LETTER TO SHAREHOLDERS

June 2008

Dennis H. Ferro

President and Chief Executive Officer

Dear Shareholder:

We are pleased to provide the Semiannual Report for Evergreen Multi-Sector Income Fund for the six-month period ended April 30, 2008 (the six-month period).

Foreign and domestic markets were roiled with uncertainties during most of the six-month period as investors worried about the potential contagious effects of weakness in the U.S. economy. Concerns that started with problems with subprime mortgages in the United States created volatility in markets around the globe. A credit crunch and liquidity crisis dominated the fixed income markets, causing a general flight to quality over the first five months of the six-month period. Sovereign debt and other high-quality securities tended to perform well, while credit-sensitive sectors tended to fall. This pattern reversed itself in April 2008, however, as corporate bonds, asset-backed securities and emerging market debt rallied following a series of actions by the U.S. Federal Reserve Board (the Fed) to stabilize the markets. In global equity markets, stocks suffered steep declines over the first five months of the six-month period before rallying sharply in the final month, consistent with the performance of credit-sensitive bonds. Over the six-month period, prices of gold, oil and other commodities surged while the U.S. dollar weakened further.

After growing briskly during the early months of 2007, the U.S. economy slowed significantly in late 2007 and early 2008. Economic growth decelerated as lending for ordinary consumer and commercial activity dried up, accentuating the weakening effects of declining

LETTER TO SHAREHOLDERS continued

home prices. Corporate profits, employment and other key economic indicators showed clear evidence of deterioration. Gross Domestic Product growth decelerated to a paltry 0.6% rate during the final quarter of 2007 and a marginally better 0.9% pace for the first quarter of 2008. Much of the strength early in 2008 came from exports and government spending, rather than from any noticeable improvements in consumer spending, business investment or housing. To reinvigorate the economy and stimulate lending activity, the Fed became increasingly aggressive, taking a series of steps to pour liquidity into the financial system. Starting in September 2007 and continuing through April 2008, the Fed cut the key fed funds rate seven different times, lowering the influential short-term rate from 5.25% to 2%. In March 2008, the central bank also opened its lending facilities to securities firms as well as commercial banks and intervened to help JPMorgan Chase & Co. purchase the collapsing investment bank Bear Stearns Cos. Meanwhile, Congress and the Bush administration rushed through a \$168 billion fiscal stimulus bill, which included tax rebate checks, in an effort to boost growth in the second half of 2008.

Over the six-month period, managers of Evergreen Multi-Sector Income Fund maintained their strategy seeking a high level of current income with limited exposure to the risks posed by changing interest rates. Assets of this closed-end fund were allocated among sleeves of high yield, domestic corporate bonds, investment grade foreign debt securities and adjustable rate U.S. mortgage-backed securities.

During the six-month period, a challenge emerged in connection with Auction Market Preferred Shares (AMPS) issued by the fund to create leverage in pursuit of its income orientation. The liquidity crisis affecting global credit markets

Edgar Filing: EVERGREEN MULTI-SECTOR INCOME FUND - Form N-CSRS

LETTER TO SHAREHOLDERS continued

caused failures in regularly scheduled auctions for AMPS, including auctions for the fund s preferred shares. As a consequence, holders of these preferred shares temporarily were not able to sell them at auction, which entitled the holders of these shares to be paid by the fund at the maximum rates allowed under the governing documents for these preferred shares. This situation was later alleviated, however, when we obtained debt financing from a major financial institution, enabling the fund to redeem approximately 80% of the outstanding auction preferred shares.

The experiences over the six-month period have underscored the value of a well-diversified, long-term investment strategy to help soften the effects of volatility in any one market or asset class. As always, we encourage investors to maintain diversified investment portfolios in pursuit of their long-term investment goals.
