# **EXPLANATORY NOTE**

This report includes the combined filing of Dynegy Inc. ( Dynegy ) and Dynegy Holdings Inc. ( DHI ). DHI is the principal subsidiary of Dynegy, providing nearly 100 percent of Dynegy s total consolidated revenue for the six-month period ended June 30, 2011 and constituting nearly 100

percent of Dynegy s total consolidated asset base as of June 30, 2011. Unless the context indicates otherwise, throughout this report, the terms the Company, we, us, our and ours are used to refer to both Dynegy and DHI and their direct and indirect subsidiaries. Discussions or areas this report that apply only to Dynegy, DHI or specific subsidiaries are clearly noted in such section.

#### NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

For the Interim Periods Ended June 30, 2011 and 2010

**Note 1 Accounting Policies** 

**Basis of Presentation** 

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with the instructions to interim financial reporting as prescribed by the SEC. The year-end condensed consolidated balance sheet data was derived from audited consolidated financial statements but does not include all disclosures required by accounting principles generally accepted in the United States of America. These interim financial statements should be read together with the consolidated financial statements and notes thereto included in Dynegy s and DHI s annual report on Form 10-K for the year ended December 31, 2010, filed on March 8, 2011, which we refer to as each registrant s Form 10-K.

The unaudited condensed consolidated financial statements contained in this report include all material adjustments of a normal and recurring nature that, in the opinion of management, are necessary for a fair presentation of the results for the interim periods. The results of operations for the interim periods presented in this Form 10-Q are not necessarily indicative of the results to be expected for the full year or any other interim period due to seasonal fluctuations in demand for our energy products and services, changes in commodity prices, timing of maintenance and other expenditures and other factors. The preparation of consolidated financial statements in conformity with generally accepted accounting principles ( GAAP ) requires management to make informed estimates and judgments that affect our reported financial position and results of operations based on currently available information. We review significant estimates and judgments affecting our consolidated financial statements on a recurring basis and record the effect of any necessary adjustments. Uncertainties with respect to such estimates and judgments are inherent in the preparation of financial statements. Estimates and judgments are used in, among other things, (i) developing fair value assumptions, including estimates of future cash flows and discount rates, (ii) analyzing tangible and intangible assets for possible impairment, (iii) estimating the useful lives of our assets, (iv) assessing future tax exposure and the realization of deferred tax assets, (v) determining amounts to accrue for contingencies, guarantees and indemnifications, (vi) estimating various factors used to value our pension assets and liabilities and (vii) determining the primary beneficiary of variable interest entities ( VIEs ). Actual results could differ materially from our estimates.

Going Concern. Our accompanying unaudited condensed consolidated financial statements have been prepared assuming that we will continue as a going concern, which contemplates realization of assets and the satisfaction of liabilities in the normal course of business for the twelve month period following the date of these unaudited condensed consolidated financial statements. However, continued low power prices over the past two years have had a significant adverse impact on our business and continue to negatively impact our projected future liquidity.

We recently completed a reorganization of our subsidiaries and in connection therewith, certain of our subsidiaries (GasCo and CoalCo, as defined in Note 13 Subsequent Events) entered into two new credit facilities on August 5, 2011 which resulted in the repayment in full and termination of commitments under DHI s Fifth Amended and Restated Credit Agreement. However, these new credit facilities contain certain restrictions related to distributions to their respective parent companies, including Dynegy and DHI (please read Note 13 Subsequent Events for further discussion). Although these new credit facilities are designed to provide sufficient operating liquidity for GasCo and CoalCo for the foreseeable future, there still remain significant debt service requirements for the unsecured notes and debentures at DHI as well as the operating lease payment obligations related to the Danskammer and Roseton operating leases at a wholly-owned subsidiary of DHI. We currently project that we will have minimal liquidity at DHI subsequent to funding of the debt service requirements and operating lease payment obligations beyond the next eighteen months absent a significant positive change in the forecasted operating results of the Roseton and Danskammer facilities.

#### DYNEGY INC. and DYNEGY HOLDINGS INC.

#### NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

#### (Unaudited)

#### For the Interim Periods Ended June 30, 2011 and 2010

The August 2011 reorganization represents our first step in addressing our liquidity concerns. Over the next eighteen months, under the strategic direction of the Finance and Restructuring Committee of Dynegy s Board of Directors, we may participate in additional debt restructuring activities, which may include direct or indirect transfers of our subsidiaries equity interests, refinancing of existing debt and lease obligations, and/or further reorganizations of our subsidiaries as well as other similar initiatives. However, we cannot provide any assurances that we will be successful in accomplishing any such activities.

Our ability to continue as a going concern is dependent on many factors, including, among other things, GasCo and CoalCo generating sufficient positive operating results to enable GasCo and CoalCo to make certain restricted distributions to their parents (as described in Note 13 Subsequent Events), Roseton and Danskammer producing positive operating results, successfully executing any further restructuring strategies, and continuing to execute the company-wide cost reduction initiatives that are ongoing. The accompanying unaudited condensed consolidated financial statements do not include any adjustments that might result from the outcome of the foregoing uncertainties.

#### Accounting Principles Not Yet Adopted

Fair Value Measurement Disclosures. In May 2011, the FASB issued Accounting Standards Update (ASU) No. 2011-04 Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs (ASU No. 2011-04). This authoritative guidance changes the wording used to describe the requirements in GAAP for measuring fair value and for disclosing information about fair value measurements. ASU No. 2011-04 is effective for interim and annual periods beginning after December 15, 2011. We do not expect the implementation of this guidance to have a significant impact on our financial condition, results of operations or cash flows.

**Presentation of Comprehensive Income**. In June 2011, the FASB issued ASU 2011-05 Comprehensive Income (Topic 220): Presentation of Comprehensive Income (ASU No. 2011-05). The FASB is objective in issuing this guidance is to improve the comparability, consistency, and transparency of financial reporting and to increase the prominence of items reported in other comprehensive income. ASU No. 2011-05 eliminates the option of presenting components of other comprehensive income as part of the statement of changes in stockholders equity. The standard requires that all nonowner changes in stockholders equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. ASU 2011-05 is effective for fiscal years, and interim periods within those years,

beginning after December 15, 2011. We do not expect the implementation of this guidance to have a significant impact on our financial condition, results of operations or cash flows.

Corporate Securities	4		4
Total Dynegy	\$ 191	\$ \$	\$ 191

<sup>(1)</sup> Includes \$85 million in Broker margin account on our consolidated balance sheets in support of transactions with our futures clearing manager.

During the three and six months ended June 30, 2011, we received proceeds of \$36 million from the sale of available for sale securities for which we realized less than \$1 million of gains for the three and six months ended June 30, 2011.

#### Note 3 Risk Management Activities, Derivatives and Financial Instruments

The nature of our business necessarily involves market and financial risks. Specifically, we are exposed to commodity price variability related to our power generation business. Our commercial team manages these commodity price risks with financially settled and other types of contracts consistent with our commodity risk management policy. Our commercial team also uses financial instruments in an attempt to capture the benefit of fluctuations in market prices in the geographic regions where our assets operate. Our treasury team manages our financial risks and exposures associated with interest expense variability.

#### DYNEGY INC. and DYNEGY HOLDINGS INC.

#### NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

#### (Unaudited)

#### For the Interim Periods Ended June 30, 2011 and 2010

Our commodity risk management strategy gives us the flexibility to sell energy and capacity through a combination of spot market sales and near-term contractual arrangements (generally over a rolling 1 to 3 year time frame). Our commodity risk management goal is to protect cash flow in the near-term while keeping the ability to capture value longer-term. Increasing collateral requirements and our liquidity position could impact our ability to effectively employ our risk management strategy. Many of our contractual arrangements are derivative instruments and must be accounted for at fair value. We also manage commodity price risk by entering into capacity forward sales arrangements, tolling arrangements, RMR contracts, fixed price coal purchases and other arrangements that do not receive fair value accounting treatment because these arrangements do not meet the definition of a derivative or are designated as normal purchase normal sales. As a result, the gains and losses with respect to these arrangements are not reflected in the unaudited condensed consolidated statements of operations until the settlement dates.

#### Quantitative Disclosures Related to Financial Instruments and Derivatives

The following disclosures and tables present information concerning the impact of derivative instruments on our unaudited condensed consolidated balance sheets and statements of operations. In the table below, commodity contracts primarily consist of derivative contracts related to our power generation business that we have not designated as accounting hedges, that are entered into for purposes of economically hedging future fuel requirements and sales commitments and securing commodity prices. As of June 30, 2011, our commodity derivatives were comprised of both long and short positions; a long position is a contract to purchase a commodity, while a short position is a contract to sell a commodity. As of June 30, 2011, we had net long/(short) commodity derivative contracts outstanding in the following quantities:

Contract Type	Hedge Designation	Quantity (in millions)	Unit of Measure	Net Fair Value (in millions)
Commodity contracts:				
Electric energy (1)	Not designated	(39)	MW	\$ 109
Natural gas (1)	Not designated	227	MMBtu	\$ (187)
Heat rate derivatives	Not designated	(4)/39	MW/MMBtu	\$ (22)
Other (2)	Not designated	3	Misc.	\$ 7

<sup>(1)</sup> Mainly comprised of swaps, options and physical forwards.

<sup>(2)</sup> Comprised of emissions, coal, crude oil and fuel oil options, swaps and physical forwards.

Derivatives on the Balance Sheet. We execute a significant volume of transactions through a futures clearing manager. Our daily cash payments (receipts) to (from) our futures clearing manager consist of three parts: (i) fair value of open positions (exclusive of options) ( Daily Cash Settlements ); (ii) initial margin requirements related to open positions (exclusive of options) ( Initial Margin ); and (iii) fair value and margin requirements related to options ( Options , and collectively with Initial Margin, Collateral ). We do not offset fair value amounts recognized for derivative instruments executed with the same counterparty under a master netting agreement and we do not elect to offset the fair value amounts recognized for the Daily Cash Settlements paid or received against the fair value amounts recognized for derivative instruments executed with the same counterparty under a master netting agreement.

As a result, our unaudited condensed consolidated balance sheets present derivative assets and liabilities, as well as related Daily Cash Settlements and Collateral, as applicable, on a gross basis. As of June 30, 2011, of the approximately \$202 million included in the Broker margin account on our unaudited condensed consolidated balance sheets, approximately \$137 million represents Collateral and approximately \$61 million represents Daily Cash Settlements. As of December 31, 2010, of the approximately \$80 million included in the Broker margin account on our unaudited condensed consolidated balance sheets, approximately \$75 million represented Collateral offset by approximately \$5 million of Daily Cash Settlements. We use short-term investments to collateralize a portion of our collateral requirements. The broker requires that we post approximately 103 percent of any collateral requirement collateralized with short-term investments. Accordingly, our Broker margin account includes approximately \$3 million related to this requirement at June 30, 2011 and December 31, 2010. Additionally, we posted \$1 million and \$7 million of short-term investments which were not utilized as collateral at June 30, 2011 and December 31, 2010, respectively.

#### DYNEGY INC. and DYNEGY HOLDINGS INC.

# NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

#### (Unaudited)

# For the Interim Periods Ended June 30, 2011 and 2010

The following table presents the fair value and balance sheet classification of derivatives in the unaudited condensed consolidated balance sheet as of June 30, 2011, and December 31, 2010 segregated between designated, qualifying hedging instruments and those that are not, and by type of contract segregated by assets and liabilities.

Contract Type	<b>Balance Sheet Location</b>	June 30, 2011 (in millions)	December 31, 2010
Derivatives designated as hedging instruments:			
Derivative Assets:			
Interest rate contracts	Assets from risk management activities	\$ \$	1
Total derivatives designated as hedging instruments			1
Derivatives not designated as hedging instruments:			
Derivative Assets:			
Commodity contracts	Assets from risk management activities	1,073	1,265
Interest rate contracts	Assets from risk management activities		5
Derivative Liabilities:			
Commodity contracts	Liabilities from risk management activities	(1,166)	(1,231)
Interest rate contracts	Liabilities from risk management activities		(6)
Total derivatives not designated as hedging instruments		(93)	33
Total derivatives, net		\$ (93) \$	34

Impact of Derivatives on the Consolidated Statements of Operations

The following discussion and tables present the disclosure of the location and amount of gains and losses on derivative instruments in our unaudited condensed consolidated statements of operations for the three and six months ended June 30, 2011 and 2010 segregated between designated, qualifying hedging instruments and those that are not, by type of contract.

*Cash Flow Hedges.* We may enter into financial derivative instruments that qualify, and that we may elect to designate, as cash flow hedges. Interest rate swaps have been used to convert floating interest rate obligations to fixed interest rate obligations. We had no cash flow hedges in place during the three and six months ended June 30, 2011 and 2010.

Fair Value Hedges. We also enter into derivative instruments that qualify, and that we may elect to designate, as fair value hedges. We use interest rate swaps to convert a portion of our non-prepayable fixed-rate debt into floating-rate debt. These derivatives and the corresponding hedged debt matured April 1, 2011. During the three and six months ended June 30, 2011 and 2010, there was no ineffectiveness from changes in the fair value of hedge positions and no amounts were excluded from the assessment of hedge effectiveness. During the three and six months ended June 30, 2011 and 2010, there were no gains or losses related to the recognition of firm commitments that no longer qualified as fair value hedges.

#### DYNEGY INC. and DYNEGY HOLDINGS INC.

#### NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

#### (Unaudited)

#### For the Interim Periods Ended June 30, 2011 and 2010

The impact of interest rate swap contracts designated as fair value hedges and the related hedged item on our unaudited condensed consolidated statement of operations for the three and six months ended June 30, 2011 and 2010 was immaterial.

Financial Instruments Not Designated as Hedges. We elect not to designate derivatives related to our power generation business and certain interest rate instruments as cash flow or fair value hedges. Thus, we account for changes in the fair value of these derivatives within the consolidated statements of operations (herein referred to as mark-to-market accounting treatment). As a result, these mark-to-market gains and losses are not reflected in the unaudited condensed consolidated statements of operations in the same period as the underlying activity for which the derivative instruments serve as economic hedges.

For the three-month period ended June 30, 2011, our revenues included approximately \$129 million of mark-to-market losses related to this activity compared to \$258 million of mark-to-market losses in the same period in the prior year. For the six months ended June 30, 2011, our revenues included approximately \$127 million of mark-to-market losses related to this activity compared to \$5 million of mark-to-market losses in the same period in the prior year.

The impact of derivative financial instruments that have not been designated as hedges on our unaudited condensed consolidated statement of operations for the three months ended June 30, 2011 and 2010 is presented below. Note that this presentation does not reflect the expected gains or losses arising from the underlying physical transactions associated with these financial instruments. Therefore, this presentation is not indicative of the economic gross margin we expect to realize when the underlying physical transactions settle.

Derivatives Not Designated as	Location of Loss Recognized in Income on	Amount of Loss Recognized in Income on Derivatives for the Three Months Ended June 30,

#### **Note 4 Fair Value Measurements**

The following tables set forth by level within the fair value hierarchy our financial assets and liabilities that were accounted for at fair value on a recurring basis as of June 30, 2011 and December 31, 2010. These financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the valuation of fair value assets and liabilities and their placement within the fair value hierarchy levels.
