 - Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))
-

Item 7.01. Regulation FD Disclosure.

On May 19, 2014, AmerisourceBergen Corporation (the Company) issued a news release announcing that its board of directors has authorized a special \$650 million share repurchase program intended to supplement the Company's previously announced warrant hedging strategy. The special program will be used to mitigate the potentially dilutive effect on the ownership interests of its then-existing stockholders that may result from the issuance of common stock upon exercise of the warrants issued in March 2013 as further described under Item 8.01 below.

Share repurchases under the special program are expected to take place over an extended period of time, subject to market conditions. The Company intends to exclude the impact of the share repurchases under the special program from its presentation of adjusted diluted earnings per share from continuing operations beginning with its earnings release for the fiscal quarter ending June 30, 2014 and until the warrants are exercised or expire. The exclusion of the special share repurchases will be consistent with the Company's exclusion of the accounting dilution resulting from the impact of the warrants in the calculation of the Company's adjusted diluted earnings per share. As a result, share repurchases under the special program will not have an impact on the Company's expectations for the range of its adjusted diluted earnings per share from continuing operations for fiscal 2014, which was previously disclosed in its earnings release dated April 24, 2014. That range continues to include an assumption that the Company will repurchase \$500 million of its common stock in fiscal 2014 under its previously announced repurchase programs, subject to market conditions.

Once completed, the share repurchases under the special program, together with the issuer capped call option transactions described in the Company's Quarterly Report on Form 10-Q for the fiscal quarter ended March 31, 2014 (the Capped Calls), are expected to mitigate approximately 80% of the potentially dilutive effect that the issuance of shares of the Company's common stock upon exercise of the warrants could have. The Company will continue to explore additional opportunities to mitigate any remaining potentially dilutive effect of the warrants

The news release is being furnished with this Current Report on Form 8-K as Exhibit 99.1 and is incorporated herein by reference.

Item 8.01. Other Events.

On May 19, 2014, the Company announced that its board of directors has authorized a special \$650 million share repurchase program intended to supplement the Company's previously announced warrant hedging strategy. The special share repurchase program will be used to mitigate the potentially dilutive effect on the ownership interests of the Company's then-existing stockholders that may result from the issuance of common stock upon exercise of the warrants issued by the Company to subsidiaries of Walgreen Co. and Alliance Boots GmbH in March 2013. As previously disclosed, such subsidiaries were collectively issued warrants to purchase up to 22,696,912 shares of the Company's common stock at an exercise price of \$51.50

per share exercisable during a six month period beginning in March 2016 and warrants to purchase up to 22,696,912 shares of the Company's common stock at an exercise price of \$52.50 per share exercisable during a six-month period beginning in March 2017. The warrant hedging strategy also consists of the Capped Calls.

Item 9.01. Financial Statements and Exhibits.
