM and net income.

An increase in defaults or write-downs on our fixed maturities portfolio may reduce our profitability.

We are subject to the risk that the issuers of the fixed maturities we own will default on principal and interest payments. As of December 31, 2016, our U.S. investment operations held \$51.6 billion of fixed maturities, or 75% of total U.S. invested assets, of which approximately 7% were below investment grade, including \$228.9 million, or 0.44% of our total fixed maturities that we classified as either "problem," "potential problem" or "restructured." See Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations Investments U.S. Investment Operations Fixed Maturities."

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Approximately \$1.1 billion of our U.S. commercial mortgage-backed securities are scheduled to mature in 2017. We may be exposed to losses if borrowers in the underlying mortgages are unable to repay their loans at the time of maturity. Several mitigating factors have resulted in strong refinancing rates in 2014-2016. These factors include low interest rates,

Table of Contents

improving real estate fundamentals, and the availability of capital from the new issues and high yield debt markets. However, refinancing risks could increase over the next year if we experience high interest rates that are not supported by commensurate economic growth or a slowdown in the economy that results in lower income growth and a decline in property values.

As of December 31, 2016, the international investment operations of our fully consolidated subsidiaries held \$3.7 billion of fixed maturities, or 52%, of total international invested assets, of which 13% are government bonds. Some non-government bonds have been rated on the basis of the issuer's country credit rating. However, the ratings relationship between national ratings and global ratings is not linear with the U.S. The starting point for national ratings differs by country, which makes the assessment of credit quality more difficult. See Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations Investments International Investment Operations." An increase in defaults on our fixed maturities portfolio could harm our financial strength and reduce our profitability.

An increased rate of delinquency and defaults on our commercial mortgage loans, including balloon maturities with and without amortizing payments, may adversely affect our profitability.

Our commercial mortgage loan portfolio faces both delinquency and default risk. Commercial mortgage loans of \$12.0 billion represented 16% of our total invested assets as of December 31, 2016. As of December 31, 2016, there were no loans in the process of foreclosure in our commercial mortgage loan portfolio. The performance of our commercial mortgage loan investments, however, may fluctuate in the future. An increase in the delinquency rate of, and defaults under, our commercial mortgage loan portfolio could harm our financial strength and decrease our profitability.

As of December 31, 2016, approximately \$9.9 billion, or 82%, of our U.S. investment operations commercial mortgage loans before valuation allowance had balloon payment maturities. A balloon maturity is a loan with all or a meaningful portion of the loan amount due at the maturity of the loan. The default rate on commercial mortgage loans with balloon payment maturities has historically been higher than for commercial mortgage loans with a fully amortizing loan structure. Since a significant portion of the principal is repaid at maturity, the amount of loss on a default is generally greater than fully amortizing commercial mortgage loans. An increase in defaults on balloon maturity loans as a result of the foregoing factors could harm our financial strength and decrease our profitability.

Mark-to-market adjustments on certain equity method investments and trading securities may reduce our profitability or cause volatility in our reported earnings.

Our investment portfolio includes certain equity method investments and trading securities that are reported at fair value on the consolidated statements of financial position, with changes in fair value reported in net investment income on the consolidated statements of operations. Mark-to-market adjustments on these investments may reduce our profitability or cause our net income to vary from period to period. We anticipate that acquisition and investment activities may increase the number and magnitude of these investments in the future.

We may have difficulty selling our privately placed fixed maturities, commercial mortgage loans and real estate investments because they are less liquid than our publicly traded fixed maturities.

We hold certain investments that may be less liquid, such as privately placed fixed maturities, mortgage loans and real estate investments. These asset classes represented approximately 40% of the value of our invested assets as of December 31, 2016.

If we require significant amounts of cash on short notice, we may have difficulty selling these investments in a timely manner, be forced to sell them for less than we otherwise would have been able to realize or both. The reported value of our relatively illiquid types of investments, our investments in the asset classes described above and, at times, our high quality, generally liquid asset classes, do not necessarily reflect the lowest possible price for the asset. If we were forced to sell certain of our assets in the current market, there can be no assurance we will be able to sell them for the prices at which we have recorded them and we may be forced to sell them at significantly lower prices.

The impairment of other financial institutions could adversely affect us.

We use derivative instruments to hedge various risks we face in our businesses. See Item 7A. "Quantitative and Qualitative Disclosures About Market Risk." We enter into a variety of derivative instruments with a number of counterparties in the financial services industry, including brokers and dealers, commercial banks, investment banks, clearinghouses, exchanges and other institutions. For transactions where we are in-the-money, we are exposed to credit risk in the event of default of our counterparty. We establish collateral agreements with nominal thresholds for a large majority of our counterparties to limit our exposure. However, our credit risk may be exacerbated when the collateral held by us cannot be realized or is liquidated at prices not sufficient to recover the full amount of the loan or derivative exposure. With regard to our derivative exposure, we have over-collateralization requirements on the portion of collateral we hold, based on the risk profile of the assets posted as collateral. We also have exposure to these financial institutions in the form of unsecured debt instruments and equity investments.

Such losses or impairments to the carrying value of these assets may materially and adversely affect our business and results of operations.

Table of Contents

Our requirements to post collateral or make payments related to declines in market value of specified assets may adversely affect our liquidity and expose us to counterparty credit risk.

Many of our derivative transactions with financial and other institutions specify the circumstances under which the parties are required to post collateral. The amount of collateral we may be required to post under these agreements may increase under certain circumstances, which could adversely affect our liquidity. In addition, under the terms of some of our transactions we may be required to make payment to our counterparties related to any decline in the market value of the specified assets. Such payments could have an adverse effect on our liquidity. Furthermore, with respect to any such payments, we will have unsecured risk to the counterparty as these amounts are not required to be segregated from the counterparty's other funds, are not held in a third party custodial account, and are not required to be paid to us by the counterparty until the termination of the transaction.

Environmental liability exposure may result from our commercial mortgage loan portfolio and real estate investments.

Liability under environmental protection laws resulting from our commercial mortgage loan portfolio and real estate investments may harm our financial strength and reduce our profitability. Under the laws of several states, contamination of a property may give rise to a lien on the property to secure recovery of the costs of cleanup. In some states, this kind of lien has priority over the lien of an existing mortgage against the property, which would impair our ability to foreclose on that property should the related loan be in default. In addition, under the laws of some states and under the federal Comprehensive Environmental Response, Compensation and Liability Act of 1980, we may be liable for costs of addressing releases or threatened releases of hazardous substances that require remedy at a property securing a mortgage loan held by us, if our agents or employees have become sufficiently involved in the hazardous waste aspects of the operations of the related obligor on that loan, regardless of whether or not the environmental damage or threat was caused by the obligor. We also may face this liability after foreclosing on a property securing a mortgage loan held by us. This may harm our financial strength and decrease our profitability.

Regional concentration of our commercial mortgage loan portfolio in California may subject us to losses attributable to economic downturns or catastrophes in that state.

Commercial mortgage lending in the state of California accounted for 18%, or \$2.2 billion, of our U.S. investment operations commercial mortgage loan portfolio before valuation allowance as of December 31, 2016. Due to this concentration of commercial mortgage loans in California, we are exposed to potential losses resulting from the risk of an economic downturn in California as well as to catastrophes, such as earthquakes, that may affect the region. While we generally do not require earthquake insurance for properties on which we make commercial mortgage loans, we do take into account property specific engineering reports, construction type and geographical concentration by fault lines in our investment underwriting guidelines. If economic conditions in California deteriorate or catastrophes occur, we may in the future experience delinquencies or defaults on the portion of our commercial mortgage loan portfolio located in California, which may harm our financial strength and reduce our profitability.

Gross unrealized losses may be realized or result in future impairments, resulting in a reduction in our net income.

Fixed maturities that are classified as available-for-sale ("AFS") are reported on the consolidated statements of financial position at fair value. Unrealized gains or losses on AFS securities are recognized as a component of accumulated other comprehensive income ("AOCI") and are, therefore, excluded from net income. Our U.S. investment operations had gross unrealized losses on fixed maturities of \$0.6 billion pre-tax as of December 31, 2016, and the component of gross unrealized losses for securities trading down 20% or more for over six months was approximately \$0.1 billion pre-tax. The accumulated change in fair value of the AFS securities is recognized in net income when the gain or loss is realized upon the sale of the asset or in the event that the decline in fair value is determined to be other than temporary (referred to as an other-than-temporary impairment). Realized losses or impairments may have a material adverse impact on our net income in a particular quarterly or annual period.

Fluctuations in foreign currency exchange rates could adversely impact our profitability and financial condition.

Principal International sells products denominated in various local currencies and generally invests the associated assets in local currencies. For diversification purposes, assets backing the products may be partially invested in non-local currencies. In our U.S. operations, we also issue foreign currency-denominated funding agreements to nonqualified investors in the institutional market or invest in foreign currency-denominated investments. The associated foreign currency exchange risk in each instance is hedged or managed to specific risk tolerances. Although our investment and hedging strategies limit the effect of currency exchange rate fluctuation on operating results, fluctuations in such rates affect the translation of the results of our international operations into our consolidated financial statements. For further discussion on foreign currency exchange risk, see Item 7A. "Quantitative and Qualitative Disclosures About Market Risk Foreign Currency Risk."

Table of Contents

Risks relating to estimates, assumptions and valuations

Our valuation of investments and the determinations of the amount of allowances and impairments taken on our investments may include methodologies, estimations and assumptions which are subject to differing interpretations and, if changed, could materially adversely affect our results of operations or financial condition.

Fixed maturities, equity securities and derivatives represent the majority of total cash and invested assets reported at fair value on our consolidated statements of financial position, excluding separate accounts. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). Fair value estimates are made based on available market information and judgments about the financial instrument at a specific point in time. Considerable judgment is often required to develop estimates of fair value, and the use of different assumptions or valuation methodologies may have a material effect on the estimated fair value amounts.

For additional information on our valuation methodology, see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 14, Fair Value Measurements."

During periods of market disruption including periods of significantly rising or high interest rates, rapidly widening credit spreads or illiquidity, it may be difficult to value certain securities, for example collateralized mortgage obligations and collateralized debt obligations, if trading becomes less frequent and/or market data becomes less observable. There may be certain asset classes that were in active markets with significant observable data that become illiquid due to the current financial environment. In such cases, the valuation process may require more subjectivity and management judgment. As such, valuations may include inputs and assumptions that are less observable or require greater estimation as well as valuation methods that require greater estimation, which could result in values that are different from the value at which the investments may be ultimately sold. Further, rapidly changing credit and equity market conditions could materially impact the valuation of securities as reported within our consolidated financial statements and the period-to-period changes in value could vary significantly. Decreases in value may have a material adverse effect on our results of operations or financial condition.

The determination of the amount of allowances and impairments vary by investment type and is based upon our periodic evaluation and assessment of known and inherent risks associated with the respective asset class. Such evaluations and assessments require significant judgment and are revised as conditions change and new information becomes available. Additional impairments may need to be taken or allowances provided for in the future, and the ultimate loss may exceed management's current estimate of impairment amounts.

Additionally, our management considers a wide range of factors about the instrument issuer and uses their best judgment in evaluating the cause of the decline in the estimated fair value of the instrument and in assessing the prospects for recovery. Inherent in management's evaluation of the instrument are assumptions and estimates about the operations of the issuer and its future earnings potential. For further information regarding our impairment and allowance methodologies, see Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Investments – U.S. Investment Operations" under the captions "Fixed Maturities" and "Mortgage Loans" and Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operation – Critical Accounting Policies and Estimates – Valuation and Impairment of Fixed Income Investments."

Any impairments of or valuation allowances against our deferred tax assets could adversely affect our results of operations and financial condition.

Deferred tax liabilities and assets are determined based on the difference between the financial statement and tax bases of assets and liabilities using enacted tax rates expected to be in effect during the years in which the basis differences reverse. We are required to evaluate the recoverability of our deferred tax assets each quarter and establish a valuation allowance, if necessary, to reduce our deferred tax assets to an amount that is more-likely-than-not to be realizable. In determining the need for a valuation allowance, we consider many factors, including future reversals of existing taxable temporary differences, future taxable income exclusive of reversing temporary differences and carryforwards, taxable income in prior carryback years and implementation of any feasible and prudent tax planning strategies management would employ to realize the tax benefit.

Inherent in the provision for income taxes are estimates regarding the deductibility of certain items, the timing of income and expense recognition and the current or future realization of operating losses, capital losses, certain tax credits and future enacted changes in applicable tax rates as well as the tax base. In the event these estimates differ from our prior estimates due to the receipt of new information, we may be required to significantly change the provision for income taxes recorded in the consolidated financial statements. Any such change could significantly affect the amounts reported in the consolidated financial statements in the year these estimates change. A further significant decline in value of assets incorporated into our tax planning strategies could lead to an increase of our valuation allowance on deferred tax assets having an adverse effect on current and future results.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

For additional information, see Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operation Critical Accounting Policies and Estimates Income Taxes."

Table of Contents

We may face losses if our actual experience differs significantly from our pricing and reserving assumptions.

Our profitability depends significantly upon the extent to which our actual experience is consistent with the assumptions used in setting prices for our products and establishing liabilities for future insurance and annuity policy benefits and claims. The premiums we charge and the liabilities we hold for future policy benefits are based on assumptions reflecting a number of factors, including the amount of premiums we will receive in the future, rate of return on assets we purchase with premiums received, expected claims, mortality, morbidity, lapse rates and expenses. However, due to the nature of the underlying risks and the high degree of uncertainty associated with the determination of the liabilities for unpaid policy benefits and claims, we cannot determine precisely the amounts we will ultimately pay to settle these liabilities. As a result, we may experience volatility in the level of our profitability and our reserves from period to period. To the extent that actual experience is less favorable than our underlying assumptions, we could be required to increase our liabilities, which may harm our financial strength and reduce our profitability.

For example, if mortality or morbidity rates are higher than our pricing assumptions, we may be required to make greater claims payments on our insurance policies sooner than we had projected. However, this risk may be partially offset by our use of third party reinsurance. In addition, the mortality risk on our life insurance business may be partially offset by our payout annuity business, where an increase in mortality rates will result in a decrease in benefit payments. Concentrations of risk, by both geography and industry, may cause mortality or morbidity rates in our group insurance businesses or individual disability insurance to be higher than anticipated.

Our results of operations may also be adversely impacted if our actual investment earnings differ from our pricing and reserve assumptions. Changes in economic conditions may lead to changes in market interest rates or changes in our investment strategies, either of which could cause our actual investment earnings to differ from our pricing and reserve assumptions.

For additional information on our insurance reserves, see Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies and Estimates Insurance Reserves."

The pattern of amortizing our DAC asset and other actuarial balances on our universal life-type insurance contracts, participating life insurance policies and certain investment contracts may change, impacting both the level of our DAC asset and other actuarial balances and the timing of our net income.

Amortization of our DAC asset and other actuarial balances depends on the actual and expected profits generated by the lines of business that incurred the expenses. Expected profits are dependent on assumptions regarding a number of factors including investment returns, benefit payments, expenses, mortality and policy lapse. Due to the uncertainty associated with establishing these assumptions, we cannot, with precision, determine the exact pattern of profit emergence. As a result, amortization of these balances will vary from period to period. To the extent actual experience emerges less favorably than expected or our expectation for future profits decreases, our DAC asset and other actuarial balances may be adjusted, reducing our profitability in the current period.

For additional information, see Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operation Critical Accounting Policies and Estimates Deferred Acquisition Costs and Other Actuarial Balances."

Legal, regulatory and tax risks

We may not be able to protect our intellectual property and may be subject to infringement claims.

We rely on a combination of contractual rights and copyright, trademark, patent and trade secret laws to establish and protect our intellectual property. Although we use a broad range of measures to protect our intellectual property rights, third parties may infringe or misappropriate our intellectual property. We may have to litigate to enforce and protect our copyrights, trademarks, patents, trade secrets and know-how or to determine their scope, validity or enforceability, which represents a diversion of resources that may be significant in amount and may not prove successful. The loss of intellectual property protection or the inability to secure or enforce the protection of our intellectual property assets could have a material adverse effect on our business and our ability to compete.

We also may be subject to costly litigation in the event another party alleges our operations or activities infringe upon such other party's intellectual property rights. Third parties may have, or may eventually be issued, patents or other protections that could be infringed by our products, methods, processes or services or could otherwise limit our ability to offer certain product features. Any party that holds such a patent could make a claim of infringement against us. We may also be subject to claims by third parties for breach of copyright, trademark, license usage rights, or misappropriation of trade secret rights. Any such claims and any resulting litigation could result in significant liability for damages. If we were found to have infringed or misappropriated a third party patent or other intellectual property rights, we could incur substantial liability, and in some circumstances could be enjoined from providing certain products or services to our customers or utilizing and

benefiting from certain methods, processes, copyrights, trademarks, trade secrets or licenses, or alternatively could be required to enter into costly licensing arrangements with third parties, all of which could have a material adverse effect on our business, results of operations and financial condition.

Table of Contents

Our ability to pay stockholder dividends and meet our obligations may be constrained by the limitations on dividends Iowa insurance laws impose on Principal Life.

We are an insurance holding company whose assets include all of the outstanding shares of the common stock of Principal Life and other subsidiaries. Our ability to pay dividends to our stockholders and meet our obligations, including paying operating expenses and any debt service, depends upon the receipt of dividends from Principal Life. Iowa insurance laws impose limitations on the ability of Principal Life to pay dividends to us. Any inability of Principal Life to pay dividends to us in the future may cause us to be unable to pay dividends to our stockholders and meet our other obligations. See Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources" for a discussion of regulatory restrictions on Principal Life's ability to pay us dividends.

Changes in laws or regulations may reduce our profitability.

Our insurance business is subject to comprehensive regulation and supervision throughout the U.S. and in the international markets in which we operate. We are also impacted by federal legislation and administrative policies in areas such as securities laws, employee benefit plan regulation, financial services regulations and federal and international taxation. Changes in laws or regulations or the interpretation thereof could significantly increase our compliance costs and reduce our profitability. Failure to comply with applicable regulations may expose us to significant penalties and reputational damage. The results of the recent U.S. presidential and congressional elections may increase the chance of federal legislative and regulatory changes that could have an unknown impact on the various types of regulation discussed below.

Changes in insurance regulations may reduce our profitability.

The primary purpose of insurance regulation is to protect policyholders, not stockholders. In the U.S., the laws of the various states establish insurance departments with broad powers to regulate such matters as:

licensing companies to transact business,

licensing agents,

prescribing allowable practices for illustrating policies,

admitting statutory assets,

mandating a number of insurance benefits,

regulating premium rates,

approving policy forms,

regulating unfair trade and claims practices,

establishing statutory reserve requirements and solvency standards,

regulating insurer use of affiliated reinsurance companies,

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

fixing maximum interest rates on life insurance policy loans and minimum rates for accumulation of surrender values,

restricting various transactions between affiliates and

regulating the types, amounts and valuation of investments.

State insurance regulators, federal regulators and the NAIC continually reexamine existing laws and regulations, and may impose changes in the future. New interpretations of existing laws and the passage of new legislation may harm our ability to sell new policies, increase our claims exposure on policies we issued previously and adversely affect our profitability and financial strength.

State insurance guaranty associations have the right to assess insurance companies doing business in their state for funds to help pay the obligations of insolvent insurance companies to policyholders and claimants. Because the amount and timing of an assessment is beyond our control, the liabilities we have established for these potential assessments may not be adequate. In addition, regulators may change their interpretation or application of existing laws and regulations.

The NAIC regularly reviews and updates its statutory reserve and risk-based capital requirements. Changes to these requirements may increase the amount of reserves and capital our U.S. insurance companies are required to hold and may adversely impact Principal Life's ability to pay dividends to us. See Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources" for a discussion of regulatory restrictions on Principal Life's ability to pay us dividends. In addition, changes in statutory reserve or risk-based capital requirements may adversely impact our financial strength ratings. See the risk factor entitled "A downgrade in our financial strength or credit ratings may increase policy surrenders and withdrawals, reduce new sales and terminate relationships with distributors, impact existing liabilities and increase our cost of capital, any of which could adversely affect our profitability and financial condition" for a discussion of risks relating to our financial strength ratings.

Table of Contents

State regulators are implementing a principles-based reserving ("PBR") approach for life insurance and non-variable annuity products. The PBR framework for individual life insurance will become effective beginning in 2017 and can be adopted by companies for new business at any time during a permitted three year transition period. The effective date for the group and individual annuity PBR framework is not yet known, but portions could be effective as soon as 2018. Under the PBR framework, statutory reserves would reflect a combination of company experience and prescribed assumptions and methodologies. The ultimate financial impact of the PBR framework on new business is uncertain, but it could result in higher reserves, more volatile reserves and uncertain tax treatment.

We have implemented reinsurance transactions utilizing affiliated reinsurers and highly rated third parties to finance a portion of the reserves for our term life insurance policies and universal life insurance policies with secondary guarantees. Our ability to enter into new reserve financing transactions will continue to be dependent on the cost and forms of financing available in the market and our ability to obtain required regulatory approvals. Once life insurance PBR becomes fully effective, there may no longer be any financial advantage to pursuing the use of these affiliate reinsurance transactions for new business. For additional information regarding our use of affiliated reinsurance transactions, see Item 8, "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 15, Statutory Insurance Financial Information."

The NAIC is working on updates to its statutory framework for variable annuities, which includes statutory reserve, capital and derivative accounting requirements. While the details of and financial impacts from these reforms are uncertain, the changes could negatively impact our profitability and capital position or create additional volatility. The NAIC could implement these reforms effective as early as 2017. In addition, the New York Department of Financial Services is considering a revision to the separate account regulations of its state. The status of these revisions is very uncertain, but if adopted, these revisions could negatively impact the ability of New York licensed insurers to issue competitive variable annuity products nationally.

The NAIC is pursuing a variety of reforms to its risk-based capital ("RBC") framework:

One proposal includes a new component for operational risk that could be effective as early as 2017. The operational risk component could increase our RBC requirements; however, the magnitude of the increase is not yet known.

The NAIC is pursuing an update to the RBC credit risk factors for fixed income investments. This update is expected to increase the capital requirements for bonds. Another possible update may lead to a favorable reduction in factors for real estate investments. The net impact is unknown, but could be a modest increase to our capital requirements in total. The credit risk factor revisions could be effective as early as 2017.

The NAIC is exploring development of a new charge for longevity risk. Such a charge could increase our capital requirements. The longevity risk charge could be effective as early as 2017.

The NAIC is developing a group-wide capital calculation. This calculation is not intended to be a regulatory capital requirement, but it could be used by regulators in their supervisory process. The calculation could be required as soon as 2017.

Our international insurance businesses are also subject to comprehensive regulation and supervision from central and/or local governmental authorities in each country in which we operate. New interpretations of existing laws and regulations or the adoption of new laws and regulations may harm our international businesses and reduce our profitability in those businesses. Changes to capital requirements are currently included in a draft proposal in Chile. In addition, Brazil has adopted new capital requirements that will become effective at the end of 2017.

The International Association of Insurance Supervisors ("IAIS") has proposed a common framework for the supervision of Internationally Active Insurance Groups ("IAIGs"), which is scheduled to be ready for implementation within the various countries starting in 2019. Under the proposed framework, IAIGs would be supervised on a group-wide basis under a set of enhanced supervisory standards. Under this framework, the IAIS is also developing a group-wide Insurance Capital Standard ("ICS"), which would apply to IAIGs. For systemic risk management, the Financial Stability Board is continuing to implement group supervisory and capital requirements for Global Systemically Important Insurers ("G-SIIs"). We currently are not designated as an IAIG or a G-SII. If we were so designated in the future, we may be subject to supervision and capital requirements beyond those applicable to any competitors without those designations. These international frameworks may influence the regulatory capital requirements in the jurisdictions in which we operate, potentially leading to an increase in our capital requirements.

Changes in federal, state and foreign securities laws may reduce our profitability.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Our asset management and accumulation and life insurance businesses are subject to various levels of regulation under federal, state and foreign securities laws. These laws and regulations are primarily intended to protect investors in the securities markets or investment advisory or brokerage clients and generally grant supervisory agencies broad administrative powers, including the power to limit or restrict the conduct of business for failure to comply with such laws and regulations. Changes to these laws or regulations, or the interpretation thereof, that restrict the conduct of our business could significantly increase our compliance costs and reduce our profitability.

Table of Contents

Changes in employee benefit regulations may reduce our profitability.

We provide products and services to certain employee benefit plans that are subject to ERISA or the Internal Revenue Code of 1986, as amended. The U.S. Congress has, from time to time, considered legislation relating to changes in ERISA to permit application of state law remedies, such as consequential and punitive damages, in lawsuits for wrongful denial of benefits, which, if adopted, could increase our liability for damages in future litigation. In addition, reductions in contribution levels to defined contribution plans may decrease our profitability.

In April 2016, the Department of Labor ("DOL") released its final fiduciary definition regulation package. The regulation broadens the definition of a fiduciary under ERISA to include persons providing investment advice to an employee benefit plan or an IRA for a fee or other compensation. The DOL also released two new prohibited transaction class exemptions and amendments to current prohibited transaction exemptions. Broker-dealers and advisors are in various stages of determining the implications of the regulations on their business models. How they proceed could impact our business. Even with this fluid environment, our preliminary assessment of the new regulation's impact to our business and future financial results indicates the costs will not have a significant effect on our financial condition or results of operations. As the rules become applicable and are operationalized, we will assess what business impacts need to be addressed and how they affect the organization.

Financial services regulatory reform may reduce our profitability, impact how we do business or limit our ability to engage in certain capital expenditures.

On July 21, 2010, the Dodd-Frank Act became law. The Dodd-Frank Act makes extensive changes to the laws regulating financial services firms and requires various federal agencies to adopt a broad range of new implementation rules and regulations, including regulations surrounding the use of derivatives. The federal agencies were given significant discretion in drafting the implementation rules and regulations, and consequently, some of the impacts of the Dodd-Frank Act are not fully known yet. It is likely that new margining aspects of the law will increase hedging costs for the company and possibly cause fundamental shifts to the way risks are hedged.

Changes in tax laws could increase our tax costs and reduce sales of our insurance, annuity and investment products.

Current federal income tax laws generally permit the tax-deferred accumulation of earnings on the premiums paid by the holders of annuities and life insurance products. Taxes, if any, are payable on income attributable to a distribution under the contract for the year in which the distribution is made. The U.S. Congress has, from time to time, considered legislation that would reduce or eliminate the benefit of such deferral of taxation on the accretion of value within life insurance and nonqualified annuity contracts. Enactment of this legislation, including a simplified income tax structure, could result in fewer sales of our insurance, annuity and investment products. In addition, changes in the federal estate tax laws could negatively affect the demand for the types of life insurance used in estate planning.

In addition, we benefit from certain tax items, including but not limited to, dividends received deductions, tax credits (such as foreign tax credits), tax-exempt bond interest and insurance reserve deductions. From time to time, the U.S. Congress, as well as foreign, state and local governments, consider legislative changes that could reduce or eliminate the benefits associated with these and other tax items. The Organisation for Economic Co-operation and Development has released proposed policy around Base Erosion and Profit Shifting. As such legislation is adopted by participating countries, our profitability could be negatively impacted. We continue to evaluate the impact potential tax reform proposals, which currently lack sufficient detail, may have on our future results of operations and financial condition.

Changes in accounting standards may reduce the transparency of our reported profitability and financial condition.

Accounting standards are subject to change and can reduce the transparency of our reported profitability. See Item 8, "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 1, Nature of Operations and Significant Accounting Policies". The Financial Accounting Standards Board is currently working on several key projects. These projects could result in significant changes to U.S. generally accepted accounting principles ("U.S. GAAP"), including the accounting standards for insurance contracts. There is still some uncertainty surrounding the effective dates and transition methods for the proposed changes. If adopted, the proposed changes in accounting standards could have the potential to negatively impact our reported profitability and financial ratios and may make it more difficult for investors and regulators to accurately assess our financial condition and profitability. In addition, the required adoption of new accounting standards may result in significant incremental costs associated with initial implementation and ongoing compliance.

Results of litigation and regulatory investigations may affect our financial strength or reduce our profitability.

We are regularly involved in litigation, both as a defendant and as a plaintiff, but primarily as a defendant. Litigation naming us as a defendant ordinarily arises out of our business operations as a provider of asset management and accumulation products and services; life and disability insurance; and our investment activities. We are, from time to time, also involved in various governmental, regulatory and

administrative proceedings and inquiries.

These factors may affect our financial strength or reduce our profitability. For further discussion on litigation and regulatory investigation risk, see Item 3. "Legal Proceedings," Item 8. "Financial Statements and Supplementary Data,

Table of Contents

Notes to Consolidated Financial Statements, Note 12, Contingencies, Guarantees and Indemnifications" under the caption, "Litigation and Regulatory Contingencies" and Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 10, Income Taxes" under the caption "Other Tax Information."

From time to time we may become subject to tax audits, tax litigation or similar proceedings, and as a result we may owe additional taxes, interest and penalties in amounts that may be material.

We are subject to income taxes in the United States as well as many other jurisdictions. In determining our provisions for income taxes and our accounting for tax-related matters in general, we are required to exercise judgment. We regularly make estimates where the ultimate tax determination is uncertain. The final determination of any tax audit, appeal of the decision of a taxing authority, tax litigation or similar proceedings may be materially different from that reflected in our historical financial statements. The assessment of additional taxes, interest and penalties could be materially adverse to our current and future results of operations and financial condition.

Applicable laws and our certificate of incorporation and by-laws may discourage takeovers and business combinations that some stockholders might consider in their best interests.

State laws and our certificate of incorporation and by-laws may delay, defer, prevent, or render more difficult a takeover attempt that some stockholders might consider in their best interests. For instance, they may prevent our stockholders from receiving the benefit from any premium to the market price of our common stock offered by a bidder in a takeover context. Even in the absence of a takeover attempt, the existence of these provisions may adversely affect the prevailing market price of our common stock if they are viewed as discouraging takeover attempts in the future.

State laws and our certificate of incorporation and by-laws may also make it difficult for stockholders to replace or remove our management. These provisions may facilitate management entrenchment, which may delay, defer or prevent a change in our control, which may not be in the best interests of our stockholders.

The following provisions, included in our certificate of incorporation and by-laws, may also have anti-takeover effects and may delay, defer or prevent a takeover attempt that some stockholders might consider in their best interests. In particular, our certificate of incorporation and by-laws:

permit our Board of Directors to issue one or more series of preferred stock;

divide our Board of Directors into three classes;

limit the ability of stockholders to remove directors;

prohibit stockholders from filling vacancies on our Board of Directors;

prohibit stockholders from calling special meetings of stockholders;

impose advance notice requirements for stockholder proposals and nominations of directors to be considered at stockholder meetings and

require the approval of at least 75% of the voting power of our outstanding common stock for the amendment of our by-laws and provisions of our certificate of incorporation governing:

the classified board,

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

the director's discretion in determining what he or she reasonably believes to be in the best interests of Principal Financial Group, Inc.,

the liability of directors,

the removal of directors by shareholders,

the prohibition on stockholder actions by written consent and

the supermajority voting requirements.

In addition, Section 203 of the General Corporation Law of the State of Delaware may limit the ability of an "interested stockholder" to engage in business combinations with us. An interested stockholder is defined to include persons owning 15% or more of our outstanding voting stock.

Risks relating to our business

Competition from companies that may have greater financial resources, broader arrays of products, higher ratings and stronger financial performance may impair our ability to retain existing customers, attract new customers and maintain our profitability.

We believe our ability to compete is based on a number of factors including scale, service, product features, price, investment performance, commission structure, distribution capacity, financial strength ratings and name recognition. We compete with a large number of financial services companies such as banks, mutual funds, broker-dealers, insurers and asset managers, many of which have advantages over us in one or more of the above competitive factors.

Table of Contents

Each of our segments faces strong competition:

The primary competitors for our Retirement and Income Solutions and Principal Global Investors segments are asset managers, banks, broker-dealers and insurers. Our ability to increase and retain AUM is directly related to the performance of our investments as measured against market averages and the performance of our competitors. Even when securities prices are generally rising, performance can be affected by investment styles.

Competition for our Principal International segment comes primarily from local financial services firms and other international companies operating on a stand-alone basis or in partnership with local firms.

Our U.S. Insurance Solutions segment competes with other insurance companies.

In the event competitors charge lower premiums or fees for substantially similar products, we may face pressure to lower our prices in order to attract and retain customers. Reductions in the premiums and fees we charge may adversely affect our revenues and profitability.

Damage to our reputation may adversely affect our revenues and profitability.

Our continued success is dependent upon our ability to earn and maintain the trust and confidence of customers, distributors, employees and other stakeholders. Damage to our reputation may arise from a variety of sources including, but not limited to, litigation or regulatory actions, compliance failures, employee misconduct and unfavorable press coverage. Any damage to our reputation could adversely affect our ability to attract and retain customers, distributors and employees, potentially leading to a reduction in our revenues and profitability.

A downgrade in our financial strength or credit ratings may increase policy surrenders and withdrawals, reduce new sales and terminate relationships with distributors, impact existing liabilities and increase our cost of capital, any of which could adversely affect our profitability and financial condition.

A.M. Best, Fitch, Moody's and S&P publish financial strength ratings on U.S. life insurance companies as well as some of our international insurance companies. These ratings are indicators of an insurance company's ability to meet contractholder and policyholder obligations. These rating agencies also assign credit ratings on non-life insurance entities, such as PFG and Principal Financial Services, Inc. ("PFS"). Credit ratings are indicators of a debt issuer's ability to meet the terms of debt obligations in a timely manner, and are important factors in overall funding profile and ability to access external capital.

Ratings are important factors in establishing the competitive position of insurance companies and maintaining public confidence in products being offered. A ratings downgrade, or the potential for such a downgrade, could, among other things:

materially increase the number of surrenders for all or a portion of the net cash values by the owners of policies and contracts we have issued, and materially increase the number of withdrawals by policyholders of cash values from their policies;

result in the termination of our relationships with broker-dealers, banks, agents, wholesalers and other distributors of our products and services;

reduce new sales, particularly with respect to full service payout products and general account GICs and funding agreements purchased by pension plans and other institutions;

cause some of our existing liabilities to be subject to acceleration, additional collateral support, changes in terms, or creation of additional financial obligations and

increase our cost of capital and limit our access to the capital markets.

Any of these consequences could adversely affect our profitability and financial condition.

Client terminations or withdrawals or changes in investor preferences may lead to a reduction in revenues for our asset management and accumulation businesses.

Revenues from our asset management and accumulation products are primarily fee-based. Our asset-based fees are typically calculated as a percentage of the market value of assets under management. Our asset management and accumulation clients may elect to terminate their relationship with us or withdraw funds, generally on short notice. Client terminations and withdrawals may be driven by a variety of factors, including economic conditions, investment performance, investor preferences or changes in our reputation in the marketplace. Significant terminations or withdrawals may reduce our AUM, thus adversely affecting our revenues and profitability.

In addition, fee levels can vary significantly among different types of investments. We generally earn higher fees on liquid alternatives and equity investments vs. fixed income investments and on actively managed investments vs. indexed or passive investment strategies. Therefore, our fee revenue is impacted by both the value and the composition of our AUM. Investor preferences with respect to asset classes and investment strategies may shift over time due to market conditions, tax law changes, regulatory changes and various other factors. Changes in the composition of our assets under management may adversely affect our revenues and profitability.

Table of Contents

Guarantees within certain of our products that protect policyholders may decrease our earnings or increase the volatility of our results of operations or financial position under U.S. GAAP if our hedging or risk management strategies prove ineffective or insufficient.

Certain of our variable annuity products include guaranteed minimum death benefits and/or guaranteed minimum withdrawal benefits. Periods of significant and sustained downturns in equity markets, increased equity volatility or reduced interest rates could result in an increase in the valuation of the future policy benefit or policyholder account balance liabilities associated with such products, resulting in a reduction to net income. We use derivative instruments to attempt to mitigate changes in the liability exposure related to interest rate, equity market and volatility movements, and the volatility of net income associated with these liabilities. However, we remain liable for the guaranteed benefits in the event that derivative counterparties are unable or unwilling to pay. The liability exposure and volatility of net income may also be influenced by changes in market credit spreads reflecting our own creditworthiness, for which we do not attempt to hedge. In addition, we are subject to the risk that hedging and other management procedures prove ineffective or that unanticipated policyholder behavior or mortality, combined with adverse market events, produces economic losses beyond the scope of the risk management techniques employed. These, individually or collectively, may have a material adverse effect on net income, financial condition or liquidity. We are also subject to the risk that the cost of hedging these guaranteed minimum benefits increases as implied volatilities increase and/or interest rates decrease, resulting in a reduction to net income.

If we are unable to attract and retain qualified employees and sales representatives and develop new distribution sources, our results of operations, financial condition and sales of our products may be adversely impacted.

Our continued success is largely dependent on our ability to attract and retain qualified employees. We face intense competition in attracting and retaining key employees, including investment, marketing, finance, legal, compliance and other professionals. If we are unable to attract and retain qualified employees, our results of operations and financial condition may be adversely impacted.

We distribute our asset accumulation, asset management and life and specialty benefit insurance products and services through a variety of distribution channels, including our own internal sales representatives, independent brokers, banks, broker-dealers and other third party marketing organizations. We must attract and retain sales representatives to sell our products. Strong competition exists among financial services companies for efficient sales representatives. We compete with other financial services companies for sales representatives primarily on the basis of our financial position, support services and compensation and product features. If we are unable to attract and retain sufficient sales representatives to sell our products, our ability to compete and revenues from new sales would suffer.

Our ability to increase and retain AUM is directly related to the performance of our investments as measured against market averages and the performance of our competitors. If we are unable to attract and retain qualified portfolio managers, we may face reduced sales and increased cash outflows in our asset accumulation and asset management businesses.

Our international businesses face political, legal, operational and other risks that could reduce our profitability in those businesses.

Our international businesses face political, legal, operational and other risks that we do not face in our operations in the U.S. We face the risk of discriminatory regulation, nationalization or expropriation of assets, price controls and exchange controls or other restrictions that prevent us from transferring funds from these operations out of the locations in which they operate or converting local currencies we hold into U.S. dollars or other currencies. Some of our international businesses are, and are likely to continue to be, in emerging or potentially volatile markets. In addition, we rely on local staff, including local sales forces, in those locations where there is a risk we may encounter labor problems with local staff, especially in locations where workers' associations and trade unions are strong. Some of our international businesses are joint ventures in which we hold a minority interest. In these joint ventures, we lack complete management and operational control over the operations, which may limit our ability to take action to protect or increase the value of our investment in the joint venture.

We may need to fund deficiencies in our Closed Block assets.

In connection with its conversion in 1998 into a stock life insurance company, Principal Life established an accounting mechanism, known as a "Closed Block" for the benefit of participating ordinary life insurance policies that had a dividend scale in force on July 1, 1998. Dividend scales are the actuarial formulas used by life insurance companies to determine amounts payable as dividends on participating policies based on experience factors relating to, among other things, investment results, mortality, lapse rates, expenses, premium taxes and policy loan interest and utilization rates. The Closed Block was designed to provide reasonable assurance to policyholders included in the Closed Block that, after the conversion, assets would be available to maintain the aggregate dividend scales in effect for 1997 if the experience underlying such scales were to continue.

We allocated assets to the Closed Block as of July 1, 1998, in an amount such that we expected their cash flows, together with anticipated revenues from the policies in the Closed Block, to be sufficient to support the Closed Block business, including payment of claims, certain direct expenses, charges and taxes and to provide for the continuation of

Table of Contents

aggregate dividend scales in accordance with the 1997 policy dividend scales if the experience underlying such scales continued, and to allow for appropriate adjustments in such scales if the experience changed. We bear the costs of administrative expenses associated with Closed Block policies and, accordingly, these costs were not funded as part of the assets allocated to the Closed Block. Any increase in such costs in the future will be borne by us. As of December 31, 2016, Closed Block assets and liabilities were \$3,893.7 million and \$4,442.8 million, respectively.

We will continue to pay guaranteed benefits under the policies included in the Closed Block, in accordance with their terms. The Closed Block assets, cash flows generated by the Closed Block assets and anticipated revenues from policies included in the Closed Block may not be sufficient to provide for the benefits guaranteed under these policies. If they are not sufficient, we must fund the shortfall. Even if they are sufficient, we may choose for business reasons to support dividend payments on policies in the Closed Block with our general account funds.

The Closed Block assets, cash flows generated by the Closed Block assets and anticipated revenues from policies in the Closed Block will benefit only the holders of those policies. In addition, to the extent these amounts are greater than the amounts estimated at the time we funded the Closed Block, dividends payable in respect of the policies included in the Closed Block may be greater than they would have been in the absence of a Closed Block. Any excess net income will be available for distribution over time to Closed Block policyholders but will not be available to our stockholders. See Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 6, Closed Block" for further details.

A pandemic, terrorist attack, military action or other catastrophic event could adversely affect our net income.

Our mortality and morbidity experience could be adversely impacted by a catastrophic event. In addition, a severe catastrophic event may cause significant volatility in global financial markets, disruptions to commerce and reduced economic activity. The resulting macroeconomic conditions could adversely affect our cash flows, as well as the value and liquidity of our invested assets. We may also experience operational disruptions if our employees are unable or unwilling to come to work due to a pandemic or other catastrophe.

Our reinsurers could default on their obligations or increase their rates, which could adversely impact our net income and financial condition.

We cede life, disability, health and long-term care insurance to other insurance companies through reinsurance. See Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 1, Nature of Operations and Significant Accounting Policies." The collectability of reinsurance recoverables is largely dependent on the solvency of the individual insurers. We remain liable to the policyholder, even if the reinsurer defaults on its obligations with respect to the ceded business. In addition, a reinsurer's insolvency may cause us to lose our reserve credits on the ceded business, in which case we would be required to establish additional reserves.

The premium rates we charge are based, in part, on the assumption that reinsurance will be available at a certain cost. Most of our reinsurance contracts contain provisions that limit the reinsurer's ability to increase rates on in-force business; however, some do not. If a reinsurer raises the rates it charges on a block of in-force business, our profitability may be negatively impacted if we are not able to pass the increased costs on to the customer. If reinsurers raise the rates they charge on new business, we may be forced to raise the premiums we charge, which could have a negative impact on our competitive position.

We face risks arising from acquisitions of businesses.

We have acquired businesses in the past, and expect to continue to do so in the future. We face a number of risks arising from acquisition transactions, including difficulties in integrating the acquired business into our operations, difficulties in assimilating and retaining employees and intermediaries, difficulties in retaining the existing customers of the acquired entity, unforeseen liabilities that arise in connection with the acquired business, unfavorable market conditions that could negatively impact our growth expectations for the acquired business and sustained declines in the equity market that could reduce the AUM and fee revenues for certain acquired businesses. These risks may prevent us from realizing the expected benefits from acquisitions and could result in the impairment of goodwill and/or intangible assets recognized at the time of acquisition.

For additional information on our goodwill and other intangible assets, see Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies and Estimates Goodwill and Other Intangible Assets."

A computer system failure or security breach could disrupt our business, damage our reputation and adversely impact our profitability.

We rely on computer systems to conduct business, including customer service, marketing and sales activities, customer relationship management and producing financial statements. While we have policies, procedures, automation and backup plans designed to prevent or limit the effect of failure, our computer systems may be vulnerable to disruptions or breaches as the result of natural disasters, man-made disasters,

criminal activity, pandemics, or other

Table of Contents

events beyond our control. The failure of our computer systems for any reason could disrupt our operations, result in the loss of customer business and adversely impact our profitability.

We retain confidential information on our computer systems, including customer information and proprietary business information. Any compromise of the security of our computer systems that results in the disclosure of personally identifiable customer information could damage our reputation, expose us to litigation, increase regulatory scrutiny and require us to incur significant technical, legal and other expenses.

Loss of key vendor relationships or failure of a vendor to protect information of our customers or employees could adversely affect our business or result in losses.

We rely on services and products provided by many vendors in the United States and abroad. These include, for example, vendors of computer hardware and software and vendors of services. In the event that one or more of our vendors suffers a bankruptcy or otherwise becomes unable to continue to provide products or services, or fails to protect personal information of our customers or employees, we may suffer operational impairments, reputational damage and financial losses.

Our enterprise risk management framework may not be fully effective in identifying or mitigating all of the risks to which we are exposed.

We utilize an integrated risk management framework, which is designed to manage material risks within established risk appetites and risk tolerances. Nonetheless, our policies and procedures may not be fully effective in identifying or mitigating every risk to which we are exposed. Many of our methods for managing and mitigating risk rely on models and assumptions that are based, in part, on observed historical data. As a result, these methods may not accurately predict future exposures, which may be significantly greater than our historical measures indicate. We may be exposed to unanticipated risks as a result of changes in market conditions, new products or new business strategies, catastrophes or other unforeseen circumstances. If our risk management framework proves ineffective, we may suffer unexpected losses, which may adversely affect our results of operations and financial condition.

Our financial results may be adversely impacted by global climate changes.

Atmospheric concentrations of carbon dioxide and other greenhouse gases have increased dramatically since the industrial revolution, resulting in a gradual increase in global average temperatures and an increase in the frequency and severity of natural disasters. These trends are expected to continue in the future and have the potential to impact nearly all sectors of the economy to varying degrees. Our initial research indicates that climate change does not pose an imminent or significant threat to our operations or business, but we will continue to monitor new developments in the future.

Potential impacts may include the following:

Changes in temperatures and air quality may adversely impact our mortality and morbidity rates. For example, increases in the level of pollution and airborne allergens may cause an increase in upper respiratory and cardiovascular diseases, leading to increased claims in our insurance businesses. However, the risk of increased mortality on our life insurance business may be partly offset by our payout annuity business, where an increase in mortality results in a decrease in benefit payments.

Climate change may impact asset prices, as well as general economic conditions. For example, rising sea levels may lead to decreases in real estate values in coastal areas. Additionally, government policies to slow climate change (e.g., setting limits on carbon emissions) may have an adverse impact on sectors such as utilities, transportation and manufacturing. Changes in asset prices may impact the value of our fixed income, real estate and commercial mortgage investments. We manage our investment risks by maintaining a well-diversified portfolio, both geographically and by sector. We also monitor our investments on an ongoing basis, allowing us to adjust our exposure to sectors and/or geographical areas that face severe risks due to climate change.

A natural disaster that affects one of our office locations could disrupt our operations and pose a threat to the safety of our employees. However, we have extensive Business Continuity and Disaster Recovery planning programs in place to help mitigate this risk.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

As of December 31, 2016, we owned 33 properties in our home office complex in Des Moines, Iowa, and in various other locations. Of these 33 properties, 17 are office buildings, 1 is a warehouse facility, 12 are parking lots and ramps, 1 is a park/green space, 1 is a childcare center and 1 is a power generation plant. Of the office and warehouse space, we occupy approximately 92% of the 2.6 million square feet of space in these buildings. The balance of the space in these buildings is rented to commercial tenants or is occupied by the property management company servicing these properties.

Table of Contents

We lease office space for various offices located throughout the U.S. and internationally. We believe that our owned and leased properties are suitable and adequate for our current business operations.

Item 3. Legal Proceedings

Disclosure concerning material legal proceedings can be found in Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 12, Contingencies, Guarantees and Indemnifications" under the caption, "Litigation and Regulatory Contingencies" and Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 10, Income Taxes" under the caption, "Other Tax Information," which are incorporated here by this reference.

Executive Officers of the Registrant

The following information is furnished with respect to our executive officers, each of whom is elected by and serves at the pleasure of the Board of Directors.

Timothy M. Dunbar, 59, has been Executive Vice President of the Company and Principal Life and Chief Investment Officer of the Company since January 2014. Prior to that date, he served as Senior Vice President of the Company and Principal Life since 2011, and Chief Investment Officer of the Company and Principal Life since January 2013. Prior to that date, Mr. Dunbar was in charge of Strategy and Finance for the Company and Principal Life in 2011 and 2012, overseeing the business management and strategic direction of the capital markets, corporate strategy and corporate treasury areas. He retains his responsibility for capital markets. Mr. Dunbar previously served as the executive director and head of equities for Principal Global Investors from 2004 until 2011.

Gregory B. Elming, 56, has been Senior Vice President and Chief Risk Officer of the Company and Principal Life since 2011. Prior to that time, he was Senior Vice President and Controller of the Company and Principal Life since 2007.

Nora M. Everett, 57, has been President, Retirement and Income Solutions of the Company and Principal Life since March 2015. Prior to her current position, she served as President and Chief Executive Officer of Principal Funds since 2008 and Senior Vice President and Deputy General Counsel of the Company and Principal Life since 2004.

Daniel J. Houston, 55, has been a director of the Company and Principal Life and President and Chief Executive Officer of the Company and Principal Life since August 2015. Prior to that date, he held the same positions except was Chief Operating Officer (and not Chief Executive Officer) since November 2014. Previously, he served as President, Retirement, Insurance and Financial Services of the Company and Principal Life since 2010. He was President, Retirement and Income Solutions of the Company and Principal Life from 2008 until 2010, and was Executive Vice President, Retirement and Income Solutions of the Company and Principal Life from 2006 to 2008.

Terrance J. Lillis, 64, has been Executive Vice President and Chief Financial Officer of the Company and Principal Life since February 2014. Prior to that date, he was Senior Vice President and Chief Financial Officer of the Company and Principal Life since 2008. Effective February 14, 2017, Mr. Lillis will serve as Executive Vice President (but not as Chief Financial Officer) of the Company and Principal Life until his retirement, which will be no later than May 1, 2017.

James P. McCaughan, 63, who heads the Principal Global Investors segment of our operations, has been President, Principal Global Investors of the Company and Principal Life since 2003.

Gary P. Scholten, 59, has been Executive Vice President and Chief Information Officer of the Company and Principal Life since February 2014. Prior to that date, he was Senior Vice President and Chief Information Officer of the Company and Principal Life since 2002. From 1998 to 2002, he was Vice President of retail information services of Principal Life.

Karen E. Shaff, 62, has been Executive Vice President and General Counsel of the Company and Principal Life since 2004 and, in addition, Secretary of the Company and Principal Life since January 2014. Prior thereto, she was Senior Vice President and General Counsel of the Company since 2001, and Senior Vice President and General Counsel of Principal Life since 2000.

Deanna D. Strable-Soethout, 48, has been Executive Vice President of the Company and Principal Life since September 2016 and President, U.S. Insurance Solutions of the Company and Principal Life since March 2015. Prior to that, she served as Senior Vice President of the Company and Principal Life since 2006. Effective February 14, 2017, Ms. Strable will serve as Executive Vice President and Chief Financial Officer of the Company and Principal Life, but no longer as President, U.S. Insurance Solutions.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Luis Valdes, 59, has been the head of the Principal International segment of our operations since 2012, has been President, Principal International of the Company and Principal Life since 2011. Prior to his current position, he was Senior Vice President and President PFG Latin America of the Company and Principal Life since 2010, and was Vice President Principal International of Principal Life from 2000 until 2010.

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

Our common stock began trading on the New York Stock Exchange ("NYSE") under the symbol "PFG" on October 23, 2001. Prior to such date, there was no established public trading market for our common stock. On February 1, 2017, there were 293,874 stockholders of record of our common stock.

The following table presents the high and low prices per share for our common stock on the NYSE for the periods indicated and the dividends declared per share during such periods.

	High	Low	Dividends declared
2016			
First quarter	\$ 44.30	\$ 33.09	\$ 0.38
Second quarter	\$ 44.90	\$ 38.03	\$ 0.39
Third quarter	\$ 51.72	\$ 38.84	\$ 0.41
Fourth quarter	\$ 61.34	\$ 50.96	\$ 0.43
2015			
First quarter	\$ 52.56	\$ 46.01	\$ 0.36
Second quarter	\$ 53.42	\$ 49.81	\$ 0.38
Third quarter	\$ 58.02	\$ 41.67	\$ 0.38
Fourth quarter	\$ 52.21	\$ 43.64	\$ 0.38

Future dividend decisions will be based on and affected by a number of factors, including our results and financial requirements and the impact of regulatory restrictions. See Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources" for a discussion of regulatory restrictions on Principal Life's ability to pay dividends.

The following table presents the amount of our share purchase activity for the periods indicated:

Period	Total number of shares purchased (1)	Average price paid per share	Total number of shares purchased as part of publicly announced programs	Maximum dollar value of shares that may yet be purchased under the programs (in millions) (2)
January 1, 2016 - January 31, 2016	1,152	\$ 44.97		\$ 75.0
February 1, 2016 - February 28, 2016	2,240,756	\$ 36.58	1,724,800	\$ 412.5
March 1, 2016 - March 31, 2016	608,190	\$ 38.88	600,631	\$ 389.1
April 1, 2016 - April 30, 2016	604,097	\$ 40.43	602,993	\$ 364.7
May 1, 2016 - May 31, 2016	590,856	\$ 42.83	590,856	\$ 339.4
June 1, 2016 - June 30, 2016	1,279,789	\$ 42.48	1,278,981	\$ 285.1
July 1, 2016 - July 31, 2016	848,812	\$ 41.34	848,812	\$ 250.0
August 1, 2016 - August 31, 2016	8,268	\$ 47.11		\$ 250.0
September 1, 2016 - September 30, 2016		\$		\$ 250.0
October 1, 2016 - October 31, 2016		\$		\$ 250.0
November 1, 2016 - November 30, 2016	179	\$ 53.13		\$ 250.0
December 1, 2016 - December 31, 2016	545,513	\$ 58.73	545,513	\$ 218.0
Total	6,727,612		6,192,586	

(1) Includes the number of shares of common stock utilized to execute certain stock incentive awards and shares purchased as part of a publicly announced program.

Item 6. Selected Financial Data

The following table sets forth certain selected historical consolidated financial information. We derived the consolidated financial information (except for amounts referred to as "Other Supplemental Data") for each of the years ended December 31, 2016, 2015 and 2014 and as of December 31, 2016 and 2015 from our audited consolidated financial statements and notes to the financial statements included in this Form 10-K. We derived the consolidated financial information (except for amounts referred to as "Other Supplemental Data") for the years ended December 31, 2013 and 2012 and as of December 31, 2014, 2013 and 2012 from our audited consolidated financial statements not included in this Form 10-K. The following summary of consolidated financial information (except for amounts referred to as "Other Supplemental Data") has been prepared in accordance with U.S. GAAP.

In order to fully understand our consolidated financial information, please also see Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our audited consolidated financial statements and the notes to the financial statements included in this Form 10-K. The results for past accounting periods are not necessarily indicative of the results to be expected for any future accounting period.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

The following analysis discusses our financial condition as of December 31, 2016, compared with December 31, 2015, and our consolidated results of operations for the years ended December 31, 2016, 2015 and 2014, and, where appropriate, factors that may affect our future financial performance. The discussion should be read in conjunction with our audited consolidated financial statements and the related notes to the financial statements and the other financial information included elsewhere in this Form 10-K.

Forward-Looking Information

Our narrative analysis below contains forward-looking statements intended to enhance the reader's ability to assess our future financial performance. Forward-looking statements include, but are not limited to, statements that represent our beliefs concerning future operations, strategies, financial results or other developments, and contain words and phrases such as "anticipate," "believe," "plan," "estimate," "expect," "intend," and other similar expressions. Forward-looking statements are made based upon management's current expectations and beliefs concerning future developments and their potential effects on us. Such forward-looking statements are not guarantees of future performance.

Table of Contents

Actual results may differ materially from those included in the forward-looking statements as a result of risks and uncertainties. Those risks and uncertainties include, but are not limited to, the risk factors listed in Item 1A. "Risk Factors."

Overview

We provide financial products and services through the following reportable segments:

Retirement and Income Solutions;

Principal Global Investors;

Principal International and

U.S. Insurance Solutions.

We also have a Corporate segment, which consists of the assets and activities that have not been allocated to any other segment. See Item 1. "Business" for a description of our reportable segments.

Economic Factors and Trends

Positive market performance and net customer cash flows led to account value increases in our Retirement and Income Solutions segment and AUM increases in our Principal Global Investors segment. Since account values and AUM are the base by which these businesses generate revenues, the increase in account values and AUM has contributed to the overall improvement of our operating revenues in these segments.

In our Principal International segment, we continued to grow our business organically through our existing subsidiaries and joint ventures and through strategic acquisitions. Local currency AUM, a key indicator of earnings growth for the segment, increased significantly as a result of positive net customer cash flows and market performance. The financial results for the Principal International segment are also impacted by fluctuations of the foreign currency to U.S. dollar exchange rates for the locations in which we have business.

The U.S. Insurance Solutions segment has been impacted by lower interest rates for the past few years, which has caused spread compression and led to higher reserves. This has resulted in changes to our product offerings.

Profitability

Our profitability depends in large part upon our:

amount of AUM;

ability to manage the difference between the investment income we earn and the interest we credit to policyholders;

ability to generate fee revenues by providing administrative and investment management services;

ability to price our insurance products at a level that enables us to earn a margin over the cost of providing benefits and the related expenses;

ability to manage our investment portfolio to maximize investment returns and minimize risks such as interest rate changes or defaults or impairments of invested assets;

ability to effectively hedge fluctuations in foreign currency to U.S. dollar exchange rates on certain transactions and

ability to manage our operating expenses.

Critical Accounting Policies and Estimates

The increasing complexity of the business environment and applicable authoritative accounting guidance requires us to closely monitor our accounting policies. Our significant accounting policies are described in Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 1, Nature of Operations and Significant Accounting Policies." We have identified critical accounting policies that are complex and require significant judgment and estimates about matters that are inherently uncertain. A summary of our critical accounting policies is intended to enhance the reader's ability to assess our financial condition and results of operations and the potential volatility due to changes in estimates and changes in guidance. The identification, selection and disclosure of critical accounting estimates and policies have been discussed with the Audit Committee of the Board of Directors.

Valuation and Impairment of Fixed Income Investments

Fixed Maturities. Fixed maturities include bonds, asset-backed securities ("ABS"), redeemable preferred stock and certain non-redeemable preferred securities. We classify our fixed maturities as either AFS or trading and, accordingly, carry them at fair value in the consolidated statements of financial position. Volatility in net income can result from

Table of Contents

changes in fair value of fixed maturities classified as trading. Volatility in other comprehensive income can result from changes in fair value of fixed maturities classified as AFS.

The fair values of our public fixed maturities are primarily based on market prices from third party pricing vendors. We have regular interactions with these vendors to ensure we understand their pricing methodologies and to confirm they are utilizing observable market information. In addition, 6% of our invested asset portfolio as of December 31, 2016, was invested in privately placed fixed maturities with no readily available market quotes to determine the fair market value. The majority of these assets are valued using a matrix pricing valuation approach that utilizes observable market inputs. In the matrix approach, securities are grouped into pricing categories that vary by sector, rating and average life. Each pricing category is assigned a risk spread based on studies of observable public market data from the investment professionals assigned to specific security classes. The expected cash flows of the security are then discounted back at the current Treasury curve plus the appropriate risk spread. Although the matrix valuation approach provides a fair valuation of each pricing category, the valuation of an individual security within each pricing category may actually be impacted by company specific factors.

If we are unable to price a fixed maturity security using prices from third party pricing vendors or other sources specific to the asset class, we may obtain a broker quote or utilize an internal pricing model specific to the asset utilizing relevant market information, to the extent available and where at least one significant unobservable input is utilized. These are reflected in Level 3 in the fair value hierarchy and can include fixed maturities across all asset classes. As of December 31, 2016, less than 1% of our total fixed maturities were Level 3 securities valued using internal pricing models. See Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 14, Fair Value Measurements" for further discussion.

The \$257.4 million increase in net unrealized gains from U.S. investment operations for the year ended December 31, 2016, can primarily be attributed to tightening of credit spreads, partially offset by an approximate 9 basis point increase in interest rates. For additional information about interest rate risk see Item 7A. "Quantitative and Qualitative Disclosures About Market Risk".

Fixed maturities classified as AFS are subject to impairment reviews. When evaluating fixed maturities for impairment, we consider relevant facts and circumstances in evaluating whether a credit or interest rate-related impairment of a security is other than temporary. Relevant facts and circumstances considered include: (1) the extent and length of time the fair value has been below cost; (2) the reasons for the decline in value; (3) the financial position and access to capital of the issuer, including the current and future impact of any specific events; (4) for structured securities, the adequacy of the expected cash flows and (5) our intent to sell a security or whether it is more likely than not we will be required to sell the security before recovery of its amortized cost which, in some cases, may extend to maturity. To the extent we determine a security is deemed to be other than temporarily impaired, an impairment loss is recognized. See item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 4, Investments Other-Than-Temporary Impairments" for further discussion.

A number of significant risks and uncertainties are inherent in the process of monitoring credit impairments and determining if an impairment is other than temporary. These risks and uncertainties include: (1) the risk that our assessment of an issuer's ability to meet all of its contractual obligations will change based on changes in the credit characteristics of that issuer; (2) the risk that the economic outlook will be worse than expected or have more of an impact on the issuer than anticipated; (3) the risk that our investment professionals are making decisions based on fraudulent or misstated information in the financial statements provided by issuers and (4) the risk that new information obtained by us or changes in other facts and circumstances lead us to change our intent to not sell the security prior to recovery of its amortized cost. Any of these situations could result in a charge to net income in a future period. As of December 31, 2016, we had \$17,466.4 million in AFS fixed maturities with gross unrealized losses totaling \$648.8 million. Included in the gross unrealized losses are losses attributable to both movements in market interest rates as well as movement in credit spreads.

Mortgage Loans. Mortgage loans consist primarily of commercial mortgage loans on real estate. As of December 31, 2016, the carrying value of our commercial mortgage loans was \$12,027.8 million. Commercial mortgage loans on real estate are generally reported at cost adjusted for amortization of premiums and accrual of discounts, computed using the interest method and net of valuation allowances.

Commercial mortgage loans on real estate are considered impaired when, based on current information and events, it is probable we will be unable to collect all amounts due according to contractual terms of the loan agreement. When we determine a loan is impaired, a valuation allowance is established equal to the difference between the carrying amount of the mortgage loan and the estimated value reduced by the cost to sell. Estimated value is based on either the present value of the expected future cash flows discounted at the loan's effective interest rate, the loan's observable market price or fair value of the collateral. Subsequent changes in the estimated value are reflected in the valuation allowance. Amounts on loans deemed to be uncollectible are charged off and removed from the valuation allowance. The change in the valuation allowance provision is included in net realized capital gains (losses) on our consolidated statements of operations.

The valuation allowance is maintained at a level believed adequate by management to absorb estimated probable credit losses. Management's periodic evaluation and assessment of the valuation allowance adequacy is based on known and inherent risks in the portfolio,

adverse situations that may affect a borrower's ability to repay, the estimated value of

Table of Contents

the underlying collateral, composition of the loan portfolio, portfolio delinquency information, underwriting standards, peer group information, current economic conditions, loss experience and other relevant factors. The evaluation of our impaired loan component is subjective, as it requires the estimation of timing and amount of future cash flows expected to be received on impaired loans. For more detailed information concerning mortgage loan valuation allowances and impairments, see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 4, Investments Mortgage Loan Valuation Allowance."

We have a large experienced commercial real estate staff centrally located in Des Moines, which includes commercial mortgage underwriters, loan closers, loan servicers, engineers, appraisers, credit analysts, research staff, legal staff, information technology personnel and portfolio managers. Experienced commercial real estate senior management adheres to a disciplined process in reviewing all transactions for approval on a consistent basis. During 2016, the typical new commercial mortgage loan at origination averaged 52% loan-to-value with a 2.6 times debt service coverage ratio and was internally rated A on a bond equivalent basis. Our entire commercial mortgage loan portfolio, excluding mortgage loans held in our Principal Global Investors segment, averaged 46% loan-to-value ratio with a 2.7 times debt service coverage ratio as of December 31, 2016. The large equity cushion and strong debt service coverage in our commercial mortgage loan investments will help insulate us from stress during times of weak commercial real estate fundamentals.

Derivatives

We primarily use derivatives to hedge or reduce exposure to market risks. The fair values of exchange-traded derivatives are determined through quoted market prices. The fair values of derivative instruments cleared through centralized clearinghouses are determined through market prices published by the clearinghouses. The fair values of non-cleared over-the-counter ("OTC") derivative instruments are determined using either pricing valuation models that utilize market observable inputs or broker quotes. On an absolute fair value basis as of December 31, 2016, 53% of our OTC derivative assets and liabilities were valued using pricing valuation models, 43% using clearinghouse prices and the remaining 4% using broker quotes. See Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 14, Fair Value Measurements" for further discussion. The fair values of our derivative instruments can be impacted by changes in interest rates, foreign exchange rates, credit spreads, equity indices and volatility, as well as other contributing factors. For additional information see Item 7A. "Quantitative and Qualitative Disclosures About Market Risk".

We also issue certain annuity contracts and other insurance contracts that include embedded derivatives that have been bifurcated from the host contract. They are valued using a combination of historical data and actuarial judgment. See Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 14, Fair Value Measurements" for further discussion. We include our assumption for own non-performance risk in the valuation of these embedded derivatives. As our credit spreads widen or tighten, the fair value of the embedded derivative liabilities decrease or increase, leading to an increase or decrease in net income. If the current market credit spreads reflecting our own creditworthiness move to zero (tighten), the reduction to net income would be approximately \$76.7 million, net of DAC and income taxes, based on December 31, 2016, reported amounts. In addition, the policyholder behavior assumptions used in the valuation of embedded derivatives include risk margins, which increase the fair value of the embedded derivative liabilities.

The accounting for derivatives is complex and interpretations of the applicable accounting standards continue to evolve. Judgment is applied in determining the availability and application of hedge accounting designations and the appropriate accounting treatment. Judgment and estimates are used to determine the fair value of some of our derivatives. Volatility in net income can result from changes in fair value of derivatives that do not qualify or are not designated for hedge accounting and changes in fair value of embedded derivatives.

Deferred Acquisition Costs and Other Actuarial Balances

Incremental direct costs of contract acquisition as well as certain costs directly related to acquisition activities (underwriting, policy issuance and processing, medical and inspection and sales force contract selling) for the successful acquisition of new and renewal insurance policies and investment contract business are capitalized to the extent recoverable. Commissions and other incremental direct costs of contract acquisition for the acquisition of long-term service contracts are also capitalized to the extent recoverable. Maintenance costs and acquisition costs that are not deferrable are charged to net income as incurred.

Amortization Based on Estimated Gross Profits. DAC for universal life-type insurance contracts and certain investment contracts are amortized over the expected lifetime of the contracts in relation to estimated gross profits ("EGPs"). As of December 31, 2016, these policies accounted for 62% of our total DAC balance. In addition to DAC, the following actuarial balances are also amortized in relation to EGPs.

Sales inducement asset Sales inducements are amounts that are credited to the contractholder's account balance as an inducement to purchase the contract. Like DAC, the cost of the sales inducement is capitalized and amortized over the expected life of the contract, in proportion to EGPs.

Table of Contents

Unearned revenue liability An unearned revenue liability is established when we collect fees or other policyholder assessments that represent compensation for services to be provided in future periods. These revenues are deferred and then amortized over the expected life of the contract, in proportion to EGPs.

Reinsurance asset or liability For universal-life type products that are reinsured, a reinsurance asset or liability is established to spread the expected net reinsurance costs or profits in proportion to the EGPs on the underlying business.

We also have additional benefit reserves that are established for annuity or universal life-type contracts that provide benefit guarantees, or for contracts that are expected to produce profits followed by losses. The liabilities are accrued in relation to estimated contract assessments.

Key assumptions used in the calculation of EGPs include mortality, morbidity, lapses, equity returns, general account investment yields and expenses as well as the change in our liability for certain guarantees and the difference between actual and expected reinsurance premiums and recoveries, depending on the nature of the contract. Our general account investment yield assumption reflects our long-term projections of interest rates and net realized capital gains (losses). We develop an estimate of EGPs at issue and each valuation date. As actual experience and market conditions emerge, the gross profits may vary from those expected either in magnitude or timing, in which case a true-up of actuarial balances occurs as a charge or credit to current net income. In addition, we are required to revise our assumptions regarding future experience if actual experience or other evidence suggests that earlier estimates should be revised; we refer to this as unlocking. Both actions, reflecting actual experience and market conditions and changing future estimates, can change both the current amount and the future amortization pattern of the DAC asset and related actuarial balances.

For individual variable life insurance, individual variable annuities and group annuities that have separate account U.S. equity investment options, we utilize a mean reversion methodology (reversion to the mean assumption), a common industry practice, to determine the future domestic equity market growth rate assumption used for the calculation of EGPs. If actual annualized U.S. equity market performance varies from our 8% long-term assumption, we assume different performance levels in the short-term such that the weighted average return is equal to the long-term assumption over the mean reversion period. However, our mean reversion process generally limits assumed returns to a range of 4-12% during the mean reversion period.

Amortization Based on Estimated Gross Revenues. DAC and certain of the actuarial balances on a portion of our universal life products are amortized in proportion to estimated gross revenues rather than EGPs. Estimated gross revenues include similar assumptions as the revenue component of EGPs and the changes of future estimates and reflection of actual experience and market conditions is done in the same manner as EGPs discussed above. As of December 31, 2016, these policies accounted for 8% of our total DAC balance.

Amortization Based on Estimated Gross Margins. DAC for participating life insurance products are amortized in proportion to estimated gross margins ("EGMs") rather than EGPs. EGMs include similar assumption items as EGPs, and amortization schedules were developed using models last updated when we stopped selling participating business in the early 2000s. Some products allow for underwritten death benefit increases and cost of living adjustments, resulting in a material amount of new DAC each year, and the amortization schedules are modified as appropriate. As of December 31, 2016, these policies accounted for 4% of our total DAC balance.

Amortization Based on Premium-Paying Period. DAC for non-participating term life insurance and individual disability policies are amortized over the premium-paying period of the related policies using assumptions consistent with those used in computing policyholder liabilities. Once these assumptions are made for a given policy or group of policies, they will not be changed over the life of the policy unless a loss recognition event occurs. As of December 31, 2016, these policies accounted for 21% of our total DAC balance.

Amortization Based on Service Period. DAC for long-term service contracts are amortized in proportion to the revenue recognized or straight-line if no pattern of revenue recognition can be reasonably predicted. We amortize capitalized costs of long-term service contracts on a straight-line basis, reflecting lapses as they are incurred, over the expected contract life. As of December 31, 2016, these contracts accounted for 5% of our total DAC balance.

Internal Replacements. We review policies for modifications that result in the exchange of an existing contract for a new contract. If the new contract is determined to be an internal replacement that is substantially changed from the replaced contract, any unamortized DAC and related actuarial balances are written off and acquisition costs related to the new contract are capitalized as appropriate. If the new contract is substantially unchanged from the replaced contract, we continue to amortize the existing DAC and related actuarial balances.

Recoverability. DAC and sales inducement assets are subject to recoverability testing at the time of policy issue and loss recognition testing on an annual basis, or when an event occurs that may warrant loss recognition. If loss recognition or impairment is necessary, the asset balances are written off to the extent it is determined that future policy premiums and investment income or gross profits are not adequate to

cover related losses and expenses.

Actuarial Assumption Updates. We periodically review and update actuarial assumptions that are inputs to the models for DAC and other actuarial balances and make model refinements as necessary. For more information see "Transactions Affecting Comparability of Results of Operations Other Actuarial Assumption Updates."

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Table of Contents

Sensitivities. As of December 31, 2016, the net balance of DAC and related actuarial balances, excluding balances affected by changes in other comprehensive income ("OCI"), was a \$1,445.1 million asset. We perform sensitivity analyses to assess the impact that certain assumptions have on these balances. The following table shows the estimated immediate impact of various assumption changes on our DAC and related actuarial balances.

		Estimated impact to net income (1)
	\$	(in millions)
Reducing the future equity return assumption by 1%	\$	(7)
Reducing the long-term general account investment yield assumption by 0.5%		(54)

(1) Reflects the net impact of changes to the DAC asset, sales inducement asset, unearned revenue liability, reinsurance asset or liability, additional benefit reserves and related taxes. Includes the impact on net income of changes in DAC and related actuarial balances for our equity method subsidiaries. The DAC and related actuarial balances of the equity method subsidiaries are not included in the total DAC balance listed above as they are not fully consolidated.

Goodwill and Other Intangible Assets

Goodwill and other intangible assets include the cost of acquired subsidiaries in excess of the fair value of the net tangible assets recorded in connection with acquisitions. Goodwill and intangible assets with indefinite lives are not amortized; rather, we test the carrying value for impairment at least annually. Goodwill is tested at the reporting unit level, which is a business one level below the operating segment. We formally conduct our annual goodwill and other intangible asset impairment testing during the third quarter. Under certain circumstances, interim impairment tests may be required if events occur or circumstances change that would more-likely-than-not reduce the fair value of a reporting unit below its carrying value.

The operating segments and associated reporting units at which we perform our testing are as follows:

Retirement and Income Solutions: Retirement and Income Solutions Fee and Retirement and Income Solutions Spread

Principal Global Investors: Equity Investments, Fixed Income Investments, Real Estate and Other Alternative Investments, Mutual Funds Complex

Principal International: countries in which Principal International does business

U.S. Insurance Solutions: Specialty Benefits Insurance and Individual Life Insurance

Corporate: Corporate subsidiaries

Goodwill. U.S. GAAP permits entities to first assess qualitative factors to determine whether it is more-likely-than-not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the quantitative impairment test of the two-step goodwill impairment test. We continue to perform a two-step test in our evaluation of the carrying value of goodwill.

In Step 1 of the evaluation, the fair value of each reporting unit is determined and compared to the carrying value of the reporting unit. If the fair value is greater than the carrying value, the carrying value of the reporting unit is deemed to be recoverable, and Step 2 is not required. After completion of our 2016 Step 1 analysis, it was determined that fair values exceeded the carrying amounts for all businesses one level below the operating segment and we did not have any business at risk of failing the Step 1 goodwill impairment test. If the fair value estimate had been less than the carrying value, it is an indicator that impairment may exist, and Step 2 would be required. In Step 2, the reporting unit's goodwill implied fair value is determined. The reporting unit's fair value as determined in Step 1 is assigned to all of its net assets (recognized and unrecognized) as if the reporting unit were acquired in a business combination as of the date of the impairment test. If the implied fair value of the reporting unit's goodwill is lower than its carrying amount, goodwill is impaired and written down to its implied fair value.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

The determination of fair value for our reporting units is primarily based on an income approach whereby we use discounted cash flows for each reporting unit. When available, and as appropriate, we use market approaches or other valuation techniques to corroborate discounted cash flow results. The discounted cash flow model used for each reporting unit is based on either income or distributable cash flow, depending on the reporting unit being valued. We use different discount rates based upon the weighted average cost of capital adjusted for risks associated with the operations.

For the income model, we determine fair value based on the present value of the most recent income projections for each reporting unit and calculate a terminal value utilizing a terminal growth rate. The significant assumptions in the operating income model include: income projections, including the underlying assumptions; discount rate and terminal growth rate.

For the distributable cash flow model, we determine fair value based on the present value of projected statutory net income and changes in required capital to determine distributable income for the respective reporting unit. The significant assumptions in the distributable cash flow model include: required capital levels; income projections, including

Table of Contents

the underlying assumptions; discount rate; new business projection period and new business production growth. We did not recognize an impairment in our 2016 consolidated statement of operations.

Other Intangible Assets. U.S. GAAP permits entities to first assess qualitative factors to determine whether it is more-likely-than-not that the fair value of an intangible asset with an indefinite life is less than its carrying amount to determine whether it is necessary to perform a quantitative assessment. We utilize the qualitative approach on a limited basis for testing of intangible assets with indefinite lives. Intangible assets with finite lives are amortized as related benefits emerge and are reviewed periodically for indicators of impairment in value. If facts and circumstances suggest possible impairment, the sum of the estimated undiscounted future cash flows expected to result from the use of the asset is compared to the current carrying value of the asset. If the undiscounted future cash flows are less than the carrying value, an impairment loss is recognized for the excess of the carrying amount of assets over their fair value. For those assets amortized as related benefits emerge, the most significant assumptions involved in the estimation of future benefits include surrender/lapse rates and interest margins. We did not recognize an impairment in our 2016 consolidated statement of operations.

Sensitivities. In connection with our annual impairment testing process, we performed a sensitivity analysis for goodwill impairment with respect to each of our reporting units and determined that a hypothetical 10% decline in the fair value would not result in an impairment of goodwill for any reporting unit. The most significant goodwill and other intangible assets within our 2016 consolidated statement of financial position resulted from our 2013 acquisition of Cuprum, whereby we recorded \$631.8 million of goodwill, and from our 2006 purchase of WM Advisors, Inc., whereby we acquired \$608.0 million of investment management contracts which are considered an indefinite-lived intangible. We cannot predict certain future events that might adversely affect the reported value of goodwill and other intangible assets that totaled \$1,020.8 million and \$1,325.3 million, respectively, as of December 31, 2016. Such events include, but are not limited to, strategic decisions made in response to economic and competitive conditions, the impact of the economic environment on our customer base, interest rate movements, declines in the equity markets, the legal environment in which the businesses operate or a material negative change in our relationships with significant customers. For further information see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 14, Nature of Operations and Significant Accounting Policies," and "Note 2, Goodwill and Other Intangible Assets."

Insurance Reserves

Reserves are liabilities representing estimates of the amounts that will come due, at some point in the future, to or on behalf of our policyholders. U.S. GAAP, allowing for some degree of managerial judgment, provides guidance for establishing reserves.

Future policy benefits and claims include reserves for individual traditional and group life insurance, disability, health and long-term care insurance and individual and group annuities that provide periodic income payments. These reserves are computed using assumptions of mortality, morbidity, lapse, investment performance and expense. These assumptions are based on our experience, industry results, emerging trends and future expectations. For long-duration insurance contracts, once these assumptions are made for a given policy or group of policies, they will not be changed over the life of the policy. However, significant changes in experience or assumptions may require us to provide for expected future losses on a product by establishing premium deficiency reserves. Premium deficiency reserves may also be established for short-duration contracts to provide for expected future losses. Our reserve levels are reviewed throughout the year using internal analysis including, among other things, experience studies, claim development analysis and annual loss recognition analysis. To the extent experience indicates potential loss recognition, we recognize losses on certain lines of business. The ultimate accuracy of the assumptions on these long-tailed insurance products cannot be determined until the obligation of the entire block of business on which the assumptions were made is extinguished. Short-term variances of actual results from the assumptions used in the computation of the reserves are reflected in current period net income and can impact quarter-to-quarter net income.

Future policy benefits and claims also include reserves for incurred but unreported health, disability, dental, vision and life insurance claims. We recognize claims costs in the period the service was provided to our policyholders. However, claims costs incurred in a particular period are not known with certainty until after we receive, process and pay the claims. We determine the amount of this liability using actuarial methods based on historical claim payment patterns as well as emerging cost trends, where applicable, to determine our estimate of claim liabilities. We also look back to assess how our prior periods' estimates developed. To the extent appropriate, changes in such development are recorded as a change to current period claim expense. Historically, the amount of the claim reserve adjustment made in subsequent reporting periods for prior period estimates have been within a reasonable range given our normal claim fluctuations.

We periodically review and update actuarial assumptions that are used to compute reserves. For more information see "Transactions Affecting Comparability of Results of Operations Other Actuarial Assumption Updates."

Benefit Plans

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

The reported expense and liability associated with pension and OPEB plans requires the use of assumptions. Numerous assumptions are made regarding the discount rate, expected long-term rate of return on plan assets, turnover,

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Table of Contents

expected compensation increases, health care claim costs, health care cost trends, retirement rates and mortality. The discount rate and the expected return on plan assets have the most significant impact on the level of expense.

The assumed discount rate is determined by projecting future benefit payments inherent in the Projected Benefit Obligation and discounting those cash flows using a spot yield curve for high quality corporate bonds. Our assumed discount rates were 4.15% for our pension plans and 3.75% for our OPEB plans as of December 31, 2016. Typically a 0.25% decrease in the discount rate would increase the pension benefits Projected Benefit Obligation and the Net Periodic Pension Cost ("NPPC") by approximately \$114.0 million and \$6.6 million, respectively. Typically a 0.25% decrease in the discount rate would increase the other postretirement benefits Accumulated Postretirement Benefit Obligation by approximately \$2.4 million and would have a nominal impact on the Net Periodic Benefit Cost ("NPBC"). Typically a 0.25% increase in the discount rate would result in decreases in benefit obligations and expenses at a level generally commensurate with those noted above.

The assumed long-term rate of return on plan assets is set at the long-term rate expected to be earned based on the long-term investment policy of the plans and the various classes of the invested funds. Historical and future expected returns of multiple asset classes were analyzed to develop a risk-free real rate of return and risk premiums for each asset class. The overall long-term rate for each asset class was developed by combining a long-term inflation component, the real risk free rate of return and the associated risk premium. A weighted average rate was developed based on long-term returns for each asset class, the plan's target asset allocation policy and the tax structure of the trusts. For the 2016 NPPC and 2016 NPBC, a 7.20% and 5.24% weighted average long-term rate of return was used, respectively. For the 2017 NPPC and 2017 NPBC, a 6.70% and 4.40% weighted average long-term rate of return assumption, respectively, will be used. Typically a 0.25% decrease in the assumed long-term rate of return would increase the NPPC by approximately \$5.4 million and the NPBC by approximately \$1.6 million. Typically a 0.25% increase in this rate would result in a decrease to expense at the same levels. The assumed return on plan assets is based on the fair market value of plan assets as of December 31, 2016.

The compensation increase assumption is generally set at a rate consistent with current and expected long-term compensation and salary policy, including inflation.

Actuarial gains and losses are amortized using a straight-line amortization method over the average remaining service period of employees, which is approximately 10 years for pension costs and approximately 4 years for other postretirement benefit costs. The qualified pension plan does not utilize the allowable corridor, while the nonqualified pension plan and OPEB plans utilize the 10% corridor. Prior service costs are amortized on a weighted average basis over approximately 1 year for pension costs and 2 years for OPEB costs. See Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 11, Employee and Agent Benefits" for further discussion.

Income Taxes

We provide for income taxes based on our estimate of the liability for taxes due. Our tax accounting represents management's best estimate of various events and transactions, such as completion of tax audits or establishment of, or changes to, a valuation allowance associated with certain deferred tax assets, which could affect our estimates and effective income tax rate in a particular quarter or annual period. Deferred tax liabilities and assets are determined based on the difference between the financial statement and tax bases of assets and liabilities using enacted tax rates expected to be in effect during the years in which the basis differences reverse. We are required to evaluate the recoverability of our deferred tax assets each quarter and establish a valuation allowance, if necessary, to reduce our deferred tax assets to an amount that is more-likely-than-not to be realizable. In determining the need for a valuation allowance, we consider many factors, including future reversals of existing taxable temporary differences, future taxable income exclusive of reversing temporary differences and carryforwards, taxable income in prior carryback years and implementation of any feasible and prudent tax planning strategies management would employ to realize the tax benefit.

U.S. federal and state deferred income taxes have not been provided on approximately \$1,088.4 million and \$1,004.6 million of accumulated but undistributed earnings from operations of foreign subsidiaries as of December 31, 2016 and 2015, respectively. We do not record U.S. federal and state deferred income taxes on foreign earnings not expected to be distributed to the U.S. We apply an exception to the general rule, which under U.S. GAAP otherwise requires the recording of U.S. deferred income taxes on the anticipated repatriation of foreign earnings as recognized for financial reporting purposes. The exception permits us to not record a U.S. deferred income tax liability on foreign earnings we expect to be indefinitely reinvested in our foreign operations. The related deferred income taxes will be recorded in the period it becomes apparent we can no longer positively assert some or all the undistributed earnings will remain invested into the foreseeable future.

Inherent in the provision for income taxes are estimates and our expectations regarding the deductibility of certain items, the timing of income and expense recognition, future performance and the current or future realization of operating losses, capital losses and certain tax credits. We regularly evaluate the capital needs of our domestic and foreign operations considering all available information, including operating and capital plans, regulatory capital requirements, parent company financing and cash flow needs, as well as tax laws applicable to our domestic and foreign subsidiaries. In the event these estimates differ from our prior estimates due to the receipt of new information, we may be required to

significantly change the provision for income taxes recorded in the consolidated financial statements. Any such change

Table of Contents

could significantly affect the amounts reported in the consolidated financial statements in the year these estimates change. A significant decline in value of financial assets could lead to establishment of a valuation allowance on deferred tax assets having an adverse effect on current and future results. In management's judgment, total deferred income tax assets are more-likely-than-not to be realized.

In addition, the amount of income taxes paid is subject to audits in the U.S. as well as various state and foreign jurisdictions. Tax benefits are recognized for book purposes when the more-likely-than-not threshold is met with regard to the validity of an uncertain tax position. Once this threshold is met, for each uncertain tax position we recognize in earnings the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement with the Internal Revenue Service or other income taxing authorities for audits ongoing or not yet commenced.

We had \$242.9 million and \$229.9 million of current income tax receivables associated with outstanding audit issues reported as other assets in our consolidated statements of financial position as of December 31, 2016 and 2015, respectively. We believe there are adequate defenses against, or sufficient provisions for, the contested issues, but final resolution of contested issues could take several years while legal remedies are pursued. Consequently, we do not anticipate the ultimate resolution of audits ongoing or not yet commenced to have a material impact on our net income.

Transactions Affecting Comparability of Results of Operations

Acquisitions

We entered into acquisition agreements for the following businesses.

AXA Hong Kong Pension Business. On September 1, 2015, we finalized the purchase of AXA's MPF and ORSO pension business in Hong Kong for \$335.5 million. As part of the transaction, we entered into an exclusive 15-year distribution agreement with AXA to provide co-branded pension products through AXA's extensive agency network in Hong Kong. We more than doubled the AUM in our Hong Kong pension business to \$5.9 billion. AXA's MPF and ORSO pension business is consolidated within our Principal International segment.

Columbus Circle Investors. On September 30, 2014, we acquired an additional 24.65% interest in Columbus Circle Investors from the minority shareholder partners and contracted to purchase the remaining interest from the minority shareholder partners in two installments. The first installment for an additional 2.5% interest was paid on April 28, 2015. The second installment for the remaining 2.5% interest was paid on April 28, 2016. We now own 100% of Columbus Circle Investors, which is consolidated within our Principal Global Investors segment.

Other

Actuarial Assumption Updates. We periodically review and update actuarial assumptions that are inputs to the models for DAC and other actuarial balances and make model refinements as necessary. During the third quarter of 2016, assumption updates and model refinements were made resulting in an unlocking of DAC and other actuarial balances that decreased total company net income by \$68.8 million for the year ended December 31, 2016. The pre-tax operating earnings impact was \$(33.2) million for our U.S. Insurance Solutions segment, \$(31.6) million for our Retirement and Income Solutions segment and \$(8.9) million for our Principal International segment for the year ended December 31, 2016.

During the third quarter of 2015, assumption updates and model refinements were made resulting in an unlocking of DAC and other actuarial balances that increased total company net income by \$26.2 million for the year ended December 31, 2015. The pre-tax operating earnings impact was \$76.8 million for our U.S. Insurance Solutions segment and \$(28.7) million for our Retirement and Income Solutions segment for the year ended December 31, 2015.

During the third quarter of 2014, assumption updates and model refinements were made resulting in an unlocking of DAC and other actuarial balances that increased total company net income by \$45.3 million for the year ended December 31, 2014. The pre-tax operating earnings impact was \$60.0 million for our U.S. Insurance Solutions segment and \$2.6 million for our Retirement and Income Solutions segment for the year ended December 31, 2014.

The individual life insurance business actuarial assumption updates and model refinements had the most significant impact and affected several line items within our income statement. The following table presents the increase (decrease) on the individual life insurance income statement line items for the years ended December 31, 2016, 2015 and 2014.

**For the year ended
December 31,**

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

	2016	2015	2014
	<i>(in millions)</i>		
Pre-tax operating earnings	\$ (43.2)	\$ 64.6	\$ 60.0
Fee revenues	(9.5)	(3.0)	3.1
Benefits, claims and settlement expenses	53.6	(43.5)	(131.6)
Dividends to policyholders	8.2		
Operating expenses	(28.1)	(24.1)	74.7

41

Table of Contents

Chilean Legal Entity Merger. In January 2015, we received regulatory approval and executed upon the merger of two of our Chilean legal entities. As a result of the merger, we recognized a \$105.2 million benefit in net income available to common stockholders in first quarter 2015 to reflect a change in deferred tax balances related to the merged entity.

Other Factors Affecting Comparability

Fluctuations in Foreign Currency to U.S. Dollar Exchange Rates

Fluctuations in foreign currency to U.S. dollar exchange rates for locations in which we have operations can affect reported financial results. In years when foreign currencies weaken against the U.S. dollar, translating foreign currencies into U.S. dollars results in fewer U.S. dollars to be reported. When foreign currencies strengthen, translating foreign currencies into U.S. dollars results in more U.S. dollars to be reported.

Foreign currency exchange rate fluctuations create variances in our financial statement line items. The most significant impact occurs within our Principal International segment where pre-tax operating earnings were negatively impacted \$25.3 million and \$69.3 million for the years ended December 31, 2016 and 2015, respectively, as a result of fluctuations in foreign currency to U.S. dollar exchange rates. This impact was calculated by comparing (a) the difference between current year results and prior year results to (b) the difference between current year results and prior year results translated using current year exchange rates for both periods. We use this approach to calculate the impact of exchange rates on all revenue and expense line items. For a discussion of our approaches to managing foreign currency exchange rate risk, see Item 7A. "Quantitative and Qualitative Disclosures About Market Risk Foreign Currency Risk."

Effects of Inflation

The impact of inflation has not had a material effect on our annual consolidated results of operations over the past three years. However, we may be materially affected by inflation in the future.

Variable Investment Income

Variable investment income includes certain types of investment returns such as prepayment fees and income (loss) from certain elements of our other alternative asset classes, including results of value-add real estate sales activity. Due to its unpredictable nature, variable investment income may or may not be material to our financial results for a given reporting period and may create variances when comparing different reporting periods. For additional information, see "Investments Investment Results."

Recent Regulatory Changes

On April 6, 2016, the DOL released its final fiduciary definition regulation package. The regulation broadens the definition of a fiduciary under ERISA to include persons providing investment advice to an employee benefit plan or an IRA for a fee or other compensation. The DOL also released two new prohibited transaction class exemptions and amendments to current prohibited transaction exemptions. Broker-dealers and advisors are in various stages of determining the implications of the regulations on their business models, and how they proceed could impact our business. Even with this fluid environment, our preliminary assessment of the new regulation's impact to our business and future financial results indicates the costs will not have a significant effect on our financial condition or results of operations. As the rules become applicable and are operationalized, we will assess what business impacts need to be addressed and how they affect the organization.

Recent Accounting Changes

For recent accounting changes, see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 1, Nature of Operations and Significant Accounting Policies" under the caption, "Recent Accounting Pronouncements."

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Table of Contents

Results of Operations

The following table presents summary consolidated financial information for the years indicated:

	For the year ended December 31,			Increase (decrease)	
	2016	2015	2014	2016 vs. 2015	2015 vs. 2014
	<i>(in millions)</i>				
Revenues:					
Premiums and other considerations	\$ 5,299.1	\$ 5,310.3	\$ 3,722.9	\$ (11.2)	\$ 1,587.4
Fees and other revenues	3,627.4	3,653.1	3,482.1	(25.7)	171.0
Net investment income	3,296.5	3,052.1	3,257.9	244.4	(205.8)
Net realized capital gains (losses), excluding impairment losses on available-for-sale securities	269.5	(20.9)	92.7	290.4	(113.6)
Net other-than-temporary impairment (losses) recoveries on available-for-sale securities	(98.8)	(0.8)	23.8	(98.0)	(24.6)
Other-than-temporary impairment losses on fixed maturities available-for-sale reclassified to (from) other comprehensive income	0.4	(29.4)	(101.8)	29.8	72.4
Net impairment losses on available-for-sale securities	(98.4)	(30.2)	(78.0)	(68.2)	47.8
Net realized capital gains (losses)	171.1	(51.1)	14.7	222.2	(65.8)
Total revenues	12,394.1	11,964.4	10,477.6	429.7	1,486.8
Expenses:					
Benefits, claims and settlement expenses	6,913.2	6,697.7	5,231.0	215.5	1,466.7
Dividends to policyholders	156.6	163.5	177.4	(6.9)	(13.9)
Operating expenses	3,732.6	3,672.4	3,574.3	60.2	98.1
Total expenses	10,802.4	10,533.6	8,982.7	268.8	1,550.9
Income before income taxes	1,591.7	1,430.8	1,494.9	160.9	(64.1)
Income taxes	229.9	177.6	318.5	52.3	(140.9)
Net income	1,361.8	1,253.2	1,176.4	108.6	76.8
Net income attributable to noncontrolling interest	45.3	19.2	32.3	26.1	(13.1)
Net income attributable to Principal Financial Group, Inc.	1,316.5	1,234.0	1,144.1	82.5	89.9
Less:					
Preferred stock dividends		16.5	33.0	(16.5)	(16.5)
Excess of redemption value over carrying value of preferred shares redeemed		8.2		(8.2)	8.2
Net income available to common stockholders	\$ 1,316.5	\$ 1,209.3	\$ 1,111.1	\$ 107.2	\$ 98.2

Year Ended December 31, 2016 Compared to Year Ended December 31, 2015

Net Income Available to Common Stockholders

Net income available to common stockholders increased \$158.4 million as a result of after-tax net realized capital gains in 2016 as compared to after-tax net realized capital losses in 2015 primarily related to derivatives not designated as hedging instruments. In addition, net income available to common stockholders increased due to a \$128.8 million increase in after-tax net investment income attributable to higher average invested assets in our U.S. operations and a \$45.6 million increase in after-tax variable investment income. These increases were partially offset by a \$105.2 million benefit from a change in deferred tax balances related to the merger of two of our Chilean legal entities in 2015 and a \$95.0 million after-tax decrease related to actuarial assumption updates and model refinements that had an unfavorable impact on net income in 2016 as compared to a favorable impact in 2015. Additionally, these increases were partially offset by a \$49.1 million decrease attributable to lower investment yields on invested assets in our U.S. operations.

Total Revenues

Premiums decreased \$150.5 million for the Retirement and Income Solutions segment primarily due to lower sales of individual annuities with life contingencies. Premiums increased \$117.7 million for the U.S. Insurance Solutions segment primarily resulting from growth in the business. Premiums increased for the Principal International segment primarily in Latin America due to \$28.0 million higher sales of single premium annuities with life contingencies in Chile partially offset by \$6.3 million weakening of the Chilean peso against the U.S. dollar.

Fees and other revenues decreased \$75.8 million for the Corporate segment primarily due to income on a tax indemnification recognized in 2015. Fees and other revenues decreased \$35.5 million for the Retirement and Income Solutions segment primarily due to challenging equity market performance. Fees and other revenues increased \$42.3 million for the U.S. Insurance Solutions segment primarily resulting from growth in the business. Fees and other revenues increased \$37.7 million for the Principal Global Investors segment primarily due to increased AUM.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Table of Contents

Net investment income increased primarily due to \$198.1 million attributable to higher average invested assets in our U.S. operations and a \$70.1 million increase in variable investment income. These increases were partially offset by a \$75.6 million decrease attributable to lower investment yields on invested assets in our U.S. operations. For additional information, see "Investments Investment Results Net Investment Income."

Net realized capital gains (losses) can be volatile due to other-than-temporary impairments of invested assets, mark-to-market adjustments of certain invested assets and our decision to sell invested assets. We had net realized capital gains in 2016 as compared to net realized capital losses in 2015 primarily due to change in derivatives not designated as hedging instruments. For additional information, see "Investments Investment Results Net Realized Capital Gains (Losses)."

Total Expenses

Benefits, claims and settlement expenses increased for the U.S. Insurance Solutions segment primarily due to a \$117.3 million increase resulting from an unfavorable unlocking impact associated with actuarial assumption updates and model refinements in 2016 as compared to a favorable unlocking impact in 2015. Additionally, benefits, claims and settlement expenses increased \$90.1 million for the U.S. Insurance Solutions segment resulting from growth in our specialty benefits insurance business.

Operating expenses increased for the Corporate segment primarily due to \$86.4 million of one-time costs incurred to extinguish long-term debt in 2016 and \$10.0 million higher interest expense in 2016 associated with the issuance of long-term debt in 2015. These increases were partially offset by a \$42.8 million negative impact of a court ruling on some uncertain tax positions in 2015.

Income Taxes

The effective income tax rates were 14% and 12% for the years ended December 31, 2016 and 2015, respectively. See Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 10, Income Taxes Effective Income Tax Rate" for further discussion.

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

Net Income Available to Common Stockholders

Net income available to common stockholders increased primarily due to a \$105.2 million change in deferred tax balances related to the merger of two of our Chilean legal entities and a \$44.2 million impairment of Liongate, an equity method investment, in 2014. These increases were partially offset by a \$35.9 million after-tax decrease in gains on sales of real estate investments and joint venture real estate, net losses in 2015 compared to net gains in 2014 resulting from a \$17.6 million after-tax decrease in equity securities, trading and a \$14.2 million after-tax write-off of unamortized book value on corporate owned real estate in 2015.

Total Revenues

Premiums increased \$1,426.9 million for the Retirement and Income Solutions segment primarily due to higher sales of single premium group and individual annuities with life contingencies. The single premium group annuity product, which is typically used to fund defined benefit plan terminations, can generate large premiums from very few customers and therefore premiums tend to vary from period to period.

Fee revenues increased \$88.5 million for the Principal Global Investors segment primarily due to higher management fee revenue as a result of increased AUM. Fee revenues increased \$52.9 million for the Corporate segment primarily due to income on a tax indemnification.

Net investment income decreased primarily due to a \$97.5 million decrease attributable to lower investment yields on invested assets and cash in our U.S. operations. In addition, net investment income decreased \$85.6 million due to the weakening of the Latin American currencies against the U.S. dollar. For additional information, see "Investments Investment Results Net Investment Income."

Net realized capital gains (losses) can be volatile due to other-than-temporary impairments of invested assets, mark-to-market adjustments of certain invested assets and our decision to sell invested assets. We had net realized capital losses in 2015 as compared to net realized capital gains in 2014 primarily due to a \$55.2 million decrease in gains on sales of real estate investments and joint venture real estate, net losses in 2015 compared to net gains in 2014 resulting from a \$25.1 million decrease in equity securities, trading, a \$21.9 million write-off of unamortized book value on corporate owned real estate in 2015 and \$11.4 million of increased losses on derivatives not designated as hedging instruments. This was partially offset by a \$44.2 million impairment of Liongate, an equity method investment, in 2014. For additional information, see "Investments Investment Results Net Realized Capital Gains (Losses)."

Table of Contents**Total Expenses**

Benefits, claims and settlement expenses increased \$1,391.5 million for the Retirement and Income Solutions segment primarily due to an increase in reserves resulting from higher sales of single premium group and individual annuities with life contingencies.

Operating expenses increased for the Retirement and Income Solutions segment primarily due to a \$30.6 million increase resulting from unfavorable DAC unlocking associated with the review and update of our actuarial assumptions in 2015 and a \$26.5 million increase in staff related costs including pension and OPEB. Operating expenses increased \$48.1 million for the Principal Global Investors segment primarily due to expenses supporting growth in the business.

Income Taxes

The effective income tax rates were 12% and 21% for the years ended December 31, 2015 and 2014, respectively. The effective income tax rate decreased to 12% from 21% for the years ended December 31, 2015 and 2014, respectively, primarily due to a 7% change in deferred tax balances related to the merger of two of our Chilean legal entities and a 4% change in net deferred tax liabilities resulting from the third quarter 2014 enactment of tax legislation in Chile not replicated in 2015, partially offset by the 3% negative impact of a court ruling on some uncertain tax positions. See Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 10, Income Taxes Effective Income Tax Rate" for further discussion.

Results of Operations by Segment

For results of operations by segment see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 16, Segment Information."

Retirement and Income Solutions Segment*Retirement and Income Solutions Trends*

Several key factors impact revenue and earnings growth in the Retirement and Income Solutions segment. These factors include: the ability of our distribution channels to generate new sales and retain existing business; pricing decisions that take account of competitive conditions, persistency, investment returns, mortality trends, and operating expense levels; investment management performance; equity market returns and interest rate changes. Profitability ultimately depends on our ability to price products and invest assets at a level that enables us to earn a margin over the cost of providing benefits and the expense of acquiring and administering those products.

Net revenue is a key metric used to understand Retirement and Income Solutions earnings growth. Net revenue is defined as operating revenues less benefits, claims and settlement expenses less dividends to policyholders. Net revenue from Retirement and Income Solutions Fee is primarily fee based and is impacted by changes in the equity markets. Net revenue from Retirement and Income Solutions Spread is driven by the difference between investment income earned on the underlying general account assets and the interest rate credited to the contracts.

The following table presents the Retirement and Income Solutions segment net revenue for the years indicated:

		For the year ended			Increase (decrease)	
		2016	2015	2014	2016 vs. 2015	2015 vs. 2014
		December 31,				
		<i>(in millions)</i>				
Retirement and Income Solutions	Fee	\$ 1,511.1	\$ 1,573.5	\$ 1,563.7	\$ (62.4)	\$ 9.8
Retirement and Income Solutions	Spread	491.5	437.6	470.2	53.9	(32.6)
Total Retirement and Income Solutions		\$ 2,002.6	\$ 2,011.1	\$ 2,033.9	\$ (8.5)	\$ (22.8)

Table of Contents**Retirement and Income Solutions Segment Summary Financial Data**

The following table presents certain summary financial data relating to the Retirement and Income Solutions segment for the years indicated:

	For the year ended December 31,			Increase (decrease)	
	2016	2015	2014	2016 vs. 2015	2015 vs. 2014
	<i>(in millions)</i>				
Operating revenues:					
Premiums and other considerations	\$ 2,860.9	\$ 3,011.4	\$ 1,584.5	\$ (150.5)	\$ 1,426.9
Fees and other revenues	1,304.7	1,338.8	1,309.7	(34.1)	29.1
Net investment income	1,985.1	1,816.7	1,905.5	168.4	(88.8)
Total operating revenues	6,150.7	6,166.9	4,799.7	(16.2)	1,367.2
Expenses:					
Benefits, claims and settlement expenses, including dividends to policyholders	4,148.1	4,155.8	2,765.8	(7.7)	1,390.0
Operating expenses	1,208.1	1,271.0	1,182.7	(62.9)	88.3
Total expenses	5,356.2	5,426.8	3,948.5	(70.6)	1,478.3
Pre-tax operating earnings	\$ 794.5	\$ 740.1	\$ 851.2	\$ 54.4	\$ (111.1)

Year Ended December 31, 2016 Compared to Year Ended December 31, 2015**Pre-Tax Operating Earnings**

Pre-tax operating earnings increased in our Spread business primarily due to a \$31.6 million increase due to higher mean account values stemming from growth in the business and a \$23.5 million increase in variable investment income. In addition, the segment continues to diligently manage expenses and focus on achieving operational efficiencies where possible.

Net Revenue

Net revenue decreased in our Fee business primarily due to a \$41.0 million unfavorable impact associated with actuarial assumption updates and model refinements in 2016 and \$39.0 million due to challenging equity market performance, partially offset by an \$11.5 million increase in variable investment income. Net revenue increased in our Spread business primarily due to a \$31.6 million increase due to higher mean account values stemming from growth in the business and a \$23.5 million increase in variable investment income.

Operating Expenses

Operating expenses decreased in our Fee business primarily due to \$51.3 million lower DAC unlocking amortization expense resulting from actuarial assumption updates and model refinements in 2016 compared to 2015 and a \$16.8 million third quarter 2015 DAC amortization expense true-up stemming from a decline in market performance. In addition, the segment continues to diligently manage expenses and focus on achieving operational efficiencies where possible.

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014**Pre-Tax Operating Earnings**

Pre-tax operating earnings decreased \$85.0 million in our Fee business primarily due to a \$36.5 million unfavorable DAC unlocking associated with the review and update of our actuarial assumptions in 2015 and a \$20.2 million increase in staff related costs including pension and OPEB. Pre-tax operating earnings decreased \$26.1 million in our Spread business primarily due to a decrease in variable investment income resulting from a decline in loan prepayment activity and associated fees.

Net Revenue

Net revenue decreased \$32.6 million in our Spread business primarily due to a decrease in variable investment income resulting from a decline in loan prepayment activity and associated fees. Net revenue increased \$9.8 million in our Fee business primarily due to higher fees stemming from growth in the business and an increase in average account values.

Table of Contents**Operating Expenses**

Operating expenses increased \$94.8 million in our Fee business primarily due to a \$36.5 million unfavorable DAC unlocking associated with the review and update of our actuarial assumptions in 2015 and a \$20.2 million increase in staff related costs, including pension and OPEB.

Principal Global Investors Segment***Principal Global Investors Trends***

Our overall AUM increased \$29.7 billion in 2016 due to continued strong portfolio management as well as positive net cash flows resulting from strong distribution results. We also continue to expand our global presence and experience success in winning institutional asset management mandates and other deposits.

The following table provides a summary of Principal Global Investors' affiliated, institutional and retail AUM as of the years indicated:

As of	Affiliated AUM	Institutional AUM	Retail AUM	Total AUM
	<i>(in billions)</i>			
December 31, 2016	\$ 179.2	\$ 130.6	\$ 80.7	\$ 390.5
December 31, 2015	164.0	122.0	74.8	360.8
December 31, 2014	157.5	114.0	71.2	342.7

Principal Global Investors Segment Summary Financial Data

AUM is a key indicator of earnings growth for the Principal Global Investors segment, as AUM is the base by which we generate revenues. Net cash flow and market performance are the two main drivers of AUM growth. Net cash flow reflects our ability to attract and retain client deposits. Market performance reflects equity, fixed income, real estate and other alternative investment market performance. The percentage growth in revenues of the segment will generally track with the percentage growth in AUM. This trend may vary due to changes in business and/or product mix.

The following table presents the AUM rollforward for assets managed by Principal Global Investors for the periods indicated:

	For the year ended December 31,		
	2016	2015	2014
	<i>(in billions)</i>		
AUM, beginning of period	\$ 360.8	\$ 342.7	\$ 318.8
Net cash flow (1)	9.0	15.5	6.4
Investment performance (2)	21.7	0.6	19.9
Operations acquired (3)		1.9	
Other (4)	(1.0)	0.1	(2.4)
AUM, end of period	\$ 390.5	\$ 360.8	\$ 342.7

-
- (1) Positive net cash flows are primarily due to continued strong distribution results.
- (2) Variations in investment performance are primarily the result of fluctuations in market performance over time.
- (3) Reflects assets managed by Principal Global Investors resulting from the acquisition of AXA's MPF and ORSO pension business in September 2015.
- (4) Primarily reflects the transfer of assets between managers and the effect of exchange rates.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Table of Contents

The following table presents certain summary financial data relating to the Principal Global Investors segment for the years indicated:

	For the year ended December 31,			Increase (decrease)	
	2016	2015	2014	2016 vs. 2015	2015 vs. 2014
	<i>(in millions)</i>				
Operating revenues:					
Fees and other revenues	\$ 1,373.1	\$ 1,335.4	\$ 1,246.9	\$ 37.7	\$ 88.5
Net investment income	14.0	8.1	10.5	5.9	(2.4)
Total operating revenues	1,387.1	1,343.5	1,257.4	43.6	86.1
Total expenses	937.4	950.6	894.9	(13.2)	55.7
Pre-tax operating earnings attributable to noncontrolling interest	5.9	4.4	12.4	1.5	(8.0)
Pre-tax operating earnings	\$ 443.8	\$ 388.5	\$ 350.1	\$ 55.3	\$ 38.4

Year Ended December 31, 2016 Compared to Year Ended December 31, 2015

Pre-Tax Operating Earnings

Pre-tax operating earnings increased due to a \$31.0 million increase in management fee revenue as a result of increased AUM and a \$19.1 million increase in performance fee revenue largely in our real estate business.

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

Pre-Tax Operating Earnings

Pre-tax operating earnings increased due to \$91.0 million higher management fee revenue as a result of increased AUM, approximately \$10.0 million from performance fees primarily realized in our real estate business and \$8.5 million from our increased ownership in Columbus Circle Investors. These increases were partially offset by \$70.0 million increased expenses to support our business.

Principal International Segment

Principal International Trends

Our Principal International businesses focus on locations with growing middle classes, favorable demographics and increasing long-term savings, ideally with voluntary or mandatory pension markets. With variations depending upon the specific location, we have targeted these markets for sales of retirement and related products and services, including mutual funds, asset management, income annuities and life insurance accumulation products to businesses and individuals.

We have pursued our international strategy through a combination of acquisitions, start-up operations and joint ventures, which require infusions of capital consistent with our strategy of long-term growth and profitability.

Principal International Segment Summary Financial Data

AUM is generally a key indicator of earnings growth for the segment, as AUM is the base by which we can generate local currency profits. The Cuprum business in Chile differs in that the majority of fees are collected with each deposit by the mandatory retirement customers, based on a capped salary level, as opposed to asset levels. Net customer cash flow and market performance are the two main drivers of local currency AUM growth. Net customer cash flow reflects our ability to attract and retain client deposits. Market performance reflects the investment returns on our underlying AUM. Our financial results are also impacted by fluctuations of the foreign currency to U.S. dollar exchange rates for the locations in which we have business. AUM of our foreign subsidiaries is translated into U.S. dollar equivalents at the end of the reporting period using the spot foreign exchange rates. Revenue and expenses for our foreign subsidiaries are translated into U.S. dollar equivalents at the

average foreign exchange rates for the reporting period.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Table of Contents

The following table presents the Principal International segment AUM rollforward for the years indicated:

	For the year ended December 31,		
	2016	2015	2014
	<i>(in billions)</i>		
AUM, beginning of period	\$ 109.9	\$ 114.6	\$ 104.5

Pre-tax operating earnings (losses) attributable to noncontrolling interest	2.3	(3.3)	2.5	5.6	(5.8)
Pre-tax operating earnings	\$ 288.1	\$ 271.3	\$ 352.7	\$ 16.8	\$ (81.4)

Year Ended December 31, 2016 Compared to Year Ended December 31, 2015

Pre-Tax Operating Earnings

Pre-tax operating earnings increased in Asia due to \$22.4 million from higher earnings in our equity method investment in China. Pre-tax operating earnings decreased in Latin America due to \$23.8 million from weakening of currencies against the U.S. dollar. This decrease was partially offset by \$22.0 million higher earnings in our equity method investment in Brazil.

Net Revenue

Net revenue increased in Asia due to \$24.6 million from higher revenues in Hong Kong following the AXA acquisition in September 2015 and \$22.4 million higher earnings in our equity method investment in China. Net revenue in Latin America decreased due to \$36.4 million weakening of currencies against the U.S. dollar and a \$7.4 million unfavorable 2016 impact associated with assumption updates and model refinements in Mexico. These decreases were partially offset by \$22.0 million higher earnings in our equity method investment in Brazil.

Table of Contents

Operating Expenses

Operating expenses increased in Asia due to \$22.0 million growth in Hong Kong following the AXA acquisition in September 2015. Operating expenses decreased in Latin America due to \$23.0 million intangible asset impairments in our mutual fund company in Brazil during third quarter 2015.

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

Pre-Tax Operating Earnings

Pre-tax operating earnings decreased in Latin America primarily due to \$67.7 million weakening of the currencies against the U.S. dollar, \$19.9 million due to unfavorable relative market changes on our required regulatory investment in the pension funds of our Chilean pension company and \$18.5 million from the intangible asset impairments in our mutual fund company in Brazil in third quarter 2015. These decreases were partially offset by \$40.2 million higher earnings in our equity method investment in Brazil. Pre-tax operating earnings increased in Asia due to \$14.2 million higher earnings in our equity method investment in China.

Net Revenue

Net revenue decreased in Latin America due to \$119.6 million weakening of currencies against the U.S. dollar and \$20.9 million unfavorable relative market performance on our required regulatory investments in the pension funds of our Chilean pension company. These decreases were partially offset by \$40.2 million higher earnings in our equity method investment in Brazil. Net revenue increased in Asia due to \$15.7 million from higher revenues in Hong Kong following the AXA acquisition in September 2015 and \$14.2 million higher earnings in our equity method investment in China.

Operating Expenses

Operating expenses increased in Latin America due to the \$23.0 million intangible asset impairments in our mutual fund company in Brazil in third quarter 2015.

U.S. Insurance Solutions Segment

Several key drivers impact earnings growth in the U.S. Insurance Solutions segment. The ability of our distribution channels to generate new sales and retain existing business drives growth in our premium and fees. Our earnings growth also depends on our ability to price our products at a level that enables us to earn a margin over the cost of providing benefits and the expense of acquiring and administering those products. Factors impacting pricing decisions include competitive conditions, economic trends, retention, our ability to assess and manage trends in mortality and morbidity and our ability to manage operating expenses.

U.S. Insurance Solutions Insurance Trends

Premium and fees are a key metric for growth in the U.S. Insurance Solutions segment. We receive premiums on our specialty benefits insurance products as well as our traditional life insurance products. Fees are generated from our specialty benefits fee-for-service products as well as our universal life and variable universal life insurance products.

Premium and fees are influenced by economic, industry and regulatory trends. In our specialty benefits insurance business, premium and fees growth is a result of strong retention and sales, as well as continued in-group growth. In our individual life insurance business, we have intentionally decreased sales of certain interest sensitive products in favor of more traditional products due to the low interest rate environment.

The following table presents the U.S. Insurance Solutions segment premium and fees for the years indicated:

	For the year ended			Increase (decrease)	
	December 31,			2016 vs. 2015	2015 vs. 2014
	2016	2015	2014		
	<i>(in millions)</i>				
Specialty benefits insurance	\$ 1,862.3	\$ 1,732.6	\$ 1,591.4	\$ 129.7	\$ 141.2
Individual life insurance	996.1	966.1	935.7	30.0	30.4

Total operating revenues	3,637.3	3,440.6	3,262.6	196.7	178.0
Expenses:					
Benefits, claims and settlement expenses (1)	2,220.5	1,964.1	1,842.9	256.4	121.2
Dividends to policyholders (1)	156.2	163.2	176.2	(7.0)	(13.0)
Operating expenses (1)	899.4	883.8	899.4	15.6	(15.6)
Total expenses	3,276.1	3,011.1	2,918.5	265.0	92.6
Pre-tax operating earnings (1)	\$ 361.2	\$ 429.5	\$ 344.1	\$ (68.3)	\$ 85.4

(1) For further details related to the impact associated with actuarial assumption updates and model refinements on results for 2016, 2015 and 2014, see "Transactions Affecting Comparability of Results of Operations - Other - Actuarial Assumption Updates."

Year Ended December 31, 2016 Compared to Year Ended December 31, 2015**Pre-Tax Operating Earnings**

Pre-tax operating earnings decreased \$98.8 million in our individual life insurance business primarily due to an unfavorable unlocking associated with actuarial assumption updates and model refinements in 2016 as compared to a favorable unlocking in 2015. Pre-tax operating earnings increased in our specialty benefits insurance business primarily due to \$16.2 million resulting from growth in the business and \$13.6 million related to expense management.

Operating Revenues

Premium and fees increased \$129.7 million in our specialty benefits insurance business primarily resulting from growth in the business.

Total Expenses

Benefits, claims and settlement expenses increased in our individual life insurance business primarily due to a \$97.1 million increase resulting from unfavorable unlocking impacts associated with actuarial assumption updates and model refinements in 2016 as compared to favorable unlocking impacts in 2015 and a \$28.1 million increase in claims net of reinsurance, largely due to growth in the business. Benefits, claims and settlement expenses increased \$98.9 million in our specialty benefits insurance business primarily resulting from growth in the business.

Operating expenses increased in our specialty benefits insurance business primarily due to a \$32.6 million increase resulting from growth in the business, partially offset by a \$12.1 million favorable impact from actuarial assumption updates and model refinements in 2016 and a \$6.7 million decrease related to a reimbursement of a reinsurance expense allowance in 2015.

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

Pre-Tax Operating Earnings

Pre-tax operating earnings increased in our individual life insurance business primarily due to \$28.7 million from improved mortality, \$4.6 million more favorable impact from unlocking associated with assumption updates and model refinements in 2015 than in 2014 and \$3.4 million related to improved interest margins. Pre-tax operating earnings increased in our specialty benefits insurance business primarily due to \$27.6 million more favorable claim experience, \$14.1 million resulting from growth in the business and a \$12.2 million favorable impact from assumption updates and model refinements. These increases were partially offset by \$12.7 million higher sales related expenses and staff related costs, including pension and OPEB.

Operating Revenues

Premium and fees increased \$141.2 million in our specialty benefits insurance business primarily resulting from growth in the business.

Table of Contents**Total Expenses**

Benefits, claims and settlement expenses increased \$81.7 million in our individual life insurance business primarily due to less favorable impact from unlocking associated with assumption updates and model refinements in 2015. Benefits, claims and settlement expenses increased in our specialty benefits insurance business primarily due to an \$85.1 million increase resulting from growth in the business, which was partially offset \$27.6 million by more favorable claim experience and an \$18.0 million favorable impact from assumption updates and model refinements.

Operating expenses decreased in our individual life insurance business primarily due to a \$98.8 million more favorable impact from unlocking associated with assumption updates and model refinements in 2015 than in 2014, which was partially offset by an increase of \$22.9 million resulting from growth in the business. Operating expenses increased in our specialty benefits insurance business primarily due to a \$37.9 million increase resulting from growth in the business and \$12.7 million higher sales related expenses and staff related costs, including pension and OPEB.

Corporate Segment*Corporate Segment Summary Financial Data*

The following table presents certain summary financial data relating to the Corporate segment for the years indicated:

	For the year ended December 31,			Increase (decrease)	
	2016	2015	2014	2016 vs. 2015	2015 vs. 2014
	<i>(in millions)</i>				
Total operating revenues	\$ (46.3)	\$ (50.5)	\$ (40.3)	\$ 4.2	\$ (10.2)
Total expenses	150.1	134.7	117.2	15.4	17.5
Pre-tax operating earnings attributable to noncontrolling interest	22.5	7.1	17.5	15.4	(10.4)
Pre-tax operating losses	\$ (218.9)	\$ (192.3)	\$ (175.0)	\$ (26.6)	\$ (17.3)

*Year Ended December 31, 2016 Compared to Year Ended December 31, 2015***Pre-Tax Operating Losses**

Pre-tax operating losses increased primarily due to an increase in costs associated with financing activities.

*Year Ended December 31, 2015 Compared to Year Ended December 31, 2014***Pre-Tax Operating Losses**

Pre-tax operating losses increased primarily due to higher interest expense associated with debt issuances that occurred in the second quarter of 2015.

Table of Contents**Liquidity and Capital Resources**

Liquidity and capital resources represent the overall strength of a company and its ability to generate strong cash flows, borrow funds at a competitive rate and raise new capital to meet operating and growth needs. Our legal entity structure has an impact on our ability to meet cash flow needs as an organization. Following is a simplified organizational structure.

Liquidity

Our liquidity requirements have been and will continue to be met by funds from consolidated operations as well as the issuance of commercial paper, common stock, debt or other capital securities and borrowings from credit facilities. We believe the cash flows from these sources are sufficient to satisfy the current liquidity requirements of our operations, including reasonably foreseeable contingencies.

We maintain a level of cash and securities which, combined with expected cash inflows from investments and operations, is believed to be adequate to meet anticipated short-term and long-term payment obligations. We will continue our prudent capital management practice of regularly exploring options available to us to maximize capital flexibility, including accessing the capital markets and careful attention to and management of expenses.

We perform rigorous liquidity stress testing to ensure our asset portfolio includes sufficient high quality liquid assets that could be utilized to bolster our liquidity position under increasingly stressed market conditions. These assets could be utilized as collateral for secured borrowing transactions with various third parties or by selling the securities in the open market if needed.

We also manage liquidity risk by limiting the sales of liabilities with features such as puts or other options that can be exercised against the company at inopportune times. For example, as of December 31, 2016, approximately \$9.5 billion, or 99%, of our institutional guaranteed investment contracts and funding agreements cannot be redeemed by contractholders prior to maturity. Our individual annuity liabilities also contain surrender charges and other provisions limiting early surrenders.

The following table summarizes the withdrawal characteristics of our domestic general account investment contracts as of December 31, 2016.

	Contractholder funds	Percentage
	<i>(in millions)</i>	
Not subject to discretionary withdrawal	\$ 10,499.3	34.6%
Subject to discretionary withdrawal with adjustments:		
Specified surrender charges	6,950.3	22.9
Market value adjustments	6,188.3	20.4
Subject to discretionary withdrawal without adjustments	6,724.9	22.1
Total domestic investment contracts	\$ 30,362.7	100.0%

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Universal life insurance and certain traditional life insurance policies are also subject to discretionary withdrawals by policyholders. However, life insurance policies tend to be less susceptible to withdrawal than our investment contracts because policyholders may be subject to a new underwriting process in order to obtain a new life insurance policy. In addition, our life insurance liabilities include surrender charges to discourage early surrenders.

As of both December 31, 2016 and December 31, 2015, we had short-term credit facilities with various financial institutions in an aggregate amount of \$1,005.0 million. As of December 31, 2016 and December 31, 2015, we had \$51.4 million and \$181.1 million, respectively, of outstanding borrowings, with no assets pledged as support as of December 31, 2016. During the first quarter of 2016, we extended or renewed \$869.0 million of our revolving credit facilities. The facilities and their new maturity dates include a \$400.0 million 5-year facility with PFG, PFS and Principal Life as co-borrowers, of which \$20.0 million matures March 2020 and \$380.0 million matures March 2021, a \$300.0 million 364-day facility with Principal Life as borrower that matures March 2017 and a \$200.0 million 5-year credit

Table of Contents

facility, with PFG, PFS, Principal Life and Principal Financial Services V (UK) LTD as co-borrowers, of which \$11.0 million matures March 2020 and \$189.0 million matures March 2021. The revolving credit facilities are committed and provide 100% back-stop support for our commercial paper program. The \$400.0 million facility is supported by sixteen banks through March 2020, reduced to \$380.0 million supported by fifteen banks thereafter; the \$300.0 million facility is supported by fifteen banks and the \$200.0 million facility is supported by fifteen banks through March 2020, reduced to \$189.0 million supported by fourteen banks thereafter. Most of the banks have other relationships with us. In addition to the revolving credit facilities, Principal International Chile has the capacity to access up to \$60.0 million in unsecured lines of credit offered by Chilean financial institutions and Principal Life has a \$45.0 million unsecured line of credit. Due to the financial strength and the strong relationships we have with these providers, we are comfortable we have very low risk the financial institutions would be unable or unwilling to fund these facilities.

The Holding Companies: Principal Financial Group, Inc. and Principal Financial Services, Inc. The principal sources of funds available to our parent holding company, PFG, to meet its obligations, including the payments of dividends on common stock, debt service and the repurchase of stock, are dividends from subsidiaries as well as its ability to borrow funds at competitive rates and raise capital to meet operating and growth needs. The declaration and payment of common stock dividends by us is subject to the discretion of our Board of Directors and will depend on our overall financial condition, results of operations, capital levels, cash requirements, future prospects, receipt of dividends from Principal Life (as described below), risk management considerations and other factors deemed relevant by the Board. No significant restrictions limit the payment of dividends by PFG, except those generally applicable to corporations incorporated in Delaware. Dividends from Principal Life, our primary subsidiary, are limited by Iowa law.

Under Iowa law, Principal Life may pay dividends only from the earned surplus arising from its business and must receive the prior approval of the Insurance Commissioner of the State of Iowa ("the Commissioner") to pay stockholder dividends or make any other distribution if such distributions would exceed certain statutory limitations. Iowa law gives the Commissioner discretion to disapprove requests for distributions in excess of these limits. Extraordinary dividends include those made within the preceding twelve months that exceed the greater of (i) 10% of Principal Life's statutory policyholder surplus as of the previous year-end or (ii) the statutory net gain from operations from the previous calendar year. Based on statutory results for the year ended December 31, 2016, the dividend limitation for Principal Life is approximately \$1,143.3 million in 2017.

In 2016, total stockholder dividends paid by Principal Life to its parent were \$1,175.0 million, of which \$650.0 million was extraordinary and approved by the Commissioner. As of December 31, 2016, we had \$1,309.8 million of cash and liquid assets held in our holding companies and other subsidiaries, which is available for corporate purposes. Corporate balances held in foreign holding companies meet the indefinite reinvestment exception (see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 10, Income Taxes") such that deferred income taxes are not provided as the accumulated earnings would be used offshore and not otherwise repatriated to the U.S.

In 2015, total stockholder dividends paid by Principal Life to its parent were \$504.4 million, all of which were extraordinary and approved by the Commissioner.

In 2014, total stockholder dividends paid by Principal Life to its parent were \$850.0 million, of which \$400.0 million was extraordinary and was approved by the Commissioner.

Operations. Our primary consolidated cash flow sources are premiums from insurance products, pension and annuity deposits, asset management fee revenues, administrative services fee revenues, income from investments and proceeds from the sales or maturity of investments. Cash outflows consist primarily of payment of benefits to policyholders and beneficiaries, income and other taxes, current operating expenses, payment of dividends to policyholders, payments in connection with investments acquired, payments made to acquire subsidiaries, payments relating to policy and contract surrenders, withdrawals, policy loans, interest payments and repayment of short-term debt and long-term debt. Our investment strategies are generally intended to provide adequate funds to pay benefits without forced sales of investments. For a discussion of our investment objectives and strategies, see "Investments."

Cash Flows. Activity, as reported in our consolidated statements of cash flows, provides relevant information regarding our sources and uses of cash. The following discussion of our operating, investing and financing portions of the cash flows excludes cash flows attributable to the separate accounts.

Net cash provided by operating activities was \$3,857.8 million, \$4,377.1 million and \$3,102.9 for the years ended December 31, 2016, 2015 and 2014, respectively. Our insurance business typically generates positive cash flows from operating activities, as premiums collected from our insurance products and income received from our investments exceed acquisition costs, benefits paid, redemptions and operating expenses. These positive cash flows are then invested to support the obligations of our insurance and investment products and required capital supporting these products. Our cash flows from operating activities are affected by the timing of premiums, fees and investment income received and benefits and expenses paid. The decrease in cash provided by operating activities in 2016 compared to 2015 was the result of fluctuations in

receivables and payables associated with the timing of settlements. The increase in cash provided by operating activities in 2015 compared to 2014 was primarily due to growth in the business including higher sales of single premium group annuities and individual annuities with life contingencies.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Table of Contents

Net cash used in investing activities was \$5,153.9 million, \$3,167.6 million and \$1,172.7 million for the years ended December 31, 2016, 2015 and 2014, respectively. The increase in cash used in investing activities in 2016 compared to 2015 was the result of increased purchases of available-for-sale securities primarily in the spread businesses. Cash used in investing activities in 2015 compared to 2014 increased due to higher net purchases of fixed maturity securities and the acquisition of AXA's MPF and ORSO pension business in Hong Kong in 2015.

Net cash provided by financing activities was \$1,450.9 million for the year ended December 31, 2016, compared to net cash used in financing activities of \$508.6 million and \$2,438.1 million for the years ended December 31, 2015 and 2014, respectively. The increase in cash provided by financing activities was the result of net investment contract deposits in 2016 as compared to net investment contract withdrawals in 2015 primarily due to new issuances in the investment only business in 2016. The increase was partially offset by the net redemption of long-term debt in 2016 as compared to the net issuance of long-term debt in 2015. The decrease in cash used in financing activities in 2015 compared to 2014 was the result of decreased net withdrawals of investment contracts and the issuance of long-term debt in 2015. The proceeds of the debt issuance were primarily used for the redemption of preferred stock in 2015.

Shelf Registration. On May 7, 2014, our shelf registration statement was filed with the SEC and became effective. The shelf registration replaced the shelf registration that had been in effect since May 2011. Under our current shelf registration, we have the ability to issue, in unlimited amounts, unsecured senior debt securities or subordinated debt securities; junior subordinated debt; preferred stock; common stock; warrants; depository shares; stock purchase contracts and stock purchase units of PFG; trust preferred securities of three subsidiary trusts and guarantees by PFG of these trust preferred securities. Our wholly owned subsidiary, PFS, may guarantee, fully and unconditionally or otherwise, our obligations with respect to any non-convertible securities, other than common stock, described in the shelf registration. For information on senior notes issued from our shelf registration, see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 9, Debt."

Short-Term Debt. For short-term debt information, see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 9, Debt."

Long-Term Debt. On November 10, 2016, we issued \$650.0 million of senior notes, in two tranches. The proceeds from the issuance of these notes were used to redeem our notes payable due in 2017 and 2019. On November 18 and December 5, 2016, we used available cash to purchase approximately \$94.4 million in aggregate principal amount of our senior notes due in 2036. On May 7, 2015, we issued \$400.0 million of senior notes and \$400.0 million of junior subordinated notes, which are subordinated to all our senior debt. The proceeds from these notes were used primarily to redeem our series A and series B preferred stock. For additional long-term debt information regarding these debt issuances, purchases and redemptions, and all outstanding long-term debt, see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 9, Debt."

Stockholders' Equity. On June 30, 2015, we redeemed our 3.0 million shares of series A preferred stock for \$300.0 million and our 10.0 million shares of series B preferred stock for \$250.0 million. Proceeds from the issuance of our common stock were \$37.8 million, \$76.1 million and \$77.5 million in 2016, 2015 and 2014, respectively.

The following table summarizes our return of capital to common stockholders.

	For the year ended December 31,		
	2016	2015	2014
	<i>(in millions)</i>		
Dividends to stockholders	\$ 464.9	\$ 441.0	\$ 376.6
Repurchase of common stock	277.3	300.6	222.7
Total cash returned to stockholders	\$ 742.2	\$ 741.6	\$ 599.3

Number of shares repurchased	6.7	6.0	4.7
------------------------------	-----	-----	-----

For additional stockholders' equity information, see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 13, Stockholders' Equity."

Table of Contents**Capitalization**

The following table summarizes our capital structure:

	December 31, 2016	December 31, 2015
	(\$ in millions)	
Debt:		
Short-term debt	\$ 51.4	\$ 181.1
Long-term debt	3,125.7	3,265.2
Total debt	3,177.1	3,446.3
Equity excluding AOCI	10,902.5	10,194.1
Total capitalization excluding AOCI	\$ 14,079.6	\$ 13,640.4

Debt to equity excluding AOCI	29%	34%
Debt to capitalization excluding AOCI	23%	25%

Contractual Obligations

The following table presents payments due by period for long-term contractual obligations as of December 31, 2016.

Contractual obligations (1)	Total payments	Payments due in year ending			
		2017	2018 - 2019	2020 - 2021	2022 and thereafter
	(in millions)				
Contractholder funds (2)	\$ 85,302.1	\$ 6,441.9	\$ 9,628.8	\$ 7,972.8	\$ 61,258.6
Future policy benefits and claims (3)	45,660.4	2,641.5	4,903.0	4,606.4	33,509.5
Long-term debt (4)	3,125.7				3,125.7
Certificates of deposit (5)	615.2	304.6	173.5	136.9	0.2
Other long-term liabilities (6)	2,137.9	1,664.4	158.1	138.0	177.4
Capital leases (7)	6.7	3.0	3.0	0.5	0.2
Long-term debt interest (4)	2,783.5	143.7	281.3	265.8	2,092.7
Operating leases (8)	164.4	45.2	54.7	26.9	37.6
Purchase obligations (9)	795.9	761.4	34.5		
Total contractual obligations	\$ 140,591.8	\$ 12,005.7	\$ 15,236.9	\$ 13,147.3	\$ 100,201.9

- (1) Contractual obligations exclude short-term liabilities, other policyholder funds, taxes and short-term debt as these are not long-term and/or not contractual in nature. Contractual obligations also exclude obligations under our pension and OPEB plans as we do not anticipate contributions will be needed to satisfy the minimum funding requirements of ERISA for our qualified pension plan. In addition, separate account liabilities are excluded. Separate account liabilities represent the fair market value of the assets of the funds that are separately administered by us. Generally, the separate account contract owner, rather than us, bears the investment risk of these funds. The separate account liabilities are legally segregated and are not subject to claims that arise out of any other business of ours. Net deposits, net investment income and realized and unrealized capital gains and losses on the separate accounts are not reflected in the consolidated statements of operations. The separate account obligations will be fully funded by cash flows from the separate account assets.
- (2) Contractholder funds include GICs, funding agreements, individual fixed annuities, universal life insurance and other investment contracts. See Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 8, Insurance Liabilities" for additional information.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Amounts included in the contractholder funds line item reflect estimated cash payments to be made to policyholders. The sum of the cash outflows shown for all years in the table exceeds the corresponding liability amount included in our consolidated statements of financial position as of December 31, 2016. The liability amount in our consolidated statements of financial position reflects either the account value (in the case of individual fixed annuities, universal life insurance and GICs) or the par value plus accrued interest and other adjustments (in the case of funding agreements and other investment contracts).

- (3) Amounts included in the future policy benefits and claims line item reflect estimated cash payments to be made to policyholders. The sum of the cash outflows shown for all years in the table exceeds the corresponding liability amount included in our consolidated statements of financial position as of December 31, 2016. The liability amount in our consolidated statements of financial position reflects estimated cash payments to policyholders, reductions for expected future premiums, assumptions with regard to the timing of cash payments and discounting for interest.
- (4) For long-term debt information, see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 9, Debt."
- (5) Amounts included in the certificates of deposit line item reflect estimated cash payments to be made, including expected interest payments. Certificates of deposit are reported with other liabilities on our consolidated statements of financial position.

Table of Contents

- (6) Amounts included in the other long-term liabilities line item are contractual, non-cancelable and long-term in nature. The total payments primarily relate to savings deposits as well as premium associated with purchased option contracts where payments are made over the life of the contract. This line item excludes accruals, short-term items and items not contractual in nature.
- (7) Amounts included in the capital leases line item represent future minimum lease payments due under capital leases for buildings and hardware storage equipment. For capital lease information, see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 12, Contingencies, Guarantees and Indemnifications" under the caption, "Capital Leases."
- (8) Amounts included in the operating leases line item represent payments due under various operating leases for office space, data processing equipment and office furniture and equipment. For operating lease information, see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 12, Contingencies, Guarantees and Indemnifications" under the caption, "Operating Leases."
- (9) Purchase obligations include material contracts where we have a non-cancelable commitment to purchase goods and services in addition to commitments to originate loans and purchase investments.

Pension and OPEB Plan Funding

We have defined benefit pension plans covering substantially all of our U.S. employees and certain agents. See Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 11, Employee and Agent Benefits" for a complete discussion of these plans and their effect on the consolidated financial statements.

We report the net funded status of our pension and OPEB plans in the consolidated statements of financial position. The net funded status represents the difference between the fair value of plan assets and the projected benefit obligation for pension and OPEB plans. The measurement of the net funded status can vary based upon the fluctuations in the fair value of the plan assets and the actuarial assumptions used for the plans as discussed below. The net underfunded status of the pension and OPEB obligation was \$346.6 million pre-tax and \$424.6 million pre-tax as of December 31, 2016 and 2015, respectively. Nonqualified pension plan assets are not included as part of the funding status mentioned above. The nonqualified pension plan assets are held in Rabbi trusts for the benefit of all nonqualified plan participants. The assets held in a Rabbi trust are available to satisfy the claims of general creditors only in the event of bankruptcy. Therefore, these assets are fully consolidated in our consolidated statements of financial position and are not reflected in our funded status as they do not qualify as plan assets under U.S. GAAP. The market value of assets held in these trusts was \$341.0 million and \$330.8 million as of December 31, 2016 and 2015, respectively.

Our funding policy for the qualified pension plan is to fund the plan annually in an amount at least equal to the minimum annual contributions required under ERISA and, generally, not greater than the maximum amount that can be deducted for federal income tax purposes. We do not anticipate contributions will be needed to satisfy the minimum funding requirements of ERISA for our qualified pension plan. We are unable to estimate the amount that may be contributed, but it is possible that we may fund the plans in 2017 up to \$125 million. This includes funding for both our qualified and nonqualified pension plans. We may contribute to our OPEB plans in 2017 pending further analysis.

Contractual Commitments

In connection with our banking business, we have made commitments to extend credit under home equity lines of credit, which are agreements to lend to a customer as long as there is no violation of any conditions established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. A majority of these lines of credit are expected to expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash funding requirements. We evaluate each customer's creditworthiness on a case-by-case basis. The total commitments to fund home equity loans were \$3.4 million as of December 31, 2016.

We have made commitments to provide liquidity for certain benefit plans transitioning to us from another provider. As funds from the plans become available, they will be used to pay down outstanding balances. As of December 31, 2016, the amount of unfunded commitments was \$17.0 million.

We have made commitments to fund certain limited partnerships and other funds interests in which we are not the general partner or investment manager. As of December 31, 2016, the amount of unfunded commitments was \$658.1 million. We are only required to fund additional equity under these commitments when called upon to do so by the partnership or fund; therefore, these commitments are not liabilities on our consolidated statements of financial position.

Off-Balance Sheet Arrangements

Variable Interest Entities. We have relationships with various types of special purpose entities and other entities where we have a variable interest as described in Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 3, Variable Interest Entities." We have made commitments to fund certain limited partnerships, as previously discussed in "Contractual Commitments", some of which are classified as unconsolidated variable interest entities.

Guarantees and Indemnifications. As of December 31, 2016, no significant changes to guarantees and indemnifications have occurred since December 31, 2015. For guarantee and indemnification information, see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 12, Contingencies, Guarantees and Indemnifications" under the caption, "Guarantees and Indemnifications."

Table of Contents**Financial Strength and Credit Ratings**

Our ratings are influenced by the relative ratings of our peers/competitors as well as many other factors including our operating and financial performance, capital levels, asset quality, liquidity, asset/liability management, overall portfolio mix, financial leverage (i.e., debt), risk exposures, operating leverage and other factors.

In January 2017, A.M. Best affirmed the financial strength ratings of Principal Life and PNLIC at 'A+'. The outlook remains 'stable' for all ratings. The affirmation reflects continued solid risk-adjusted capitalization, well-managed balance sheet, strong business profile and consistently favorable operating results.

In November 2016, Moody's affirmed the financial strength ratings of Principal Life and PNLIC at 'A1'. The outlook remains 'stable'. The affirmation is based on the leading, broad-based position of Principal Life in the U.S. group pension market, with earnings diversification from retail life and annuity businesses.

In October 2016, Fitch affirmed the financial strength ratings of Principal Life and PNLIC at 'AA'. The outlook remains 'stable'. The affirmation reflects PFG's strong capitalization and stable, balanced operating profitability, partially offset by above-average exposure to direct mortgages, structured mortgage securities and direct real estate investments.

In April 2016, S&P affirmed PFG's credit ratings and the financial strength ratings of Principal Life and PNLIC at 'A+'. The outlook remains 'stable' for all ratings. Principal Life's enterprise risk management rating was affirmed as 'Strong'. The rating affirmation reflects S&P's view that we are a leading competitor in the U.S. small to midsize 401(k) market, with strong asset management and insurance solution capabilities, strong competitive position supported by respected brand, diversified and sophisticated product portfolio and positive operating performance.

A.M. Best, Moody's and Fitch have changed their outlook on the U.S. life insurance sector to 'negative' from 'stable'. Continued low interest rates, an uncertain regulatory environment, exposure to asset management and international risks and low domestic growth are pressuring the sector. S&P maintains a 'stable' outlook on the U.S. life insurance sector. S&P's view is that insurers have strong levels of capital that will offset credit quality impacts from the interest rate environment. Any deterioration in capitalization will not be to a level that will impact near-term ratings.

The following table summarizes our significant financial strength and debt ratings from the major independent rating organizations. The debt ratings shown are indicative ratings. Outstanding issuances are rated the same as indicative ratings unless otherwise noted. Actual ratings can differ from indicative ratings based on contractual terms. A security rating is not a recommendation to buy, sell or hold securities. Such a rating may be subject to revision or withdrawal at any time by the assigning rating agency. Each rating should be evaluated independently of any other rating.

	A.M. Best	Fitch	S&P Global	Moody's
Principal Financial Group				
Senior Unsecured Debt (1)	a		BBB+	Baa2
Junior Subordinated Debt (2)	bbb+		BBB	Baa3
Principal Financial Services				
Senior Unsecured Debt	a		BBB+	Baa1
Commercial Paper	AMB-1		A-2	P-2
Principal Life Insurance Company				
Insurer Financial Strength	A+	AA	A+	A1
Issuer Credit Rating	aa			
Commercial Paper	AMB-1+		A-1+	P-1
Enterprise Risk Management Rating			Strong	
Principal National Life Insurance Company				
Insurer Financial Strength	A+	AA	A+	A1

(1) Principal Financial Group's senior debt issuance has been rated "Baa1" by Moody's.

(2) Principal Financial Group's junior subordinated debt issuance has been rated "BBB" by S&P Global and "Baa2" by Moody's.

Impacts of Income Taxes

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

For income tax information, see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 10, Income Taxes."

Fair Value Measurement

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels. The fair value hierarchy gives the highest priority (Level 1) to unadjusted quoted prices in active markets for identical assets or liabilities and gives the lowest priority (Level 3) to unobservable inputs. The level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety considering factors specific to the asset or liability. See Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 14, Fair Value Measurements" for further details, including a reconciliation of changes in Level 3 fair value measurements.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Table of Contents

As of December 31, 2016, 41% of our net assets (liabilities) were Level 1, 55% were Level 2 and 4% were Level 3. Excluding separate account assets as of December 31, 2016, 3% of our net assets (liabilities) were Level 1, 96% were Level 2 and 1% were Level 3.

As of December 31, 2015, 39% of our net assets (liabilities) were Level 1, 57% were Level 2 and 4% were Level 3. Excluding separate account assets as of December 31, 2015, 4% of our net assets (liabilities) were Level 1, 95% were Level 2 and 1% were Level 3.

Changes in Level 3 Fair Value Measurements

Net assets (liabilities) measured at fair value on a recurring basis using significant unobservable inputs (Level 3) as of December 31, 2016, were \$7,779.6 million as compared to \$7,318.6 million as of December 31, 2015. The increase was primarily related to gains on other invested assets and real estate included in our separate account assets and net purchases of certain structured securities. The increase was partially offset by net sales in our separate accounts assets.

Net assets (liabilities) measured at fair value on a recurring basis using significant unobservable inputs (Level 3) as of December 31, 2015, were \$7,318.6 million as compared to \$6,350.1 million as of December 31, 2014. The increase was primarily related to gains on other invested assets and real estate included in our separate account assets.

Investments

We had total consolidated assets as of December 31, 2016, of \$228,014.3 million, of which \$75,835.5 million were invested assets. The rest of our total consolidated assets are comprised primarily of separate account assets for which we do not bear investment risk; therefore, the discussion and financial information below does not include such assets.

Overall Composition of Invested Assets

Invested assets as of December 31, 2016, were predominantly high quality and broadly diversified across asset class, individual credit, industry and geographic location. Asset allocation is determined based on cash flow and the risk/return requirements of our products. As shown in the following table, the major categories of invested assets are fixed maturities and commercial mortgage loans. The remainder is invested in other investments, equity securities, real estate and residential mortgage loans. In addition, policy loans are included in our invested assets.

	December 31, 2016		December 31, 2015	
	Carrying amount	% of total	Carrying amount	% of total
<i>(\$ in millions)</i>				
Fixed maturities:				
Public	\$ 39,170.3	52%	\$ 35,308.9	50%
Private	16,074.2	21	15,344.4	22
Equity securities	1,512.3	2	1,307.2	2
Mortgage loans:				
Commercial	12,027.8	16	11,237.8	16
Residential	1,202.4	1	1,101.6	2
Real estate held for sale	130.7		169.7	
Real estate held for investment	1,238.1	2	1,282.1	2
Policy loans	823.8	1	817.1	1
Other investments	3,655.9	5	3,251.7	5
Total invested assets	75,835.5	100%	69,820.5	100%
Cash and cash equivalents	2,719.6		2,564.8	
Total invested assets and cash	\$ 78,555.1		\$ 72,385.3	

Investment Results

Net Investment Income

The following table presents the yield and investment income, excluding net realized capital gains and losses, for our invested assets for the years indicated. We calculate annualized yields using a simple average of asset classes at the beginning and end of the reporting period. The yields for available-for-sale fixed maturities and available-for-sale equity

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Table of Contents

securities are calculated using amortized cost and cost, respectively. All other yields are calculated using carrying amounts.

	For the year ended December 31,						Increase (decrease)			
	2016		2015		2014		2016 vs. 2015		2015 vs. 2014

Other investments	8.5	293.1	6.1	198.7	5.3	164.1	2.4	94.4	0.8	34.6
Total	4.6	3,380.9	4.5	3,129.1	4.9	3,334.8	0.1	251.8	(0.4)	(205.7)
Investment expenses	(0.1)	(84.4)	(0.1)	(77.0)	(0.1)	(76.9)		(7.4)		(0.1)
Net investment income	4.5%	\$ 3,296.5	4.4%	\$ 3,052.1	4.8%	\$ 3,257.9	0.1%	\$ 244.4	(0.4)%	\$ (205.8)

Year Ended December 31, 2016 Compared to Year Ended December 31, 2015

Net investment income increased primarily due to higher average invested assets in our U.S. operations and an increase in variable investment income primarily related to the sale of joint venture real estate and certain other real estate. These increases were partially offset by lower investment yields on invested assets in our U.S. operations.

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

Net investment income decreased primarily due to lower investment yields and prepayments on invested assets and cash in our U.S. operations. In addition, net investment income decreased due to the weakening of the Latin American currencies against the U.S. dollar, lower inflation-based investment returns on average invested assets and cash as a result of lower inflation in Chile and unfavorable relative market performance on our required regulatory investment in the pension funds of our Chilean pension company.

Net Realized Capital Gains (Losses)

The following table presents the contributors to net realized capital gains and losses for the years indicated.

	For the year ended						Increase (decrease)		
	December 31,								
	2016	2015	2014	2016 vs. 2015	2015 vs. 2014				
	(in millions)								
Fixed maturities, available-for-sale credit impairments (1)	\$ (96.5)	\$ (30.2)	\$ (87.1)	\$ (66.3)	\$ 56.9				
Commercial mortgages credit impairments	(1.2)	(3.4)	1.3	2.2	(4.7)				
Other credit impairments	4.0	3.6	(0.6)	0.4	4.2				
Fixed maturities, available-for-sale and trading noncredit	49.9	1.6	67.5	48.3	(65.9)				
Derivatives and related hedge activities	179.1	(22.6)	(11.2)	201.7	(11.4)				
Other gains (losses)	35.8	(0.1)	44.8	35.9	(44.9)				
Net realized capital gains (losses)	\$ 171.1	\$ (51.1)	\$ 14.7	\$ 222.2	\$ (65.8)				

(1)

Includes credit impairments as well as losses on sales of fixed maturities to reduce credit risk, net of realized credit recoveries on the sale of previously impaired securities. Credit gains on sales, excluding associated foreign currency fluctuations that are included in derivatives and related hedging activities, were a net gain of \$0.2 million, \$0.3 million and \$0.9 million for the years ended December 31, 2016, 2015 and 2014, respectively.

Year Ended December 31, 2016 Compared to Year Ended December 31, 2015

Net realized capital losses on fixed maturities, available-for-sale credit impairments increased primarily due to higher impairments on corporate fixed maturities in the energy sector and structured fixed maturities.

Net realized capital gains on fixed maturities, available-for-sale and trading noncredit increased primarily due to the sale of a long dated structured security in 2016 and gains versus losses on trading securities related to changes in interest rates and credit spreads.

Derivatives and related hedge activities had net gains in 2016 as compared to net losses in 2015 primarily due to increased gains on interest rate swap derivatives not designated as hedging instruments due to changes in interest rates. In addition, currency forwards and currency swaps had gains in 2016 versus losses in 2015 due to changes in exchange rates and on credit related derivatives.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Table of Contents

Other gains (losses) reflected gains in 2016 as compared to losses in 2015 primarily due to a write-off of unamortized book value on corporate owned real estate in 2015 and gains in 2016 versus losses in 2015 on equity securities, trading.

Year Ended December 31, 2015 Compared to Year Ended December 31, 2014

Net realized capital losses on fixed maturities, available-for-sale credit impairments decreased primarily due to decreased losses on structured fixed maturities as a result of improved market conditions. This was partially offset by losses versus gains on corporate fixed maturities.

Net realized capital gains on fixed maturities, available-for-sale and trading noncredit decreased primarily due to losses versus gains on trading securities related to changes in interest rates and credit spreads and a gain from the sale of a long dated structured security in 2014.

Net realized capital losses on derivatives and related hedge activities increased primarily due to losses versus gains on the GMWB embedded derivative, including changes in the spread reflecting our own creditworthiness, and related hedging instruments. This was partially offset by decreased losses on credit related derivatives.

Other gains (losses) reflected losses in 2015 as compared to gains in 2014 primarily due to decreased gains on sales of real estate investments and joint venture real estate and a write-off of unamortized book value on corporate owned real estate in 2015. This was partially offset by an impairment of Liongate, an equity method investment, in 2014.

U.S. Investment Operations

Of our invested assets, \$68,808.2 million were held by our U.S. operations as of December 31, 2016. Our U.S. invested assets are managed primarily by our Principal Global Investors segment. Our primary investment objective is to maximize after-tax returns consistent with acceptable risk parameters. We seek to protect policyholders' benefits by optimizing the risk/return relationship on an ongoing basis, through asset/liability matching, reducing the credit risk, avoiding high levels of investments that may be redeemed by the issuer, maintaining sufficiently liquid investments and avoiding undue asset concentrations through diversification. We are exposed to two primary sources of investment risk:

credit risk, relating to the uncertainty associated with the continued ability of an obligor to make timely payments of principal and interest and

interest rate risk, relating to the market price and/or cash flow variability associated with changes in market yield curves.

Our ability to manage credit risk is essential to our business and our profitability. We devote considerable resources to the credit analysis of each new investment. We manage credit risk through industry, issuer and asset class diversification. Our Investment Committee, appointed by our Board of Directors, is responsible for establishing all investment policies and approving or authorizing all investments, except the Executive Committee of the Board must approve any investment transaction exceeding \$500.0 million. As of December 31, 2016, eleven members served on the Investment Committee, one of whom is a member of our Board of Directors. The remaining members were senior management members representing various areas of our company.

We purchase credit default swaps to hedge certain credit exposures in our investment portfolio and total return swaps and futures to hedge a portion of our investment portfolio from credit losses. We economically hedged credit exposure in our portfolio by purchasing credit default swaps with a notional amount of \$176.5 million and \$213.2 million, total return swaps with a notional of \$90.0 million and \$90.0 million, and futures with a notional of \$11.9 million and \$13.1 million as of December 31, 2016 and December 31, 2015, respectively. We sell credit default swaps to offer credit protection to investors when entering into synthetic replicating transactions. When selling credit protection, if there is an event of default by the referenced name, we are obligated to pay the counterparty the referenced amount of the contract and receive in return the referenced security. For further information on credit derivatives sold, see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 5, Derivative Financial Instruments" under the caption, "Credit Derivatives Sold."

We also seek to manage call or prepayment risk arising from changes in interest rates. We assess and price for call or prepayment risks in all of our investments and monitor these risks in accordance with asset/liability management policies.

The amortized cost and weighted average yield, calculated using amortized cost, of non-structured fixed maturity securities that will be callable at the option of the issuer, excluding securities with a make-whole provision, were \$2,075.9 million and 3.5%, respectively, as of

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

December 31, 2016 and \$1,554.9 million and 3.9%, respectively, as of December 31, 2015. In addition, the amortized cost and weighted average yield of residential mortgage-backed pass-through securities, residential collateralized mortgage obligations, and asset-backed securities - home equity with material prepayment risk were \$4,891.3 million and 3.2%, respectively, as of December 31, 2016 and \$4,391.9 million and 3.3%, respectively, as of December 31, 2015.

Our Fixed Income Securities Committee, consisting of fixed income securities senior management members, approves the credit rating for the fixed maturities we purchase. Teams of security analysts, organized by industry, analyze and monitor these investments. In addition, we have teams who specialize in RMBS, CMBS, ABS, municipals and below investment grade securities. Our analysts monitor issuers held in the portfolio on a continuous basis with a formal review documented annually or more frequently if material events affect the issuer. The analysis includes both fundamental and

Table of Contents

technical factors. The fundamental analysis encompasses both quantitative and qualitative analysis of the issuer. The qualitative analysis includes an assessment of both accounting and management aggressiveness of the issuer. In addition, technical indicators such as stock price volatility and credit default swap levels are monitored.

Our Fixed Income Securities Committee also reviews private transactions on a continuous basis to assess the quality ratings of our privately placed investments. We regularly review our investments to determine whether we should re-rate them, employing the following criteria:

- material changes in the issuer's revenues or margins;
- significant management or organizational changes;
- significant changes regarding the issuer's industry;
- debt service coverage or cash flow ratios that fall below industry-specific thresholds;
- violation of financial covenants and
- other business factors that relate to the issuer.

Our use of derivatives exposes us to counterparty risk, or the risk that the counterparty fails to perform the terms of the derivative contract. We actively manage this risk by:

- obtaining approval of all new counterparties by the Investment Committee;
- establishing exposure limits that take into account non-derivative exposure we have with the counterparty as well as derivative exposure;
- performing similar credit analysis prior to approval on each derivatives counterparty that we do when lending money on a long-term basis;
- diversifying our risk across numerous approved counterparties;
- implementing credit support annex (collateral) agreements ("CSAs") for over-the-counter derivative transactions or similar agreements with a majority of our counterparties to further limit counterparty exposures, which provide for netting of exposures;
- limiting exposure to A credit or better for over-the-counter derivative counterparties without CSAs;
- conducting stress-test analysis to determine the maximum exposure created during the life of a prospective transaction;
- daily monitoring of counterparty credit ratings, exposures and associated collateral levels and

trading mandatorily cleared contracts through centralized clearinghouses.

We manage our exposure on a net basis, whereby we net positive and negative exposures for each counterparty with agreements in place. For further information on derivative exposure, see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 4, Investments" under the caption, "Balance Sheet Offsetting."

A dedicated risk management team is responsible for centralized monitoring of the commercial mortgage loan portfolio. We apply a variety of strategies to minimize credit risk in our commercial mortgage loan portfolio. When considering new commercial mortgage loans, we review the cash flow fundamentals of the property, make a physical assessment of the underlying security, conduct a comprehensive market analysis and compare against industry lending practices. We use a proprietary risk rating model to evaluate all new and substantially all existing loans within the portfolio. The proprietary risk model is designed to stress projected cash flows under simulated economic and market downturns. Our lending guidelines are typically 75% or less loan-to-value ratio and a debt service coverage ratio of at least 1.2 times. We analyze investments outside of these guidelines based on cash flow quality, tenancy and other factors. The following table presents loan-to-value and debt service coverage ratios for our brick and mortar commercial mortgages, excluding Principal Global Investors segment mortgages:

	Weighted average loan-to-value ratio		Debt service coverage ratio	
	December 31, 2016	December 31, 2015	December 31, 2016	December 31, 2015
New mortgages	52%	50%	2.6X	3.1X
Entire mortgage portfolio	46%	46%	2.7X	2.7X

Our investment decisions and objectives are a function of the underlying risks and product profiles of each primary business operation. In addition, we diversify our product portfolio offerings to include products that contain features that will protect us against fluctuations in interest rates. Those features include adjustable crediting rates, policy surrender charges and market value adjustments on liquidations. For further information on our management of interest rate risk, see Item 7A. "Quantitative and Qualitative Disclosures About Market Risk Interest Rate Risk."

Table of Contents

Overall Composition of U.S. Invested Assets

As shown in the following table, the major categories of U.S. invested assets are fixed maturities and commercial mortgage loans. The remainder is invested in other investments, real estate, residential mortgage loans and equity securities. In addition, policy loans are included in our invested assets. The following discussion analyzes the composition of U.S. invested assets, but excludes invested assets of the separate accounts.

	December 31, 2016		December 31, 2015	
	Carrying amount	% of total	Carrying amount	% of total
(\$ in millions)				
Fixed maturities:				
Public	\$ 35,524.8	52%	\$ 31,756.0	50%
Private	16,065.2	23	15,342.8	24
Equity securities	342.6	1	306.2	1
Mortgage loans:				
Commercial	11,940.5	17	11,194.9	18
Residential	680.5	1	596.1	1
Real estate held for sale	128.7		166.8	
Real estate held for investment	1,236.5	2	1,280.4	2
Policy loans	800.7	1	796.3	1
Other investments	2,088.7	3	1,877.4	3
Total invested assets	68,808.2	100%	63,316.9	100%
Cash and cash equivalents	2,335.5		2,292.9	
Total invested assets and cash	\$ 71,143.7		\$ 65,609.8	

Fixed Maturities

Fixed maturities include bonds, ABS, redeemable preferred stock and certain non-redeemable preferred securities. Included in the privately placed category as of December 31, 2016 and December 31, 2015, were \$11.2 billion and \$10.4 billion, respectively, of securities subject to certain holding periods and resale restrictions pursuant to Rule 144A of the Securities Act of 1933.

Fixed maturities were diversified by category of issuer, as shown in the following table for the years indicated.

	December 31, 2016		December 31, 2015	
	Carrying amount	Percent of total	Carrying amount	Percent of total
(\$ in millions)				
U.S. government and agencies	\$ 1,415.7	3%	\$ 1,649.0	3%
States and political subdivisions	5,625.6	11	4,784.1	10
Non-U.S. governments	542.0	1	423.9	1
Corporate public	19,117.9	37	16,407.7	35
Corporate private	12,140.2	23	12,049.1	26
Residential mortgage-backed pass-through securities	2,842.5	5	2,640.2	6
Commercial mortgage-backed securities	4,070.2	8	3,860.4	8
Residential collateralized mortgage obligations	1,827.8	4	1,556.4	3
Asset-backed securities	4,008.1	8	3,728.0	8
Total fixed maturities	\$ 51,590.0	100%	\$ 47,098.8	100%

We believe it is desirable to hold residential mortgage-backed pass-through securities due to their credit quality and liquidity as well as portfolio diversification characteristics. Our portfolio is comprised of Government National Mortgage Association, Federal National Mortgage Association and Federal Home Loan Mortgage Corporation pass-through securities. In addition, our residential collateralized mortgage obligation portfolio offers structural features that allow cash flows to be matched to our liabilities.

CMBS provide varying levels of credit protection, diversification and reduced event risk depending on the securities owned and composition of the loan pool. CMBS are predominantly comprised of large pool securitizations that are diverse by property type, borrower and geographic dispersion. The risks to any CMBS deal are determined by the credit quality of the underlying loans and how those loans perform over time. Another key risk is the vintage of the underlying loans and the state of the markets during a particular vintage. In the CMBS market, there is a material difference in the outlook for the performance of loans originated in 2004 and earlier relative to loans originated in 2005 through 2008. For loans originated prior to 2005, underwriting assumptions were more conservative regarding required debt service coverage and loan-to-value ratios. For the 2005 through 2008 vintages, real estate values peaked and the underwriting expectations were that values would continue to increase, which makes those loan values more sensitive to market declines. The 2009 through 2016 vintages represent a return to debt service coverage ratios and loan-to-value ratios that more closely resemble loans originated prior to 2005.

We purchase ABS to diversify the overall credit risks of the fixed maturities portfolio and to provide attractive returns. The principal risks in holding ABS are structural and credit risks. Structural risks include the security's priority in

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Table of Contents

the issuer's capital structure, the adequacy of and ability to realize proceeds from the collateral and the potential for prepayments. Credit risks involve collateral and issuer/servicer risk where collateral and servicer performance may deteriorate. Our ABS portfolio is diversified both by type of asset and by issuer. We actively monitor holdings of ABS to recognize adverse changes in the risk profile of each security. Prepayments in the ABS portfolio are, in general, insensitive to changes in interest rates or are insulated from such changes by call protection features. In the event we are subject to prepayment risk, we monitor the factors that impact the level of prepayment and prepayment speed for those ABS. In addition, we hold a diverse class of securities, which limits our exposure to any one security.

The international exposure held in our U.S. operation's fixed maturities portfolio was 21% of total fixed maturities as of December 31, 2016 and 22% as of December 31, 2015. It is comprised of corporate and foreign government fixed maturities. The following table presents the carrying amount of our international exposure for our U.S. operation's fixed maturities portfolio for the years indicated.

	December 31, 2016		December 31, 2015
	<i>(in millions)</i>		
European Union, excluding UK	\$ 3,419.4	\$	3,247.1
United Kingdom	2,282.4		2,293.2
Asia-Pacific	1,517.1		1,469.1
Australia/New Zealand	1,338.4		1,162.0
Latin America	950.4		885.9
Europe, non-European Union	740.4		824.3
Middle East and Africa	365.3		304.3
Other (1)	261.7		266.5
Total	\$ 10,875.1	\$	10,452.4

(1) Includes exposure from two countries and various supranational organizations as of both December 31, 2016, and December 31, 2015.

International fixed maturities exposure is determined by the country of domicile of the parent entity of an individual asset. All international fixed maturities held by our U.S. operations are either denominated in U.S. dollars or have been swapped into U.S. dollar equivalents. Our international investments are analyzed internally by country and industry credit investment professionals. We control concentrations using issuer and country level exposure benchmarks, which are based on the credit quality of the issuer and the country. Our investment policy limits total international fixed maturities investments and we are within those internal limits. Exposure to Canada is not included in our international exposure. As of December 31, 2016 and December 31, 2015, our investments in Canada totaled \$1,604.5 million and \$1,310.5 million, respectively.

Fixed Maturities Credit Concentrations. One aspect of managing credit risk is through industry, issuer and asset class diversification. Our credit concentrations are managed to established limits. The following table presents our top ten exposures as of December 31, 2016.

	Amortized cost
	<i>(in millions)</i>
Berkshire Hathaway Inc.	\$ 217.5
Wells Fargo & Company	203.9
Duke Energy Corporation	191.2
Mars, Incorporated	182.4
Province of Quebec	180.9
Comcast Corporation	178.0
Citigroup Inc.	166.8
Verizon Communications Inc.	164.2
General Electric Company	161.9
Bank of America Corporation	160.8
Total top ten exposures	\$ 1,807.6

Fixed Maturities Valuation and Credit Quality. Valuation techniques for the fixed maturities portfolio vary by security type and the availability of market data. The use of different pricing techniques and their assumptions could produce different financial results. See Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 14, Fair Value Measurements" for further details regarding our pricing methodology. Once prices are determined, they are reviewed by pricing analysts for reasonableness based on asset class and observable market data. Investment analysts who are familiar with specific securities review prices for reasonableness through direct interaction with external sources, review of recent trade activity or use of internal models. All fixed maturities placed on the "watch list" are periodically analyzed by investment analysts or analysts that focus on troubled securities ("Workout Group"). This group then meets with the Chief Investment Officer and the Portfolio Managers to determine reasonableness of prices. The valuation of impaired bonds for which there is no quoted price is typically based on the present value of the future cash flows expected to be received. Although we believe these values reasonably reflect the fair value of those securities, the key assumptions about risk premiums, performance of underlying collateral (if any) and other market factors involve qualitative and unobservable inputs.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Table of Contents

The Securities Valuation Office ("SVO") of the NAIC monitors the bond investments of insurers for regulatory capital and reporting purposes and, when required, assigns securities to one of six categories referred to as NAIC designations. Although NAIC designations are not produced to aid the investment decision making process, NAIC designations may serve as a reasonable proxy for Nationally Recognized Statistical Rating Organizations' ("NRSRO") credit ratings for certain bonds. For most corporate bonds, NAIC designations 1 and 2 include bonds generally considered investment grade by such rating organizations. Bonds are considered investment grade when rated "Baa3" or higher by Moody's, or "BBB " or higher by S&P. NAIC designations 3 through 6 include bonds generally referred to as below investment grade. Bonds are considered below investment grade when rated "Ba1" or lower by Moody's, or "BB+" or lower by S&P.

However, for loan-backed and structured securities, as defined by the NAIC, the NAIC designation is not always a reasonable indication of an NRSRO rating as described below. For CMBS and non-agency RMBS, Blackrock Solutions undertakes the modeling of those NAIC designations. Other loan-backed and structured securities may be subject to an intrinsic price matrix as provided by the NAIC. This may result in a final designation being higher or lower than the NRSRO credit rating.

The following table presents our total fixed maturities by NAIC designation as of the years indicated as well as the percentage, based on fair value, that each designation comprises.

NAIC designation	December 31, 2016			December 31, 2015		
	Amortized cost	Carrying amount	Percent of carrying amount	Amortized cost	Carrying amount	Percent of carrying amount
	(\$ in millions)					
1	\$ 33,198.2	\$ 34,031.5	66%	\$ 29,661.4	\$ 30,712.8	65%
2	13,614.9	14,155.0	27	12,562.1	12,827.2	27
3	2,578.5	2,611.8	6	2,932.2	2,829.1	7
4	640.9	604.3	1	606.4	547.3	1
5	148.6	120.4		219.6	139.7	
6	80.9	67.0		46.5	42.7	
Total fixed maturities	\$ 50,262.0	\$ 51,590.0	100%	\$ 46,028.2	\$ 47,098.8	100%

Fixed maturities included 25 securities with an amortized cost of \$397.4 million, gross gains of \$22.2 million, gross losses of \$8.6 million and a carrying amount of \$411.0 million as of December 31, 2016, that were still pending a review and assignment of a designation by the SVO. Due to the timing of when fixed maturities are purchased, legal documents are filed and the review by the SVO is completed, we will always have securities in our portfolio that are unrated over a reporting period. In these instances, an equivalent designation is assigned based on our fixed income analyst's assessment.

Commercial Mortgage-Backed Securities. As of December 31, 2016, based on amortized cost, 97% of our CMBS portfolio had an NAIC designation of 1 and 68% was issued during the more conservative underwriting periods prior to 2005 and after 2008.

The following tables present our exposure by credit quality, based on NAIC designations, and vintage for our CMBS portfolio as of the years indicated.

Fixed Maturities Watch List. We monitor any decline in the credit quality of fixed maturities through the designation of "problem securities," "potential problem securities" and "restructured securities". We define problem securities in our fixed maturity portfolio as securities: (i) with principal and/or interest payments in default or where default is perceived to be imminent in the near term, or (ii) issued by a company that went into bankruptcy subsequent to the acquisition of such securities. We define potential problem securities in our fixed maturity portfolio as securities included on an internal "watch list" for which management has concerns as to the ability of the issuer to comply with the present debt payment terms and which may result in the security becoming a problem or being restructured. The decision whether to classify a performing fixed maturity security as a potential problem involves significant subjective judgments by our management as to the likely future industry conditions and developments with respect to the issuer. We define restructured securities in our fixed maturity portfolio as securities where a concession has been granted to the borrower related to the borrower's financial difficulties that would not have otherwise been considered. We determine that restructures should occur in those instances where greater economic value will be realized under the new terms than through liquidation or other disposition and may involve a change in contractual cash flows. If the present value of the restructured cash flows is less than the current cost of the asset being restructured, a realized capital loss is recorded in net income and a new cost basis is established.

The following table presents the total carrying amount of our fixed maturities portfolio, as well as its problem, potential problem and restructured fixed maturities for the years indicated.

	December 31, 2016		December 31, 2015	
	<i>(\$ in millions)</i>			
Total fixed maturities (public and private)	\$	51,590.0	\$	47,098.8
Problem fixed maturities (1)	\$	74.1	\$	71.8
Potential problem fixed maturities		154.8		172.0
Total problem, potential problem and restructured fixed maturities	\$	228.9	\$	243.8
Total problem, potential problem and restructured fixed maturities as a percent of total fixed maturities		0.44%		0.52%

(1) The problem fixed maturities carrying amount is net of other-than-temporary impairment losses.

Fixed Maturities Impairments. We have a process in place to identify securities that could potentially have a credit impairment that is other than temporary. This process involves monitoring market events that could impact issuers' credit ratings, business climate, management changes, litigation and government actions and other similar factors. This process also involves monitoring late payments, pricing levels, downgrades by rating agencies, key financial ratios, financial statements, revenue forecasts and cash flow projections as indicators of credit issues.

Each reporting period, a group of individuals including the Chief Investment Officer, our Portfolio Managers, members of our Workout Group and representatives from Investment Accounting review all securities to determine whether an other-than-temporary decline in value exists and whether losses should be recognized. The analysis focuses on each issuer's ability to service its debts in a timely fashion. Formal documentation of the analysis and our decision is prepared and approved by management.

We consider relevant facts and circumstances in evaluating whether a credit or interest rate- related impairment of a security is other than temporary. Relevant facts and circumstances considered include: (1) the extent and length of time the fair value has been below cost; (2) the reasons for the decline in value; (3) the financial position and access to capital of the issuer, including the current and future impact of any specific events; (4) for structured securities, the adequacy of the expected cash flows and (5) our intent to sell the security or whether it is more likely than not we will be required to sell the security before recovery of its amortized cost which, in some cases, may extend to maturity. To the extent we determine a security is deemed to be other than temporarily impaired, an impairment loss is recognized. For additional details, see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 4, Investments."

Table of Contents

We would not consider a security with unrealized losses to be other than temporarily impaired when it is not our intent to sell the security, it is not more likely than not that we would be required to sell the security before recovery of the amortized cost, which may be maturity, and we expect to recover the amortized cost basis. However, we do sell securities under certain circumstances, such as when we have evidence of a change in the issuer's creditworthiness, when we anticipate poor relative future performance of securities, when a change in regulatory requirements modifies what constitutes a permissible investment or the maximum level of investments held or when there is an increase in capital requirements or a change in risk weights of debt securities. Sales generate both gains and losses.

A number of significant risks and uncertainties are inherent in the process of monitoring credit impairments and determining if an impairment is other than temporary. These risks and uncertainties include: (1) the risk that our assessment of an issuer's ability to meet all of its contractual obligations will change based on changes in the credit characteristics of that issuer, (2) the risk that the economic outlook will be worse than expected or have more of an impact on the issuer than anticipated, (3) the risk that our investment professionals are making decisions based on fraudulent or misstated information in the financial statements provided by issuers and (4) the risk that new information obtained by us or changes in other facts and circumstances lead us to change our intent to not sell the security prior to recovery of its amortized cost. Any of these situations could result in a charge to net income in a future period.

The net realized loss relating to other-than-temporary credit impairments and credit related sales of fixed maturities was \$95.1 million, \$30.3 million, and \$83.7 million for the years ended December 31, 2016, 2015, and 2014, respectively.

Table of Contents**Fixed Maturities Available-for-Sale**

(1)

This exposure is all related to sub-prime mortgage loans.

Of the \$615.6 million in gross unrealized losses as of December 31, 2016, \$17.7 million in losses were attributed to securities scheduled to mature in one year or less, \$29.4 million attributed to securities scheduled to mature between one to five years, \$74.0 million attributed to securities scheduled to mature between five to ten years, \$302.9 million attributed to securities scheduled to mature after ten years and \$191.6 million related to mortgage-backed and other ABS that are not classified by maturity year. As of December 31, 2016, we were in a \$1,328.0 million net unrealized gain position as compared to a \$1,070.6 million net unrealized gain position as of December 31, 2015. The \$257.4 million increase in net unrealized gains for the year ended December 31, 2016, can primarily be attributed to tightening of credit spreads, partially offset by an approximate 9 basis point increase in interest rates.

Fixed Maturities Available-for-Sale Unrealized Losses. We believe our long-term fixed maturities portfolio is well diversified among industry types and between publicly traded and privately placed securities. Each year, we direct the majority of our net cash inflows into investment grade fixed maturities. Our current policy is to limit the percentage of cash flow invested in below investment grade assets to 10% of

cash flow.

We invest in privately placed fixed maturities to enhance the overall value of the portfolio, increase diversification and obtain higher yields than are possible with comparable quality public market securities. Generally, private placements provide broader access to management information, strengthened negotiated protective covenants, call protection features and, where applicable, a higher level of collateral. They are, however, generally not freely tradable because of restrictions imposed by federal and state securities laws and illiquid trading markets.

Mortgage Loans

Mortgage loans consist of commercial mortgage loans on real estate and residential mortgage loans. The carrying amount of our commercial mortgage loan portfolio was \$11,940.5 million and \$11,194.9 million as of December 31, 2016 and December 31, 2015, respectively. The carrying amount of our residential mortgage loan portfolio was \$680.5 million and \$596.1 million as of December 31, 2016 and December 31, 2015, respectively.

Commercial Mortgage Loans. We generally report commercial mortgage loans on real estate at cost adjusted for amortization of premiums and accrual of discounts, computed using the interest method and net of valuation allowances.

Commercial mortgage loans play an important role in our investment strategy by:

providing strong risk-adjusted relative value in comparison to other investment alternatives;

enhancing total returns and

providing strategic portfolio diversification.

As a result, we have focused on constructing a high quality portfolio of mortgages. Our portfolio is generally comprised of mortgages originated with conservative loan-to-value ratios, high debt service coverages and general purpose property types with a strong credit tenancy.

Our commercial mortgage loan portfolio consists primarily of non-recourse, fixed rate mortgages on fully or near fully leased properties. The mortgage portfolio is comprised primarily of office properties, apartments, well anchored retail properties and general-purpose industrial properties.

Our commercial mortgage loan portfolio is diversified by geography and specific collateral property type. Commercial mortgage lending in the state of California accounted for 18% of our commercial mortgage loan portfolio before valuation allowance as of both December 31, 2016 and December 31, 2015. We are, therefore, exposed to potential losses resulting from the risk of catastrophes, such as earthquakes, that may affect the region. Like other lenders, we generally do not require earthquake insurance for properties on which we make commercial mortgage loans. With respect to California properties, however, we obtain an engineering report specific to each property. The report assesses the building's design specifications, whether it has been upgraded to meet seismic building codes and the maximum loss that is likely to result from a variety of different seismic events. We also obtain a report that assesses, by building and geographic fault lines, the amount of loss our commercial mortgage loan portfolio might suffer under a variety of seismic events.

The typical borrower in our commercial loan portfolio is a single purpose entity or single asset entity. As of December 31, 2016 and December 31, 2015, the total number of commercial mortgage loans outstanding was 840 and 878, of which 55% and 60% were for loans with

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

principal balances less than \$10.0 million, respectively. The average loan size of our commercial mortgage portfolio was \$14.2 million and \$12.8 million as of December 31, 2016 and December 31, 2015, respectively.

Commercial Mortgage Loan Credit Monitoring. For further details on monitoring and management of our commercial mortgage loan portfolio, see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 4, Investments Mortgage Loan Credit Monitoring."

We categorize loans that are 60 days or more delinquent, loans in process of foreclosure and loans with borrowers or credit tenants in bankruptcy that are delinquent as "problem" loans. Valuation allowances or charge-offs have been recognized on most problem loans. We categorize loans that are delinquent less than 60 days where the default is expected to be cured and loans with borrowers or credit tenants in bankruptcy that are current as "potential problem" loans. The decision whether to classify a loan delinquent less than 60 days as a potential problem involves significant subjective judgments by management as to the likely future economic conditions and developments with respect to the borrower. We categorize loans for which the original note rate has been reduced below market and loans for which the principal has been reduced as "restructured" loans. We also consider loans that are refinanced more than one year beyond the original maturity or call date at below market rates as restructured.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Total problem, potential problem and restructured commercial mortgages as a percent of total commercial mortgages % 0.14%

Commercial Mortgage Loan Valuation Allowance. The valuation allowance for commercial mortgage loans includes loan specific reserves for loans that are deemed to be impaired as well as reserves for pools of loans with similar risk characteristics where a property risk or market specific risk has not been identified but for which we anticipate a loss may occur. For further details on the commercial mortgage loan valuation allowance, see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 4, Investments Mortgage Loan Valuation Allowance."

The following table represents our commercial mortgage loan valuation allowance for the years indicated.

	For the year ended December 31, 2016	For the year ended December 31, 2015
	(\$ in millions)	
Balance, beginning of period	\$ 27.5	\$ 26.9
Provision	1.4	4.0
Charge-offs	(1.5)	(3.5)
Recoveries		0.1
Balance, end of period	\$ 27.4	\$ 27.5

Valuation allowance as % of carrying value before reserves 0.23% 0.25%

Residential Mortgage Loans. The residential mortgage loan portfolio is composed of home equity mortgages with an amortized cost of \$165.6 million and \$218.8 million and first lien mortgages with an amortized cost of \$531.9 million and \$401.2 million as of December 31, 2016 and December 31, 2015, respectively. The home equity loans are generally second lien mortgages made up of closed-end loans and lines of credit. Non-performing residential mortgage loans, which are defined as loans 90 days or greater delinquent plus non-accrual loans, totaled \$12.2 million and \$16.0 million as of December 31, 2016 and December 31, 2015, respectively.

We establish the residential mortgage loan valuation allowance at levels considered adequate to absorb estimated probable losses within the portfolio based on management's evaluation of the size and current risk characteristics of the portfolio. Such evaluation considers numerous factors, including, but not limited to net charge-off trends, loss forecasts, collateral values, geographic location, borrower credit scores, delinquency rates, industry condition and economic trends. The changes in the valuation allowance are reported in net realized capital gains (losses) on our consolidated statements of operations.

Our residential mortgage loan portfolio, and in particular our home equity loan portfolio, experienced an increase in loss severity from sustained elevated levels of unemployment along with continued depressed collateral values beginning in 2010. While these factors continue to drive charge-offs, loss rates overall have stabilized and the home equity loan portfolio balance continues to decline. The following table represents our residential mortgage loan valuation allowance for the years indicated.

	For the year ended December 31, 2016	For the year ended December 31, 2015

Real Estate

Real estate consists primarily of commercial equity real estate. As of December 31, 2016 and December 31, 2015, the carrying amount of our equity real estate investment was \$1,365.2 million, or 2%, and \$1,447.2 million, or 2%, of U.S.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Table of Contents

invested assets, respectively. Our commercial equity real estate is held in the form of wholly owned real estate, real estate acquired upon foreclosure of commercial mortgage loans and majority owned interests in real estate joint ventures.

Equity real estate is categorized as either "real estate held for investment" or "real estate held for sale." Real estate held for investment totaled \$1,236.5 million and \$1,280.4 million as of December 31, 2016 and December 31, 2015, respectively. The carrying value of real estate held for investment is generally adjusted for impairments whenever events or changes in circumstances indicate the carrying amount of the asset may not be recoverable. Such impairment adjustments are recorded as net realized capital losses in our consolidated results of operations. Impairment adjustments recorded for the years ended December 31, 2016 and December 31, 2015 were \$0.8 million and \$2.9 million, respectively.

The carrying amount of real estate held for sale was \$128.7 million and \$166.8 million as of December 31, 2016 and December 31, 2015, respectively. Once we identify a real estate property to be sold and it is probable that it will be sold, we classify the property as held for sale. We establish a valuation allowance subject to periodic revisions, if necessary, to adjust the carrying value of the property to reflect the lower of its current carrying value or the fair value, less associated selling costs. The change in valuation allowance for the year ended December 31, 2016 was \$4.5 million. There was no change in valuation allowance for the year ended December 31, 2015.

We use research, both internal and external, to recommend appropriate product and geographic allocations and changes to the equity real estate portfolio. We monitor product, geographic and industry diversification separately and together to determine the most appropriate mix.

Equity real estate is distributed across geographic regions of the country. As of December 31, 2016, our equity real estate portfolio was concentrated in the Pacific (35%), South Atlantic (19%), East North Central (15%) and West South Central (15%) regions of the United States. By property type, we had a concentration in office (45%) and apartments (25%) as of December 31, 2016.

Other Investments

Our other investments totaled \$2,088.7 million as of December 31, 2016, compared to \$1,877.4 million as of December 31, 2015. Derivative assets accounted for \$871.6 million and \$659.6 million in other investments as of December 31, 2016 and December 31, 2015, respectively. The remaining invested assets are primarily related to equity method investments, which include real estate properties owned jointly with venture partners and operated by the partners and sponsored investment funds.

International Investment Operations

Of our invested assets, \$7,027.3 million were held by our Principal International segment as of December 31, 2016. The assets are primarily managed by the local Principal International affiliate. Due to the regulatory constraints in each location, each company maintains its own investment policies. As shown in the following table, the major category of international invested assets is fixed maturities. The following table excludes invested assets of the separate accounts.

	December 31, 2016		December 31, 2015	
	Carrying amount	Percent of total	Carrying amount	Percent of total
<i>(\$ in millions)</i>				
Fixed maturities:				
Public	\$ 3,645.5	52%	\$ 3,552.9	55%
Private	9.0		1.6	
Equity securities	1,169.7	17	1,001.0	15
Mortgage loans:

Regulations in certain locations require investment in the funds we manage. These required regulatory investments are classified as equity securities, trading within our consolidated statements of financial position, with all mark-to-market changes reflected in net investment income. Our investment is primarily dictated by client activity and all investment performance is retained by us.

Table of Contents

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Market Risk Exposures and Risk Management

Market risk is the risk we will incur losses due to adverse fluctuations in market rates and prices. Our primary market risk exposures are to interest rates, equity markets and foreign currency exchange rates. The active management of market risk is an integral part of our operations. We manage our overall market risk exposure within established risk tolerance ranges using several approaches, including:

rebalancing our existing asset or liability portfolios;

controlling the risk structure of newly acquired assets and liabilities and

using derivative instruments to modify the market risk characteristics of existing assets or liabilities or assets expected to be purchased.

Interest Rate Risk

Interest rate risk is the risk of economic losses due to adverse changes in interest rates. Interest rate risk arises primarily from our holdings in interest sensitive assets and liabilities. Changes in interest rates impact numerous aspects of our operations, including but not limited to:

yield on our invested assets;

rate of interest we credit to contractholder account balances;

timing of cash flows on assets and liabilities containing embedded prepayment options;

cost of hedging our GMWB rider;

discount rate used in valuing our pension and OPEB obligations;

estimated gross profits and the amortization of our DAC asset and related actuarial balances;

statutory reserve and capital requirements;

asset-based fees earned on the fixed income assets we manage;

interest expense on our long-term borrowings;

fair value of intangible assets in our reporting units and

fair value of financial assets and liabilities held at fair value on our consolidated statements of financial position.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Lower interest rates generally result in lower profitability in the long-term. Conversely, higher interest rates generally result in higher profitability in the long-term.

Impact of Changes in Long-Term Interest Rate Assumptions

We use long-term interest rate assumptions to calculate reserves, DAC, other actuarial balances and benefit plan obligations in accordance with U.S GAAP. In setting these assumptions, we consider a variety of factors, including historical experience, emerging trends and future expectations. We evaluate our assumptions on at least an annual basis. Due to the long-term nature of our assumptions, we generally do not revise our assumptions in response to short-term fluctuations in market interest rates. However, we will consider revising our assumptions if a significant change occurs in the factors noted above.

A reduction in our long-term interest rate assumptions may result in increases in our reserves and/or unlocking of our DAC asset and other actuarial balances. For additional information, see Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies and Estimates Deferred Acquisition Costs and Other Actuarial Balances."

In addition, we have implemented reinsurance transactions utilizing affiliated reinsurers and highly rated third parties to finance a portion of the statutory reserves for our term life insurance policies and universal life insurance policies with secondary guarantees. We calculate an economic reserve, which represents an estimate of our liability associated with these contracts. The excess of the required statutory reserve over the economic reserve is secured by financing provided by highly rated third parties. The long-term interest rate assumption is a key input in the calculation of the economic reserve. A reduction in our long-term interest rate assumption would reduce the portion of the statutory reserve that can be financed through affiliated reinsurers, thus increasing the amount of invested assets we must maintain to support statutory reserves. For additional information, see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 15, Statutory Insurance Financial Information."

Table of Contents

Impact of Changes in Interest Rates

Changes in interest rates or a sustained low interest rate environment may result in the following impacts, which would impact our financial position and results of operations:

Impact of Falling Interest Rates or Sustained Low Interest Rates

Impact of Rising Interest Rates

Adverse Impacts:

Positive Impacts:

A reduction in investment income, which may be partially offset by a reduction in the interest we credit on contractholder account balances; however, our ability to lower crediting rates may be constrained by guaranteed minimum interest rates and competitive pressures

An increase in investment income, which may be partially or fully offset by an increase in the interest we credit on contractholder account balances

An increase in the cost of hedging our GMWB rider

A decrease in the cost of hedging our GMWB rider

An increase in reserves and/or a true-up or unlocking of our DAC asset and other actuarial balances

A true-up or unlocking of our DAC asset and other actuarial balances

A reduction in the discount rate used in valuing our pension and OPEB obligations, leading to an increase in our Projected Benefit Obligation, NPPC, Accumulated Postretirement Benefit Obligation and NPBC

An increase in the discount rate used in valuing our pension and OPEB obligations, leading to a decrease in our Projected Benefit Obligation, NPPC, Accumulated Postretirement Benefit Obligation and NPBC

An increase in statutory capital we are required to hold as well as the amount of assets we must maintain to support statutory reserves

A decrease in statutory capital we are required to hold as well as the amount of assets we must maintain to support statutory reserves

An increase in prepayments or redemptions on mortgages and bonds we own, which would force us to reinvest the proceeds at lower interest rates

Positive Impacts:

Adverse Impacts:

An increase in the value of the fixed income assets we manage, resulting in an increase in our fee revenue in the short-term

A decrease in the value of the fixed income assets we manage, resulting in a decrease in our fee revenue in the short-term

A decrease in the interest expense on our long-term borrowings, to the extent we are able to refinance our obligations at lower interest rates

An increase in the interest expense on our long-term borrowings, to the extent we refinance our obligations at higher interest rates

An increase in the fair value of certain financial assets held at fair value on our consolidated statements of financial position

A decrease in the fair value of certain financial assets held at fair value on our consolidated statements of financial position, as discussed below

A reduction in the fair value of intangible assets in our reporting units, potentially leading to an impairment of goodwill or other intangible assets

We estimate a hypothetical 100 basis point immediate, parallel decrease in interest rates would reduce our segment pre-tax operating earnings by less than 1% over the next 12 months excluding the impact of any potential unlocking of our DAC asset and other actuarial balances. This estimate reflects the impact of routine management actions in response to a drop in interest rates, such as reducing the interest rates we credit on contractholder account balances; however, it does not reflect the impact of other actions management may consider, such as curtailing sales of certain products. We anticipate the adverse segment pre-tax operating earnings impacts of a decrease in market interest rates will grow over time as assets mature and we are forced to reinvest at lower interest rates.

The selection of a 100 basis point immediate, parallel decrease in interest rates should not be construed as a prediction by us of future market events, but rather as an illustration of the impact of such an event. Our exposure will change as a result of ongoing portfolio transactions in response to new business, management's assessment of changing market conditions and changes in our mix of business.

The segment pre-tax operating earnings sensitivity disclosure above replaces the margin sensitivity that was included in our 2015 Form 10-K. Our previous disclosure reflected the potential impact of a reduction in market interest rates on our margin of investment income above our interest credited to our liabilities. The sensitivity above reflects the total impact on segment pre-tax operating earnings for a reduction in market interest rates. We believe the revised disclosure provides a more comprehensive indication of the potential impact of a change in interest rates.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

If market rates increase rapidly, policy surrenders, withdrawals and requests for policy loans may increase as customers seek to achieve higher returns. This may result in unlocking of our DAC and other actuarial balances. We may be required to sell assets to raise the cash necessary to respond to such surrenders, withdrawals and loans, thereby realizing capital losses on the assets sold.

Table of Contents

Guaranteed Minimum Interest Rate Exposure. The following table provides detail on the differences between the interest rates being credited to contractholders as of December 31, 2016, and the respective guaranteed minimum interest rates ("GMIRs"). Account values are broken down by GMIR level within the Retirement and Income Solutions and U.S. Insurance Solutions segments.

Guaranteed minimum interest rate	Account values (1)					Total
	At GMIR	Excess of crediting rates over GMIR:				
	Up to 0.50% above GMIR	0.51% to 1.00% above GMIR	1.01% to 2.00% above GMIR	2.01% or more above GMIR		
	(\$ in millions)					
Retirement and Income Solutions						
Up to 1.00%	\$ 576.0	\$ 802.3	\$ 5,375.6	\$ 1,661.8	\$ 188.9	\$ 8,604.6
1.01% - 2.00%	365.4	763.7	0.9	25.6		1,155.6
2.01% - 3.00%	6,166.2	639.8	0.2	9.8		6,816.0
3.01% - 4.00%	221.9					221.9
Subtotal	7,329.5	2,205.8	5,376.7	1,697.2	188.9	16,798.1
U.S. Insurance Solutions						
Up to 1.00%		17.8	11.8			29.6
1.01% - 2.00%	306.6		190.4	197.1	54.1	748.2
2.01% - 3.00%	1,897.8	1,007.7	277.0	94.5	0.1	3,277.1
3.01% - 4.00%	1,461.2	59.0	7.3	34.0	4.3	1,565.8
4.01% - 5.00%	198.7	24.2	48.9	39.7		311.5
Subtotal	3,864.3	1,108.7	535.4	365.3	58.5	5,932.2
Total	\$ 11,193.8	\$ 3,314.5	\$ 5,912.1	\$ 2,062.5	\$ 247.4	\$ 22,730.3
Percentage of total	49.2%	14.6%	26.0%	9.1%	1.1%	100.0%

(1) Includes only the account values, net of policy loans, for products with GMIRs and discretionary crediting rates.

In addition to the domestic account values shown in the table above, Principal International had \$848.5 million and \$566.9 million of account values with GMIRs in Hong Kong and Brazil, respectively, as of December 31, 2016. The Brazil amount includes account values from an equity method subsidiary, adjusted to reflect the proportion of the subsidiary's results reflected in our net income. Our liabilities in Principal International are generally denominated in the functional currency of the location of operation. The pattern of interest rate movements in our international operations will likely differ from the pattern of interest rate movements in the U.S.

Impact of Rising Interest Rates on the Fair Value of Financial Assets. An increase in market interest rates may cause a decline in the value of financial assets held at fair value on our consolidated statements of financial position. Although changes in the fair value of our financial assets due to changes in interest rates may impact the amount of equity reported in our consolidated statements of financial position, these changes will not cause an economic gain or loss unless we sell investments, terminate derivative positions, determine an investment is other than temporarily impaired, or determine a derivative instrument is no longer an effective hedge.

We estimate a hypothetical 100 basis point immediate, parallel increase in interest rates would reduce the net reported fair value of our financial assets and derivatives by \$3,100.1 million as of December 31, 2016, compared to \$2,765.0 million as of December 31, 2015. This estimate only reflects the change in fair value for financial assets and derivatives reported at fair value on our consolidated statements of financial position. Assets and liabilities not reported at fair value on our consolidated statements of financial position including mortgage loans, liabilities relating to insurance contracts, investment contracts, debt and bank deposits are excluded from this sensitivity analysis. We believe the excluded liability items would economically serve as a partial offset to the net interest rate risk of the financial instruments included in the

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

sensitivity analysis. Separate account assets and liabilities are also excluded from this estimate, as any interest rate risk is borne by the holder of the separate account. For more information on fair value measurements, see Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 14, Fair Value Measurements."

Our selection of a 100 basis point immediate, parallel increase in interest rates is a hypothetical rate scenario we use to demonstrate potential risk. While a 100 basis point immediate, parallel increase does not represent our view of future market changes, it is a near term reasonably possible hypothetical change that illustrates the potential impact of such events. While this sensitivity analysis provides a representation of interest rate sensitivity, it is based on our portfolio exposures at a point in time and may not be representative of future market results. These exposures will change as a result of ongoing portfolio transactions in response to new business, management's assessment of changing market conditions and available investment opportunities.

Our net estimated potential loss in fair value as of December 31, 2016, increased \$335.1 million from December 31, 2015, primarily due to an increase in our invested assets and an increase in the duration of our financial assets with

Table of Contents

interest rate risk. This was partly offset by an increase in our exposure to pay fixed interest rate swaps due to hedging needs.

The fair value sensitivity disclosure above represents a revision to the fair value sensitivity disclosure included in our 2015 Form 10-K. Our previous disclosure reflected the potential change in fair value for all interest rate sensitive financial assets, financial liabilities, and derivatives, including those not recorded at fair value on a recurring basis but required to be disclosed at fair value. The revised disclosure reflects only the potential change in fair value for financial assets and derivatives reported at fair value on our consolidated statements of financial position. We believe the revised disclosure provides a clearer indication of the potential impact on our consolidated statements of financial position from a 100 basis point change in interest rates.

Interest Rate Risk Management

We manage interest rate risk through the use of an integrated risk management framework. This helps us identify, assess, monitor, report and manage our risks within established limits and risk tolerances. Our internal risk committees monitor and discuss our risk profile and identify necessary actions to mitigate impacts from interest rate risk.

The product designs within our business units result in a variety of different interest rate risk profiles. Therefore, our business units use a variety of different approaches for managing their asset and liability interest rate risks.

Retirement Business Stable Cash Flows For stable and predictable cash flow liabilities, such as full service payout, full service accumulation and investment only, we use investment strategy and hedges to tightly align the cash flow run off of these asset and liability cash flows. Market value immunization and embedded value analysis are also utilized in the management of interest rate risk.

Retirement Business Dynamic Cash Flows Dynamic liability cash flows, such as fixed annuities, are sensitive to policyholder behavior and the current interest rate environment. The risk and return metrics from deterministic and stochastic interest rate scenarios are used to manage the interest rate risk for these liabilities.

U.S. Insurance Stable Cash Flows Our insurance businesses in many instances contain long-term guarantees with stable and predictable liability cash flows and recurring premiums. We manage the interest rate risk through duration analysis, investment strategy and product crediting rates.

Principal International Our international businesses operate within local regulations and financial market conditions (e.g., derivative markets, assets available) to achieve similar asset and liability cash flow management objectives. In locations with a limited availability of long-dated assets and derivative markets, the duration gap is managed to risk tolerances specific to each location.

We also limit our exposure to interest rate risk through our business mix and strategy. We have intentionally limited our exposure to specific products where investment margins are critical to the product's profitability, and we continue to emphasize the sale of products that generate revenues in the form of fees for service or premiums for insurance coverage and expose us to minimal interest rate risk.

Prepayment risk is controlled by limiting our exposure to investments that are prepayable without penalty prior to maturity at the option of the issuer. We also require additional yield on these investments to compensate for the risk the issuer will exercise such option. Prepayment risk is also controlled by limiting the sales of liabilities with features such as puts or other options that can be exercised against the company at inopportune times. We manage the interest rate risk associated with our long-term borrowings by monitoring the interest rate environment and evaluating refinancing opportunities as maturity dates approach.

The plan fiduciaries use a Dynamic Asset Allocation strategy for our qualified defined benefit pension plan, which strategically allocates an increasing portion of the assets of the pension plan to fixed income securities as the funding status improves. The intended purpose of using the Dynamic Asset Allocation strategy is that the expected change in the value of the plan assets and the change in pension benefit obligation due to market movements are more likely to have more correlation versus a static allocation of assets between categories. For more information see Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies and Estimates Benefit Plans" and Item 8. "Financial Statements and Supplementary Data, Notes to Consolidated Financial Statements, Note 11, Employee and Agent Benefits."

Use of Derivatives to Manage Interest Rate Risk. We use or have previously used various derivative financial instruments to manage our exposure to fluctuations in interest rates, including interest rate swaps, interest rate collars, swaptions and futures. We use interest rate swaps and futures contracts to hedge changes in interest rates subsequent to the issuance of an insurance liability, such as a guaranteed investment contract, but prior to the purchase of a supporting asset, or during periods of holding assets in anticipation of near term liability sales. We use interest rate swaps primarily to more closely match the interest rate characteristics of assets and liabilities. They can be used to change the sensitivity to the interest rate of specific assets and liabilities as well as an entire portfolio. We use interest rate collars to manage interest rate risk related to GMIR liabilities in our individual annuities contracts and lapse risk associated with higher interest rates. We purchase swaptions to offset or modify existing exposures.

Table of Contents**Foreign Currency Risk**

Foreign currency risk is the risk we will incur economic losses due to adverse fluctuations in foreign currency exchange rates. This risk arises from foreign currency-denominated funding agreements issued to nonqualified institutional investors in the international market, foreign currency-denominated fixed maturity and equity securities, and our international operations, including potential acquisition and divestiture activity.

We estimate as of December 31, 2016, a 10% immediate unfavorable change in each of the foreign currency exchange rates to which we are exposed would result in no material change to the net fair value of our foreign currency-denominated instruments identified above because we effectively hedge foreign currency-denominated instruments to minimize exchange rate impacts, which is consistent with our estimate as of December 31, 2015. However, fluctuations in foreign currency exchange rates do affect the translation of segment pre-tax operating earnings and equity of our international operations into our consolidated financial statements.

For our Principal International segment, we estimate a 10% immediate unfavorable change in each of the foreign currency exchange rates to which we were exposed would have resulted in a \$306.0 million, or 10%, reduction in the total equity excluding noncontrolling interests of our international operations as of December 31, 2016, as compared to an estimated \$302.8 million, or 10%, reduction as of December 31, 2015. We estimate a 10% unfavorable change in the average foreign currency exchange rates to which we were exposed through our international operations would have resulted in a \$36.0 million, or 13%, reduction in segment pre-tax operating earnings of our international operations for the year ended December 31, 2016, as compared to an estimated \$34.2 million, or 13%, reduction for the year ended December 31, 2015.

The selection of a 10% immediate unfavorable change in all currency exchange rates should not be construed as a prediction by us of future market events, but rather as an illustration of the potential impact of such an event. These exposures will change as a result of a change in the size and mix of our foreign operations.

Use of Derivatives to Manage Foreign Currency Risk. The foreign currency risk on funding agreements and fixed maturities in our U.S. operations is mitigated by using currency swaps that swap the foreign currency interest and principal payments to our functional currency. The notional amount of our currency swap agreements associated with foreign-denominated liabilities was \$881.1 million and \$1,190.5 million as of December 31, 2016 and December 31, 2015, respectively. The notional amount of our currency swap agreements associated with foreign-denominated fixed maturities was \$452.8 million and \$398.6 million as of December 31, 2016 and December 31, 2015, respectively. The notional amount of our currency forwards hedging foreign-denominated equity securities was \$18.9 million and \$14.9 million as of December 31, 2016 and December 31, 2015, respectively.

With regard to our international operations, in order to enhance the diversification of our investment portfolios we may invest in bonds denominated in a currency that is different than the currency of our liabilities. We use foreign exchange derivatives to economically hedge the currency mismatch. Our Principal International operations had currency swaps with a notional amount of \$218.1 million and \$161.9 million as of December 31, 2016 and December 31, 2015, respectively. Our Principal International operations also utilized currency forwards with a notional amount of \$713.5 million and \$1,001.7 million as of December 31, 2016 and December 31, 2015, respectively.

We sometimes use derivatives to manage the foreign currency risk associated with a business combination. We had no hedges of business combinations outstanding as of December 31, 2016 or December 31, 2015. Additionally, from time to time we take measures to hedge currency risk associated with certain net equity investments in or expected cash flows from our foreign operations. We used currency forwards during 2015 to hedge certain net investments in foreign operations. Currency forwards were not used for hedging any net investments in foreign operations during 2016. We held currency forwards with a notional amount of \$118.9 million and \$24.0 as December 31, 2016 and December 31, 2015, respectively, to hedge expected future cash flows from foreign operations.

Equity Risk

Equity risk is the risk we will incur economic losses due to adverse fluctuations in common stock prices. As of December 31, 2016 and December 31, 2015, the fair value of our equity securities was \$1,512.3 million and \$1,307.2 million, respectively. We estimate a 10% decline in the prices of the equity securities would result in a decline in fair value of our equity securities of \$151.2 million as of December 31, 2016, as compared to a decline in fair value of our equity securities of \$130.7 million as of December 31, 2015.

We are also exposed to the risk that asset-based fees decrease as a result of declines in assets under management due to changes in investment prices and the risk that asset management fees calculated by reference to performance could be lower. The risk of decreased asset-based and asset management fees could also impact our estimates of total gross profits used as a basis for amortizing DAC and other actuarial balances. For further discussion, see Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies and Estimates Deferred Acquisition Costs and Other Actuarial Balances."

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

We also have equity risk associated with (1) fixed deferred annuity and universal life contracts that credit interest to customers based on changes in an external equity index; (2) variable annuity contracts that have a GMWB rider that allows the customer to make withdrawals of a specified annual amount, either for a fixed number of years or for the lifetime of the customer, even if the account value is reduced to zero; (3) variable annuity contracts that have a

Table of Contents

guaranteed minimum death benefit ("GMDB") that allows the death benefit to be paid, even if the account value has fallen below the GMDB amount and (4) investment contracts in which the return is subject to minimum contractual guarantees. We are also subject to equity risk based upon the assets that support our employee benefit plans. For further discussion of equity risk associated with these plans, see Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies and Estimates Benefit Plans."

We estimate an immediate 10% decline in the S&P 500 index, followed by a 2% per quarter increase would reduce our annual segment pre-tax operating earnings by approximately 4% to 6%. This estimate excludes the impact of any potential unlocking of our DAC asset and other actuarial balances. The selection of a 10% unfavorable change in the S&P 500 index should not be construed as a prediction by us of future market events, but rather as an illustration of the potential impact of such an event. Our exposure will change as a result of changes in our mix of business.

Use of Derivatives to Manage Equity Risk. We economically hedge the fixed deferred annuity and universal life products, where the interest credited is linked to an external equity index, by purchasing options that match the product's profile or selling options to offset existing exposures. We economically hedged the GMWB exposure, which includes interest rate risk and equity risk, using futures, options and interest rate swaps with notional amounts of \$641.1 million, \$3,135.0 million, and \$3,996.6 million, respectively, as of December 31, 2016, and notional amounts of \$676.2 million, \$3,284.2 million, and \$3,547.2 million, respectively, as of December 31, 2015. The fair value of both the GMWB embedded derivative and associated hedging instruments are sensitive to financial market conditions and the variance related to the change in fair value of these items for a given period is largely dependent on market conditions at the end of the period.

**Report of Independent Registered Public Accounting Firm
on Internal Control Over Financial Reporting**

The Board of Directors and Stockholders
Principal Financial Group, Inc.

We have audited Principal Financial Group, Inc.'s (the "Company") internal control over financial reporting as of December 31, 2016, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), (the COSO criteria). The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Principal Financial Group, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2016, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statements of financial position of Principal Financial Group, Inc. as of December 31, 2016 and 2015, and the related consolidated statements of operations, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended December 31, 2016, and our report dated February 8, 2017, expressed an unqualified opinion thereon.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Principal Financial Group, Inc.

We have audited the accompanying consolidated statements of financial position of Principal Financial Group, Inc. (the "Company") as of December 31, 2016 and 2015, and the related consolidated statements of operations, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended December 31, 2016. Our audits also included the financial statement schedules listed in the Index at Item 15(a). These financial statements and schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Principal Financial Group, Inc. at December 31, 2016 and 2015, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2016, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedules, when considered in relation to the basic financial statements taken as a whole, present fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Principal Financial Group, Inc.'s internal control over financial reporting as of December 31, 2016, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), and our report dated February 8, 2017 expressed an unqualified opinion thereon.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements****December 31, 2016****1. Nature of Operations and Significant Accounting Policies****Description of Business**

Principal Financial Group, Inc. ("PFG") is a leader in global investment management offering businesses, individuals and institutional clients a wide range of financial products and services, including retirement, asset management and insurance through our diverse family of financial services companies.

Basis of Presentation

The accompanying consolidated financial statements include the accounts of PFG and all other entities in which we directly or indirectly have a controlling financial interest as well as those variable interest entities ("VIEs") in which we are the primary beneficiary. The consolidated financial statements have been prepared in conformity with U.S. generally accepted accounting principles ("U.S. GAAP"). All significant intercompany accounts and transactions have been eliminated.

Consolidation

We have relationships with various special purpose entities and other legal entities that must be evaluated to determine if the entities meet the criteria of a VIE or a voting interest entity ("VOE"). This assessment is performed by reviewing contractual, ownership and other rights, including involvement of related parties, and requires use of judgment. First, we determine if we hold a variable interest in an entity by assessing if we have the right to receive expected losses and expected residual returns of the entity. If we hold a variable interest, then the entity is assessed to determine if it is a VIE. An entity is a VIE if the equity at risk is not sufficient to support its activities, if the equity holders lack a controlling financial interest or if the entity is structured with non-substantive voting rights. In addition to the previous criteria, if the entity is a limited partnership or similar entity, it is a VIE if the limited partners do not have the power to direct the entity's most significant activities through substantive kick-out rights or participating rights. A VIE is evaluated to determine the primary beneficiary. The primary beneficiary of a VIE is the enterprise with (1) the power to direct the activities of a VIE that most significantly impact the entity's economic performance and (2) the obligation to absorb losses of the entity or the right to receive benefits from the entity that could potentially be significant to the VIE. When we are the primary beneficiary, we are required to consolidate the entity in our financial statements. We reassess our involvement with VIEs on a quarterly basis. For further information about VIEs, refer to Note 3, Variable Interest Entities.

If an entity is not a VIE, it is considered a VOE. VOEs are generally consolidated if we own a greater than 50% voting interest. If we determine our involvement in an entity no longer meets the requirements for consolidation under either the VIE or VOE models, the entity is deconsolidated. Entities in which we have significant management influence over the operating and financing decisions but are not required to consolidate, other than investments accounted for at fair value under the fair value option, are reported using the equity method.

Description	Date of adoption	Effect on our consolidated financial statements or other significant matters
<i>Standards not yet adopted:</i>		
Goodwill impairment testing This authoritative guidance is to simplify how an entity is required to test goodwill for impairment by eliminating Step 2 (which measures a goodwill impairment loss by	January 1, 2020	We are currently evaluating the impact this guidance will have on our consolidated financial statements.

comparing the implied fair value of a reporting unit's goodwill with the carrying amount of that goodwill) from the goodwill impairment test. A goodwill impairment will now be the amount by which a reporting unit's carrying value exceeds its fair value, not to exceed the carrying amount of goodwill. Entities will continue to have the option to perform a qualitative assessment to determine if a quantitative impairment test is necessary. Early adoption is permitted.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****1. Nature of Operations and Significant Accounting Policies (continued)**

Description	Date of adoption	Effect on our consolidated financial statements or other significant matters
<p>Credit losses This authoritative guidance requires entities to use a current expected credit loss ("CECL") model to measure impairment for most financial assets that are not recorded at fair value through net income. Under the CECL model, an entity will estimate lifetime expected credit losses considering available relevant information about historical events, current conditions and reasonable and supportable forecasts. The CECL model does not apply to available-for-sale debt securities. This guidance also expands the required credit loss disclosures and will be applied using a modified retrospective approach by recording a cumulative-effect adjustment to retained earnings as of the beginning of the period of adoption. Early adoption is permitted.</p>	January 1, 2020	We are currently evaluating the impact this guidance will have on our consolidated financial statements. We believe estimated credit losses under the CECL model will generally result in earlier loss recognition for loans and other receivables.
<p>Leases This authoritative guidance requires lessee recognition of lease assets and lease liabilities on the balance sheet. The concept of an operating lease, where the lease assets and liabilities are off balance sheet, is eliminated under the new guidance. For lessors, the guidance modifies lease classification criteria and accounting for certain types of leases. Other key aspects of the guidance relate to the removal of the current real estate-specific guidance and new presentation and disclosure requirements. Lessees and lessors are required to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach, which includes certain optional practical expedients that may be elected. Early adoption is permitted.</p>	January 1, 2019	This guidance will require us to add our operating leases to the balance sheet. We are currently evaluating other impacts this guidance will have on our consolidated financial statements.
<p>Definition of a business This authoritative guidance clarifies the definition of a business to assist with evaluating when transactions involving an integrated set of assets and activities (a "set") should be accounted for as acquisitions or disposals of assets or businesses. The guidance requires that when substantially all of the fair value of the gross assets acquired or disposed of is concentrated in a single identifiable asset or a group of similar identifiable assets, the set is not a business. The guidance also requires a set to include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create output to be considered a business. Lastly, the guidance removes the evaluation of whether a market participant could replace missing elements and narrows the definition of outputs by more closely aligning it with how outputs are</p>	January 1, 2018	We are currently evaluating the impact this guidance will have on our consolidated financial statements.

described in the revenue recognition guidance. The guidance will be applied prospectively. Early application is permitted in certain circumstances.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****1. Nature of Operations and Significant Accounting Policies (continued)**

Description	Date of adoption	Effect on our consolidated financial statements or other significant matters
<p>Financial instruments recognition and measurement This authoritative guidance addresses certain aspects of recognition, measurement, presentation and disclosure of financial instruments. The primary focus of this guidance is to supersede the guidance to classify equity securities with readily determinable fair values into different categories (trading or available-for-sale) and requires equity securities to be measured at fair value with changes in the fair value recognized through net income. This guidance requires adoption through a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption.</p>	January 1, 2018	We are currently evaluating the impact this guidance will have on our consolidated financial statements. As of December 31, 2016, we do not hold material equity securities accounted for at fair value through other comprehensive income that will be accounted for at fair value through net income under the updated guidance. This change is not expected to have a material impact on our consolidated financial statements.
<p>Revenue recognition This authoritative guidance replaces all general and most industry specific revenue recognition guidance (excluding insurance) currently prescribed by U.S. GAAP. The core principle is that an entity recognizes revenue to reflect the transfer of a promised good or service to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for that good or service. This guidance also provides clarification on when an entity is a principal or an agent in a transaction. The guidance may be applied using one of the following two methods: (1) retrospectively to each prior reporting period presented, or (2) retrospectively with the cumulative effect of initially applying the standard recognized at the date of initial application.</p>	January 1, 2018	We are currently evaluating the impact this guidance will have on our consolidated financial statements. Only a portion of our revenues are impacted by this guidance because the guidance does not apply to revenue on contracts accounted for under the financial instruments or insurance contracts standards. Our evaluation process includes, but is not limited to, identifying contracts within the scope of the guidance, reviewing and documenting our accounting for these contracts, and identifying and determining the accounting for any related contract costs.
<p>Income tax intra-entity transfers of assets This authoritative guidance requires entities to recognize current and deferred income tax resulting from an intra-entity asset transfer when the transfer occurs. Prior to issuance of this guidance, U.S. GAAP did not allow recognition of income tax consequences until the asset had been sold to a third party. This guidance requires adoption through a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption with early adoption permitted.</p>	January 1, 2018	We are currently evaluating the impact this guidance will have on our consolidated financial statements.
<p>Employee share-based payment accounting This authoritative guidance changes certain aspects of accounting for and reporting share-based payments to employees including changes related to the income tax effects of share-based payments, tax withholding requirements and accounting for forfeitures. Various transition methods will apply depending on the situation being addressed.</p>	January 1, 2017	The guidance will be adopted prospectively as indicated by the guidance for each area of change and will not have a material impact on our consolidated financial statements.

Description	Date of adoption	Effect on our consolidated financial statements or other significant matters
<p>Foreign currency cumulative translation adjustment This authoritative guidance clarifies how the cumulative translation adjustment related to a parent's investment in a foreign entity should be released when certain transactions related to the foreign entity occur.</p>	January 1, 2014	The guidance was adopted prospectively and did not have a material impact on our consolidated financial statements.

When we adopt new accounting standards, we have a process in place to perform a thorough review of the pronouncement, identify the financial statement and system impacts and create an implementation plan among our impacted business units to ensure we are compliant with the pronouncement on the date of adoption. This includes having effective processes and controls in place to support the reported amounts. Each of the standards listed above is in varying stages in our implementation process based on its issuance and adoption dates. We are on track to implement guidance by the respective effective dates.

Use of Estimates in the Preparation of Financial Statements

The preparation of our consolidated financial statements and accompanying notes requires management to make estimates and assumptions that affect the amounts reported and disclosed. These estimates and assumptions could change in the future as more information becomes known, which could impact the amounts reported and disclosed in the consolidated financial statements and accompanying notes. The most critical estimates include those used in determining:

the fair value of investments in the absence of quoted market values;

investment impairments and valuation allowances;

the fair value of and accounting for derivatives;

the deferred acquisition costs ("DAC") and other actuarial balances where the amortization is based on estimated gross profits;

the measurement of goodwill, indefinite lived intangible assets, finite lived intangible assets and related impairments or amortization, if any;

the liability for future policy benefits and claims;

the value of our pension and other postretirement benefit obligations and

accounting for income taxes and the valuation of deferred tax assets.

A description of such critical estimates is incorporated within the discussion of the related accounting policies that follow. In applying these policies, management makes subjective and complex judgments that frequently require estimates about matters that are inherently uncertain. Many of these policies, estimates and related judgments are common in the insurance and financial services industries; others are specific to our businesses and operations. Actual results could differ from these estimates.

Closed Block

Principal Life Insurance Company ("Principal Life") operates a closed block ("Closed Block") for the benefit of individual participating dividend-paying policies in force at the time of the 1998 mutual insurance holding company ("MIHC") formation. See Note 6, Closed Block, for further details.

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, money market instruments and other debt issues with a maturity date of three months or less when purchased.

Investments

Fixed maturities include bonds, asset-backed securities ("ABS"), redeemable preferred stock and certain non-redeemable preferred securities. Equity securities include mutual funds, common stock, non-redeemable preferred

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****1. Nature of Operations and Significant Accounting Policies (continued)**

stock and required regulatory investments. We classify fixed maturities and equity securities as either available-for-sale or trading at the time of the purchase and, accordingly, carry them at fair value. See Note 14, Fair Value Measurements, for methodologies related to the determination of fair value. Unrealized gains and losses related to available-for-sale securities, excluding those in fair value hedging relationships, are reflected in stockholders' equity, net of adjustments associated with DAC and related actuarial balances, derivatives in cash flow hedge relationships and applicable income taxes. Unrealized gains and losses related to hedged portions of available-for-sale securities in fair value hedging relationships and mark-to-market adjustments on certain trading securities are reflected in net realized capital gains (losses). Mark-to-market adjustments related to certain securities carried at fair value with an investment objective to realize economic value through mark-to-market changes are reflected in net investment income.

The cost of fixed maturities is adjusted for amortization of premiums and accrual of discounts, both computed using the interest method. The cost of fixed maturities and equity securities classified as available-for-sale is adjusted for declines in value that are other than temporary. Impairments in value deemed to be other than temporary are primarily reported in net income as a component of net realized capital gains (losses), with noncredit impairment losses for certain fixed maturities, available-for-sale reported in other comprehensive income ("OCI"). Interest income, as well as prepayment fees and the amortization of the related premium or discount, is reported in net investment income. For loan-backed and structured securities, we recognize income using a constant effective yield based on currently anticipated cash flows.

Real estate investments are reported at cost less accumulated depreciation. The initial cost bases of properties acquired through loan foreclosures are the lower of the fair market values of the properties at the time of foreclosure or the outstanding loan balance. Buildings and land improvements are generally depreciated on the straight-line method over the estimated useful life of improvements and tenant improvement costs are depreciated on the straight-line method over the term of the related lease. We recognize impairment losses for properties when indicators of impairment are present and a property's expected undiscounted cash flows are not sufficient to recover the property's carrying value. In such cases, the cost basis of the properties are reduced to fair value. Real estate expected to be disposed is carried at the lower of cost or fair value, less cost to sell, with valuation allowances established accordingly and depreciation no longer recognized. The carrying amount of real estate held for sale was \$130.7 million and \$169.7 million as of December 31, 2016 and 2015, respectively. Any impairment losses and any changes in valuation allowances are reported in net income.

Commercial and residential mortgage loans are generally reported at cost adjusted for amortization of premiums and accrual of discounts, computed using the interest method and net of valuation allowances. Interest income is accrued on the principal amount of the loan based on the loan's contractual interest rate. Interest income, as well as prepayment of fees and the amortization of the related premium or discount, is reported in net investment income. Any changes in the valuation allowances are reported in net income as net realized capital gains (losses). We measure impairment based upon the difference between carrying value and estimated value less cost to sell. Estimated value is based on either the present value of expected cash flows discounted at the loan's effective interest rate, the loan's observable market price or the fair value of the collateral. If foreclosure is probable, the measurement of any valuation allowance is based upon the fair value of the collateral.

Net realized capital gains and losses on sales of investments are determined on the basis of specific identification. In general, in addition to realized capital gains and losses on investment sales and periodic settlements on derivatives not designated as hedges, we report gains and losses related to the following in net realized capital gains (losses): other-than-temporary impairments of securities and subsequent realized recoveries, mark-to-market adjustments on certain trading securities, mark-to-market adjustments on sponsored investment funds, fair value hedge and cash flow hedge ineffectiveness, mark-to-market adjustments on derivatives not designated as hedges, changes in the mortgage loan valuation allowance provision, impairments of real estate held for investment and impairments of equity method investments. Investment gains and losses on sales of certain real estate held for sale due to investment strategy and mark-to-market adjustments on certain securities carried at fair value with an investment objective to realize economic value through mark-to-market changes are reported as net investment income and are excluded from net realized capital gains (losses).

Policy loans and certain other investments are reported at cost. Interests in unconsolidated entities, joint ventures and partnerships are generally accounted for using the equity method. We have other investments reported at fair value or for which the fair value option has been elected. See Note 14, Fair Value Measurements, for detail on these investments.

Notes to Consolidated Financial Statements (continued)

December 31, 2016

1. Nature of Operations and Significant Accounting Policies (continued)

Derivatives

Overview

Derivatives are financial instruments whose values are derived from interest rates, foreign exchange rates, financial indices or the values of securities. Derivatives generally used by us include interest rate swaps, interest rate options, swaptions, currency swaps, currency forwards, equity options, futures, credit default swaps and total return swaps. Derivative positions are either assets or liabilities in the consolidated statements of financial position and are measured at fair value, generally by obtaining quoted market prices or through the use of pricing models. See Note 14, Fair Value Measurements, for policies related to the determination of fair value. Fair values can be affected by changes in interest rates, foreign exchange rates, financial indices, values of securities, credit spreads, and market volatility and liquidity.

Accounting and Financial Statement Presentation

We designate derivatives as either:

- (a) a hedge of the exposure to changes in the fair value of a recognized asset or liability or an unrecognized firm commitment, including those denominated in a foreign currency ("fair value hedge");
- (b) a hedge of a forecasted transaction or the exposure to variability of cash flows to be received or paid related to a recognized asset or liability, including those denominated in a foreign currency ("cash flow hedge");
- (c) a hedge of a net investment in a foreign operation or
- (d) a derivative not designated as a hedging instrument.

Our accounting for the ongoing changes in fair value of a derivative depends on the intended use of the derivative and the designation, as described above, and is determined when the derivative contract is entered into or at the time of redesignation. Hedge accounting is used for derivatives that are specifically designated in advance as hedges and that reduce our exposure to an indicated risk by having a high correlation between changes in the value of the derivatives and the items being hedged at both the inception of the hedge and throughout the hedge period.

Fair Value Hedges. When a derivative is designated as a fair value hedge and is determined to be highly effective, changes in its fair value, along with changes in the fair value of the hedged asset, liability or firm commitment attributable to the hedged risk, are reported in net realized capital gains (losses). Any difference between the net change in fair value of the derivative and the hedged item represents hedge ineffectiveness.

Cash Flow Hedges. When a derivative is designated as a cash flow hedge and is determined to be highly effective, changes in its fair value are recorded as a component of OCI. Any hedge ineffectiveness is recorded immediately in net income. At the time the variability of cash flows being hedged impacts net income, the related portion of deferred gains or losses on the derivative instrument is reclassified and reported in net income.

Net Investment in a Foreign Operation Hedge. When a derivative is used as a hedge of a net investment in a foreign operation, its change in fair value, to the extent effective as a hedge, is recorded as a component of OCI. Any hedge ineffectiveness is recorded immediately in net income. If the foreign operation is sold or upon complete or substantially complete liquidation, the deferred gains or losses on the derivative instrument are reclassified into net income.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Non-Hedge Derivatives. If a derivative does not qualify or is not designated for hedge accounting, all changes in fair value are reported in net income without considering the changes in the fair value of the economically associated assets or liabilities.

Hedge Documentation and Effectiveness Testing. At inception, we formally document all relationships between hedging instruments and hedged items, as well as our risk management objective and strategy for undertaking various hedge transactions. This process includes associating all derivatives designated as fair value or cash flow hedges with specific assets or liabilities on the consolidated statements of financial position or with specific firm commitments or forecasted transactions. Effectiveness of the hedge is formally assessed at inception and throughout the life of the hedging relationship. Even if a derivative is highly effective and qualifies for hedge accounting treatment, the hedge might have some ineffectiveness.

We use qualitative and quantitative methods to assess hedge effectiveness. Qualitative methods may include monitoring changes to terms and conditions and counterparty credit ratings. Quantitative methods may include statistical tests including regression analysis and minimum variance and dollar offset techniques.

Table of Contents

Principal Financial Group, Inc.

Notes to Consolidated Financial Statements (continued)

December 31, 2016

1. Nature of Operations and Significant Accounting Policies (continued)

Termination of Hedge Accounting. We prospectively discontinue hedge accounting when (1) the criteria to qualify for hedge accounting is no longer met, e.g., a derivative is determined to no longer be highly effective in offsetting the change in fair value or cash flows of a hedged item; (2) the derivative expires, is sold, terminated or exercised or (3) we remove the designation of the derivative being the hedging instrument for a fair value or cash flow hedge.

If it is determined that a derivative no longer qualifies as an effective hedge, the derivative will continue to be carried on the consolidated statements of financial position at its fair value, with changes in fair value recognized prospectively in net realized capital gains (losses). The asset or liability under a fair value hedge will no longer be adjusted for changes in fair value pursuant to hedging rules and the existing basis adjustment is amortized to the consolidated statements of operations line associated with the asset or liability. The component of accumulated other comprehensive income ("AOCI") related to discontinued cash flow hedges that are no longer highly effective is amortized to the consolidated statements of operations consistent with the net income impacts of the original hedged cash flows. If a cash flow hedge is discontinued because it is probable the hedged forecasted transaction will not occur, the deferred gain or loss is immediately reclassified from AOCI into net income.

Embedded Derivatives. We purchase and issue certain financial instruments and products that contain a derivative that is embedded in the financial instrument or product. We assess whether this embedded derivative is clearly and closely related to the asset or liability that serves as its host contract. If we deem that the embedded derivative's terms are not clearly and closely related to the host contract, and a separate instrument with the same terms would qualify as a derivative instrument, the derivative is bifurcated from that contract and held at fair value on the consolidated statements of financial position, with changes in fair value reported in net income.

Contractholder and Policyholder Liabilities

Contractholder and policyholder liabilities (contractholder funds, future policy benefits and claims and other policyholder funds) include reserves for investment contracts, individual and group annuities that provide periodic income payments, universal life, term life insurance, participating traditional individual life insurance, group life insurance, health insurance and disability income policies, as well as a provision for dividends on participating policies.

Investment contracts are contractholders' funds on deposit with us and generally include reserves for pension and annuity contracts. Reserves on investment contracts are equal to the cumulative deposits less any applicable charges and withdrawals plus credited interest. Reserves for universal life insurance contracts are equal to cumulative deposits less charges plus credited interest, which represents the account balances that accrue to the benefit of the policyholders.

We hold additional reserves on certain long-duration contracts where benefit features result in gains in early years followed by losses in later years, universal life/variable universal life contracts that contain no lapse guarantee features, or annuities with guaranteed minimum death benefits.

Reserves for individual and group annuities that provide periodic income payments, nonparticipating term life insurance and disability income contracts are computed on a basis of assumed investment yield, mortality, morbidity and expenses, including a provision for adverse deviation, which generally varies by plan, year of issue and policy duration. Investment yield is based on our experience. Mortality, morbidity and withdrawal rate assumptions are based on our experience and are periodically reviewed against both industry standards and experience.

Reserves for participating life insurance contracts are based on the net level premium reserve for death and endowment policy benefits. This net level premium reserve is calculated based on dividend fund interest rates and mortality rates guaranteed in calculating the cash surrender values described in the contract.

Participating business represented approximately 8%, 9% and 11% of our life insurance in force and 33%, 36% and 40% of the number of life insurance policies in force as of December 31, 2016, 2015 and 2014, respectively. Participating business represented approximately 31%, 36% and 40% of life insurance premiums for the years ended December 31, 2016, 2015 and 2014, respectively. The amount of dividends to

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

policyholders is declared annually by Principal Life's Board of Directors. The amount of dividends to be paid to policyholders is determined after consideration of several factors including interest, mortality, morbidity and other expense experience for the year and judgment as to the appropriate level of statutory surplus to be retained by Principal Life. At the end of the reporting period, Principal Life establishes a dividend liability for the pro rata portion of the dividends expected to be paid on or before the next policy anniversary date.

Some of our policies and contracts require payment of fees or other policyholder assessments in advance for services that will be rendered over the estimated lives of the policies and contracts. These payments are established as unearned revenue liabilities upon receipt and included in other policyholder funds in the consolidated statements of financial

Table of Contents

Principal Financial Group, Inc.

Notes to Consolidated Financial Statements (continued)

December 31, 2016

1. Nature of Operations and Significant Accounting Policies (continued)

position. These unearned revenue reserves are amortized to operations over the estimated lives of these policies and contracts in relation to the emergence of estimated gross profits ("EGPs").

The liability for unpaid claims for both long-duration and short-duration contracts is an estimate of the ultimate net cost of reported and unreported losses not yet settled. This liability is estimated using actuarial analyses and case basis evaluations. Although considerable variability is inherent in such estimates, we believe the liability for unpaid claims is adequate. These estimates are continually reviewed and, as adjustments to this liability become necessary, such adjustments are reflected in net income. Our liability for unpaid claims does not include any allocated claim adjustment expenses.

We incur claim adjustment expenses for both long-duration and short-duration contracts that cannot be allocated to a specific claim. Our claim adjustment expense liability is estimated using actuarial analyses based on historical trends of expenses and expected claim runoff patterns.

Short-Duration Contracts

We include the following group products in our short-duration insurance contracts disclosures: long-term disability ("LTD"), group life waiver, dental, vision, short-term disability ("STD") and group life.

Future policy benefits and claims include reserves for group life and disability insurance that provide periodic income payments. These reserves are computed using assumptions of mortality, morbidity and investment performance. These assumptions are based on our experience, industry results, emerging trends and future expectations. Future policy benefits and claims also include reserves for incurred but unreported group disability, dental, vision and life insurance claims. We recognize claims costs in the period the service was provided to our policyholders. However, claims costs incurred in a particular period are not known with certainty until after we receive, process and pay the claims. We determine the amount of this liability using actuarial methods based on historical claim payment patterns as well as emerging cost trends, where applicable, to determine our estimate of claim liabilities.

We have defined claim frequency as follows for each short-duration product:

LTD: Claim frequency is based on submitted reserve claim counts.

Group Life Waiver: Claim frequency is based on submitted reserve claim counts, consistent with LTD.

Dental and Vision: Claim frequency is based on the claim form, which may include one or more procedures.

STD: Claim frequency is based on submitted claims.

Group Life: Claim frequency is based on submitted life claims (lives, not coverages).

We did not make any significant changes to our methodologies or assumptions used to calculate the liability for unpaid claims for short-duration contracts during 2016.

Recognition of Premiums and Other Considerations, Fees and Other Revenues and Benefits

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Traditional individual life insurance products include those products with fixed and guaranteed premiums and benefits and consist principally of whole life and term life insurance policies. Premiums from these products are recognized as premium revenue when due. Related policy benefits and expenses for individual life products are associated with earned premiums and result in the recognition of profits over the expected term of the policies and contracts.

Immediate annuities with life contingencies include products with fixed and guaranteed annuity considerations and benefits and consist principally of group and individual single premium annuities with life contingencies. Annuity considerations from these products are recognized as premium revenue. However, the collection of these annuity considerations does not represent the completion of the earnings process, as we establish annuity reserves using estimates for mortality and investment assumptions, which include provision for adverse deviation as required by U.S. GAAP. We anticipate profits to emerge over the life of the annuity products as we earn investment income, pay benefits and release reserves.

Group life and health insurance premiums are generally recorded as premium revenue over the term of the coverage. Certain group contracts contain experience premium refund provisions based on a pre-defined formula that reflects their claim experience. Experience premium refunds reduce revenue over the term of the coverage and are adjusted to reflect current experience. Related policy benefits and expenses for group life and health insurance products are associated with earned premiums and result in the recognition of profits over the term of the policies and contracts.

Table of Contents

Principal Financial Group, Inc.

Notes to Consolidated Financial Statements (continued)

December 31, 2016

1. Nature of Operations and Significant Accounting Policies (continued)

Fees for contracts providing claim processing or other administrative services are recorded as revenue over the period the service is provided.

Universal life-type policies are insurance contracts with terms that are not fixed. Amounts received as payments for such contracts are not reported as premium revenues. Revenues for universal life-type insurance contracts consist of policy charges for the cost of insurance, policy initiation and administration, surrender charges and other fees that have been assessed against policy account values and investment income. Policy benefits and claims that are charged to expense include interest credited to contracts and benefit claims incurred in the period in excess of related policy account balances.

Investment contracts do not subject us to significant risks arising from policyholder mortality or morbidity and consist primarily of guaranteed investment contracts ("GICs"), funding agreements and certain deferred annuities. Amounts received as payments for investment contracts are established as investment contract liability balances and are not reported as premium revenues. Revenues for investment contracts consist of investment income and policy administration charges. Investment contract benefits that are charged to expense include benefit claims incurred in the period in excess of related investment contract liability balances and interest credited to investment contract liability balances.

Fees and other revenues are earned for asset management services provided to retail and institutional clients based largely upon contractual rates applied to the market value of the client's portfolio. Additionally, fees and other revenues are earned for administrative services performed including recordkeeping and reporting services for retirement savings plans. Fees and other revenues received for performance of asset management and administrative services are recognized as revenue when earned, typically when the service is performed.

Fees for managing customers' mandatory retirement savings accounts in Chile are collected with each monthly deposit made by our customers. If a customer stops contributing before retirement age, we collect no fees but services are still provided. We recognize revenue from these long-term service contracts as services are performed over the life of the contract.

Deferred Acquisition Costs

Incremental direct costs of contract acquisition as well as certain costs directly related to acquisition activities (underwriting, policy issuance and processing, medical and inspection and sales force contract selling) for the successful acquisition of new and renewal insurance policies and investment contract business are capitalized to the extent recoverable. Commissions and other incremental direct costs for the acquisition of long-term service contracts are also capitalized to the extent recoverable. Maintenance costs and acquisition costs that are not deferrable are charged to net income as incurred.

DAC for universal life-type insurance contracts and certain investment contracts are amortized over the lives of the contracts in relation to EGPs or, in certain circumstances, estimated gross revenues. This amortization is adjusted in the current period when EGPs or estimated gross revenues are revised. For individual variable life insurance, individual variable annuities and group annuities that have separate account U.S. equity investment options, we utilize a mean reversion methodology (reversion to the mean assumption), a common industry practice, to determine the future domestic equity market growth rate assumption used for the calculation of EGPs. DAC for participating life insurance policies are amortized in proportion to estimated gross margins. DAC for non-participating term life insurance and individual disability policies are amortized over the premium-paying period of the related policies using assumptions consistent with those used in computing policyholder liabilities.

DAC on insurance policies and investment contracts are subject to recoverability testing at the time of policy issue and loss recognition testing on an annual basis, or when an event occurs that may warrant loss recognition. If loss recognition or impairment is necessary, DAC would be written off to the extent it is determined that future policy premiums and investment income or gross profits are not adequate to cover related losses and expenses.

DAC for long-term service contracts are amortized in proportion to the revenue recognized or straight-line if no pattern of revenue recognition can be reasonably predicted. We amortize capitalized costs of long-term service contracts on a straight-line basis, reflecting lapses as they are incurred, over the expected contract life.

Deferred Acquisition Costs on Internal Replacements

All insurance and investment contract modifications and replacements are reviewed to determine if the internal replacement results in a substantially changed contract. If so, the acquisition costs, sales inducements and unearned

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****1. Nature of Operations and Significant Accounting Policies (continued)**

revenue associated with the new contract are deferred and amortized over the lifetime of the new contract. In addition, the existing DAC, sales inducement costs and unearned revenue balances associated with the replaced contract are written off. If an internal replacement results in a substantially unchanged contract, the acquisition costs, sales inducements and unearned revenue associated with the new contract are immediately recognized in the period incurred. In addition, the existing DAC, sales inducement costs or unearned revenue balance associated with the replaced contract is not written off, but instead is carried over to the new contract.

Long-Term Debt

Long-term debt includes notes payable, nonrecourse mortgages and other debt with a maturity date greater than one year at the date of issuance. Current maturities of long-term debt are classified as long-term debt in our consolidated statements of financial position.

Reinsurance

We enter into reinsurance agreements with other companies in the normal course of business in order to limit losses and minimize exposure to significant risks. We may assume reinsurance from or cede reinsurance to other companies. Assets and liabilities related to reinsurance ceded are reported on a gross basis. Premiums and expenses are reported net of reinsurance ceded. The cost of reinsurance related to long-duration contracts is accounted for over the life of the underlying reinsured policies using assumptions consistent with those used to account for the underlying policies. We are contingently liable with respect to reinsurance ceded to other companies in the event the reinsurer is unable to meet the obligations it has assumed. As of December 31, 2016 and 2015, we had \$412.8 million and \$397.5 million of net ceded reinsurance recoverables related to claims that have been received, respectively. As of December 31, 2016 and 2015, \$390.5 million, or 95%, and \$379.4 million, or 95%, were with our five largest ceded reinsurers, respectively. Our total amount recoverable from reinsurers includes net ceded reinsurance recoverables related to claims that have been received and reserves ceded to reinsurers; however, it does not reflect potentially offsetting impacts of collateral. As of December 31, 2016 and 2015, the total amount recoverable from reinsurers was \$837.1 million and \$857.3 million, respectively.

The effects of reinsurance on premiums and other considerations and policy and contract benefits were as follows:

	For the year ended December 31,		
	2016	2015	2014
	<i>(in millions)</i>		
Premiums and other considerations:			
Direct	\$ 5,753.8	\$ 5,710.8	\$ 4,123.7
Assumed	1.7	1.9	2.1
Ceded	(456.4)	(402.4)	(402.9)
Net premiums and other considerations	\$ 5,299.1	\$ 5,310.3	\$ 3,722.9
Benefits, claims and settlement expenses:			
Direct	\$ 7,202.5	\$ 7,196.7	\$ 5,532.5
Assumed	28.1	28.7	30.7
Ceded	(317.4)	(527.7)	(332.2)
Net benefits, claims and settlement expenses	\$ 6,913.2	\$ 6,697.7	\$ 5,231.0

Separate Accounts

The separate accounts are legally segregated and are not subject to the claims that arise out of any of our other business. The client, rather than us, directs the investments and bears the investment risk of these funds. The separate account assets represent the fair value of funds that are separately administered by us for contracts with equity, real estate and fixed income investments and are presented as a summary total within the consolidated statements of financial position. An equivalent amount is reported as separate account liabilities, which represent the obligation to return the monies to the client. We receive fees for mortality, withdrawal and expense risks, as well as administrative, maintenance and investment advisory services that are included in the consolidated statements of operations. Net deposits, net investment income and realized and unrealized capital gains and losses of the separate accounts are not reflected in the consolidated statements of operations.

Table of Contents

Principal Financial Group, Inc.

Notes to Consolidated Financial Statements (continued)

December 31, 2016

1. Nature of Operations and Significant Accounting Policies (continued)

Separate account assets and separate account liabilities include certain international retirement accumulation products where the segregated funds and associated obligation to the client are consolidated within our financial statements. We have determined that summary totals are the most meaningful presentation for these funds.

As of December 31, 2016 and December 31, 2015, the separate accounts included a separate account valued at \$158.4 million and \$158.2 million, respectively, which primarily included shares of our stock that were allocated and issued to eligible participants of qualified employee benefit plans administered by us as part of the policy credits issued under our 2001 demutualization. These shares are included in both basic and diluted earnings per share calculations. In the consolidated statements of financial position, the separate account shares are recorded at fair value and are reported as separate account assets with a corresponding separate account liability to eligible participants of the qualified plan. Changes in fair value of the separate account shares are reflected in both the separate account assets and separate account liabilities and do not impact our results of operations.

Income Taxes

We file a U.S. consolidated income tax return that includes all of our qualifying subsidiaries. In addition, we file income tax returns in all states and foreign jurisdictions in which we conduct business. Our policy of allocating income tax expenses and benefits to companies in the group is generally based upon pro rata contribution of taxable income or operating losses. We are taxed at corporate rates on taxable income based on existing tax laws. Current income taxes are charged or credited to net income based upon amounts estimated to be payable or recoverable as a result of taxable operations for the current year. Deferred income taxes are provided for the tax effect of temporary differences in the financial reporting and income tax bases of assets and liabilities, net operating loss carryforwards and tax credit carryforwards using enacted income tax rates and laws. The effect on deferred income tax assets and deferred income tax liabilities of a change in tax rates is recognized in net income in the period in which the change is enacted.

Foreign Exchange

Assets and liabilities of our foreign subsidiaries and affiliates denominated in non-U.S. dollars, where the U.S. dollar is not the functional currency, are translated into U.S. dollar equivalents at the year-end spot foreign exchange rates. Resulting translation adjustments are reported as a component of stockholders' equity, along with any related hedge and tax effects. Revenues and expenses for these entities are translated at the average exchange rates. Revenue, expense and other foreign currency transaction and translation adjustments that affect cash flows are reported in net income, along with related hedge and tax effects.

Goodwill and Other Intangibles

Goodwill and other intangible assets include the cost of acquired subsidiaries in excess of the fair value of the net tangible assets recorded in connection with acquisitions. Goodwill and indefinite-lived intangible assets are not amortized. Rather, they are tested for impairment during the third quarter each year, or more frequently if events or changes in circumstances indicate that the asset might be impaired. Goodwill is tested at the reporting unit level, which is a business one level below the operating segment, if financial information is prepared and regularly reviewed by management at that level. Once goodwill has been assigned to a reporting unit, it is no longer associated with a particular acquisition; therefore, all of the activities within a reporting unit, whether acquired or organically grown, are available to support the goodwill value. Impairment testing for indefinite-lived intangible assets consists of a comparison of the fair value of the intangible asset with its carrying value.

Intangible assets with a finite useful life are amortized as related benefits emerge and are reviewed periodically for indicators of impairment in value. If facts and circumstances suggest possible impairment, the sum of the estimated undiscounted future cash flows expected to result from the use of the asset is compared to the current carrying value of the asset. If the undiscounted future cash flows are less than the carrying value, an impairment loss is recognized for the excess of the carrying amount of assets over their fair value.

Earnings Per Common Share

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Basic earnings per common share is calculated by dividing income available to common stockholders by the weighted-average number of common shares outstanding for the period and excludes the dilutive effect of equity awards. Diluted earnings per common share reflects the potential dilution that could occur if dilutive securities, such as options and non-vested stock grants, were exercised or resulted in the issuance of common stock.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****2. Goodwill and Other Intangible Assets****Goodwill**

The changes in the carrying amount of goodwill reported in our segments were as follows:

	Retirement and Income Solutions	Principal Global Investors	Principal International	U.S. Insurance Solutions	Corporate	Consolidated
	<i>(in millions)</i>					
Balance as of January 1, 2015	\$ 57.4	\$ 252.4	\$ 641.0	\$ 56.6	\$	\$ 1,007.4
Goodwill from acquisitions		3.1	101.7			104.8
Foreign currency		(3.4)	(99.8)			(103.2)
Balance as of December 31, 2015	57.4	252.1	642.9	56.6		1,009.0
Foreign currency		(9.6)	21.4			11.8
Balance as of December 31, 2016	\$ 57.4	\$ 242.5	\$ 664.3	\$ 56.6	\$	\$ 1,020.8

On September 1, 2015, we completed our purchase of AXA's Mandatory Provident Fund ("MPF") and Occupational Retirement Schemes Ordinance ("ORSO") pension business in Hong Kong for \$335.5 million. As part of the transaction, we entered into an exclusive 15-year distribution agreement with AXA to provide co-branded pension products through AXA's extensive agency network in Hong Kong. AXA's MPF and ORSO pension business is consolidated within our Principal International segment with a portion of the goodwill and identifiable intangible assets allocated to our Principal Global Investors segment.

Of the acquired intangible assets, \$104.8 million was assigned to goodwill and is not subject to amortization. The goodwill is largely related to future sales anticipated from our internal workforce and entity-specific revenue synergies that will be generated by combining AXA's MPF and ORSO pension business with our existing businesses. This goodwill will be tested annually as part of the Principal International Hong Kong reporting unit and the Principal Global Investors Equity Investments and Fixed Income Investments reporting units.

Of the remaining acquired intangible assets, \$138.0 million was assigned to customer relationships, which are subject to amortization over a 30-year useful life, and \$53.0 million was assigned to the distribution agreement, which is subject to amortization over a 15-year useful life based on its contractual term.

Finite Lived Intangible Assets

Amortized intangible assets that continue to be subject to amortization over a weighted average remaining expected life of 16 years were as follows:

	December 31,	
	2016	2015
	<i>(in millions)</i>	
Gross carrying value	\$ 756.2	\$ 766.7
Accumulated amortization	228.7	198.1

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Net carrying value	\$ 527.5	\$ 568.6
--------------------	----------	----------

During 2015, we recorded an \$8.3 million pre-tax impairment loss in operating expenses related to finite lived intangible assets that originated from the acquisition of our mutual fund company in Brazil with a gross carrying amount of \$11.5 million and \$3.2 million of accumulated amortization at the time of impairment. During 2016, 2015 and 2014, we fully amortized other finite lived intangible assets of \$2.2 million, \$0.5 million and \$118.6 million, respectively.

The amortization expense for intangible assets with finite useful lives was \$44.5 million, \$42.5 million and \$49.9 million for 2016, 2015 and 2014, respectively. As of December 31, 2016, the estimated amortization expense for the next five years is as follows (in millions):

Year ending December 31:	
2017	\$ 44.7
2018	44.1
2019	43.0
2020	42.3
2021	39.6

Table of Contents

Principal Financial Group, Inc.

Notes to Consolidated Financial Statements (continued)

December 31, 2016

2. Goodwill and Other Intangible Assets (continued)

Indefinite Lived Intangible Assets

The 2015 net impact of impairments of indefinite lived intangibles of our mutual fund company in Brazil resulted in a pre-tax loss of \$14.7 million that was recorded in operating expenses.

The net carrying amount of unamortized indefinite lived intangible assets was \$797.8 million and \$790.6 million as of December 31, 2016 and 2015, respectively. As of both December 31, 2016 and 2015, \$608.0 million relates to investment management contracts associated with our acquisition of WM Advisors, Inc. in 2006. The remaining balance primarily relates to the trade name intangible associated with our acquisition of Administradora de Fondos de Pensiones Cuprum S.A. in 2013.

3. Variable Interest Entities

We have relationships with various types of entities which may be VIEs. Certain VIEs are consolidated in our financial results. See Note 1, Nature of Operations and Significant Accounting Policies, under the caption "Consolidation" for further details of our consolidation accounting policies. We did not provide financial or other support to investees designated as VIEs for the periods ended December 31, 2016 and December 31, 2015.

Adoption of New Consolidation Guidance

Both the variable interest and voting interest consolidation models were changed under authoritative guidance effective January 1, 2016. The guidance eliminated the investment company deferral for portions of the variable interest model. Prior to January 1, 2016, the primary beneficiary of an investment company VIE was the enterprise who absorbed the majority of the entity's expected losses, received a majority of the expected residual returns or both. The new guidance requires all VIEs to be assessed under one method to determine the primary beneficiary.

The determination of whether interests in limited partnerships and similar entities are VIEs or VEOs has also changed under the pronouncement, by requiring evaluation of the equity holders' rights to determine if they have the power to direct the entity's most significant activities through substantive kick-out rights or participating rights. Limited partnerships and similar entities without these rights are VIEs.

We adopted the guidance using the modified retrospective approach effective January 1, 2016. Under the modified retrospective approach, the cumulative effect of initially applying the new guidance is recognized as of the date of initial application, and comparative periods are not restated. The changes resulting from the adoption were:

The adoption resulted in the deconsolidation of \$8.6 billion of both assets and liabilities of certain mandatory privatized social security funds in which we provide asset management services. Prior to January 1, 2016, the funds were consolidated as VEOs and the funds were presented in separate account assets and liabilities in the consolidated statements of financial position. The deconsolidation did not have a material impact to our consolidated statements of operations and did not result in a cumulative effect of the change on retained earnings.

The adoption of the guidance resulted in consolidation of certain sponsored investment funds in which we provide asset management services. We consolidated \$180.1 million of assets and \$0.6 million of liabilities. Additionally, we recorded \$179.5 million of redeemable noncontrolling interest related to these funds. The consolidation of these funds did not have a material impact to our consolidated statements of operations and did not result in a cumulative effect of the change on retained earnings.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

We invest in partnerships and other funds. Prior to new accounting guidance certain of these investments were VOEs. Upon adoption of new accounting guidance, some of these investments are now considered VIEs. We are not the primary beneficiary of these VIEs.

We provide asset management and other services to certain investment structures for which we earn performance-based management fees. These structures were considered VIEs prior to new accounting guidance, and we had a variable interest. We were not the primary beneficiary of these entities as we did not have the obligation to absorb losses or the right to receive benefits of the entities that could be potentially significant to the VIE. Subsequent to new accounting guidance, we no longer consider our fees a variable interest for those investment structures where our fees are deemed to be commensurate with the services provided, consistent with fees for similar services negotiated at arms-length, and we do not have additional interests in the entity that would absorb a significant amount of the entity's expected losses and expected residual returns of the entity.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****3. Variable Interest Entities (continued)****Consolidated Variable Interest Entities*****Grantor Trusts***

We contributed undated subordinated floating rate notes to three grantor trusts. The trusts separated their cash flows by issuing an interest-only certificate and a residual certificate related to each note contributed. Each interest-only certificate entitles the holder to interest on the stated note for a specified term, while the residual certificate entitles the holder to interest payments subsequent to the term of the interest-only certificate and to all principal payments. We retained the interest-only certificates and the residual certificates were subsequently sold to third parties. We have determined these grantor trusts are VIEs due to insufficient equity to sustain them. We determined we are the primary beneficiary as a result of our contribution of securities into the trusts and our significant continuing interest in the trusts.

Collateralized Private Investment Vehicles

We invest in cash and synthetic collateralized debt obligations, collateralized bond obligations, collateralized loan obligations and other collateralized structures, which are VIEs due to insufficient equity to sustain the entities (collectively known as "collateralized private investment vehicles"). The performance of the notes of these synthetic structures is primarily linked to a synthetic portfolio by derivatives; each note has a specific loss attachment and detachment point. The notes and related derivatives are collateralized by a pool of permitted investments. The investments are held by a trustee and can only be liquidated to settle obligations of the trusts. These obligations primarily include derivatives and the notes due at maturity or termination of the trusts. We determined we are the primary beneficiary for one of these synthetic entities because we act as the investment manager of the underlying portfolio and we have the power to make decisions and to receive benefits and the obligation to absorb losses that could be potentially significant to the VIE.

Commercial Mortgage-Backed Securities

We sold commercial mortgage loans to a real estate mortgage investment conduit trust. The trust issued various commercial mortgage-backed securities ("CMBS") certificates using the cash flows of the underlying commercial mortgages it purchased. This is considered a VIE due to insufficient equity to sustain itself. We have determined we are the primary beneficiary as we retained the special servicing role for the assets within the trust as well as the ownership of the bond class that controls the unilateral kick-out rights of the special servicer.

Mandatory Retirement Savings Funds

We hold an equity interest in Chilean mandatory privatized social security funds in which we provide asset management services. We determined that the mandatory privatized social security funds, which also include contributions for voluntary pension savings, voluntary non-pension savings and compensation savings accounts, are VIEs. This is because the equity holders as a group lack the power, due to voting rights or similar rights, to direct the activities of the entity that most significantly impact the entity's economic performance and also because equity investors are protected from below-average market investment returns relative to the industry's return, due to a regulatory guarantee that we provide. Further we concluded that we are the primary beneficiary through our power to make decisions and our significant variable interest in the funds. The purpose of the funds, which reside in legally segregated entities, is to provide long-term retirement savings. The obligation to the customer is directly related to the assets held in the funds and, as such, we present the assets as separate account assets and the obligation as separate account liabilities within our consolidated statements of financial position.

Principal International Hong Kong offers retirement pension schemes in which we provide trustee, administration and asset management services to employers and employees under the Hong Kong MPF and ORSO pension schemes. Each pension scheme has various guaranteed and non-guaranteed constituent funds, or investment options, in which customers can invest their money. The guaranteed funds provide either a guaranteed rate of return to the customer or a minimum guarantee on withdrawals under certain qualifying events. We have determined the guaranteed funds are VIEs due to the fact the equity holders, as a group, lack the obligation to absorb expected losses due to the guarantee we provide. We concluded that we are the primary beneficiary because we have the power to make decisions and to receive benefits and the obligation to absorb losses that could be potentially significant to the VIE. Therefore, we consolidate the underlying assets and liabilities of the

funds and present as separate accounts or within the general account, depending on the terms of the guarantee.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****3. Variable Interest Entities (continued)*****Real Estate***

We invest in several real estate limited partnerships and limited liability companies. The entities invest in real estate properties. Certain of these entities are VIEs based on the combination of our significant economic interest and related voting rights. We determined we are the primary beneficiary as a result of our power to control the entities through our significant ownership. Due to the nature of these real estate investments, the investment balance will fluctuate as we purchase and sell interests in the entities and as capital expenditures are made to improve the underlying real estate.

Sponsored Investment Funds

We sponsor and invest in certain investment funds for which we provide asset management services. Although our asset management fee is commensurate with the services provided and consistent with fees for similar services negotiated at arms-length, we have a variable interest for funds where our other interests are more than insignificant. The funds are VIEs as the equity holders lack power through voting rights to direct the activities of the entity that most significantly impact its economic performance. We determined we are the primary beneficiary of the VIEs where our interest in the entity is more than insignificant and we are the asset manager.

Assets and Liabilities of Consolidated Variable Interest Entities

The carrying amounts of our consolidated VIE assets, which can only be used to settle obligations of consolidated VIEs, and liabilities of consolidated VIEs for which creditors do not have recourse were as follows:

	December 31, 2016		December 31, 2015	
	Total	Total	Total	Total
	assets	liabilities	assets	liabilities
	<i>(in millions)</i>			
Grantor trusts (1)	\$ 233.3	\$ 212.3	\$ 257.9	\$ 231.8
Collateralized private investment vehicles (2)	82.4	61.5	100.4	85.9
CMBS	12.5		18.4	
Mandatory retirement savings funds (3)	36,526.7	36,202.8	33,941.3	33,639.3
Real estate (4)	329.2	26.8	384.2	71.3
Sponsored investment funds (5)	114.3	0.9		
Total	\$ 37,298.4	\$ 36,504.3	\$ 34,702.2	\$ 34,028.3

(1) The assets of grantor trusts are primarily fixed maturities, available-for-sale. The liabilities are primarily other liabilities that reflect an embedded derivative of the forecasted transaction to deliver the underlying securities.

(2) The assets of the collateralized private investment vehicles are primarily fixed maturities, trading. The liabilities include derivative liabilities and an obligation to redeem notes at maturity or termination of the trusts, which are reported in other liabilities.

(3) The assets of the mandatory retirement savings funds include separate account assets and equity securities, trading. The liabilities include separate account liabilities and contractholder funds.

- (4) The assets of the real estate VIEs primarily include real estate, other investments and cash. Liabilities primarily include other liabilities. Liabilities also included long-term debt as of December 31, 2015.
- (5) The assets of sponsored investment funds are primarily fixed maturities and equity securities reported in other investments and cash. The consolidated statements of financial position included a \$58.8 million redeemable noncontrolling interest for sponsored investment funds as of December 31, 2016.

Unconsolidated Variable Interest Entities

Invested Securities

We hold a variable interest in a number of VIEs where we are not the primary beneficiary. Our investments in these VIEs are reported in fixed maturities, available-for-sale; fixed maturities, trading; equity securities, trading and other investments in the consolidated statements of financial position and are described below.

Unconsolidated VIEs include certain CMBS, residential mortgage-backed pass-through securities ("RMBS") and other ABS. All of these entities were deemed VIEs because the equity within these entities is insufficient to sustain them. We determined we are not the primary beneficiary in the entities within these categories of investments. This determination was based primarily on the fact we do not own the class of security that controls the unilateral right to replace the special servicer or equivalent function.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****3. Variable Interest Entities (continued)**

As previously discussed, we invest in several types of collateralized private investment vehicles, which are VIEs. These include cash and synthetic structures that we do not manage. We have determined we are not the primary beneficiary of these collateralized private investment vehicles primarily because we do not control the economic performance of the entities and were not involved with the design of the entities.

We have invested in various VIE trusts as a debt holder. All of these entities are classified as VIEs due to insufficient equity to sustain them. We have determined we are not the primary beneficiary primarily because we do not control the economic performance of the entities and were not involved with the design of the entities.

We have invested in partnerships and other funds, which are classified as VIEs. The entities are VIEs as equity holders lack the power to control the most significant activities of the entities because the equity holders do not have either the ability by a simple majority to exercise substantive kick-out rights or substantive participating rights. We have determined we are not the primary beneficiary because we do not have the power to direct the most significant activities of the entities.

We hold an equity interest in Mexican mandatory privatized social security funds in which we provide asset management services. Our equity interest in the funds is considered a variable interest. We concluded the funds are VIEs because the equity holders as a group lack decision-making ability through their voting rights. We are not the primary beneficiary of the VIEs because although we, as the asset manager, have the power to direct the activities of the VIEs, we do not have a potentially significant variable interest in the funds.

The carrying value and maximum loss exposure for our unconsolidated VIEs were as follows:

	Asset carrying value	Maximum exposure to loss (1)
	<i>(in millions)</i>	
December 31, 2016		
Fixed maturities, available-for-sale:		
Corporate	\$ 368.4	\$ 298.6
Residential mortgage-backed pass-through securities	2,834.7	2,798.0
Commercial mortgage-backed securities	4,096.5	4,153.2
Collateralized debt obligations	758.6	780.1
Other debt obligations	5,036.1	5,048.9
Fixed maturities, trading:		
Residential mortgage-backed pass-through securities	19.9	19.9
Commercial mortgage-backed securities	1.9	1.9
Collateralized debt obligations	10.6	10.6
Equity securities, trading	68.3	68.3
Other investments:		
Other limited partnership and fund interests	654.6	1,127.8
December 31, 2015		
Fixed maturities, available-for-sale:		
Corporate	\$ 453.4	\$ 359.8
Residential mortgage-backed pass-through securities	2,627.5	2,549.4
Commercial mortgage-backed securities	3,919.8	3,932.5
Collateralized debt obligations	667.5	692.7
Other debt obligations	4,530.8	4,527.3
Fixed maturities, trading:		
Residential mortgage-backed pass-through securities	25.9	25.9
Commercial mortgage-backed securities	2.3	2.3
Collateralized debt obligations	35.1	35.1
Other investments:		
Other limited partnership and fund interests	255.6	255.6

(1)

Our risk of loss is limited to our initial investment measured at amortized cost for fixed maturities, available-for-sale. Our risk of loss is limited to our investment measured at fair value for our fixed maturities, trading and equity securities, trading. Our risk of loss is limited to our carrying value plus any unfunded commitments and/or guarantees for our other investments. Unfunded commitments are not liabilities on our consolidated statements of financial position because we are only required to fund additional equity when called upon to do so by the general partner or investment manager.

Money Market Funds

We are the investment manager for certain money market mutual funds. Prior to new accounting guidance effective January 1, 2016, these funds were deemed to be VIEs. Under the prior guidance we were not considered the primary beneficiary of these VIEs since our involvement is limited primarily to being a service provider, and our variable interest does not absorb the majority of the variability of the entities' net assets.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****3. Variable Interest Entities (continued)**

Effective January 1, 2016, new accounting guidance provides a scope exception for money market funds registered under Rule 2a-7 of the Investment Company Act of 1940 or similar funds. The scope exception eliminates the requirement to assess money market mutual funds under any consolidation model.

As of December 31, 2016 and December 31, 2015, these funds held \$0.8 billion and \$1.3 billion in total assets, respectively. We have no contractual obligation to contribute to the funds; however, we provided support to these money market mutual funds through the waiver of fees and expense reimbursements. The amount of fees waived and expenses reimbursed was insignificant.

4. Investments**Fixed Maturities and Equity Securities**

The amortized cost, gross unrealized gains and losses, other-than-temporary impairments in AOCI and fair value of fixed maturities and equity securities available-for-sale were as follows:

	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value	Other-than- temporary impairments in AOCI (1)
	<i>(in millions)</i>

(1) Excludes \$120.9 million and \$131.5 million as of December 31, 2016 and December 31, 2015, respectively, of net unrealized gains on impaired fixed maturities, available-for-sale related to changes in fair value subsequent to the impairment date, which are included in gross unrealized gains and gross unrealized losses.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****4. Investments (continued)**

The amortized cost and fair value of fixed maturities available-for-sale as of December 31, 2016, by expected maturity, were as follows:

	Amortized cost	Fair value
	<i>(in millions)</i>	
Due in one year or less	\$ 3,216.1	\$ 3,230.2
Due after one year through five years	12,286.4	12,677.4
Due after five years through ten years	8,572.8	8,788.4
Due after ten years	16,296.7	17,392.2
Subtotal	40,372.0	42,088.2
Mortgage-backed and other asset-backed securities	12,812.2	12,757.9
Total	\$ 53,184.2	\$ 54,846.1

Actual maturities may differ because borrowers may have the right to call or prepay obligations. Our portfolio is diversified by industry, issuer and asset class. Credit concentrations are managed to established limits.

Net Investment Income

Major components of net investment income were as follows:

	For the year ended December 31,		
	2016	2015	2014
	<i>(in millions)</i>		
Fixed maturities, available-for-sale	\$ 2,253.8	\$ 2,131.8	\$ 2,283.8
Fixed maturities, trading	20.2	21.4	27.9
Equity securities, available-for-sale	20.1	15.0	7.0

Investment expenses	(84.4)	(77.0)	(76.9)
Net investment income	\$ 3,296.5	\$ 3,052.1	\$ 3,257.9

- (1) Relates to periodic settlements of derivatives used in fair value and cash flow hedges of fixed maturities, available-for-sale. See Note 5, Derivative Financial Instruments, for further details.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****4. Investments (continued)****Net Realized Capital Gains and Losses**

Major components of net realized capital gains (losses) on investments were as follows:

	For the year ended December 31,		
	2016	2015	2014
	<i>(in millions)</i>		
Fixed maturities, available-for-sale:			
Gross gains	\$ 74.6	\$ 20.9	\$ 61.3
Gross losses	(28.6)	(6.7)	(24.1)
Net impairment losses	(96.7)	(30.5)	(88.0)
Hedging, net	(37.9)	(58.3)	(21.5)
Fixed maturities, trading	4.1	(12.3)	31.2
Equity securities, available-for-sale:			
Gross gains		1.2	0.2
Gross losses		(1.8)	(0.2)
Net impairment (losses) recoveries	(1.7)	0.3	10.0
Equity securities, trading	6.8	(3.4)	21.7
Mortgage loans	4.5	(0.1)	(9.4)
Derivatives	210.1	38.1	13.1
Other	35.9	1.5	20.4
Net realized capital gains (losses)	\$ 171.1	\$ (51.1)	\$ 14.7

Proceeds from sales of investments (excluding call and maturity proceeds) in fixed maturities, available-for-sale were \$1,916.9 million, \$1,537.5 million and \$2,251.2 million in 2016, 2015 and 2014, respectively.

Other-Than-Temporary Impairments

We have a process in place to identify fixed maturity and equity securities that could potentially have an impairment that is other than temporary. This process involves monitoring market events that could impact issuers' credit ratings, business climate, management changes, litigation and government actions and other similar factors. This process also involves monitoring late payments, pricing levels, downgrades by rating agencies, key financial ratios, financial statements, revenue forecasts and cash flow projections as indicators of credit issues.

Each reporting period, all securities are reviewed to determine whether an other-than-temporary decline in value exists and whether losses should be recognized. We consider relevant facts and circumstances in evaluating whether a credit or interest rate-related impairment of a security is other than temporary. Relevant facts and circumstances considered include: (1) the extent and length of time the fair value has been below cost; (2) the reasons for the decline in value; (3) the financial position and access to capital of the issuer, including the current and future impact of any specific events; (4) for structured securities, the adequacy of the expected cash flows; (5) for fixed maturities, our intent to sell a security or whether it is more likely than not we will be required to sell the security before the recovery of its amortized cost which, in some cases, may extend to maturity and (6) for equity securities, our ability and intent to hold the security for a period of time that allows for the recovery in value. To the extent we determine a security is deemed to be other than temporarily impaired, an impairment loss is recognized.

Impairment losses on equity securities are recognized in net income and are measured as the difference between amortized cost and fair value. The way in which impairment losses on fixed maturities are recognized in the financial statements is dependent on the facts and circumstances related to the specific security. If we intend to sell a security or it is more likely than not that we would be required to sell a

security before the recovery of its amortized cost, we recognize an other-than-temporary impairment in net income for the difference between amortized cost and fair value. If we do not expect to recover the amortized cost basis, we do not plan to sell the security and if it is not more likely than not that we would be required to sell a security before the recovery of its amortized cost, the recognition of the other-than-temporary impairment is bifurcated. We recognize the credit loss portion in net income and the noncredit loss portion in OCI ("bifurcated OTTI").

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****4. Investments (continued)**

Total other-than-temporary impairment losses, net of recoveries from the sale of previously impaired securities, were as follows:

	For the year ended December 31,		
	2016	2015	2014
	<i>(in millions)</i>		
Fixed maturities, available-for-sale	\$ (97.1)	\$ (1.1)	\$ 13.8
Equity securities, available-for-sale	(1.7)	0.3	10.0
Total other-than-temporary impairment losses, net of recoveries from the sale of previously impaired securities	(98.8)	(0.8)	23.8
Other-than-temporary impairment losses on fixed maturities, available-for-sale reclassified to (from) OCI (1)	0.4	(29.4)	(101.8)
Net impairment losses on available-for-sale securities	\$ (98.4)	\$ (30.2)	\$ (78.0)

(1)

Represents the net impact of (a) gains resulting from reclassification of noncredit impairment losses for fixed maturities with bifurcated OTTI from net realized capital gains (losses) to OCI and (b) losses resulting from reclassification of previously recognized noncredit impairment losses from OCI to net realized capital gains (losses) for fixed maturities with bifurcated OTTI that had additional credit losses or fixed maturities that previously had bifurcated OTTI that have now been sold or are intended to be sold.

We estimate the amount of the credit loss component of a fixed maturity security impairment as the difference between amortized cost and the present value of the expected cash flows of the security. The present value is determined using the best estimate cash flows discounted at the effective interest rate implicit to the security at the date of purchase or the current yield to accrete an asset-backed or floating rate security. The methodology and assumptions for establishing the best estimate cash flows vary depending on the type of security. The ABS cash flow estimates are based on security specific facts and circumstances that may include collateral characteristics, expectations of delinquency and default rates, loss severity and prepayment speeds and structural support, including subordination and guarantees. The corporate security cash flow estimates are derived from scenario-based outcomes of expected corporate restructurings or liquidations using bond specific facts and circumstances including timing, security interests and loss severity.

The following table provides a rollforward of accumulated credit losses for fixed maturities with bifurcated credit losses. The purpose of the table is to provide detail of (1) additions to the bifurcated credit loss amounts recognized in net realized capital gains (losses) during the period and (2) decrements for previously recognized bifurcated credit losses where the loss is no longer bifurcated and/or there has been a positive change in expected cash flows or accretion of the bifurcated credit loss amount.

	For the year ended December 31,		
	2016	2015	2014
	<i>(in millions)</i>		
Beginning balance	\$ (131.5)	\$ (144.4)	\$ (235.4)

(1) Amounts are recognized in net investment income.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****4. Investments (continued)****Gross Unrealized Losses for Fixed Maturities and Equity Securities**

For fixed maturities and equity securities available-for-sale with unrealized losses, including other-than-temporary impairment losses reported in OCI, the gross unrealized losses and fair value, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position were as follows:

	Less than twelve months		December 31, 2016 Greater than or equal to twelve months		Total	
	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses
	<i>(in millions)</i>					
Fixed maturities, available-for-sale:						
U.S. government and agencies	\$ 570.3	\$ 10.9	\$ 8.2	\$	\$ 578.5	\$ 10.9
Non-U.S. governments	198.0	5.4	12.2	2.0	210.2	7.4
States and political subdivisions	2,229.4	86.6	4.8	0.5	2,234.2	87.1
Corporate	6,559.7	189.2	1,285.6	161.6	7,845.3	350.8
Residential mortgage-backed pass-through securities	1,265.6	29.8	16.0	0.8	1,281.6	30.6
Commercial mortgage-backed securities	1,637.2	41.0	612.5	46.9	2,249.7	87.9
Collateralized debt obligations	265.7	0.9	195.6	23.4	461.3	24.3
Other debt obligations	2,229.4	32.8	376.2	17.0	2,605.6	49.8
Total fixed maturities, available-for-sale	\$ 14,955.3	\$ 396.6	\$ 2,511.1	\$ 252.2	\$ 17,466.4	\$ 648.8
Total equity securities, available-for-sale	\$ 18.2	\$ 0.4	\$ 35.4	\$ 10.5	\$ 53.6	\$ 10.9

Of the total amounts, Principal Life's consolidated portfolio represented \$16,918.9 million in available-for-sale fixed maturities with gross unrealized losses of \$615.1 million. Of those fixed maturity securities in Principal Life's consolidated portfolio with a gross unrealized loss position, 94% were investment grade (rated AAA through BBB-) with an average price of 96 (carrying value/amortized cost) as of December 31, 2016. Gross unrealized losses in our fixed maturities portfolio decreased during the year ended December 31, 2016, primarily due to tightening of credit spreads, partially offset by an increase in interest rates.

For those securities that had been in a continuous unrealized loss position for less than twelve months, Principal Life's consolidated portfolio held 1,911 securities with a carrying value of \$14,549.4 million and unrealized losses of \$384.6 million reflecting an average price of 97 as of December 31, 2016. Of this portfolio, 98% was investment grade (rated AAA through BBB) as of December 31, 2016, with associated unrealized losses of \$374.1 million. The unrealized losses on these securities can primarily be attributed to changes in market interest rates and changes in credit spreads since the securities were acquired.

For those securities that had been in a continuous unrealized loss position greater than or equal to twelve months, Principal Life's consolidated portfolio held 453 securities with a carrying value of \$2,369.5 million and unrealized losses of \$230.5 million. The average credit rating of this portfolio was A with an average price of 91 as of December 31, 2016. Of the \$230.5 million in unrealized losses, the corporate sector accounts for \$141.9 million in unrealized losses with an average price of 89 and an average credit rating of BBB . The remaining

unrealized losses consist primarily of \$46.9 million within the commercial mortgage-backed securities sector with an average price of 93 and an average credit rating of AA . The unrealized losses on these securities can primarily be attributed to changes in market interest rates and changes in credit spreads since the securities were acquired.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****4. Investments (continued)**

Because we expected to recover our amortized cost, it was not our intent to sell the fixed maturity available-for-sale securities with unrealized losses and it was not more likely than not that we would be required to sell these securities before recovery of the amortized cost, which may be maturity, we did not consider these investments to be other-than-temporarily impaired as of December 31, 2016.

	Less than twelve months		December 31, 2015 Greater than or equal to twelve months		Total	
	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses
	<i>(in millions)</i>					
Fixed maturities, available-for-sale:						
U.S. government and agencies	\$ 590.4	\$ 7.6	\$ 40.5	\$ 0.7	\$ 630.9	\$ 8.3
Non-U.S. governments	86.3	3.1	16.1	1.9	102.4	5.0
States and political subdivisions	692.0	19.0	6.5	0.4	698.5	19.4
Corporate	7,975.7	309.3	1,375.0	328.9	9,350.7	638.2
Residential mortgage-backed pass-through securities	656.7	6.7	147.9	5.2	804.6	11.9
Commercial mortgage-backed securities	1,480.8	27.3	299.5	50.7	1,780.3	78.0
Collateralized debt obligations	426.9	3.8	164.0	22.8	590.9	26.6
Other debt obligations	2,512.7	19.1	403.5	16.7	2,916.2	35.8
Total fixed maturities, available-for-sale	\$ 14,421.5	\$ 395.9	\$ 2,453.0	\$ 427.3	\$ 16,874.5	\$ 823.2
Total equity securities, available-for-sale	\$ 0.8	\$ 1.0	\$ 32.7	\$ 13.2	\$ 33.5	\$ 14.2

Of the total amounts, Principal Life's consolidated portfolio represented \$15,980.0 million in available-for-sale fixed maturities with gross unrealized losses of \$777.0 million. Of those fixed maturity securities in Principal Life's consolidated portfolio with a gross unrealized loss position, 87% were investment grade (rated AAA through BBB) with an average price of 95 (carrying value/amortized cost) as of December 31, 2015. Gross unrealized losses in our fixed maturities portfolio increased during the year ended December 31, 2015, primarily due to an increase in interest rates and widening of credit spreads.

For those securities that had been in a continuous unrealized loss position for less than twelve months, Principal Life's consolidated portfolio held 1,725 securities with a carrying value of \$13,673.9 million and unrealized losses of \$376.3 million reflecting an average price of 97 as of December 31, 2015. Of this portfolio, 90% was investment grade (rated AAA through BBB) as of December 31, 2015, with associated unrealized losses of \$298.1 million. The unrealized losses on these securities can primarily be attributed to changes in market interest rates and changes in credit spreads since the securities were acquired.

For those securities that had been in a continuous unrealized loss position greater than or equal to twelve months, Principal Life's consolidated portfolio held 404 securities with a carrying value of \$2,306.1 million and unrealized losses of \$400.7 million. The average credit rating of this portfolio was BBB+ with an average price of 85 as of December 31, 2015. Of the \$400.7 million in unrealized losses, the corporate sector accounts for \$304.2 million in unrealized losses with an average price of 80 and an average credit rating of BBB . The remaining unrealized losses consist primarily of \$50.7 million within the commercial mortgage-backed securities sector with an average price of 86 and an average credit rating of BBB+. The unrealized losses on these securities can primarily be attributed to changes in market interest rates and

changes in credit spreads since the securities were acquired.

Because we expected to recover our amortized cost, it was not our intent to sell the fixed maturity available-for-sale securities with unrealized losses and it was not more likely than not that we would be required to sell these securities before recovery of the amortized cost, which may be maturity, we did not consider these investments to be other-than-temporarily impaired as of December 31, 2015.

Net Unrealized Gains and Losses on Available-for-Sale Securities and Derivative Instruments

The net unrealized gains and losses on investments in available-for-sale securities, the noncredit component of impairment losses on fixed maturities available-for-sale and the net unrealized gains and losses on derivative instruments in cash flow hedge relationships are reported as separate components of stockholders' equity. The cumulative amount of

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****4. Investments (continued)**

net unrealized gains and losses on available-for-sale securities and derivative instruments in cash flow hedge relationships net of adjustments related to DAC and related actuarial balances and applicable income taxes was as follows:

	December 31, 2016	December 31, 2015
	<i>(in millions)</i>	
Net unrealized gains on fixed maturities, available-for-sale (1)	\$ 1,727.8	\$ 1,376.0
Noncredit component of impairment losses on fixed maturities, available-for-sale	(146.4)	(146.1)
Net unrealized losses on equity securities, available-for-sale	(6.0)	(6.7)
Adjustments for assumed changes in amortization patterns	(121.9)	(127.0)
Adjustments for assumed changes in policyholder liabilities	(469.2)	(309.7)
Net unrealized gains on derivative instruments	186.5	181.6
Net unrealized gains on equity method subsidiaries and noncontrolling interest adjustments	68.0	98.0
Provision for deferred income taxes	(411.8)	(350.2)
Net unrealized gains on available-for-sale securities and derivative instruments	\$ 827.0	\$ 715.9

(1) Excludes net unrealized gains (losses) on fixed maturities, available-for-sale included in fair value hedging relationships.

Mortgage Loans

Mortgage loans consist of commercial and residential mortgage loans. We evaluate risks inherent in our commercial mortgage loans in two classes: (1) brick and mortar property loans, including mezzanine loans, where we analyze the property's rent payments as support for the loan, and (2) credit tenant loans ("CTL"), where we rely on the credit analysis of the tenant for the repayment of the loan. We evaluate risks inherent in our residential mortgage loan portfolio in two classes: (1) home equity mortgages and (2) first lien mortgages. The carrying amount of our mortgage loan portfolio was as follows:

	December 31, 2016	December 31, 2015
	<i>(in millions)</i>	
Commercial mortgage loans	\$ 12,055.2	\$ 11,265.3
Residential mortgage loans	1,219.9	1,125.7
Total amortized cost	13,275.1	12,391.0
Valuation allowance	(44.9)	(51.6)
Total carrying value	\$ 13,230.2	\$ 12,339.4

We periodically purchase mortgage loans as well as sell mortgage loans we have originated. Mortgage loans purchased and sold were as follows:

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

For the year ended
December 31,

2016 2015 2014

(in millions)

Commercial mortgage loans:			
Purchased	\$ 163.3	\$ 223.4	\$ 59.5
Sold	0.3	21.6	2.3
Residential mortgage loans:			
Purchased	290.3	295.3	184.8
Sold	48.4	79.3	95.9

Mixed use/other	162.0	1.3	98.1	1.0
Total	\$ 12,055.2	100.0%	\$ 11,265.3	100.0%

Our residential mortgage loan portfolio is composed of home equity mortgages with an amortized cost of \$165.6 million and \$218.8 million and first lien mortgages with an amortized cost of \$1,054.3 million and \$906.9 million as of December 31, 2016 and December 31, 2015, respectively. Our residential home equity mortgages are concentrated in the United States and are generally second lien mortgages comprised of closed-end loans and lines of credit. Our first lien loans are concentrated in Chile and the United States.

Mortgage Loan Credit Monitoring***Commercial Credit Risk Profile Based on Internal Rating***

We actively monitor and manage our commercial mortgage loan portfolio. All commercial mortgage loans are analyzed regularly and substantially all are internally rated, based on a proprietary risk rating cash flow model, in order to monitor the financial quality of these assets. The model stresses expected cash flows at various levels and at different points in time depending on the durability of the income stream, which includes our assessment of factors such as location (macro and micro markets), tenant quality and lease expirations. Our internal rating analysis presents expected losses in terms of an S&P Global ("S&P") bond equivalent rating. As the credit risk for commercial mortgage loans increases,

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

we adjust our internal ratings downward with loans in the category "B+ and below" having the highest risk for credit loss. Internal ratings on commercial mortgage loans are updated at least annually and potentially more often for certain loans with material changes in collateral value or occupancy and for loans on an internal "watch list".

Commercial mortgage loans that require more frequent and detailed attention than other loans in our portfolio are identified and placed on an internal "watch list". Among the criteria that would indicate a potential problem are significant negative changes in ratios of loan to value or contract rents to debt service, major tenant vacancies or bankruptcies, borrower sponsorship problems, late payments, delinquent taxes and loan relief/restructuring requests.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****4. Investments (continued)**

The amortized cost of our commercial mortgage loan portfolio by credit risk, as determined by our internal rating system expressed in terms of an S&P bond equivalent rating, was as follows:

	December 31, 2016		
	Brick and mortar	CTL	Total
	<i>(in millions)</i>		
A and above	\$ 10,612.8	\$ 158.5	\$ 10,771.3

BB+ thru BB	159.6	0.1	159.7
B+ and below	24.8	0.7	25.5
Total	\$ 10,921.0	\$ 344.3	\$ 11,265.3

Residential Credit Risk Profile Based on Performance Status

Our residential mortgage loan portfolio is monitored based on performance of the loans. Monitoring on a residential mortgage loan increases when the loan is delinquent or earlier if there is an indication of potential impairment. We define non-performing residential mortgage loans as loans 90 days or greater delinquent or on non-accrual status.

The amortized cost of our performing and non-performing residential mortgage loans was as follows:

	December 31, 2016		
	Home equity	First liens	Total
	<i>(in millions)</i>		
Performing	\$ 156.8	\$ 1,043.1	\$ 1,199.9
Non-performing	8.8	11.2	20.0
Total	\$ 165.6	\$ 1,054.3	\$ 1,219.9

December 31, 2015

	Home equity	First liens	Total
	<i>(in millions)</i>		
Performing	\$ 208.0	\$ 895.6	\$ 1,103.6
Non-performing	10.8	11.3	22.1
Total	\$ 218.8	\$ 906.9	\$ 1,125.7

Non-Accrual Mortgage Loans

Commercial and residential mortgage loans are placed on non-accrual status if we have concern regarding the collectability of future payments or if a loan has matured without being paid off or extended. Factors considered may include conversations with the borrower, loss of major tenant, bankruptcy of borrower or major tenant, decreased property cash flow for commercial mortgage loans or number of days past due and other circumstances for residential mortgage loans. Based on an assessment as to the collectability of the principal, a determination is made to apply any payments received either against the principal or according to the contractual terms of the loan. When a loan is placed on non-accrual status, the accrued unpaid interest receivable is reversed against interest income. Accrual of interest resumes after factors resulting in doubts about collectability have improved. Residential first lien mortgages in the Chilean market are carried on accrual for a longer period of delinquency than domestic loans, as assessment of collectability is based on the nature of the loans and collection practices in that market.

Mortgage Loan Valuation Allowance

We establish a valuation allowance to provide for the risk of credit losses inherent in our portfolio. The valuation allowance includes loan specific reserves for loans that are deemed to be impaired as well as reserves for pools of loans with similar risk characteristics where a property risk or market specific risk has not been identified but for which we anticipate a loss may occur. Mortgage loans on real estate are considered impaired when, based on current information and events, it is probable we will be unable to collect all amounts due according to contractual terms of the loan agreement. When we determine a loan is impaired, a valuation allowance is established equal to the difference between the carrying amount of the mortgage loan and the estimated value reduced by the cost to sell. Estimated value is based on either the present value of the expected future cash flows discounted at the loan's effective interest rate, the loan's observable market price or fair value of the collateral. Subsequent changes in the estimated value are reflected in the valuation allowance. Amounts on loans deemed to be uncollectible are charged off and removed from the valuation allowance. The change in the valuation allowance provision is included in net realized capital gains (losses) on our consolidated statements of operations.

The valuation allowance is maintained at a level believed adequate by management to absorb estimated probable credit losses. Management's periodic evaluation and assessment of the valuation allowance adequacy is based on known and inherent risks in the portfolio, adverse situations that may affect a borrower's ability to repay, the estimated value of the underlying collateral, composition of the loan portfolio, portfolio delinquency information, underwriting standards, peer group information, current economic conditions, loss experience and other relevant factors. The evaluation of our

Table of Contents

Principal Financial Group, Inc.

Notes to Consolidated Financial Statements (continued)

December 31, 2016

4. Investments (continued)

impaired loan component is subjective, as it requires the estimation of timing and amount of future cash flows expected to be received on impaired loans.

We review our commercial mortgage loan portfolio and analyze the need for a valuation allowance for any loan that is delinquent for 60 days or more, in process of foreclosure, restructured, on the internal "watch list" or that currently has a valuation allowance. In addition to establishing allowance levels for specifically identified impaired commercial mortgage loans, management determines an allowance for all other loans in the portfolio for which historical experience and current economic conditions indicate certain losses exist. These loans are segregated by risk rating level with an estimated loss ratio applied against each risk rating level. The loss ratio is generally based upon historical loss experience for each risk rating level as adjusted for certain current environmental factors management believes to be relevant.

For our residential mortgage loan portfolio, we separate the loans into several homogeneous pools, each of which consist of loans of a similar nature including but not limited to loans similar in collateral, term and structure and loan purpose or type. We evaluate loan pools based on aggregated risk ratings, estimated specific loss potential in the different classes of credits, and historical loss experience by pool type. We adjust these quantitative factors for qualitative factors of present conditions. Qualitative factors include items such as economic and business conditions, changes in the portfolio, value of underlying collateral and concentrations. Residential mortgage loan pools exclude loans that have been restructured or impaired, as those loans are evaluated individually.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****4. Investments (continued)****Impaired Mortgage Loans**

Impaired mortgage loans are loans with a related specific valuation allowance, loans whose carrying amount has been reduced to the expected collectible amount because the impairment has been considered other than temporary or a loan modification has been classified as a troubled debt restructuring ("TDR"). Based on an assessment as to the collectability of the principal, a determination is made to apply any payments received either against the principal or according to the contractual terms of the loan. Our recorded investment in and unpaid principal balance of impaired loans along with the related loan specific allowance for losses, if any, and the average recorded investment and interest income recognized during the time the loans were impaired were as follows:

	December 31, 2016		
	Recorded investment	Unpaid principal balance	Related allowance

Mortgage Loan Modifications

Our commercial and residential mortgage loan portfolios include loans that have been modified. We assess loan modifications on a case-by-case basis to evaluate whether a TDR has occurred. The commercial mortgage loan TDRs were modified to delay or reduce principal payments and to reduce or delay interest payments. For these TDR assessments, we have determined the loan rates are now considered below market based on current circumstances. The commercial mortgage loan modifications resulted in delayed cash receipts and a decrease in interest income. The residential mortgage loan TDRs include modifications of interest-only payment periods, delays in principal balloon payments, and interest rate reductions. Residential mortgage loan modifications resulted in delayed or decreased cash receipts and a decrease in interest income.

The following table includes information about outstanding loans that were modified and met the criteria of a TDR during the periods indicated. In addition, the table includes information for loans that were modified and met the criteria of a TDR within the past twelve months that were in payment default during the periods indicated:

For the year ended December 31, 2016

Commercial mortgage loans that have been designated as a TDR have been previously reserved for in the mortgage loan valuation allowance at the estimated fair value of the underlying collateral reduced by the cost to sell.

Residential mortgage loans that have been designated as a TDR are specifically reserved for in the mortgage loan valuation allowance if losses result from the modification. Residential mortgage loans that have defaulted or have been discharged through bankruptcy are reduced to the expected collectible amount.

Real Estate

Depreciation expense on invested real estate was \$52.0 million, \$49.3 million and \$46.5 million in 2016, 2015 and 2014, respectively. Accumulated depreciation was \$450.4 million and \$405.7 million as of December 31, 2016 and 2015, respectively.

Other Investments

Other investments include interests in unconsolidated entities, domestic and international joint ventures and partnerships and properties owned jointly with venture partners and operated by the partners. Such investments are generally accounted for using the equity method. In applying the equity method, we record our share of income or loss reported by the equity investees in net investment income. Summarized financial information for these unconsolidated entities was as follows:

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

	December 31,	
	2016	2015
	<i>(in millions)</i>	
Total assets	\$ 123,621.2	\$ 101,099.0
Total liabilities	73,688.8	52,839.3
Total equity	\$ 49,932.4	\$ 48,259.7

Our share of net income of unconsolidated entities (1)	232.7	165.3	148.4

(1) Our most significant equity investee is Brasilprev Seguros e Previdencia, a co-managed joint venture in Brazil.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****4. Investments (continued)**

In addition, other investments include \$875.2 million and \$819.3 million of direct financing leases as of December 31, 2016 and 2015, respectively. Our Chilean operations enter into private placement contracts for commercial, industrial and office space properties whereby our Chilean operations purchase the real estate and/or building from the seller-lessee but then lease the property back to the seller-lessee. Ownership of the property is transferred to the lessee by the end of the lease term. The direct financing lease receivables are carried at amortized cost. We actively monitor and manage our direct financing leases. All leases within the portfolio are analyzed regularly and internally rated, based on financial condition, payment history and loan-to-value.

Derivative assets are carried at fair value and reported as a component of other investments. Certain sponsored investment funds are also carried at fair value and reported as a component of other investments, with changes in fair value included in net realized capital gains (losses) on our consolidated statements of operations.

Securities Posted as Collateral

As of December 31, 2016 and 2015, we posted \$2,562.8 million and \$2,705.5 million, respectively, in commercial mortgage loans and home equity mortgages to satisfy collateral requirements associated with our obligation under funding agreements with Federal Home Loan Bank of Des Moines ("FHLB Des Moines"). In addition, as of December 31, 2016 and 2015, we posted \$2,233.2 million and \$935.7 million, respectively, in fixed maturities, available-for-sale securities to satisfy collateral requirements primarily associated with a reinsurance arrangement, our derivative credit support annex (collateral) agreements, Futures Commission Merchant ("FCM") agreements, a lending arrangement and our obligation under funding agreements with FHLB Des Moines. Since we did not relinquish ownership rights on these instruments, they are reported as fixed maturities, available-for-sale and mortgage loans, respectively, on our consolidated statements of financial position. Of the securities posted as collateral, as of December 31, 2016 and 2015, \$272.8 million and \$295.2 million, respectively, could be sold or repledged by the secured party.

Balance Sheet Offsetting

Financial assets subject to master netting agreements or similar agreements were as follows:

	Gross amount of recognized assets (1)	Gross amounts not offset in the consolidated statements of financial position		Net amount
		Financial instruments (2)	Collateral received	
<i>(in millions)</i>				
December 31, 2016				
Derivative assets	\$ 887.2	\$ (294.2)	\$ (582.0)	\$ 11.0
Reverse repurchase agreements	41.1		(41.1)	
Total	\$ 928.3	\$ (294.2)	\$ (623.1)	\$ 11.0
December 31, 2015				
Derivative assets	\$ 665.4	\$ (409.7)	\$ (233.6)	\$ 22.1
Reverse repurchase agreements	79.7		(79.7)	
Total	\$ 745.1	\$ (409.7)	\$ (313.3)	\$ 22.1

-
- (1) The gross amount of recognized derivative and reverse repurchase agreement assets are reported with other investments and cash and cash equivalents, respectively, on the consolidated statements of financial position. The above excludes \$6.4 million and \$1.2 million of derivative assets as of December 31, 2016 and December 31, 2015, respectively, that are not subject to master netting agreements or similar agreements. The gross amounts of derivative and reverse repurchase agreement assets are not netted against offsetting liabilities for presentation on the consolidated statements of financial position.
- (2) Represents amount of offsetting derivative liabilities that are subject to an enforceable master netting agreement or similar agreement that are not netted against the gross derivative assets for presentation on the consolidated statements of financial position.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****4. Investments (continued)**

Financial liabilities subject to master netting agreements or similar agreements were as follows:

	Gross amount of recognized liabilities (1)	Gross amounts not offset in the consolidated statements of financial position		Net amount
		Financial instruments (2)	Collateral pledged	
<i>(in millions)</i>				
December 31, 2016				
Derivative liabilities	\$ 567.5	\$ (294.2)	\$ (243.9)	\$ 29.4
Repurchase agreements	9.7			9.7
Total	\$ 577.2	\$ (294.2)	\$ (243.9)	\$ 39.1
December 31, 2015				
Derivative liabilities	\$ 758.6	\$ (409.7)	\$ (253.9)	\$ 95.0

- (1) The gross amount of recognized derivative liabilities are reported with other liabilities on the consolidated statements of financial position. The above excludes \$394.3 million and \$421.5 million of derivative liabilities as of December 31, 2016 and December 31, 2015, respectively, which are primarily embedded derivatives that are not subject to master netting agreements or similar agreements. The gross amount of recognized repurchase agreement liabilities are reported with short-term debt on the consolidated statements of financial position. The gross amounts of derivative and repurchase agreement liabilities are not netted against offsetting assets for presentation on the consolidated statements of financial position.
- (2) Represents amount of offsetting derivative assets that are subject to an enforceable master netting agreement or similar agreement that are not netted against the gross derivative liabilities for presentation on the consolidated statements of financial position.

The financial instruments that are subject to master netting agreements or similar agreements include right of setoff provisions. Derivative instruments include provisions to setoff positions covered under the agreements with the same counterparties and provisions to setoff positions outside of the agreements with the same counterparties in the event of default by one of the parties. Derivative instruments also include collateral provisions. Collateral received and pledged is generally settled daily with each counterparty. See Note 5, Derivative Financial Instruments, for further details.

Repurchase and reverse repurchase agreements include provisions to setoff other repurchase and reverse repurchase balances with the same counterparty. Repurchase and reverse repurchase agreements also include collateral provisions with the counterparties. For reverse repurchase agreements we require the counterparties to pledge collateral with a value greater than the amount of cash transferred. We have the right but do not sell or repledge collateral received in reverse repurchase agreements. Repurchase agreements are structured as secured borrowings for all counterparties. We pledge fixed maturities available-for-sale, which the counterparties have the right to sell or repledge. Interest incurred on repurchase agreements is reported as part of operating expenses on the consolidated statements of operations. Net proceeds related to repurchase agreements are reported as a component of financing activities on the consolidated statements of cash flows. We did not have any outstanding repurchase agreements as of December 31, 2015.

5. Derivative Financial Instruments

Derivatives are generally used to hedge or reduce exposure to market risks associated with assets held or expected to be purchased or sold and liabilities incurred or expected to be incurred. Derivatives are used to change the characteristics of our asset/liability mix consistent with our risk management activities. Derivatives are also used in asset replication strategies.

Types of Derivative Instruments

Interest Rate Contracts

Interest rate risk is the risk we will incur economic losses due to adverse changes in interest rates. Sources of interest rate risk include the difference between the maturity and interest rate changes of assets with the liabilities they support, timing differences between the pricing of liabilities and the purchase or procurement of assets and changing cash flow profiles from original projections due to prepayment options embedded within asset and liability contracts. We use various derivatives to manage our exposure to fluctuations in interest rates.

Interest rate swaps are contracts in which we agree with other parties to exchange, at specified intervals, the difference between fixed rate and floating rate interest amounts based upon designated market rates or rate indices and an agreed upon notional principal amount. Generally, no cash is exchanged at the outset of the contract and no principal payments are made by any party. Cash is paid or received based on the terms of the swap. We use interest rate swaps

Table of Contents

Principal Financial Group, Inc.

Notes to Consolidated Financial Statements (continued)

December 31, 2016

5. Derivative Financial Instruments (continued)

primarily to more closely match the interest rate characteristics of assets and liabilities and to mitigate the risks arising from timing mismatches between assets and liabilities (including duration mismatches). We also use interest rate swaps to hedge against changes in the value of assets we anticipate acquiring and other anticipated transactions and commitments. Interest rate swaps are used to hedge against changes in the value of the guaranteed minimum withdrawal benefit ("GMWB") liability. The GMWB rider on our variable annuity products provides for guaranteed minimum withdrawal benefits regardless of the actual performance of various equity and/or fixed income funds available with the product.

Interest rate options, including interest rate caps and interest rate floors, which can be combined to form interest rate collars, are contracts that entitle the purchaser to pay or receive the amounts, if any, by which a specified market rate exceeds a cap strike interest rate, or falls below a floor strike interest rate, respectively, at specified dates. We use interest rate collars to manage interest rate risk related to guaranteed minimum interest rate liabilities in our individual annuities contracts and lapse risk associated with higher interest rates.

A swaption is an option to enter into an interest rate swap at a future date. We purchase swaptions to offset or modify existing exposures. Swaptions provide us the benefit of the agreed-upon strike rate if the market rates for liabilities are higher, with the flexibility to enter into the current market rate swap if the market rates for liabilities are lower. Swaptions not only hedge against the downside risk, but also allow us to take advantage of any upside benefits.

In exchange-traded futures transactions, we agree to purchase or sell a specified number of contracts, the values of which are determined by the values of designated classes of securities, and to post variation margin on a daily basis in an amount equal to the difference in the daily market values of those contracts. We enter into exchange-traded futures with regulated futures commissions merchants who are members of a trading exchange. We have used exchange-traded futures to reduce market risks from changes in interest rates and to alter mismatches between the assets in a portfolio and the liabilities supported by those assets.

Foreign Exchange Contracts

Foreign currency risk is the risk we will incur economic losses due to adverse fluctuations in foreign currency exchange rates. This risk arises from foreign currency-denominated funding agreements we issue, foreign currency-denominated fixed maturity and equity securities we invest in, capital transactions with our international operations and the financial results of our international operations. We use various derivatives to manage our exposure to fluctuations in foreign currency exchange rates.

Currency swaps are contracts in which we agree with other parties to exchange, at specified intervals, a series of principal and interest payments in one currency for that of another currency. Generally, the principal amount of each currency is exchanged at the beginning and termination of the currency swap by each party. The interest payments are primarily fixed-to-fixed rate; however, they may also be fixed-to-floating rate or floating-to-fixed rate. These transactions are entered into pursuant to master agreements that provide for a single net payment to be made by one counterparty for payments made in the same currency at each due date. We use currency swaps to reduce market risks from changes in currency exchange rates with respect to investments or liabilities denominated in foreign currencies that we either hold or intend to acquire or sell.

Currency forwards are contracts in which we agree with other parties to deliver or receive a specified amount of an identified currency at a specified future date. Typically, the price is agreed upon at the time of the contract and payment for such a contract is made at the specified future date. We use currency forwards to reduce market risks from changes in currency exchange rates with respect to investments or liabilities denominated in foreign currencies that we either hold or intend to acquire or sell. We sometimes use currency forwards to hedge the currency risk associated with a business combination or to hedge certain net equity investments in or expected cash flows from our foreign operations.

Equity Contracts

Equity risk is the risk that we will incur economic losses due to adverse fluctuations in common stock prices. We use various derivatives to manage our exposure to equity risk, which arises from products in which the interest we credit is tied to an external equity index as well as products subject to minimum contractual guarantees.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

We purchase equity call spreads to hedge the equity participation rates promised to contractholders in conjunction with our fixed deferred annuity and universal life products that credit interest based on changes in an external equity index. We use exchange-traded futures and equity put options to hedge against changes in the value of the GMWB liability related to the GMWB rider on our variable annuity product, as previously explained. The premium associated with certain options is paid quarterly over the life of the option contract.

Credit Contracts

Credit risk relates to the uncertainty associated with the continued ability of a given obligor to make timely payments of principal and interest. We use credit default swaps to enhance the return on our investment portfolio by providing comparable exposure to fixed income securities that might not be available in the primary market. They are also used to hedge credit exposures in our investment portfolio. Credit derivatives are used to sell or buy credit protection on an identified name or names on an unfunded or synthetic basis in return for receiving or paying a quarterly premium. The premium generally corresponds to a referenced name's credit spread at the time the agreement is executed. In cases where we sell protection, we also buy a quality cash bond to match against the credit default swap, thereby entering into a synthetic transaction replicating a cash security. When selling protection, if there is an event of default by the referenced name, as defined by the agreement, we are obligated to pay the counterparty the referenced amount of the contract and receive in return the referenced security in a principal amount equal to the notional value of the credit default swap.

Total return swaps are contracts in which we agree with other parties to exchange, at specified intervals, an amount determined by the difference between the previous price and the current price of a reference asset based upon an agreed upon notional principal amount plus an additional amount determined by the financing spread. We currently use futures traded on an exchange ("exchange-traded") and total return swaps referencing equity indices to hedge our portfolio from potential credit losses related to systemic events.

Other Contracts

Embedded Derivatives. We purchase or issue certain financial instruments or products that contain a derivative instrument that is embedded in the financial instrument or product. When it is determined that the embedded derivative possesses economic characteristics that are not clearly or closely related to the economic characteristics of the host contract and a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is bifurcated from the host instrument for measurement purposes. The embedded derivative, which is reported with the host instrument in the consolidated statements of financial position, is carried at fair value.

We have investment contracts in which the return is tied to a leveraged inflation index. We economically hedge the risk associated with these investment contracts.

We offer group annuity contracts that have guaranteed separate accounts as an investment option. We also offer funds with embedded fixed-rate guarantees as investment options in our defined contribution plans in Hong Kong.

We have structured investment relationships with trusts we have determined to be VIEs, which are consolidated in our financial statements. The notes issued by these trusts include obligations to deliver an underlying security to residual interest holders and the obligations contain an embedded derivative of the forecasted transaction to deliver the underlying security.

We have fixed deferred annuities and universal life contracts that credit interest based on changes in an external equity index. We also have certain variable annuity products with a GMWB rider, which allows the customer to make withdrawals of a specified annual amount, either for a fixed number of years or for the lifetime of the customer, even if the account value is fully exhausted. Declines in the equity markets may increase our exposure to benefits under contracts with the GMWB. We economically hedge the exposure in these contracts, as previously explained.

Exposure

Our risk of loss is typically limited to the fair value of our derivative instruments and not to the notional or contractual amounts of these derivatives. We are also exposed to credit losses in the event of nonperformance of the counterparties. Our current credit exposure is limited to the value of derivatives that have become favorable to us. This credit risk is minimized by purchasing such agreements from financial institutions with high credit ratings and by establishing and monitoring exposure limits. We also utilize various credit enhancements, including collateral and credit triggers to reduce the credit exposure to our derivative instruments.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Derivatives may be exchange-traded or they may be privately negotiated contracts, which are usually referred to as over-the-counter ("OTC") derivatives. Certain of our OTC derivatives are cleared and settled through central clearing counterparties ("OTC cleared"), while others are bilateral contracts between two counterparties ("bilateral OTC"). Our derivative transactions are generally documented under International Swaps and Derivatives Association, Inc. ("ISDA") Master Agreements. Management believes that such agreements provide for legally enforceable set-off and close-out netting of exposures to specific counterparties. Under such agreements, in connection with an early termination of a transaction, we are permitted to set off our receivable from a counterparty against our payables to the same counterparty

Table of Contents

Principal Financial Group, Inc.

5. Derivative Financial Instruments (continued)

arising out of all included transactions. For reporting purposes, we do not offset fair value amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral against fair value amounts recognized for derivative instruments executed with the same counterparties under master netting agreements.

We posted \$322.4 million and \$342.7 million in cash and securities under collateral arrangements as of December 31, 2016 and December 31, 2015, respectively, to satisfy collateral requirements associated with our derivative credit support agreements and FCM agreements. These amounts include initial margin requirements.

Certain of our derivative instruments contain provisions that require us to maintain an investment grade rating from each of the major credit rating agencies on our debt. If the ratings on our debt were to fall below investment grade, it would be in violation of these provisions and the counterparties to the derivative instruments could request immediate payment or demand immediate and ongoing full overnight collateralization on derivative instruments in net liability positions. The aggregate fair value, inclusive of accrued interest, of all derivative instruments with credit-risk-related contingent features that were in a liability position without regard to netting under derivative credit support annex agreements as of December 31, 2016 and December 31, 2015, was \$454.7 million and \$606.5 million, respectively. Cleared derivatives have contingent features that require us to post excess margin as required by the FCM. The terms surrounding excess margin vary by FCM agreement. With respect to derivatives containing collateral triggers, we posted collateral and initial margin of \$322.4 million and \$342.7 million as of December 31, 2016 and December 31, 2015, respectively, in the normal course of business, which reflects netting under derivative agreements. If the credit-risk-related contingent features underlying these agreements were triggered on December 31, 2016, we would be required to post an additional \$42.0 million of collateral to our counterparties.

As of December 31, 2016 and December 31, 2015, we had received \$576.3 million and \$217.5 million, respectively, of cash collateral associated with our derivative credit support annex agreements and FCM agreements, for which we recorded a corresponding liability reflecting our obligation to return the collateral.

Notional amounts are used to express the extent of our involvement in derivative transactions and represent a standard measurement of the volume of our derivative activity. Notional amounts represent those amounts used to calculate contractual flows to be exchanged and are not paid or received, except for contracts such as currency swaps.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****5. Derivative Financial Instruments (continued)**

5. Derivative Financial Instruments (continued)

(2)

The fair value of derivative liabilities is reported with other liabilities on the consolidated statements of financial position, with the exception of certain embedded derivative liabilities. Embedded derivative liabilities with a fair value of \$176.5 million and \$177.4 million as of December 31, 2016 and December 31, 2015, respectively, are reported with contractholder funds on the consolidated statements of financial position.

Credit Derivatives Sold

When we sell credit protection, we are exposed to the underlying credit risk similar to purchasing a fixed maturity security instrument. The majority of our credit derivative contracts sold reference a single name or reference security (referred to as "single name credit default swaps"). The remainder of our credit derivatives reference either a basket or index of securities. These instruments are either referenced in an OTC credit derivative transaction or embedded within an investment structure that has been fully consolidated into our financial statements.

These credit derivative transactions are subject to events of default defined within the terms of the contract, which normally consist of bankruptcy, failure to pay, or modified restructuring of the reference entity and/or issue. If a default event occurs for a reference name or security, we are obligated to pay the counterparty an amount equal to the notional amount of the credit derivative transaction. As a result, our maximum future payment is equal to the notional amount of the credit derivative. In certain cases, we also have purchased credit protection with identical underlyings to certain of our sold protection transactions. As of December 31, 2016 and December 31, 2015, we did not purchase credit protection relating to our sold protection transactions. In certain circumstances, our potential loss could also be reduced by any amount recovered in the default proceedings of the underlying credit name.

We purchased an investment structure with embedded credit features that is fully consolidated into our financial statements. This consolidation results in recognition of the underlying credit derivatives and collateral within the structure, typically high quality fixed maturities that are owned by a special purpose vehicle. These credit derivatives reference several names in a basket structure. In the event of default, the collateral within the structure would typically be liquidated to pay the claims of the credit derivative counterparty.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****5. Derivative Financial Instruments (continued)**

The following tables show our credit default swap protection sold by types of contract, types of referenced/underlying asset class and external agency rating for the underlying reference security. The maximum future payments are undiscounted and have not been reduced by the effect of any offsetting transactions, collateral or recourse features described above.

(1)

Includes \$60.0 million and \$78.0 million as of December 31, 2016 and December 31, 2015, respectively, notional of derivatives in consolidated collateralized private investment vehicle VIEs where the credit risk is borne by third party investors.

We also have invested in fixed maturities classified as trading that contain credit default swaps. These securities are subject to the credit risk of the issuer, normally a special purpose vehicle, which consists of the underlying credit default swaps and high quality fixed maturities that serve as collateral. A default event occurs if the cumulative losses exceed a specified attachment point, which is typically not the first loss of the portfolio. If a default event occurs that exceeds the specified attachment point, our investment may not be fully returned. We would have no future potential payments under these investments. The following tables show, by the types of referenced/underlying asset class and external rating, our fixed maturities with embedded credit derivatives.

Fair Value Hedges

We use fixed-to-floating rate interest rate swaps to more closely align the interest rate characteristics of certain assets and liabilities. In general, these swaps are used in asset and liability management to modify duration, which is a measure of sensitivity to interest rate changes.

We enter into currency exchange swap agreements to convert certain foreign denominated assets and liabilities into U.S. dollar floating-rate denominated instruments to eliminate the exposure to future currency volatility on those items.

The net interest effect of interest rate swap and currency swap transactions for derivatives in fair value hedges is recorded as an adjustment to income or expense of the underlying hedged item in our consolidated statements of operations.

Hedge effectiveness testing for fair value relationships is performed utilizing a regression analysis approach for both prospective and retrospective evaluations. This regression analysis will consider multiple data points for the assessment that the hedge continues to be highly effective in achieving offsetting changes in fair value. In certain periods, the comparison of the change in value of the derivative and the change in the value of the hedged item may not be offsetting at a specific period in time due to small movements in value. However, any amounts recorded as fair value hedges have shown to be highly effective in achieving offsetting changes in fair value both for present and future periods.

The following table shows the effect of derivatives in fair value hedging relationships and the related hedged items on the consolidated statements of operations. All gains or losses on derivatives were included in the assessment of hedge effectiveness.

Derivatives in fair value hedging relationships	Amount of gain (loss) recognized in net income on derivatives	Hedged items in fair value hedging relationships	Amount of gain (loss) recognized in net income on related

Investment contracts (2)	2.6	3.7	4.3

(1) Reported in net investment income on the consolidated statements of operations.

(2) Reported in benefits, claims and settlement expenses on the consolidated statements of operations.

Cash Flow Hedges

We utilize floating-to-fixed rate interest rate swaps to eliminate the variability in cash flows of recognized financial assets and liabilities and forecasted transactions.

We enter into currency exchange swap agreements to convert both principal and interest payments of certain foreign denominated assets and liabilities into U.S. dollar denominated fixed-rate instruments to eliminate the exposure to future currency volatility on those items.

The net interest effect of interest rate swap and currency swap transactions for derivatives in cash flow hedges is recorded as an adjustment to income or expense of the underlying hedged item in our consolidated statements of operations.

The maximum length of time we are hedging our exposure to the variability in future cash flows for forecasted transactions, excluding those related to the payments of variable interest on existing financial assets and liabilities, is 3.5 years. As of December 31, 2016, we had \$16.2 million of net gains reported in AOCI on the consolidated statements of financial position related to active hedges of forecasted transactions. If a hedged forecasted transaction is no longer probable of occurring, cash flow hedge accounting is discontinued. If it is probable that the hedged forecasted transaction will not occur, the deferred gain or loss is immediately reclassified from AOCI into net income. During 2016 and 2015, we did not have any reclassifications from AOCI into net realized capital gains (losses) as a result of the determination that hedged cash flows were probable of not occurring.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****5. Derivative Financial Instruments (continued)**

The following table shows the effect of derivatives in cash flow hedging relationships on the consolidated statements of operations and consolidated statements of financial position. All gains or losses on derivatives were included in the assessment of hedge effectiveness.

Derivatives in cash flow hedging relationships	Related hedged item	Amount of gain (loss) recognized in AOCI on derivatives (effective portion) for the year ended December 31,			Location of gain (loss) reclassified from AOCI into net income (effective portion)	Amount of gain (loss) reclassified from AOCI on derivatives (effective portion) for the year ended December 31,		
		2016	2015	2014		2016	2015	2014

The following table shows the periodic settlements on interest rate contracts and foreign exchange contracts in cash flow hedging relationships.

Hedged item	Amount of gain (loss) for the year ended December 31,		
	2016	2015	2014
	<i>(in millions)</i>		
Fixed maturities, available-for-sale (1)	\$ 5.8	\$ 6.1	\$ 5.1
Investment contracts (2)	(15.7)	(18.3)	(11.1)

(1) Reported in net investment income on the consolidated statements of operations.

(2) Reported in benefits, claims and settlement expenses on the consolidated statements of operations.

The ineffective portion of our cash flow hedges is reported in net realized capital gains (losses) on the consolidated statements of operations. The net gain resulting from the ineffective portion of foreign currency contracts in cash flow hedging relationships was \$0.3 million, \$0.0 million and \$0.0 million for the years ended December 31, 2016, 2015 and 2014, respectively.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

We expect to reclassify net gains of \$3.7 million from AOCI into net income in the next 12 months, which includes both net deferred gains on discontinued hedges and net losses on periodic settlements of active hedges. Actual amounts may vary from this amount as a result of market conditions.

Net Investment Hedges

We may take measures to hedge our net equity investments in our foreign operations from currency risk. This is accomplished with the use of currency forwards.

Gains and losses associated with net investment hedges are recorded in AOCI and will be released into earnings if our investment in the foreign operation is sold or substantially liquidated.

The amount of gain recognized in AOCI on derivatives was \$0.0 million, \$1.7 million and \$0.0 million for the years ended December 31, 2016, 2015 and 2014, respectively.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****5. Derivative Financial Instruments (continued)**

We did not have any ineffectiveness and did not reclassify any gains or losses from AOCI into net income related to our net investment hedges for the years ended December 31, 2016, 2015 and 2014.

Derivatives Not Designated as Hedging Instruments

Our use of futures, certain swaptions and swaps, collars, options and forwards are effective from an economic standpoint, but they have not been designated as hedges for financial reporting purposes. As such, periodic changes in the market value of these instruments, which includes mark-to-market gains and losses as well as periodic and final settlements, primarily flow directly into net realized capital gains (losses) on the consolidated statements of operations.

The following table shows the effect of derivatives not designated as hedging instruments, including fair value changes of embedded derivatives that have been bifurcated from the host contract, on the consolidated statements of operations.

Derivatives not designated as hedging instruments	Amount of gain (loss) recognized in net income on derivatives for the year ended December 31,		
	2016	2015	2014
	<i>(in millions)</i>		
Interest rate contracts	\$ 243.3	\$ 73.8	\$ 246.0
Foreign exchange contracts	20.1	(49.8)	(74.6)
Equity contracts	(123.5)	(50.5)	21.9
Credit contracts	37.4	3.5	(34.7)
Other contracts	(4.8)	(11.4)	(194.3)
Total	\$ 172.5	\$ (34.4)	\$ (35.7)

6. Closed Block

In connection with the 1998 MIHC formation, Principal Life formed a Closed Block to provide reasonable assurance to policyholders included therein that, after the formation of the MIHC, assets would be available to maintain dividends in aggregate in accordance with the 1997 policy dividend scales, if the experience underlying such scales continued. Assets of Principal Life were allocated to the Closed Block in an amount that produces cash flows which, together with anticipated revenue from policies and contracts included in the Closed Block, were expected to be sufficient to support the Closed Block policies. This includes, but is not limited to, provisions for payment of claims, certain expenses, charges and taxes, and to provide for continuation of policy and contract dividends in aggregate in accordance with the 1997 dividend scales, if the experience underlying such scales continues, and to allow for appropriate adjustments in such scales, if such experience changes. Due to adjustable life policies being included in the Closed Block, the Closed Block is charged with amounts necessary to properly fund for certain adjustments, such as face amount and premium increases, that are made to these policies after the Closed Block inception date. These amounts are referred to as Funding Adjustment Charges and are treated as capital transfers from the Closed Block.

Assets allocated to the Closed Block inure solely to the benefit of the holders of policies included in the Closed Block. Closed Block assets and liabilities are carried on the same basis as other similar assets and liabilities. Principal Life will continue to pay guaranteed benefits under all policies, including the policies within the Closed Block, in accordance with their terms. If the assets allocated to the Closed Block, the investment cash flows from those assets and the revenues from the policies included in the Closed Block, including investment income thereon, prove to be insufficient to pay the benefits guaranteed under the policies included in the Closed Block, Principal Life will be required to make such payments from its general funds. No additional policies were added to the Closed Block, nor was the Closed Block affected in any other way, as a result of the demutualization.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

A policyholder dividend obligation ("PDO") is required to be established for earnings in the Closed Block that are not available to stockholders. A model of the Closed Block was established to produce the pattern of expected earnings in the Closed Block, adjusted to eliminate the impact of related amounts in AOCI.

If actual cumulative earnings of the Closed Block are greater than the expected cumulative earnings of the Closed Block, only the expected cumulative earnings will be recognized in income with the excess recorded as a PDO. This PDO represents undistributed accumulated earnings that will be paid to Closed Block policyholders as dividends unless offset by future performance of the Closed Block that is less favorable than originally expected. If actual cumulative performance is less favorable than expected, only actual earnings will be recognized in income. As of December 31, 2016,

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****6. Closed Block (continued)**

cumulative actual earnings were greater than cumulative expected earnings. Therefore, we established an additional \$8.2 million liability, which was recorded within policyholder dividends obligation. As of December 31, 2015, cumulative actual earnings were less than cumulative expected earnings. However, cumulative net unrealized gains were greater than expected, resulting in the recognition of a PDO of \$117.9 million and \$88.7 million as of December 31, 2016 and 2015, respectively.

Closed Block liabilities and assets designated to the Closed Block were as follows:

	December 31, 2016	December 31, 2015

Other		(0.9)	
Balance at end of year	\$ 3,380.2	\$ 3,276.1	\$ 2,993.0

(1) Includes adjustments for revisions to estimated gross profits.

8. Insurance Liabilities**Contractholder Funds**

Major components of contractholder funds in the consolidated statements of financial position were as follows:

December 31,

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

	2016	2015
	<i>(in millions)</i>	
Liabilities for investment contracts:		
Liabilities for individual annuities	\$ 10,864.9	\$ 10,147.4
GICs	10,290.7	10,222.8
Funding agreements	8,270.3	6,863.4
Other investment contracts	1,840.0	2,007.4
Total liabilities for investment contracts	31,265.9	29,241.0
Universal life and other reserves	6,687.7	6,475.1
Total contractholder funds	\$ 37,953.6	\$ 35,716.1

Our GICs and funding agreements contain provisions limiting or prohibiting early surrenders, which typically include penalties for early surrenders, minimum notice requirements or, in the case of funding agreements with survivor options, minimum pre-death holding periods and specific maximum amounts.

Funding agreements include those issued directly to nonqualified institutional investors, as well as under five separate programs where the funding agreements have been issued directly or indirectly to unconsolidated special purpose entities. Claims for principal and interest under funding agreements are afforded equal priority to claims of life insurance and annuity policyholders under insolvency provisions of Iowa Insurance Laws.

Notes to Consolidated Financial Statements (continued)

December 31, 2016

8. Insurance Liabilities (continued)

Principal Life was authorized to issue up to \$4.0 billion of funding agreements under a program established in 1998 to support the prospective issuance of medium term notes by an unaffiliated entity in non-U.S. markets. As of December 31, 2016 and 2015, \$106.7 million and \$107.5 million, respectively, of liabilities were outstanding with respect to the issuance outstanding under this program. Principal Life was also authorized to issue up to Euro 4.0 billion (approximately USD\$5.3 billion) of funding agreements under a program established in 2006 to support the prospective issuance of medium term notes by an unaffiliated entity in non-U.S. markets. The unaffiliated entity is an unconsolidated special purpose vehicle. As of December 31, 2016 and 2015, \$702.0 million and \$1,021.0 million, respectively, of liabilities were outstanding with respect to issuances outstanding under this program. Principal Life does not anticipate any new issuance activity under either of these programs due to the existence of the program established in 2011 described below.

In addition, Principal Life was authorized to issue up to \$7.0 billion of funding agreements under a program established in 2001 to support the prospective issuance of medium term notes by an unaffiliated entity in both domestic and international markets. The unaffiliated entity is an unconsolidated special purpose entity. As of December 31, 2016 and 2015, \$201.5 million and \$201.4 million, respectively, of liabilities were being held with respect to issuances outstanding under this program. Principal Life does not anticipate any new issuance activity under this program, given our December 2005 termination of the dealership agreement for this program and the availability of the program established in 2011 described below.

Additionally, Principal Life was authorized to issue up to \$9.0 billion of funding agreements under a program that was originally established in March 2004 to support the prospective issuance of medium term notes by unaffiliated entities in both domestic and international markets. Under this program, both the notes and the supporting funding agreements were registered with the United States Securities and Exchange Commission ("SEC"). As of December 31, 2016 and 2015, \$119.8 million and \$246.0 million, respectively, of liabilities were being held with respect to issuances outstanding under this program. In contrast with direct funding agreements, GIC issuances and the other three funding agreement-backed medium term note programs described above, Principal Life's payment obligations on each funding agreement issued under this SEC-registered program are guaranteed by PFG. Principal Life does not anticipate any new issuance activity under this program due to the existence of the program established in 2011 described below.

Principal Life was authorized to issue up to \$5.0 billion of funding agreements under a program that was originally established in 2011 to support the prospective issuance of medium term notes by an unaffiliated entity in both domestic and international markets. The unaffiliated entity is an unconsolidated special purpose entity. In June 2015, this program was amended to authorize issuance of up to an additional \$4.0 billion in recognition of the use of nearly all \$5.0 billion of existing issuance authorization. As of December 31, 2016 and 2015, \$4,389.4 million and \$3,537.0 million, respectively, of liabilities were being held with respect to issuances outstanding under this program. Similar to the SEC-registered program, Principal Life's payment obligations on each funding agreement issued under this program are guaranteed by PFG. The program established in 2011 is not registered with the SEC.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****8. Insurance Liabilities (continued)****Liability for Unpaid Claims**

The liability for unpaid claims is reported in future policy benefits and claims within our consolidated statements of financial position. Activity associated with unpaid claims was as follows:

	December 31,		
	2016	2015	2014
	<i>(in millions)</i>		
Balance at beginning of year	\$ 1,872.2	\$ 1,771.4	\$ 1,662.2
Less: reinsurance recoverable	314.1	284.6	254.9
Net balance at beginning of year	1,558.1	1,486.8	1,407.3
Incurred:			
Current year	1,103.5	1,037.0	994.2
Prior years	24.4	(18.1)	(17.8)
Total incurred	1,127.9	1,018.9	976.4
Payments:			
Current year	701.9	646.7	614.2
Prior years	323.1	300.9	282.7
Total payments	1,025.0	947.6	896.9
Net balance at end of year	1,661.0	1,558.1	1,486.8
Plus: reinsurance recoverable	340.3	314.1	284.6
Balance at end of year	\$ 2,001.3	\$ 1,872.2	\$ 1,771.4

Amounts not included in the rollforward above:

Claim adjustment expense liabilities	\$ 49.3	\$ 58.9	\$ 55.1
--------------------------------------	---------	---------	---------

Incurred liability adjustments relating to prior years, which affected current operations during 2016, 2015 and 2014, resulted in part from developed claims for prior years being different than were anticipated when the liabilities for unpaid claims were originally estimated. These trends have been considered in establishing the current year liability for unpaid claims.

Short-Duration Contracts**Claims Development**

The following tables present undiscounted information about claims development by incurral year, including separate information about incurred claims and paid claims net of reinsurance for the periods indicated. The tables also include information on incurred but not reported claims and the cumulative number of reported claims.

The tables present information for the number of years for which claims incurred typically remain outstanding, but do not exceed ten years. The data is disaggregated into groupings of claims with similar characteristics, such as duration of the claim payment period and average claim amount, and with consideration to the overall size of the groupings. Outstanding liabilities equal total net incurred claims less total net paid claims plus outstanding liabilities for net unpaid claims of prior years.

9. Debt**Short-Term Debt**

The components of short-term debt were as follows:

	December 31,	
	2016	2015
	<i>(in millions)</i>	
Line of credit	\$ 51.4	\$ 157.2
Other recourse short-term debt		23.9
Total short-term debt	\$ 51.4	\$ 181.1

As of both December 31, 2016 and 2015, we had short-term credit facilities with various financial institutions in an aggregate amount of \$1,005.0 million. As of December 31, 2016 and 2015, we had \$51.4 million and \$181.1 million, respectively, of outstanding borrowings, with no assets pledged as support. Our credit facilities include a \$400.0 million 5-year facility that matures in March 2021, with Principal Financial Services, Inc., Principal Life and us as co-borrowers, a \$300.0 million 364-day facility with Principal Life as borrower that matures in March 2017, and a \$200.0 million 5-year facility with Principal Financial Services, Inc., Principal Life, Principal Financial Services V (UK) LTD and us as the co-borrowers that matures in March 2021. These facilities may be used for general corporate purposes, including commercial paper back-stop. In addition to the revolving credit facilities, Principal International Chile has the capacity to access up to \$60.0 million in unsecured lines of credit offered by Chilean financial institutions and Principal Life has a \$45.0 million unsecured line of credit. Our commercial paper programs require 100% back-stop support, of which we had no outstanding balances as of December 31, 2016 and 2015.

The weighted-average interest rate on short-term borrowings as of December 31, 2016 and 2015, was 4.4% and 4.2%, respectively.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****9. Debt (continued)****Long-Term Debt**

(1)

Includes external debt issuance costs incurred for long-term affiliated debt issued in a foreign jurisdiction.

Net discount, premium and issuance costs associated with issuing these notes are amortized to expense over the respective terms using the interest method.

On November 10, 2016, we issued \$650.0 million of senior notes. We issued a \$350.0 million series of notes that bear interest at 3.1% and will mature in 2026 and a \$300.0 million series of notes that bear interest at 4.3% and will mature in 2046. Interest on the notes is payable semi-annually on May 15 and November 15 each year, beginning on May 15, 2017. The proceeds from these notes were used to redeem our notes payable due in 2017 and 2019. We incurred a one-time cost to extinguish this debt before the scheduled maturity date.

On May 7, 2015, we issued \$400.0 million of senior notes. The notes bear interest at 3.4% and will mature in 2025. Interest on the notes is payable semi-annually on May 15 and November 15 each year, beginning on November 15, 2015. In addition, on May 7, 2015, we issued \$400.0 million of junior subordinated notes, which are subordinated to all our senior debt. The notes are callable in 2020 and have a maturity date in 2055. The notes initially bear a fixed rate of interest at 4.7% and convert to a floating rate at the date the notes become callable. Interest on the notes is payable semi-annually on May 15 and November 15 each year. After the call date the notes will bear interest at 3-month LIBOR plus 3.044%, reset quarterly and payable in arrears in February, May, August and November each year. We have the right

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****9. Debt (continued)**

to defer interest payments on the junior subordinated notes for up to 5 years without resulting in a default, during which time interest will be compounded. The proceeds from these notes were used to redeem our series A and series B preferred stock with the remainder available for general corporate purposes.

On November 16, 2012, we issued \$900.0 million of senior notes. We issued a \$300.0 million series of notes that bore interest at 1.85% and were to mature in 2017. These notes were repaid following our November 2016 debt issuance. We issued a \$300.0 million series of notes that bear interest at 3.125% and will mature in 2023 and a \$300.0 million series of notes that bear interest at 4.35% and will mature in 2043. Interest on the notes is payable semi-annually on May 15 and November 15 each year, beginning on May 15, 2013. The proceeds were used to fund our acquisition of Cuprum.

On September 5, 2012, we issued \$600.0 million of senior notes. We issued a \$300.0 million series of notes that bear interest at 3.3% and will mature in 2022 and a \$300.0 million series of notes that bear interest at 4.625% and will mature in 2042. Interest on the notes is payable semi-annually on March 15 and September 15 each year, beginning on March 15, 2013. The proceeds were used for the repayment of the \$400.0 million aggregate principal amount of notes due in 2014 and to partially fund our acquisition of Cuprum.

On May 18, 2009, we issued \$750.0 million of senior notes. We issued a \$400.0 million series of notes that bore interest at 7.875% and were to mature on May 15, 2014. These notes were repaid following our November 2012 debt issuance. We issued a \$350.0 million series of notes that bore interest at 8.875% and were to mature on May 15, 2019. These notes were repaid following our November 2016 debt issuance. Interest on the notes was payable semi-annually on May 15 and November 15 each year, beginning on November 15, 2009. The proceeds were primarily used to refinance \$440.9 million of notes that matured on August 15, 2009, with the remaining proceeds being used for general corporate purposes.

On October 16 and December 5, 2006, we issued \$500.0 million and \$100.0 million, respectively, of senior notes. The notes bear interest at a rate of 6.05% per year. Interest on the notes is payable semi-annually on April 15 and October 15 each year and began on April 15, 2007. The notes will mature on October 15, 2036. A portion of the proceeds were used to fund the 2006 acquisition of WM Advisors, Inc., with the remaining proceeds being used for general corporate purposes. A tender offer in the fourth quarter of 2016 resulted in redemption of \$94.4 million of the senior notes. We incurred a one-time cost to extinguish this debt before the scheduled maturity date.

The non-recourse mortgages and notes payable are primarily financings for real estate developments. Outstanding principal balances as of December 31, 2016, were \$0.0 million due to outstanding debt maturing in 2016. Outstanding principal balances as of December 31, 2015, ranged from \$1.8 million to \$41.1 million per development with interest rates being variable. Outstanding debt is secured by the underlying real estate properties, which were reported as real estate on our consolidated statements of financial position with a carrying value of \$79.5 million as of December 31, 2015.

As of December 31, 2016, future annual maturities of long-term debt were as follows (in millions):

Year ending December 31:	
2017	\$
2018	
2019	
2020	
2021	
Thereafter	3,125.7
Total future maturities of long-term debt	\$ 3,125.7

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****10. Income Taxes****Income Tax Expense**

Our income tax expense was as follows:

	For the year ended December 31,		
	2016	2015	2014
	<i>(in millions)</i>		
Current income taxes:			
U.S. federal	\$ 38.6	\$ 225.9	\$ 242.1
State	(1.9)	12.3	4.7
Foreign	36.6	32.6	67.6
Tax benefit of operating loss carryforward	(17.5)	(52.0)	(163.0)
Total current income taxes	55.8	218.8	151.4
Deferred income taxes (benefits):			
U.S. federal	171.7	79.1	148.0
State	(20.6)	(1.0)	(32.8)
Foreign	23.0	(119.3)	51.9
Total deferred income taxes (benefits)	174.1	(41.2)	167.1
Total income taxes	\$ 229.9	\$ 177.6	\$ 318.5

Effective Income Tax Rate

Our provision for income taxes may not have the customary relationship of taxes to income. A reconciliation between the U.S. corporate income tax rate and the effective income tax rate was as follows:

	For the year ended December 31,		
	2016	2015	2014
U.S. corporate income tax rate	35%	35%	35%
Dividends received deduction	(10)	(11)	(10)
Impact of equity method presentation	(3)	(3)	(2)
Tax credits	(2)	(2)	(2)
Interest exclusion from taxable income	(1)	(1)	(1)
Foreign country permanent tax adjustments	(1)		
Impact of noncontrolling interest presentation	(1)		
Merger of Chilean legal entities		(7)	
Foreign tax rate differential			(2)
Impact of court ruling on some uncertain tax positions		3	
Impact of enactment of tax legislation			4
Other	(3)	(2)	(1)
Effective income tax rate	14%	12%	21%

Our income before income taxes was as follows:

	For the year ended December 31,		
	2016	2015	2014
	<i>(in millions)</i>		
Domestic	\$ 1,261.4	\$ 1,195.3	\$ 1,203.7
Foreign	330.3	235.5	291.2
Total income before income taxes	\$ 1,591.7	\$ 1,430.8	\$ 1,494.9

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****10. Income Taxes (continued)****Unrecognized Tax Benefits**

Our changes in unrecognized tax benefits were as follows:

	For the year ended December 31,	
	2016	2015
	<i>(in millions)</i>	
Balance at beginning of period	\$ 219.0	\$ 172.4
Additions based on tax positions related to the current year	0.8	12.9
Additions for tax positions of prior years	0.8	45.9
Reductions for tax positions related to the current year	(12.6)	(8.7)
Reductions for tax positions of prior years	(0.2)	(3.5)
Balance at end of period (1)	\$ 207.8	\$ 219.0

(1) Of this amount, \$81.0 million, if recognized, would reduce the 2016 effective income tax rate. We recognize interest and penalties related to uncertain tax positions in operating expenses within the consolidated statements of operations.

As of December 31, 2016 and 2015, we had recognized \$142.4 million and \$137.9 million of accumulated pre-tax interest and penalties related to unrecognized tax benefits, respectively.

Net Deferred Income Taxes

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Our significant components of net deferred income taxes were as follows:

	December 31,	
	2016	2015
	<i>(in millions)</i>	
Deferred income tax assets:		
Insurance liabilities	\$ 100.8	\$ 85.8
Investments, including derivatives	352.7	368.8
Net operating and capital loss carryforwards	78.7	80.9
Tax credit carryforwards	275.7	227.4
Employee benefits	500.8	534.8
Foreign currency translation	105.0	123.4
Other deferred income tax assets	49.1	64.3
Gross deferred income tax assets	1,462.8	1,485.4
Valuation allowance	(7.3)	(11.9)

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Total deferred income tax assets	1,455.5	1,473.5
Deferred income tax liabilities:		
Deferred acquisition costs	(899.7)	(866.1)
Investments, including derivatives	(460.4)	(379.6)
Net unrealized gains on available-for-sale securities	(536.7)	(431.2)
Real estate	(117.5)	(123.1)
Intangible assets	(256.0)	(235.4)
Other deferred income tax liabilities	(53.7)	(39.3)
Total deferred income tax liabilities	(2,324.0)	(2,074.7)
Total net deferred income tax liabilities	\$ (868.5)	\$ (601.2)

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****10. Income Taxes (continued)**

Our net deferred income taxes by jurisdiction were as follows:

	December 31,	
	2016	2015
	<i>(in millions)</i>	
Deferred income tax assets:		
State	\$ 67.8	\$ 53.3
Foreign	36.1	42.7
Net deferred income tax assets	103.9	96.0
Deferred income tax liabilities:		
U.S. federal	(733.3)	(459.5)
Foreign	(239.1)	(237.7)
Net deferred income tax liabilities	(972.4)	(697.2)
Total net deferred income tax liabilities	\$ (868.5)	\$ (601.2)

In management's judgment, total deferred income tax assets are more likely than not to be realized. Included in the deferred income tax asset are tax carryforwards available to offset future taxable income or income taxes. As of December 31, 2016 and 2015, we had tax credit carryforwards for U.S. federal income tax purposes of \$275.7 million and \$227.4 million, respectively. Alternative minimum, foreign and general business tax credit carryovers were generated during the period we utilized net operating losses, primarily attributable to our captive reinsurance companies that joined our consolidated U.S. federal income tax return beginning in 2012 and 2013. Some of these tax credit carryforwards will expire in 2023 while others never expire. As of December 31, 2016, all accumulated U.S. federal tax credit carryforwards are anticipated to be utilized before expiration; therefore, no valuation allowance has been provided for the related deferred income tax assets.

As of December 31, 2016 and 2015, domestic state net operating and capital loss carryforwards were \$587.7 million and \$387.7 million, respectively, and expired or will expire between 2021 and 2035. As of December 31, 2016 and 2015, foreign net operating loss carryforwards were \$151.6 million and \$197.1 million, respectively, with some expiring in 2017 while others never expire. We maintain valuation allowances by jurisdiction against the deferred income tax assets related to certain of these carryforwards and other items, as utilization of these income tax benefits fail the more likely than not criteria in certain jurisdictions. As of December 31, 2016 and 2015, valuation allowances of \$7.3 million and \$11.9 million, respectively, had been recorded against the income tax benefits associated primarily with foreign net operating loss carryforwards. Adjustments to the valuation allowance will be made if there is a change in management's assessment of the amount of the deferred income tax assets that are more likely than not to be realized.

Tax legislation increasing the Brazilian tax rate was enacted in September 2015. The three-year rate increase did not have a material impact on our consolidated results. Tax legislation transitioning an increase in the Chilean tax rate over five years was enacted in September 2014. Our net deferred tax liabilities increased \$58.1 million in the third quarter of 2014 as a result of the legislation in Chile.

Deferred tax liabilities are recognized for taxes payable on the unremitted earnings from foreign operations of our subsidiaries, except where it is our intention to indefinitely reinvest a portion or all of these undistributed earnings. As of December 31, 2016 and 2015, U.S. federal and state deferred income taxes were not provided on approximately \$1,088.4 million and \$1,004.6 million, respectively, of such accumulated but undistributed earnings from operations of foreign subsidiaries. We currently do not intend to repatriate these unremitted earnings because we have several liquidity options to fund our domestic operations and obligations. These options include investing and financing activities, such as issuing debt, as well as cash-flow and dividends from domestic operations. It is not practicable to determine the amount of the unrecognized deferred tax liability that would arise if foreign earnings were remitted due to the complexity of our international holding company structure, the

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

availability of foreign tax credits, the rules governing the utilization of foreign tax credits, and the interplay between utilization of such foreign tax credits and other significant tax attributes. As of December 31, 2016, deferred taxes were also not provided on the approximately \$106.2 million of excess book carrying value over tax basis with respect to the original investment in our foreign subsidiaries. A tax liability will be recognized when we no longer plan to indefinitely reinvest a portion or all of these earnings or when we plan to sell a portion or all of our ownership interest.

Other Tax Information

Income tax returns are filed in the U.S. federal jurisdiction as well as various states and foreign jurisdictions where we and one or more of our subsidiaries conduct business. Although determined by jurisdiction, with few exceptions our

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****10. Income Taxes (continued)**

tax uncertainties relate primarily to the U.S. federal jurisdiction. The Internal Revenue Service ("IRS") has completed examination of our consolidated U.S. federal income tax returns for years prior to 2009. We are contesting certain issues and have filed suit in the Court of Federal Claims, requesting refunds for the years 1995-2003. We believe there is a reasonable possibility this litigation can be resolved within the next twelve months. As of December 31, 2016 and 2015, we had \$242.9 million and \$229.9 million, respectively, of current income tax receivables associated with outstanding audit issues reported as other assets in our consolidated statements of financial position.

We filed claims for refund for tax years 2006 through 2008 in 2015 and tax year 2012 in 2016. The IRS commenced audit of our U.S. federal income tax return for 2009 in the fourth quarter of 2011, 2010 in the first quarter of 2012, 2011 in the first quarter of 2013, and 2012 in the third quarter of 2015. We do not expect the results of these audits or developments in other tax areas for all open tax years to significantly change the possible increase in the amount of unrecognized tax benefits, but the outcome of tax reviews is uncertain and unforeseen results can occur.

The U.S. Court of Federal Claims denied cross-motions for partial summary judgment on February 4, 2015, and ordered a trial on the previously taxed income issue in the case of Principal Life Insurance Company and Subsidiaries v. the United States. Previously, in the same case, on May 9, 2014, the court ruled against Principal Life's tax treatment of transactions involving the purchase and sale of principal-only certificates. These recent events caused the re-evaluation of all our pending uncertain tax positions, which resulted in a \$30.3 million reduction in net income in the first quarter of 2015 and a \$47.5 million reduction in net income in the second quarter of 2014. We believe we have adequate defenses against, or sufficient provisions for, the contested issues, but final resolution could take several years while legal remedies are pursued. Consequently, we do not expect the ultimate resolution of issues from tax years 1995-2003 or those that might arise in tax years subsequent to 2003 to have a material impact on our net income. We do not believe there is a reasonable possibility the total amount of uncertain tax benefits will significantly increase or decrease in the next twelve months.

11. Employee and Agent Benefits

We have defined benefit pension plans covering substantially all of our U.S. employees and certain agents. Some of these plans provide supplemental pension benefits to employees and agents with salaries and/or pension benefits in excess of the qualified plan limits imposed by federal tax law. The employees and agents are generally first eligible for the pension plans when they reach age 21. For plan participants employed prior to January 1, 2002, the pension benefits are based on the greater of a final average pay benefit or a cash balance benefit. The final average pay benefit is based on the years of service and generally the employee's or agent's average annual compensation during the last five years of employment. Partial benefit accrual of final average pay benefits is recognized from first eligibility until retirement based on attained service divided by potential service to age 65 with a minimum of 35 years of potential service. The cash balance portion of the plan started on January 1, 2002. An employee's account is credited with an amount based on the employee's salary, age and service. These credits accrue with interest. For plan participants hired on and after January 1, 2002, only the cash balance plan applies. Our policy is to fund the cost of providing pension benefits in the years that the employees and agents are providing service to us. Our funding policy for the qualified defined benefit plan is to contribute an amount annually at least equal to the minimum annual contribution required under the Employee Retirement Income Security Act ("ERISA"), and, generally, not greater than the maximum amount that can be deducted for federal income tax purposes. Our funding policy for the nonqualified benefit plan is to fund the plan in the years the employees are providing service, taking into account the funded status of the trust. While we designate assets to cover the computed liability of the nonqualified plan, the assets are not included as part of the asset balances presented in this footnote as they do not qualify as plan assets in accordance with U.S. GAAP.

We also provide certain health care, life insurance and long-term care benefits for retired employees. Subsidized retiree health benefits are provided for employees hired prior to January 1, 2002 and who retire prior to January 1, 2020. Employees hired on or after January 1, 2002, or hired prior to January 1, 2002, and who retire on or after January 1, 2020, have access to retiree health benefits but it is intended that they pay for the full cost of the coverage. The health care plans are contributory with participants' contributions adjusted annually. The contributions are based on the number of years of service and age at retirement for those hired prior to January 1, 2002, and who retired prior to January 1, 2011. For employees hired prior to January 1, 2002, and who retire on or after January 1, 2011, but prior to January 1, 2020, the contributions are 60% of the expected cost. As part of the substantive plan, the retiree health contributions are assumed to be adjusted in the future as claim levels change. The life insurance plans are contributory for a small group of previously grandfathered participants that have elected supplemental coverage and dependent coverage. The retiree group term life coverage is not subsidized for those who retire on or after January 1, 2020.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Covered employees are first eligible for the health and life postretirement benefits when they reach age 57 and have completed ten years of service with us. Retiree long-term care benefits are provided for employees whose retirement was

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****11. Employee and Agent Benefits (continued)**

effective prior to July 1, 2000. Our policy is to fund the cost of providing retiree benefits in the years the employees are providing service, taking into account the funded status of the trust.

Obligations and Funded Status

The plans' combined funded status, reconciled to amounts recognized in the consolidated statements of financial position, was as follows:

	Pension benefits		Other postretirement benefits	
	December 31,		December 31,	
	2016	2015	2016	2015
	<i>(in millions)</i>			
Change in benefit obligation				
Benefit obligation at beginning of year	\$ (3,052.2)	\$ (3,060.0)	\$ (165.7)	\$ (169.7)

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Pre-tax accumulated other comprehensive (income) loss	\$	704.0	\$	766.1	\$	(48.7)	\$	(41.6)
---	----	-------	----	-------	----	--------	----	--------

The accumulated benefit obligation for all defined benefit pension plans was \$2,821.1 million and \$2,799.2 million as of December 31, 2016 and 2015, respectively.

Employer contributions to the pension plans include contributions made directly to the qualified pension plan assets and contributions from corporate assets to pay nonqualified pension benefits. Benefits paid from the pension plans include both qualified and nonqualified plan benefits. Nonqualified pension plan assets are not included as part of the asset balances presented in this footnote. The nonqualified pension plan assets are held in Rabbi trusts for the benefit of all nonqualified plan participants. The assets held in a Rabbi trust are available to satisfy the claims of general creditors only in the event of bankruptcy. Therefore, these assets are fully consolidated in our consolidated statements of financial position and are not reflected in our funded status as they do not qualify as plan assets under U.S. GAAP. The market value of assets held in these trusts was \$341.0 million and \$330.8 million as of December 31, 2016 and 2015, respectively.

Pension Plan Changes and Plan Gains/Losses

On January 1, 2010, benefits under the Principal Pension Plan were frozen for certain participants.

For the year ended December 31, 2016, the pension plans had an actuarial loss primarily due to assumption changes, including the decrease in the discount rate. For the year ended December 31, 2015, the pension plans had an actuarial gain primarily due to the increase in discount rate offset by less than expected investment returns.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****11. Employee and Agent Benefits (continued)****Other Postretirement Plan Changes and Plan Gains/Losses**

The Medicare Prescription Drug, Improvement and Modernization Act of 2003 (the "Medicare Modernization Act") provides a prescription drug benefit under Medicare ("Medicare Part D") as well as a federal subsidy to sponsors of retiree medical benefit plans. During each of the years ended December 31, 2016, 2015 and 2014, the Medicare subsidies we received and accrued for were \$0.1 million, \$0.7 million and \$0.7 million, respectively.

Effective October 31, 2016, subsidies were eliminated for pre-65 retiree medical, retiree dental, and retiree group term life coverage for employees and agents who retire on or after January 1, 2020. The amendment to the OPEB plan resulted in a remeasurement, which resulted in a change in discount rate. This plan amendment reduced our accumulated postretirement benefit obligation by \$51.6 million.

Effective January 1, 2016, post-65 medical coverage for employees who retired from January 1, 1992, to December 31, 2010, transitioned from a traditional medical plan to a stipend health reimbursement arrangement. This plan change reduced our accumulated postretirement benefit obligation by \$15.5 million as of December 31, 2015. Offsetting this reduction is an adjustment in accumulated postretirement benefit obligation (recognized in fourth quarter 2015 expense) of \$5.8 million related to dental plan benefits.

For the year ended December 31, 2016, the other postretirement benefit plans had an actuarial gain primarily due to actual and projected medical claims costs being lower than previously expected offset by a decrease in the discount rate. For the year ended December 31, 2015, the other postretirement benefit plans had an actuarial loss primarily due to a greater than expected increase in claim costs and a longer trend rate for participants under age 65.

Information for Pension Plans With an Accumulated Benefit Obligation in Excess of Plan Assets

For 2016 and 2015, both the qualified and nonqualified plans had accumulated benefit obligations in excess of plan assets. As noted previously, the nonqualified plans have assets that are deposited in trusts that fail to meet the U.S. GAAP requirements to be included in plan assets; however, these assets are included in our consolidated statements of financial position.

	<i>(in millions)</i>					
Service cost	\$ 65.0	\$ 63.2	\$ 54.0	\$ 2.1	\$ 2.0	\$ 1.4
Interest cost	134.9	120.3	117.1	6.2	6.6	6.6
Expected return on plan assets	(155.0)	(160.6)	(131.9)	(32.6)	(33.9)	(32.6)
Amortization of prior service benefit	(2.2)	(1.9)	(4.7)	(25.9)	(18.5)	(20.3)
Recognized net actuarial (gain) loss	77.0	102.4	50.5	0.2	(0.8)	(3.4)
Plan amendments					5.8	
Net periodic benefit cost (income)	\$ 119.7	\$ 123.4	\$ 85.0	\$ (50.0)	\$ (38.8)	\$ (48.3)

The pension plans' actuarial gains and losses are amortized using a straight-line amortization method over the average remaining service period of plan participants. For the qualified pension plan, gains and losses are amortized without use of the 10% allowable corridor. For the nonqualified pension plans and other postretirement benefit plans, the corridors allowed are used.

	Pension benefits		Other postretirement benefits	
	For the year ended December 31,			
	2016	2015	2016	2015
	<i>(in millions)</i>			
Other changes recognized in accumulated other comprehensive (income) loss				
Net actuarial loss	\$ 12.7	\$ 114.3	\$ 18.8	\$ 43.5
Amortization of gain (loss)	(77.0)	(102.4)	(0.2)	0.8
Amortization of prior service benefit	2.2	1.9	25.9	18.5
Plan amendments			(51.6)	(15.5)
Total recognized in pre-tax accumulated other comprehensive (income) loss	\$ (62.1)	\$ 13.8	\$ (7.1)	\$ 47.3
Total recognized in net periodic benefit cost and pre-tax accumulated other comprehensive (income) loss	\$ 57.6	\$ 137.2	\$ (57.1)	\$ 8.5

Net actuarial (gain) loss and net prior service cost benefit have been recognized in AOCI.

The estimated net actuarial (gain) loss and prior service cost (benefit) that will be amortized from AOCI into net periodic benefit cost for the pension benefits during the 2017 fiscal year are \$68.0 million and \$(2.3) million, respectively. The estimated net actuarial (gain) loss and prior service cost (benefit) for the postretirement benefits that will be amortized from AOCI into net periodic benefit cost during the 2017 fiscal

year are \$0.0 million and \$(34.6) million, respectively.

Assumptions

Weighted-average assumptions used to determine benefit obligations as disclosed under the Obligations and Funded Status section

	Pension benefits For the year ended December 31,	
	2016	2015
Discount rate	4.15%	4.50%
Rate of compensation increase:		
Cash balance benefit	5.02%	5.24%
Traditional benefit	2.70%	2.98%

	Other postretirement benefits For the year ended December 31,	
	2016	2015
Discount rate	3.75%	4.15%
Rate of compensation increase	2.44%	4.82%

Weighted average assumptions used to determine net periodic benefit cost

	Pension benefits For the year ended December 31,		
	2016	2015	2014
Discount rate	4.50%	4.00%	4.90%
Expected long-term return on plan assets	7.20%	7.20%	6.75%
Rate of compensation increase:			
Cash balance benefit	5.24%	5.25%	5.29%
Traditional benefit	2.98%	3.02%	3.06%

	Other postretirement benefits For the year ended December 31,		
	2016	2015	2014
Discount rate (1)	3.35%	4.00%	4.90%
Expected long-term return on plan assets	5.24%	5.36%	5.36%
Rate of compensation increase	4.82%	4.82%	4.83%

- (1) The funded statuses of the affected plans were remeasured as of October 31, 2016, and a portion of the impact was reflected in the 2016 net periodic postretirement benefit cost. A discount rate of 4.15% was used until the remeasurement date at which time a discount rate of 3.35% was used.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

The assumed salary growth rates used to project benefits for the projected benefit obligation are age-based for home office employees. The rate labeled cash balance benefit (relative to employees accruing a cash balance) is the lifecount-weighted average rate of salary growth in the coming year only, as the impact of salary assumption for cash balance benefits are limited to the upcoming year service cost. The rate labeled traditional benefit (relative to employees still accruing a final average pay benefit) is the lifecount-weighted average (at each age) of the single annual growth rate at the age that is equivalent to applying the scale from that age to age 65.

For the pension benefits, the discount rate is determined by projecting future benefit payments inherent in the projected benefit obligation and discounting those cash flows using a spot yield curve for high quality corporate bonds. The plans' expected benefit payments are discounted to determine a present value using the yield curve and the discount rate is the level rate that produces the same present value. The expected return on plan assets is the long-term rate we expect to be earned based on the plans' investment strategy. Historical and expected future returns of multiple asset

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****11. Employee and Agent Benefits (continued)**

classes were analyzed to develop a risk free rate of return and risk premiums for each asset class. The overall rate for each asset class was developed by combining a long-term inflation component, the risk free real rate of return and the associated risk premium. A weighted average rate was developed based on those overall rates and the target asset allocation of the plans.

For other postretirement benefits, the discount rate is determined by projecting future benefit payments inherent in the accumulated postretirement benefit obligation, and discounting those cash flows using a spot yield curve for high quality corporate bonds. The plans' expected benefit payments are discounted to determine a present value using the yield curve and the discount rate is the level rate that produces the same present value. The 5.24% expected long-term return on plan assets for 2016 was based on the weighted average expected long-term asset returns for the medical, life and long-term care plans. The expected long-term rates for the medical under age 65, medical age 65 and over, life and long-term care plans were 5.20%, 5.10%, 5.70% and 4.25%, respectively.

Assumed Health Care Cost Trend Rates

	December 31,	
	2016	2015
Health care cost trend rate assumed for next year under age 65	7.0%	7.0%
Health care cost trend rate assumed for next year age 65 and over	6.0%	6.0%
Rate to which the cost trend rate is assumed to decline (the ultimate trend rate)	4.5%	4.5%
Year that the rate reaches the ultimate trend rate (under age 65)	2023	2019
Year that the rate reaches the ultimate trend rate (65 and older)	2021	2020

Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plans. A one-percentage-point change in assumed health care cost trend rates would have the following effects:

	1-percentage point increase	1-percentage point decrease
	<i>(in millions)</i>	
Effect on total of service cost and interest cost components	\$ 0.5	\$ (0.4)
Effect on accumulated postretirement benefit obligation	(1.6)	1.5

Pension Plan and Other Postretirement Benefit Plan Assets

Fair value is defined as the price that would be received to sell an asset in an orderly transaction between market participants at the measurement date (an exit price). The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels.

Level 1 Fair values are based on unadjusted quoted prices in active markets for identical assets. Our Level 1 assets include cash, fixed income investment funds, exchange traded equity securities and alternative mutual fund investments.

Level 2 Fair values are based on inputs other than quoted prices within Level 1 that are observable for the asset, either directly or indirectly. Our Level 2 assets primarily include fixed income and equity investment funds and real estate investments.

Level 3 Fair values are based on significant unobservable inputs for the asset. Our Level 3 assets include a Principal Life general account investment.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Our pension plan assets consist of investments in separate accounts. Net asset value ("NAV") of the separate accounts is calculated in a manner consistent with U.S. GAAP for investment companies and is determinative of their fair value. Several of the separate accounts invest in publicly quoted mutual funds or actively managed stocks. The fair value of the underlying mutual funds or stock is used to determine the NAV of the separate account, which is not publicly quoted. Some of the separate accounts also invest in fixed income securities. The fair value of the underlying securities is based on quoted prices of similar assets and used to determine the NAV of the separate account. Some of the separate accounts invest in real estate properties. The fair value is based on discounted cash flow valuation models that utilize public real estate market data inputs such as transaction prices, market rent growth, vacancy levels, leasing absorption, market capitalization rates and discount rates.

Our other postretirement benefit plan assets consist of cash, investments in fixed income security portfolios, investments in equity security portfolios, investments in alternative mutual fund portfolios and investment in a real estate

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****11. Employee and Agent Benefits (continued)**

mutual fund. Because of the nature of cash, its carrying amount approximates fair value. The fair value of fixed income investment funds, U.S. equity portfolios and international equity portfolios is based on quoted prices in active markets for identical assets. The fair value of the alternative mutual fund portfolios and the real estate mutual fund are based on quoted market prices, which represent NAV of shares held by the other postretirement benefit plan. The fair value of the Principal Life general account investment is the amount the plan would receive if withdrawing funds from this participating contract. The amount that would be received is calculated using a cash-out factor based on an associated pool of general account fixed income securities. The cash-out factor is a ratio of the asset investment value of these securities to asset book value. As the investment values change, the cash-out factor is adjusted, impacting the amount the plan receives at measurement date. To determine investment value for each category of assets, we project cash flows. This is done using contractual provisions for the assets, with adjustment for expected prepayments and call provisions. Projected cash flows are discounted to present value for each asset category. Interest rates for discounting are based on current rates on similar new assets in the general account based on asset strategy.

Pension Plan Assets

The fair value of the qualified pension plan's assets by asset category as of the most recent measurement date was as follows:

December 31, 2016

Asset category	Assets measured at fair value	Fair value hierarchy level		
		Level 1	Level 2	Level 3
		<i>(in millions)</i>		
U.S. large cap equity portfolios (1)	\$ 772.7	\$	\$ 772.7	\$
U.S. small/mid cap equity portfolios (2)	153.0		153.0	
Balanced asset portfolios (3)	123.0		123.0	
International equity portfolios (4)	294.3		294.3	
Fixed income security portfolios (5)	718.4		718.4	
Real estate investment portfolios (6)	129.4		129.4	
Total	\$ 2,190.8	\$	\$ 2,190.8	\$

December 31, 2015

Asset category	Assets measured at fair value	Fair value hierarchy level		
		Level 1	Level 2	Level 3
		<i>(in millions)</i>		
U.S. large cap equity portfolios (1)	\$ 591.2	\$	\$ 591.2	\$
U.S. small/mid cap equity portfolios (2)	138.0		138.0	
Balanced asset portfolios (3)	119.9		119.9	
International equity portfolios (4)	201.7		201.7	
Fixed income security portfolios (5)	997.0		997.0	
Real estate investment portfolios (6)	118.5		118.5	

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****11. Employee and Agent Benefits (continued)**

We have established an investment policy that provides the investment objectives and guidelines for the pension plan. Our investment strategy is to achieve the following:

Obtain a reasonable long-term return consistent with the level of risk assumed and at a cost of operation within prudent levels. Performance benchmarks are monitored.

Ensure sufficient liquidity to meet the emerging benefit liabilities for the plan.

Provide for diversification of assets in an effort to avoid the risk of large losses and maximize the investment return to the pension plan consistent with market and economic risk.

In administering the qualified pension plan's asset allocation strategy, we consider the projected liability stream of benefit payments, the relationship between current and projected assets of the plan and the projected actuarial liabilities streams, the historical performance of capital markets adjusted for the perception of future short- and long-term capital market performance and the perception of future economic conditions.

According to our investment policy, the target asset allocation for the qualified plan is:

Asset category	Target allocation
U.S. equity portfolios	0% - 45%
International equity portfolios	0% - 15%
Fixed income security portfolios	30% - 100%
Real estate investment portfolios	0% - 10%

Other Postretirement Benefit Plan Assets

The fair value of the other postretirement benefit plans' assets by asset category as of the most recent measurement date was as follows:

December 31, 2016

Asset category	Assets measured at fair value	Fair value hierarchy level		
		Level 1	Level 2	Level 3
		<i>(in millions)</i>		
Cash and cash equivalents	\$ 1.2	\$ 1.2	\$	\$
Fixed income security portfolios:				
Fixed income investment funds (1)	195.5	164.3	31.2	
U.S. equity portfolios (3)	145.5	103.2	42.3	
International equity portfolios (4)	51.2	43.2	8.0	
Alternative mutual fund portfolios (5)	227.5	227.5		
Real estate mutual fund (6)	7.7	7.7		
Total	\$ 628.6	\$ 547.1	\$ 81.5	\$

December 31, 2015

Asset category	Assets measured at fair value	Fair value hierarchy level		
		Level 1	Level 2	Level 3
<i>(in millions)</i>				
Cash and cash equivalents	\$ 5.9	\$ 5.9	\$	\$
Fixed income security portfolios:				
Fixed income investment funds (1)	181.7	173.2	8.5	
Principal Life general account investment (2)	33.5			33.5
U.S. equity portfolios (3)	339.6	278.8	60.8	
International equity portfolios (4)	66.3	54.4	11.9	
Total	\$ 627.0	\$ 512.3	\$ 81.2	\$ 33.5

-
- (1) The portfolios invest in various fixed income securities, primarily of U.S. origin. These include, but are not limited to, corporate bonds, residential mortgage-backed securities, commercial mortgage-backed securities, U.S. Treasury securities, agency securities, asset-backed securities and collateralized mortgage obligations.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****11. Employee and Agent Benefits (continued)**

- (2) The general account is invested in various fixed income securities.
- (3) The portfolios invest primarily in publicly traded equity securities of large U.S. companies.
- (4) The portfolios invest primarily in publicly traded equity securities of non-U.S. companies.
- (5) The portfolios invest primarily in equities, corporate bonds, foreign currencies, convertible securities and derivatives.
- (6) The mutual fund invests primarily in U.S. commercial real estate properties.

As of December 31, 2016 and 2015, respectively, \$81.8 million and \$81.2 million of assets in the U.S. equity and international equity portfolios were included in a trust owned life insurance contract.

The reconciliation for all assets measured at fair value using significant unobservable inputs (Level 3) is as follows:

Asset category	For the year ended December 31, 2016						
	Beginning asset balance as of December 31, 2015	Actual return gains (losses) on plan assets Relating to assets still held at the reporting date	Relating to assets sold during the period	Net purchases, sales, and settlements	Transfers into Level 3	Transfers out of Level 3	Ending asset balance as of December 31, 2016
Principal Life general account investment	\$ 33.5	\$ (1.7)	\$ (33.6)	\$ 1.8	\$	\$	\$

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****11. Employee and Agent Benefits (continued)**

The investment strategies and policies for the other postretirement benefit plans are similar to those employed by the qualified pension plan. According to our investment policy, the target asset allocation for the other postretirement benefit plans is:

Asset category	Target allocation
U.S. equity portfolios	24%
International equity portfolios	15%
Fixed income security portfolios	32%
Alternatives	24%
Real estate	5%

Contributions

Our funding policy for the qualified pension plan is to fund the plan annually in an amount at least equal to the minimum annual contribution required under ERISA and, generally, not greater than the maximum amount that can be deducted for federal income tax purposes. We do not anticipate contributions will be needed to satisfy the minimum funding requirements of ERISA for our qualified plan. We are unable to estimate the amount that may be contributed, but it is possible that we may fund the plans in 2017 up to \$125 million. This includes funding for both our qualified and nonqualified pension plans. While we designate assets to cover the computed liability of the nonqualified plan, the assets are not included as part of the asset balances presented in this footnote as they do not qualify as plan assets in accordance with U.S. GAAP. We may contribute to our other postretirement benefit plans in 2017 pending future analysis.

Estimated Future Benefit Payments

The estimated future benefit payments, which reflect expected future service, and the expected amount of subsidy receipts under Medicare Part D are:

	Pension benefits	Other postretirement benefits (gross benefit payments, including prescription drug benefits)	Amount of Medicare Part D subsidy receipts
	<i>(in millions)</i>		
Year ending December 31:			
2017	\$ 115.1	\$ 12.8	\$ 0.1
2018	125.2	13.2	0.1
2019	128.2	13.6	0.1
2020	137.7	12.6	0.1
2021	143.5	11.5	0.1
2022-2026	832.2	10.7	0.1

The above table reflects the total estimated future benefits to be paid from the plan, including both our share of the benefit cost and the participants' share of the cost, which is funded by their contributions to the plan.

The assumptions used in calculating the estimated future benefit payments are the same as those used to measure the benefit obligation for the year ended December 31, 2016.

Total recognized in net periodic benefit cost and pre-tax
accumulated other comprehensive (income) loss

Defined Contribution and Deferred Compensation Plans

In addition, we have defined contribution plans that are generally available to all U.S. employees and agents. Eligible participants could not contribute more than \$18,000 of their compensation to the plans in 2016. Effective January 1, 2006, we made several changes to the retirement programs. In general, the pension and supplemental executive retirement plan benefit formulas were reduced, and the 401(k) matching contribution was increased. Employees who were ages 47 or older with at least ten years of service on December 31, 2005, could elect to retain the prior benefit provisions and forgo receipt of the additional matching contributions. The employees who elected to retain the prior benefit provisions are referred to as "Grandfathered Choice Participants." We match the Grandfathered Choice Participant's contribution at a 50% contribution rate up to a maximum matching contribution of 3% of the participant's compensation. For all other participants, we match the participant's contributions at a 75% contribution rate up to a maximum matching contribution of 6% of the participant's compensation. The defined contribution plans allow employees to choose among various investment options, including our common stock, which is available through our Employee Stock Ownership Plan ("ESOP"). We contributed \$46.6 million, \$45.7 million and \$41.7 million in 2016, 2015 and 2014, respectively, to our qualified defined contribution plans.

The number of shares of our common stock allocated to participants in the ESOP was 2.4 million as of both December 31, 2016 and 2015. As of December 31, 2016 and 2015, the fair value of the ESOP, which includes earned and unearned common stock, was \$137.9 million and \$108.4 million, respectively. The ESOP's total assets include our common stock and cash. The ESOP purchases our common stock on the open market. The number of shares of our common stock held within the ESOP is treated as outstanding in both our basic and diluted earnings per share calculations.

We also have nonqualified deferred compensation plans available to select employees and agents that allow them to defer compensation amounts in excess of limits imposed by federal tax law with respect to the qualified plans. For certain nonqualified deferred compensation plans that include an employer matching contribution, in 2016 we matched the

Table of Contents

Principal Financial Group, Inc.

Notes to Consolidated Financial Statements (continued)

December 31, 2016

11. Employee and Agent Benefits (continued)

Grandfathered Choice Participant's deferral at a 50% match deferral rate up to a maximum matching deferral of 3% of the participant's compensation. For all other participants in nonqualified deferred compensation plans that include an employer matching contribution, we matched the participant's deferral at a 75% match deferral rate up to a maximum matching deferral of 6% of the participant's compensation. We contributed \$3.3 million, \$4.5 million and \$4.1 million in 2016, 2015 and 2014, respectively, to our nonqualified deferred compensation plans.

12. Contingencies, Guarantees and Indemnifications

Litigation and Regulatory Contingencies

We are regularly involved in litigation, both as a defendant and as a plaintiff, but primarily as a defendant. Litigation naming us as a defendant ordinarily arises out of our business operations as a provider of asset management and accumulation products and services; individual life insurance, specialty benefits insurance and our investment activities. Some of the lawsuits may be class actions, or purport to be, and some may include claims for unspecified or substantial punitive and treble damages.

We may discuss such litigation in one of three ways. We accrue a charge to income and disclose legal matters for which the chance of loss is probable and for which the amount of loss can be reasonably estimated. We may disclose contingencies for which the chance of loss is reasonably possible and provide an estimate of the possible loss or range of loss or a statement that such an estimate cannot be made. Finally, we may voluntarily disclose loss contingencies for which the chance of loss is remote in order to provide information concerning matters that potentially expose us to possible losses.

In addition, regulatory bodies such as state insurance departments, the SEC, the Financial Industry Regulatory Authority, the Department of Labor and other regulatory agencies regularly make inquiries and conduct examinations or investigations concerning our compliance with, among other things, insurance laws, securities laws, ERISA and laws governing the activities of broker-dealers. We receive requests from regulators and other governmental authorities relating to industry issues and may receive additional requests, including subpoenas and interrogatories, in the future.

On December 30, 2015, Mary Ventura, William Littlejohn and Ryan Kadota filed a lawsuit in the United States District Court for the Southern District of Iowa against Principal Management Corporation ("PMC"). The lawsuit alleges PMC breached its fiduciary duty under Section 36(b) of the Investment Company Act by charging excessive fees on the LargeCap Growth I Fund, SmallCap Growth I Fund, SmallCap Fund, High Yield Fund, MidCap Fund and the MidCap Value III Fund. PMC is aggressively defending the lawsuit.

On August 29, 2013, American Chemicals & Equipment, Inc. 401(k) Retirement Plan ("ACE") filed a lawsuit in the United States District Court for the Northern District of Alabama against PMC and Principal Global Investors, LLC (the "ACE Defendants"). The lawsuit alleges the ACE Defendants breached their fiduciary duty under Section 36(b) of the Investment Company Act by charging excessive fees on certain of the LifeTime series target date funds. On January 24, 2014, the court granted the motion filed by the ACE Defendants to transfer the case to the Southern District of Iowa. The ACE Defendants were granted summary judgment and the case was dismissed. ACE has appealed that grant of summary judgment and subsequent dismissal to the Eighth Circuit Court of Appeals. The ACE Defendants continue to aggressively defend the lawsuit.

In 2008, Principal Life received approximately \$440.0 million in connection with the termination of certain structured transactions and the resulting prepayment of Principal Life's investment in those transactions. The transactions involved Lehman Brothers Special Financing Inc. and Lehman Brothers Holdings Inc. (collectively, "Lehman") in various capacities. Subsequent to Lehman's 2008 bankruptcy filing, its bankruptcy estate initiated several lawsuits seeking to recover from numerous sources significant amounts to which it claims entitlement under various theories. We are one of a large group of defendants to this action. The estate's claim against Principal Life, including interest, was approximately \$600.0 million. On June 28, 2016, the bankruptcy court granted the Defendants' motion to dismiss directed at common issues and dismissed with prejudice all claims against Principal Life. Defendants, including Principal Life, have requested that the bankruptcy court issue an order directing entry of final judgment consistent with its June 28, 2016, decision. Lehman has the right to appeal an order of final judgment.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

While the outcome of any pending or future litigation or regulatory matter cannot be predicted, management does not believe any such matter will have a material adverse effect on our business or financial position. As of December 31, 2016, we had no estimated losses accrued related to the legal matters discussed above because we believe the chance of loss from these matters is not probable and the amount of loss cannot be reasonably estimated.

We believe all of the litigation contingencies discussed above involve a chance of loss that is either remote or reasonably possible. Unless otherwise noted, all of these matters involve unspecified claim amounts, in which the

Table of Contents

12. Contingencies, Guarantees and Indemnifications (continued)

respective plaintiffs seek an indeterminate amount of damages. To the extent such matters present a reasonably possible chance of loss, we are generally not able to estimate the possible loss or range of loss associated therewith.

The outcome of such matters is always uncertain, and unforeseen results can occur. It is possible such outcomes could require us to pay damages or make other expenditures or establish accruals in amounts we could not estimate as of December 31, 2016.

Guarantees and Indemnifications

In the normal course of business, we have provided guarantees to third parties primarily related to former subsidiaries and joint ventures. The terms of these agreements range in duration and often are not explicitly defined. The maximum exposure under these agreements as of December 31, 2016, was approximately \$172.0 million. At inception, the fair value of such guarantees was insignificant. In addition, we believe the likelihood is remote that material payments will be required. Therefore, any liability accrued within our consolidated statements of financial position is insignificant. Should we be required to perform under these guarantees, we generally could recover a portion of the loss from third parties through recourse provisions included in agreements with such parties, the sale of assets held as collateral that can be liquidated in the event performance is required under the guarantees or other recourse generally available to us; therefore, such guarantees would not result in a material adverse effect on our business or financial position. While the likelihood is remote, such outcomes could materially affect net income in a particular quarter or annual period.

We manage mandatory privatized social security funds in Chile. By regulation, we have a required minimum guarantee on the funds' relative return. Because the guarantee has no limitation with respect to duration or amount, the maximum exposure of the guarantee in the future is indeterminate.

We are also subject to various other indemnification obligations issued in conjunction with divestitures, acquisitions and financing transactions whose terms range in duration and often are not explicitly defined. Certain portions of these indemnifications may be capped, while other portions are not subject to such limitations; therefore, the overall maximum amount of the obligation under the indemnifications cannot be reasonably estimated. At inception, the fair value of such indemnifications was insignificant. In addition, we believe the likelihood is remote that material payments will be required. Therefore, any liability accrued within our consolidated statements of financial position is insignificant. While we are unable to estimate with certainty the ultimate legal and financial liability with respect to these indemnifications, we believe that performance under these indemnifications would not result in a material adverse effect on our business or financial position. While the likelihood is remote, performance under these indemnifications could materially affect net income in a particular quarter or annual period.

Guaranty Funds

Under state insurance guaranty fund laws, insurers doing business in a state can be assessed, up to prescribed limits, for certain obligations of insolvent insurance companies to policyholders and claimants. A state's fund assesses its members based on their pro rata market share of written premiums in the state for the classes of insurance for which the insolvent insurer was engaged. Some states permit member insurers to recover assessments paid through full or partial premium tax offsets. We accrue liabilities for guaranty fund assessments when an assessment is probable, can be reasonably estimated and when the event obligating us to pay has occurred. While we cannot predict the amount and timing of any future assessments, we have established reserves we believe are adequate for assessments relating to insurance companies that are currently subject to insolvency proceedings. As of December 31, 2016 and 2015, the liability balance for guaranty fund assessments, which is not discounted, was \$14.9 million and \$15.1 million, respectively, and was reported within other liabilities in the consolidated statements of financial position. As of both December 31, 2016 and 2015, \$5.7 million related to premium tax offsets were included in premiums due and other receivables in the consolidated statements of financial position.

Operating Leases

As a lessee, we lease office space, data processing equipment, office furniture and office equipment under various operating leases. Rental expense for the years ended December 31, 2016, 2015 and 2014, was \$40.4 million, \$38.0 million and \$37.3 million, respectively.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****12. Contingencies, Guarantees and Indemnifications (continued)**

The following represents payments due by period for operating lease obligations (in millions):

Year ending December 31:	
2017	\$ 45.2
2018	32.4
2019	22.3
2020	15.6
2021	11.3
2022 and thereafter	37.6
Total operating lease obligations	164.4
Less: Future sublease rental income on noncancelable leases	2.3
Total future minimum lease payments	\$ 162.1

Capital Leases

We lease buildings and hardware storage equipment under capital leases. As of December 31, 2016 and 2015, these leases had a gross asset balance of \$61.3 million and \$63.6 million and accumulated depreciation of \$29.9 million and \$29.9 million, respectively. Depreciation expense for the years ended December 31, 2016, 2015 and 2014 was \$14.8 million, \$14.1 million and \$14.0 million, respectively.

The following represents future minimum lease payments due by period for capital lease obligations (in millions).

Year ending December 31:	
2017	\$ 3.0
2018	2.1
2019	0.9
2020	0.4
2021	0.1
2022 and thereafter	0.2
Total	6.7
Less: Amounts representing interest	0.2
Net present value of minimum lease payments	\$ 6.5

13. Stockholders' Equity**Preferred Stock**

On June 30, 2015 we redeemed our 3.0 million shares of series A preferred stock for \$300.0 million and our 10.0 million shares of series B preferred stock for \$250.0 million. At redemption, we recognized \$8.2 million excess redemption value over carrying value of the preferred shares redeemed as an adjustment to determine net income available to common stockholders.

Dividend Payments

On March 30, 2015 and June 30, 2015, we paid a dividend of \$8.2 million and \$8.3 million, respectively, equal to \$1.39 per share on Series A non-cumulative perpetual preferred stock and equal to \$0.41 per share on Series B non-cumulative perpetual preferred stock. Dividends were paid to stockholders of record as of March 12, 2015 and June 11, 2015, respectively.

On April 1, 2014; June 30, 2014; September 30, 2014 and December 30, 2014, we paid a dividend of \$8.2 million, \$8.3 million, \$8.2 million and \$8.3 million, respectively, equal to \$1.39 per share on Series A non-cumulative perpetual preferred stock and equal to \$0.41 per share on Series B non-cumulative perpetual preferred stock. Dividends were paid to stockholders of record as of March 13, 2014; June 12, 2014; September 11, 2014 and December 11, 2014, respectively.

Noncontrolling Interest

Interests held by unaffiliated parties in consolidated entities are reflected in noncontrolling interest, which represents the noncontrolling partners' share of the underlying net assets of our consolidated subsidiaries. Noncontrolling interest that is not redeemable is reported in the equity section of the consolidated statements of financial position.

The noncontrolling interest holders in certain of our consolidated entities maintain an equity interest that is redeemable at the option of the holder, which may be exercised on varying dates. Since redemption of the noncontrolling interest is outside of our control, this interest is presented on the consolidated statements of financial position line item titled "Redeemable noncontrolling interest." Our redeemable noncontrolling interest primarily relates to consolidated sponsored investment funds for which interests are redeemed at fair value from the net assets of the funds.

For our redeemable noncontrolling interest related to other consolidated subsidiaries, redemptions are required to be purchased at fair value or a value based on a formula that management intended to reasonably approximate fair value based on a fixed multiple of earnings over a measurement period. The carrying value of the redeemable noncontrolling interest is compared to the redemption value at each reporting period. Any adjustments to the carrying amount of the redeemable noncontrolling interest for changes in redemption value prior to exercise of the redemption option are determined after the attribution of net income or loss of the subsidiary and are recognized in the redemption value as they occur. Adjustments to the carrying value of redeemable noncontrolling interest result in adjustments to additional paid-in capital and/or retained earnings. Adjustments are recorded in retained earnings to the extent the redemption value of the redeemable noncontrolling interest exceeds its fair value and will impact the numerator in our earnings per share calculations. All other adjustments to the redeemable noncontrolling interest are recorded in additional paid-in capital.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****13. Stockholders' Equity (continued)**

Following is a reconciliation of the changes in the redeemable noncontrolling interest (in millions):

-
- (1) During the third quarter of 2014, we increased our ownership stake in Columbus Circle Investors.
- (2) Effective January 1, 2016, certain sponsored investment funds were consolidated as a result of the implementation of new accounting guidance. See Note 3, Variable Interest Entities, for further details.
- (3) We deconsolidated certain sponsored investment funds as they no longer met the requirements for consolidation.

Dividend Limitations

The declaration and payment of our common stock dividends is subject to the discretion of our Board of Directors and will depend on our overall financial condition, results of operations, capital levels, cash requirements, future prospects, receipt of dividends from Principal Life (as described below), risk management considerations and other factors deemed relevant by the Board. No significant restrictions limit the payment of dividends by us, except those generally applicable to corporations incorporated in Delaware.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Under Iowa law, Principal Life may pay stockholder dividends only from the earned surplus arising from its business and must receive the prior approval of the Commissioner of Insurance of the State of Iowa (the "Commissioner") to pay a stockholder dividend if such a stockholder dividend would exceed certain statutory limitations. In general, the current statutory limitation is the greater of 10% of Principal Life's policyholder surplus as of the preceding year-end or the net gain from operations from the previous calendar year. Based on this limitation and 2016 statutory results, Principal Life could pay approximately \$1,143.3 million in stockholder dividends in 2017 without exceeding the statutory limitation.

14. Fair Value Measurements

We use fair value measurements to record fair value of certain assets and liabilities and to estimate fair value of financial instruments not recorded at fair value but required to be disclosed at fair value. Certain financial instruments, particularly policyholder liabilities other than investment contracts, are excluded from these fair value disclosure requirements.

Table of Contents

Principal Financial Group, Inc.

Notes to Consolidated Financial Statements (continued)

December 31, 2016

14. Fair Value Measurements (continued)

Valuation Hierarchy

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety considering factors specific to the asset or liability.

Level 1 Fair values are based on unadjusted quoted prices in active markets for identical assets or liabilities. Our Level 1 assets and liabilities primarily include exchange traded equity securities, mutual funds and U.S. Treasury bonds.

Level 2 Fair values are based on inputs other than quoted prices within Level 1 that are observable for the asset or liability, either directly or indirectly. Our Level 2 assets and liabilities primarily include fixed maturities (including public and private bonds), equity securities, cash equivalents, derivatives and other investments.

Level 3 Fair values are based on at least one significant unobservable input for the asset or liability. Our Level 3 assets and liabilities primarily include fixed maturities, real estate and commercial mortgage loan investments of our separate accounts, complex derivatives and embedded derivatives.

Determination of Fair Value

The following discussion describes the valuation methodologies and inputs used for assets and liabilities measured at fair value on a recurring basis or disclosed at fair value. The techniques utilized in estimating the fair value of financial instruments are reliant on the assumptions used. Care should be exercised in deriving conclusions about our business, its value or financial position based on the fair value information of financial instruments presented below.

Fair value estimates are made based on available market information and judgments about the financial instrument at a specific point in time. Such estimates do not consider the tax impact of the realization of unrealized gains or losses. In addition, the disclosed fair value may not be realized in the immediate settlement of the financial instrument. We validate prices through an investment analyst review process, which includes validation through direct interaction with external sources, review of recent trade activity or use of internal models. In circumstances where broker quotes are used to value an instrument, we generally receive one non-binding quote. Broker quotes are validated through an investment analyst review process, which includes validation through direct interaction with external sources and use of internal models or other relevant information. We did not make any significant changes to our valuation processes during 2016.

Fixed Maturities

Fixed maturities include bonds, ABS, redeemable preferred stock and certain non-redeemable preferred securities. When available, the fair value of fixed maturities is based on quoted prices of identical assets in active markets. These are reflected in Level 1 and primarily include U.S. Treasury bonds and actively traded redeemable corporate preferred securities.

When quoted prices of identical assets in active markets are not available, our first priority is to obtain prices from third party pricing vendors. We have regular interaction with these vendors to ensure we understand their pricing methodologies and to confirm they are utilizing observable market information. Their methodologies vary by asset class and include inputs such as estimated cash flows, benchmark yields, reported trades, broker quotes, credit quality, industry events and economic events. Fixed maturities with validated prices from pricing services, which includes the majority of our public fixed maturities in all asset classes, are generally reflected in Level 2. Also included in Level 2 are

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

corporate bonds where quoted market prices are not available, for which an internal model using substantially all observable inputs or a matrix pricing valuation approach is used. In the matrix approach, securities are grouped into pricing categories that vary by sector, rating and average life. Each pricing category is assigned a risk spread based on studies of observable public market data from the investment professionals assigned to specific security classes. The expected cash flows of the security are then discounted back at the current Treasury curve plus the appropriate risk spread. Although the matrix valuation approach provides a fair valuation of each pricing category, the valuation of an individual security within each pricing category may actually be impacted by company specific factors.

If we are unable to price a fixed maturity security using prices from third party pricing vendors or other sources specific to the asset class, we may obtain a broker quote or utilize an internal pricing model specific to the asset utilizing relevant market information, to the extent available and where at least one significant unobservable input is utilized. These are reflected in Level 3 in the fair value hierarchy and can include fixed maturities across all asset classes. As of

Table of Contents

Principal Financial Group, Inc.

Notes to Consolidated Financial Statements (continued)

December 31, 2016

14. Fair Value Measurements (continued)

December 31, 2016, less than 1% of our total fixed maturities were Level 3 securities valued using internal pricing models.

The primary inputs, by asset class, for valuations of the majority of our Level 2 investments from third party pricing vendors or our internal pricing valuation approach are described below.

U.S. Government and Agencies/Non-U.S. Governments. Inputs include recently executed market transactions, interest rate yield curves, maturity dates, market price quotations and credit spreads relating to similar instruments.

States and Political Subdivisions. Inputs include Municipal Securities Rulemaking Board reported trades, U.S. Treasury and other benchmark curves, material event notices, new issue data and obligor credit ratings.

Corporate. Inputs include recently executed transactions, market price quotations, benchmark yields, issuer spreads and observations of equity and credit default swap curves related to the issuer. For private placement corporate securities valued through the matrix valuation approach inputs include the current Treasury curve and risk spreads based on sector, rating and average life of the issuance.

RMBS, CMBS, Collateralized Debt Obligations and Other Debt Obligations. Inputs include cash flows, priority of the tranche in the capital structure, expected time to maturity for the specific tranche, reinvestment period remaining and performance of the underlying collateral including prepayments, defaults, deferrals, loss severity of defaulted collateral and, for RMBS, prepayment speed assumptions. Other inputs include market indices and recently executed market transactions.

Equity Securities

Equity securities include mutual funds, common stock, non-redeemable preferred stock and required regulatory investments. Fair values of equity securities are determined using quoted prices in active markets for identical assets when available, which are reflected in Level 1. When quoted prices are not available, we may utilize internal valuation methodologies appropriate for the specific asset that use observable inputs such as underlying share prices or the NAV, which are reflected in Level 2. Fair values might also be determined using broker quotes or through the use of internal models or analysis that incorporate significant assumptions deemed appropriate given the circumstances and consistent with what other market participants would use when pricing such securities, which are reflected in Level 3.

Derivatives

The fair values of exchange-traded derivatives are determined through quoted market prices, which are reflected in Level 1. Exchange-traded derivatives include futures that are settled daily such that their fair value is not reflected in the consolidated statements of financial position. The fair values of derivative instruments cleared through centralized clearinghouses are determined through market prices published by the clearinghouses, which are reflected in Level 2. The clearinghouses may utilize the overnight indexed swap ("OIS") curve in their valuation. The fair values of bilateral OTC derivative instruments are determined using either pricing valuation models that utilize market observable inputs or broker quotes. The majority of our bilateral OTC derivatives are valued with models that use market observable inputs, which are reflected in Level 2. Significant inputs include contractual terms, interest rates, currency exchange rates, credit spread curves, equity prices and volatilities. These valuation models consider projected discounted cash flows, relevant swap curves and appropriate implied volatilities. Certain bilateral OTC derivatives utilize unobservable market data, primarily independent broker quotes that are nonbinding quotes based on models that do not reflect the result of market transactions, which are reflected in Level 3.

Our non-cleared derivative contracts are generally documented under ISDA Master Agreements, which provide for legally enforceable set-off and close-out netting of exposures to specific counterparties. Collateral arrangements are bilateral and based on current ratings of each entity. We utilize the LIBOR interest rate curve to value our positions, which includes a credit spread. This credit spread incorporates an appropriate level of nonperformance risk into our valuations given the current ratings of our counterparties, as well as the collateral agreements in place. Counterparty credit risk is routinely monitored to ensure our adjustment for non-performance risk is appropriate. Our centrally cleared derivative contracts are conducted with regulated centralized clearinghouses, which provide for daily exchange of cash collateral equal to the

difference in the daily market values of those contracts that eliminates the non-performance risk on these trades.

Interest Rate Contracts. For non-cleared contracts we use discounted cash flow valuation techniques to determine the fair value of interest rate swaps using observable swap curves as the inputs. These are reflected in Level 2. For centrally cleared contracts we use published prices from clearinghouses. These are reflected in Level 2. In addition, we have a

Table of Contents

Notes to Consolidated Financial Statements (continued)

December 31, 2016

14. Fair Value Measurements (continued)

limited number of complex inflation-linked interest rate swaps, interest rate collars and swaptions that are valued using broker quotes. These are reflected in Level 3.

Foreign Exchange Contracts. We use discounted cash flow valuation techniques that utilize observable swap curves and exchange rates as the inputs to determine the fair value of foreign currency swaps. These are reflected in Level 2. Currency forwards are valued using observable market inputs, including forward currency exchange rates. These are reflected in Level 2. In addition, we have a limited number of non-standard currency swaps that are valued using broker quotes. These are reflected within Level 3.

Equity Contracts. We use an option pricing model using observable implied volatilities, dividend yields, index prices and swap curves as the inputs to determine the fair value of equity options. These are reflected in Level 2.

Credit Contracts. We use either the ISDA Credit Default Swap Standard discounted cash flow model that utilizes observable default probabilities and recovery rates as inputs or broker prices to determine the fair value of credit default swaps. These are reflected in Level 3. In addition, we have a limited number of total return swaps that are valued based on the observable quoted price of underlying equity indices. These are reflected in Level 2.

Other Investments

Other investments reported at fair value include invested assets of consolidated sponsored investment funds, unconsolidated sponsored investment funds, other investment funds reported at fair value or for which the fair value option was elected, commercial mortgage loans of consolidated VIEs for which the fair value option was elected and equity method real estate investments for which the fair value option was elected.

Invested assets of consolidated sponsored investment funds include equity securities, fixed maturities and other investments, for which fair values are determined as previously described, and are reflected in Level 1 and Level 2.

The fair value of unconsolidated sponsored investment funds and other investment funds is determined using the NAV of the fund. The NAV of the fund represents the price at which we feel we would be able to initiate a transaction. Investments for which the NAV represents a quoted price in an active market for identical assets are reflected in Level 1. Investments that do not have a quoted price in an active market are reflected in Level 2.

Commercial mortgage loans of consolidated VIEs valued using the measurement alternative for CCFEs are reflected in Level 2. These investments are based on the more observable fair value of the liabilities of the consolidated VIEs. The liabilities are affiliated so are not reflected in our consolidated results.

Equity method real estate investments for which the fair value option was elected are reflected in Level 3. The equity method real estate investments consist of underlying real estate and debt. The real estate fair value is estimated using a discounted cash flow valuation model that utilizes public real estate market data inputs such as transaction prices, market rents, vacancy levels, leasing absorption, market cap rates and discount rates. The debt fair value is estimated using a discounted cash flow analysis based on our incremental borrowing rate for similar borrowing arrangements.

Cash Equivalents

Certain cash equivalents are reported at fair value on a recurring basis and include money market instruments and other short-term investments with maturities of three months or less. Fair values of these cash equivalents may be determined using public quotations, when available, which are reflected in Level 1. When public quotations are not available, because of the highly liquid nature of these assets, carrying amounts may be used to approximate fair values, which are reflected in Level 2.

Separate Account Assets

Separate account assets include equity securities, debt securities and derivative instruments, for which fair values are determined as previously described, and are reflected in Level 1, Level 2 and Level 3. Separate account assets also include commercial mortgage loans, for which the fair value is estimated by discounting the expected total cash flows using market rates that are applicable to the yield, credit quality and maturity of the loans. The market clearing spreads vary based on mortgage type, weighted average life, rating and liquidity. These are reflected in Level 3. Finally, separate account assets include real estate, for which the fair value is estimated using discounted cash flow valuation models that utilize various public real estate market data inputs. In addition, each property is appraised annually by an independent appraiser. The real estate included in separate account assets is recorded net of related mortgage encumbrances for which the fair value is estimated using discounted cash flow analysis based on our incremental borrowing rate for similar borrowing arrangements. The real estate within the separate accounts is reflected in Level 3.

14. Fair Value Measurements (continued)

Investment Contracts

Certain annuity contracts and other investment contracts include embedded derivatives that have been bifurcated from the host contract and are measured at fair value on a recurring basis, which are reflected in Level 3. The key assumptions for calculating the fair value of the embedded derivative liabilities are market assumptions (such as equity market returns, interest rate levels, market volatility and correlations) and policyholder behavior assumptions (such as lapse, mortality, utilization and withdrawal patterns). Risk margins are included in the policyholder behavior assumptions. The assumptions are based on a combination of historical data and actuarial judgment. The embedded derivative liabilities are valued using stochastic models that incorporate a spread reflecting our own creditworthiness.

The assumption for our own non-performance risk for investment contracts and any embedded derivatives bifurcated from certain annuity and investment contracts is based on the current market credit spreads for debt-like instruments we have issued and are available in the market.

Other Liabilities

Certain obligations reported in other liabilities include embedded derivatives to deliver underlying securities of structured investments to third parties. The fair value of the embedded derivatives is calculated based on the value of the underlying securities that are valued based on prices obtained from third party pricing vendors as utilized and described in our discussion of how fair value is determined for fixed maturities, which are reflected in Level 2.

Additionally, obligations of consolidated VIEs for which the fair value option was elected are included in other liabilities. The VIEs' unaffiliated obligations are valued utilizing internal pricing models, which are reflected in Level 3.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

- (1) Within the consolidated statements of financial position, derivative assets are reported with other investments and derivative liabilities are reported with other liabilities. Refer to Note 5, Derivative Financial Instruments, for further information on fair value by class of derivative instruments. Our derivatives are primarily Level 2, with the exception of certain credit default swaps and other swaps that are Level 3.
- (2) Primarily includes sponsored investment funds, other investment funds, equity method investments reported at fair value and commercial mortgage loans of consolidated VIEs.
- (3) Includes money market instruments and short-term investments with a maturity date of three months or less when purchased.
- (4) Includes bifurcated embedded derivatives that are reported at fair value within the same line item in the consolidated statements of financial position in which the host contract is reported. Other liabilities also include obligations of consolidated VIEs reported at fair value.
- (5) Certain investments are measured at fair value using the NAV per share (or its equivalent) practical expedient and have not been classified in the fair value hierarchy. These consist of certain fund interests that are restricted until maturity with unfunded commitments totaling \$57.6 million and \$7.3 million as of December 31, 2016 and December 31, 2015, respectively.

(1) Both realized gains (losses) and mark-to-market unrealized gains (losses) are generally reported in net realized capital gains (losses) within the consolidated statements of operations. Realized and unrealized gains (losses) on certain fixed maturities, trading and certain derivatives used in relation to certain trading portfolios are reported in net investment income within the consolidated statements of operations.

(2) Gains and losses for separate account assets do not impact net income as the change in value of separate account assets is offset by a change in value of separate account liabilities. Foreign currency translation adjustments related to the Principal International segment separate account assets are recorded in AOCI and are offset by foreign currency translation adjustments of the corresponding separate account liabilities.

Transfers between fair value hierarchy levels are recognized at the beginning of the reporting period.

Separate account assets transferred between Level 1 and Level 2 during 2016, 2015 and 2014, primarily related to foreign equity securities. When these securities are valued at the close price of the local exchange where the assets traded, they are reflected in Level 1. When events materially affecting the value occur between the close of the local exchange and the New York Stock Exchange, we use adjusted prices determined by a third party pricing vendor to update the foreign market closing prices and the fair value is reflected in Level 2.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Other investments transferred from Level 2 into Level 1 during 2015, primarily included assets valued using a NAV with a quoted price in an active market for identical assets as a result of additional analysis to clarify the source of the quoted price.

Assets transferred into Level 3 during 2016, 2015 and 2014, primarily included those assets for which we are now unable to obtain pricing from a recognized third party pricing vendor as well as assets that were previously priced using a matrix valuation approach that may no longer be relevant when applied to asset-specific situations.

Assets transferred out of Level 3 during 2016, 2015 and 2014, included those for which we are now able to obtain pricing from a recognized third party pricing vendor or from internal models using substantially all market observable information. Additionally, for the year ended December 31, 2015, assets transferred out of Level 3 included assets valued using the measurement alternative for CCFEs for which the corresponding liabilities have the more observable fair value and are reflected in Level 2.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****14. Fair Value Measurements (continued)****Quantitative Information about Level 3 Fair Value Measurements**

The following table provides quantitative information about the significant unobservable inputs used for recurring fair value measurements categorized within Level 3, excluding assets and liabilities for which significant quantitative unobservable inputs are not developed internally, which primarily consists of those valued using broker quotes or the measurement alternative for CCFEs. Refer to "Assets and liabilities measured at fair value on a recurring basis" for a complete valuation hierarchy summary.

- (1) Represents market comparable interest rate or an index adjusted rate used as the base rate in the discounted cash flow analysis prior to any credit spread, illiquidity or other adjustments, where applicable.
- (2) Represents the range of rate curves used in the valuation analysis that we have determined market participants would use when pricing the instrument. Derived from interpolation between various observable swap rates.

Table of Contents

Principal Financial Group, Inc.

Notes to Consolidated Financial Statements (continued)

December 31, 2016

14. Fair Value Measurements (continued)

- (3) This input factor is the number of contractholders taking withdrawals as well as the amount and timing of the withdrawals and a range does not provide a meaningful presentation.
- (4) This input is based on an appropriate industry mortality table and a range does not provide a meaningful presentation.

Market comparable discount rates are used as the base rate in the discounted cash flows used to determine the fair value of certain assets. Increases or decreases in the credit spreads on the comparable assets could cause the fair value of the assets to significantly decrease or increase, respectively. Additionally, we may adjust the base discount rate or the modeled price by applying an illiquidity premium given the highly structured nature of certain assets. Increases or decreases in this illiquidity premium could cause significant decreases or increases, respectively, in the fair value of the asset.

Embedded derivatives can be either assets or liabilities within the investment contracts line item, depending on certain inputs at the reporting date. Increases to an asset or decreases to a liability are described as increases to fair value. Increases or decreases in market volatilities could cause significant decreases or increases, respectively, in the fair value of embedded derivatives in investment contracts. Long duration interest rates are used as the mean return when projecting the growth in the value of associated account value and impact the discount rate used in the discounted future cash flows valuation. The amount of claims will increase if account value is not sufficient to cover guaranteed withdrawals. Increases or decreases in risk free rates could cause the fair value of the embedded derivative to significantly increase or decrease, respectively. Increases or decreases in our own credit risks, which impact the rates used to discount future cash flows, could significantly increase or decrease, respectively, the fair value of the embedded derivative. All of these changes in fair value would impact net income.

Decreases or increases in the mortality rate assumption could cause the fair value of the embedded derivative to decrease or increase, respectively. Decreases or increases in the overall lapse rate assumption could cause the fair value of the embedded derivative to decrease or increase, respectively. The lapse rate assumption varies dynamically based on the relationship of the guarantee and associated account value. A stronger or weaker dynamic lapse rate assumption could cause the fair value of the embedded derivative to decrease or increase, respectively. The utilization rate assumption includes how many contractholders will take withdrawals, when they will take them and how much of their benefit they will take. Increases or decreases in the assumption of the number of contractholders taking withdrawals could cause the fair value of the embedded derivative to decrease or increase, respectively. Assuming contractholders take withdrawals earlier or later could cause the fair value of the embedded derivative to decrease or increase, respectively. Assuming contractholders take more or less of their benefit could cause the fair value of the embedded derivative to decrease or increase, respectively.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

Certain assets are measured at fair value on a nonrecurring basis. During 2016, certain mortgage loans had been marked to fair value of \$2.7 million. The net impact of write-downs of loans reclassified to held-for-sale, impairments and improvements in estimated fair value of previously impaired loans resulted in a net loss of \$2.4 million that was recorded in net realized capital gains (losses) as part of the mortgage loan valuation allowance. This includes the impact of certain loans no longer on our books. These collateral-dependent mortgage loans are a Level 3 fair value measurement, as fair value is based on the fair value of the underlying real estate collateral, which is estimated using appraised values that involve significant unobservable inputs.

During 2016, certain real estate had been written down to fair value of \$13.9 million. This write down resulted in a loss of \$5.3 million, of which \$4.5 million was a lower of cost or market adjustment on held-for-sale real estate recorded in net investment income and the remaining \$0.8 million was recorded in net realized capital gains (losses). This is a Level 3 fair value measurement, as the fair value of real estate is estimated based on a discounted cash flow valuation from an internal model. Significant inputs used in the discounted cash flow calculation include a discount rate, terminal capitalization rate and average market rent growth. The ranges of inputs used in the fair value measurements for the real estate marked to fair value during 2016 were:

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Discount rate = 10.3%

Terminal capitalization rate = 9.0%

Average market rent growth = 0.0%

During 2015, certain mortgage loans had been marked to fair value of \$9.4 million. The net impact of write-downs of loans reclassified to held-for-sale, impairments and improvements in estimated fair value of previously impaired loans resulted in a net loss of \$3.0 million that was recorded in net realized capital gains (losses) as part of the mortgage loan valuation allowance. This includes the impact of certain loans no longer on our books. These collateral-dependent

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****14. Fair Value Measurements (continued)**

mortgage loans are a Level 3 fair value measurement, as fair value is based on the fair value of the underlying real estate collateral, which is estimated using appraised values that involve significant unobservable inputs.

During 2015, certain real estate had been written down to fair value of \$30.9 million. This write down resulted in a loss of \$2.9 million that was recorded in net realized capital gains (losses). This is a Level 3 fair value measurement, as the fair value of real estate is estimated based on a discounted cash flow valuation from an internal model. Significant inputs used in the discounted cash flow calculation include a discount rate, terminal capitalization rate and average market rent growth. The ranges of inputs used in the fair value measurements for the real estate marked to fair value during 2015 were:

Discount rate = 8.6% - 10.5%
 Terminal capitalization rate = 7.3% - 8.5%
 Average market rent growth = 2.7% - 3.0%

During 2015, identified intangibles that originated from the acquisition of our mutual fund company in Brazil were deemed to be impaired, and were marked to fair value of zero. These impairments were driven by the current macroeconomic and market conditions in Brazil, including higher discount rates and change in the mix of business. The fair value calculation for intangibles is a Level 3 fair value measurement, as the fair value is determined by calculating the present value of future cash flows that are expected to emerge from the identified intangibles. The net impact of impairments of identified intangibles resulted in a loss of \$23.0 million that was recorded in operating expenses.

During 2014, certain mortgage loans had been marked to fair value of \$68.9 million. The net impact of write-downs of loans reclassified to held-for-sale, impairments and improvements in estimated fair value of previously impaired loans resulted in a net loss of \$10.0 million that was recorded in net realized capital gains (losses) as part of the mortgage loan valuation allowance. This includes the impact of certain loans no longer on our books. These collateral-dependent mortgage loans are a Level 3 fair value measurement, as fair value is based on the fair value of the underlying real estate collateral, which is estimated using appraised values that involve significant unobservable inputs. The fair value of the underlying collateral is determined based on a discounted cash flow valuation either from an external broker opinion of value or an internal model. Significant inputs used in the discounted cash flow calculation include: a discount rate, terminal capitalization rate and average market rent growth. The ranges of inputs used in the fair value measurements for the mortgage loans marked to fair value during 2014 were:

Discount rate = 8.8% - 11.0%
 Terminal capitalization rate = 7.3% - 9.0%
 Average market rent growth = 2.0% - 10.9%

During 2014, certain real estate had been written down to fair value of \$22.3 million. This write down resulted in a loss of \$6.2 million that was recorded in net realized capital gains (losses). This is a Level 3 fair value measurement, as the fair value of real estate is estimated based on a discounted cash flow valuation from an internal model. Significant inputs used in the discounted cash flow calculation include a discount rate, terminal capitalization rate and average market rent growth. The ranges of inputs used in the fair value measurements for the real estate marked to fair value during 2014 were:

Discount rate = 9.6% - 11.8%
 Terminal capitalization rate = 8.3% - 8.5%
 Average market rent growth = 3.0% - 3.6%

Fair Value Option

We elected fair value accounting for:

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Certain commercial mortgage loans and obligations of consolidated VIEs for which it was not practicable for us to determine the carrying value.

Certain real estate ventures that are subject to the equity method of accounting because the nature of the investments is to add value to the properties and generate income from the operations of the properties. Other equity method real estate investments are not fair valued because the investments mainly generate income from the operations of the underlying properties.

Certain investment funds for which we do not have enough influence to account for under the equity method in order to reflect the economics of the investment in the financial statements. We do not elect the fair value option for other similar investments as these investments are generally accounted for under the equity method of accounting.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****14. Fair Value Measurements (continued)**

The following tables present information regarding the assets and liabilities for which the fair value option was elected.

Mortgage Loans

Fair values of commercial and residential mortgage loans are primarily determined by discounting the expected cash flows at current treasury rates plus an applicable risk spread, which reflects credit quality and maturity of the loans. The risk spread is based on market clearing levels for loans with comparable credit quality, maturities and risk. The fair value of mortgage loans may also be based on the fair value of the underlying real estate collateral less cost to sell, which is estimated using appraised values. These are reflected in Level 3.

Policy Loans

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

Fair values of policy loans are estimated by discounting expected cash flows using a risk-free rate based on the Treasury curve. The expected cash flows reflect an estimate of timing of the repayment of the loans. These are reflected in Level 3.

Other Investments

The fair value of commercial loans and certain consumer loans included in other investments is calculated by discounting expected cash flows through the estimated maturity date using market interest rates that reflect the credit and interest rate risk inherent in the loans. The estimate of term to maturity is based on historical experience, adjusted as required, for current economic and lending conditions. The effect of non-performing loans is considered in assessing the credit risk inherent in the fair value estimate. These are reflected in Level 3. The fair value of certain tax credit investments are estimated by discounting expected future tax benefits using estimated investment return rates. These are reflected in Level 3. The carrying value of the remaining investments reported in this line item approximate their fair value. These are reflected in Level 2.

Table of Contents

Principal Financial Group, Inc.

Notes to Consolidated Financial Statements (continued)

December 31, 2016

14. Fair Value Measurements (continued)

Cash and Cash Equivalents

Certain cash equivalents not reported at fair value include short-term investments with maturities of three months or less for which public quotations are not available to use in determining fair value. Because of the highly liquid nature of these assets, carrying amounts are used to approximate fair value, which are reflected in Level 2. The carrying amount of the remaining cash approximates its fair value, which is reflected in Level 1 given the nature of cash.

Investment Contracts

The fair values of our reserves and liabilities for investment contracts are determined via a third party pricing vendor or using discounted cash flow analyses when we are unable to find a price from third party pricing vendors. Third party pricing on various outstanding medium-term notes and funding agreements is based on observable inputs such as benchmark yields and spreads based on reported trades for our medium-term notes and funding agreement issuances. These are reflected in Level 2. The discounted cash flow analyses for the remaining contracts is based on current interest rates, including non-performance risk, being offered for similar contracts with maturities consistent with those remaining for the investment contracts being valued. These are reflected in Level 3. Investment contracts include insurance, annuity and other policy contracts that do not involve significant mortality or morbidity risk and are only a portion of the policyholder liabilities appearing in the consolidated statements of financial position. Insurance contracts include insurance, annuity and other policy contracts that do involve significant mortality or morbidity risk. The fair values for our insurance contracts, other than investment contracts, are not required to be disclosed.

Short-Term Debt

The carrying amount of short-term debt approximates its fair value because of the relatively short time between origination of the debt instrument and its maturity, which is reflected in Level 2.

Long-Term Debt

Long-term debt primarily includes senior note issuances for which the fair values are determined using inputs that are observable in the market or that can be derived from or corroborated with observable market data. These are reflected in Level 2. Additionally, our long-term debt includes non-recourse mortgages and notes payable that are primarily financings for real estate developments for which the fair values are estimated using discounted cash flow analysis based on our incremental borrowing rate for similar borrowing arrangements. These are reflected in Level 3.

Separate Account Liabilities

Fair values of separate account liabilities, excluding insurance-related elements, are estimated based on market assumptions around what a potential acquirer would pay for the associated block of business, including both the separate account assets and liabilities. As the applicable separate account assets are already reflected at fair value, any adjustment to the fair value of the block is an assumed adjustment to the separate account liabilities. To compute fair value, the separate account liabilities are originally set to equal separate account assets because these are pass-through contracts. The separate account liabilities are reduced by the amount of future fees expected to be collected that are intended to offset upfront acquisition costs already incurred that a potential acquirer would not have to pay. The estimated future fees are adjusted by an adverse deviation discount and the amount is then discounted at a risk-free rate as measured by the yield on Treasury securities at maturities aligned with the estimated timing of fee collection. These are reflected in Level 3.

Bank Deposits

The fair value of deposits of our Principal Bank subsidiary with no stated maturity is equal to the amount payable on demand (i.e., their carrying amounts). These are reflected in Level 1. The fair value of certificates of deposit is based on the discounted value of contractual cash flows. The discount is estimated using the rates currently offered for deposits of similar remaining maturities. These are reflected in Level 2.

Cash Collateral Payable

The carrying amount of the payable associated with our obligation to return the cash collateral received under derivative credit support annex (collateral) agreements approximates its fair value, which is reflected in Level 1.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****15. Statutory Insurance Financial Information**

Principal Life, the largest indirect subsidiary of PFG, prepares statutory financial statements in accordance with the accounting practices prescribed or permitted by the Insurance Division of the Department of Commerce of the State of Iowa (the "State of Iowa"). The State of Iowa recognizes only statutory accounting practices prescribed or permitted by the State of Iowa for determining and reporting the financial condition and results of operations of an insurance company to determine its solvency under the Iowa Insurance Law. The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual has been adopted as a component of prescribed practices by the State of Iowa. The Commissioner has the right to permit other specific practices that deviate from prescribed practices. For the years ended, December 31, 2016, 2015 and 2014, Principal Life's use of prescribed statutory accounting practices resulted in higher (lower) statutory net income of \$3.8 million, \$(2.1) million and \$6.4 million, respectively, relative to the accounting practices and procedures of the NAIC due to its accounting for derivatives that hedge some of its equity indexed products. In addition, as of December 31, 2016 and 2015, Principal Life's permitted statutory accounting practice relating to variable annuities with a guaranteed living benefit rider resulted in lower statutory surplus of \$180.5 million and \$158.1 million, respectively, relative to carrying certain interest rate swaps at book value rather than fair value, as if they received hedge accounting treatment for statutory. Statutory accounting practices differ from U.S. GAAP primarily due to charging policy acquisition costs to expense as incurred, establishing reserves using different actuarial assumptions, valuing investments on a different basis and not admitting certain assets, including certain net deferred income tax assets.

Principal Life cedes certain term and universal life insurance statutory reserves to our affiliated reinsurance subsidiaries on a funds withheld coinsurance basis. The reserves are secured by cash, invested assets and financing provided by highly rated third parties. As of December 31, 2016 and 2015, our affiliated reinsurance subsidiaries assumed statutory reserves of \$4,734.0 million and \$3,934.2 million from Principal Life, respectively. In the states of Vermont and Delaware, the affiliated reinsurers had permitted and prescribed practices allowing for the admissibility of certain assets backing these reserves. As of December 31, 2016 and 2015, assets admitted under these practices totaled \$1,809.0 million and \$1,447.0 million, respectively.

Life and health insurance companies are subject to certain risk-based capital ("RBC") requirements as specified by the NAIC. Under those requirements, the amount of capital and surplus maintained by a life and health insurance company is to be determined based on the various risk factors related to it. As of December 31, 2016, Principal Life met the minimum RBC requirements.

Statutory net income and statutory capital and surplus of Principal Life were as follows:

	As of or for the year ended December 31,		
	2016	2015	2014
	<i>(in millions)</i>		
Statutory net income	\$ 996.7	\$ 948.6	\$ 535.5
Statutory capital and surplus	4,643.8	4,496.7	4,202.1

16. Segment Information

We provide financial products and services through the following segments: Retirement and Income Solutions, Principal Global Investors, Principal International and U.S. Insurance Solutions. In addition, we have a Corporate segment. The segments are managed and reported separately because they provide different products and services, have different strategies or have different markets and distribution channels.

During fourth quarter 2016, we decided to move long-term care, a business we exited and fully reinsured in 1997, from the U.S. Insurance Solutions segment to the Corporate segment to align it with the management of other exited businesses in the Corporate segment. This change has been applied retrospectively to our segment financial information but did not impact our consolidated financial statements.

The Retirement and Income Solutions segment provides retirement and related financial products and services primarily to businesses, their employees and other individuals.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

The Principal Global Investors segment provides asset management services to our asset accumulation business, our insurance operations, the Corporate segment and third party clients. This segment also includes our mutual fund business.

The Principal International segment has operations in Latin America (Brazil, Chile and Mexico) and Asia (China, Hong Kong Special Administrative Region, India and Southeast Asia). We focus on locations with large middle classes,

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****16. Segment Information (continued)**

favorable demographics and growing long-term savings, ideally with voluntary or mandatory pension markets. We entered these locations through acquisitions, start-up operations and joint ventures.

The U.S. Insurance Solutions segment provides specialty benefits insurance, which consists of group dental and vision insurance, individual and group disability insurance, group life insurance and non-medical fee-for-service claims administration, and individual life insurance throughout the United States.

Our Corporate segment manages the assets representing capital that has not been allocated to any other segment. Financial results of the Corporate segment primarily reflect our financing activities (including financing costs and preferred stock dividends), income on capital not allocated to other segments, inter-segment eliminations, income tax risks and certain income, expenses and other adjustments not allocated to the segments based on the nature of such items. Results of Principal Securities, Inc., our retail broker-dealer and registered investment advisor, and our exited group medical and long-term care insurance businesses are reported in this segment.

Management uses segment pre-tax operating earnings in evaluating performance, which is consistent with the financial results provided to and discussed with securities analysts. We determine segment pre-tax operating earnings by adjusting U.S. GAAP income before income taxes for pre-tax net realized capital gains (losses), as adjusted, pre-tax other adjustments that management believes are not indicative of overall operating trends and certain adjustments related to equity method investments and noncontrolling interest. Pre-tax net realized capital gains (losses), as adjusted, are net of related changes in the amortization pattern of DAC and related actuarial balances, recognition of deferred front-end fee revenues for sales charges on retirement and life insurance products and services, amortization of hedge accounting book value adjustments for certain discontinued hedges, net realized capital gains and losses distributed, certain adjustments related to equity method investments, certain adjustments related to sponsored investment funds and certain market value adjustments to fee revenues. Pre-tax net realized capital gains (losses), as adjusted, exclude periodic settlements and accruals on derivative instruments not designated as hedging instruments and exclude certain market value adjustments of embedded derivatives and realized capital gains (losses) associated with our exited group medical insurance business. Segment operating revenues exclude net realized capital gains (losses) (except periodic settlements and accruals on derivatives not designated as hedging instruments), including their impact on recognition of front-end fee revenues, certain market value adjustments to fee revenues, certain adjustments related to equity method investments, certain adjustments related to sponsored investment funds and amortization of hedge accounting book value adjustments for certain discontinued hedges; certain adjustments related to equity method investments, pre-tax other adjustments management believes are not indicative of overall operating trends and revenue from our exited group medical insurance business. While these items may be significant components in understanding and assessing the consolidated financial performance, management believes the presentation of segment pre-tax operating earnings enhances the understanding of our results of operations by highlighting pre-tax earnings attributable to the normal, ongoing operations of the business.

The accounting policies of the segments are consistent with the accounting policies for the consolidated financial statements, with the exception of: (1) pension and other postretirement employee benefit cost allocations and (2) income tax allocations. For purposes of determining operating earnings, the segments are allocated the service component of pension and other postretirement benefit costs. The Corporate segment reflects the non-service components of pension and other postretirement benefit costs as assumptions are established and funding decisions are managed from a company-wide perspective. The Corporate segment functions to absorb the risk inherent in interpreting and applying tax law. For purposes of determining operating earnings, the segments are allocated tax adjustments consistent with the positions we took on tax returns. The Corporate segment results reflect any differences between the tax returns and the estimated resolution of any disputes.

The following tables summarize select financial information by segment, including operating revenues for our products and services, and reconcile segment totals to those reported in the consolidated financial statements:

	December 31, 2016		December 31, 2015

(4)

For the year ended December 31, 2016, pre-tax other adjustments included the negative effect of one-time costs incurred to extinguish long-term debt.

For the year ended December 31, 2015, pre-tax other adjustments included the positive effect of the impact of a court ruling on some uncertain tax positions (\$15.1 million) and the negative effect of losses associated with our exited group medical insurance business that did not qualify for discontinued operations accounting treatment under U.S. GAAP (\$3.4 million).

For the year ended December 31, 2014, pre-tax other adjustments included the negative effect of the impact of (a) a court ruling on some uncertain tax positions (\$62.2 million) and (b) the effect of losses associated with our exited group medical insurance business that did not qualify for discontinued operations accounting treatment under U.S. GAAP (\$0.9 million).

The following is a summary of income tax expense (benefit) allocated to our segments for purposes of determining operating earnings. Segment income taxes are reconciled to income taxes reported on our consolidated statements of operations.

	For the year ended December 31,		
	2016	2015	2014
	<i>(in millions)</i>		
Income tax expense (benefit) by segment:			
Retirement and Income Solutions	\$ 98.6	\$ 76.1	\$ 128.5
Principal Global Investors	166.8	148.4	132.9
Principal International	62.7	51.5	84.7
U.S. Insurance Solutions	118.8	143.1	112.8
Corporate	(109.3)	(77.2)	(86.7)
Total segment income taxes from operating earnings	337.6	341.9	372.2
Tax benefit related to net realized capital losses, as adjusted	(6.6)	(45.6)	(43.6)
Tax expense (benefit) related to other after-tax adjustments	(34.4)	(63.2)	44.3
Certain adjustments related to equity method investments and noncontrolling interest	(66.7)	(55.5)	(54.4)
Total income taxes per consolidated statements of operations	\$ 229.9	\$ 177.6	\$ 318.5

The following is a summary of depreciation and amortization expense allocated to our segments for purposes of determining pre-tax operating earnings. Segment depreciation and amortization is reconciled to depreciation and amortization included in operating expenses in our consolidated statements of operations.

	For the year ended December 31,		
	2016	2015	2014
	<i>(in millions)</i>		
Depreciation and amortization expense by segment:			
Retirement and Income Solutions	\$ 30.4	\$ 28.3	\$ 27.5
Principal Global Investors	18.8	16.5	17.1
Principal International	50.1	69.3	51.6
U.S. Insurance Solutions	26.8	23.1	21.2
Corporate	7.4	6.5	5.3
Total depreciation and amortization expense included in our consolidated statements of operations	\$ 133.5	\$ 143.7	\$ 122.7

17. Stock-Based Compensation Plans

As of December 31, 2016, we had the 2014 Stock Incentive Plan, the Employee Stock Purchase Plan, the 2014 Directors Stock Plan, the Long-Term Performance Plan, the Amended and Restated 2010 Stock Incentive Plan, the 2005 Directors Stock Plan, the Stock Incentive Plan and the Directors Stock Plan ("Stock-Based Compensation Plans"). As of May 20, 2014, no new grants will be made under the Amended and Restated 2010 Stock Incentive Plan or the 2005 Directors Stock Plan. No grants have been made under the Stock Incentive Plan, the Directors Stock Plan or the Long-Term Performance Plan since at least 2005. Under the terms of the 2014 Stock Incentive Plan, grants may be nonqualified stock options, incentive stock options qualifying under Section 422 of the Internal Revenue Code, restricted stock, restricted stock units, stock appreciation rights, performance shares, performance units or other stock-based awards. The 2014 Directors Stock Plan provides for the grant of nonqualified stock options, restricted stock, restricted stock units or other stock-based awards to our nonemployee directors. To date, we have not granted any incentive stock options, restricted stock or performance units under any plans.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****17. Stock-Based Compensation Plans (continued)**

As of December 31, 2016, the maximum number of new shares of common stock available for grant under the 2014 Stock Incentive Plan and the 2014 Directors Stock Plan was 9.9 million.

For awards with graded vesting, we use an accelerated expense attribution method. The compensation cost that was charged against income for stock-based awards granted under the Stock-Based Compensation Plans was as follows:

	For the year ended December 31,		
	2016	2015	2014
	<i>(in millions)</i>		
Compensation cost	\$ 73.8	\$ 69.7	\$ 66.2
Related income tax benefit	21.5	22.5	21.6
Capitalized as part of an asset	2.8	2.2	2.5

Nonqualified Stock Options

Nonqualified stock options were granted to certain employees under the 2014 Stock Incentive Plan, the Amended and Restated 2010 Stock Incentive Plan and the Stock Incentive Plan. Options outstanding were granted at an exercise price equal to the fair market value of our common stock on the date of grant, and expire ten years after the grant date. These options have graded vesting over a three-year period, except in the case of specific types of terminations. Total options granted were 1.1 million, 0.6 million and 0.6 million during 2016, 2015 and 2014, respectively.

The following is a summary of the status of all of our stock option plans:

	Number of options <i>(in millions)</i>	Weighted- average exercise price	Intrinsic value <i>(in millions)</i>
Options outstanding as of January 1, 2016	7.7	\$ 43.71	
Granted	1.1	37.38	
Exercised	0.7	20.52	
Expired	0.6	49.31	
Options outstanding as of December 31, 2016	7.5	\$ 44.61	\$ 108.9
Options vested or expected to vest as of December 31, 2016	7.4	\$ 44.62	\$ 108.6
Options exercisable as of December 31, 2016	5.9	\$ 45.64	\$ 82.6

The total intrinsic value of stock options exercised was \$25.7 million, \$17.4 million and \$25.4 million during 2016, 2015, and 2014, respectively.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

The following is a summary of weighted-average remaining contractual lives for stock options outstanding and the range of exercise prices on the stock options as of December 31, 2016:

Range of exercise prices	Number of options outstanding	Weighted- average remaining contractual life
	<i>(in millions)</i>	
\$11.07 - \$21.69	0.4	2.2
\$21.70 - \$32.32	1.5	5.2
\$32.33 - \$42.95	1.5	8.0
\$42.96 - \$53.58	1.2	7.7
\$53.59 - \$64.22	2.9	0.7
\$11.07 - \$64.22	7.5	4.2

The weighted-average remaining contractual lives for stock options exercisable is approximately 3.0 years as of December 31, 2016.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****17. Stock-Based Compensation Plans (continued)**

The fair value of stock options is estimated using the Black-Scholes option pricing model. The following is a summary of the assumptions used in this model for the stock options granted during the period:

Options	For the year ended December 31,		
	2016	2015	2014
Expected volatility	31.7%	52.2%	53.2%
Expected term (in years)	6.5	6.5	6.5
Risk-free interest rate	1.5%	1.8%	2.0%
Expected dividend yield	4.07%	2.81%	2.50%
Weighted average estimated fair value	\$ 8.91	\$ 20.43	\$ 18.89

We determine expected volatility based on a combination of historical volatility using daily price observations and implied volatility from traded options on our common stock. We believe that incorporating both historical and implied volatility into our expected volatility assumption calculation better reflects market expectations. The expected term represents the period of time that options granted are expected to be outstanding. We determine expected term using historical exercise and employee termination data. The risk-free rate for periods within the expected term of the option is based on the U.S. Treasury risk-free interest rate in effect at the time of grant. The dividend yield is based on historical dividend distributions compared to the closing price of our common shares on the grant date.

As of December 31, 2016, we had \$2.9 million of total unrecognized compensation costs related to nonvested stock options. The cost is expected to be recognized over a weighted-average service period of approximately 1.7 years.

Cash received from stock options exercised under these share-based payment arrangements during 2016, 2015 and 2014 was \$15.3 million, \$52.7 million and \$56.1 million, respectively. The actual tax benefits realized for the tax deductions for options exercised under these share-based payment arrangements during 2016, 2015 and 2014 was \$9.0 million, \$6.0 million and \$8.6 million, respectively.

Performance Share Awards

We granted performance share awards to certain employees under the 2014 Stock Incentive Plan and the Amended and Restated 2010 Stock Incentive Plan. The performance share awards are treated as an equity award and are paid in shares. Whether the performance shares are earned depends upon the participant's continued employment through the performance period (except in the case of specific types of terminations) and our performance against three-year goals set at the beginning of the performance period. Performance goals based on various factors must be achieved for any of the performance shares to be earned. If the performance requirements are not met, the performance shares will be forfeited, no compensation cost will be recognized and any previously recognized compensation cost will be reversed. These awards have no maximum contractual term. Dividend equivalents are credited on performance shares outstanding as of the record date. These dividend equivalents are only paid on the shares released. Total performance share awards granted were 0.3 million, 0.3 million and 0.3 million in 2016, 2015 and 2014, respectively.

The following is a summary of activity for the nonvested performance share awards:

	Number of performance share awards <i>(in millions)</i>	Weighted- average grant-date fair value
Nonvested performance share awards as of January 1, 2016	0.9	\$ 41.57
Granted	0.3	37.38
Vested	0.3	30.70
Nonvested performance share awards as of December 31, 2016	0.9	\$ 44.23

The total intrinsic value of performance share awards vested was \$18.1 million, \$20.1 million and \$11.4 million during 2016, 2015 and 2014, respectively.

Performance share awards above represent initial target awards and do not reflect potential increases or decreases resulting from the final performance objectives to be determined at the end of the respective performance period. The actual number of shares to be awarded at the end of each performance period will range between 0% and 150% of the initial target awards.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****17. Stock-Based Compensation Plans (continued)**

The fair value of performance share awards is determined based on the closing stock price of our common shares on the grant date. The weighted-average grant-date fair value of performance share awards granted during 2016, 2015 and 2014 was \$37.38, \$51.33 and \$44.88, respectively.

As of December 31, 2016, we had \$4.5 million of total unrecognized compensation cost related to nonvested performance share awards granted. The cost is expected to be recognized over a weighted-average service period of approximately 1.5 years.

Actual tax benefits realized for the tax deductions for performance share awards paid out under these share-based payment arrangements for 2016, 2015 and 2014 was \$4.8 million, \$7.4 million and \$4.0 million, respectively.

Restricted Stock Units

We issue restricted stock units under the 2014 Stock Incentive Plan, the 2014 Directors Stock Plan, the Amended and Restated 2010 Stock Incentive Plan, the 2005 Directors Stock Plan, the Stock Incentive Plan, and the Directors Stock Plan. Restricted stock units are treated as an equity award and are paid in shares. These awards have no maximum contractual term. Dividend equivalents are credited on restricted stock units outstanding as of the record date. These dividend equivalents are only paid on the shares released. Restricted stock units granted were 1.3 million, 0.9 million and 0.9 million in 2016, 2015 and 2014, respectively.

Restricted stock units were issued to certain employees and agents pursuant to the 2014 Stock Incentive Plan, the Amended and Restated 2010 Stock Incentive Plan and Stock Incentive Plan. Under these plans, awards have graded or cliff vesting over a three-year service period. When service for PFG ceases (except in the case of specific types of terminations), all vesting stops and unvested units are forfeited.

Pursuant to the 2014 Directors Stock Plan and the 2005 Directors Stock Plan, restricted stock units are granted to each non-employee director in office immediately following each annual meeting of stockholders and, at the discretion of the Nominating and Governance Committee, to each person who becomes a member of the Board other than on the date of the annual meeting of stockholders. Under these plans, awards are granted on an annual basis and cliff vest after a one-year service period. When service to PFG ceases, all vesting stops and unvested units are forfeited.

The following is a summary of activity for the nonvested restricted stock units:

	Number of restricted stock units		Weighted- average grant-date fair value
	<i>(in millions)</i>		
Nonvested restricted stock units as of January 1, 2016	3.0	\$	41.32
Granted	1.3		37.59
Vested	1.3		31.23
Nonvested restricted stock units as of December 31, 2016	3.0	\$	43.77

The total intrinsic value of restricted stock units vested was \$46.2 million, \$53.6 million and \$38.5 during 2016, 2015 and 2014, respectively.

The fair value of restricted stock units is determined based on the closing stock price of our common shares on the grant date. The weighted-average grant-date fair value of restricted stock units granted during 2016, 2015 and 2014 was \$37.59, \$51.35 and \$45.03, respectively.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-K

As of December 31, 2016, we had \$45.0 million of total unrecognized compensation cost related to nonvested restricted stock unit awards granted under these plans. The cost is expected to be recognized over a weighted-average period of approximately 1.7 years.

The actual tax benefits realized for the tax deductions for restricted stock unit payouts under these share-based payment arrangements for 2016, 2015 and 2014 was \$16.1 million, \$18.8 million and \$12.8 million, respectively.

Employee Stock Purchase Plan

Under our Employee Stock Purchase Plan, participating employees have the opportunity to purchase shares of our common stock on a semi-annual basis. Employees may purchase up to \$25,000 worth of company stock each year. Employees may purchase shares of our common stock at a price equal to 85% of the shares' fair market value as of the

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****17. Stock-Based Compensation Plans (continued)**

beginning or end of the purchase period, whichever is lower. Under the Employee Stock Purchase Plan, employees purchased 0.7 million, 0.6 million and 0.5 million shares during 2016, 2015 and 2014, respectively.

We recognize compensation expense for the fair value of the discount granted to employees participating in the employee stock purchase plan in the period of grant. Shares of the Employee Stock Purchase Plan are treated as an equity award. The weighted-average fair value of the discount on the stock purchased was \$14.00, \$7.29 and \$8.94 during 2016, 2015 and 2014, respectively. The total intrinsic value of the Employee Stock Purchase Plan shares settled was \$10.2 million, \$4.1 million and \$4.7 million during 2016, 2015 and 2014, respectively.

Cash received from shares issued under these share-based payment arrangements for 2016, 2015 and 2014 was \$25.5 million, \$23.4 million and \$22.2 million, respectively. The actual tax benefit realized for the tax deductions for the settlement of the share-based payment arrangements for 2016, 2015 and 2014 was \$0.6 million, \$0.6 million and \$1.1 million, respectively.

As of December 31, 2016, a total of 3.4 million of new shares were available to be made issuable by us for this plan.

18. Earnings Per Common Share

The computations of the basic and diluted per share amounts were as follows:

	For the year ended December 31,		
	2016	2015	2014
	<i>(in millions, except per share data)</i>		
Net income	\$ 1,361.8	\$ 1,253.2	\$ 1,176.4
Subtract:			
Net income attributable to noncontrolling interest	45.3	19.2	32.3
Preferred stock dividends		16.5	33.0
Excess of redemption value over carrying value of preferred shares redeemed		8.2	
Adjustments to redemption amounts of redeemable noncontrolling interests			19.7
Total	\$ 1,316.5	\$ 1,209.3	\$ 1,091.4
Weighted-average shares outstanding:			
Basic	289.4	294.4	294.7
Dilutive effects:			
Stock options	1.3	1.5	1.8
Restricted stock units	1.7	1.7	1.8
Performance share awards	0.3	0.4	0.4
Diluted	292.7	298.0	298.7
Net income per common share:			
Basic	\$ 4.55	\$ 4.11	\$ 3.70

Diluted	\$	4.50	\$	4.06	\$	3.65
---------	----	------	----	------	----	------

The calculation of diluted earnings per share for the years ended December 31, 2016, 2015 and 2014, excludes the incremental effect related to certain outstanding stock-based compensation grants due to their anti-dilutive effect.

Table of Contents**Principal Financial Group, Inc.****Notes to Consolidated Financial Statements (continued)****December 31, 2016****19. Quarterly Results of Operations (Unaudited)**

The following is a summary of unaudited quarterly results of operations.

	For the three months ended,			
	December 31	September 30	June 30	March 31
	<i>(in millions, except per share data)</i>			
2016				
Total revenues	\$ 3,513.8	\$ 2,818.0	\$ 3,025.7	\$ 3,036.6
Total expenses	3,132.5	2,447.3	2,625.8	2,596.8
Net income	338.2	327.4	327.0	369.2
Net income available to common stockholders	318.0	308.2	322.3	368.0
Basic earnings per common share for net income available to common stockholders	1.10	1.07	1.11	1.26
Diluted earnings per common share for net income available to common stockholders	1.09	1.06	1.10	1.25
2015				
Total revenues	\$ 2,807.0	\$ 3,240.9	\$ 3,259.2	\$ 2,657.3
Total expenses	2,498.0	2,871.7	2,964.7	2,199.2
Net income	258.3	300.9	264.9	429.1
Net income available to common stockholders	253.6	300.4	241.1	414.2
Basic earnings per common share for net income available to common stockholders	0.87	1.02	0.82	1.41
Diluted earnings per common share for net income available to common stockholders	0.86	1.01	0.81	1.39

20. Condensed Consolidating Financial Information

Principal Life has established special purpose entities to issue secured medium-term notes. Under the program, the payment obligations of principal and interest on the notes are secured by funding agreements issued by Principal Life. Principal Life's payment obligations on the funding agreements are fully and unconditionally guaranteed by PFG. All of the outstanding stock of Principal Life is indirectly owned by PFG and PFG is the only guarantor of the payment obligations of the funding agreements.

The following tables set forth condensed consolidating financial information of (i) PFG, (ii) Principal Life, (iii) Principal Financial Services, Inc. ("PFS") and all other direct and indirect subsidiaries of PFG on a combined basis and (iv) the eliminations necessary to arrive at the information for PFG on a consolidated basis as of December 31, 2016 and December 31, 2015, and for the years ended December 31, 2016, 2015 and 2014.

In presenting the condensed consolidating financial statements, the equity method of accounting has been applied to (i) PFG's interest in all direct subsidiaries of PFG, (ii) Principal Life's interest in all direct subsidiaries of Principal Life and (iii) PFS's interest in Principal Life even though all such subsidiaries meet the requirements to be consolidated under U.S. GAAP. Earnings of subsidiaries are, therefore, reflected in the parent's investment and earnings. All intercompany balances and transactions, including elimination of the parent's investment in subsidiaries, between PFG, Principal Life and PFS and all other subsidiaries have been eliminated, as shown in the column "Eliminations." These condensed consolidating financial statements should be read in conjunction with the consolidated financial statements. The financial information may not necessarily be indicative of results of operations, cash flows or financial position had the subsidiaries operated as independent entities.
