(2) The hypothetical Starting Price of \$100.00 has been chosen for illustrative purposes only and does not represent the actual Starting Price. The actual Starting Price will be determined on the Pricing Date.

The above figures are for purposes of illustration only and may have been rounded for ease of analysis. The actual amount you receive on the Stated Maturity Date and the resulting pre-tax rates of return will depend on the actual Starting Price, Ending Price and Capped Value.

How the Redemption Amount is calculated

The Redemption Amount will be determined as follows:

- If the Ending Price is greater than the Starting Price, the Redemption Amount will be equal to the lesser of:

(i) \$1,000 *plus*

(ii) the Capped Value

- If the Ending Price is less than or equal to the Starting Price, but greater than or equal to the Threshold Price, the Redemption Amount will be equal to \$1,000

- If the Ending Price is less than the Threshold Price, the Redemption Amount will be equal to \$1,000 *minus*

In such a case, you will lose up to 90% of your Principal Amount.

* The graph above sets forth the daily closing prices of the Fund for the period from January 1, 2013 to November 2, 2018. The closing price on November 2, 2018 was \$271.89. The historical performance of the Fund is not an indication of the future performance of the Fund during the term of the securities.
