FIRST BUSEY CORPORATION and Subsidiaries

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1: Basis of Presentation

The accompanying unaudited consolidated interim financial statements of First Busey Corporation (the Company), a Nevada corporation, have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) for quarterly reports on Form 10-Q and do not include certain information and footnote disclosures required by U.S. generally accepted accounting principles (U.S. GAAP) for complete annual financial statements. Accordingly, these financial statements should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

The accompanying consolidated balance sheet as of December 31, 2009, which has been derived from audited financial statements, and the unaudited consolidated interim financial statements have been prepared in accordance with U.S. GAAP and reflect all adjustments that are, in the opinion of management, necessary for the fair presentation of the financial position and results of operations for the periods presented. All such adjustments are of a normal recurring nature. The results of operations for the six months ended June 30, 2010 are not necessarily indicative of the results that may be expected for the year ending December 31, 2010.

The consolidated financial statements include the accounts of the Company and its subsidiaries. All material intercompany transactions and balances have been eliminated in consolidation. Certain prior year amounts have been reclassified to conform to the current presentation with no effect on net income or stockholders' equity.

In preparing the accompanying consolidated financial statements, the Company's management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses for the reporting period. Actual results could differ from those estimates. Material estimates which are particularly susceptible to significant change in the near term relate to the fair value of investment securities, the determination of the allowance for loan losses, including valuation of real estate and related loan collateral, and valuation allowance on the deferred tax asset.

The Company has evaluated subsequent events for potential recognition and/or disclosure through the date the consolidated financial statements included in this Annual Report on Form 10-Q were issued. There were no significant subsequent events for the quarter ended June 30, 2010 through the date of these financial statements that warranted adjustment to or disclosure in the consolidated financial statement.

Note 2: Recent Accounting Pronouncements

FASB ASC Topic 310, Receivables: Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses. On July 21, 2010, new authoritative accounting guidance (Accounting Standards Update No. 2010-20) under ASC Topic 310 was issued which requires an entity to provide more information in their disclosures about the credit quality of their financing receivables and the credit reserves held against them. This statement addresses only disclosures and does not change recognition or measurement. The new authoritative accounting guidance under ASC Topic 310 will be effective for the Company's financial statements as of December 31, 2010, as it relates to

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

disclosures required as of the end of a reporting period. Disclosures that relate to activity during a reporting period will be required beginning on or after January 1, 2011.

FASB ASC Topic 815, Derivatives and Hedging. New authoritative accounting guidance (Accounting Standards Update No. 2010-11) under ASC Topic 815 clarifies that the only form of an embedded credit derivative that is exempt from embedded derivative bifurcation requirements are those that relate to the subordination of one financial instrument to another. Entities that have contracts containing an embedded credit derivative feature in a form other than such subordination may need to separately account for the embedded credit derivative feature. The provisions of Topic 815 will be effective for the Company on July 1, 2010 and are not expected to have a significant impact on the Company's financial statements.

FASB ASC Topic 820-10, Fair Value Measurements and Disclosures – Improving Disclosures About Fair Value Measurements. New authoritative accounting guidance (Accounting Standards Update No. 2010-06) in this update require new disclosures about significant transfers in and out of Level 1 and Level 2 fair value measurements. The amendments also require a reporting entity to provide information about activity for purchases, sales, issuances and settlements in Level 3 fair value measurements and clarify disclosures about the level of disaggregation and disclosures about inputs and valuation techniques. This update became effective for the Company for interim and annual reporting periods beginning after December 15, 2009 and did not have a significant impact on the Company's financial statements.

FASB ASC Topic 860, Transfers and Servicing – Accounting for Transfers of Financial Assets. New authoritative accounting guidance (Accounting Standards Update No. 2009-16) under ASC Topic 860 amends prior guidance to enhance reporting about transfers of financial assets, including securitizations, and where companies have continuing exposure to the risks related to transferred financial assets. ASC Topic 860 eliminates the concept of a qualifying special-purpose entity and changes the requirements for derecognizing financial assets. The provision became effective on January 1, 2010 and did not have a significant impact on the Company's financial statements.

Note 3: Securities

The amortized cost and fair values of securities classified available for sale are summarized as follows:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	(dollars in thousands)			
June 30, 2010:				
U.S. Treasury securities	\$ 708	\$ 72	\$	\$ 780

	552,853	14,074	(563)	566,364
Mutual funds and other equity securities	2,163	1,113		3,276
	\$ 555,016	\$ 15,187	\$ (563)	\$ 569,640

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

Gains and losses related to sales of securities are summarized as follows:

	Six Months Ended June 30, 2010		2009	
	(dollars in thousands)			
Gross security gains	\$	742	\$	90
Gross security losses				(15)
Net security gains	\$	742	\$	75

The following presents information pertaining to securities with gross unrealized losses as of June 30, 2010 and December 31, 2009, aggregated by investment category and length of time that individual securities have been in continuous loss position:

	Less than 12 months		Greater than 12 months		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
	(dollars in thousands)					
June 30, 2010:						
Obligations of states and political subdivisions	352	2	2,771	45	3,123	47
Mortgage-backed securities(1)	134				134	
Corporate debt securities	145	1			145	1
Total temporarily impaired securities	\$ 631	\$ 3	\$ 2,771	\$ 45	\$ 3,402	\$ 48

(1) Unrealized loss was less than one-thousand dollars.

	Less than 12 months		Greater than 12 months		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
	(dollars in thousands)					
December 31, 2009:						
Obligations of U.S. government agencies and corporations	\$ 53,357	\$ 394	\$	\$	\$ 53,357	\$ 394
Obligations of states and political subdivisions	5,772	24	5,759	139	11,531	163
Mortgage-backed securities	427	2			427	2
Corporate debt securities			96	4	96	4
Total temporarily impaired securities	\$ 59,556	\$ 420	\$ 5,855	\$ 143	\$ 65,411	\$ 563

The total number of investment securities in an unrealized loss position as of June 30, 2010 and December 31, 2009 was 11 and 42, respectively. The unrealized losses resulted from changes in market interest rates and liquidity, not from changes in the probability of receiving the contractual cash flows. The Company does not intend to sell the securities and it is not more-likely-than-not that the Company will be required to sell the securities prior to recovery of amortized cost. Full collection of the amounts due according to the contractual terms of the securities is expected; therefore, the Company does not consider these investments to be other-than-temporarily impaired at June 30, 2010.

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

Management evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to the length of time and extent to which the fair value has been less than cost, the financial condition and near-term prospects of the issuer, and whether we have the intent to sell the security and it is more likely than not we will have to sell the security before recovery of its cost basis.

The amortized cost and fair value of debt securities available for sale as of June 30, 2010, by contractual maturity, are shown below. Mutual funds and other equity securities do not have stated maturity dates and therefore are not included in the following maturity summary.

	Amortized Cost	Fair Value
	(dollars in thousands)	
Due in one year or less	\$ 81,406	\$ 82,365
Due after one year through five years	312,233	322,946
Due after five years through ten years	72,664	76,413
Due after ten years	74,549	77,668
	\$ 540,852	\$ 559,392

Investment securities with carrying amounts of \$369.9 million and \$400.3 million on June 30, 2010 and December 31, 2009, respectively, were pledged as collateral for public deposits, securities sold under agreements to repurchase and for other purposes as required or permitted by law.

Note 4: Loans

The major classifications of loans as of June 30, 2010 and December 31, 2009 were as follows:

	June 30, 2010	December 31, 2009
	(dollars in thousands)	
Commercial	\$ 373,714	\$ 390,358
Real estate construction	256,328	328,052
Real estate - farmland	63,362	62,049
Real estate - 1-4 family residential mortgage	627,470	657,738
Real estate - multifamily mortgage	267,113	276,303
Real estate - non-farm nonresidential mortgage	887,637	934,803
Installment	64,725	70,569
Agricultural	36,978	42,687
	\$ 2,577,327	\$ 2,762,559
Plus:		
Net deferred loan costs	980	1,111
	2,578,307	2,763,670
Less:		
Allowance for loan losses	92,129	100,179
Net loans	\$ 2,486,178	\$ 2,663,491

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

Geographic distribution of loans excluding loans held for sale and deferred loan fees, by call report category, is as follows:

	Illinois	June 30, 2010 Florida (dollars in thousands)	Indiana
Commercial	\$ 321,694	\$ 17,297	\$ 34,723
Real estate construction	169,229	45,021	42,078
Real estate - farmland	59,924	3,438	
Real estate - 1 to 4 family residential mortgage	471,394	141,092	14,984
Real estate - multifamily mortgage	260,199	2,116	4,798
Real estate - non-farm nonresidential mortgage	672,883	161,640	53,114
Installment	62,949	1,351	425
Agricultural	36,978		
Total	\$ 2,055,250	\$ 371,955	\$ 150,122

	Illinois	December 31, 2009 Florida (dollars in thousands)	Indiana
Commercial	\$ 339,410	\$ 15,246	\$ 35,702
Real estate construction	181,021	91,934	55,097
Real estate - farmland	57,703	4,346	
Real estate - 1 to 4 family residential mortgage	492,355	145,619	19,764
Real estate - multifamily mortgage	268,304	4,016	3,983
Real estate - non-farm nonresidential mortgage	713,688	165,522	55,593
Installment	68,474	1,660	435
Agricultural	42,687		
Total	\$ 2,163,642	\$ 428,343	\$ 170,574

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance for loan losses when management believes the uncollectibility of the loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectibility of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

Changes in the allowance for loan losses were as follows:

	Six Months Ended June 30,	
	2010	2009
	(dollars in thousands)	
Balance, beginning of year	\$ 100,179	\$ 98,671
Provision for loan losses	22,200	57,500
Recoveries applicable to loan balances previously charged off	12,695	1,032
Loan balances charged off	42,945	68,654
Balance, June 30	\$ 92,129	\$ 88,549

A loan is impaired when, based on current information and events, it is probable the Company will be unable to collect scheduled payments of principal and interest payments when due according to the terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loans and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis for commercial and construction loans by either the present value of the expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

Loans contractually past due in excess of 90 days and loans classified as non-accrual are summarized as follows:

	June 30, 2010	December 31, 2009
	(dollars in thousands)	
Total loans 90 days past due and still accruing		
Illinois	\$ 1,604	\$ 4,022
Indiana	27	
Florida	200	144
	1,831	4,166
Total non-accrual loans		
Illinois	\$ 36,812	\$ 24,009
Indiana	17,587	18,089
Florida	31,570	40,035
	85,969	82,133
Total non-performing loans	\$ 87,800	\$ 86,299

Impaired loan totals in the categories below are net of partial charge-offs taken against those loans during the year. The balance shown does not reflect the total amounts due from the customer. The following table presents data on impaired loans:

	June 30, 2010	December 31, 2009
	(dollars in thousands)	
Impaired loans for which a specific allowance has been provided	\$ 13,195	\$ 5,273
Impaired loans for which no specific allowance has been provided	127,499	127,669
Total loans determined to be impaired	\$ 140,694	\$ 132,942
Allowance for loan loss for impaired loans included in the allowance for loan losses	\$ 4,845	\$ 1,850

Note 5: Goodwill

Other than goodwill, the Company does not have any other intangible assets that are not amortized. Goodwill is subject to at least annual impairment assessments. The Company has established December 31 as the annual impairment assessment date. Goodwill is tested for impairment using a two-step process that begins with an estimation of the fair value of a reporting unit, which for the Company is each of our operating segments. The first step is a screen for potential impairment and the second step measures the amount of impairment, if any. The first step utilizes Level 2 inputs to establish the estimated fair value of the reporting unit, which are primarily valuations of comparable public companies and comparable public transaction multiples. Due to the current economic conditions, it is possible we will evaluate our goodwill for impairment on a more frequent basis than annually. Future evaluations may result in further impairment.

During 2009, the Company recorded a full impairment of the goodwill associated with its banking operations totaling \$208.2 million. The remaining goodwill on the balance sheet relates to FirsTech, our remittance processing subsidiary, and Busey Wealth Management.

The Company determined that an interim impairment test on goodwill was not required during the quarter ended June 30, 2010.

Note 6: Short-term Borrowings

The following table sets forth the distribution of short-term borrowings and weighted average interest rates at June 30, 2010. Securities sold under agreements to repurchase generally represent overnight borrowing transactions. Other short-term borrowings consist of notes with maturities of less than one year.

	Securities sold under agreements to repurchase		Other short-term borrowings
	(dollars in thousands)		
2010			
Balance, June 30, 2010	\$	135,554	\$ 4,000
Weighted average interest rate at end of period		0.40%	3.35%
Maximum outstanding at any month end	\$	137,592	\$ 4,000
Average daily balance	\$	133,435	\$ 22
Weighted average interest rate during period (1)		0.47%	27.50%

(1)The weighted average interest rate is computed by dividing total interest for the period by the average daily balance outstanding. The weighted average interest rate on other short-term borrowings is higher than expected due to unutilized line fees included in interest expense.

Note 7: Earnings Per Common Share

Net income (loss) per common share has been computed as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
	(in thousands, except per share data)			
Net income (loss) available to common shareholders	\$ 4,402	\$ (20,472)	\$ 7,337	\$ (14,966)
Shares:				
Weighted average common shares outstanding	66,361	35,816	66,361	35,816
Dilutive effect of outstanding options as determined by the application of the treasury stock method				
Weighted average common shares outstanding, as adjusted for diluted earnings per share calculation	66,361	35,816	66,361	35,816
Basic earnings (loss) per share	\$ 0.07	\$ (0.57)	\$ 0.11	\$ (0.42)
Diluted earnings (loss) per share	\$ 0.07	\$ (0.57)	\$ 0.11	\$ (0.42)

Basic earnings per share are computed by dividing net income available to common shareholders for the year by the weighted average number of shares outstanding.

Diluted earnings per share are determined by dividing net income available to common shareholders for the year by the weighted average number of shares of common stock and common stock equivalents outstanding. Common stock equivalents assume exercise of stock options and use of proceeds to purchase treasury stock at the average market price for the period. If the average market price for the period exceeds the strike price of a stock option, that option is considered anti-dilutive and is excluded from the calculation of common stock equivalents. The calculation of the diluted earnings per share for the three and six month periods ended June 30, 2010 and 2009 does not reflect the assumed exercise of potentially dilutive stock options because the effect would have been anti-dilutive due to the lower market price for the period. None of the Company's 1,521,518 outstanding options or 573,833 warrants were potentially dilutive for the three and six month periods ended June 30, 2010 and 2009.

Note 8: Stock-based Compensation

Under the terms of the Company's stock option plans, the Company is allowed, but not required, to source stock option exercises from its inventory of treasury stock. The Company has historically sourced stock option exercises from its treasury stock inventory, including exercises for the year ended December 31, 2009. As of June 30, 2010, under the Company's stock repurchase plan, 895,655 additional shares were authorized for repurchase. The repurchase plan has no expiration date and expires when the Company has repurchased all of the remaining authorized shares. However, because of First Busey's participation in Capital Purchase Program under the Troubled Asset Relief Program, it will not be permitted to repurchase any shares of its common stock, other than in connection with benefit plans consistent with past practice, until such time as the U.S. Department of the Treasury no longer holds any equity securities in the Company.

During the second quarter of 2010, the Company adopted the First Busey Corporation 2010 Equity Incentive Plan (2010 Equity Plan), which was approved at the annual stockholders meeting on May 19, 2010. The company will no longer make any additional grants under the prior plans. The prior plans include: the First Busey Corporation 1993 Restricted Stock Award Plan, the First Busey Corporation 1999 Stock Option Plan, the Main Street Trust, Inc. 2000 Stock Incentive Plan, and the First Busey Corporation 2004 Stock Option Plan.

The Company's equity incentive plans are designed to encourage ownership of our common stock by our employees and directors, to provide additional incentive for them to promote the success of our business, and to attract and retain talented personnel. All of our employees and directors and those of our subsidiaries are eligible to receive awards under the plans.

Subject to permitted adjustments for certain corporate transactions, the maximum number of shares that may be delivered to participants, or their beneficiaries, under the 2010 Equity Plan is 4,000,000 shares of First Busey common stock. To the extent that any shares of stock covered by an award (including stock awards) under the 2010 Equity Plan, or the prior plans, are not delivered for any reason, including because the award is forfeited, canceled, settled in cash or shares are withheld to satisfy tax withholding requirements, such shares will not be deemed to have been delivered for purposes of determining the maximum number of shares of stock available for delivery and will again become available for usage under the 2010 Equity Plan. With respect to stock appreciation rights, or SARs, that are settled in stock, only actual shares delivered shall be counted for purposes of these limitations. If any option granted under the 2010 Equity Plan is exercised by tendering shares of stock, only the number of shares of stock issued net of the shares of stock tendered shall be counted for purposes of these limitations.

The 2010 Equity Plan's effective date is May 19, 2010. The 2010 Equity Plan will continue in effect until terminated by the board of directors; provided that no awards may be granted under the 2010 Equity Plan after the ten-year anniversary of the effective date. Any awards that are outstanding after the tenth anniversary of the effective date will remain subject to the terms of the 2010 Equity Plan.

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

The following additional limits apply to awards under the 2010 Equity Plan:

- the maximum number of shares of stock that may be covered by options or SARs that are intended to be performance-based compensation which are granted to any one participant during any calendar year is 400,000 shares;
- the maximum number of shares of stock that may be covered by stock awards that are intended to be performance-based compensation which are granted to any one participant during any calendar year is 200,000 shares; and
- the maximum dollar amount of cash incentive awards or cash-settled stock awards intended to be performance-based compensation payable to any one participant with respect to any calendar year is \$1,000,000.

On June 22, 2010, the Company issued 67,500 stock options to First Busey Corporation's non-employee directors. The stock options have an exercise price of \$4.49, vest on June 1, 2011 and expire on June 1, 2021.

Number of options granted	67,500
Exercise Price	\$ 4.49
Estimated forfeiture rate	%
Risk-free interest rate	1.98%
Expected life, in years	4.9
Expected volatility	47.17%
Expected dividend yield	3.01%
Estimated fair value per option	\$ 1.48

Expected life and estimated forfeiture rate is based on historical exercise and termination behavior. Expected stock price volatility is based on historical volatility of the Company's common stock and correlates with the expected life of the options. The risk-free interest rate is based on the implied yield available on U.S. Treasury zero-coupon issues with a remaining term approximately equal to the expected life of the option. The expected dividend yield represents the annual dividend yield as of the date of grant. Management reviews and adjusts the assumptions used to calculate the fair value of an option as of each grant date to better reflect expected trends.

A summary of the status of and changes in the Company's stock option plans for the six months ended June 30, 2010 follows:

	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term
Outstanding at beginning of year	1,592,755	\$ 16.12	
Granted	67,500	4.49	

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

Exercised				
Forfeited	138,737		12.72	
Outstanding at end of period	1,521,518	\$	15.92	3.66
Exercisable at end of period	1,454,018	\$	16.80	3.73

As of June 30, 2010, the Company had an insignificant amount of unrecognized stock option expense. The Company recognized an insignificant amount of compensation expense related to stock options for the six months ended June 30, 2010.

The total intrinsic value of stock options exercised in the six months ended June 30, 2009 was insignificant.

Note 9: Income Taxes

At June 30, 2010, the Company was under examination by the Internal Revenue Service for tax years 2007 and 2008. Although not finalized, the Company has \$1.1 million accrued for anticipated adjustments, including interest, as a result of the examination.

The Company was also under examination by the Illinois Department of Revenue for 2007 and 2008 income tax filings and the Florida Department of Revenue for 2006, 2007 and 2008 Corporate income tax filings. Both state examinations are expected to be finalized in the third quarter.

Note 10: Outstanding Commitments and Contingent Liabilities*Legal Matters*

The Company and its subsidiaries are parties to legal actions which arise in the normal course of their business activities. In the opinion of management, the ultimate resolution of these matters is not expected to have a material effect on the financial position or the results of operations of the Company and its subsidiaries.

Credit Commitments and Contingencies

The Company and its subsidiaries are parties to credit related financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets.

The Company and its subsidiaries' exposure to credit loss are represented by the contractual amount of those commitments. The Company and its subsidiaries use the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments. A summary of the contractual amount of the Company's exposure to off-balance-sheet risk follows:

	June 30, 2010	December 31, 2009
	(dollars in thousands)	
Financial instruments whose contract amounts represent credit risk:		
Commitments to extend credit	\$ 516,677	\$ 544,589
Standby letters of credit	18,407	19,002

Commitments to extend credit are agreements to lend to a customer as long as no condition established in the contract has been violated. These commitments are generally at variable interest rates and generally have fixed expiration dates or other termination clauses and may require payment of a fee. The commitments for equity lines of credit may expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the customer.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer's obligation to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements, including bond financing and similar transactions and primarily have terms of one year or less. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Company holds collateral, which may include accounts receivable, inventory, property and equipment, and income producing properties, supporting those commitments if deemed necessary. In the event the customer does not perform in accordance with the terms of the agreement with the third party, the Company would be required to fund the commitment. The maximum potential amount of future payments the Company could be required to make is represented by the contractual amount shown in the summary above. If the commitment is funded, the Company would be entitled to seek recovery from the customer. As of June 30, 2010, and December 31, 2009, no amounts were recorded as liabilities for the Company's potential obligations under these guarantees.

As of June 30, 2010, the Company had no futures, forwards, swaps or option contracts, or other financial instruments with similar characteristics with the exception of rate lock commitments on mortgage loans to be held for sale.

Note 11: Reportable Segments and Related Information

Following the August 2009 merger of Busey Bank, N.A. into Busey Bank, the Company has three reportable segments, Busey Bank, FirsTech and Busey Wealth Management. Busey Bank provides a full range of banking services to individual and corporate customers through its branch network in downstate Illinois, through its branch in Indianapolis, Indiana, and through its branch network in southwest Florida. FirsTech provides remittance processing for online bill payments, lockbox and walk-in payments. Busey Wealth Management is the parent company of Busey Trust Company, which provides a full range of trust and investment management services, including estate and financial planning, securities brokerage, investment advice, tax preparation, custody services and philanthropic advisory services.

The Company's three reportable segments are strategic business units that are separately managed as they offer different products and services and have different marketing strategies.

The segment financial information provided below has been derived from the internal accounting system used by management to monitor and manage the financial performance of the Company. The accounting policies of the three segments are the same as those described in the summary of significant accounting policies in the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

Following is a summary of selected financial information for the Company's business segments:

	Goodwill		Total Assets	
	June 30, 2010 (dollars in thousands)	December 31, 2009 (dollars in thousands)	June 30, 2010 (dollars in thousands)	December 31, 2009 (dollars in thousands)
Goodwill & Total Assets:				
Busey Bank	\$	\$	\$ 3,651,592	\$ 3,766,612
FirsTech	8,992	8,992	23,820	23,294
Busey Wealth Management	11,694	11,694	25,899	24,731
All Other			(2,095)	215
Total Goodwill	\$ 20,686	\$ 20,686	\$ 3,699,216	\$ 3,814,852
	Three Months Ended June 30,		Six Months Ended June 30,	
	2010 (dollars in thousands)	2009 (dollars in thousands)	2010 (dollars in thousands)	2009 (dollars in thousands)
Interest Income:

Busey Wealth Management	959	717	1,858	1,279
All Other	(1,032)	(558)	(1,825)	(1,919)
Total Net Income (loss)	\$ 5,685	\$ (19,129)	\$ 9,902	\$ (13,236)

Note 12: Fair Value Measurements

The fair value of an asset or liability is the price that would be received to sell that asset or paid to transfer that liability in an orderly transaction occurring in the principal market (or most advantageous market in the absence of a principal market) for such asset or liability. In estimating fair value, the Company utilizes valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. Such valuation techniques are consistently applied. Inputs to valuation techniques include the assumptions that market participants would use in pricing an asset or liability. FASB ASC Topic 820 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.

Level 2 Inputs - Inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.

Level 3 Inputs - Unobservable inputs for determining the fair values of assets or liabilities that reflect the Company's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. These valuation methodologies were applied to those Company assets and liabilities that are carried at fair value, effective January 1, 2009. Prior to 2009, these valuation methodologies were applied to only financial assets and liabilities that were carried at fair value.

There were no transfers between levels during the quarter ended June 30, 2010.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair values are measured utilizing independent valuation techniques of identical or similar securities for which significant assumptions are derived primarily from or corroborated by observable data. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality, the Company's creditworthiness, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Company's valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. Furthermore, the reported fair value amounts have not been comprehensively revalued since the presentation dates and therefore, estimates of fair value after the balance sheet date may differ significantly from the amounts presented herein.

Securities Available for Sale. Securities classified as available for sale are reported at fair value utilizing level 1 and level 2 measurements. For corporate debt, mutual funds and equity securities, unadjusted quoted prices in active markets for identical assets are utilized to determine fair value at the measurement date and have been classified as level 1 in the ASC 820 fair value hierarchy. For all other securities, the Company obtains fair value measurements from an independent pricing service. The independent pricing service evaluations are based on market data. The independent pricing service utilizes evaluated pricing models that vary by asset class and incorporate available trade, bid and other market information and, for structured securities, cash flow and, when available, loan performance data. Because many fixed income securities do not trade on a daily basis, the independent pricing service evaluated pricing applications apply available information as applicable through processes such as benchmark curves, benchmarking of like securities, sector groupings, and matrix pricing, to prepare evaluations. In addition, the independent pricing service uses model processes, such as the Option Adjusted Spread model to assess interest rate impact and develop prepayment scenarios. The models and processes take into account market convention. For each asset class, a team of evaluators gathers information from market sources and integrates relevant credit information, perceived market movements and sector news into the evaluated pricing applications and models.

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

The market inputs that the independent pricing service normally seeks for evaluations of securities, listing in approximate order of priority, include: benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data including market research publications. The independent pricing service also monitors market indicators, industry and economic events. Information of this nature is a trigger to acquire further market data. For certain security types, additional inputs may be used, or some of the market inputs may not be applicable. Evaluators may prioritize inputs differently on any given day for any security based on market conditions, and not all inputs listed are available for use in the evaluation process for each security evaluation on a given day. Because the data utilized was observable, the securities have been classified as level 2 in the ASC 820 fair value hierarchy.

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of June 30, 2010 and December 31, 2009, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
	(dollars in thousands)			
June 30, 2010				
Securities available-for-sale:				
U.S. Treasury	\$	\$ 780	\$	\$ 780
U.S. government agencies and corporations		365,129		365,129
Obligations of states and political subdivisions		80,302		80,302
Mortgage-backed		111,328		111,328
Corporate debt securities	1,853			1,853
Mutual funds and other equity	3,586			3,586
	\$ 5,439	\$ 557,539	\$	\$ 562,978
December 31, 2009				
Securities available-for-sale:				
U.S. Treasury	\$	\$ 782	\$	\$ 782
U.S. government agencies and corporations		346,030		346,030
Obligations of states and political subdivisions		82,546		82,546
Mortgage-backed		135,285		135,285
Corporate debt	1,721			1,721
Mutual funds and other equity	3,276			3,276
	\$ 4,997	\$ 564,643	\$	\$ 569,640

Certain financial assets and financial liabilities are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment).

Impaired Loans. The Company does not record impaired loans at fair value on a recurring basis. However, periodically, a loan is considered impaired and is reported at the fair value of the underlying collateral, less estimated costs to sell, if repayment is expected solely from the collateral. Impaired loans measured at fair value typically consist of loans on non-accrual status and restructured loans in compliance with modified terms. Collateral values are estimated using a combination of observable inputs, including recent appraisals and unobservable inputs based on customized discounting criteria. Due to the significance of the unobservable inputs, all impaired loan fair values have been classified as level 3 in the ASC 820 fair value hierarchy.

Non-financial assets and non-financial liabilities measured at fair value include foreclosed assets (upon initial recognition or subsequent impairment). Foreclosed assets are measured using a combination of observable inputs, including recent appraisals and unobservable inputs

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

based on customized discounting criteria. Due to the significance of the unobservable inputs, all foreclosed asset fair values have been classified as level 3 in the ASC 820 fair value hierarchy.

The following table summarizes financial assets and financial liabilities measured at fair value on a non-recurring basis as of

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

June 30, 2010 and December 31, 2009, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
(dollars in thousands)				
June 30, 2010				
Impaired loans	\$	\$	\$ 135,849	\$ 135,849
Foreclosed assets			14,299	14,299
December 31, 2009				
Impaired loans	\$	\$	\$ 131,092	\$ 131,092
Foreclosed assets			17,241	17,241

FASB ASC Topic 825 requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis. A detailed description of the valuation methodologies used in estimating the fair value of financial instruments is set forth in the 2009 Form 10-K.

The estimated fair values of financial instruments were as follows:

	June 30, 2010		December 31, 2009	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
(dollars in thousands)				
Financial assets:				
Securities	562,978	562,978	569,640	569,640
Loans held for sale	41,223	42,139	29,153	29,736
Loans, net	2,486,178	2,515,972	2,663,491	2,697,857
Accrued interest receivable	14,103	14,103	15,286	15,286
Financial liabilities:				
Deposits	3,080,481	3,092,750	3,171,080	3,182,759
Securities sold under agreements to repurchase	135,554	135,554	142,325	142,341
Short-term borrowings	4,000	4,000		
Long-term debt	58,076	60,610	82,076	84,869
Junior subordinated debt owed to unconsolidated trusts	55,000	53,981	55,000	53,375
Accrued interest payable	5,822	5,822	8,091	8,091

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following is management's discussion and analysis of the financial condition of First Busey Corporation and subsidiaries (referred to herein as First Busey, Company, we, or our) at June 30, 2010 (unaudited), as compared with December 31, 2009, and the results of operations for the three and six months ended June 30, 2010 and 2009 (unaudited). Management's discussion and analysis should be read in conjunction with First Busey's consolidated financial statements and notes thereto appearing elsewhere in this quarterly report, as well as our 2009 Annual Report on Form 10-K.

EXECUTIVE SUMMARY

Operating Results

We were profitable in the second quarter of 2010:

- Net income was \$5.7 million for the quarter ended June 30, 2010 compared to a loss of \$19.1 million for the quarter ended June 30, 2009.
- Net income was \$9.9 million for the six months ended June 30, 2010 compared to a loss of \$13.2 million for the six months ended June 30, 2009.
- Income available to common shareholders (net of TARP dividends and discount accretion) for the quarter ended June 30, 2010 was \$4.4 million, or \$0.07 per fully-diluted common share, compared to a loss of \$20.5 million, or \$0.57 per fully-diluted common share, for the quarter ended June 30, 2009.
- Income available to common shareholders (net of TARP dividends and discount accretion) for the six months ended June 30, 2010 was \$7.3 million, or \$0.11 per fully-diluted common share, compared to a loss of \$15.0 million, or \$0.42 per fully-diluted common share, for the six months ended June 30, 2009.
- Pre-provision, pre-tax net income was \$15.8 million for the second quarter of 2010 compared to \$15.8 million for the quarter ended June 30, 2009.
- Net interest margin increased to 3.49% for the second quarter of 2010 as compared to 2.93% for the second quarter of 2009. The net interest margin for the first six months of 2010 was 3.50% as compared to 2.91% in the same period of 2009.
- Our efficiency ratio (a measurement that roughly shows the percentage cost of each dollar of revenue) for the quarter ended June 30, 2010 decreased to 60.56% as compared to 62.61% for the quarter ended June 30, 2009.
- Total revenue, net of interest expense and security gains, for the second quarter of 2010 was \$43.5 million compared to \$45.9 million for the second quarter of 2009.

Pre-provision, Pre-tax Non-GAAP Reconciliation

The following pre-provision, pre-tax (PPPT) non-GAAP reconciliation presents our adjusted PPPT income after items we consider to be either non-recurring or non-persistent, as they were significantly higher or due to the significant economic challenges in 2010 and 2009. While certain of these items are non-recurring in nature, such as bank owned life insurance settlement, others will continue to occur, but we do not expect them to be at the same levels in future years as the were in 2010 or 2009.

	2010 YTD	Three Months Ended 2010	
	Total	June 30	March 31
(dollars in thousands)			
Pre-tax, Pre-Provision Profit, GAAP Basis	\$ 35,923	\$ 15,837	\$ 20,086
Reconciling income items:			
Bank owned life insurance income adjustment	(300)		(300)
Investments in private equity funds	81	281	(200)
Security gains/ losses	(742)		(742)
Reconciling expense items:			
OREO expenses	1,285	1,031	254
Other vendor related expenses	700	700	
Adjusted pre-provision, pre-tax profit	\$ 36,947	\$ 17,849	\$ 19,098

	2009 YTD	Three Months Ended 2009	
	Total	June 30	March 31
Pre-tax, Pre-Provision Profit , GAAP Basis	\$ 36,165	\$ 15,770	\$ 17,806
Reconciling income items:			
Bank owned life insurance settlement	(2,021)		(2,021)
Investments in private equity funds	(600)	(1,000)	400
Security gains/ losses	(75)	(54)	(21)
Other	(1,252)		
Reconciling expense items:			
FDIC Assessment	2,200	2,800	(600)
Employee related costs	33		33
OREO expenses	1,119	1,009	110
Non-accrual prior quarter interest reversals	320	320	
Adjusted pre-provision, pre-tax profit	\$ 34,552	\$ 18,845	\$ 15,707

Asset Quality

Our credit metrics at June 30, 2010 were generally flat compared to December 31, 2009 levels, but remained significantly better than levels at September 30, 2009, when we believe that our non-performing assets peaked. We expect gradual improvement in these credit metrics throughout 2010 depending on market specific economic conditions. The key metrics are as follows:

- Loans 30-89 days past due increased slightly to \$14.6 million at June 30, 2010 from \$12.5 million at December 31, 2009, but have declined significantly from \$34.0 million at September 30, 2009.
- Non-performing loans increased slightly to \$87.8 million at June 30, 2010 from \$86.3 million at December 31, 2009, but have declined significantly from \$172.5 million at September 30, 2009.
- Illinois non-performing loans increased to \$38.4 million at June 30, 2010 up from \$28.0 million at December 31, 2009 but have declined from \$42.8 million at September 30, 2009.
- Florida non-performing loans decreased to \$31.8 million at June 30, 2010 from \$40.2 million at December 31, 2009 and \$113.3 million at September 30, 2009.
- Indiana non-performing loans decreased to \$17.6 million at June 30, 2010 from \$18.1 million at December 31, 2009, but have increased slightly from \$16.4 million at September 30, 2009.
- Other real estate owned decreased to \$14.3 million at June 30, 2010 from \$17.2 million at December 31, 2009 and \$16.6 million at September 30, 2009.
- The ratio of non-performing assets to total loans plus other real estate owned increased slightly to 3.88% at June 30, 2010 from 3.68% at December 31, 2009, but was significantly below the 6.26% ratio at September 30, 2009.
- Allowance for loan losses to non-performing loan ratio was 104.9% at June 30, 2010, which was a decrease from 116.1% at December 31, 2009, but significantly higher than the 69.6% at September 30, 2009.
- Allowance for loan losses to total loans was 3.52% at June 30, 2010 down from 3.59% at December 31, 2009 and 4.00% at September 30, 2009.

As noted above, we continue to believe the peak of our non-performing assets occurred in the quarter ended September 30, 2009. We expect continued gradual improvement in our credit metrics, subject to market specific economic conditions, as we believe we have identified the risks within our loan portfolio. We are actively working to resolve our credit issues through borrower workouts, appropriate fair value valuations and loan sales depending on a credit by credit evaluation. We sold a significant amount of loans in the fourth quarter of 2009, but year-to-date 2010 loan sales have been, and future loans sales are expected to be, less significant.

Economic Conditions of Markets

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

Overall, all of our markets appear to have stabilized. Our Illinois markets continue to perform well, despite an increase in non-performing loans. The primary area of our credit challenges within Illinois are subdivision projects, hotels and retail space. On a percentage of loan basis, our credit challenges remain within our Indianapolis and southwest Florida markets.

The Illinois markets possess strong industrial, academic and healthcare employment bases that have performed well relative to the rest of the United States. Our primary downstate Illinois markets of Champaign, Macon, McLean and Peoria counties are anchored by several strong, familiar and stable organizations.

Champaign County is home to the University of Illinois – Urbana/Champaign (U of I), the University’s primary campus. U of I has in excess of 42,000 students, and has grown annually over the last decade. Additionally, Champaign County healthcare providers serve a significant area of downstate Illinois and western Indiana. Macon County is home to Archer Daniels Midland (ADM), a Fortune 100 company and one of the largest agricultural processors in the world. ADM’s presence in Macon County supports many derivative businesses in the agricultural processing arena. Additionally, Macon County is home to Millikin University, and its healthcare providers serve a significant role in the market. McLean County is home to State Farm, Country Financial, Illinois State University and Illinois Wesleyan University. State Farm, a Fortune 100 company, is the largest employer in McLean County, and Country Financial and the universities provide additional stability to a growing area of downstate Illinois. Peoria County is home to Caterpillar, a Fortune 100 company, and Bradley University in addition to a large health care presence serving much of the western portion of downstate Illinois. The institutions noted above, coupled with over \$1.5 billion in agricultural output, anchor the communities in which they are located, and have provided a comparatively stable foundation for housing, employment and small business.

Southwest Florida has shown signs of stabilization and small signs of improvement in areas such as unemployment and home sales. During 2010, in some areas of our Florida market, unemployment percentages decreased and mean home sales prices began to rise for the first time in years. However, we expect it will take southwest Florida a number of years to return to the economic strength it demonstrated just a few years ago.

EARNINGS PERFORMANCE

NET INTEREST INCOME

Net interest income is the difference between interest income and fees earned on earning assets and interest expense incurred on interest-bearing liabilities. Interest rate levels and volume fluctuations within earning assets and interest-bearing liabilities impact net interest income. Net interest margin is tax-equivalent net interest income as a percentage of average earning assets.

Certain assets with tax favorable treatment are evaluated on a tax-equivalent basis. Tax-equivalent basis assumes a federal income tax rate of 35%. Tax favorable assets generally have lower contractual pre-tax yields than fully taxable assets. A tax-equivalent analysis is performed by adding the tax savings to the earnings on tax favorable assets. After factoring in the tax favorable effects of these assets, the yields may be more appropriately evaluated against alternative earning assets. In addition to yield, various other risks are factored into the evaluation process.

The following table shows the consolidated average balance sheets, detailing the major categories of assets and liabilities, the interest income earned on interest-earning assets, the interest expense paid for the interest-bearing liabilities, and the related interest rates for the periods, or as of the dates, shown. All average information is provided on a daily average basis.

(1) On a tax-equivalent basis assuming a federal income tax rate of 35% for 2010 and 2009

(2) Non-accrual loans have been included in average loans, net of unearned interest.

Volume

The decrease in average earning assets and interest-bearing liabilities for the three and six month periods ended June 30, 2010 as compared to the same periods of 2009 was primarily related to the significant charge-off and loan sale activity in the second half of 2009 and continued soft demand for new loans. As we reduced our interest-earning assets, we were able to allow interest bearing liabilities to run-off where appropriate for the organization. The focus of the interest bearing liability run-off was in noncore funding such as price sensitive time deposits, brokered certificates of deposit and borrowings. We expect average loans and interest-bearing liabilities to continue to decline as we continue to reduce our non-performing loans.

Rate

The overall yield on interest-earning assets declined in the three and six month periods ended June 30, 2010 as compared to the same periods of 2009. The decrease in yield was largely due to the low yield environment for investment securities combined with an increase in liquidity, which is held at very low rates. Overall yields in the investment portfolio are trending down as reinvestment rates are significantly lower than the rates on most maturing investments. Our yield on loans improved primarily through rising rates on performing loans, which was primarily attributable to our bankers instituting interest rate floors on many of our loans through the renewal process.

Conversely, non-accrual loans negatively affect loan yields, which have a greater effect on our overall yield on earning assets due to the relative size of our loan portfolio. As a loan is placed on non-accrual status, it stops accruing interest. Additionally, any interest that has accrued on the loan but has not yet been paid is reversed.

Our interest-bearing liability rates declined across all deposit categories for the three and six month periods ended June 30, 2010 as compared to the same periods of 2009. Rates on interest bearing deposits continued to trend down; however, the downward trend is slowing as compared to prior quarters.

Net interest margin

In the prior five quarters, the decline in rates paid on interest-bearing liabilities has more than offset the decline in yield on earnings assets, which led to an increase in our net interest margin percentage. During the second quarter of 2010, the decline in the volume of our loan portfolio caused a decline in our net interest margin as we were not able to reinvest those asset dollars in similar yield investments and we were not able to reduce higher interest-bearing liabilities at the same pace as the loan decline.

Quarterly net interest margins for the last two years are as follows:

	2010	2009	2008
First Quarter	3.52%	2.89%	3.47%
Second Quarter	3.49%	2.93%	3.46%
Third Quarter		3.03%	3.34%
Fourth Quarter		3.34%	3.04%

While we remain committed to growth over the long term, we expect contraction in the balance sheet through at least the next quarter. While we do not expect a significant decline in our net interest margin, balance sheet contraction will likely reduce our net interest income. Any margin

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

change will be driven by our ability to increase the yield on our earning assets and the run-off of higher interest-bearing liabilities. We expect our growth to be gradual and likely driven by core deposit funding. We anticipate any loan growth to be accretive to both net interest income and net interest margin.

Management attempts to mitigate the effects of an unpredictable interest-rate environment through effective portfolio management, prudent loan underwriting and operational efficiencies. Please refer to the Notes to Consolidated Financial Statement in our 2009 10-K for accounting policies underlying the recognition of interest income and expense.

OTHER INCOME

	Three Months Ended June 30,			Six Months Ended June 30,		
	2010	2009	% Change (dollars in thousands)	2010	2009	% Change
Remittance processing	\$ 2,233	\$ 3,381	(34.0)%	\$ 4,853	\$ 6,635	(26.9)%
Trust	3,435	3,348	2.6%	7,645	6,553	16.7%
Commissions and brokers fees, net	471	428	10.0%	911	947	(3.8)%
Service charges on deposit accounts	2,728	3,101	(12.0)%	5,461	5,959	(8.4)%
Other service charges & fees	1,293	1,191	8.6%	2,503	2,330	7.4%
Gain on sales of loans	3,442	3,715	(7.3)%	5,880	6,133	(4.1)%
Security gains, net		54	NM	742	75	NM
Other operating income	802	2,282	(64.9)%	2,703	4,989	(45.8)%
Total other income	\$ 14,404	\$ 17,500	(17.7)%	\$ 30,698	\$ 33,621	(8.7)%

Remittance payment processing revenue relates to our payment processing company, FirsTech. FirsTech's revenue was down for the three and six month periods ended June 30, 2010 as compared to the same periods of 2009 due to the reduced activity by a significant cellular phone customer. As we discussed in our 2009 Form 10-K under "Risk Factors", this decrease was expected. We do not expect further significant decline in FirsTech's revenue going forward.

Combined wealth management revenue, trust and commissions and brokers' fees, net, increased for the three and six month periods ended June 30, 2010 as compared to same periods in 2009. The increase was led by increased confidence in the securities markets, which increased assets under management and activity. Assets under management averaged \$3.4 billion for the first six months of 2010 as compared to \$3.1 billion for the first six months of 2009. Additionally, revenue in our commissions and brokers' fees, net, increased for the three months ended June 30, 2010 as compared to the same period in 2009, which was the first increase in multiple quarters as our efforts to refocus our brokerage business line begin to take hold.

Overall, service charges and loan gains decreased for the three and six month periods ended June 30, 2010 as compared to the same periods in 2009. We have experienced a decline in service charge income as overall economic activity has declined and not recovered. Additionally, new regulations regarding certain charges on deposit accounts may negatively impact the revenue derived from charges on deposit accounts going forward. Gain on sales of loans is tied to mortgage rates to an extent. Mortgage interest rates have been very low for a sustained period. While mortgage rates remain low as compared to long term historical levels, home sales remain slow as compared to recent history and refinancing activity has slowed.

Other income for the three and six month periods ended June 30, 2010 decreased significantly as compared to the same periods in 2009. The second quarter decrease was primarily due to a loss on an investment in a private equity fund of \$0.3 million as compared to a gain of \$1.0 million in the second quarter of 2009. In the first quarter of 2009, a partial settlement of post retirement obligations relating to our bank owned life insurance resulted in a \$2.0 million, non-taxable, credit to other operating income. During the first quarter of 2010, we had an additional \$0.3 million of income related to our bank owned life insurance that we characterize as nonrecurring.

	31.8%	39.7%		27.8%	44.7%	
Efficiency ratio						
	60.6%	62.6%		57.1%	59.4%	

Total compensation expense decreased 6.9% as full-time equivalent employees decreased to 869 at June 30, 2010 from 901 one year earlier, a 3.6% decrease and we closed 11 banking centers, most of which occurred in the second quarter of 2009. The reduction in compensation expense was largely due the reduction in our branch footprint.

Additionally, occupancy expenses, and furniture and equipment expenses decreased as we reduced our branch footprint by 11 banking centers, mostly during the second quarter of 2009. We continue to evaluate our branch footprint for efficiencies in expenses and improvements in service delivery to our customers.

Regulatory expense decreased significantly during the second quarter of 2010 as compared to the second quarter of 2009 due to the special assessment of \$2.8 million in the second quarter of 2009. Overall, FDIC insurance has increased across the industry.

Other operating expenses increased for the three and six month periods primarily due to increased expenses related to collection and preservation of collateral, including legal expenses related to loan workouts and foreclosures. Additionally, we had increased vendor related costs of \$0.7 million in the second quarter of 2010 that are not expected to reoccur. OREO expenses were higher than expected but were essentially flat for the three and six months periods ended June 30, 2010 and 2009.

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

The effective rate on income taxes, or income taxes divided by income before taxes, was significantly lower than the statutory rate of approximately 40% due to fairly stable amounts of tax preferred interest income, such as municipal bond interest and bank owned life insurance income, accounting for a greater portion of our taxable income. As taxable income increases, we expect our effective tax rate to increase. If we are in a taxable loss position, as was the case in the 2009 periods presented, our effective rate will be higher than statutory rates due to the tax preferred interest income noted above.

The efficiency ratio is total other expense, less amortization charges, as a percentage of tax equivalent net-interest income plus other income, less security gains and losses. The efficiency ratio for the three and six month periods ended June 30, 2010 decreased over the comparable periods in 2009. The primary reason for the decrease was the increase in net interest income and decrease in expenses, as noted above, partially offset by declining non-interest income. Significant improvements, resulting in a lower efficiency ratio, will be driven by improvement in our net interest margin and non-interest income as opposed to further reductions in costs.

FINANCIAL CONDITION

SIGNIFICANT BALANCE SHEET ITEMS

	June 30, 2010	December 31, 2009	% Change
(dollars in thousands)			
Assets			
Securities available for sale	\$ 562,978	\$ 569,640	(1.2)%

Stockholders equity	\$ 333,256	\$ 328,128	1.6%

First Busey's balance sheet at June 30, 2010 remained fairly consistent with its balance sheet at December 31, 2009.

Net loans, including loans held for sale, declined by \$165.2 million, of which net charge-offs of loan balances at June 30, 2010 were \$30.3 million. The remaining decline in loan balances was primarily due to customers refinancing loans elsewhere. We expect our loan balances to continue to decrease in the third quarter of 2010 due to our efforts to reduce our non-performing loans and our potential problem loans.

Liabilities decreased \$120.8 million during the first half of 2010, which was primarily due to the decline in our asset base. As our loan and security balances declined, we were able to allow high cost funding to mature without replacement. Interest-bearing deposits declined by \$60.8 million and long-term debt declined by \$24.0 million.

Stockholder's equity increased slightly as our second quarter results are a continuance of our gradual improvement theme and an increase in our unrealized gains within our investment portfolio.

ASSET QUALITY**NON-PERFORMING LOANS & ALLOWANCE SUMMARY**

	June 30, 2010	March 31, 2010	December 31, 2009	September 30, 2009

Non-performing loans and non-performing other assets to loans, before allowance for loan losses	3.9%	4.4%	3.7%	6.2%

Asset quality by general loan classification between commercial loans (including most real estate loans, except for 1-4 family mortgages, and commercial and industrial loans) and retail loans (including 1-4 family mortgages), and geography is presented in the following table as of June 30, 2010. Loans on non-accrual status are presented. Following loans on non-accrual status is information related to loans on non-accrual status, including amounts charged off through June 30, 2010, including 2010 and prior periods, and specific allocations of the allowance for loan losses (ALL) related to these loans. Last, information related to our loans 90+ days past due, but still accruing interest, are also presented.

The following table sets forth information concerning non-performing loans at June 30, 2010:

	Balance	Illinois	Indiana	Florida	Commercial and Commercial Real Estate	Retail and Consumer
	(dollars in thousands)					
Non-accrual loans	\$ 85,969	\$ 36,812	\$ 17,587	\$ 31,570	\$ 71,362	\$ 14,607
Charge offs on non-accrual loans	\$ 52,219	\$ 19,617	\$ 11,410	\$ 21,192	\$ 44,583	\$ 7,636

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

Specific allocation of ALL	\$	2,200	\$	1,150	\$	850	\$	200	\$	2,200	\$	
90+ days past due	\$	1,831	\$	1,604	\$	27	\$	200	\$	157	\$	1,674

Our allowance for loan losses (ALL) decreased to \$92.1 million or 3.52% of loans at June 30, 2010, not including loans held for sale, from \$100.2 million or 3.59% of loans at December 31, 2009. The total specific allocation of loan losses was \$4.8 million at June 30, 2010, of which \$2.2 million related to loans on nonaccrual. The remaining specific reserves relate to loans on accrual, but determined to be impaired.

First Busey does not originate or hold any Alt-A or subprime loans or investments.

The Company's allowance for loan losses has two components, a component based upon probable but unidentified losses inherent in our loan portfolio and a component based upon individual review of nonperforming, substandard or other loans identified as at risk for loss. Our impaired loans, as defined by accounting and regulatory guidance, which consist of nonaccrual loans, 90+ days past due loans and loans determined to be impaired for another reason such as those classified as troubled debt restructurings, are evaluated for probable loss on an individual basis. Following regular evaluation, at least quarterly, the loans are either charged down to their individual fair values or allocated specific amounts within the ALL.

Impaired loans are reported at the fair value of the underlying collateral, less estimated costs to sell, if repayment is expected solely from the collateral. Collateral values are estimated using a combination of observable inputs, including recent appraisals discounted for collateral specific changes and current market conditions and unobservable inputs based on customized discounting criteria. Due to the significant and rapid decline in real estate valuations in southwest Florida, valuations of collateral in this market are largely based upon current market conditions and unobservable inputs, which typically indicate a value less than appraised value.

As nonperforming loans are charged down to their fair values, no further allocation of the ALL is required for those loans, thus resulting in a decrease in the overall balance of the ALL attributable to these loans. Our experience shows that it takes some time for nonperforming loans to get worked out of the loan portfolio and into foreclosure, or be refinanced out of the bank. As the rate of new nonperforming loans slows and existing nonperforming loans are written down to fair value with specific write-downs, we expect to have a reduction in the component of our internally calculated ALL that relates to nonperforming loans, and the ratio of the total ALL to nonperforming loans should decline. Additionally, if non-performing loans are sold at less than estimated fair value, the loss will be accounted for as a reduction to the allowance for loan losses.

Probable but unidentified losses inherent in our portfolio are estimated through a combination of quantitative and qualitative factors. Quantitative factors primarily relate to the Company's historical loss experience. Qualitative factors include general macro and micro economic factors in the Company's markets, including economic conditions throughout the Midwest and southwest Florida, and in particular, the state of certain industries. Additional qualitative factors include portfolio composition, charge-off and delinquency trends, management and staff composition, loan review results, weighted loan grading, specific industry economics and internal and external audit results.

Our net charge-offs declined from the levels experienced during 2009. As a portion of our reserve requirement is based upon historical charge-offs, the lesser amount of charge-offs in the first and second quarters of 2010 replaced quarters with significantly higher charge-offs in the historical data, causing the historical average charge-off result to decline. The decreased levels of charge-offs and delinquency trends, have led to a slight decrease in the reserve requirement. Additionally, we adjusted the factor applied to our special mention and substandard still-accruing portfolio to reflect current expectations of loss within these classifications. The current expectation of loss is less at June 30, 2010 than at December 31, 2009 as the geographical make-up of these classifications shifted to be less heavily concentrated in southwest Florida. The loss expectations for Indiana and Illinois are less than southwest Florida as real estate values have not experienced the same level of decline.

During 2009, we added qualitative factors for the weighted grading of our loan portfolio and a specific factor related to our non-substandard hotel industry loans, which were \$81.9 million at June 30, 2010. The weighted grading of our loan portfolio has deteriorated due to the challenging economic conditions. We believe this trend warranted inclusion in our qualitative factors as the risk of default generally increases as the loan grade deteriorates. During 2009, we noted the hotel industry faced significant challenges regardless of market. We continue to place a specific qualitative factor related to the hotel industry on our non-substandard hotel industry loans due to the risk inherent in this industry.

The southwest Florida market's overall economic condition deteriorated rapidly during 2008 and did not improve significantly in 2009 or the first half of 2010. The rapid deterioration of the market led to a substantial qualitative portion of our allowance for loan losses attributable to the uncertainty of southwest Florida market in 2008 and into 2009. Although the uncertainty has yet to subside for the southwest Florida market, as

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

we increase the number and amount of loans within our southwest Florida loan portfolio that are reviewed individually for impairment, the need for the significant qualitative allocation to the southwest Florida market has declined due to the decrease in the performing portion of our southwest Florida loan portfolio. The qualitative factor for southwest Florida is still a significant factor and has not declined from the December 31, 2009 levels.

Overall, our qualitative factors decreased slightly primarily due to the reduction of our loan portfolio in southwest Florida and the stabilization of the inflow of impaired loans. The lone decrease related to the historical trend of our charge-offs, which has improved as noted previously.

With few insignificant exceptions, our loan portfolio is collateralized primarily by real estate. Typically, when we move loans into nonaccrual status, the loans are collateral dependent and charged down to the fair value of our interest in the underlying collateral.

We continue to attempt to identify problem loan situations on a proactive basis. Once problem loans are identified, adjustments to the provision are made based upon all information available at that time. The provision reflects management's analysis of additional allowance for loan losses necessary to cover probable losses in our loan portfolios.

Management believes the level of the allowance and coverage of non-performing loans to be appropriate based upon the information available. However, additional losses may be identified in our loan portfolio as new information is obtained. We may need to provide for additional loan losses in the future as management continues to identify potential problem loans and gain further information concerning existing problem loans, particularly in the southwest Florida market.

Potential Problem Loans

Potential problem loans are loans classified as substandard that are not categorized as impaired, restructured, non-accrual or 90-days past due, but where current information indicates that the borrower may not be able to comply with present loan repayment terms. Management assesses the potential for loss on these loans as it would with other substandard loans in the allowance for loan loss calculation and has considered the effect of any potential loss in determining its provision for probable loan losses. Potential problem loans totaled \$157.9 million at June 30, 2010 and \$127.7 million at December 31, 2009. Management continues to monitor these credits and anticipates that restructure, guarantee, additional collateral or other planned action will result in full repayment of the debts. Management has identified no other loans that represent or result from trends or uncertainties which management reasonably expects will materially impact future operating results, liquidity or capital resources. As of June 30, 2010, management was not aware of any information about any other credits which cause management to have serious doubts as to the ability of such borrower(s) to comply with the loan repayment terms.

Restructured Loans

We restructure loans for our customers who appear to be able to meet the terms of their loan over the long-term, but who may be unable to meet the terms of the loan in the near term due to individual circumstances. We consider the customer's past performance, previous and current credit history, the individual circumstances surrounding the current difficulties and their plan to meet the terms of the loan in the future prior to restructuring the terms of the loan. Generally, loans are restructured through short-term interest-rate relief, short-term principal payment relief or short-term principal and interest payment relief. Once a restructured loan has gone 90+ days past due or is placed on non-accrual status, it is included in the non-performing loan totals above.

	June 30, 2010	December 31, 2009
	(dollars in thousands)	
Restructured loans:		
In compliance with modified terms	\$ 42,294	\$ 29,754
30 - 89 days past due	793	787
Included in non-performing loans	8,027	9,370
Total	\$ 51,114	\$ 39,911

All restructured loans are considered to be impaired for purposes of assessing the adequacy of the allowance for loan losses and for financial reporting purposes with specific reserves determined based upon the deficiency in cash flows.

LIQUIDITY

Liquidity management is the process by which we ensure that adequate liquid funds are available to meet the present and future cash flow obligations arising in the daily operations of the business. These financial obligations consist of needs for funds to meet commitments to borrowers for extensions of credit, funding capital expenditures, withdrawals by customers, maintaining deposit reserve requirements, servicing debt, paying dividends to stockholders and paying operating expenses.

Our most liquid assets are cash and due from banks, interest-bearing bank deposits, and federal funds sold. The balances of these assets are dependent on the Company's operating, investing, lending and financing activities during any given period.

First Busey's primary sources of funds consist of deposits, investment maturities and sales, loan principal repayments, and capital funds. Additional liquidity is provided by bank lines of credit, repurchase agreements, the ability to borrow from the Federal Reserve Bank and the Federal Home Loan Bank, and brokered deposits. We have an operating line in the amount of \$20.0 million, of which \$16.0 million was available as of June 30, 2010. Management intends to satisfy long-term liquidity needs primarily through retention of capital funds.

Based upon the level of investment securities that reprice within 30 days and 90 days, management currently believes that adequate liquidity exists to meet all projected cash flow obligations. We seek to achieve a satisfactory degree of liquidity through actively managing both assets and liabilities. Asset management guides the proportion of liquid assets to total assets, while liability management monitors future funding requirements and prices liabilities accordingly.

CAPITAL RESOURCES

First Busey and Busey Bank are subject to regulatory capital requirements administered by federal and state banking agencies. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, First Busey and Busey Bank meet specific capital guidelines that involve the quantitative measure of their assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. Quantitative measures established by regulation to ensure capital adequacy require First Busey and Busey Bank to maintain minimum amounts and ratios (set forth in the table below) of total and Tier I capital (as defined in the regulations) to risk-weighted assets (as defined), and Tier I capital (as defined) to average assets (as defined). Failure to meet minimum capital requirements may cause regulatory bodies to initiate certain discretionary and/or mandatory actions that, if undertaken, may have a direct material effect on our financial statements. We believe, as of June 30, 2010, that First Busey and Busey Bank met all capital adequacy requirements to which they are subject, including the guidelines to be considered well capitalized.

Busey Bank	\$	291,995	8.03%	\$	145,458	4.00%	\$	181,823	5.00%

At our 2010 Annual Meeting of Stockholders, our stockholders approved an amendment to our Articles of Incorporation to increase the number of authorized shares of our common stock from 100 million to 200 million. Although we currently do not have any specific plans, agreements or commitments to issue additional shares of common stock, the increased available shares position us for potential future growth and enable us to quickly take advantage of market conditions and other favorable opportunities as they arise. We believe that our continued improvement in terms of credit issues and earnings should put us in a position to take advantage of growth opportunities in the near future.

Recent Legislation Impacting the Financial Services Industry

On July 21 2010, sweeping financial regulatory reform legislation entitled the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) was signed into law. Many aspects of the Dodd-Frank Act are subject to rulemaking and will take effect over several years, making it difficult to anticipate the overall financial impact on the Company, its customers or the financial industry more generally. Provisions in the legislation that affect deposit insurance assessments, payment of interest on demand deposits and interchange fees could increase the costs associated with deposits as well as place limitations on certain revenues those deposits may generate. Although it appears our current level of trust preferred securities are grandfathered in as Tier 1 capital based upon asset size limitations, provisions in the legislation that revoke the Tier 1 capital treatment of trust preferred securities and otherwise require revisions to the capital requirements of the Company and the Bank could require us to seek other sources of capital in the future.

The Dodd-Frank Act implements far-reaching changes across the financial regulatory landscape, including provisions that, among other things:

- Create a Financial Services Oversight Council to identify emerging systemic risks and improve interagency cooperation;

- Centralize responsibility for consumer financial protection by creating a new agency, the Consumer Financial Protection Bureau, responsible for implementing, examining and enforcing compliance with federal consumer financial laws;

- Establish strengthened capital standards for banks and bank holding companies, and disallow trust preferred securities from being included in a bank's Tier 1 capital determination (subject to a grandfather provision for existing trust preferred securities);

- Contain a series of provisions covering mortgage loan origination standards affecting, among other things, originator compensation, minimum repayment standards and pre-payments;

- Require financial holding companies, such as the Company, to be well-capitalized and well-managed as of July 21, 2011. Bank holding companies and banks must also be both well-capitalized and well-managed in order to acquire banks located outside their home state;

- Grant the Federal Reserve the power to regulate debit card interchange fees;

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

- Implement corporate governance revisions, including with regard to executive compensation and proxy access by shareholders, that apply to all public companies, not just financial institutions;
- Make permanent the \$250 thousand limit for federal deposit insurance and increase the cash limit of Securities Investor Protection Corporation protection from \$100 thousand to \$250 thousand and provide unlimited federal deposit insurance until January 1, 2013 for non-interest bearing demand transaction accounts at all insured depository institutions;
- Repeal the federal prohibitions on the payment of interest on demand deposits, thereby permitting depository institutions to pay interest on business transaction and other accounts; and
- Increase the authority of the Federal Reserve to examine the Company and its nonbank subsidiaries.

FORWARD LOOKING STATEMENTS

Statements made in this report, other than those concerning historical financial information, may be considered forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 with respect to the financial condition, results of operations, plans, objectives, future performance and business of First Busey. Forward-looking statements, which may be based upon beliefs, expectations and assumptions of First Busey's management and on information currently available to management, are generally identifiable by the use of words such as believe, expect, anticipate, plan, intend, estimate, may, will, would, could, should or other similar expressions. All statements in this document, including forward-looking statements, speak only as of the date they are made, and we undertake no obligation to update any statement in light of new information or future events. A number of factors, many of which are beyond our ability to control or predict, could cause actual results to differ materially from those in its forward-looking statements. These factors include, among others, the following: (i) the strength of the local and national economy; (ii) the economic impact of any future terrorist threats or attacks; (iii) changes in state and federal laws, regulations and governmental policies concerning First Busey's general business (including the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act and the extensive regulations to be promulgated thereunder); (iv) changes in interest rates and prepayment rates of First Busey's assets; (v) increased competition in the financial services sector and the inability to attract new customers; (vi) changes in technology and the ability to develop and maintain secure and reliable electronic systems; (vii) the loss of key executives or employees; (viii) changes in consumer spending; (ix) unexpected results of acquisitions; (x) unexpected outcomes of existing or new litigation involving First Busey; and (xi) changes in accounting policies and practices. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Additional information concerning First Busey and its business, including additional factors that could materially affect our financial results, is included in First Busey's filings with the Securities and Exchange Commission.

Critical Accounting Estimates

Critical accounting estimates are those that are critical to the portrayal and understanding of First Busey's financial condition and results of operations and require management to make assumptions that are difficult, subjective or complex. These estimates involve judgments, estimates and uncertainties that are susceptible to change. In the event that different assumptions or conditions were to prevail, and depending on the severity of such changes, the possibility of materially different financial condition or results of operations is a reasonable likelihood.

Our significant accounting policies are described in Note 1 of our 2009 Annual Report on Form 10-K. The majority of these accounting policies do not require management to make difficult, subjective or complex judgments or estimates or the variability of the estimates is not material. However, the following policies could be deemed critical:

Fair Value of Investment Securities. Securities are classified as held-to-maturity when First Busey has the ability and management has the positive intent to hold those securities to maturity. Accordingly, they are stated at cost adjusted for amortization of premiums and accretion of discounts. First Busey has no securities classified as held-to-maturity. Securities are classified as available-for-sale when First Busey may decide to sell those securities due to changes in market interest rates, liquidity needs, changes in yields on alternative investments, and for other reasons. They are carried at fair value with unrealized gains and losses, net of taxes, reported in other comprehensive income. All of First Busey's securities are classified as available-for-sale. For equity securities, unadjusted quoted prices in active markets for identical assets are utilized to determine fair value at the measurement date. For all other securities, we obtain fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things. Due to the limited nature of the market for certain securities, the fair value and potential sale proceeds could be materially different in the event of a sale.

Realized securities gains or losses are reported in securities gains (losses), net in the Consolidated Statements of Operations. The cost of securities sold is based on the specific identification method. Declines in the fair value of available for sale securities below their amortized cost are evaluated to determine whether the loss is temporary or other-than-temporary. If the Company (a) has the intent to sell a debt security or (b) is more likely than not will be required to sell the debt security before its anticipated recovery, then the Company recognizes the entire unrealized loss in earnings as an other-than-temporary loss. If neither of these conditions are met, the Company evaluates whether a credit loss exists. The impairment is separated into (a) the amount of the total impairment related to the credit loss and (b) the amount of total impairment related to all other factors. The amount of the total other-than-temporary impairment related to the credit loss is recognized in earnings and the amount related to all other factors is recognized in other comprehensive income.

The Company also evaluates whether the decline in fair value of an equity security is temporary or other-than-temporary. In determining whether an unrealized loss on an equity security is temporary or other-than-temporary, management considers various factors including the magnitude and duration of the impairment, the financial condition and near-term prospects of the issuer, and the intent and ability of the Company to hold the equity security to forecasted recovery.

Allowance for Loan Losses. First Busey has established an allowance for loan losses which represents its estimate of the probable losses inherent in the loan portfolio as of the date of the financial statements. Management has established an allowance for loan losses which reduces the total loans outstanding by an estimate of uncollectible loans. Loans deemed uncollectible are charged against and reduce the allowance. Periodically, a provision for loan losses is charged to current expense. This provision acts to replenish the allowance for loan losses and to maintain the allowance at a level that management deems adequate.

To determine the adequacy of the allowance for loan losses, a formal analysis is completed quarterly to assess the risk within the loan portfolio. This assessment is conducted by senior officers who are members of the holding company's independent holding company credit review and risk management department, and is reviewed by senior management of the bank and holding company. The analysis includes review of historical performance, dollar amount and trends of past due loans, dollar amount and trends in non-performing loans, reviews of certain impaired loans, and review of loans identified as sensitive assets. Sensitive assets include non-accrual loans, past-due loans, loans on First Busey's watch loan reports and other loans identified as having probable potential for loss.

The allowance consists of specific and general components. The specific component considers loans that are classified as impaired. For such loans that are classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying amount of that loan. The general component covers non-classified loans and classified loans not considered impaired, and is based on historical loss experience adjusted for qualitative factors. Other adjustments may be made to the allowance for pools of loans after an assessment of internal or external influences on credit quality that are not fully reflected in the historical loss experience.

A loan is considered to be impaired when, based on current information and events, it is probable First Busey will not be able to collect all principal and interest amounts due according to the contractual terms of the loan agreement. When a loan becomes impaired, management generally calculates the impairment based on the present value of expected future cash flows discounted at the loan's effective interest rate. If the loan is collateral dependent, the fair value of the collateral is used to measure the amount of impairment. The amount of impairment and any subsequent changes are recorded through a charge to earnings as an adjustment to the allowance for loan losses. When management considers a loan, or a portion thereof, as uncollectible, it is charged against the allowance for loan losses. Because a significant majority of First Busey's loans are collateral dependent, First Busey has determined the required allowance on these loans based upon the estimated fair value, net of selling costs, of the respective collateral. The required allowance or actual losses on these impaired loans could differ significantly if the ultimate fair value of the collateral is significantly different from the fair value estimates used by First Busey in estimating such potential losses.

Goodwill and Other Intangible Assets. Over the past several years, First Busey has grown in part through mergers and acquisitions accounted for under the purchase method of accounting. Under the purchase method, First Busey is required to allocate the cost of an acquired company to the assets acquired, including identified intangible assets, and liabilities assumed based on their estimated fair values at the date of acquisition. The excess cost over the net assets acquired represents goodwill, which is not subject to periodic amortization.

Customer relationship intangibles are required to be amortized over their estimated useful lives. The method of amortization reflects the pattern in which the economic benefits of the intangible assets are estimated to be consumed or otherwise used

up. Because First Busey acquired customer relationships are subject to routine customer attrition, the relationships are more likely to produce greater benefits in the near-term than in the long-term, which typically supports the use of an accelerated method of amortization for the related intangible assets. Management is required to evaluate the useful life of customer relationship intangibles to determine if events or circumstances warrant a change in the estimated life. Should management determine the estimated life of any intangible asset is shorter than originally estimated, First Busey would adjust the amortization of that asset, which could accelerate the recognition of future amortization expense.

Goodwill arising from business combinations represents the value attributable to unidentifiable intangible elements in the business acquired. Goodwill recorded by First Busey in connection with its acquisitions relates to the inherent value in the businesses acquired and this value is dependent upon First Busey's ability to provide quality, cost effective services in a competitive market place. As such, goodwill value is supported ultimately by our stock price and by revenue that is driven by the volume of business transacted. A decline in our stock price or our earnings over sustained periods can lead to impairment of goodwill that could adversely impact earnings in future periods.

First Busey utilizes a two step valuation approach to test for goodwill impairment. We estimate the fair value of our reporting units as of the measurement date utilizing valuation methodologies including the comparable transactions approach, and the control premium approach. We then compare the estimated fair value of the reporting unit to the current carrying value of the reporting unit to determine if goodwill impairment had occurred as of the measurement date. The Company's tests goodwill for impairment annually at December 31, and more often if indicators of impairment arise. Due to the current economic conditions, including declines in our stock price, it is possible we will evaluate our goodwill for impairment on a more frequent basis than annually. Future evaluations may result in impairment of goodwill.

Deferred Taxes. We have maintained significant net deferred tax assets for deductible temporary differences, the largest of which relates to the net operating loss carryforward and the allowance for loan losses. For income tax return purposes, only net charge-offs are deductible, not the provision for loan losses. Under generally accepted accounting principles, a valuation allowance is required to be recognized if it is more likely than not that the deferred tax asset will not be realized. The determination of the recoverability of the deferred tax assets is highly subjective and dependent upon judgment concerning management's evaluation of both positive and negative evidence, the forecasts of future income, applicable tax planning strategies, and assessments of the current and future economic and business conditions. We consider both positive and negative evidence regarding the ultimate recoverability of our deferred tax assets. Positive evidence includes the existence of taxes paid in available carry-back years, available tax planning strategies and the probability that taxable income will be generated in future periods, while negative evidence includes a cumulative loss in the current year and prior year and general business and economic trends. We evaluated the recoverability of our net deferred tax asset and established a valuation allowance for certain state net operating loss and credit carryforwards that are not expected to be fully realized. Management believes that it is more likely than not that the other deferred tax assets included in the accompanying Consolidated Statements of Financial Condition will be fully realized. We have determined that no valuation allowance is required for any other deferred tax assets as of June 30, 2010, although there is no guarantee that those assets will be recognizable in future periods.

ITEM 3. QUANTITATIVE AND QUALITATIVE

DISCLOSURES ABOUT MARKET RISK

Market risk is the risk of change in asset values due to movements in underlying market rates and prices. Interest rate risk is the risk to earnings and capital arising from movements in interest rates. Interest rate risk is the most significant market risk affecting First Busey as other types of market risk, such as foreign currency exchange rate risk and commodity price risk, do not arise in the normal course of our business activities.

First Busey's subsidiary bank, Busey Bank, has an asset-liability committee which meet at least quarterly to review current market conditions and attempt to structure the Bank's balance sheet to ensure stable net interest income despite potential changes in interest rates with all other variables constant.

Edgar Filing: FIRST BUSEY CORP /NV/ - Form 10-Q

The asset-liability committee uses gap analysis to identify mismatches in the dollar value of assets and liabilities subject to repricing within specific time periods. The Funds Management Policy established by the asset-liability committee and approved by First Busey's Board of Directors establishes guidelines for maintaining the ratio of cumulative rate-sensitive assets to rate-sensitive liabilities within prescribed ranges at certain intervals.

Interest-rate sensitivity is a measure of the volatility of the net interest margin as a consequence of changes in market rates. The rate-sensitivity chart shows the interval of time in which given volumes of rate-sensitive earning assets and rate-sensitive interest-bearing liabilities would be responsive to changes in market interest rates based on their contractual maturities or terms for repricing. It is, however, only a static, single-day depiction of our rate sensitivity structure, which can be adjusted in response to changes in forecasted interest rates.

The following table sets forth the static rate-sensitivity analysis of First Busey as of June 30, 2010:

	1-30 Days	31-90 Days	Rate Sensitive Within		Over 1 Year	Total	
			91-180 Days	181 Days - 1 Year			
			(dollars in thousands)				
Interest-bearing deposits	\$ 185,711	\$	\$	\$	\$	\$ 185,711	
Investment securities							
U.S. Governments	9,500	16,566	19,467	28,985	291,391	365,909	
Obligations of states and political subdivisions	685	100	8,986	2,531	68,000	80,302	
Other securities	7,078	8,172	10,514	16,565	74,438	116,767	
Loans (net of unearned int.)	752,642	184,438	160,368	323,410	1,198,672	2,619,530	
Total rate-sensitive assets	\$ 955,616	\$ 209,276	\$ 199,335	\$ 371,491	\$ 1,632,501	\$ 3,368,219	
Interest-bearing transaction deposits	\$ 139,158	\$	\$	\$	\$	\$ 139,158	
Savings deposits	177,216					177,216	
Money market deposits	1,071,121					1,071,121	
Time deposits	219,179	152,105	198,155	340,484	344,642	1,254,565	
Repurchase agreements	130,333	2,543	678	2,000		135,554	
Short-term borrowings	4,000					4,000	
Long-term debt	15,751			14,575	27,750	58,076	
Junior subordinated debt owed To unconsolidated trusts		25,000			30,000	55,000	
Total rate-sensitive liabilities	\$ 1,756,758	\$ 179,648	\$ 198,833	\$ 357,059	\$ 402,392	\$ 2,894,690	
Rate-sensitive assets less rate-sensitive liabilities	\$ (801,142)	\$ 29,628	\$ 502	\$ 14,432	\$ 1,230,109	\$ 473,529	
Cumulative Gap	\$ (801,142)	\$ (771,513)	\$ (771,012)	\$ (756,579)	\$ 473,529		
Cumulative amounts as a percentage of total rate-sensitive assets	(23.79)%	(22.91)%	(22.89)%	(22.46)%	14.06%		
Cumulative ratio	0.54	0.60	0.64	0.70	1.16		

The foregoing table shows a cumulative negative (liability-sensitive) rate-sensitivity gap of \$756.6 million through one year as there were more liabilities subject to repricing during those time periods than there were assets subject to repricing within those same time periods. The volume of assets subject to repricing exceeds the volume of liabilities subject to repricing beyond one year. The composition of the gap structure at June 30, 2010, indicates First Busey would benefit more if interest rates decrease during the next year by allowing the net interest margin to grow as the volume of interest-bearing liabilities subject to repricing would be greater than the volume of interest-earning assets subject to repricing during the same period. However, as the following analysis demonstrates, many of our liabilities are at or near applicable interest rates floors and further declines in interest rates would not allow for the liabilities to absorb the rate decreases in excess of the decline in asset rates. Even though the gap analysis shows we are liability sensitive through one year, we are actually asset sensitive due to the current interest rate environment.

First Busey's asset/liability committee does not rely solely on gap analysis to manage interest-rate risk as interest rate changes do not impact all categories of assets and liabilities equally or simultaneously. The committee supplements gap analysis with balance sheet and income simulation analysis to determine the potential impact on net interest income of changes in market interest rates. In these simulation models the balance sheet is projected over a one-year period and net interest income is calculated under current market rates, and then assuming permanent instantaneous shifts of +/-100 basis points and +/-200 basis points. Management measures such changes assuming immediate and sustained shifts in the Federal funds rate and the corresponding shifts in other rate indices based on their historical changes relative to changes in the Federal funds rate. The model assumes asset and liability remain constant at June 30, 2010, balances. The model assumes repricing frequency on all variable-rate assets and liabilities. The model also assumes a historical decay rate on all fixed-rate core deposit balances. Prepayment speeds on loans have been adjusted up and down to incorporate expected prepayment in both a declining and rising rate environment. As of June 30, 2010 and December 31, 2009, due to the interest rate market, a downward adjustment in interest rates of 100 or 200 basis points is not possible. Utilizing this measurement concept the interest rate risk of First Busey, expressed as a change in net interest income as a percentage of the net income calculated in the constant base model, due to an immediate and sustained change in interest rates at June 30, 2010, and December 31, 2009 was as follows:

	Basis Point Changes			
	- 200	- 100	+ 100	+ 200
June 30, 2010	NA	NA	(1.17)%	(1.72)%
December 31, 2009	NA	NA	(2.29)%	(2.56)%

The negative impact of an immediate and permanent interest rate shift in either direction is a reflection of the current low interest rate environment and our liability sensitive balance sheet through a one year period, as demonstrated in the gap schedule on the previous page. Due to the already low interest rates on deposits, a downward shift in interest rates may not be able to be fully absorbed by the rate sensitive liabilities. Thus, our rate sensitive assets' decline in interest rates would have a greater impact on net interest income than the decline in interest rate on our rate sensitive liabilities. If interest rates were to rise, a greater amount of our rate sensitive liabilities would reprice up over the subsequent year as compared to our rate sensitive assets, as seen in the gap schedule.

First Busey's Asset, Liability and Liquidity Management Policy defines a targeted range of +/- 10% change in net interest margin in a one-year time frame for interest rate shocks of +/- 100 basis points and +/- 15% change in net interest margin in a one-year time frame for interest rate shocks of +/- 200 basis points. As indicated in the table above, First Busey is within this targeted range on a consolidated basis.

ITEM 4: CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

An evaluation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) was carried out as of June 30, 2010, under the supervision and with the participation of our Chief Executive Officer, Chief Financial Officer and several other members of our senior management. Our management concluded that, as of June 30, 2010, our disclosure controls and procedures were effective in ensuring that the information we are required to disclose in the reports we file or submit under the Act is (i) accumulated and communicated to our management (including the Chief Executive Officer and Chief Financial Officer) to allow timely decisions regarding required disclosure, and (ii) recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Controls over Financial Reporting

During the quarter ended June 30, 2010, First Busey did not make any changes in its internal control over financial reporting or other factors that could materially affect, or were reasonably likely to materially affect, its internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1: Legal Proceedings

Not Applicable

ITEM 1A: Risk Factors

In addition to the risk factors set forth in Part I, Item 1A. Risk Factors of our Form 10-K for the annual period ended December 31, 2009, we also face the risk set forth below. Please refer to Part I, Item 1A. Risk Factors of our Form 10-K for 2009 for disclosures regarding additional risks and uncertainties related to our business.

Recently enacted regulatory reforms could have a significant impact on our business, financial condition and results of operations.

On July 21, 2010, President Obama signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act). While the provisions of the Act receiving the most public attention have generally been those more likely to affect larger institutions, the

Dodd-Frank Act also contains many provisions which will affect smaller institutions such as ours in substantial ways. Compliance with the Dodd-Frank Act's provisions may curtail our revenue opportunities, increase our operating costs, require us to hold higher levels of regulatory capital and/or liquidity or otherwise adversely affect our business or financial results in the future. Our management is actively reviewing the provisions of the Dodd-Frank Act and assessing its probable impact on our business, financial condition, and result of operations. However, because many aspects of the Dodd-Frank Act are subject to future rulemaking, it is difficult to precisely anticipate its overall financial impact on the Company and the Bank at this time.

ITEM 2: Unregistered Sales of Equity Securities and Use of Proceeds

There were no purchases made by or on behalf of First Busey of shares of its common stock during the quarter ended June 30, 2010.

On January 22, 2008, First Busey announced that its board of directors had authorized the repurchase of 1 million shares of common stock. First Busey's repurchase plan has no expiration date and is active until all the shares are repurchased or action by the board of directors. As of June 30, 2010, under the Company's stock repurchase plan, 895,655 shares remained authorized for repurchase. However, because of First Busey's participation in Treasury's Capital Purchase Program, it will not be permitted to repurchase any shares of its common stock, other than in connection with benefit plans consistent with past practice, until such time as Treasury no longer holds any equity securities in the Company. Accordingly, First Busey does not anticipate repurchasing any shares of its common stock in the near future.
