(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2008

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 000-23575

COMMUNITY WEST BANCSHARES

(Exact name of registrant as specified in its charter)

California
(State or other jurisdiction of incorporation
or organization)

77-0446957
(I.R.S. Employer Identification No.)

445 Pine Avenue, Goleta, California 93117
(Address of principal executive offices) (Zip Code)

(805) 692-5821
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES
 NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Number of shares of common stock of the registrant outstanding as of November 13, 2008: 5,915,130 shares

COMMUNITY WEST BANCSHARES

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

The interim consolidated financial statements reflect all adjustments and reclassifications that, in the opinion of management, are necessary for the fair presentation of the results of operations and financial condition for the interim period. The unaudited consolidated financial statements include Community West Bancshares (“CWBC”) and its wholly-owned subsidiary, Community West Bank N.A. (“CWB” or the “Bank”). CWBC and CWB are referred to herein as “the Company”. The accompanying unaudited condensed Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) and with the instructions to Form 10-Q and Article 8 of Regulation S-X promulgated by the Securities and Exchange Commission (“SEC”). Accordingly, they do not include all of the information and footnotes required for complete financial statements. In the opinion of management, all adjustments (consisting only of normal recurring accruals) considered necessary for a fair statement have been reflected in the financial statements. However, the results of operations for the nine-month period ended September 30, 2008 are not necessarily indicative of the results to be expected for the full year.

These unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto of Community West Bancshares included in the Company's Annual Report on Form 10-K for the year ended December 31, 2007.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Provision and Allowance for Loan Losses – The Company maintains a detailed, systematic analysis and procedural discipline to determine the amount of the allowance for loan losses (“ALL”). The ALL is based on estimates and is intended to be adequate to provide for probable losses inherent in the loan portfolio. This process involves deriving probable loss estimates that are based on individual loan loss estimation, migration analysis/historical loss rates and management’s judgment.

The Company employs several methodologies for estimating probable losses. Methodologies are determined based on a number of factors, including type of asset, risk rating, concentrations, collateral value and the input of the Special Assets group, functioning as a workout unit.

The ALL calculation for the different major loan types is as follows:

- SBA – All loans are reviewed and impaired loans are assigned a specific allowance. A migration analysis and various portfolio specific factors are used to calculate the required allowance for loans not impaired.
- Relationship Banking – Includes commercial, commercial real estate and consumer loans. Impaired loans are assigned a specific allowance. A migration analysis and various portfolio specific factors are used to calculate the required allowance on the remaining pass loans.
- Manufactured Housing – An allowance is calculated on the basis of risk rating, which is a combination of delinquency, value of collateral on classified loans and perceived risk in the product line.

The Company calculates the required ALL on a monthly basis. Any differences between estimated and actual observed losses from the prior month are reflected in the current period required ALL calculation and adjusted as deemed necessary. The review of the adequacy of the allowance takes into consideration such factors as

concentrations of credit, changes in the growth, size and composition of the loan portfolio, overall and individual portfolio quality, review of specific problem loans, collateral, guarantees and economic conditions that may affect the borrowers' ability to pay and/or the value of the underlying collateral. Additional factors considered include: geographic location of borrowers, changes in the Company's product-specific credit policy and lending staff experience. These estimates depend on subjective factors and, therefore, contain inherent uncertainties.

The Company's ALL is maintained at a level believed adequate by management to absorb known and inherent probable losses on existing loans. A provision for loan losses is charged to expense. The allowance is charged for losses when management believes that full recovery on the loan is unlikely. Generally, the Company charges off any loan classified as a "loss"; portions of loans which are deemed to be uncollectible; overdrafts which have been outstanding for more than 90 days; and, all other unsecured loans past due 120 or more days. Subsequent recoveries, if any, are credited to the ALL.

Servicing Rights – The guaranteed portion of certain SBA loans are sold into the secondary market. Servicing rights are recognized as separate assets when loans are sold with servicing retained. Servicing rights are amortized in proportion to, and over the period of, estimated future net servicing income. The Company uses industry prepayment statistics and its own prepayment experience in estimating the expected life of the loans. Management periodically evaluates servicing rights for impairment. Servicing rights are evaluated for impairment based upon the fair value of the rights as compared to amortized cost on a loan-by-loan basis. Fair value is determined using discounted future cash flows calculated on a loan-by-loan basis and aggregated to the total asset level. The initial servicing rights and resulting gain on sale are calculated based on the difference between the best actual par and premium bids on an individual loan basis.

Table of Contents

Other Assets Acquired Through Foreclosure – Other assets acquired through foreclosure includes real estate and other assets acquired through foreclosure on the collateral property and is recorded at the appraised value at the time of foreclosure less estimated costs to sell . Any excess of loan balance over the net realizable value of the other assets is charged-off against the allowance for loan losses. Subsequent to foreclosure, management periodically performs a new valuation and the asset is carried at the lower of carrying amount or fair value less estimated costs to sell. Operating expenses or income, and gains or losses on disposition of such properties, are recorded in current operations.

Recent Accounting Pronouncements – In September 2006, the FASB issued Statement No. 157, “Fair Value Measurements” (“SFAS 157”). SFAS 157 addresses how companies should measure fair value when they are required to use a fair value measure for recognition or disclosure purposes under U.S. GAAP. SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS 157 is effective prospectively for fiscal years beginning after November 15, 2007. The Company adopted SFAS 157 on January 1, 2008. The adoption did not have a material impact on the Company’s financial condition, results of operations or cash flows. See Note 4 for the additional disclosure requirements for certain fair value measurements impacted by SFAS 157.

In February 2007, the FASB issued Statement No. 159, “The Fair Value Option for Financial Assets and Financial Liabilities” (“SFAS 159”). SFAS 159 would allow the Company an irrevocable election to measure certain financial assets and liabilities at fair value, with unrealized gains and losses on the elected items recognized in earnings at each reporting period. The fair value option may only be elected at the time of initial recognition of a financial asset or financial liability or upon the occurrence of certain specified events. The election is applied on an instrument by instrument basis, with a few exceptions, and is applied only to entire instruments and not to portions of instruments. SFAS 159 also provides expanded disclosure requirements regarding the effects of electing the fair value option on the financial statements. SFAS 159 is effective prospectively for fiscal years beginning after November 15, 2007. The Company adopted SFAS 159 on January 1, 2008. The Company did not elect the fair value option, under SFAS 159, for any of our existing financial assets or financial liabilities as of January 1, 2008, nor have we elected the fair value option for any new financial assets or financial liabilities originated or entered into during the first nine months of 2008.

2. LOAN SALES AND SERVICING

SBA Loan Sales - The Company occasionally sells the guaranteed portion of selected SBA loans into the secondary market on a servicing-retained basis. The Company retains the unguaranteed portion of these loans and services the loans as required under the SBA programs to retain specified yield amounts. The SBA program stipulates that the Company retains a minimum of 5% of the loan balance, which is unguaranteed. The percentage of each unguaranteed loan in excess of 5% may be periodically sold to a third party, typically for a cash premium. The Company records servicing liabilities for the unguaranteed loans sold calculated based on the present value of the estimated future servicing costs associated with each loan. The balance of all servicing rights and obligations is subsequently amortized over the estimated life of the loans using an estimated prepayment rate of 5-25%. Quarterly, the servicing asset is analyzed for impairment.

The Company also periodically sells certain SBA loans into the secondary market, on a servicing-released basis, typically for a cash premium.

As of September 30, 2008 and December 31, 2007, the Company had approximately \$117.1 million and \$108.9 million, respectively, in SBA loans included in loans held for sale.

Mortgage Loan Sales – The Company enters into mortgage loan rate lock commitments (normally for 30 days) with potential borrowers. In conjunction therewith, the Company enters into a forward sale commitment to sell the locked loan to a third party investor. This forward sale agreement requires delivery of the loan on a “best efforts” basis but does not obligate the Company to deliver if the mortgage loan does not fund.

The mortgage rate lock agreement and the forward sale agreement qualify as derivatives under SFAS No. 133, as amended. The value of these derivatives is generally equal to the fee, if any, charged to the borrower at inception but may fluctuate in the event of changes in interest rates. These derivative financial instruments are recorded at fair value if material. Although the Company does not attempt to qualify these transactions for the special hedge accounting afforded by SFAS No. 133, management believes that changes in the fair value of the two commitments generally offset and create an economic hedge. At September 30, 2008 and December 31, 2007, the Company had \$5.3 million and \$7.6 million, respectively, in notional amount of outstanding mortgage loan rate locks and forward sale commitments, the impact of which was not material to the Company’s financial position or results of operations.

Table of Contents

3. LOANS HELD FOR INVESTMENT

The composition of the Company's loans held for investment portfolio follows:

	September 30, 2008	December 31, 2007
	(in thousands)	
Commercial	\$ 74,136	\$ 72,470
Real estate	130,448	136,734
SBA	39,455	34,021

Securitized	6,047	7,507
Other installment	13,847	10,027
	450,986	433,697
Less:		
Allowance for loan losses	6,499	4,412
Deferred fees, net of costs	(168)	25
Purchased premiums on securitized loans	(48)	(73)
Discount on SBA loans	836	583
Loans held for investment, net	\$ 443,867	\$ 428,750

An analysis of the allowance for credit losses for loans held for investment follows for the three and nine months ended:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
	(in thousands)			
Balance, beginning of period	\$ 6,423	\$ 4,047	\$ 4,412	\$ 3,926
Loans charged off	(588)	(319)	(1,831)	(499)
Recoveries on loans previously charged off	12	18	62	97
Net charge-offs	(576)	(301)	(1,769)	(402)
Provision for loan losses	652	547	3,856	769
Balance, end of period	\$ 6,499	\$ 4,293	\$ 6,499	\$ 4,293

As of September 30, 2008 and December 31, 2007, the Company also had reserves for credit losses on undisbursed loans of \$106,000 and \$73,000 respectively.

The recorded investment in loans that is considered to be impaired:

	September 30, 2008	December 31, 2007
	(in thousands)	
Impaired loans without specific valuation allowances	\$ -	\$ 33
Impaired loans with specific valuation allowances	8,772	16,468
Specific valuation allowances allocated to impaired loans	(160)	(966)
Impaired loans, net	\$ 8,612	\$ 15,535

Average investment in impaired loans	\$	9,935	\$	9,386
--------------------------------------	----	-------	----	-------

9

Table of Contents

4. FAIR VALUE MEASUREMENT

SFAS 157 defines fair value as the exchange price that would be received for an asset or the price that would be paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. SFAS 157 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1 – Quoted prices in active markets for identical assets and liabilities

Level 2 – Observable inputs other than quoted market prices in active markets for identical assets and liabilities

Level 3 – Unobservable inputs

The following summarizes the fair value measurements of assets measured on a recurring basis as of September 30, 2008 and the relative levels of inputs from which such amounts were derived:

Description	Total	Fair value measurements at reporting date using		
		Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
(in thousands)				
Investment securities available-for-sale	\$ 5,041	\$ -	\$ 5,041	\$ -
Interest only strips (included in other assets)	579	-		579
Total	\$ 5,620	\$ -	\$ 5,041	\$ 579

On certain SBA loan sales that occurred prior to 2003, the Company retained interest only strips (“I/O strips”), which represent the present value of excess net cash flows generated by the difference between (a) interest at the stated rate paid by borrowers and (b) the sum of (i) pass-through interest paid to third-party investors and (ii) contractual servicing fees. Interest only strips are classified as level 3 in the fair value hierarchy. The fair value is determined on a quarterly basis through a discounted cash flow analysis prepared by an independent third party using industry prepayment speeds. The interest only strips were valued at \$785,000 as of December 31, 2007. Valuation adjustments relating to the interest only strips of \$94,000 and \$206,000 were recorded in income for the three and nine months ended September 30, 2008, respectively. No other changes in the balance have occurred related to the interest only strips and such valuation adjustments are included as offset to loan servicing income.

The Company also has assets that under certain conditions are subject to measurement at fair value on a non-recurring basis. These assets are loans that are considered impaired per Financial Accounting Standard Board Statement No. 114 (“FAS 114”). A loan is considered impaired when, based on current information or events, it is probable that not all amounts due will be collected according to the contractual terms of the loan agreement. For loans secured by real estate or other assets which are dependent upon liquidation of collateral for repayment, impairment is measured based on the fair value of the underlying collateral and are classified as Level 2. The collateral value is determined based on appraisals and other market valuations for similar assets. For loans classified as Level 3, impairment is measured based on the net present value of future cash flow.

The following summarizes the fair value measurements of assets measured on a non-recurring basis as of September 30, 2008 and the relative levels of inputs from which such amounts were derived:

Description	Total	Fair value measurements at reporting date using		
		Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Impaired loans	\$ 8,612	\$ -	\$ 8,225	\$ 387

(in thousands)

Table of Contents

5. EARNINGS PER SHARE

Earnings per share – Basic has been computed based on the weighted average number of shares outstanding during each period. Earnings per share – Diluted has been computed based on the weighted average number of shares outstanding during each period plus the dilutive effect of granted options. Earnings per share were computed as follows:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2008	2007	2008	2007
	(dollars in thousands except per share amounts)

6. BORROWINGS

Federal Home Loan Bank Advances – The Company has a blanket lien credit line with the Federal Home Loan Bank (“FHLB”). Advances are collateralized in the aggregate by CWB’s eligible loans and securities. Total FHLB advances were \$100.5 million and \$121.0 million at September 30, 2008 and December 31, 2007, respectively, and include \$7.5 million and \$17.5 million, respectively, borrowed at variable rates which adjust to the current LIBOR rate either monthly or quarterly. At September 30, 2008 and December 31, 2007, CWB had securities pledged to FHLB of \$38.0 million at carrying value and loans of \$141.2 million, and \$38.1 million at carrying value and loans of \$150.0 million, respectively. Total FHLB interest expense for the nine months ended September 30, 2008 and 2007 was \$3.8 million and \$3.6 million, respectively. At September 30, 2008, CWB had \$20.0 million available for additional borrowings with the FHLB.

7. SUBSEQUENT EVENT

On November 12, 2008, the Company received preliminary approval to participate in the U.S. Treasury’s (Treasury) Troubled Asset Relief Program (TARP) and its Capital Purchase Program (CPP) up to 3% of the Bank’s risk-weighted assets. As of September 30, 2008, the Bank had \$520.1 million of risk-weighted assets; therefore, the expected amount of capital to be received under the CPP will not exceed \$15.6 million, to be issued to the Treasury as Senior Preferred shares, and will pay a dividend of 5% for the first five years and 9% thereafter. In connection therewith, the Company will issue to the Treasury warrants to purchase common stock with an aggregate market price equal to 15% of the Senior Preferred shares. The Company is in process of obtaining shareholder approval to amend its Articles of Incorporation to allow for the issuance of preferred shares.

ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF
2. OPERATIONS

This discussion is designed to provide insight into management's assessment of significant trends related to the Company's consolidated financial condition, results of operations, liquidity, capital resources and interest rate sensitivity. It should be read in conjunction with the unaudited interim consolidated financial statements and notes thereto and the other financial information appearing elsewhere in this report.

Forward Looking Statements

This Report on Form 10-Q contains statements that constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Those forward-looking statements include statements regarding the intent, belief or current expectations of the Company and its management. Any such forward-looking statements are not guarantees of future performance and involve risks and uncertainties, and actual results may differ materially from those projected in the forward-looking statements. The Company does not undertake any obligation to revise or update publicly any forward-looking statements for any reason.

The following discussion should be read in conjunction with the Company's financial statements and the related notes provided under "Item 1—Financial Statements" above.

Overview of Earnings Performance

The Company reported net income of \$675,000, or \$.11 per diluted share, for the third quarter 2008 compared to net income of \$963,000, or \$0.16 per diluted share, for the third quarter 2007.

The significant factors impacting operations for the third quarter 2008 were:

- a decline in interest income from loans of \$650,000 due to the decline in yields, in part, resulting from the impact of actions of the Federal Open Market Committee (FOMC), which was partly offset by an increase to the average loan balance of \$77.5 million for the third quarter 2008 compared to 2007
- a 275 basis point cut in the target federal funds rate from 4.75% at September 30, 2007 to 2.00% as of September 30, 2008, impacting both yields on loans and rates paid on deposits and contributing to a 79 basis point decline in net interest margin from 4.39% to 3.60%
- loan loss provision of \$652,000 for the third quarter 2008 reflecting management's assessment of heightened credit risk for the Company related to the current macroeconomic conditions impacting California and national business, real estate and consumer markets
 - relatively flat non-interest income and non-interest expenses for the third quarter 2008 compared to 2007

Critical Accounting Policies

A number of critical accounting policies are used in the preparation of the Company's consolidated financial statements. These policies relate to areas of the financial statements that involve estimates and judgments made by management. These include: the provision and allowance for loan losses and servicing rights. These critical accounting policies are discussed in the Company's 2007 Annual Report on Form 10-K with a description of how the estimates are determined and an indication of the consequences of an over or under estimate.

Table of Contents

Results of Operations – Third Quarter Comparison

The following table sets forth for the periods indicated, certain items in the consolidated income statements of the Company and the related changes between those periods:

	Three Months Ended September 30,		Increase (Decrease)
	2008	2007	
	(dollars in thousands, except per share amounts)		
Interest income	\$ 11,336	\$ 12,030	\$ (694)
Interest expense	5,562	5,877	(315)
Net interest income	5,774	6,153	(379)
Provision for loan losses	652	547	105
Net interest income after provision for loan losses	5,122	5,606	(484)
Non-interest income	1,198	1,212	(14)
Non-interest expenses	5,154	5,154	-
Income before provision for income taxes	1,166	1,664	(498)
Provision for income taxes	491	701	(210)
Net income	\$ 675	\$ 963	\$ (288)
Income per share – Basic	\$.11	\$.16	\$ (.05)
Income per share – Diluted	\$.11	\$.16	\$ (.05)
Comprehensive income	\$ 692	\$ 1,012	\$ (320)

The following table sets forth the changes in interest income and expense attributable to changes in rate and volume:

	Three Months Ended September 30, 2008 versus 2007		
	Total change	Change due to Rate	Volume
	(in thousands)		
Loans, net	\$ (650)	\$ (2,001)	\$ 1,351
Investment securities	64	11	53
Other	(108)	(115)	7
Total interest-earning assets	(694)	(2,105)	1,411
Deposits	(290)	(1,196)	906
Other borrowings	(25)	(68)	43
Total interest-bearing liabilities	(315)	(1,264)	949
Net interest income	\$ (379)	\$ (841)	\$ 462

Net Interest Income

Net interest income declined by \$379,000 for the third quarter 2008 compared to 2007. Total interest income declined by \$694,000. While average interest earning assets grew to \$637.3 million for the third quarter 2008 compared to \$555.4 million for the same period in 2007, an increase of \$81.9 million, yields declined to 7.08% from 8.59% and the net interest margin declined 79 basis points from 4.39% to 3.60%. The decline in interest income due to rates of \$2.1 million exceeded the increase of \$1.4 million due to volume growth.

The decline in rates benefited the Bank in a reduction in interest expense of \$315,000. The decline due to rates of \$1.3 million was partly offset by the increase due to deposit growth and borrowing volume of \$949,000 for the third quarter of 2008 compared to 2007.

The rapid nature of the reduction in the target federal funds rate by the FOMC over the last year from 4.75% at September 30, 2007 to 2.00% at September 30, 2008, for asset-sensitive institutions, tended to reduce yields on interest earning assets more quickly than rates paid on interest bearing liabilities, primarily deposits.

Provision for Loan Losses

The provision for loan losses increased to \$652,000 for the third quarter 2008 reflecting management's assessment of increased credit risk for the Company related to weaknesses in our portfolio identified by management as well as the current California and national business, real estate and consumer economic slowdown. The provision is impacted by both quantitative factors resulting from actual loss experience and qualitative factors which take into consideration management's judgment regarding several internal and external factors including concentration of credit risk and overall macroeconomic conditions. The higher provision is primarily a result of increased qualitative factors which reflect the aforementioned economic circumstances and outlook. The Bank continues to diligently monitor the portfolio implementing policies and procedures developed to assist in identifying weaknesses in its portfolio. The Bank has also enhanced underwriting standards as necessary to prudently reflect the dynamics of the current economic outlook.

Table of Contents

Non-Interest Income

Non-interest income includes gains from sale of loans, loan document fees, service charges on deposit accounts, loan servicing fees and other revenues not derived from interest on earning assets. Non-interest income remained flat for the third quarter of 2008 compared to the same period in 2007, declining by \$14,000.

Non-Interest Expenses

Non-interest expenses remained flat for the third quarter 2008 compared to 2007 reflecting management's continuing efforts to control costs.

Results of Operations –Nine-Month Comparison

The following table sets forth for the periods indicated, certain items in the consolidated income statements of the Company and the related changes between those periods:

	Nine Months Ended September 30,		Increase (Decrease)
	2008	2007	
	(dollars in thousands, except per share amounts)

Net interest income	\$ (154)	\$ (2,114)	\$ 1,960

Table of Contents

Net Interest Income

Net interest income declined by \$154,000 for the first nine months of 2008 compared to 2007. Total interest income increased \$25,000 for the period ended September 30, 2008 compared to the same period in 2007. The increase of \$4.7 million due to growth in average earning assets was offset by a \$4.7 million decline due to lower rates. For the first nine months of 2008, average earning assets were \$623.4 million compared to \$538.5 million for the same period in 2007, an increase of 15.8%. This growth was offset by the decline in yield on interest earning assets to 7.44% for the first nine months of 2008 from 8.62% for 2007 and a corresponding 64 basis point decline in net interest margin from 4.44% to 3.80%.

Interest expense increased \$179,000, or 1.1%, for the first nine months of 2008 compared to 2007. The increase due to volume of \$2.7 million was mostly offset due to a decline of 2.6 million attributable to lower rates paid on deposits and borrowings. Rates paid on interest bearing liabilities declined from 4.83% for the first nine months on 2007 to 4.15% for the same period of 2008.

Provision for Loan Losses

The provision for loan losses increased to \$3.9 million for the first nine months of 2008 compared to \$769,000 for the same period of 2007. This increase reflected management's assessment of increased credit risk for the Company related to weaknesses in our portfolio identified by management as well as the current California and national business, real estate and consumer economic slowdown. The provision is impacted by both quantitative factors resulting from actual loss experience and qualitative factors which take into consideration management's judgment regarding several internal and external factors including concentration of credit risk and overall macroeconomic conditions. The higher provision is primarily a result of increased qualitative factors which reflect the aforementioned economic circumstances and outlook. The Bank continues to diligently monitor the portfolio implementing policies and procedures developed to assist in identifying weaknesses in its loan portfolio. The Bank also has enhanced underwriting standards as necessary to prudently reflect the dynamics of the current economic outlook.

Non-Interest Income

Non-interest income for the first nine months of 2008 increased by \$463,000 over the same period of 2008 primarily due to an increase of \$314,000 in gains on loans sales and the net gain on the sale of other foreclosed assets of \$198,000 included in other income. The Company sold \$19.7 million in guaranteed SBA loans and \$1.7 million in unguaranteed SBA loans for the first nine months of 2008 compared to \$5.3 million in guaranteed and \$3.5 million in unguaranteed for the same period of 2007. Loan servicing income also increased \$312,000 due to lower amortization of the servicing asset and I/O strip. These increases were partly offset by a decline of \$351,000 in other loan fees.

Non-Interest Expenses

Non-interest expenses remained flat with a decline of \$9,000 for the first nine months of 2008 compared to 2007.

Table of Contents

Interest Rates and Differentials

The following table illustrates average yields on interest-earning assets and average rates on interest-bearing liabilities for the periods indicated.

Table of Contents

Average yields and rates are derived by dividing interest income by the average balances of interest-earning assets and by dividing interest expense by the average balances of interest-bearing liabilities for the periods indicated. Amounts outstanding are averages of daily balances during the applicable periods.

Nonaccrual loans are included in the average balance of loans outstanding.

Net interest income is the difference between the interest and fees earned on loans and investments and the interest expense paid on deposits and other liabilities. The amount by which interest income will exceed interest expense depends on the volume or balance of earning assets compared to the volume or balance of interest-bearing deposits and liabilities and the interest rate earned on those interest-earning assets compared to the interest rate paid on those interest-bearing liabilities.

Net interest margin is net interest income expressed as a percentage of average earning assets. It is used to measure the difference between the average rate of interest earned on assets and the average rate of interest that must be paid on liabilities used to fund those assets. To maintain its net interest margin, the Company must manage the relationship between interest earned and paid.

Financial Condition

Average total assets increased by \$84.9 million, or 15.3%, to \$638.9 million at September 30, 2008 compared to \$553.9 million at September 30, 2007. Average total equity increased by 5.5% to \$51.3 million at September 30, 2008 from \$48.6 million at September 30, 2007. Average total gross loans at September 30, 2008 increased by \$82.0 million, or 17.0%, to \$565.9 million from \$483.9 million at September 30, 2007. Average deposits also increased from \$401.2 million at September 30, 2007 to \$472.9 million as of September 30, 2008.

The book value per share increased to \$8.64 at September 30, 2008 from \$8.51 at December 31, 2007.

Selected balance sheet accounts (dollars in thousands)	September 30, 2008	December 31, 2007	Increase (Decrease)	Percent of Increase (Decrease)

Nonaccrual, Past Due and Restructured Loans

A loan is considered impaired when, based on current information, it is probable that the Company will be unable to collect the scheduled payments of principal or interest under the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value and the probability of collecting scheduled principal and interest payments. Loans that experience insignificant payment delays or payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays or payment shortfalls on a case-by-case basis. When determining the possibility of impairment, management considers the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed. For collateral-dependent loans, the Company uses the fair value of collateral method to measure impairment. All other loans, except for securitized loans, are measured for impairment based on the present value of future cash flows. Impairment is measured on a loan-by-loan basis for all loans in the portfolio except for the securitized loans, which are evaluated for impairment on a collective basis.

Table of Contents

The following schedule reflects recorded investment in loans that are considered to be impaired:

	September 30, 2008	December 31, 2007
	(in thousands)	
Impaired loans without specific valuation allowances	\$ -	\$ 33
Impaired loans with specific valuation allowances	8,772	16,468
Specific valuation allowances allocated to impaired loans	(160)	(966)
Impaired loans, net	\$ 8,612	\$ 15,535
Average investment in impaired loans	\$ 9,935	\$ 9,386

The decline in impaired loans from December 31, 2007 to September 30, 2008 was primarily related to two loans, one on a condominium project and one on raw land. The loans were retired with two new loans made by the Bank to the junior lien holder on the properties after the junior lien holder had foreclosed. The Company believes that the new borrower and guarantors evidence satisfactory capacity to meet the terms of the new obligation and have been performing as agreed.

The following schedule reflects recorded investment at the dates indicated in certain types of loans:

	September 30, 2008	December 31, 2007
	(dollars in thousands)	
Nonaccrual loans	\$ 20,309	\$ 15,341
SBA guaranteed portion of loans included above	(8,303)	(5,695)
Nonaccrual loans, net	\$ 12,006	\$ 9,646
Troubled debt restructured loans, gross	\$ 5,408	\$ 7,255
Loans 30 through 89 days past due with interest accruing	\$ 8,377	\$ 18,898
Allowance for loan losses to gross loans	1.14%	.81%
Allowance for loan losses to gross loans less SBA guaranteed	1.36%	.97%

The higher allowance is primarily a result of increased qualitative factors reflecting management's judgment regarding several internal and external factors including concentration of credit risk and overall economic conditions. The Bank continues to diligently monitor the portfolio and has enhanced underwriting standards as necessary to prudently reflect the dynamics of the current economic outlook. In addition, we are addressing our adherence to independent appraisal procedures, developing a program to manage risk in the Bank's commercial real estate portfolio, implementing an asset diversification program to monitor credit concentrations and access risks inherent therein, and continuing to enhance our methods and procedures to maintain the adequacy of the allowance for loan losses, including: improving our process for identifying impaired loans, segmenting loans by groups consistent with accounting standards and monitoring the fair value of collateral on collateral-dependent loans.

CWB generally repurchases the guaranteed portion of SBA loans from investors when those loans become past due 120 days. After the foreclosure and collection process is complete, the SBA reimburses CWB for this principal balance. Therefore, although these balances do not earn interest during this period, they generally do not result in a loss of principal to CWB.

Table of Contents

Liquidity and Capital Resources

Liquidity Management

The Company has established policies as well as analytical tools to manage liquidity. Proper liquidity management ensures that sufficient funds are available to meet normal operating demands in addition to unexpected customer demand for funds, such as high levels of deposit withdrawals or increased loan demand, in a timely and cost effective manner. The most important factor in the preservation of liquidity is maintaining public confidence that facilitates the retention and growth of core deposits. Ultimately, public confidence is gained through profitable operations, sound credit quality and a strong capital position. The Company's liquidity management is viewed from a long-term and short-term perspective, as well as from an asset and liability perspective. Management monitors liquidity through regular reviews of maturity profiles, funding sources and loan and deposit forecasts to minimize funding risk. The Company has asset/liability committees ("ALCO") at the Board and Bank management level to review asset/liability management and liquidity issues. The Company maintains strategic liquidity and contingency plans. The Company uses short-term time certificates from other financial institutions to meet projected liquidity needs.

CWB has a blanket lien credit line with the Federal Home Loan Bank ("FHLB"). Advances are collateralized in the aggregate by CWB's eligible loans and securities. Total FHLB advances were \$100.5 million and \$121.0 million at September 30, 2008 and December 31, 2007, respectively, and include \$7.5 million and \$17.5 million, respectively, borrowed at variable rates which adjust to the current LIBOR rate either monthly or quarterly. At September 30, 2008 and December 31, 2007, CWB had securities pledged to FHLB of \$38.0 million at carrying value and loans of \$141.2 million, and \$38.1 million at carrying value and loans of \$150.0 million, respectively. Total FHLB interest expense for the nine months ended September 30, 2008 and 2007 was \$3.8 million and \$3.6 million, respectively. At September 30, 2008, CWB had \$20.0 million available for additional borrowings with the FHLB.

CWB also maintains four federal funds purchased lines for a total borrowing capacity of \$23.5 million.

The Company has not experienced disintermediation and does not believe this is a probable occurrence. The liquidity ratio of the Company was 22% at September 30, 2008 and December 31, 2007. The Company's liquidity ratio fluctuates in conjunction with loan funding demands. The liquidity ratio consists of cash and due from banks, deposits in other financial institutions, available-for-sale investments, federal funds sold and loans held for sale, divided by total assets.

CWBC's routine funding requirements primarily consist of certain operating expenses. Normally, CWBC obtains funding to meet its obligations from dividends collected from its subsidiary and has the capability to issue debt securities. Federal banking laws regulate the amount of dividends that may be paid by banking subsidiaries without prior approval.

Interest Rate Risk

The Company is exposed to different types of interest rate risks. These risks include: lag, repricing, basis and prepayment risk.

Lag Risk – lag risk results from the inherent timing difference between the repricing of the Company's adjustable rate assets and liabilities. For instance, certain loans tied to the prime rate index may only reprice on a quarterly basis. However, at a community bank such as CWB, when rates are rising, funding sources tend to reprice more slowly than the loans. Therefore, for CWB, the effect of this timing difference is generally favorable during a period of rising interest rates and unfavorable during a period of declining interest rates. This lag can produce some short-term volatility, particularly in times of numerous prime rate changes.

Repricing Risk – repricing risk is caused by the mismatch in the maturities / repricing periods between interest-earning assets and interest-bearing liabilities. If CWB was perfectly matched, the net interest margin would expand during rising rate periods and contract during falling rate periods. This is so since loans tend to reprice more quickly than do funding sources. Typically, since CWB is somewhat asset sensitive, this would also tend to expand the net interest margin during times of interest rate increases.

Basis Risk – item pricing tied to different indices may tend to react differently, however, all CWB's variable products are priced off the prime rate.

Prepayment Risk – prepayment risk results from borrowers paying down / off their loans prior to maturity. Prepayments on fixed-rate products increase in falling interest rate environments and decrease in rising interest rate environments. Since a majority of CWB's loan originations are adjustable rate and set based on prime, and there is little lag time on the reset, CWB does not experience significant prepayments. However, CWB does have more prepayment risk on its securitized and manufactured housing loans and its mortgage-backed investment securities.

Table of Contents

Management of Interest Rate Risk

To mitigate the impact of changes in market interest rates on the Company's interest-earning assets and interest-bearing liabilities, the amounts and maturities are actively managed. Short-term, adjustable-rate assets are generally retained as they have similar repricing characteristics as our funding sources. CWB sells mortgage products and a portion of its SBA loan originations. While the Company has some interest rate exposure in excess of five years, it has internal policy limits designed to minimize risk should interest rates rise. Currently, the Company does not use derivative instruments to help manage risk, but will consider such instruments in the future if the perceived need should arise.

Loan sales - The Company's ability to originate, purchase and sell loans is also significantly impacted by changes in interest rates. Increases in interest rates may also reduce the amount of loan and commitment fees received by CWB. A significant decline in interest rates could also decrease the size of CWB's servicing portfolio and the related servicing income by increasing the level of prepayments.

Capital Resources

The Company (on a consolidated basis) and CWB are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory - and possibly additional discretionary - actions by regulators that, if undertaken, could have a direct material effect on the Company's and CWB's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and CWB must meet specific capital guidelines that involve quantitative measures of the Company's and CWB's assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The Company's and CWB's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. Prompt corrective action provisions are not applicable to bank holding companies.

The Federal Deposit Insurance Corporation Improvement Act ("FDICIA") contains rules as to the legal and regulatory environment for insured depository institutions, including reductions in insurance coverage for certain kinds of deposits, increased supervision by the federal regulatory agencies, increased reporting requirements for insured institutions and new regulations concerning internal controls, accounting and operations. The prompt corrective action regulations of FDICIA define specific capital categories based on the institutions' capital ratios. The capital categories, in declining order, are "well capitalized", "adequately capitalized", "undercapitalized", "significantly undercapitalized" and "critically undercapitalized". To be considered "well capitalized", an institution must have a core capital ratio of at least 5% and a total risk-based capital ratio of at least 10%. Additionally, FDICIA imposes Tier I risk-based capital ratio of at least 6% to be considered "well capitalized". Tier I risk-based capital is, primarily, common stock and retained earnings, net of goodwill and other intangible assets.

Table of Contents

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios (set forth in the following table) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined) and of Tier 1 capital (as defined) to average assets (as defined). The Company's and CWB's actual capital amounts and ratios as of September 30, 2008 and December 31, 2007 are presented in the table below:

(dollars in thousands)	Total Capital	Tier 1 Capital	Risk-Weighted Assets	Adjusted Average Assets	Total Risk-Based Capital Ratio	Tier 1 Risk-Based Capital Ratio	Tier 1 Leverage Ratio
September 30, 2008							
CWBC							
(Consolidated)	\$ 57,494	\$ 50,991	\$ 520,088	\$ 652,265	11.05%	9.80%	7.82%
CWB	57,256	50,753	520,135	651,883	11.01	9.76	7.79
December 31, 2007							
CWBC							
(Consolidated)	\$ 54,479	\$ 50,067	\$ 507,228	\$ 596,631	10.74%	9.87%	8.39%
CWB	51,520	47,108	507,017	591,755	10.16	9.29	7.96
Well capitalized ratios					10.00	6.00	5.00
Minimum capital ratios					8.00	4.00	4.00

The Company is working to further enhance its capital position. The United States Department of Treasury (Treasury), under the TARP Capital Purchase Program (CPP), instituted by the Treasury pursuant to the Emergency Economic Stabilization Act of 2008, is providing up to \$700 billion to the Treasury to buy mortgages and other assets from financial institutions, investing and taking equity positions in financial institutions, and establishing programs that will allow companies to insure their troubled assets. Under the CPP, the Treasury will purchase up to \$250 billion of senior preferred shares (Senior Preferred) from qualifying financial institutions to facilitate capital growth and to increase the flow of financing to U.S. businesses and consumers by selling shares of Senior Preferred to the Treasury and will be available to U.S. financial institutions that meet the Program's eligibility requirements. On October 24, 2008, the Company applied to its primary federal regulator, the Board of Governors of the Federal Reserve System (FRB), and to the Bank's primary federal regulator, the Office of the Comptroller of the Currency (OCC) to participate in the CPP up to the full extent permitted. Since the CPP allows for up to an amount equal to three percent (3%) of our total risk-weighted assets, we applied to purchase up to \$15,600,000 in additional capital through the issuance of preferred shares to the Treasury. On November 12, 2008, the Company received preliminary approval for its TARP application. The Company is taking the action necessary to meet the CPP's eligibility requirements, including soliciting shareholder approval by written consent of an amendment to the Articles of Incorporation to allow the issuance of preferred shares. Currently, CWBC has common equity only and does not have any off-balance sheet financing arrangements. The Company has not reissued any treasury stock nor does it have any immediate plans or programs to do so. No assurances can be given that the Company will obtain the requisite shareholder approval of the amendment to its Articles of Incorporation or that the Company will ultimately participate in the CPP, the approximate number of shares of preferred stock that the Company may issue pursuant to the CPP or the approximate amount of consideration the Company will receive as compensation from Treasury for any such shares that may be issued by the Company under the CPP. Should the Company not participate in the CPP, we do not anticipate that it will have a material adverse effect on our financial position and operations. Without the additional capital, the Company's growth may be slowed, but the Company is well capitalized, achieving profitability and is in

the process of implementing policies and procedures which allow us to adequately maintain adequate liquidity.

In consideration of the near-term economic and capital raising environment, the Company did not declare a dividend this quarter.

Supervision and Regulation

Banking is a complex, highly regulated industry. The banking regulatory scheme serves not to protect investors, but is designed to maintain a safe and sound banking system, to protect depositors and the FDIC insurance fund, and to facilitate the conduct of sound monetary policy. In furtherance of these goals, Congress and the states have created several largely autonomous regulatory agencies and enacted numerous laws that govern banks, bank holding companies and the banking industry. Consequently, the Company's growth and earnings performance, as well as that of CWB, may be affected not only by management decisions and general economic conditions, but also by the requirements of applicable state and federal statutes and regulations and the policies of various governmental regulatory authorities, including the Board of Governors of the Federal Reserve Bank ("FRB"), the FDIC, and the Office of the Comptroller of the Currency ("OCC"). For a detailed discussion of the regulatory scheme governing the Company and CWB, please see the discussion in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2007 under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operation – Supervision and Regulation."

ITEM 4T. CONTROLS AND PROCEDURES

The Company's Chief Executive Officer and Chief Financial Officer, with the participation of the Company's management, carried out an evaluation of the effectiveness of the Company's disclosure controls and procedures pursuant to Exchange Act Rule 13a-15(e). Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer believe that, as of the end of the period covered by this report, the Company's disclosure controls and procedures are effective in making known to them material information relating to the Company (including its consolidated subsidiaries) required to be included in this report.

Disclosure controls and procedures, no matter how well designed and implemented, can provide only reasonable assurance of achieving an entity's disclosure objectives. The likelihood of achieving such objectives is affected by limitations inherent in disclosure controls and procedures. These include the fact that human judgment in decision-making can be faulty and that breakdowns in internal control can occur because of human failures such as simple errors or mistakes or intentional circumvention of the established process.

There was no change in the Company's internal control over financial reporting, known to the Chief Executive Officer or the Chief Financial Officer, that occurred during the period covered by this report that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II – OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Company is involved in various litigation of a routine nature that is being handled and defended in the ordinary course of the Company's business. In the opinion of management, based in part on consultation with legal counsel, the resolution of these litigation matters will not have a material impact on the Company's financial position or results of operations.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None

ITEM 3. DEFAULTS UPON SENIOR SECURITIES
