-

Item 1.01. Entry into a Material Definitive Agreement

Item 8.01. Other Events

ImmuCell today announced that it has broken ground on construction of its new pharmaceutical facility to produce Nisin, the active ingredient in Mast Out®. The two-story facility, which is nearby to the Company's headquarters and USDA production facility at 56 Evergreen Drive in Portland (about 100 miles north of Boston), will provide over 16,800 square feet of fermentation, processing, laboratory and warehouse space on a footprint of 12,625 square feet.

The estimated budget for this project is approximately \$20 million. Consigli Construction Co., Inc. is serving as construction manager on this project. In connection therewith, the Company entered into a guaranteed maximum price contract with Consigli valued at approximately \$5 million during the third quarter. The Company expects to amend this contract during the fourth quarter increasing its value to approximately \$11 million.

The Company also announced that the City of Portland approved a Tax Increment Financing (TIF) credit enhancement package for the Company that reduces the Company's real estate taxes on this facility by 65% over the first eleven years and by 30% during the 12th year, after which time the rebate expires. The TIF is still subject to standard approvals by the State's Department of Economic and Community Development.
