Cameco Offers Convertible Subordinated Debentures Proceeds to Replace Acquisition Debt

Saskatoon, Saskatchewan, Canada, September 9, 2003

Cameco Corporation announced today that it has entered into an agreement with two underwriters, RBC Capital Markets (bookrunner) and Scotia Capital, under which they have agreed to purchase from Cameco and resell to the public \$200 million of convertible subordinated debentures of Cameco. The company will file a preliminary short form prospectus with the securities regulatory authorities in all the Canadian provinces.

In addition, Cameco has granted the underwriters an option to purchase up to an additional \$30 million of these debentures on the same terms and conditions, exercisable up to 48 hours prior to closing. The sale of the debentures is subject to customary securities regulatory approvals and closing conditions and is expected to close on or about September 25, 2003.

Cameco will use the net proceeds of this offering to repay outstanding short-term, commercial-paper debt related to the company's past acquisition of a further 16.6% interest in Bruce Power, which closed in February 2003. The company has decided to put in place financing that better matches the long-term nature of the asset.

Each debenture has a minimum denomination of \$1,000 and will bear an interest rate of 5% per annum payable semi-annually in arrears on April 1 and October 1 in each year commencing April 1, 2004 and will mature on October 1, 2013. These debentures are unsecured obligations of the company and will be subordinated in right of payment to all the company's existing and future senior indebtedness. In addition, the debentures will rank junior to the company's secured indebtedness and the liabilities of the company's subsidiaries.

The debentures are convertible into Cameco common shares at the option of the holder at any time on or prior to the maturity date based on a conversion ratio of 15.3846 shares per \$1,000 of convertible subordinated debentures, representing a conversion price of \$65.00 per share.

The company may not redeem the debentures prior to October 1, 2008. Thereafter, the company may redeem the debentures in whole or in part at a redemption price equal to par plus accrued and unpaid interest, provided that the holders will be able to convert the debentures into Cameco shares at any time up to one business day prior to the redemption date.

Table of Contents

In accordance with Canadian generally accepted accounting principles, these debentures will be reflected as equity on the company's balance sheet.

The debentures and the common shares issuable on the conversion thereof have not been and will not be registered under the United States Securities Act of 1933, as amended (US Securities Act) or any state securities laws and may not be offered or sold within the United States or to US persons unless registered under the US Securities Act and applicable state securities laws or an exemption therefrom is available.

The Underwriting Agreement enables the underwriters to reoffer and resell the debentures that they have acquired pursuant to the Underwriting Agreement to certain qualified institutional buyers in the United States provided such offerings and sales are made in accordance with Rule 144A under the US Securities Act. Moreover, the Underwriting Agreement provides that the underwriters may offer and sell debentures outside the United States in accordance with Regulation S under the US Securities Act.

This news release shall not constitute an offer to sell or the solicitation of an offer to buy securities in any jurisdiction.

Cameco, with its head office in Saskatoon, Saskatchewan, is the world's largest uranium supplier. The company's uranium products are used to generate electricity in nuclear energy plants around the world, providing one of the cleanest sources of energy available today. Cameco's shares trade on the Toronto and New York stock exchanges.

Statements contained in this news release which are not historical facts are forward-looking statements that involve risks, uncertainties and other factors that could cause actual results to differ materially from those expressed or implied by such forward-looking statements. Factors that could cause such differences, without limiting the generality of the following, include: volatility and sensitivity to market prices for uranium, electricity in Ontario and gold; the impact of the sales volume of uranium, conversion services, electricity generated and gold; competition; the impact of change in foreign currency exchange rates and interest rates; imprecision in reserve estimates; environmental and safety risks including increased regulatory burdens; unexpected geological or hydrological conditions; political risks arising from operating in certain developing countries; a possible deterioration in political support for nuclear energy; changes in government regulations and policies, including trade laws and policies; demand for nuclear power; replacement of production and failure to obtain necessary permits and approvals from government authorities; legislative and regulatory initiatives regarding deregulation, regulation or restructuring of the electric utility industry in Ontario; Ontario electricity rate regulations; weather and other natural phenomena; ability to maintain and further improve positive labour relations; operating performance of the facilities; success of planned development projects; and other development and operating risks.

Table of Contents

Although Cameco believes that the assumptions inherent in the forward-looking statements are reasonable, undue reliance should not be placed on these statements, which only apply as of the date of this report. Cameco disclaims any intention or obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.
