## **MANAGEMENT'S DISCUSSION & ANALYSIS**

The following discussion and analysis is management's assessment of the results and financial condition of Almaden Minerals Ltd. (the "Company" or "Almaden") for the three months ended March 31, 2005 and should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2004 and related notes contained in the annual report. The date of this management's discussion and analysis is May 12, 2005. Additional information on the Company is available on SEDAR at [www.sedar.com](http://www.sedar.com) and on the Company's website at [www.almadenminerals.com](http://www.almadenminerals.com).

### **Business of Almaden**

Almaden is an exploration stage company engaged in the acquisition, exploration and development of mineral properties of merit in Canada, the United States and Mexico with the aim of developing them to a stage where they can be exploited at a profit or to arrange joint ventures whereby other companies provide funding for development and exploitation.

### **Forward looking statements**

Certain information included in this discussion may constitute forward-looking statements. Forward-looking statements are based on current expectations and entail various risks and uncertainties. These risks and uncertainties could cause or contribute to actual results that are materially different than those expressed or implied. The Company disclaims any obligation or intention to update or revise any forward-looking statement, whether as a result of new information, future events, or otherwise.

### **Trends**

The mineral exploration industry has been through a very difficult period with low prices for both precious and base metals. Lack of interest lead to low market capitalizations and major mining companies found it was easier to grow by purchasing companies or mines rather than explore for them. This, in turn, lead to downsizing of major mining company exploration staffs and many professionals took early retirement or left the industry to pursue other careers. As a result of these trends, there are few good gold-silver projects in the pipeline and a developing shortage of

experienced explorationists. With improving metal prices and increasing demand, especially from Asia, supply difficulties may occur in the future and there is a discernible need for good exploration projects based on sound geological work. As junior companies (many of which are staffed by former large company geologists) find it easier to raise funds, they are beginning to seek properties of merit to explore.

### **Risks and uncertainties**

The Company is subject to a number of risks and uncertainties, the more significant of which are discussed below. Additional risks and uncertainties not presently known to the Company may impact the Company's financial results in the future.

### **Industry**

Almaden is engaged in the exploration of mineral properties, an inherently risky business. There is no assurance that a mineral deposit will ever be discovered and economically produced. Most exploration projects do not result in the discovery of commercially mineable ore deposits.

### **Reserve and mineralization estimates**

The estimation of reserves and mineralization is a subjective process and the accuracy of any such estimates is a function of the quality of available data and of engineering and geological interpretation and judgment. No assurances can be given that the volume and grade of reserves recovered and rates of production will not be less than anticipated.

### **Gold and metal prices**

The price of gold is affected by numerous factors beyond the control of the Company including central bank sales, producer hedging activities, the relative exchange rate of the U.S. dollar with other major currencies, demand, political, economic conditions and production levels. In addition, the price of gold has been volatile over short periods of time due to speculative activities. The price of other metals and mineral products that the Company may explore for all have the same or similar price risk factors.

### **Cash flows and additional funding requirements**

Almaden currently has no revenues from operations. If any of the Company's exploration programs are successful and optionees of properties complete their earn-in, the Company would have to provide its share of ongoing exploration and development costs in order to maintain its interest in the projects, or be reduced to a royalty interest. Additional capital would be required to put a property into commercial production. The sources of funds currently available to the Company are the sale of its inventory of gold, sale of marketable securities, sale of equity capital or the offering of an interest in its projects to another party. Although the Company presently has sufficient financial resources to undertake all of its currently planned exploration programs and has been successful in the past in obtaining financing, there is no assurance that it will be able to obtain adequate financing in the future or that such financing will be advantageous to the Company.

### **Exchange rate fluctuations**

Fluctuations in currency exchange rates, principally the Canadian/U.S. dollar exchange rate, can significantly impact cash flows. The exchange rate has varied substantially over time. Most of the Company's exploration expenses in Mexico are denominated in U.S. dollars. Fluctuations in exchange rates may give rise to foreign currency exposure, either favourable or unfavourable, which may impact financial results. The Company does not engage in currency hedging to offset any risk of exchange rate fluctuation.

### **Environmental**

Almaden's exploration and development activities are subject to extensive laws and regulations governing environment protection. The Company is also subject to various reclamation-related conditions. Although the Company closely follows and believes it is operating in compliance with all applicable environmental regulations, there can be no assurance that all future requirements will be obtainable on reasonable terms. Failure to comply may result in enforcement actions causing operations to cease or be curtailed and may include corrective measures requiring capital expenditures.

### **Laws and regulations**

Almaden's exploration activities are subject to extensive federal, provincial, state and local laws and regulations governing prospecting, development, production, exports, taxes, labour standards, occupational health and safety, mine safety and other matters in all the jurisdictions it operates in. Such laws and regulations are subject to change, can become more stringent and compliance can therefore become more costly. The Company applies the expertise of its management, its advisors, its employees and contractors to ensure compliance with current laws and relies on its land man in Mexico and legal council in both Mexico and the United States.

### **Title to mineral properties**

While the Company has investigated title to its mineral properties, this should not be construed as a guarantee of title. The properties may be subject to prior unregistered agreements or transfers and title may be affected by undetected defects. Unresolved native land claim issues in British Columbia and the Yukon Territory may affect the Company's

properties in these jurisdictions in the future.

### **Possible Dilution to Present and Prospective Shareholders**

The Company's plan of operation, in part, contemplates the financing of the conduct of its business by the issuance of cash, securities of the Company, or a combination of the two, and possibly, incurring debt. Any transaction involving the issuance of previously authorized but unissued shares of common stock, or securities convertible into common stock, would result in dilution, possibly substantial, to present and prospective holders of common stock. The Company usually seeks joint venture partners to fund in whole or in part exploration projects. This dilutes the Company's interest in properties it has acquired. This dilution of interest in properties is done to spread or minimize the risk and to expose the Company to more exploration plays but means that any profit that might result from a possible discovery would be shared with the joint venture partner. There is no guarantee that the Company can find a joint venture partner for any property.

---

### **Material Risk of Dilution Presented by Large Number of Outstanding Share Purchase Options and Warrants**

As of May 12, 2005 there were share purchase options outstanding allowing the holders of these options to purchase 4,176,783 shares of common stock and share purchase warrants outstanding allowing the holders to purchase 1,848,105 shares of common stock. Directors and officers of the Company hold 3,619,783 of these share purchase options. An additional 557,000 share purchase options are held by employees and consultants of the Company. None of the share purchase warrants are held by Directors. Given the fact that as of May 12, 2005 there were 31,172,767 shares of common stock outstanding, the exercise of all of the existing share purchase options and warrants would result in further dilution to the existing shareholders and could depress the price of the Company's shares.

### **Lack of Trading Volume**

The lack of trading volume of the Company's shares reduces the liquidity of an investment in the Company's shares.

### **Volatility of Share Price**

Market prices for shares of early stage companies are often volatile. Factors such as announcements of mineral discoveries, financial results, and other factors could have a significant effect on the price of the Company's shares.

### **Competition**

There is competition from other mining exploration companies with operations similar to those of the Company's. Many of the mining companies with which the Company competes have operations and financial strength greater than that of the Company.

### **Dependence on management**

The Company strongly depends on the business and technical expertise of its management and there is little possibility that this dependence will decrease in the near term.

### **Conflict of Interest**

Some of the Company's directors and officers are directors and officers of other natural resource or mining-related companies. These associations may give rise from time to time to conflicts of interest. As a result of which, the Company may miss the opportunity to participate in certain transactions and may have a material, adverse effect on its financial position.

**Exploration projects - Canada**

**Siwash Gold Deposit**

The Company completed a 44-hole, 10,265 meter diamond drill program in 2004 to test the continuity of mineralization at its wholly owned Siwash Gold Mine in B.C. Calculation of an updated resource estimate incorporating the diamond drill and mine sample data up to and including 2003 was completed in May of 2004 by Giroux Consultants Ltd. The estimate included a measured and indicated resource of 207,600 oz (6,457,000 grams) gold in 736,670 tons and an inferred resource of 207,800 oz (6,463,300 gm) gold in 1,451,950 tons. A drill program of approximately \$1,000,000 has been proposed for the current year.

**ATW Diamond Project, NWT, Canada**

Almaden has a net 37.5% interest in this project where work over the past several field seasons has identified the source area of the diamond indicator mineral train. A bathymetric survey of the area of interest is planned for the upcoming summer in preparation for diamond drilling in the February to April 2006 field season.

**PV and NIC Gold-Silver Projects, Canada**

These projects are optioned to Consolidated Spire Ventures Ltd. ("Spire") on terms whereby Spire can earn a 60% interest by spending \$1.3 million on exploration and issuing 600,000 shares to Almaden, all before the end of 2007.

---

### **Sam Gold-Silver Project, Canada**

An exploration program is planned for 2005 to include the following: further prospecting and recon rock/silt geochemical sampling, geological mapping, grid based soil geochemical sampling and mechanized trenching on both the Discovery and JJ mineral zones.

### **Exploration projects - Mexico**

#### **Fuego Gold-Silver Property**

This project is optioned to Horseshoe Gold Mining Inc. ("Horseshoe") under terms whereby Horseshoe has an option to earn a 50% interest by spending US\$2 million on exploration and issuing 1,000,000 shares to Almaden. Horseshoe has the option to acquire a further 10% interest by spending an additional US\$1 million on exploration. Upon Horseshoe earning a 60% interest, Almaden would have 120 days to sell its remaining 40% interest to Horseshoe in return for a 40% interest in the then issued capital of Horseshoe. Horseshoe has informed the Company that diamond drilling is planned for the first half of 2005.

#### **Caballo Blanco Gold-Silver Project**

This project is optioned to Comaplex Minerals Ltd. ("Comaplex") who can earn a 60% interest by spending US\$2 million. Comaplex informed the Company that diamond drilling is planned for the first half of 2005.

#### **Galeana Gold-Silver Project**

This project was optioned to Grid Capital Corp. ("Grid") who returned the property to Almaden early in 2005. The Company is waiting for final reports from Grid before determining further plans.

#### **El Pulpo Gold-Copper-Silver Project**

In December 2004, the Company entered into an agreement with Ross River Minerals Inc. in which the Company agreed to sell a 100% of its right, title and interest in the prospect for 2.2 million shares of Ross River. Ross River is required to issue an additional 1.0 million shares when exploration and development expenditures on the property meet or exceed US \$10.0 million and an additional 1.0 million shares on the delivery of a positive feasibility study recommending production on any part of the property. Almaden will retain a 2% NSR regarding any minerals from its formerly 100% owned concessions. After a feasibility study is completed on a mineral deposit, one half of this 2% NSR (a 1% NSR) can be purchased by Ross River from Almaden for fair market value as determined by an internationally recognized engineering firm acceptable to both parties. Final documentation is currently being completed.

**BHP Billiton Joint Venture**

The Company has renegotiated and extended its agreement with BHP to carry out grass roots exploration in a portion of Mexico for copper-gold deposits. The new agreement covers a reduced area within the much larger original area. It was selected based on results of the first phase program. The new agreement also capped the amount BHP Billiton would have to spend on any feasibility study it may conduct.

**San Carlos Copper-Gold Project**

The San Carlos project is optioned to Hawkeye Gold and Diamond Inc. ("Hawkeye"). On April 13, 2005, the Company renegotiated the option agreement made during March 2004. Under the terms of the new agreement. Under the terms of the new agreement, Hawkeye has the right to earn a 51-per-cent interest in the San Carlos property by:

1. issuing 850,000 common shares and paying US\$40,000.00 on or before the fifth business day next following the date of final acceptance (the new effective date)of the new agreement by the TSX Venture Exchange;
  2. issuing an additional 100,000 shares on each of the first and second anniversaries of the new effective date;
  3. incurring exploration expenses totalling not less than US\$450,000 not later than the first anniversary of the new effective date;
-

4. incurring further exploration expenses totalling not less than US\$550,000 not later than the second anniversary of the new effective date; and

5. incurring further exploration expenses totalling not less than US\$1-million not later than the third anniversary of the new effective date.

Hawkeye may also earn an additional 9-per-cent interest in the property by issuing 100,000 shares before each of the third, fourth and fifth anniversaries of the new effective date and by incurring additional exploration expenses totalling not less than US\$2-million not later than the sixth anniversary of the new effective date.

A 2-per-cent net smelter return is reserved to the original owner of certain of the claims. When Hawkeye has earned its interest in the property, a joint venture will be formed in respect of the property."

### **Selected quarterly financial information**

The following selected financial information is derived from the unaudited consolidated interim financial statements of the Company prepared in accordance with Canadian generally accepted accounting principles ("GAAP").

	For the quarters ended (unaudited)							
	Mar 31	Dec 31	Sept 30	Jun 30	Mar 31	Dec 31	Sep 30	Jun 30
	2005	2004	2004	2004	2004	2003	2003	2003
Total revenues	\$142,249	\$26,417	\$40,516	\$113,281	\$62,682	\$59,106	\$3,592	\$35,825
Net loss	162,899	1,757,487	725,410	258,688	324,218	567,215	260,373	223,008
Net loss per share	0.005	0.07	0.02	0.01	0.01	0.03	0.01	0.01
Write-down of interest in mineral properties	11,072	582,260	306,773	1,322	13,003	49,327	8,984	43,737
Stock option compensation	-	1,205,820	-	-	28,963	96,000	-	30,000
Working capital	4,273,829	4,659,617	5,325,508	5,136,067	5,255,565	5,100,785	1,832,684	1,042,920
Total assets	10,212,087	10,215,275	11,238,229	10,695,340	10,591,469	10,341,770	6,834,870	5,300,783

### **Results of operations**

Almaden's operations during the quarter ended March 31, 2005 produced a net loss of \$162,899 or \$0.005 per share compared to a net loss of \$324,218 or \$0.01 per share for the same quarter last year. The fluctuation in net loss is

primarily due to an increase in proceeds received (securities issued to the Company) from mineral properties option agreements in excess of the carrying value of the properties and the gain realized on the sale of such marketable securities.

The Company has no revenue from mining operations. Revenue currently consists of proceeds received from mineral properties option agreements in excess of the carrying value of the properties, interest income and the recovery of value-added tax in Mexico, all of which increased during the current quarter compared to the same fiscal quarter last year.

General and administrative costs increased during the current quarter as compared to the same quarter last year primarily due to the Company's co-ordination of its offsite storage facilities. The Company participated in the Vancouver Investment Conference and the Prospectors and Developers Association Conference in Toronto and engaged Kitco Casey to carry its corporate profile during the quarter. General exploration activities decreased during the current quarter.

Significant non-cash expenses include the write-down of marketable securities to the lower of cost or markets and the gain on sale of securities.

### **Liquidity and capital resources**

At March 31, 2005, the Company had cash and cash equivalents of \$3,748,632 as compared to \$4,125,706 at December 31, 2004, the Company's most recent year end. At March 31, 2005, the Company had working capital of \$4,273,829 as compared to \$4,659,617 at December 31, 2004. The decrease in cash is primarily due to investment in mineral properties made during the period. In addition, the market value of the Company's inventory of gold bullion at March 31, 2005 was \$832,724 - \$557,956 above book value. The market value of equity securities at March 31, 2005 was \$1,086,213 - \$554,687 above book value. These values differ from the GAAP based carrying value on the balance sheet which is at the lower of cost

---

Edgar Filing: ALMADEN MINERALS LTD - Form 6-K

or market. The Company deferred an exploration advance \$103,470 for an IP program undertaken in the following quarter. Also, included in working capital is a liability arising from the contingent obligation in the event the Company is unsuccessful in its appeal of assessed additional mineral tax for prior years. The Company expects its level of cash resources to be sufficient to meet its working capital and mineral exploration requirements for at least the next year. The Company has no long-term debt.

Cash used for operating activities during the quarter ended March 31, 2005 was \$105,331 compared to \$397,797 during the same quarter last year, after adjusting for the non-cash activities.

Cash flows from financing activities during the quarter ended March 31, 2005 were \$21,250 from the exercise of stock options compared to \$569,461 for the quarter ended March 31, 2004 primarily from private placement financings and the exercise of share purchase warrants.

Cash used for investing activities during the quarter ended March 31, 2005 was \$292,993 compared to \$303,868 during the same quarter last year. The primary reason for the decrease was due to proceeds received on the sale of marketable securities during the current quarter compared to the purchase of securities in the comparative quarter. Investment in property, plant and equipment decreased in the current quarter. Investment of \$373,217 was made in mineral properties interests, primarily the payment of the first half of 2005 mining taxes and staking of new claims in Mexico, payment in lieu on its Prospector Mountain claims in the Yukon and a geophysical program undertaken on the Erika project in Mexico.

**Contractual commitments**

The Company is committed under an operating lease for its office premises with the following aggregate minimum lease payments to the expiration of the lease on January 31, 2009. During Fiscal 2005, the Company intends to pay \$1,995 cash-in-lieu of work on its Cabin Lake claims to keep them in good standing. The Company must pay \$1,500 yearly for mineral lease rent on its Elk property. The Company renewed its Rock River coal licenses in Fiscal 2004 for a three-year term. The cost to Almaden (50%) will be \$9,385 in Fiscal 2005 and \$18,770 in Fiscal 2006. Should the Company not option its Galeana and As de Oro prospects in Mexico by the time their next option payments are due, the Company intends to make these payments of \$14,250 each (U.S.\$10,000 plus value added tax). All other property options payments on the Company's projects have been assumed by third parties who are earning their interests in the projects. In January 2005, the Company entered into a letter agreement to fund the purchase of a diamond drill at an estimated cost of \$200,000 of which \$105,000 has been advanced to date. The following table indicates the total aggregate contractual commitments for each period.

	2005	2006	2007	2008	2009	Thereafter
Office lease	\$27,945	\$37,260	\$37,260	\$37,260	\$3,105	-
Mineral property acquisition/maintenance						

payments	\$41,380	\$20,270	-	-	-	-
Property, plant and equipment acquisition	\$95,000	-	-	-	-	-

**Off-balance sheet arrangements**

The Company has no off-balance sheet arrangements other than disclosed above.

**Critical accounting estimates**

A detailed summary of all the Company's significant accounting policies is included in note 2 to the annual consolidated financial statements for the year ended December 31, 2004.

Significant estimates used in the preparation of these consolidated financial statements include, amongst other things, depreciation, determination of net recoverable value of assets, determination of fair value on taxes and contingencies.

## **Changes in accounting principles**

### **Stock-based compensation**

The Canadian Institute of Chartered Accountants ("CICA") amended the stock option compensation and other stock based payments accounting standard during 2003. The Company early adopted the standard and the consolidated financial statements for the years ended December 31, 2004 and 2003 reflect this. This change has been applied retroactively and the consolidated financial statements for 2002 have been restated. The effect of this change was to increase the net loss for the year ended December 31, 2002 by \$162,000 for a net loss of \$3,198,025. Please see Note 2(j) and 3(a) to the audited consolidated financial statements for the year ended December 31, 2004 for further details.

### **Flow-through shares**

The Emerging Issues Committee - 146 amended the accounting standard with respect to flow-through shares during 2004. The standard requires, for all flow-through shares issued subsequent to December 31, 2003, the recognition of the future income tax liability and a corresponding increase to deficit on the date the company renounces the tax credits associated with the expenditures, provided there is a reasonable assurance that the expenditures will be made.

The recognition of any portion of previously unrecognized future income tax assets will be recorded as a reduction of income tax expenses. The Company adopted the standard and the consolidated financial statements for the year ended December 31, 2004 reflect these recommendations.

### **Asset retirement**

The CICA issued a new standard relating to asset retirement obligations effective for fiscal years beginning on January 1, 2004. The standard requires the recognition in the financial statements of the liability associated with the net present value of future site reclamation costs when the liability is incurred. These obligations are initially measured at fair value and subsequently adjusted for the accretion of discount and any changes to the underlying costs. The asset retirement cost is to be capitalized and amortized into operations over time. Please see Note 3(c) to the audited consolidated financial statements for further details.

### **Outstanding share data**

The Company is authorized to issue 100,000,000 common shares without par value. As at May 12, 2005, there were 31,172,767 outstanding common shares.

During the quarter ended March 31, 2005, the Company received cash proceeds of \$21,250 on the exercise of stock options.

Directors, officers, employees and contractors are granted options to purchase common shares under the Company Stock Option Plan. This plan and its terms and outstanding balance are disclosed in note 9 to the consolidated

financial statements for the year ended December 31, 2004.

At the Annual & Special General Meeting of the Company scheduled for May 18, 2005, shareholders will be asked to consider and if deemed advisable to pass appropriate resolutions to change the number of common shares which the Company is authorized to issue from 100,000,000 to an unlimited number and to change the Company's Stock Option Plan from a fixed maximum number of 2,900,000 shares to a number not to exceed 10% of the issued and outstanding shares of the Company.

**Related party transactions**

A total of \$29,875 (2004 - \$27,600) was paid to a company controlled by Duane Poliquin, the President of the Company, for geological consulting services and web-site management services during the quarter. A total of \$18,000 (2004 - \$35,194) was paid to a company controlled by Morgan Poliquin, a Director of the Company, for geological consulting services during the quarter. These amounts are included in general exploration, mineral property costs and general and administrative. A total of \$17,482 (2004 - \$15,613) was paid to Dione Bitzer, an Officer of the Company for accounting services during the quarter. This amount is included in professional fees.

---

**Outlook**

Almaden currently has ten joint ventures and a regional exploration program with BHP Billiton underway to explore for copper-gold deposits in Mexico. The Company has a strong cash position that will enable it to continue its own exploration efforts in Mexico and Canada, seeking to identify new projects through early stage grass roots exploration and managing risk by forming joint ventures in which partner companies explore and develop such projects in return for the right to earn an interest in them.

**ALMADEN MINERALS LTD.**

Note to Consolidated Interim Financial Statements

March 31, 2005

(unaudited)

**1.**

**BASIS OF PRESENTATION**

These interim unaudited consolidated financial statements do not include all the disclosure required by Canadian generally accepted accounting principles for annual statements and should be read in conjunction with the annual audited financial statements for the year ended December 31, 2004, specifically the following Notes: Note 1 on the Nature of Operations; Note 2 on Significant Accounting Policies; Note 3 on Accounting Changes; and Note 16 on Contingency. These statements are prepared in accordance with recommendations for interim financial statements in conformity with Canadian generally accepted accounting principles. They have been prepared using the same accounting policies and methods as those used in the December 31, 2004 accounts.

Certain comparative balances have been reclassified to conform with the current period financial statement presentation.

**2.**

**MARKETABLE SECURITIES**

	March 31, 2005	December 31, 2004
Money market investments	\$ -	\$ -
Equity securities	531,526	504,754
	\$ 531,526	\$ 504,754

The market value of the investments as at March 31, 2005 was \$1,086,213 (December 31, 2004 - \$1,045,147).

**3.**

**INVENTORY**

Inventory consists of gold bullion which is valued at the lower of average cost of mining and estimated net realizable value. The market value of the gold at March 31, 2005 is \$832,724 (December 31, 2004 - \$843,599).

**6.****SHARE CAPITAL (Continued)**

## Options

The Company has a fixed stock option plan which permits the issuance of options up to 10% of the Company's issued share capital. The maximum number of shares reserved for issuance under this plan is 2,900,000. At March 31, 2005, the Company has granted all stock options available under the plan. The exercise price of an option cannot be less than the closing price of the common shares on the Toronto Stock Exchange on the day immediately preceding the grant of the option and the maximum term of all options is ten years. The Company also has stock options outstanding relating to the period before the introduction of the fixed stock option plan.

The Board of Directors determines the term of the option (to a maximum of 5 years) and the time during which any option may vest. No options were granted during the three months ended March 31, 2005.

The following table presents the outstanding options as at March 31, 2005 and changes during the period:

Fixed Options	Shares	Weighted Average Exercise Price
Outstanding at December 31, 2004	4,206,783	\$ 0.91
Exercised	(30,000)	0.71

Edgar Filing: ALMADEN MINERALS LTD - Form 6-K

Outstanding at March 31, 2005	4,176,783	\$0.91
Options exercisable at March 31, 2005	4,176,783	

The following table summarizes information about stock options outstanding at March 31, 2005

Number of Shares	Options Outstanding and Exercisable		Exercise Price
	Expiry Date		
35,000	January 28, 2006		2.35
560,000	March 1, 2006		0.30
