SECURITIES REGISTERED UNDER SECTION 12(b) OF THE ACT:

None

SECURITIES REGISTERED UNDER SECTION 12(g) OF THE ACT:

Common Stock, without par value

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was

Edgar Filing: FIDELITY D & D BANCORP INC - Form 10-K

required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by references in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check One)

Large accelerated filer	Non-accelerated filer (Do not check if a smaller reporting company)	Accelerated filer	Smaller reporting company
----------------------------	---	-------------------	------------------------------

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the voting common stock held by non-affiliates of the registrant was \$52.4 million as of June 30, 2014, based on the closing price of \$27.85. The number of shares of common stock outstanding as of February 28, 2015, was 2,439,905.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Registrant's definitive Proxy Statement to be used in connection with the 2015 Annual Meeting of Shareholders are incorporated herein by reference in partial response to Part III.

PART I

Forward-Looking Statements

Certain of the matters discussed in this Annual Report on Form 10-K may constitute forward-looking statements for purposes of the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended, and as such may involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements. The words “expect,” “anticipate,” “intend,” “plan,” “believe,” “estimate,” and similar expressions are intended to identify such forward-looking statements.

The Company’s actual results may differ materially from the results anticipated in these forward-looking statements due to a variety of factors, including, without limitation:

- § the effects of economic conditions on current customers, specifically the effect of the economy on loan customers’ ability to repay loans;
- § the costs and effects of litigation and of unexpected or adverse outcomes in such litigation;
- § the impact of new laws and regulations, including the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 and the regulations promulgated there under;
- § impacts of the new capital and liquidity requirements of the Basel III standards and other regulatory pronouncements, regulations and rules;
- § governmental monetary and fiscal policies, as well as legislative and regulatory changes;
- § effects of short- and long-term federal budget and tax negotiations and their effect on economic and business conditions;
- § the effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies, as well as the Financial Accounting Standards Board and other accounting standard setters;
- § the risks of changes in interest rates on the level and composition of deposits, loan demand, and the values of loan collateral, securities and interest rate protection agreements, as well as interest rate risks;
- § the effects of competition from other commercial banks, thrifts, mortgage banking firms, consumer finance companies, credit unions, securities brokerage firms, insurance companies, money market and other mutual funds and other financial institutions operating in our market area and elsewhere, including institutions operating locally, regionally, nationally and internationally, together with such competitors offering banking products and services by mail, telephone, computer and the internet;
- § technological changes;
- § acquisitions and integration of acquired businesses;
- § the failure of assumptions underlying the establishment of reserves for loan losses and estimations of values of collateral and various financial assets and liabilities;
- § volatilities in the securities markets;
- § acts of war or terrorism; and
- § disruption of credit and equity markets.

The Company cautions readers not to place undue reliance on forward-looking statements, which reflect analyses only as of the date of this document. The Company has no obligation to update any forward-looking statements to reflect events or circumstances after the date of this document.

Readers should review the risk factors described in this document and other documents that we file or furnish, from time- to-time, with the Securities and Exchange Commission, including quarterly reports filed on Form 10-Q and any current reports filed or furnished on Form 8-K.

ITEM 1: BUSINESS

Fidelity D & D Bancorp, Inc. (the Company) was incorporated in the Commonwealth of Pennsylvania, on August 10, 1999, and is a bank holding company, whose wholly-owned state chartered commercial bank is The Fidelity Deposit and Discount Bank (the Bank) (collectively, the Company). The Company is headquartered at Blakely and Drinker Streets in Dunmore, Pennsylvania.

The Bank has offered a full range of traditional banking services since it commenced operations in 1903. The Bank has a personal and corporate trust department and also provides alternative financial and insurance products with asset management services. A full list of services provided by the Bank is detailed in the section entitled “Products and Services” contained within the 2014 Annual Report to Shareholders, incorporated by reference. The service area is comprised of the Borough of Dunmore and the surrounding communities within Lackawanna and Luzerne counties in Northeastern Pennsylvania. The Company had 159 full-time equivalent employees on December 31, 2014, which includes exempt officers, exempt, non-exempt and part-time employees.

Table Of Contents

The banking business is highly competitive, and the success and profitability of the Company depends principally on its ability to compete in its market area. Competition includes, among other sources: local community banks; savings banks; regional banks; national banks; credit unions; savings & loans; insurance companies; money market funds; mutual funds; small loan companies and other financial services companies. The Company has been able to compete effectively with other financial institutions by emphasizing customer service enhanced by local decision making. These efforts enable the Company to establish long-term customer relationships and build customer loyalty by providing products and services designed to address their specific needs.

The banking industry is affected by general economic conditions including the effects of inflation, recession, unemployment, real estate values, trends in national and global economies and other factors beyond the Company's control. The Company's success is dependent, to a significant degree, on economic conditions in Northeastern Pennsylvania, especially within Lackawanna and Luzerne counties which the Company defines as its primary market area. An economic recession or a delayed economic recovery over a prolonged period of time in the Company's market could cause an increase in the level of the Company's non-performing assets and loan losses, and thereby cause operating losses, impairment of liquidity and erosion of capital. There are no concentrations of loans that, if lost, would have a material adverse effect on the continued business of the Company. There is no material concentration within a single industry or a group of related industries that is vulnerable to the risk of a near-term severe impact.

The Company's profitability is significantly affected by general economic and competitive conditions, changes in market interest rates, government policies and actions of regulatory authorities. The Company's loan portfolio is comprised principally of residential real estate, commercial and commercial real estate loans. The properties underlying the Company's mortgages are concentrated in Northeastern Pennsylvania. Credit risk, which represents the possibility of the Company not recovering amounts due from its borrowers, is significantly related to local economic conditions in the areas where the properties are located as well as the Company's underwriting standards. Economic conditions affect the market value of the underlying collateral as well as the levels of adequate cash flow and revenue generation from income-producing commercial properties.

During 2014, the national economy strengthened with the unemployment rate returning to the pre-2009 levels and the number of jobs increasing from the end of 2013. Similarly, the unemployment rate in the Company's local statistical market, Scranton-Wilkes-Barre, at 5.6%, approximated the national rate, as the local market unemployment rate declined 27%, from 7.7% at the end of 2013. Compared to year-end 2013, however, the number of ready-and-able workers searching for jobs declined and though there was job growth in our region in 2014, the shrinking labor force had a more significant influence on the rate of unemployment than did the increase in jobs. Also, in the Wilkes-Barre-Scranton real estate market, the median home values declined by 1.1% from year-end 2013 indicating a sustaining period of softness in the residential real estate market. A low and shrinking work force, akin to high unemployment, and declining property values that secure the related loans could adversely impact the ability or desire of borrowers to repay their loans, exposing the Company to the potential for credit loss. The Company's credit function strives to mitigate the negative impact of economic conditions by maintaining strict underwriting principles for commercial and consumer lending and ensuring that home mortgage underwriting adheres to the standards of secondary market makers. In addition, the Company strives to accelerate the property foreclosure process thereby lessening the negative financial impact of foreclosed property ownership. Refer to Item 1A, "Risk Factors" for material risks and uncertainties that management believes affect the Company.

Federal and state banking laws contain numerous provisions that affect various aspects of the business and operations of the Company and the Bank. The Company is subject to, among others, the regulations of the Securities and Exchange Commission (the SEC) and the Federal Reserve Board (the FRB) and the Bank is subject to, among others, the regulations of the Pennsylvania Department of Banking, the Federal Deposit Insurance Corporation (the FDIC)

and the rules promulgated by the Consumer Financial Protection Bureau (the CFPB) but continues to be examined and supervised by federal banking regulators for consumer compliance purposes. Refer to Part II, Item 7 “Supervision and Regulation” for descriptions of and references to applicable statutes and regulations which are not intended to be complete descriptions of these provisions or their effects on the Company or the Bank. They are summaries only and are qualified in their entirety by reference to such statutes and regulations. Applicable regulations relate to, among other things:

- operations
- securities
- risk management
- consumer compliance
- mergers
- consolidation
- reserves
- dividends
- branches
- capital adequacy

The Bank is examined by the Pennsylvania Department of Banking and the FDIC. The last examination was conducted by the Pennsylvania Department of Banking as of September 30, 2014.

The Company’s website address is <http://www.bankatfidelity.com>. The Company makes available through this website the annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K and amendments to those reports as soon as reasonably practical after filing with the SEC. You may read and copy any materials filed with the SEC at

Table Of Contents

the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC also maintains an internet site that contains reports, proxy and information statements and other information about the Company at <http://www.sec.gov>.

The Company's accounting policies and procedures are designed to comply with accounting principles generally accepted in the United States of America (GAAP). Refer to "Critical Accounting Policies," which are incorporated by reference in Part II, Item 7.

ITEM 1A: RISK FACTORS

An investment in the Company's common stock is subject to risks inherent to the Company's business. The material risks and uncertainties that management believes affect the Company are described below. Before making an investment decision, you should carefully consider the risks and uncertainties described below together with all of the other information included or incorporated by reference in this report. The risks and uncertainties described below are not the only ones facing the Company. Additional risks and uncertainties that management is not aware of or focused on or that management currently deems immaterial may also impair the Company's business operations. This report is qualified in its entirety by these risk factors.

If any of the following risks actually occur, the Company's financial condition and results of operations could be materially and adversely affected. If this were to happen, the value of the Company's common stock could decline significantly, and you could lose all or part of your investment.

Risks Related to the Company's Business

The Company's business is subject to interest rate risk and variations in interest rates may negatively affect its financial performance.

Changes in the interest rate environment may reduce profits. The Company's earnings and cash flows are largely dependent upon its net interest income. Net interest income is the difference between the interest earned on loans, securities and other interest-earning assets, and interest paid on deposits, borrowings and other interest-bearing liabilities. As prevailing interest rates change, net interest spreads are affected by the difference between the maturities and re-pricing characteristics of interest-earning assets and interest-bearing liabilities. In addition, loan volume and yields are affected by market interest rates on loans, and rising interest rates generally are associated with a lower volume of loan originations. An increase in the general level of interest rates may also adversely affect the ability of certain borrowers to pay the interest on and principal of their obligations. Accordingly, changes in levels of market interest rates could materially adversely affect the Company's net interest spread, asset quality, loan origination volume and overall profitability.

The Company is subject to lending risk.

There are inherent risks associated with the Company's lending activities. These risks include, among other things, the impact of changes in interest rates and changes in the economic conditions in the markets where the Company operates as well as those across the Commonwealth of Pennsylvania and the United States. Increases in interest rates and/or weakening economic conditions could adversely impact the ability of borrowers to repay outstanding loans or the value of the collateral securing these loans. The Company is also subject to various laws and regulations that affect its lending activities. Failure to comply with applicable laws and regulations could subject the Company to regulatory

enforcement action that could result in the assessment of significant civil money penalties against the Company.

Commercial, commercial real estate and real estate construction loans are generally viewed as having more risk of default than residential real estate loans or consumer loans. These types of loans are also typically larger than residential real estate loans and consumer loans. Because these loans generally have larger balances than residential real estate loans and consumer loans, the deterioration of one or a few of these loans could cause a significant increase in non-performing loans. An increase in non-performing loans could result in a net loss of earnings from these loans, an increase in the provision for possible loan losses and an increase in loan charge-offs, all of which could have a material adverse effect on the Company's financial condition and results of operations.

The Company's allowance for possible loan losses may be insufficient.

The Company maintains an allowance for possible loan losses, which is a reserve established through a provision for possible loan losses charged to expense, that represents management's best estimate of probable losses that have been incurred within the existing portfolio of loans. The allowance, in the judgment of management, is necessary to reserve for estimated loan losses and risks inherent in the loan portfolio. The level of the allowance reflects management's continuing evaluation of industry concentrations; specific credit risks; loan loss experience; current loan portfolio quality; present economic, political and regulatory conditions and unidentified losses inherent in the current loan portfolio. The determination of the appropriate level of the allowance for possible loan losses inherently involves a high degree of subjectivity and requires the Company to make significant estimates of current credit risks and future trends, all of which may undergo material changes. Changes in economic conditions affecting borrowers, new information regarding existing loans, identification of additional problem loans and other factors, both within and outside of the Company's control, may require an increase in the allowance for possible loan losses. In addition, bank regulatory agencies periodically review the Company's allowance for loan losses and

Table Of Contents

may require an increase in the provision for possible loan losses or the recognition of further loan charge-offs, based on judgments different than those of management. In addition, if charge-offs in future periods exceed the allowance for possible loan losses, the Company will need additional provisions to increase the allowance for possible loan losses. Any increases in the allowance for loan losses will result in a decrease in net income and capital and may have a material adverse effect on the Company's financial condition and results of operations.

If we conclude that the decline in value of any of our investment securities is other-than-temporary, we will be required to write down the credit-related portion of the impairment of that security through a charge to earnings.

We review our investment securities portfolio at each quarter-end reporting period to determine whether the fair value is below the current carrying value. When the fair value of any of our investment securities has declined below its carrying value, we are required to assess whether the decline is other-than-temporary. If we conclude that the decline is other-than-temporary, we will be required to write down the credit-related portion of the impairment of that security through a charge to earnings.

The Basel III capital requirements may require us to maintain higher levels of capital, which could reduce our profitability.

Basel III targets higher levels of base capital, certain capital buffers and a migration toward common equity as the key source of regulatory capital. Although the new capital requirements are phased in over the next decade and may change substantially before final implementation, Basel III signals a growing effort by domestic and international bank regulatory agencies to require financial institutions, including depository institutions, to maintain higher levels of capital. The direction of the Basel III implementation activities or other regulatory viewpoints could require additional capital to support our business risk profile prior to final implementation of the Basel III standards. If the Company and the Bank are required to maintain higher levels of capital, the Company and the Bank may have fewer opportunities to invest capital into interest-earning assets, which could limit the profitable business operations available to the Company and the Bank and adversely impact our financial condition and results of operations.

The Company may need or be compelled to raise additional capital in the future, but that capital may not be available when it is needed and on terms favorable to current shareholders.

Federal banking regulators require the Company and Bank to maintain adequate levels of capital to support their operations. These capital levels are determined and dictated by law, regulation and banking regulatory agencies. In addition, capital levels are also determined by the Company's management and board of directors based on capital levels that they believe are necessary to support the Company's business operations. The Company is evaluating its present and future capital requirements and needs, is developing a comprehensive capital plan and is analyzing capital raising alternatives, methods and options. Even if the Company succeeds in meeting the current regulatory capital requirements, the Company may need to raise additional capital in the near future to support possible loan losses during future periods or to meet future regulatory capital requirements.

Further, the Company's regulators may require it to increase its capital levels. If the Company raises capital through the issuance of additional shares of its common stock or other securities, it would likely dilute the ownership interests of current investors and would likely dilute the per-share book value and earnings per share of its common stock. Furthermore, it may have an adverse impact on the Company's stock price. New investors may also have rights, preferences and privileges senior to the Company's current shareholders, which may adversely impact its current shareholders. The Company's ability to raise additional capital will depend on conditions in the capital markets at that time, which are outside its control, and on its financial performance. Accordingly, the Company

cannot assure you of its ability to raise additional capital on terms and time frames acceptable to it or to raise additional capital at all. If the Company cannot raise additional capital in sufficient amounts when needed, its ability to comply with regulatory capital requirements could be materially impaired. Additionally, the inability to raise capital in sufficient amounts may adversely affect the Company's operations, financial condition and results of operations.

6

Table Of Contents

The Company is subject to environmental liability risk associated with lending activities.

A significant portion of the Company's loan portfolio is secured by real property. During the ordinary course of business, the Company may foreclose on and take title to properties securing certain loans. In doing so, there is a risk that hazardous or toxic substances could be found on these properties. If hazardous or toxic substances are found, the Company may be liable for remediation costs, as well as for personal injury and property damage. Environmental laws may require the Company to incur substantial expense and may materially reduce the affected property's value or limit the Company's ability to use or sell the affected property. In addition, future laws or more stringent interpretations or enforcement policies with respect to existing laws may increase the Company's exposure to environmental liability. Although the Company has policies and procedures to perform an environmental review before initiating any foreclosure action on real property, these reviews may not be sufficient to detect all potential environmental hazards. The remediation costs and any other financial liabilities associated with an environmental hazard could have a material adverse effect on the Company's financial condition and results of operations.

The Company's profitability depends significantly on economic conditions in the Commonwealth of Pennsylvania and the local region in which it conducts business.

The Company's success depends primarily on the general economic conditions of the Commonwealth of Pennsylvania and the specific local markets in which the Company operates. Unlike larger national or other regional banks that are more geographically diversified, the Company provides banking and financial services to customers primarily in Lackawanna and Luzerne Counties in Northeastern Pennsylvania. The local economic conditions in these areas have a significant impact on the demand for the Company's products and services as well as the ability of the Company's customers to repay loans, the value of the collateral securing loans and the stability of the Company's deposit funding sources. A significant decline in general economic conditions caused by inflation, recession, acts of terrorism, an outbreak of hostilities or other international or domestic occurrences, unemployment, changes in securities markets or other factors could impact these local economic conditions and, in turn, have a material adverse effect on the Company's financial condition and results of operations.

There is no assurance that the Company will be able to successfully compete with others for business.

The Company competes for loans, deposits and investment dollars with numerous regional and national banks and other community banking institutions, as well as other kinds of financial institutions and enterprises, such as securities firms, insurance companies, savings associations, credit unions, mortgage brokers and private lenders. Many competitors have substantially greater resources than the Company does, and operate under less stringent regulatory environments. The differences in resources and regulations may make it more difficult for the Company to compete profitably, reduce the rates that it can earn on loans and on its investments, increase the rates it must offer on deposits and other funds, and adversely affect its overall financial condition and earnings.

The Company is subject to extensive government regulation and supervision.

The Company, primarily through the Bank, is subject to extensive federal and state regulation and supervision. Banking regulations are primarily intended to protect depositors' funds, federal deposit insurance funds and the banking system as a whole, not shareholders. These regulations affect the Company's lending practices, capital structure, investment practices, dividend policy and growth, among other things. Federal or commonwealth regulatory agencies continually review banking laws, regulations and policies for possible changes. Changes to statutes, regulations or regulatory policies, including changes in interpretation or implementation of statutes, regulations or policies, could affect the Company in substantial and unpredictable ways. Such changes could subject the Company to

additional costs, limit the types of financial services and products the Company may offer and/or increase the ability of non-banks to offer competing financial services and products, among other things. Failure to comply with laws, regulations or policies could result in sanctions by regulatory agencies, civil money penalties and/or reputation damage, which could have a material adverse effect on the Company's business, financial condition and results of operations. While the Company has policies and procedures designed to prevent any such violations, there can be no assurance that such violations will not occur.

The Company's controls and procedures may fail or be circumvented.

Management regularly reviews and updates the Company's internal controls, disclosure controls and procedures, and corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and can provide only reasonable, not absolute, assurances that the objectives of the system are met. Any failure or circumvention of the Company's controls and procedures or failure to comply with regulations related to controls and procedures could have a material adverse effect on the Company's business, results of operations and financial condition.

New lines of business or new products and services may subject the Company to additional risks.

From time-to-time, the Company may implement new lines of business or offer new products and services within existing lines of business. There are substantial risks and uncertainties associated with these efforts, particularly in instances where the markets are not fully developed. In developing and marketing new lines of business and/or new products and services the Company may invest significant time and resources. Initial timetables for the introduction and development of new lines of business and/or new products or services may not be achieved and price and profitability targets may not prove feasible.

Table Of Contents

External factors, such as compliance with regulations, competitive alternatives, and shifting market preferences, may also impact the successful implementation of a new line of business or a new product or service. Furthermore, any new line of business and/or new product or service could have a significant impact on the effectiveness of the Company's system of internal controls. Failure to successfully manage these risks in the development and implementation of new lines of business or new products or services could have a material adverse effect on the Company's business, results of operations and financial condition.

The Company's future acquisitions could dilute your ownership and may cause it to become more susceptible to adverse economic events.

The Company may use its common stock to acquire other companies or make investments in banks and other complementary businesses in the future. The Company may issue additional shares of common stock to pay for future acquisitions, which would dilute your ownership interest in the Company. Future business acquisitions could be material to the Company, and the degree of success achieved in acquiring and integrating these businesses into the Company could have a material effect on the value of the Company's common stock. In addition, any acquisition could require it to use substantial cash or other liquid assets or to incur debt. In those events, it could become more susceptible to economic downturns and competitive pressures.

The Company may not be able to attract and retain skilled people.

The Company's success depends, in large part, on its ability to attract and retain key people. Competition for the best people in most activities engaged in by the Company can be intense and the Company may not be able to hire people or to retain them. The unexpected loss of services of one or more of the Company's key personnel could have a material adverse impact on the Company's business because of their skills, knowledge of the Company's market, years of industry experience and the difficulty of promptly finding qualified replacement personnel.

The Company's information systems may experience an interruption or breach in security.

The Company relies heavily on communications and information systems to conduct its business. Any failure, interruption or breach in security of these systems could result in failures or disruptions in the Company's customer relationship management, general ledger, deposit, loan and other systems. The Company has policies and procedures designed to prevent or limit the effect of the failure, interruption or security breach of its information systems, however there can be no assurance that any such failures, interruptions or security breaches will not occur. The occurrence of any failures, interruptions or security breaches of the Company's information systems could damage the Company's reputation, result in a loss of customer business, subject the Company to additional regulatory scrutiny, or expose the Company to civil litigation and possible financial liability, any of which could have a material adverse effect on the Company's financial condition and results of operations.

The Company continually encounters technological change.

The financial services industry is continually undergoing rapid technological change with frequent introductions of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better serve customers and to reduce costs. The Company's future success depends, in part, upon its ability to address the needs of its customers by using technology to provide products and services that will satisfy customer demands, as well as to create additional efficiencies in the Company's operations. Many of the Company's competitors have substantially greater resources to invest in technological improvements. The Company may not be able to effectively implement new technology-driven products and services or be successful in marketing

these products and services to its customers. Failure to successfully keep pace with technological change affecting the financial services industry could have a material adverse impact on the Company's business and, in turn, the Company's financial condition and results of operations.

The operations of our business, including our interaction with customers, are increasingly done via electronic means, and this has increased our risks related to cyber security.

We are exposed to the risk of cyber-attacks in the normal course of business. In general, cyber incidents can result from deliberate attacks or unintentional events. We have observed an increased level of attention in the industry focused on cyber-attacks that include, but are not limited to, gaining unauthorized access to digital systems for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. To combat against these attacks, policies and procedures are in place to prevent or limit the effect of the possible security breach of our information systems and we have insurance against some cyber-risks and attacks. While we have not incurred any material losses related to cyber-attacks, nor are we aware of any specific or threatened cyber-incidents as of the date of this report, we may incur
