Mr. Leonid Melamed, President and Chief Executive Officer of MTS, commented:

This has been a year of change both within our markets and within our Company. A new competitive environment necessitated a new approach to doing business, and each step we have taken has been done with the intention of laying a foundation for sustained profitable growth and development. With revenue growth in each of our markets of operation, we are seeing results that are testimony to the fact that we can use change to our advantage by simultaneously delivering greater value to our customers and realizing better returns for our shareholders.

## **Operating Overview**

## Attachments to the Fourth Quarter and Full-Year 2006 Earnings Press Release

## Attachment A

*Non-GAAP financial measures.* This press release includes financial information prepared in accordance with accounting principles generally accepted in the United States of America, or US GAAP, as well as other financial measures referred to as non-GAAP. The non-GAAP financial measures should be considered in addition to, but not as a substitute for, the information prepared in accordance with US GAAP.

*Operating Income Before Depreciation and Amortization (OIBDA) and OIBDA margin.* OIBDA represents operating income before depreciation and amortization. OIBDA margin is defined as OIBDA as a percentage of our net revenues. Our OIBDA may not be similar to OIBDA measures of other companies; is not a measurement under accounting principles generally accepted in the United States and should be considered in addition to, but not as a substitute for, the information contained in our consolidated statement of operations. We believe that OIBDA provides useful information to investors because it is an indicator of the strength and performance of our ongoing business operations, including our ability to fund discretionary spending such as capital expenditures, acquisitions of mobile operators and other investments and our ability to incur and service debt. While depreciation and amortization are considered operating costs under generally accepted accounting principles, these expenses primarily represent the non-cash current period allocation of costs associated with long-lived assets acquired or constructed in prior periods. Our OIBDA calculation is commonly used as one of the bases for investors, analysts and credit rating agencies to evaluate and compare the periodic and future operating performance and value of companies within the wireless telecommunications industry. OIBDA can be reconciled to our consolidated statements of operations as follows:

**Definitions**

*Subscriber.* We define a subscriber as an individual or organization whose account shows chargeable activity within sixty one days in the case of post-paid tariffs, or one hundred and eighty three days in the case of our pre-paid tariffs, or whose account does not have a negative balance for more than this period.

*Average monthly service revenue per subscriber (ARPU).* We calculate our ARPU by dividing our service revenues for a given period, including interconnect and guest roaming fees, by the average number of our subscribers during that period and dividing by the number of months in that period.

*Average monthly minutes of usage per subscriber (MOU).* MOU is calculated by dividing the total number of minutes of usage during a given period by the average number of our subscribers during the period and dividing by the number of months in that period.

*Churn.* We define our churn as the total number of subscribers who cease to be a subscriber as defined above during the period (whether involuntarily due to non-payment or voluntarily, at such subscriber's request), expressed as a percentage of the average number of our subscribers during that period.

*Subscriber acquisition cost (SAC).* We define SAC as total sales and marketing expenses and handset subsidies for a given period. Sales and marketing expenses include advertising expenses and commissions to dealers. SAC per gross additional subscriber is calculated by dividing SAC during a given period by the total number of gross subscribers added by us during the period.
