UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

Form 10-K

☒ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended March 31, 2011

OR

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

\Commission File No. 001-33861

MOTORCAR PARTS OF AMERICA, INC.
(Exact name of registrant as specified in its charter)

New York
(State or other jurisdiction of incorporation or
organization)

11-2153962

(I.R.S. Employer Identification No.)

2929 California Street, Torrance, California
(Address of principal executive offices)

90503
Zip Code

Registrant's telephone number, including area code: (310) 212-7910

Securities registered pursuant to Section 12(b) of the Act: common stock, \$0.01 par value per share

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes ☐ No ☒

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of

Edgar Filing: MOTORCAR PARTS AMERICA INC - Form 10-K

the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☐ No ☒

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☐ No ☒

Indicate by check mark if disclosure of delinquent filers in response to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☒

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☒ Non-accelerated filer ☐ Smaller reporting company ☐
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

As of September 30, 2010, which was the last business day of the registrant's most recently completed fiscal second quarter, the aggregate market value of the registrant's common stock held by non-affiliates of the registrant was approximately \$93,626,542 based on the closing sale price as reported on the NASDAQ Global Market.

There were 12,438,271 shares of common stock outstanding as of June 6, 2011.

DOCUMENTS INCORPORATED BY REFERENCE:

In accordance with General Instruction G(3) of Form 10-K, the information required by Part III hereof will either be incorporated into this Form 10-K by reference to the registrant's Definitive Proxy Statement for the registrant's next Annual Meeting of Stockholders filed within 120 days of March 31, 2011 or will be included in an amendment to this Form 10-K filed within 120 days of March 31, 2011.

GLOSSARY

The following terms are frequently used in the text of this report and have the meanings indicated below.

“Used Core” — An alternator or starter which has been used in the operation of a vehicle. Generally, the Used Core is an original equipment (“OE”) alternator or starter installed by the vehicle manufacturer and subsequently removed for replacement. Used Cores contain salvageable parts which are an important raw material in the remanufacturing process. We obtain most Used Cores by providing credits to our customers for Used Cores returned to us under our core exchange program. Our customers receive these Used Cores from consumers who deliver a Used Core to obtain credit from our customers upon the purchase of a newly remanufactured alternator or starter. When sufficient Used Cores cannot be obtained from our customers, we will purchase Used Cores from core brokers, who are in the business of buying and selling Used Cores. The Used Cores purchased from core brokers or returned to us by our customers under the core exchange program, and which have been physically received by us, are part of our raw material or work in process inventory included in long-term core inventory.

“Remanufactured Core” — The Used Core underlying an alternator or starter that has gone through the remanufacturing process and through that process has become part of a newly remanufactured alternator or starter. The remanufacturing process takes a Used Core, breaks it down into its component parts, replaces those components that cannot be reused and reassembles the salvageable components of the Used Core and additional new components into a remanufactured alternator or starter. Remanufactured Cores are included in our on-hand finished goods inventory and in the remanufactured finished good product held for sale at customer locations. Used Cores returned by consumers to our customers but not yet returned to us continue to be classified as Remanufactured Cores until we physically receive these Used Cores. All Remanufactured Cores are included in our long-term core inventory or in our long-term core inventory deposit.

MOTORCAR PARTS OF AMERICA, INC.

Unless the context otherwise requires, all references in this Annual Report on Form 10-K to “the Company,” “we,” “us,” and “our” refer to Motorcar Parts of America, Inc. and its subsidiaries. This Form 10-K may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve risks and uncertainties. Our actual results may differ significantly from the results discussed in any forward-looking statements. Discussions containing such forward-looking statements may be found in the material set forth under “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations,” as well as within this Form 10-K generally.

We file annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission (“SEC”). Our SEC filings are available free of charge to the public over the Internet at the SEC’s website at www.sec.gov. Our SEC filings are also available free of charge on our website www.motorcarparts.com. You may also read and copy any document we file with the SEC at its Public Reference Room at 100 F. Street, NE, Washington, D.C. 20549. Please call the SEC at (800) SEC-0330 for further information on the operation of the Public Reference Room.

PART I

Item 1. Business

General

The aftermarket for automobile parts is divided into two markets. The first market is the do-it-yourself (“DIY”) market, which is generally serviced by the large retail chain outlets. Consumers who purchase parts from the DIY channel generally install parts into their vehicles themselves. In most cases, this is a cheaper alternative than having the repair performed by a professional installer. The second market is the professional installer market, commonly known as the do-it-for-me (“DIFM”) market. This market is serviced by the retail chains, traditional warehouse distributors and the dealer networks. Generally, the consumer in this channel is a professional parts installer.

We remanufacture and produce new alternators and starters for import and domestic cars, light trucks, heavy duty, agricultural and industrial applications. These products are distributed to both the DIY and DIFM markets. Our products are distributed predominantly throughout the United States and Canada. Our products are sold to the largest auto parts retail chains in the United States and Canada, including Advance, AutoZone, Genuine Parts (NAPA), O’Reilly Automotive and Pep Boys. In addition, our products are sold to various traditional warehouses for the professional installers, and to major automobile manufacturers for both their aftermarket programs and their warranty replacement programs (“OES”). Auto parts retail chains in total, currently account for approximately 36% of the North American after-market for remanufactured alternators and starters.

Demand and replacement rates for after-market remanufactured alternators and starters generally increase with increases in miles driven and the age of vehicles. According to industry statistics, both the average age of vehicles on the road and miles driven in North America have increased during fiscal 2011 as compared to fiscal 2010.

We have coverage for almost every alternator and starter used by any automobile light and heavy duty truck as well as most industrial and agricultural vehicles or equipment. We have warehousing strategically located around North America and in Mexico to allow us to be able to complete distribution to almost any customer in North America.

While we continually seek to diversify our customer base, we currently derive, and have historically derived, a substantial portion of our sales from a small number of large customers. During fiscal 2011, sales to our four largest

customers constituted approximately 81% of our net sales. To mitigate the risk associated with this concentration of sales, we have increasingly sought to enter into longer-term customer agreements with our major customers. These longer-term agreements typically require us to commit a significant amount of our working capital to build inventory and increase production. In addition, they typically include marketing and other allowances that adversely impact near-term revenue. Such agreements with new customers may also require us to incur certain changeover expenses.

Table of Contents

During fiscal 2011, we made secured loans in the approximate aggregate amount of \$4,863,000 to Fenwick Automotive Products Limited (“Fenco”), a privately-owned Toronto-based manufacturer, remanufacturer and distributor of new and remanufactured aftermarket auto parts. In connection with these loans, we had an option to acquire a substantial ownership interest in Fenco. In May 2011, pursuant to a purchase agreement with FAPL Holdings Inc. (“FAPL”), Fenco’s parent company, and certain other individuals, we acquired all of the outstanding equity of FAPL’s subsidiaries. In connection with this acquisition, we advanced an additional \$10,000,000 to Fenco. We believe this transaction provides us opportunities to expand beyond our existing product lines of alternators and starters and further enhance our market presence in North America (see Note 3 and Note 22 to the consolidated financial statements).

Company Products

Our total net sales is primarily derived from selling remanufactured alternators and starters for import and domestic cars and light trucks. Alternators and starters are non-elective replacement parts in all makes and models of vehicles because they are required for a vehicle to operate. Currently, approximately 89% of our units are sold for resale under customer private labels. The balance is sold under our Quality-Built®, Talon®, Xtreme®, Reliance™, and other brand names.

Our alternators and starters are produced to meet or exceed original equipment manufacturer specifications. We remanufacture alternators and starters for virtually all import and domestic vehicles sold in the United States and Canada. Remanufacturing generally creates a supply of parts at a lower cost to the end user than newly manufactured parts and makes available automotive parts which are no longer manufactured as new. Our remanufactured parts are sold at competitively lower prices than most new replacement parts.

We recycle nearly all materials in keeping with our focus of positively impacting the environment. Nearly all parts, including metal from the Used Cores, and corrugated packaging are recycled.

The technology and the specifications for the components used in our products, particularly alternators, have become more advanced in response to the installation in vehicles of an increasing number of electrical components such as navigation systems, keyless entry devices, heated rear windows and seats, high-powered stereo systems and DVD players. As a result of this increased electrical demand, alternators require more advanced technology and higher grade components and per unit sales prices of replacement alternators have increased accordingly. The increasing complexity of cars and light trucks and the number of different makes and models of these vehicles have resulted in a significant increase in the number of different alternators and starters required to service import and domestic cars and light trucks. In addition to the over 3,400 stock keeping units (“SKUs”) for heavy duty and a variety of agricultural and industrial applications, we carry over 3,900 SKUs which cover applications for most import and domestic cars and light trucks sold in the United States and Canada.

Customers: Customer Concentration

Our products are marketed throughout the United States and Canada. Currently, we serve all of the largest retail automotive chain stores with an aggregate of approximately 12,500 retail outlets as well as a diverse group of automotive warehouse distributors and OES customers.

We are substantially dependent upon sales to our major customers. During fiscal 2011, 2010 and 2009, sales to our four largest customers constituted approximately 81%, 85% and 92%, respectively, of our net sales, and sales to our largest customer AutoZone, constituted 48%, 44% and 49%, respectively, of our net sales. Any meaningful reduction in the level of sales to any of these customers, deterioration of any customer’s financial condition or the loss of a customer could have a materially adverse impact upon us.

Table of Contents

Customer Arrangements; Impact on Working Capital

We have or are renegotiating long-term agreements with many of our major customers. Under these agreements, which typically have initial terms of at least four years, we are designated as the exclusive or primary supplier for specified categories of remanufactured alternators and starters. Because of the very competitive nature of the market for remanufactured starters and alternators and the limited number of customers for these products, our customers have sought and obtained price concessions, significant marketing allowances and more favorable delivery and payment terms in consideration for our designation as a customer's exclusive or primary supplier. These incentives differ from contract to contract and can include (i) the issuance of a specified amount of credits against receivables in accordance with a schedule set forth in the relevant contract, (ii) support for a particular customer's research or marketing efforts provided on a scheduled basis, (iii) discounts granted in connection with each individual shipment of product, and (iv) other marketing, research, store expansion or product development support. We have also entered into agreements to purchase certain customers' Remanufactured Core inventory and to issue credits to pay for that inventory according to a schedule set forth in the agreements. These contracts typically require that we meet ongoing standards related to fulfillment, price, and quality. Our contracts with major customers expire at various dates through March 2019.

These longer-term agreements strengthen our customer relationships and business base. The increased demand for product as a result of entering into these longer-term agreements often requires that we increase our inventories, accounts payable and personnel. Customer demands that we purchase their Remanufactured Core inventory have also been a significant and an additional strain on our available working capital. The marketing and other allowances we typically grant our customers in connection with our new or expanded customer relationships adversely impact the near-term revenues, profitability and associated cash flows from these arrangements. However, we believe the investment we make in these new or expanded customer relationships will improve our overall liquidity and cash flow from operations over time.

Competition

The after-market for remanufactured alternators and starters is highly competitive. Our most significant competitors are a division of Remy International, Inc. and BBB Industries. We also compete with several medium-sized remanufacturers and a large number of smaller regional and specialty remanufacturers. Overseas manufacturers, particularly those located in China, are increasing their operations and could become a significant competitive force in the future.

We believe that the reputation for quality and customer service that a supplier enjoys are significant factors in a customer's purchase decision. We believe that these factors favor our company, which provides quality replacement automotive products, rapid and reliable delivery capabilities as well as promotional support. We believe that our ability to provide efficient delivery distinguishes us from many of our competitors and provides a competitive advantage. Price and payment terms are also very important competitive factors.

For the most part, our products have not been patented nor do we believe that our products are patentable. We seek to protect our proprietary processes and other information by relying on trade secret laws and non-disclosure and confidentiality agreements with certain of our employees and other persons who have access to that information.

Company Operations

Production Process. Our remanufacturing process begins with the receipt of used alternators and starters, commonly known as "Used Cores", from our customers or core brokers. The Used Cores are evaluated for inventory control purposes and then sorted by part number. Each Used Core is completely disassembled into its fundamental

components. The components are cleaned in a process that employs customized equipment and cleaning materials in accordance with the required specifications of the particular component. All components known to be subject to major wear and those components determined not to be reusable or repairable are replaced by new components. Non-salvageable components of the Used Core are sold as scrap.

Table of Contents

After the cleaning process is complete, the salvageable components of the Used Core are inspected and tested as prescribed by our ISO TS 16949 approved quality control program, which is implemented throughout the production process. ISO TS 16949 is an internationally recognized, world class, automotive quality system. Upon passage of all tests, which are monitored by designated quality control personnel, all the component parts are assembled in a work cell into a finished product. Inspection and testing are conducted at multiple stages of the remanufacturing process, and each finished product is inspected and tested on equipment designed to simulate performance under operating conditions. Finished products are either stored in our warehouse facility or packaged for immediate shipment. To maximize remanufacturing efficiency, we store component parts ready for assembly in our warehousing facilities. Our management information systems, including hardware and software, facilitate the remanufacturing process from Used Cores to finished products.

Our remanufacturing processes combine product families with similar configurations into dedicated factory work cells. This remanufacturing process, known as “lean manufacturing”, replaced the more traditional assembly line approach we had previously utilized and eliminated a large number of inventory moves and the need to track inventory movement through the remanufacturing process. This lean manufacturing process is used at all of our production facilities. Because of this “lean manufacturing” approach, we significantly reduced the time it takes to produce a finished product. We continue to explore opportunities for improving efficiencies in our remanufacturing process.

Offshore Remanufacturing. The majority of our remanufacturing operations and core sorting functions are now conducted at our facilities in Mexico and Malaysia. We continue to maintain production of remanufactured units that require specialized service and/or rapid turnaround in our U.S. facility. We also operate a shipping and receiving warehouse and testing facility in Singapore. Our foreign operations produced approximately 99% of our total unit production during fiscal 2011 and 2010.

Used Cores and Other Raw Materials. The majority of our Used Cores are obtained from customers using our core exchange program. The core exchange program consists of the following steps:

- Our customers purchase from us a remanufactured unit to be sold to their consumer.
- Our customers offer their consumers a credit to exchange their used unit (Used Core) at the time the consumer purchases a remanufactured unit.
- We, in turn, offer our customers a credit to send us these Used Cores. The credit reduces our accounts receivable.

Our customers are not obligated to send us all the Used Cores exchanged by their consumers. We have historically purchased approximately 15% to 20% of our Used Cores in the open market from core brokers who specialize in buying and selling Used Cores. During fiscal 2011, we purchased approximately 19% of our Used Cores from core brokers. Although the open market is not a primary source of Used Cores, it is a critical source for meeting our raw material demands. Not all Used Cores are reusable. Remanufacturing consumes, on average, more than one Used Core for each remanufactured unit produced. Although the yield rates depend upon both the product and customer specifications, our overall average yield rates are about 83%. We use about 120 Used Cores to provide sufficient salvageable components to complete 100 remanufactured products.

The price of a finished product sold to our customers is generally comprised of an amount for remanufacturing (“unit value”) and an amount separately invoiced for the Remanufactured Core included in the product (“Remanufactured Core charge”). The Remanufactured Core charge is equal to the credit we offer to induce the customer to use our core exchange program and send back the Used Cores to us. In accordance with our net-of-core-value revenue recognition policy, at the time a sale is recorded, we only recognize as revenue the unit value of the finished product. We also

record as long-term core inventory the cost of Remanufactured Cores included in the finished goods that are shipped to customers and that we expect to be sent back to us as part of the core exchange program. During fiscal 2011, approximately 96% of the Remanufactured Cores we shipped as part of finished goods were replaced by similar Used Cores sent back to us under our core exchange program, resulting in the issuance of credits equal to the related Remanufactured Core value.

Table of Contents

Other materials and components used in remanufacturing are purchased in the open market. During fiscal 2011, 2010 and 2009, our main supplier provided approximately 13%, 29% and 25%, respectively, of our raw materials purchased, and we rely on that supplier's ability to provide us with raw materials in a timely and cost effective manner; however, that supplier is not our sole supplier of raw materials. No other supplier provided more than 10% of our raw material needs during these periods.

The ability to obtain Used Cores, materials and components of the types and quantities we need is essential to our ability to meet demand.

Return Rights. Under our customer agreements and general industry practice, our customers are allowed stock adjustments when their inventory of certain product lines exceeds the inventory necessary to support sales to end-user consumers. Customers have various contractual rights for stock adjustments which range from 3%-5% of total units sold. In some instances, we allow a higher level of returns in connection with a significant update order. In addition, we allow customers to return goods to us that their end-user consumers have returned to them. This general right of return is allowed regardless of whether the returned item is defective. We seek to limit the aggregate of stock adjustment and other customer returns to less than 20% of unit sales. Stock adjustment returns do not occur at any specific time during the year.

As is standard in the industry, we only accept returns from on-going customers. If a customer ceases doing business with us, we have no further obligation to accept additional product returns from that customer. Similarly, we accept product returns and grant appropriate credits from new customers from the time the new customer relationship is established. This obligation to accept returns from new customers does not result in decreased liquidity or increased expenses since we only accept one returned product for each unit sold to the new customer. In each case, the return must be received by us in the original box of the unit sold.

We provide for the anticipated returns of inventory by reducing revenue and cost of sales for the unit value of goods sold based on a historical return analysis and information obtained from customers about current stock levels and anticipated stock adjustment returns.

Sales, Marketing and Distribution. We have one of the widest varieties of alternator and starter lines available to the market, and we market and distribute our products throughout the United States and Canada. Our products for the automotive retail chain market are primarily sold under our customers' private labels. Since fiscal 2004, we have expanded our sales efforts beyond automotive retail chains to include warehouse distribution centers serving professional installers. Our products are also sold under our own Quality-Built®, Talon®, Xtreme®, Reliance™, and other brand names. We ship our products from facilities in Torrance, California, and Tijuana, Mexico, and from fee warehouse facilities in Edison, New Jersey and Springfield, Oregon. In addition, we also use a fee warehouse distribution facility in Berlin, Connecticut.

We publish, for print and electronic distribution, a catalog with part numbers and applications for our alternators and starters along with a detailed technical glossary and informational database. We believe that we maintain one of the most extensive catalog and product identification systems available to the market.

Employees. As of March 31, 2011, we had 243 employees in the United States, as compared to 247 at March 31, 2010, substantially all of whom were located in Torrance, California. Of our U.S.-based employees, 100 are administrative personnel of which 21 are sales personnel. In addition, at March 31, 2011, we had 258 employees in Singapore and Malaysia, as compared to 320 employees at March 31, 2010, and 1,188 employees at our facility located in Mexico, as compared to 1,195 employees at March 31, 2010. A union represents all hourly employees at our Mexico facility. All other employees, including our employees in Torrance, California, are non-union. We consider our relations with our employees to be satisfactory.

Table of Contents

Seasonality of Business

Due to their nature and design, as well as the limits of technology, alternators and starters traditionally have failed when operating in extreme conditions. During the summer months, when the temperature typically increases over a sustained period of time, alternators were more likely to fail. Similarly, during winter months when extreme cold conditions are experienced over a sustained period, starters were more likely to fail. This seasonality impact has been diminished by the improvement in the quality of alternators and starters and does not currently have a material impact on our net sales.

Governmental Regulation

Our operations are subject to federal, state and local laws and regulations governing, among other things, emissions to air, discharge to waters, and the generation, handling, storage, transportation, treatment and disposal of waste and other materials. We believe that our businesses, operations and facilities have been and are being operated in compliance in all material respects with applicable environmental and health and safety laws and regulations, many of which provide for substantial fines and criminal sanctions for violations. Potentially significant expenditures, however, could be required in order to comply with evolving environmental and health and safety laws, regulations or requirements that may be adopted or imposed in the future.

Evaluation of Strategic Options

We are continuing to evaluate strategic options that we might pursue to enhance shareholder value. These could include an acquisition of another company or a sale of our company to a third party. There is no assurance, however, that we will enter into any transaction as a result of our efforts in this regard.

During fiscal 2011, we made secured loans in the approximate aggregate amount of \$4,863,000 to Fenco. These loans provided an option to acquire a substantial ownership interest in Fenco. In May 2011, we acquired all of the outstanding equity of FAPL's subsidiaries. In connection with this acquisition, we advanced an additional \$10,000,000 to Fenco. We believe this transaction provides us opportunities to expand beyond our existing product lines of alternators and starters and further enhance our market presence in North America (see Note 3 and Note 22 to the consolidated financial statements).

Additionally, to further enhance shareholder value, in March 2010, our Board of Directors authorized a share repurchase program of up to \$5,000,000 of our outstanding common stock from time to time in the open market and in private transactions at prices deemed appropriate by management. There is no expiration date governing the period over which we can repurchase shares under this program. During fiscal 2011, we repurchased 14,400 shares at a total cost of approximately \$89,000.

Table of Contents

Item 1A. Risk Factors

While we believe the risk factors described below are all the material risks currently facing our business, additional risks we are not presently aware of or that we currently believe are immaterial may also impair our business operations. Our financial condition or results of operations could be materially and adversely impacted by these risks, and the trading price of our common stock could be adversely impacted by any of these risks. In assessing these risks, you should also refer to the other information included in or incorporated by reference into this Form 10-K, including our consolidated financial statements and related notes thereto appearing elsewhere or incorporated by reference in this Form 10-K.

We rely on a few major customers for a significant majority of our business, and the loss of any of these customers, significant changes in the prices, marketing allowances or other important terms provided to any of our major customers or adverse developments with respect to the financial condition of any of our major customers would reduce our net income and operating results.

Our net sales are concentrated among a small number of large customers. During fiscal 2011, sales to our four largest customers constituted approximately 81% of our net sales, and sales to our largest customer constituted approximately 48% of our net sales. Because our sales are concentrated, and the market in which we operate is very competitive, we are under ongoing pressure from our customers to offer lower prices, extended payment terms, increased marketing allowances and other terms more favorable to these customers. These customer demands have put continued pressure on our operating margins and profitability, resulted in periodic contract renegotiation to provide more favorable prices and terms to these customers and significantly increased our working capital needs. In addition, this customer concentration leaves us vulnerable to any adverse change in the financial condition of any of our major customers. The loss or significant decline of sales to any of our major customers would reduce our net income and adversely affect our operating results.

Our offshore remanufacturing and logistic activities expose us to increased political and economic risks and place a greater burden on management to achieve quality standards.

Our overseas operations, especially our operations in Tijuana, Mexico, increase our exposure to political, criminal or economic instability in the host countries and to currency fluctuations.

The complexity associated with the accounting for our operating results may continue to cause fluctuations in our reported operating results.

Because we receive most Used Cores, a critical remanufacturing component, through the core exchange program with our customers and we offer marketing allowances and other incentives that impact revenue recognition, the accounting for our operations is more complex than for many businesses the same size or larger.

Interruptions or delays in obtaining component parts could impair our business and adversely affect our operating results.

In our remanufacturing processes, we obtain Used Cores, primarily through the core exchange program with our customers, and component parts from third-party manufacturers. Historically, the level of Used Core returns from customers together with purchases from core brokers have provided us with an adequate supply of this key component. If there was a significant disruption in the supply of Used Cores, whether as a result of increased Used Core acquisitions by existing or new competitors or otherwise, our operating activities would be materially and adversely impacted. In addition, a number of the other components used in the remanufacturing process are available from a very limited number of suppliers. During fiscal 2011, we purchased 13% of our raw materials from a single

supplier. We are, as a result, vulnerable to any disruption in component supply, and any meaningful disruption in this supply would materially and adversely impact our operating results.

Table of Contents

Increases in the market prices of key component raw materials could negatively impact our profitability.

In light of the long-term, continuous pressure on pricing which we have experienced from our major customers, we may not be able to recoup the higher prices which raw materials, particularly aluminum and copper, may command in the market-place. We believe the impact of higher raw material prices, which is outside our control, is mitigated to some extent because we recover a substantial portion of our raw materials from Used Cores returned to us by our customers through the core exchange program. However, we are unable to determine what adverse impact, if any, sustained raw material price increases may have on our profitability.

Substantial and potentially increasing competition could reduce our market share and significantly harm our financial performance.

While we believe we are well-positioned in the market for remanufactured alternators and starters, this market is very competitive. In addition, other overseas manufacturers, particularly those located in China, are increasing their operations and could become a significant competitive force in the future. We may not be successful competing against other companies, some of which are larger than us and have greater financial and other resources at their disposal. Increased competition could put additional pressure on us to reduce prices or take other actions which may have an adverse effect on our operating results.

Our financial results are affected by alternator and starter failure rates that are outside our control.

Our operating results are affected by alternator and starter failure rates. These failure rates are impacted by a number of factors outside our control, including alternator and starter designs that have resulted in greater reliability, consumers driving fewer miles as a result of both high gasoline prices and the slowdown in the U.S. economy, and the average age of vehicles on the road. A reduction in the failure rates of alternators or starters would adversely affect our sales and profitability.

Our operating results may continue to fluctuate significantly.

We have experienced significant variations in our annual and quarterly results of operations. These fluctuations have resulted from many factors, including shifts in the demand and pricing for our products and general economic conditions, including changes in prevailing interest rates. Our gross profit percentage fluctuates due to numerous factors, some of which are outside our control. These factors include the timing and level of marketing allowances provided to our customers, differences between the level of projected sales to a particular customer and the actual sales during the relevant period, pricing strategies, the mix of products sold during a reporting period, fluctuations in the level of Used Core returns during the period, and general market and competitive conditions.

Our bank may not waive future defaults under our credit agreement.

Over the past several years, we have violated a number of the financial and other covenants contained in our bank credit agreement. To this point, the bank has been willing to waive these covenant defaults and to do so without imposing any significant cost or penalty on us. If we fail to meet the financial covenants or the other obligations set forth in our bank credit agreement in the future, there is no assurance that the bank will waive any such defaults.

Our level of indebtedness and the terms of our indebtedness could adversely affect our business and liquidity position.

Our indebtedness may increase substantially from time to time for various reasons, including fluctuations in operating results, marketing allowances provided to customers, capital expenditures and possible acquisitions. Our indebtedness could materially affect our business because (i) a portion of our cash flow must be used to service debt rather than

finance our operations, (ii) it may eventually impair our ability to obtain financing in the future, and (iii) it may reduce our flexibility to respond to changes in business and economic conditions or take advantage of business opportunities that may arise.

Table of Contents

Our largest shareholder has the ability to influence all matters requiring the approval of our Board of Directors and our shareholders.

As of June 6, 2011, Mel Marks, our founder and member of our Board of Directors, beneficially owned 8.9% of our outstanding common stock. As a result of his holdings, Mel Marks has the ability to exercise substantial influence over us and his interests may conflict with the interests of other shareholders.

Our stock price may be volatile and could decline substantially.

Our stock price may decline substantially as a result of the volatile nature of the stock market and other factors beyond our control. The stock market has, from time to time, experienced extreme price and volume fluctuations. Many factors may cause the market price for our common stock to decline, including (i) our operating results failing to meet the expectations of securities analysts or investors in any quarter, (ii) downward revisions in securities analysts' estimates, (iii) market perceptions concerning our future earnings prospects, (iv) public sales of a substantial number of shares of our common stock, and (v) adverse changes in general market conditions or economic trends.

Our failure to maintain effective internal controls in accordance with Section 404 of the Sarbanes-Oxley Act of 2002 could have a material adverse effect on our business and the price of our common stock.

Section 404 of the Sarbanes-Oxley Act of 2002 ("SOX") requires our management to assess the effectiveness of our internal control over financial reporting at the end of each fiscal year and certify whether or not internal control over financial reporting is effective. Our independent accountants are also required to express an opinion with respect to the effectiveness of our internal controls. We expect our SOX compliance work will continue to require significant commitment of management time and the incurrence of significant general and administrative expenses.

Unfavorable currency exchange rate fluctuations could adversely affect us.

We are exposed to market risk from material movements in foreign exchange rates between the U.S. dollar and the currencies of the foreign countries in which we operate. As a result of our extensive operations in Mexico, our primary risk relates to changes in the rates between the U.S. dollar and the Mexican peso. To mitigate this currency risk, we enter into forward foreign exchange contracts to exchange U.S. dollars for Mexican pesos. The extent to which we use forward foreign exchange contracts is periodically reviewed in light of our estimate of market conditions and the terms and length of anticipated requirements. The use of derivative financial instruments allows us to reduce our exposure to the risk that the eventual net cash outflow resulting from funding the expenses of the foreign operations will be materially affected by changes in the exchange rates. We do not engage in currency speculation or hold or issue financial instruments for trading purposes. These contracts expire in a year or less. Any change in the fair value of foreign exchange contracts is accounted for as an increase or decrease to general and administrative expenses in current period earnings.

We may continue to make strategic acquisitions of other companies or businesses and these acquisitions introduce significant risks and uncertainties, including risks related to integrating the acquired businesses and achieving benefits from the acquisitions.

In order to position ourselves to take advantage of growth opportunities, we have made, and may continue to make, strategic acquisitions that involve significant risks and uncertainties. These risks and uncertainties include: (i) the difficulty in integrating newly-acquired businesses and operations in an efficient and effective manner, (ii) the challenges in achieving strategic objectives, cost savings and other benefits from acquisitions, (iii) the potential loss of key employees of the acquired businesses, (iv) the risk of diverting the attention of senior management from our operations, (v) risks associated with integrating financial reporting and internal control systems, (vi) difficulties in

expanding information technology systems and other business processes to accommodate the acquired businesses, and (vii) future impairments of goodwill of an acquired business.

Table of Contents

Deteriorating conditions in the global credit markets and macroeconomic factors could adversely affect our financial condition and results of operations.

The significant deterioration in the financial condition of financial institutions has resulted in a severe loss of liquidity and availability in global credit markets and in higher short-term borrowing costs, and more stringent borrowing terms. Recessionary conditions in the global economy threaten to cause further tightening of the credit markets, more stringent lending standards and terms, and higher volatility in interest rates. The persistence of these conditions could have a material adverse effect on our borrowings and the availability, terms and cost of such borrowings. In addition, further deterioration in the U.S. economy could adversely affect our corporate results, which could adversely affect our operating results.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

We lease all of the real property used in our operations. We presently lease approximately 147,000 square feet of warehouse, production and administrative space in Torrance, California. The present term of the lease expires March 31, 2012 and we have the option to extend the lease for an additional five years beginning April 1, 2012. We also lease approximately 4,005 square feet adjacent to our main Torrance facility that is used as additional office and record storage space. The lease on this second building has terms which coincide with the lease on the main Torrance building.

On October 28, 2004, we entered into a build-to-suit lease covering approximately 125,000 square feet of industrial premises in Tijuana, Mexico. The lease has a term of 10 years from the date the facility was available for occupancy, and we have an option to extend the lease term for two additional 5-year periods. In May 2005, we took possession of these premises. In April 2006, we leased an additional 61,000 square feet adjoining our existing space. On October 18, 2006, we entered into an amendment to lease an adjacent 125,000 square feet. This space was occupied in January 2007 and is used for core receiving, sorting and storage related functions. All amendments have the same essential terms as the original lease.

In addition, we occupy approximately 53,000 square feet of leased remanufacturing, warehousing, and office space facilities under six separate leases, which expire on various dates through October 31, 2013, in Singapore and Malaysia.

We also lease 2,067 square feet of office space in Nashville, Tennessee under a lease that expires on May 31, 2012.

In June 2010, we entered into a lease covering approximately 1,875 square feet of warehousing facility in Berlin, Connecticut that expires on May 31, 2012. This lease agreement provides us with an option to terminate this lease anytime with three months written notice to the landlord.

We believe the above mentioned facilities are sufficient to satisfy our foreseeable warehousing, production, distribution and administrative office space requirements for our current operations.

Item 3. Legal Proceedings

We are subject to various legal proceedings arising in the normal course of conducting business. Management does not believe that the outcome of these matters will have a material adverse impact on its financial position or future

results of operations.

Item 4. Reserved

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock is traded on the National Association of Securities Dealers Automated Quotation ("NASDAQ") Global Select Market under the trading symbol MPAA. The following table sets forth the high and low sale prices for our common stock during fiscal 2011 and 2010.

	Fiscal 2011		Fiscal 2010	
	High	Low	High	Low
1st Quarter	\$7.48	\$5.75	\$4.95	\$3.54
2nd Quarter	\$9.00	\$6.01	\$5.51	\$3.89
3rd Quarter	\$13.15	\$8.72	\$5.51	\$4.54
4th Quarter	\$15.10	\$12.35	\$6.69	\$4.89

As of June 6, 2011, there were 12,438,271 shares of common stock outstanding held by 31 holders of record. We have never declared or paid dividends on our common stock. The declaration of any prospective dividends is at the discretion of the Board of Directors and will be dependent upon sufficient earnings, capital requirements and financial position, general economic conditions, state law requirements and other relevant factors. Additionally, our agreement with our lenders prohibit the payment of dividends, except stock dividends, without the lenders' prior consent.

Share Repurchase Program

In March 2010, our Board of Directors authorized a share repurchase program of up to \$5,000,000 of our outstanding common stock from time to time in the open market and in private transactions at prices deemed appropriate by management. There is no expiration date governing the period over which we can repurchase shares under this program. During fiscal 2011, we repurchased 14,400 shares at a total cost of approximately \$89,000.

Equity Compensation Plan Information

The following table summarizes our equity compensation plans as of March 31, 2011:

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights		Weighted-average exercise price of outstanding options warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))	
Equity compensation plans approved by securities holders	1,591,084	(1)	\$ 8.61	837,000	(2)
Equity compensation plans not approved by security holders	N/A		N/A	N/A	
Total	1,591,084		\$ 8.61	837,000	

-
- (1) Consists of options issued pursuant to our 1994 Employee Stock Option Plan, 1996 Employee Stock Option Plan, 1994 Non-Employee Director Stock Option Plan, 2003 Long-Term Incentive Plan and 2004 Non-Employee Director Stock Option Plan.
- (2) Consists of options available for issuance under our 2010 Incentive Award Plan and 2004 Non-Employee Director Stock Option Plan.

Table of Contents

Performance Graph

The following graph compares the cumulative return to holders of our common stock for the five years ending March 31, 2011 with the NASDAQ Composite Index and the Zacks Retail and Wholesale Auto Parts Index. We previously compared our cumulative returns to those of a peer group comprised of other automotive after-market companies selected by us. Due to trading information for some of these peer companies no longer being available, we have selected the Zacks Retail and Wholesale Auto Parts Index for comparison purposes in our performance graph. The comparison assumes \$100 was invested at the close of business on March 31, 2006 in our common stock and in each of the comparison groups, and assumes reinvestment of dividends.

Comparison of 5 Year Cumulative Total Return
Assumes Initial Investment of \$100

Item 6. Selected Financial Data

The following selected historical consolidated financial information as of and for each of the fiscal years ended March 31, 2011, 2010, 2009, 2008 and 2007, has been derived from and should be read in conjunction with our consolidated financial statements and related notes thereto.

Income Statement Data	Fiscal Years Ended March 31,				
	2011	2010	2009	2008	2007
Net sales	\$ 161,285,000	\$ 147,225,000	\$ 134,866,000	\$ 133,337,000	\$ 136,323,000
Operating income (loss)	25,384,000	18,307,000	10,642,000	12,751,000	(2,475,000)
Net income (loss)	12,220,000	9,646,000	3,857,000	4,607,000	(4,956,000)
Basic net income (loss) per share	\$ 1.01	\$ 0.80	\$ 0.32	\$ 0.40	\$(0.59)
Diluted net income (loss) per share	\$ 0.99	\$ 0.80	\$ 0.32	\$ 0.39	\$(0.59)

Balance Sheet Data	March 31,				
	2011	2010	2009	2008	2007
Total assets	\$ 191,865,000	\$ 163,480,000	\$ 159,588,000	\$ 141,408,000	\$ 131,986,000
Working capital	1,395,000	3,399,000	(3,569,000)	6,097,000	(26,746,000)
Revolving loan	-	-	21,600,000	-	22,800,000
Term loan	7,500,000	9,500,000	-	-	-
Capital lease obligations	834,000	1,398,000	3,022,000	4,276,000	5,197,000
Other long term liabilities	9,984,000	7,056,000	7,364,000	4,654,000	3,859,000
Shareholders' equity	\$ 117,177,000	\$ 103,620,000	\$ 93,083,000	\$ 91,093,000	\$ 47,828,000

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Disclosure Regarding Private Securities Litigation Reform Act of 1995

This report contains certain forward-looking statements with respect to our future performance that involve risks and uncertainties. Various factors could cause actual results to differ materially from those projected in such statements. These factors include, but are not limited to: concentration of sales to certain customers, changes in our relationship with any of our major customers, the increasing customer pressure for lower prices and more favorable payment and other terms, the increasing demands on our working capital, the significant strain on working capital associated with large Remanufactured Core inventory purchases from customers, our ability to obtain any additional financing we may seek or require, our ability to achieve positive cash flows from operations, potential future changes in our previously reported results as a result of the identification and correction of errors in our accounting policies or procedures or the potential material weaknesses in our internal controls over financial reporting, lower revenues than anticipated from new and existing contracts, our failure to meet the financial covenants or the other obligations set forth in our bank credit agreement and the bank's refusal to waive any such defaults, any meaningful difference between projected production needs and ultimate sales to our customers, increases in interest rates, changes in the financial condition of any of our major customers, the impact of high gasoline prices, the potential for changes in consumer spending, consumer preferences and general economic conditions, increased competition in the automotive parts industry, including increased competition from Chinese and other offshore manufacturers, difficulty in obtaining Used Cores and component parts or increases in the costs of those parts, political, criminal or economic instability in any of the foreign countries where we conduct operations, currency exchange fluctuations, unforeseen increases in operating costs and other factors discussed herein and in our other filings with the SEC.

Management Overview

The aftermarket for automobile parts is divided into two markets. The first market is the do-it-yourself ("DIY") market, which is generally serviced by the large retail chain outlets. Consumers who purchase parts from the DIY channel generally install parts into their vehicles themselves. In most cases, this is a cheaper alternative than having the repair performed by a professional installer. The second market is the professional installer market, commonly known as the do-it-for-me ("DIFM") market. This market is serviced by the retail chains, traditional warehouse distributors and the dealer networks. Generally, the consumer in this channel is a professional parts installer.

We remanufacture and produce new alternators and starters for import and domestic cars, light trucks, heavy duty, agricultural and industrial applications. These products are distributed to both the DIY and DIFM markets. Our products are distributed predominantly throughout the United States and Canada. Our products are sold to the largest auto parts retail chains in the United States and Canada, including Advance, AutoZone, Genuine Parts (NAPA), O'Reilly Automotive and Pep Boys. In addition, our products are sold to various traditional warehouses for the professional installers, and to major automobile manufacturers for both their aftermarket programs and their warranty replacement programs ("OES"). Auto parts retail chains in total, currently account for approximately 36% of the North American after-market for remanufactured alternators and starters.

Demand and replacement rates for after-market remanufactured alternators and starters generally increase with increases in miles driven and the age of vehicles. According to industry statistics, both the average age of vehicles on the road and miles driven in North America have increased during fiscal 2011 as compared to fiscal 2010.

We have coverage for almost every alternator and starter used by any automobile light and heavy duty truck as well as most industrial and agricultural vehicles or equipment. We have warehousing strategically located around North America and in Mexico to allow us to be able to complete distribution to almost any customer in North America.

While we continually seek to diversify our customer base, we currently derive, and have historically derived, a substantial portion of our sales from a small number of large customers. During fiscal 2011, sales to our four largest customers constituted approximately 81% of our net sales. To mitigate the risk associated with this concentration of sales, we have increasingly sought to enter into longer-term customer agreements with our major customers. These longer-term agreements typically require us to commit a significant amount of our working capital to build inventory and increase production. In addition, they typically include marketing and other allowances that adversely impact near-term revenue. Such agreements with new customers may also require us to incur certain changeover expenses.

Table of Contents

During fiscal 2011, we made secured loans in the approximate aggregate amount of \$4,863,000 to Fenwick Automotive Products Limited (“Fenco”), a privately-owned Toronto-based manufacturer, remanufacturer and distributor of new and remanufactured aftermarket auto parts. In connection with these loans, we had an option to acquire a substantial ownership interest in Fenco. In May 2011, pursuant to a purchase agreement with FAPL Holdings Inc. (“FAPL”), Fenco’s parent company, and certain other individuals, we acquired all of the outstanding equity of FAPL’s subsidiaries. In connection with this acquisition, we advanced an additional \$10,000,000 to Fenco. We believe this transaction provides us opportunities to expand beyond our existing product lines of alternators and starters and further enhance our market presence in North America (see Note 3 and Note 22 to the consolidated financial statements).

Critical Accounting Policies

We prepare our consolidated financial statements in accordance with generally accepted accounting principles, or GAAP, in the United States. Our significant accounting policies are discussed in detail below and in Note 2 in the notes to consolidated financial statements.

In preparing our consolidated financial statements, we use estimates and assumptions for matters that are inherently uncertain. We base our estimates on historical experiences and reasonable assumptions. Our use of estimates and assumptions affects the reported amounts of assets, liabilities and the amount and timing of revenues and expenses we recognize for and during the reporting period. Actual results may differ from our estimates.

Our remanufacturing operations require that we acquire Used Cores, a necessary raw material, from our customers and offer our customers marketing and other allowances that impact revenue recognition. These elements of our business give rise to accounting issues that are more complex than many businesses our size or larger. In addition, the relevant accounting standards and issues continue to evolve.

Segment Reporting

We currently operate in one business segment pursuant to the guidance provided under the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”).

Inventory

Non-core Inventory

Non-core inventory is comprised of non-core raw materials, the non-core value of work in process and the non-core value of finished goods. Used Cores, the Used Core value of work in process and the Remanufactured Core portion of finished goods are classified as long-term core inventory as described below under the caption “Long-term Core Inventory.”

Non-core inventory is stated at the lower of cost or market. The cost of non-core inventory approximates average historical purchase prices paid, and is based upon the direct costs of material and an allocation of labor and variable and fixed overhead costs. The cost of non-core inventory is evaluated at least quarterly during the fiscal year and adjusted as necessary to reflect current lower of cost or market levels. These adjustments are determined for individual items of inventory within each of the three classifications of non-core inventory as follows:

• Non-core raw materials are recorded at average cost, which is based on the actual purchase price of raw materials on hand. The average cost is updated quarterly. This average cost is used in the inventory costing process and is the basis for allocation of materials to finished goods during the production process.

Table of Contents

Non-core work in process is in various stages of production, is on average 50% complete and is valued at 50% of the cost of a finished good. Non-core work in process inventory historically comprises less than 3% of the total non-core inventory balance.

Finished goods cost includes the average cost of non-core raw materials and allocations of labor and variable and fixed overhead. The allocations of labor and variable and fixed overhead costs are determined based on the average actual use of the production facilities over the prior twelve months which approximates normal capacity. This method prevents the distortion in allocated labor and overhead costs that would occur during short periods of abnormally low or high production. In addition, we exclude certain unallocated overhead such as severance costs, duplicative facility overhead costs, and spoilage from the calculation and expense them as period costs. For the fiscal years ended March 31, 2011, 2010, and 2009, costs of approximately \$1,378,000, \$1,314,000, and \$2,019,000, respectively, were considered abnormal and thus excluded from the finished goods cost calculation and charged directly to cost of sales.

We record an allowance for potentially excess and obsolete inventory based upon recent sales history, the quantity of inventory on-hand, and a forecast of potential use of the inventory. We review inventory on a monthly basis to identify excess quantities and part numbers that are experiencing a reduction in demand. In general, part numbers with quantities representing a one to three-year supply are partially reserved for at rates based upon management's judgment and consistent with historical rates. Any part numbers with quantities representing more than a three-year supply are reserved for at a rate that considers possible scrap and liquidation values and may be as high as 100% of cost if no liquidation market exists for the part.

The quantity thresholds and reserve rates are subjective and are based on management's judgment and knowledge of current and projected industry demand. The reserve estimates may, therefore, be revised if there are changes in the overall market for our products or market changes that in management's judgment, impact our ability to sell or liquidate potentially excess or obsolete inventory.

We record vendor discounts as a reduction of inventories that are recognized as a reduction to cost of sales as the inventories are sold.

Inventory Unreturned

Inventory unreturned represents our estimate, based on historical data and prospective information provided directly by the customer, of finished goods shipped to customers that we expect to be returned, under our general right of return policy, after the balance sheet date. Because all cores are classified separately as long term assets, the inventory unreturned balance includes only the added unit value of a finished good. The return rate is calculated based on expected returns within the normal operating cycle of one year. As such, the related amounts are classified in current assets.

Inventory unreturned is valued in the same manner as our finished goods inventory.

Long-term Core Inventory

Long-term core inventory consists of:

- Used Cores purchased from core brokers and held in inventory at our facilities,
- Used Cores returned by our customers and held in inventory at our facilities,

Used Cores returned by end-users to customers but not yet returned to us are classified as Remanufactured Cores until they are physically received by us,

- Remanufactured Cores held in finished goods inventory at our facilities; and

Table of Contents

Remanufactured Cores held at customer locations as a part of the finished goods sold to the customer. For these Remanufactured Cores, we expect the finished good containing the Remanufactured Core to be returned under our general right of return policy or a similar Used Core to be returned to us by the customer, in each case, for credit.

Long-term core inventory is recorded at average historical purchase prices determined based on actual purchases of inventory on hand. The cost and market value of Used Cores for which sufficient recent purchases have occurred are deemed the same as the purchase price for purchases that are made in arms length transactions.

Long-term core inventory recorded at average historical purchase prices is primarily made up of Used Cores for newer products related to more recent automobile models or products for which there is a less liquid market. We must purchase these Used Cores from core brokers because our customers do not have a sufficient supply of these newer Used Cores available for the core exchange program.

Approximately 15% to 20% of Used Cores are obtained in core broker transactions and are valued based on average purchase price. The average purchase price of Used Cores for more recent automobile models is retained as the cost for these Used Cores in subsequent periods even as the source of these Used Cores shifts to our core exchange program.

Long-term core inventory is recorded at the lower of cost or market value. In the absence of sufficient recent purchases, we use core broker price lists to assess whether Used Core cost exceeds Used Core market value on an item by item basis. The primary reason for the insufficient recent purchases is that we obtain most of our Used Core inventory from the customer core exchange program.

We classify all of our core inventories as long-term assets. The determination of the long-term classification is based on our view that the value of the cores is not consumed or realized in cash during our normal operating cycle, which is one year for most of the cores recorded in inventory. According to guidance provided under the FASB ASC, current assets are defined as “assets or resources commonly identified as those which are reasonably expected to be realized in cash or sold or consumed during the normal operating cycle of the business.” We do not believe that core inventories, which we classify as long-term, are consumed because the credits issued upon the return of Used Cores offset the amounts invoiced when the Remanufactured Cores included in finished goods were sold. We do not expect the core inventories to be consumed, and thus we do not expect to realize cash, until our relationship with a customer ends, a possibility that we consider remote based on existing long-term customer agreements and historical experience.

However, historically for approximately 4.5% of finished goods sold, our customer will not send us a Used Core to obtain the credit we offer under our core exchange program. Therefore, based on our historical estimate, we derecognize the core value for these finished goods upon sale, as we believe they have been consumed and we have realized cash.

We realize cash for only the core exchange program shortfall of approximately 4.5%. This shortfall represents the historical difference between the number of finished goods shipped to customers and the number of Used Cores returned to us by customers. We do not realize cash for the remaining portion of the cores because the credits issued upon the return of Used Cores offset the amounts invoiced when the Remanufactured Cores included in finished goods were sold. We do not expect to realize cash for the remaining portion of these cores until our relationship with a customer ends, a possibility that we consider remote based on existing long-term customer agreements and historical experience.

For these reasons, we concluded that it is more appropriate to classify core inventory as long-term assets.

Long-term Core Inventory Deposit

The long-term core inventory deposit account represents the value of Remanufactured Cores we have purchased from customers, which are held by the customers and remain on the customers' premises. The purchase is made through the issuance of credits against that customer's receivables either on a one time basis or over an agreed-upon period. The credits against the customer's receivable are based upon the Remanufactured Core purchase price previously established with the customer. At the same time, we record the long-term core inventory deposit for the Remanufactured Cores purchased at its cost, determined as noted under Long-term Core Inventory. The long-term core inventory deposit is stated at the lower of cost or market. The cost is established at the time of the transaction based on the then current cost, determined as noted under Long-term Core Inventory. The difference between the credit granted and the cost of the long-term core inventory deposit is treated as a sales allowance reducing revenue. When the purchases are made over an agreed-upon period, the long-term core inventory deposit is recorded at the same time the credit is issued to the customer for the purchase of the Remanufactured Cores.

Table of Contents

At least annually, and as often as quarterly, reconciliations and confirmations are performed to determine that the number of Remanufactured Cores purchased, but retained at the customer locations, remains sufficient to support the amounts recorded in the long-term core inventory deposit account. At the same time, the mix of Remanufactured Cores is reviewed to determine that the aggregate value of Remanufactured Cores in the account has not changed during the reporting period. We evaluate the cost of Remanufactured Cores supporting the aggregate long-term core inventory deposit account each quarter. If we identify any permanent reduction in either the number or the aggregate value of the Remanufactured Core inventory mix held at the customer location, we will record a reduction in the long-term core inventory deposit account during that period.

Revenue Recognition

We recognize revenue when our performance is complete, and all of the following criteria have been met:

- Persuasive evidence of an arrangement exists,
- Delivery has occurred or services have been rendered,
- The seller's price to the buyer is fixed or determinable, and
- Collectibility is reasonably assured.

For products shipped free-on-board ("FOB") shipping point, revenue is recognized on the date of shipment. For products shipped FOB destination, revenues are recognized on the estimated or actual date of delivery. We include shipping and handling charges in the gross invoice price to customers and classify the total amount as revenue. Shipping and handling costs are recorded in cost of sales.

Revenue Recognition; Net-of-Core-Value Basis

The price of a finished product sold to customers is generally comprised of separately invoiced amounts for the Remanufactured Core included in the product ("Remanufactured Core value") and for the value added by remanufacturing ("unit value"). The unit value is recorded as revenue based on our then current price list, net of applicable discounts and allowances. Based on our experience, contractual arrangements with customers and inventory management practices, approximately 96% of the remanufactured alternators and starters we sell to customers are replaced by similar Used Cores sent back for credit by customers under our core exchange program. In accordance with our net-of-core-value revenue recognition policy, we do not recognize the Remanufactured Core value as revenue when the finished products are sold. We generally limit the number of Used Cores sent back under the core exchange program to the number of similar Remanufactured Cores previously shipped to each customer.

Revenue Recognition and Deferral — Core Revenue

Full price Remanufactured Cores: When we ship a product, we invoice certain customers for the Remanufactured Core value portion of the product at full Remanufactured Core sales price but do not recognize revenue for the Remanufactured Core value at that time. For these Remanufactured Cores, we recognize core revenue based upon an estimate of the rate at which our customers will pay cash for Remanufactured Cores in lieu of sending back similar Used Cores for credits under our core exchange program.

Table of Contents

Nominal price Remanufactured Cores: We invoice other customers for the Remanufactured Core value portion of product shipped at a nominal Remanufactured Core price. Unlike the full price Remanufactured Cores, we only recognize revenue from nominal Remanufactured Cores not expected to be replaced by a similar Used Core sent back under the core exchange program when we believe that we have met all of the following criteria:

• We have a signed agreement with the customer covering the nominally priced Remanufactured Cores not expected to be sent back under the core exchange program, and the agreement must specify the number of Remanufactured Cores our customer will pay cash for in lieu of sending back a similar Used Core under our core exchange program and the basis on which the nominally priced Remanufactured Cores are to be valued (normally the average price per Remanufactured Core stipulated in the agreement).

• The contractual date for reconciling our records and customer's records of the number of nominally priced Remanufactured Cores not expected to be replaced by similar Used Cores sent back under our core exchange program must be in the current or a prior period.

- The reconciliation must be completed and agreed to by the customer.
- The amount must be billed to the customer.

Deferral of Core Revenue. As noted previously, we have in the past and may in the future agree to buy back Remanufactured Cores from certain customers. The difference between the credit granted and the cost of the Remanufactured Cores bought back is treated as a sales allowance reducing revenue. As a result of the ongoing Remanufactured Core buybacks, we have now deferred core revenue from these customers until there is no expectation that sales allowances associated with Remanufactured Core buybacks from these customers will offset core revenues that would otherwise be recognized once the criteria noted above have been met. At March 31, 2011 and 2010, Remanufactured Core revenue of \$8,729,000 and \$6,061,000, respectively, was deferred.

Revenue Recognition; General Right of Return

We allow our customers to return goods to us that their end-user customers have returned to them, whether the returned item is or is not defective (warranty returns). In addition, under the terms of certain agreements with our customers and industry practice, our customers from time to time are allowed stock adjustments when their inventory of certain product lines exceeds the anticipated sales to end-user customers (stock adjustment returns). We seek to limit the aggregate of customer returns, including warranty and stock adjustment returns, to less than 20% of unit sales. In some instances, we allow a higher level of returns in connection with a significant update order.

We provide for such anticipated returns of inventory by reducing revenue and the related cost of sales for the units estimated to be returned.

Our allowance for warranty returns is established based on a historical analysis of the level of this type of return as a percentage of total unit sales. Stock adjustment returns do not occur at any specific time during the year, and the expected level of these returns cannot be reasonably estimated based on a historical analysis. Our allowance for stock adjustment returns is based on specific customer inventory levels, inventory movements and information on the estimated timing of stock adjustment returns provided by our customers.

Sales Incentives

We provide various marketing allowances to our customers, including sales incentives and concessions. Marketing allowances related to a single exchange of product are recorded as a reduction of revenues at the time the related

revenues are recorded or when such incentives are offered. Other marketing allowances, which may only be applied against future purchases, are recorded as a reduction to revenues in accordance with a schedule set forth in the relevant contract. Sales incentive amounts are recorded based on the value of the incentive provided.

Table of Contents

Goodwill

Goodwill is the excess of the purchase price over the fair value of identifiable net assets acquired in business combinations. We do not amortize goodwill but we evaluate goodwill for impairment on an annual basis or more frequently if events or circumstances occur that would indicate a reduction in fair value of the Company. Such indicators include, but are not limited to, events or circumstances such as a significant adverse change in the business climate, unanticipated competition, a loss of key personnel, adverse legal or regulatory developments, or a significant decline in the market price of our common stock. We did not have any goodwill at March 31, 2011 or 2010.

Income Taxes

We account for income taxes using the liability method, which measures deferred income taxes by applying enacted statutory rates in effect at the balance sheet date to the differences between the tax basis of assets and liabilities and their reported amounts in the financial statements. The resulting asset or liability is adjusted to reflect changes in the tax laws as they occur. A valuation allowance is provided to reduce deferred tax assets when it is more likely than not that a portion of the deferred tax asset will not be realized.

The primary components of our income tax provision (benefit) are (i) the current liability or refund due for federal, state and foreign income taxes and (ii) the change in the amount of the net deferred income tax asset, including the effect of any change in the valuation allowance.

Realization of deferred tax assets is dependent upon our ability to generate sufficient future taxable income. In evaluating this ability, management considers long-term agreements and Remanufactured Core purchase obligations with our major customers that expire at various dates through March 2019. Based on our forecast of our future operating results, we believe that it is more likely than not that future taxable income will be sufficient to realize the recorded deferred tax assets. We periodically compare our forecasts to actual results, and there can be no assurance that the forecasted results will be achieved.

Financial Risk Management and Derivatives

We are exposed to market risk from material movements in foreign exchange rates between the U.S. dollar and the currencies of the foreign countries in which we operate. As a result of our significant operations in Mexico, our primary risk relates to changes in the rates between the U.S. dollar and the Mexican peso. To mitigate this currency risk, we enter into forward foreign exchange contracts to exchange U.S. dollars for Mexican pesos. The extent to which we use forward foreign exchange contracts is periodically reviewed in light of our estimate of market conditions and the terms and length of anticipated requirements. During fiscal 2011, we also entered into forward foreign currency exchange contracts to exchange U.S. dollars for Chinese yuan to mitigate the risk of exposure from material movements in exchange rates on purchases we make from Chinese vendors. The use of derivative financial instruments allows us to reduce our exposure to the risk that the eventual net cash outflow resulting from funding the expenses of the foreign operations will be materially affected by changes in the exchange rates. We do not engage in currency speculation or hold or issue financial instruments for trading purposes. We had foreign exchange contracts with an aggregate U.S. dollar equivalent notional value (and materially the same nominal fair value) of \$9,356,000 and \$6,159,000 at March 31, 2011 and 2010, respectively. These contracts generally expire in a year or less. Any changes in the fair value of foreign exchange contracts are accounted for as an increase or decrease to general and administrative expenses in current period earnings. During fiscal 2011 and 2010, a loss of \$162,000 and a gain of \$1,565,000, respectively, were recorded in general and administrative expenses due to the change in the value of the forward foreign currency exchange contracts subsequent to entering into the contracts.

Table of Contents

Share-based Payments

In accounting for share-based compensation awards, we follow the accounting guidance for equity-based compensation, which requires that we measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award. The cost associated with stock options is estimated using the Black-Scholes option-pricing model. The cost of equity instruments is recognized in the consolidated statement of income on a straight-line basis (net of estimated forfeitures) over the period during which an employee is required to provide service in exchange for the award. Also, excess tax benefits realized are reported as a financing cash inflow.

Fair Value Measurements

We adopted the guidance on fair value measurements and disclosures for all financial assets and liabilities on April 1, 2008. This guidance defined fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It also established a framework for measuring fair value in accordance with GAAP and expanded the disclosures required for fair value measurements. On April 1, 2009, we adopted the new fair value accounting principles for all non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis, which did not have any material impact on our financial condition, results of operations or cash flows.

New Accounting Pronouncements

Transfers of Financial Assets

In June 2009, the Financial Accounting Standards Board (the “FASB”) issued new guidance on the treatment of transfers of financial assets which eliminates the concept of a “qualifying special-purpose entity,” changes the requirements for derecognizing financial assets, and requires additional disclosures in order to enhance information reported to users of financial statements by providing greater transparency about transfers of financial assets, including securitization transactions, and an entity’s continuing involvement in and exposure to the risks related to transferred financial assets. This new guidance was effective as of the beginning of an entity’s first fiscal year that began after November 15, 2009. The adoption of this guidance on April 1, 2010 did not have any impact on our consolidated financial position and results of operations.

Consolidation of Variable Interest Entities

In June 2009, the FASB issued new guidance which amends the consolidation guidance applicable to variable interest entities and was effective as of the beginning of an entity’s first fiscal year that began after November 15, 2009. The adoption of this guidance on April 1, 2010 did not have any impact on our consolidated financial position and results of operations.

Fair Value Measurements and Disclosures

In January 2010, the FASB issued an update which requires new disclosures for transfers in and out of Level 1 and Level 2 of the fair value hierarchy and expanded disclosures for activity in Level 3 of the fair value hierarchy. The update also clarifies existing disclosures regarding the level of disaggregation for disclosure and disclosures about inputs and valuation techniques. The new disclosures and clarifications of existing disclosures were effective for interim and annual reporting periods beginning after December 15, 2009. The adoption of this update on January 1, 2010 did not have any impact on our consolidated financial position and results of operations. The disclosures regarding certain Level 3 activity are effective for fiscal years beginning after December 15, 2010. We do not expect

the adoption of this guidance on April 1, 2011 to have any material impact on our consolidated financial position and results of operations.

Table of Contents

Disclosure Requirements Related to Financing Receivables

In July 2010, the FASB issued an update which requires enhanced disclosures about the credit quality of financing receivables and the related allowance for credit losses. Trade accounts receivable with maturities of one year or less are excluded from the disclosure requirements. Disclosures required as of the end of a reporting period were effective for interim and annual periods ending on or after December 15, 2010. The adoption of this guidance on December 31, 2010 did not have any impact on our consolidated financial position and results of operations. The disclosures required about activity that occurs during a reporting period are effective for interim and annual periods beginning on or after December 15, 2010. The adoption of this guidance on January 1, 2011 did not have any impact on our consolidated financial position and the results of operations.

When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts

In December 2010, the FASB issued guidance which modifies step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. For those reporting units with a carrying amount equal to or less than zero for which qualitative factors indicate that it is more likely than not that a goodwill impairment exists, step 2 of the goodwill impairment test will need to be performed. This guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2010. Early adoption of this update is prohibited. We do not expect the adoption of this guidance on April 1, 2011 to have any material impact on our consolidated financial position and the results of operations.

Disclosure of Supplementary Pro Forma Information for Business Combinations

In December 2010, the FASB issued guidance which specifies that if comparative financial statements are presented, disclosure of revenue and earnings of a combined entity should be made as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. This guidance is effective for business combinations consummated in fiscal years beginning on or after December 15, 2010. We are currently evaluating the impact the adoption of this guidance on April 1, 2011 will have on our consolidated financial position and the results of operations.

Subsequent Event

During fiscal 2011, we made secured loans in the approximate aggregate amount of \$4,863,000 to Fenco, a privately-owned Toronto-based manufacturer, remanufacturer and distributor of new and remanufactured aftermarket auto parts. In connection with these loans, we had an option to acquire a substantial ownership interest in Fenco. On May 6, 2011, we entered into and consummated the transactions pursuant to a purchase agreement (the "Purchase Agreement") with FAPL Holdings Inc. ("FAPL") and certain individuals. In connection with this acquisition, we advanced an additional \$10,000,000 to Fenco. Pursuant to the Purchase Agreement, we purchased (i) all of the outstanding equity of Fenco, a corporation incorporated under the laws of Ontario, (ii) all of the outstanding equity of Introcan, Inc. ("Introcan"), a Delaware corporation, and (iii) 1% of the outstanding equity of Fapco S.A. de C.V. ("Fapco"), a Mexican variable capital company. Since Fenco owned 99% of Fapco, we now own 100% of Fapco.

In consideration for the acquisition, we issued to FAPL 360,000 shares of our common stock (the "MPA Shares"). For a period of 18 months following the closing of the acquisition, the MPA Shares shall be (i) subject to transfer restrictions pursuant to a Hold Agreement between us and FAPL, dated May 6, 2011 (the "Hold Agreement"), and (ii) held in escrow in order to secure certain indemnification obligations under the Purchase Agreement pursuant to an Escrow Agreement by and among FAPL, Stikeman Elliott LLP, certain individuals, and us, dated May 6, 2011 (the "Escrow Agreement").

In connection with the acquisition and the secured loans made to Fenco, we have incurred expenses of \$879,000 related to legal, accounting, and valuation services during fiscal 2011, which are reflected in operating expenses. Additional fees in connection with the closing of the transaction will be recorded as expenses in the first quarter of fiscal 2012 as incurred.

Table of Contents

In connection with the acquisition, our now wholly-owned subsidiaries, Fenco and Introcan, as borrowers (the “Fenco Borrowers”), entered into an amended and restated credit agreement, dated May 6, 2011 (the “Fenco Credit Agreement”) with Manufacturers and Traders Trust Company as lead arranger, M&T Bank as lender and administrative agent and other lenders from time to time party thereto (the “Lenders”). Pursuant to the Fenco Credit Agreement, the Lenders have made available to the Fenco Borrowers a revolving credit facility in the maximum principal amount of \$50,000,000 (the “Revolving Facility”) and a term loan in the principal amount of \$10,000,000 (the “Term Loan”). The availability of the Revolving Facility is subject to a borrowing base calculation consisting of eligible accounts receivable and eligible inventory.

The Fenco Borrowers may receive advances under the Revolving Facility by any one or more of the following options: (i) swingline advances in Canadian or US dollars; (ii) Canadian dollar prime-based loans; (iii) US dollar base rate loans; (iv) LIBOR loans; or (v) letters of credit.

The Term Loan bears interest at the LIBO rate plus an applicable margin. Outstanding advances under the Revolving Facility bear interest as follows:

- (i) in respect of swingline advances in Canadian dollars and Canadian dollar prime-based loans, at the reference rate announced by the Royal Bank of Canada plus an applicable margin;
- (ii) in respect of swingline advances in US dollars and US dollar base rate loans, at a base rate (which shall be equal to the highest of (x) M&T Bank’s prime rate, (y) the Federal Funds Rate plus ½ of 1%, or (z) the one month LIBO rate) plus an applicable margin;
- (iii) in respect of LIBOR loans, at the LIBO rate plus an applicable margin.

The Fenco Credit Agreement, among other things, requires the Fenco Borrowers to maintain certain financial covenants.

The Revolving Facility and the Term Loan mature on October 6, 2012, but may be accelerated upon the occurrence of an insolvency event or event of default under the Fenco Credit Agreement.

In connection with the Fenco Credit Agreement, we loaned Fenco an additional \$10,000,000 bringing the aggregate amount of indebtedness owed by Fenco to us to \$14,863,000.

Results of Operations

The following table summarizes certain key operating data for the periods indicated:

	Fiscal Years Ended March 31,					
	2011		2010		2009	
Gross profit	31.9	%	28.1	%	29.3	%
Cash flow provided by (used in) operations	\$10,735,000		\$18,347,000		\$(11,078,000)	
Finished goods inventory turnover (1)	5.2		5.0		4.4	
Return on equity (2)	11.8	%	10.4	%	4.2	%

(1) Finished goods inventory turnover is calculated by dividing the cost of goods sold for the year by the average between beginning and ending non-core finished goods inventory values, for each fiscal year. We believe that this provides a useful measure of our ability to turn production into revenues.

(2)

Return on equity is computed as net income for the fiscal year divided by shareholders' equity at the beginning of the fiscal year and measures our ability to invest shareholders' funds profitably.

Table of Contents

Following is our results of operation, reflected as a percentage of net sales:

	Fiscal Years Ended March 31,					
	2011		2010		2009	
Net sales	100.0	%	100.0	%	100.0	%
Cost of goods sold	68.1		71.9		70.7	
Gross profit	31.9		28.1		29.3	
Operating expenses:						
General and administrative	10.6		10.5		14.4	
Sales and marketing	4.1		4.1		3.9	
Research and development	1.0		1.0		1.5	
Acquisition costs	0.5		0.1		-	
Impairment of goodwill	-		-		1.6	
Operating income	15.7		12.4		7.9	
Gain on acquisition	-		(0.9))	-	
Interest expense — net of interest income	3.3		3.2		3.1	
Income tax expense	4.8		3.6		1.9	
Net income	7.6		6.5		2.9	

Fiscal 2011 Compared to Fiscal 2010

Net Sales. Net sales during fiscal 2011 increased by \$14,060,000, or 9.6%, to \$161,285,000 compared to net sales during fiscal 2010 of \$147,225,000. The increase in our net sales was primarily due to increased sales to our existing and several new customers we acquired during fiscal 2011. In addition, our fiscal 2011 net sales reflect the full year impact of net sales to customers we acquired as a result of our August 2009 acquisition. Also, we recorded revenue, net of cost, of \$378,000 in connection with our Consignment Agreement.

Cost of Goods Sold/Gross Profit. Cost of goods sold as a percentage of net sales decreased during fiscal 2011 to 68.1% from 71.9% in fiscal 2010, resulting in a corresponding increase in our gross profit percentage of 3.8% to 31.9% during fiscal 2011 from 28.1% during fiscal 2010. The increase in the gross profit percentage was primarily due to lower per unit manufacturing costs during fiscal 2011 as compared to fiscal 2010.

General and Administrative. Our general and administrative expenses during fiscal 2011 were \$17,033,000, which represents an increase of \$1,644,000, or 10.7%, from general and administrative expenses during fiscal 2010 of \$15,389,000. This increase in general and administrative expenses was primarily due to the following: (i) a loss of \$162,000 recorded due to the changes in the fair value of foreign exchange contracts compared to a gain of \$1,565,000 during fiscal 2010, (ii) \$259,000 of increased general and administrative expenses at our offshore manufacturing facilities due primarily to increased professional services fees and other consulting fees, (iii) \$217,000 of decreased amortization of the gain on the sale-leaseback transaction, and (iv) \$152,000 of increased expenses which primarily related to travel in connection with our Fenco acquisition. These increases were partly offset by a decrease in bad debt expense as we recorded a provision for bad debt expense of \$898,000 in the prior year compared to a recovery of \$38,000 in the current year.

Sales and Marketing. Our sales and marketing expenses during fiscal 2011 increased \$518,000, or 8.6%, to \$6,537,000 from \$6,019,000 during fiscal 2010. This increase was due primarily to (i) increased travel expense, (ii) the full year impact of the compensation for the employees as a result of our August 2009 acquisition, (iii) increased trade show expense, and (iv) increased advertising expense during fiscal 2011. These increases in sales and marketing expenses were partially offset by decreased catalog expenses during fiscal 2011.

Table of Contents

Research and Development. Our research and development expenses increased by \$128,000, or 9.0%, to \$1,549,000 during fiscal 2011 from \$1,421,000 during fiscal 2010. The increase in research and development expenses was due primarily to increased employee-related expenses and fees for consulting services during fiscal 2011.

Acquisition costs. Our acquisition costs were \$879,000 during fiscal 2011 compared to \$191,000 during fiscal 2010. Our fiscal 2011 acquisition costs were incurred in connection with our secured loans in the approximate aggregate amount of \$4,863,000 to Fenco and the acquisition of Fenco on May 6, 2011.

Gain on acquisition. During fiscal 2010, we recorded a gain of \$1,331,000 in connection with the acquisition of certain assets of Reliance as the estimated fair value of the net assets acquired exceeded the fair value of the consideration transferred.

Interest Expense. Our interest expense, net of interest income of \$240,000, during fiscal 2011 was \$5,355,000. This represents an increase of \$645,000 over interest expense of \$4,710,000 during fiscal 2010. This increase was primarily attributable to a higher balance of receivables being discounted under the receivable discount programs during fiscal 2011 compared to fiscal 2010. This increase in net interest expense was partly offset by a decrease in interest expense incurred on the lower average outstanding balances on our revolving loan and capital lease obligations during fiscal 2011.

Income Tax. In fiscal 2011, we recorded income tax expense of \$7,809,000 compared to income tax expense of \$5,282,000 in fiscal 2010, an effective rate of 39.0% and 35.4% for fiscal 2011 and 2010, respectively. The primary reason for the increase in the effective tax rate was because the benefit of lower statutory tax rates in foreign taxing jurisdictions was not as significant in fiscal 2011 when compared to the prior year. Offsetting the increase in the effective rate was an increase in the income apportioned to states with lower tax rates, which decreased our domestic effective rate. As a result of the decrease in the domestic effective tax rate, we revalued our deferred tax assets to reflect the lower value of deductions taken for book purposes, but not yet allowed for tax purposes. The change in the deferred tax rate resulted in a reduction of the net deferred tax assets of \$558,000. This amount was charged to income tax expense in fiscal 2011.

Fiscal 2010 Compared to Fiscal 2009

Net Sales. Net sales during fiscal 2010 increased by \$12,359,000, or 9.2%, to \$147,225,000 compared to net sales during fiscal 2009 of \$134,866,000. This increase was due to sales to new customers acquired as a result of our acquisitions and an increase in sales to our other existing customers. Our net sales during the first two months of fiscal 2010 were negatively impacted by an inventory reduction program initiated by one of our largest customers, and an understanding with another customer to delay shipments because of its then uncertain financial future. In addition, our net sales during fiscal 2010 were positively impacted by the recognition of \$845,000 of previously deferred core revenue. We have recognized this revenue because we do not expect to incur any additional sales incentive allowances associated with Remanufactured Core buybacks from a certain customer.

Cost of Goods Sold/Gross Profit. Cost of goods sold as a percentage of net sales increased during fiscal 2010 to 71.9% from 70.7% in fiscal 2009, resulting in a corresponding decrease in our gross profit percentage of 1.2% to 28.1% during fiscal 2010 from 29.3% during fiscal 2009. This decrease in our gross profit percentage was primarily due to: (i) the reversal of a \$1,307,000 accrual related to the customs duties claims during fiscal 2009 which enhanced margins in fiscal 2009, (ii) an increase in packaging costs of \$1,090,000 reflecting increased sales to new customers and improved and more costly packaging materials compared to fiscal 2009, and (iii) an increase in the provision for excess and obsolete inventory of \$842,000 compared to fiscal 2009. These decreases in gross profit were partially offset by the lower per unit manufacturing costs during fiscal 2010 compared to fiscal 2009. In addition, our gross profit in the prior year was positively impacted by acceleration of \$2,300,000 of promotional allowances earned

during the fourth quarter of fiscal 2008, which otherwise would have been earned by one of our customers during the fourth quarter of fiscal 2008 through the first four months of fiscal 2009.

General and Administrative. Our general and administrative expenses during fiscal 2010 were \$15,389,000, which represents a decrease of \$4,090,000, or 21.0%, from general and administrative expenses during fiscal 2009 of \$19,479,000. This decrease in general and administrative expenses was primarily due to the following: (i) a gain of \$1,565,000 recorded due to the changes in the fair value of foreign exchange contracts compared to a loss of \$1,194,000 during fiscal 2009, (ii) \$1,323,000 of decreased professional services fees, and (iii) \$372,000 of decreased stock-based compensation. These decreases in general and administrative expenses were partially offset by \$673,000 of increased provision for bad debt expense during fiscal 2010.

Table of Contents

Sales and Marketing. Our sales and marketing expenses during fiscal 2010 increased \$777,000, or 14.8%, to \$6,019,000 from \$5,242,000 during fiscal 2009. This increase was due primarily to the addition of employees as a result of our acquisitions, and increased commission expenses due to higher net sales. These increases in sales and marketing expenses were partially offset by decreased professional services and consulting fees, and travel expenses during fiscal 2010.

Research and Development. Our research and development expenses decreased by \$572,000, or 28.7%, to \$1,421,000 during fiscal 2010 from \$1,993,000 during fiscal 2009. The decrease in research and development expenses was due primarily to lower compensation expenses resulting from a reduction in workforce and consulting fees.

Impairment of Goodwill. During fiscal 2009, we recorded a non-cash pre-tax impairment charge of \$2,191,000. After recording the impairment charge, we had no goodwill remaining on our consolidated balance sheet as of March 31, 2009.

Gain on acquisition. During fiscal 2010, we recorded a gain of \$1,331,000 in connection with the acquisition of certain assets of Reliance as the estimated fair value of the net assets acquired exceeded the fair value of the consideration transferred.

Interest Expense. Our interest expense, net of interest income, during fiscal 2010 was \$4,710,000. This represents an increase of \$514,000 over interest expense, net of interest income, of \$4,196,000 during fiscal 2009. This increase was primarily attributable to a higher balance of receivables being discounted under the receivable discount programs during fiscal 2010 compared to fiscal 2009. During fiscal 2010, interest expense incurred on the higher average outstanding balances on our revolving loan was offset by lower interest rates.

Income Tax. In fiscal 2010, we recorded income tax expense of \$5,282,000 compared to income tax expense of \$2,589,000 in fiscal 2009. This increase was primarily due to higher pre-tax income partly offset by the benefit of lower statutory tax rates in foreign taxing jurisdictions in fiscal 2010 compared to the prior year.

Liquidity and Capital Resources

Overview

At March 31, 2011, we had working capital of \$1,395,000, a ratio of current assets to current liabilities of 1:1, and cash of \$2,477,000, compared to working capital of \$3,399,000, a ratio of current assets to current liabilities of 1.1:1, and cash of \$1,210,000 at March 31, 2010. The decrease in working capital from March 31, 2010 primarily resulted from the increase in accounts payable balances due to (i) purchases of inventory from Fenco's vendors in connection with our Consignment Agreement, (ii) our continued effort to make purchases from vendors with longer payment terms, and (iii) the timing of payments made at fiscal year-end. These decreases in working capital were partly offset by an increase in accounts receivable due to (i) a reduction in the future credits to be provided for Used Cores returned by our customers and (ii) increased net sales during fiscal 2011. In addition, our accounts receivable at March 31, 2011, include \$4,160,000 of accounts receivable from Fenco pursuant to the Consignment Agreement.

During fiscal 2011, we used cash generated by operations, from our use of receivable discount programs with certain of our major customers, and our revolving loan as our primary sources of liquidity. These sources were primarily used to make secured loans in the approximate aggregate amount of \$4,863,000 to Fenco, to make the quarterly principal payment on the term loan, pay for capital expenditure obligations, and pay the purchase price holdback in connection with our May 2008 acquisition.

Table of Contents

We believe our cash generated by operations, amounts available under our credit agreement, and our cash and short term investments on hand are sufficient to satisfy our expected future working capital needs, capital lease commitments, repayment of the current portion of our term loan, and capital expenditure obligations over the next twelve months for our current operations. However, due to our acquisition of Fenco, we may require additional capital and we cannot predict or assure that additional funds from existing sources will be sufficient.

Cash Flows

Net cash provided by operating activities was \$10,735,000 and \$18,347,000 during fiscal 2011 and 2010, respectively. The most significant changes in operating activities during fiscal 2011 compared to fiscal 2010 were due primarily to increases in our accounts receivable and long-term core inventory levels. Our accounts receivable, net increased during fiscal 2011 due to (i) a reduction in the future credits to be provided for Used Cores returned, (ii) account receivables recorded in connection with the Consignment Agreement, and (iii) the reduction in the prior year accounts receivable due to the reinstatement of a receivable discount program with one of our major customers in September 2009. Our long-term core inventory levels increased due primarily to an increase in Used Cores held at our facilities and Remanufactured Cores held at customers' locations due to higher sales. These changes in operating activities were partly offset by a decrease in our non-core inventory levels during fiscal 2011 compared to an increase in our non-core inventory levels during fiscal 2010.

Net cash used in investing activities was \$6,723,000 and \$3,666,000 during fiscal 2011 and 2010, respectively. The increase in net cash used in investing activities was primarily a result of the secured loans in the approximate aggregate amount of \$4,863,000 made to Fenco during fiscal 2011. This increase in net cash used in investing activities was partly offset by the payment of the purchase price holdback of \$464,000 in connection with our May 2008 acquisition compared to the payment of \$2,622,000 during fiscal 2010 for our acquisitions. Capital expenditures for fiscal 2011 primarily related to the purchase of equipment for our manufacturing facilities and improvements to our California facility compared to purchases in the same period of the prior year primarily related to purchases of equipment for our manufacturing facilities.

Net cash used in financing activities was \$2,790,000 and \$13,947,000 during fiscal 2011 and 2010, respectively. This change was primarily due to repayments of our previous revolving loan, in part by the use of the proceeds from our term loan, during fiscal 2010. Additionally, during fiscal 2011, we repurchased 14,400 shares at a total cost of \$89,000 pursuant to a share repurchase program authorized by our Board of Directors in March 2010.

Capital Resources

Debt

In October 2009, we entered into a revolving credit and term loan agreement (the "Credit Agreement") with our bank and one additional lender (the "Lenders"), which permits us to borrow up to a total of \$45,000,000 (the "Credit Facility"). The Credit Facility is comprised of (i) a revolving facility with a \$7,000,000 letter of credit sub-facility and (ii) a term loan. We may borrow on a revolving basis up to an amount equal to \$35,000,000 minus all outstanding letter of credit obligations minus a borrowing reserve of \$7,500,000 (the "Revolving Loan"). The borrowing reserve remains in effect only if we are party to a receivable discount program pursuant to which our accounts receivable owed to us by our largest customer are being discounted. The term loan is in the principal amount of \$10,000,000 (the "Term Loan"). The Lenders hold a security interest in substantially all of our assets.

The Credit Agreement, among other things, requires us to maintain certain financial covenants, including tangible net worth, fixed charge coverage ratio and leverage ratio covenants. We were in compliance with all financial covenants under the Credit Agreement as of March 31, 2011.

The Term Loan matures in October 2014 and requires principal payments of \$500,000 on a quarterly basis. The Revolving Loan expires in October 2011 and provides us the option to request up to three one-year extensions.

Table of Contents

In May 2010, we entered into a first amendment to the Credit Agreement with our Lenders. This amendment provides, among other things, that the borrowing reserve against our Revolving Loan commitment amount be increased from \$7,500,000 to \$10,000,000.

In November 2010, we entered into a second amendment to the Credit Agreement with our Lenders. This amendment, among other things, (i) extended the expiration date of the Revolving Loan to October 2012 and (ii) lowered the applicable margins on our borrowings to the levels described below.

In December 2010, we entered into a third amendment to the Credit Agreement with our Lenders. This amendment, among other things, eliminated the minimum London Interbank Offered Rate ("LIBOR") lending rate with respect to the Term Loan.

In April 2011, we entered into a fourth amendment to the Credit Agreement, effective March 31, 2011, with our Lenders. This amendment, among other things, (i) increased the amount we may borrow on a revolving basis from \$35,000,000 to \$50,000,000 and (ii) amended the definition of permitted acquisitions under the Credit Agreement.

There was no outstanding balance on the Revolving Loan at March 31, 2011 and 2010, respectively. Additionally, we had reserved \$1,126,000 of the Revolving Loan for standby letters of credit for workers' compensation insurance and \$3,536,000 for commercial letters of credit as of March 31, 2011. As of March 31, 2011, \$45,338,000 was available under the Revolving Loan, and of this, \$10,000,000 was reserved for use in the event our largest customer discontinued its current practice of having our receivables discounted.

The Revolving Loan and the Term Loan bear interest at either our bank's reference rate plus an applicable margin or a LIBOR rate plus an applicable margin, as selected by us in accordance with the Credit Agreement. The reference rate is, as further described in the Credit Agreement, the higher of our bank's announced base rate and the Federal funds rate plus 1/2 percent. The applicable margins are determined quarterly on a prospective basis as set forth below:

Leverage Ratio	Applicable LIBOR Margin	Applicable Reference Rate Margin
Less than 1.0:1.0	250 basis points	125 basis points
Greater than or equal to 1.0:1.0, but less than 1.5:1.0	275 basis points	150 basis points
Greater than or equal to 1.5:1.0	300 basis points	175 basis points

Our ability to comply in future periods with the financial covenants in the Credit Agreement, will depend on our ongoing financial and operating performance, which, in turn, will be subject to economic conditions and to financial, business and other factors, many of which are beyond our control and will be substantially dependent on the selling prices and demand for our products, customer demands for marketing allowances and other concessions, raw material costs, and our ability to successfully implement our overall business strategy, including acquisitions. If a violation of any of the covenants occurs in the future, we would attempt to obtain a waiver or an amendment from our Lenders. No assurance can be given that we would be successful in this regard.

Receivable Discount Programs

Our liquidity has been positively impacted by receivable discount programs we have established with certain customers and their respective banks. Under these programs, we have the option to sell those customers' receivables to those banks at a discount to be agreed upon at the time the receivables are sold. The weighted average discount under this program was 3.9% during fiscal 2011 and has allowed us to accelerate collection of receivables aggregating \$134,867,000 by a weighted average of 330 days. While these arrangements have reduced our working capital needs, there can be no assurance that these programs will continue in the future. These programs resulted in interest expense

of \$4,768,000 during fiscal 2011. Interest expense resulting from these programs would increase if interest rates rise, if utilization of these discounting arrangements expands or if the discount period is extended to reflect more favorable payment terms to customers.

Table of Contents

Off-Balance Sheet Arrangements

At March 31, 2011, we had no off-balance sheet financing or other arrangements with unconsolidated entities or financial partnerships (such as entities often referred to as structured finance or special purpose entities) established for purposes of facilitating off-balance sheet financing or other debt arrangements or for other contractually narrow or limited purposes.

Multi-year Customer Agreements

We have or are renegotiating long-term agreements with many of our major customers. Under these agreements, which typically have initial terms of at least four years, we are designated as the exclusive or primary supplier for specified categories of remanufactured alternators and starters. In consideration for our designation as a customer's exclusive or primary supplier, we typically provide the customer with a package of marketing incentives. These incentives differ from contract to contract and can include (i) the issuance of a specified amount of credits against receivables in accordance with a schedule set forth in the relevant contract, (ii) support for a particular customer's research or marketing efforts provided on a scheduled basis, (iii) discounts granted in connection with each individual shipment of product, and (iv) other marketing, research, store expansion or product development support. These contracts typically require that we meet ongoing standards related to fulfillment, price, and quality. Our contracts with major customers expire at various dates through March 2019.

The longer-term agreements both reflect and strengthen our customer relationships and business base. However, they also result in a continuing concentration of our revenue sources among a few key customers and require a significant increase in our use of working capital to build inventory and increase production. This increased production causes significant increases in our inventories, accounts payable and employee base, and customer demands that we purchase their Remanufactured Core inventory can be a significant strain on our available capital. In addition, the marketing and other allowances that we typically grant to our customers in connection with these new or expanded relationships adversely impact the near-term revenues and associated cash flows from these arrangements. However, we believe this incremental business will improve our overall liquidity and cash flow from operations over time.

Consignment Agreement

In March 2011, in order to maintain the service levels for Fenco's customers, we entered into a consignment agreement (the "Consignment Agreement") with Rafko Logistics Inc. (the "Consignee"), a subsidiary of FAPL. Pursuant to this agreement, we obtained an assignment of certain of the Consignee's purchase orders with Consignee's vendors and consigned to Consignee the goods purchased by us pursuant to such assigned purchase orders. All liabilities arising from this agreement have been guaranteed by FAPL.

During fiscal 2011, we recorded revenue, net of costs, of \$378,000 from this agreement. At March 31, 2011, under this agreement, \$4,160,000 was included in accounts receivable — net in the accompanying consolidated balance sheets representing the sale of the consigned goods. Additionally, \$1,249,000 of finished goods inventory remained at Consignee's location in connection with this agreement at March 31, 2011. Also, included in accounts payable at March 31, 2011, is approximately \$4,312,000 payable to Consignee's vendors for inventory purchased under this agreement.

As a result of the acquisition of Fenco in May 2011, the Consignment Agreement became an intercompany agreement.

Share Repurchase Program

In March 2010, the Company's Board of Directors authorized a share repurchase program of up to \$5,000,000 of the Company's outstanding common stock from time to time in the open market and in private transactions at prices deemed appropriate by management. There is no expiration date governing the period over which the Company can repurchase shares under this program. During July 2010, the Company repurchased 14,400 shares at a total cost of approximately \$89,000.

Table of Contents

Capital Expenditures and Commitments

Our capital expenditures were \$1,566,000 during fiscal 2011. A significant portion of these expenditures relate to the purchase of equipment for our manufacturing facilities and improvements to our California facility. We expect our fiscal 2012 capital expenditure for our current operations to be approximately \$2,400,000. We expect to use our working capital and incur additional capital lease obligations to finance these capital expenditures.

Contractual Obligations

The following summarizes our contractual obligations and other commitments as of March 31, 2011, and the effect such obligations could have on our cash flow in future periods:

Contractual Obligations	Total	Payments Due by Period			
		Less than 1 year	2 to 3 years	4 to 5 years	More than 5 years
Capital Lease Obligations (1)	\$875,000	\$398,000	\$477,000	\$-	\$-
Operating Lease Obligations (2)	9,320,000	2,788,000	3,374,000	2,657,000	501,000
Term Loan	7,500,000	2,000,000	4,000,000	1,500,000	-
Unrecognized Tax Benefits (3)	-	-	-	-	-
Other Long-Term Obligations (4)	33,373,000	11,799,000	8,857,000	6,257,000	6,460,000
Total	\$51,068,000	\$16,985,000	\$16,708,000	\$10,414,000	\$6,961,000

(1) Capital Lease Obligations represent amounts due under capital leases for various types of machinery and computer equipment.

(2) Operating Lease Obligations represent amounts due for rent under our leases for office and warehouse facilities in California, Tennessee, Connecticut, Malaysia, Singapore and Mexico, and for our Company automobile.

(3) We are unable to reliably estimate the timing of future payments related to uncertain tax positions; therefore, \$530,000 of income taxes payable has been excluded from the table above. However, future tax payment accruals related to uncertain tax positions are included in our balance sheets, reduced by the associated federal deduction for state taxes.

(4) Other Long-Term Obligations represent commitments we have with certain customers to provide marketing allowances in consideration for long-term agreements to provide products over a defined period. We are not obligated to provide these marketing allowances should our business relationships end with these customers.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Our primary market risk relates to changes in interest rates and foreign currency exchange rates. Market risk is the potential loss arising from adverse changes in market prices and rates, including interest rates and foreign currency exchange rates. We do not enter into derivatives or other financial instruments for trading or speculative purposes. As our overseas operations expand, our exposure to the risks associated with foreign currency fluctuations will continue to increase.

Our primary interest rate exposure relates to balances outstanding under our Credit Facility and receivable discount programs, which have interest costs that vary with interest rate movements. Our Credit Facility bears interest at variable base rates equal to the LIBOR rate or the bank's reference rate, at our option, plus a margin rate dependent

upon our most recently reported leverage ratio. This obligation is the only variable rate facility we have outstanding at March 31, 2011. At March 31, 2011, we had no amounts outstanding under our Revolving Loan. Based upon the \$7,500,000 balance of our Term Loan at March 31, 2011, an increase in interest rates of 1%, would have increased our annual net interest expense by \$75,000. In addition, for each \$10,000,000 of accounts receivable we discount over a period of 180 days, a 1% increase in interest rates would decrease our operating results by \$50,000.

Table of Contents

We are exposed to foreign currency exchange risk inherent in our anticipated purchases and assets and liabilities denominated in currencies other than the U.S. dollar. We transact business in three foreign currencies which affect our operations: the Malaysian ringit, the Singapore dollar, and the Mexican peso. Our total foreign assets were \$7,508,000 and \$7,133,000 as of March 31, 2011 and 2010, respectively. In addition, as of March 31, 2011 and 2010, we had \$2,594,000 and \$369,000, respectively, due to our foreign subsidiaries. While these amounts are eliminated in consolidation, they impact our foreign currency translation gains and losses.

During fiscal 2011 and 2010, we experienced immaterial gains relative to our transactions involving the Malaysian ringit and the Singapore dollar. Based upon our current operations related to these two currencies, a change of 10% in exchange rates would result in an immaterial change in the amount reported in our financial statements.

Our exposure to currency risks has increased since the expansion of our remanufacturing operations in Mexico. Since these operations will be accounted for primarily in Mexican pesos, fluctuations in the value of the Mexican peso are expected to have a significant impact on our reported results. To mitigate the risk of currency fluctuation between the U.S. dollar and the Mexican peso, in August 2005 we began to enter into forward foreign currency exchange contracts to exchange U.S. dollars for Mexican pesos. The extent to which we use forward foreign currency exchange contracts is periodically reviewed in light of our estimate of market conditions and the terms and length of anticipated requirements. The use of derivative financial instruments allows us to reduce our exposure to the risk that the eventual net cash outflow resulting from funding the expenses of the foreign operations will be materially affected by changes in exchange rates. In addition, during fiscal 2011, we began to enter into forward foreign currency exchange contracts to exchange U.S. dollars for Chinese yuan to mitigate the risk of exposure from material movements in exchange rates on purchases from Chinese vendors. These contracts generally expire in a year or less. Any changes in the fair values of our forward foreign currency exchange contracts are reflected in current period earnings. Based upon our forward foreign currency exchange contracts related to these currencies, an increase of 10% in exchange rates at March 31, 2011 would have increased our general and administrative expenses by approximately \$883,000. During fiscal 2011 and 2010, a loss of \$162,000 and a gain of \$1,565,000, respectively, were recorded in general and administrative expenses due to the change in the value of the forward foreign currency exchange contracts subsequent to entering into the contracts.

Item 8. Financial Statements and Supplementary Data

The information required by this item is set forth in the consolidated financial statements, commencing on page F-1 included herein.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We have established disclosure controls and procedures to ensure that the information required to be disclosed by the Company in the reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and forms and that such information is accumulated and made known to the officers who certify the Company's financial reports and to other members of senior management and the Board of Directors as appropriate to allow timely decisions regarding required disclosures.

Table of Contents

Under the supervision and with the participation of management, including our Chief Executive Officer, Chief Financial Officer, and Chief Accounting Officer, we have conducted an evaluation of the effectiveness of our disclosure controls and procedures as defined in Exchange Act Rules 13a-15(e) and 15d-15(e). Based on this evaluation, our Chief Executive Officer, Chief Financial Officer, and Chief Accounting Officer concluded that the Company's disclosure controls and procedures were effective as of March 31, 2011.

Inherent Limitations Over Internal Controls

Our internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control may not prevent misstatements. Further, an evaluation of the effectiveness of internal control may not detect misstatements.

Management's Report on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Under the supervision and with the participation of management, including our Chief Executive Officer, Chief Financial Officer, and Chief Accounting Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the criteria established in the Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, management concluded that the Company's internal control over financial reporting was effective as of March 31, 2011.

The effectiveness of our internal control over financial reporting as of March 31, 2011 has been audited by the Company's independent registered public accounting firm, Ernst & Young LLP. Their assessment is included in the accompanying Report of Independent Registered Public Accounting Firm on internal control over financial reporting.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting during the fourth quarter ended March 31, 2011 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of Motorcar Parts of America, Inc.

We have audited Motorcar Parts of America, Inc. and subsidiaries' internal control over financial reporting as of March 31, 2011 based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Motorcar Parts of America, Inc. and subsidiaries' management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Motorcar Parts of America, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of March 31, 2011, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Motorcar Parts of America, Inc. and subsidiaries as of March 31, 2011 and 2010, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the three years in the period ended March 31, 2011 of Motorcar Parts of America, Inc. and subsidiaries and our report dated June 13, 2011 expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of Motorcar Parts of America, Inc.

We have audited the accompanying consolidated balance sheets of Motorcar Parts of America, Inc. and subsidiaries (the "Company") as of March 31, 2011 and 2010 and the related consolidated statements of income, shareholders' equity, and cash flows for the each of the three years in the period ended March 31, 2011. Our audits also included the financial statement schedule listed in the index at Item 15(a)(2). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Motorcar Parts of America, Inc. and subsidiaries at March 31, 2011 and 2010 and the consolidated results of their operations and their cash flows for each of the three years in the period ended March 31, 2011, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Motorcar Parts of America, Inc.'s internal control over financial reporting as of March 31, 2011, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated June 13, 2011, expressed an unqualified opinion thereon.

Table of Contents

MOTORCAR PARTS OF AMERICA, INC. AND SUBSIDIARIES
Notes to Consolidated Financial Statements

1. Company Background and Organization

Motorcar Parts of America, Inc. and its subsidiaries (the “Company” or “MPA”) remanufacture, produce and distribute alternators and starters for import and domestic cars and light trucks. These replacement parts are sold for use on vehicles after initial vehicle purchase. These automotive parts are sold to automotive retail chain stores and warehouse distributors throughout the United States and Canada and to major automobile manufacturers.

The Company obtains used alternators and starters, commonly known as Used Cores, primarily from its customers as trade-ins. It also purchases Used Cores from vendors (core brokers). The customers grant credit to the consumer when the used part is returned to them, and the Company in turn provides a credit to the customers upon return to the Company. These Used Cores are an essential material needed for the remanufacturing operations. The Company has remanufacturing, warehousing and shipping/receiving operations for alternators and starters in Mexico, California, Singapore and Malaysia. In addition, the Company utilizes third party warehouse distribution centers in Edison, New Jersey and Springfield, Oregon. The Company also uses a warehouse distribution facility in Berlin, Connecticut.

2. Summary of Significant Accounting Policies

Segment Reporting

The Company currently operates in one business segment pursuant to the guidance provided under the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”).

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of Motorcar Parts of America, Inc and its wholly owned subsidiaries, MVR Products Pte. Ltd., Unijoh Sdn. Bhd., Motorcar Parts de Mexico, S.A. de C.V. and Motorcar Parts of Canada, Inc. All significant inter-company accounts and transactions have been eliminated.

Cash

The Company maintains cash balances in local currencies in Singapore and Malaysia and in local and U.S. dollar currencies in Mexico for use by the facilities operating in those foreign countries. The balances in these foreign accounts translated into U.S. dollars at March 31, 2011 and 2010 were \$685,000 and \$569,000, respectively.

Accounts Receivable

The allowance for doubtful accounts is developed based upon several factors including customer credit quality, historical write-off experience and any known specific issues or disputes which exist as of the balance sheet date. Accounts receivable are written off only when all collection attempts have failed. The Company does not require collateral for accounts receivable.

The Company has receivable discount programs that have been established with certain customers and their respective banks. Under these programs, the Company has the option to sell those customers’ receivables to those banks at a discount to be agreed upon at the time the receivables are sold. Once the customer chooses which outstanding invoices are going to be made available for discounting, the Company can accept or decline the bundle of invoices provided. The receivable discount programs are non-recourse, and funds cannot be reclaimed by the customer or its bank after

the related invoices have been discounted.

F-5

Table of Contents

Inventory

Non-core Inventory

Non-core inventory is comprised of non-core raw materials, the non-core value of work in process and the non-core value of finished goods. Used Cores, the Used Core value of work in process and the Remanufactured Core portion of finished goods are classified as long-term core inventory as described below under the caption “Long-term Core Inventory.”

Non-core inventory is stated at the lower of cost or market. The cost of non-core inventory approximates average historical purchase prices paid, and is based upon the direct costs of material and an allocation of labor and variable and fixed overhead costs. The cost of non-core inventory is evaluated at least quarterly during the fiscal year and adjusted as necessary to reflect current lower of cost or market levels. These adjustments are determined for individual items of inventory within each of the three classifications of non-core inventory as follows:

✦ Non-core raw materials are recorded at average cost, which is based on the actual purchase price of raw materials on hand. The average cost is updated quarterly. This average cost is used in the inventory costing process and is the basis for allocation of materials to finished goods during the production process.

✦ Non-core work in process is in various stages of production, is on average 50% complete and is valued at 50% of the cost of a finished good. Non-core work in process inventory historically comprises less than 3% of the total non-core inventory balance.

✦ Finished goods cost includes the average cost of non-core raw materials and allocations of labor and variable and fixed overhead. The allocations of labor and variable and fixed overhead costs are determined based on the average actual use of the production facilities over the prior twelve months which approximates normal capacity. This method prevents the distortion in costs that would occur during short periods of abnormally low or high production. In addition, the Company excludes certain unallocated overhead such as severance costs, duplicative facility overhead costs, and spoilage from the calculation and expenses them as period costs. For the years ended March 31, 2011, 2010, and 2009, costs of approximately \$1,378,000, \$1,314,000, and \$2,019,000, respectively, were considered abnormal and thus excluded from the cost calculation and charged directly to cost of sales.

The Company records an allowance for potentially excess and obsolete inventory based upon recent sales history, the quantity of inventory on-hand, and a forecast of potential use of the inventory. The Company reviews inventory on a monthly basis to identify excess quantities and part numbers that are experiencing a reduction in demand. In general, part numbers with quantities representing a one to three-year supply are partially reserved for at rates based upon management’s judgment and consistent with historical rates. Any part numbers with quantities representing more than a three-year supply are reserved for at a rate that considers possible scrap and liquidation values and may be as high as 100% of cost if no liquidation market exists for the part.

The quantity thresholds and reserve rates are subjective and are based on management’s judgment and knowledge of current and projected industry demand. The reserve estimates may, therefore, be revised if there are changes in the overall market for the Company’s products or market changes that, in management’s judgment, impact the Company’s ability to sell or liquidate potentially excess or obsolete inventory.

The Company records vendor discounts as a reduction of inventories that are recognized as a reduction to cost of sales as the inventories are sold.

Inventory Unreturned

Inventory unreturned represents the Company's estimate, based on historical data and prospective information provided directly by the customer, of finished goods shipped to customers that the Company expects to be returned after the balance sheet date. Because all cores are classified separately as long term assets, the inventory unreturned balance includes only the added unit value of finished goods. The return rate is calculated based on expected returns within the normal operating cycle of one year. As such, the related amounts are classified in current assets.

F-6

Table of Contents

Inventory unreturned is valued in the same manner as the Company's finished goods inventory.

Long-term Core Inventory

Long-term core inventory consists of:

- Used Cores purchased from core brokers and held in inventory at the Company's facilities,
- Used Cores returned by the Company's customers and held in inventory at the Company's facilities,
- Used Cores returned by end-users to customers but not yet returned to the Company are classified as Remanufactured Cores until they are physically received by the Company,
- Remanufactured Cores held in finished goods inventory at the Company's facilities; and
- Remanufactured Cores held at customer locations as a part of finished goods sold to the customer. For these Remanufactured Cores, the Company expects the finished good containing the Remanufactured Core to be returned under the Company's general right of return policy or a similar Used Core to be returned to the Company by the customer, in each case, for credit.

Long-term core inventory is recorded at average historical purchase prices determined based on actual purchases of inventory on hand. The cost and market value of Used Cores for which sufficient recent purchases have occurred are deemed the same as the purchase price for purchases that are made in arms length transactions.

Long-term core inventory recorded at average historical purchase prices is primarily made up of Used Cores for newer products related to more recent automobile models or products for which there is a less liquid market. The Company must purchase these Used Cores from core brokers because its customers do not have a sufficient supply of these newer Used Cores available for the core exchange program.

Approximately 15% to 20% of Used Cores are obtained in core broker transactions and are valued based on average purchase price. The average purchase price of Used Cores for more recent automobile models is retained as the cost for these Used Cores in subsequent periods even as the source of these Used Cores shifts to the core exchange program.

Long-term core inventory is recorded at the lower of cost or market value. In the absence of sufficient recent purchases, the Company uses core broker price lists to assess whether Used Core cost exceeds Used Core market value on an item by item basis. The primary reason for the insufficient recent purchases is that the Company obtains most of its Used Core inventory from the customer core exchange program.

The Company classifies all of its core inventories as long-term assets. The determination of the long-term classification is based on its view that the value of the cores is not consumed or realized in cash during the Company's normal operating cycle, which is one year for most of the cores recorded in inventory. According to guidance provided under the FASB ASC, current assets are defined as "assets or resources commonly identified as those which are reasonably expected to be realized in cash or sold or consumed during the normal operating cycle of the business." The Company does not believe that core inventories, which the Company classifies as long-term, are consumed because the credits issued upon the return of Used Cores offset the amounts invoiced when the Remanufactured Cores included in finished goods were sold. The Company does not expect the core inventories to be consumed, and thus the Company does not expect to realize cash, until its relationship with a customer ends, a possibility that the Company considers remote based on existing long-term customer agreements and historical experience.

However, historically for approximately 4.5% of finished goods sold, the Company's customer will not send the Company a Used Core to obtain the credit the Company offers under its core exchange program. Therefore, based on the Company's historical estimate, the Company derecognizes the core value for these finished goods upon sale, as the Company believes they have been consumed and the Company has realized cash.

F-7

Table of Contents

The Company realizes cash for only the core exchange program shortfall of approximately 4.5%. This shortfall represents the historical difference between the number of finished goods shipped to customers and the number of Used Cores returned to the Company by customers. The Company does not realize cash for the remaining portion of the cores because the credits issued upon the return of Used Cores offset the amounts invoiced when the Remanufactured Cores included in finished goods were sold. The Company does not expect to realize cash for the remaining portion of these Remanufactured Cores until its relationship with a customer ends, a possibility that the Company considers remote based on existing long-term customer agreements and historical experience.

For these reasons, the Company concluded that it is more appropriate to classify core inventory as long-term assets.

Long-term Core Inventory Deposit

The long-term core inventory deposit account represents the value of Remanufactured Cores the Company purchased from customers, which are held by the customers and remain on the customers' premises. The purchase is made through the issuance of credits against that customer's receivables either on a one-time basis or over an agreed-upon period. The credits against the customer's receivable are based upon the Remanufactured Core purchase price previously established with the customer. At the same time, the Company records the long-term core inventory deposit for the Remanufactured Cores purchased at its cost, determined as noted under Long-term Core Inventory. The long-term core inventory deposit is stated at the lower of cost or market. The cost is established at the time of the transaction based on the then current cost, determined as noted under Long-term Core Inventory. The difference between the credit granted and the cost of the long-term core inventory deposit is treated as a sales allowance reducing revenue. When the purchases are made over an agreed-upon period, the long-term core inventory deposit is recorded at the same time the credit is issued to the customer for the purchase of the Remanufactured Cores.

At least annually, and as often as quarterly, reconciliations and confirmations are performed to determine that the number of Remanufactured Cores purchased, but retained at the customer locations, remains sufficient to support the amounts recorded in the long-term core inventory deposit account. At the same time, the mix of Remanufactured Cores is reviewed to determine that the aggregate value of Remanufactured Cores in the account has not changed during the reporting period. The Company evaluates the cost of cores supporting the aggregate long-term core inventory deposit account each quarter. If the Company identifies any permanent reduction in either the number or the aggregate value of the Remanufactured Core inventory mix held at the customer location, the Company will record a reduction in the long-term core inventory deposit account during that period.

Consignment Agreement

In March 2011, in order to maintain the service levels for Fenco's customers, the Company entered into a consignment agreement (the "Consignment Agreement") with Rafko Logistics Inc. (the "Consignee"), a subsidiary of FAPL. Pursuant to this agreement, the Company obtained an assignment of certain of the Consignee's purchase orders with Consignee's vendors and consigned to Consignee the goods purchased by the Company pursuant to such assigned purchase orders. All liabilities arising from this agreement have been guaranteed by FAPL.

During fiscal 2011, the Company recorded revenue, net of costs, of \$378,000 from this agreement. At March 31, 2011, under this agreement, \$4,160,000 was included in accounts receivable — net in the accompanying consolidated balance sheets for the sales of the consigned goods. Additionally, \$1,249,000 of finished goods inventory remained at Consignee's location in connection with this agreement at March 31, 2011. Also, included in accounts payable at March 31, 2011, is approximately \$4,312,000 payable to the Consignee's vendors for inventory purchased under this agreement.

As a result of the acquisition of Fenco in May 2011, the Consignment Agreement became an intercompany agreement.

F-8

Table of Contents

Income Taxes

The Company accounts for income taxes using the liability method, which measures deferred income taxes by applying enacted statutory rates in effect at the balance sheet date to the differences between the tax basis of assets and liabilities and their reported amounts in the financial statements. The resulting asset or liability is adjusted to reflect changes in the tax laws as they occur. A valuation allowance is provided to reduce deferred tax assets when it is more likely than not that a portion of the deferred tax asset will not be realized.

The primary components of the Company's income tax provision are (i) the current liability or refund due for federal, state and foreign income taxes and (ii) the change in the amount of the net deferred income tax asset, including the effect of any change in the valuation allowance.

Realization of deferred tax assets is dependent upon the Company's ability to generate sufficient future taxable income. In evaluating this ability, management considers the Company's long-term agreements with each of its major customers that expire at various dates through March 2019. Based on management's forecast of the Company's future operating results, management believes that it is more likely than not that future taxable income will be sufficient to realize the recorded deferred tax assets. Management periodically compares its forecasts to actual results, and there can be no assurance that the forecasted results will be achieved.

Plant and Equipment

Plant and equipment are stated at cost, less accumulated depreciation and amortization. The cost of additions and improvements are capitalized, while maintenance and repairs are charged to expense when incurred. Depreciation and amortization are provided on a straight-line basis in amounts sufficient to relate the cost of depreciable assets to operations over their estimated service lives. Machinery and equipment are amortized over a range from seven to ten years. Office equipment and fixtures are amortized over a range from three to ten years. Leasehold improvements are amortized over the lives of the respective leases or the service lives of the leasehold improvements, whichever is shorter. Amortization of assets recorded under capital leases is included in depreciation expense.

Goodwill

Goodwill is the excess of the purchase price over the fair value of identifiable net assets acquired in business combinations. The Company does not amortize goodwill but evaluates goodwill for impairment on an annual basis or more frequently if events or circumstances occur that would indicate a reduction in fair value of the Company. Such indicators include, but are not limited to, events or circumstances such as a significant adverse change in the business climate, unanticipated competition, a loss of key personnel, adverse legal or regulatory developments, or a significant decline in the market price in the Company's common stock. The Company did not have any goodwill at March 31, 2011 or 2010.

Intangible Assets

The Company's intangible assets other than goodwill are finite-lived and amortized on a straight-line basis over their respective useful lives, and are analyzed for impairment when and if indicators of impairment exist.

Deferred Financing Costs

Deferred financing costs include fees and costs incurred to obtain financing. These fees and costs are amortized using the straight-line method over the terms of the related loans and are included in interest expense in the Company's consolidated statements of income.

Foreign Currency Translation

For financial reporting purposes, the functional currency of the foreign subsidiaries is the local currency. The assets and liabilities of foreign operations are translated into the reporting currency (U.S. dollar) at the exchange rate in effect at the balance sheet date, while revenues and expenses are translated at average exchange rates during the year. The accumulated foreign currency translation adjustment is presented as a component of comprehensive income or loss in the consolidated statement of shareholders' equity.

F-9

Table of Contents

Revenue Recognition

The Company recognizes revenue when performance by the Company is complete and all of the following criteria have been met:

- Persuasive evidence of an arrangement exists,
- Delivery has occurred or services have been rendered,
- The seller's price to the buyer is fixed or determinable, and
- Collectibility is reasonably assured.

For products shipped free-on-board ("FOB") shipping point, revenue is recognized on the date of shipment. For products shipped FOB destination, revenues are recognized on the estimated or actual date of delivery. The Company includes shipping and handling charges in its gross invoice price to customers and classifies the total amount as revenue. Shipping and handling costs are recorded as cost of sales.

Unit value revenue is recorded based on the Company's price list, net of applicable discounts and allowances. The Company allows customers to return slow moving and other inventory. The Company provides for such returns of inventory by reducing revenue and cost of sales for the unit value of goods sold that are expected to be returned based on a historical return analysis and information obtained from customers about current stock levels.

The Company accounts for revenues and cost of sales on a net-of-core-value basis. Management has determined that the Company's business practices and contractual arrangements result in approximately 96% of the remanufactured alternators and starters sold being replaced by similar Used Cores sent back for credit by customers under the Company's core exchange program. Accordingly, the Company excludes the value of Remanufactured Cores from revenue.

When the Company ships a product, it recognizes an obligation to accept a similar Used Core sent back under the core exchange program by recording a contra receivable account based upon the Remanufactured Core price agreed upon by the Company and its customer. Upon receipt of a Used Core, the Company grants the customer a credit based on the Remanufactured Core price billed and restores the Used Core to on-hand inventory.

When the Company ships a product, it invoices certain customers for the Remanufactured Core portion of the product at full Remanufactured Core sales price. For these Remanufactured Cores, the Company recognizes core revenue based upon an estimate of the rate at which the Company's customers will pay cash for Remanufactured Cores in lieu of sending back similar Used Cores for credits under the Company's core exchange program.

In addition, the Company recognizes revenue related to Remanufactured Cores originally sold at a nominal price and not expected to be replaced by a similar Used Core under the core exchange program. Unlike the full price Remanufactured Cores, the Company only recognizes revenue from nominally priced Remanufactured Cores not expected to be replaced by a similar Used Core sent back under the core exchange program when the Company believes it has met all of the following criteria:

- The Company has a signed agreement with the customer covering the nominally priced Remanufactured Cores not expected to be replaced by a similar Used Core sent back under the core exchange program. This agreement must specify the number of Remanufactured Cores its customer will pay cash for in lieu of sending back a similar Used Core and the basis on which the nominally priced Remanufactured Cores are to be valued (normally the average

price per Remanufactured Core stipulated in the agreement).

F-10

Table of Contents

• The contractual date for reconciling the Company's records and customer's records of the number of nominally priced Remanufactured Cores not expected to be replaced by a similar Used Core sent back under the core exchange program must be in the current or a prior period.

• The reconciliation of the nominally priced Remanufactured Cores must be completed and agreed to by the customer.

- The amount must be billed to the customer.

The Company has agreed in the past and may in the future agree to buy back Remanufactured Cores. The difference between the credit granted and the cost of the Remanufactured Cores bought back is treated as a sales allowance reducing revenue. As a result of the increasing level of Remanufactured Core buybacks, the Company now defers core revenue from these customers until there is no expectation that the sales allowances associated with Remanufactured Core buybacks from these customers will offset Remanufactured Core revenues that would otherwise be recognized once the criteria noted above have been met. At March 31, 2011 and 2010, Remanufactured Core revenue of \$8,729,000 and \$6,061,000, respectively, was deferred.

Marketing Allowances

The Company records the cost of all marketing allowances provided to its customers. Such allowances include sales incentives and concessions. Voluntary marketing allowances related to a single exchange of product are recorded as a reduction of revenues at the time the related revenues are recorded or when such incentives are offered. Other marketing allowances, which may only be applied against future purchases, are recorded as a reduction to revenues in accordance with a schedule set forth in the relevant contract. Sales incentive amounts are recorded based on the value of the incentive provided. See "Note 14. Commitments and Contingencies" for a description of all marketing allowances.

Advertising Costs

The Company expenses all advertising costs as incurred. Advertising expenses for the fiscal years ended March 31, 2011, 2010 and 2009 were \$368,000, \$212,000 and \$227,000, respectively.

Net Income Per Share

Basic net income per share is computed by dividing net income by the weighted average number of shares of common stock outstanding during the period. Diluted net income per share includes the effect, if any, from the potential exercise or conversion of securities, such as stock options and warrants, which would result in the issuance of incremental shares of common stock.

The following presents a reconciliation of basic and diluted net income per share.

	Years Ended March 31,		
	2011	2010	2009
Net income	\$12,220,000	\$ 9,646,000	\$ 3,857,000
Basic shares	12,042,428	11,988,692	11,995,622
Effect of dilutive stock options and warrants	291,903	127,923	90,504
Diluted shares	12,334,331	12,116,615	12,086,126
Net income per share:			
Basic	\$1.01	\$ 0.80	\$ 0.32
Diluted	\$0.99	\$ 0.80	\$ 0.32

The effect of dilutive options and warrants excludes (i) 771,084 shares subject to options and 546,283 shares subject to warrants with exercise prices ranging from \$9.90 to \$15.00 per share for the year ended March 31, 2011, (ii) 1,253,982 shares subject to options and 546,283 shares subject to warrants with exercise prices ranging from \$5.00 to \$15.00 per share for the year ended March 31, 2010, and (iii) 1,249,900 shares subject to options and 546,283 shares subject to warrants with exercise prices ranging from \$6.11 to \$15.00 per share for the year ended March 31, 2009 — all of which were anti-dilutive.

Table of Contents

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States ("GAAP") requires management to make estimates and assumptions that affect the reported amounts in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates. On an on-going basis, the Company evaluates its estimates, including those related to the carrying amount of property, plant and equipment; valuation and return allowances for receivables, inventories, and deferred income taxes; accrued liabilities; and litigation and disputes.

The Company uses significant estimates in the calculation of sales returns. These estimates are based on the Company's historical return rates and an evaluation of estimated sales returns from specific customers.

The Company uses significant estimates in the calculation of the lower of cost or market value of long term core inventory.

The Company's calculation of inventory reserves involves significant estimates. The basis for the inventory reserve is a comparison of inventory on hand to historical production usage or sales volumes.

The Company records its liability for self-insured workers' compensation by including an estimate of the liability associated with total claims incurred and reported as well as an estimate of the liabilities associated with incurred, but not reported, claims determined by applying the Company's historical claims development factor to its estimate of the liabilities associated with incurred and reported claims.

The Company uses significant estimates in the calculation of its income tax provision or benefit by using forecasts to estimate whether it will have sufficient future taxable income to realize its deferred tax assets. There can be no assurances that the Company's taxable income will be sufficient to realize such deferred tax assets.

The Company uses significant estimates in the ongoing calculation of potential liabilities from uncertain tax positions that are more likely than not to occur.

A change in the assumptions used in the estimates for sales returns, inventory reserves and income taxes could result in a difference in the related amounts recorded in the Company's consolidated financial statements.

Financial Instruments

The carrying amounts of cash, short-term investments, accounts receivable, accounts payable and accrued liabilities approximate their fair value due to the short-term nature of these instruments. The carrying amount of the long-term note receivable approximates its fair value based on current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturity. The carrying amounts of the Revolving Loan, Term Loan and other long-term liabilities approximate their fair value based on current rates for instruments with similar characteristics.

Stock Options and Share-Based Payments

Effective April 1, 2006, the Company began using the modified prospective application method of transition for all its stock-based compensation plans. The modified prospective application method of transition requires that stock-based compensation expense be recorded for all new and unvested stock options that are ultimately expected to vest as the requisite service is rendered from April 1, 2006 forward.

In November 2005, the FASB issued guidance, which provides an elective alternative transition method for calculating the pool of excess tax benefits available to absorb tax deficiencies recognized subsequent to the adoption date. The Company had significant vested options on the adoption date of the guidance and therefore has elected to compute its APIC pool in accordance with this guidance. The excess tax benefits for the years ended March 31, 2010, 2009 and 2008 are presented as a cash outflow from operations and a cash inflow from financing activities.

F-12

Table of Contents

The fair value of stock options used to compute stock-based compensation expense, which is reflected in reported results is estimated using the Black-Scholes option pricing model, which was developed for use in estimating the fair value of traded options that have no vesting restrictions and are fully transferable. This model requires the input of subjective assumptions including the expected volatility of the underlying stock and the expected holding period of the option. These subjective assumptions are based on both historical and other information. Changes in the values assumed and used in the model can materially affect the estimate of fair value. Options to purchase 18,000, 12,000 and 84,000 shares of common stock were granted during the years ended March 31, 2011, 2010 and 2009, respectively.

The table below summarizes the Black-Scholes option pricing model assumptions used to derive the weighted average fair value of the stock options granted during the periods noted.

	Years Ended March 31,					
	2011		2010		2009	
Weighted average risk free interest rate	2.09	%	1.33	%	2.61	%
Weighted average expected holding period (years)	5.73		4.90		5.15	
Weighted average expected volatility	38.87	%	25.17	%	40.95	%
Weighted average expected dividend yield	-	%	-	%	-	%
Weighted average fair value of options granted	\$3.82		\$1.03		\$2.08	

Credit Risk

The majority of the Company's sales are to leading automotive after-market parts suppliers. Management believes the credit risk with respect to trade accounts receivable is limited due to the Company's credit evaluation process and the nature of its customers. However, should the Company's customers experience significant cash flow problems, the Company's financial position and results of operations could be materially and adversely affected, and the maximum amount of loss that would be incurred would be the outstanding receivable balance, Used Cores expected to be returned by customer, and the value of the Remanufactured Cores held at customers location at March 31, 2011.

Deferred Compensation Plan

The Company has a deferred compensation plan for certain members of management. The plan allows participants to defer salary, bonuses and commissions. The assets of the plan are held in a trust and are subject to the claims of the Company's general creditors under federal and state laws in the event of insolvency. Consequently, the trust qualifies as a Rabbi trust for income tax purposes. The plan's assets consist primarily of mutual funds and are classified as "available for sale." The investments are recorded at market value, with any unrealized gain or loss recorded as other comprehensive income or loss in shareholders' equity. Adjustments to the deferred compensation obligation are recorded in operating expenses. The Company redeemed \$207,000 and \$70,000 of short-term investments for the payment of deferred compensation liabilities during the year ended March 31, 2011 and 2010, respectively. The carrying value of plan assets was \$304,000 and \$451,000, and deferred compensation obligation was \$304,000 and \$451,000 at March 31, 2011 and 2010, respectively. During the years ended March 31, 2011 and 2010 an expense of \$31,000 and \$139,000, respectively, was recorded related to the deferred compensation plan.

Comprehensive Income or Loss

Comprehensive income or loss is defined as the change in equity during a period resulting from transactions and other events and circumstances from non-owner sources. The Company's total comprehensive income or loss consists of net unrealized income or loss from foreign currency translation adjustments and unrealized gains or losses on short-term investments. The Company has presented comprehensive income or loss on the consolidated statement of shareholders'

equity.

Table of Contents

Fair Value Measurements

The Company adopted the new guidance issued by the FASB on fair value measurements and disclosures for all financial assets and liabilities on April 1, 2008. This guidance defined fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It also established a framework for measuring fair value in accordance with GAAP and expanded the disclosures required for fair value measurements. On April 1, 2009, the Company adopted this guidance for all non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis, which did not have any material impact on the Company's financial condition, results of operations or cash flows.

New Accounting Pronouncements

Transfers of Financial Assets

In June 2009, the Financial Accounting Standards Board (the "FASB") issued new guidance on the treatment of transfers of financial assets which eliminates the concept of a "qualifying special-purpose entity," changes the requirements for derecognizing financial assets, and requires additional disclosures in order to enhance information reported to users of financial statements by providing greater transparency about transfers of financial assets, including securitization transactions, and an entity's continuing involvement in and exposure to the risks related to transferred financial assets. This new guidance was effective as of the beginning of an entity's first fiscal year that began after November 15, 2009. The adoption of this guidance on April 1, 2010 did not have any impact on the Company's consolidated financial position and results of operations.

Consolidation of Variable Interest Entities

In June 2009, the FASB issued new guidance which amends the consolidation guidance applicable to variable interest entities and was effective as of the beginning of an entity's first fiscal year that began after November 15, 2009. The adoption of this guidance on April 1, 2010 did not have any impact on the Company's consolidated financial position and results of operations.

Fair Value Measurements and Disclosures

In January 2010, the FASB issued an update which requires new disclosures for transfers in and out of Level 1 and Level 2 of the fair value hierarchy and expanded disclosures for activity in Level 3 of the fair value hierarchy. The update also clarifies existing disclosures regarding the level of disaggregation for disclosure and disclosures about inputs and valuation techniques. The new disclosures and clarifications of existing disclosures were effective for interim and annual reporting periods beginning after December 15, 2009. The adoption of this update on January 1, 2010 did not have any impact on the Company's consolidated financial position and results of operations. The disclosures regarding certain Level 3 activity are effective for fiscal years beginning after December 15, 2010. The Company does not expect the adoption of this guidance on April 1, 2011 to have any material impact on its consolidated financial position and results of operations.

Disclosure Requirements Related to Financing Receivables

In July 2010, the FASB issued an update which requires enhanced disclosures about the credit quality of financing receivables and the related allowance for credit losses. Trade accounts receivable with maturities of one year or less are excluded from the disclosure requirements. Disclosures required as of the end of a reporting period were effective for interim and annual periods ending on or after December 15, 2010. The adoption of this guidance on December 31,

2010 did not have any impact on the Company's consolidated financial position and results of operations. The disclosures required about activity that occurs during a reporting period were effective for interim and annual periods beginning on or after December 15, 2010. The adoption of this guidance on January 1, 2011 did not have any impact on the Company's consolidated financial position and the results of operations.

F-14

Table of Contents

When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts

In December 2010, the FASB issued guidance which modifies step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. For those reporting units with a carrying amount equal to or less than zero for which qualitative factors indicate that it is more likely than not that a goodwill impairment exists, step 2 of the goodwill impairment test will need to be performed. This guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2010. Early adoption of this update is prohibited. The Company does not expect the adoption of this guidance on April 1, 2011 to have any material impact on its consolidated financial position and the results of operations.

Disclosure of Supplementary Pro Forma Information for Business Combinations

In December 2010, the FASB issued guidance which specifies that if comparative financial statements are presented, disclosure of revenue and earnings of a combined entity should be made as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. This guidance is effective for business combinations consummated in fiscal years beginning on or after December 15, 2010. The Company is currently evaluating the impact the adoption of this guidance on April 1, 2011 will have on its consolidated financial position and the results of operations.

3. Long Term Note Receivable

In August 2010, the Company made a loan in the amount of approximately \$1,894,000 (the “Original Loan”) to Fenwick Automotive Products Limited (“Fenco”), a privately-owned Toronto-based manufacturer, remanufacturer and distributor of new and remanufactured aftermarket auto parts, pursuant to a debenture executed by Fenco in favor of the Company (the “Original Debenture”). In December 2010, the Company made an additional loan in the amount of approximately \$2,969,000 to Fenco pursuant to an amended and restated debenture (the “Amended and Restated Debenture”), bringing the total aggregate loan amount to approximately \$4,863,000 (the “Aggregate Loan”). The Aggregate Loan matures on July 31, 2012 and bears interest at a rate equal to the prime rate plus 8.75% per annum, which is payable in cash quarterly in arrears beginning on December 31, 2010.

The Aggregate Loan is secured by a blanket lien on all of Fenco’s assets. FAPL Holdings, Inc. (“FAPL”), Fenco’s parent company, and each of Fenco’s subsidiaries have also agreed to grant blanket liens of their assets to secure the Aggregate Loan. The Company’s rights to the payment of any amounts due in connection with the Aggregate Loan and its rights as a secured party under the security agreements are subordinated to the rights of Manufacturers and Traders Trust Company (“M&T Bank”), as a lender to, and secured party of, Fenco. Upon the occurrence of an event of default, as defined in the Amended and Restated Debenture, the Company may declare all amounts under the Amended and Restated Debenture immediately due and payable.

In May 2011, the Company acquired all of the outstanding equity of FAPL’s subsidiaries and as a result the Aggregate Loan is an intercompany loan (see Note 22 to the consolidated financial statements).

Table of Contents

4. Intangible Assets

The following is a summary of the Company's intangible assets at March 31, 2011 and March 31, 2010.

		March 31, 2011		March 31, 2010	
	Weighted Average Amortization Period	Gross Carrying Value	Accumulated Amortization	Gross Carrying Value	Accumulated Amortization
Intangible assets subject to amortization					
Trademarks	9 years	\$ 553,000	\$ 189,000	\$ 553,000	\$ 115,000
Customer relationships	12 years	6,464,000	1,447,000	6,464,000	799,000
Non-compete agreements	5 years	257,000	108,000	257,000	56,000
Total	11 years	\$ 7,274,000	\$ 1,744,000	\$ 7,274,000	\$ 970,000

Amortization expense related to intangible assets was \$774,000 and \$644,000 during the years ended March 31, 2011 and 2010, respectively. The aggregate estimated future amortization expense for intangible assets is as follows:

Year Ending March 31,	
2012	\$ 774,000
2013	774,000
2014	738,000
2015	670,000
2016	349,000
Thereafter	2,225,000
Total	\$ 5,530,000

5. Short-Term Investments

The short-term investments account contains the assets of the Company's deferred compensation plan. The plan's assets consist primarily of mutual funds and are classified as available for sale. The Company redeemed \$207,000 of short-term investments for the payment of deferred compensation liabilities during the year ended March 31, 2011. As a result, the Company recorded a gain of \$25,000 on redemption of short-term investments for the payment of deferred compensation liabilities, included in general and administrative expense in the consolidated statements of income for the year ended March 31, 2011. As of March 31, 2011 and 2010, the fair market value of the short-term investments was \$304,000 and \$451,000, and the liability to plan participants was \$304,000 and \$451,000, respectively.

6. Accounts Receivable — Net

Included in accounts receivable — net are significant offset accounts related to customer allowances earned, customer payment discrepancies, returned goods authorizations ("RGA") issued for in-transit unit returns, estimated future credits to be provided for Used Cores returned by the customers and potential bad debts. Due to the forward looking nature and the different aging periods of certain estimated offset accounts, they may not, at any point in time, directly relate to the balances in the open trade accounts receivable.

Table of Contents

Accounts receivable — net is comprised of the following at March 31:

	2011	2010
Accounts receivable — trade	\$33,066,000	\$30,977,000
Allowance for bad debts	(1,026,000)	(1,141,000)
Customer allowances earned	(6,644,000)	(5,104,000)
Customer payment discrepancies	(648,000)	(553,000)
Customer finished goods returns accruals (1)	(3,719,000)	(2,582,000)
Customer core returns accruals	(10,394,000)	(16,044,000)
Less: total accounts receivable offset accounts	(22,431,000)	(25,424,000)
Total accounts receivable — net	\$10,635,000	\$5,553,000

(1) The portion of customer unit returns for which an RGA was issued at year end for in-transit unit returns (warranty returns) and finished goods returns (stock adjustment returns) is recorded as an offset account to accounts receivable — net. The estimated future warranty and stock adjustment returns accrual portion for which an RGA has not been issued is presented as a current liability in the Company's consolidated balance sheets at March 31, 2011 and 2010, of \$9,161,000 and \$7,454,000, respectively.

Warranty Returns

The Company allows its customers to return goods to the Company that their end-user customers have returned to them, whether the returned item is or is not defective (warranty returns). The Company accrues an estimate of its exposure to warranty returns based on a historical analysis of the level of this type of return as a percentage of total unit sales. Amounts charged to expense for these warranty returns are considered in arriving at the Company's net sales. At March 31, 2011, the warranty return accrual of \$1,520,000 was included under the customer returns RGA issued in the above table and the warranty estimate of \$2,245,000 was included in customer finished goods returns accrual in the consolidated balance sheets.

Change in the Company's warranty return accrual is as follows at March 31:

	2011	2010
Balance at beginning of period	\$ (3,445,000)	\$ (2,596,000)
Charged to expense	39,742,000	36,096,000
Amounts processed	(39,422,000)	(35,247,000)
Balance at end of period	\$ (3,765,000)	\$ (3,445,000)

Table of Contents

7. Inventory

Non-core inventory, Inventory unreturned, Long-term core inventory, and Long-term core inventory deposit is comprised of the following at March 31:

	2011	2010
Non-core inventory		
Raw materials	\$ 11,805,000	\$ 10,362,000
Work-in-process	104,000	29,000
Finished goods	19,579,000	22,919,000
	31,488,000	33,310,000
Less allowance for excess and obsolete inventory	(1,755,000)	(1,763,000)
Total	\$ 29,733,000	\$ 31,547,000
Inventory unreturned	\$ 5,031,000	\$ 3,924,000
Long-term core inventory		
Used cores held at company's facilities	\$ 22,112,000	\$ 14,491,000
Used cores expected to be returned by customers	3,467,000	3,350,000
Remanufactured cores held in finished goods	13,994,000	17,955,000
Remanufactured cores held at customers locations	41,829,000	32,878,000
	81,402,000	68,674,000
Less allowance for excess and obsolete inventory	(844,000)	(717,000)
Total	\$ 80,558,000	\$ 67,957,000
Long-term core inventory deposit	\$ 25,984,000	\$ 25,768,000

8. Plant and Equipment

Plant and equipment, at cost, are as follows at March 31:

	2011	2010
Machinery and equipment	\$ 27,356,000	\$ 26,044,000
Office equipment and fixtures	6,167,000	6,043,000
Leasehold improvements	7,332,000	7,035,000
	40,855,000	39,122,000
Less accumulated depreciation and amortization	(29,192,000)	(26,429,000)
Total	\$ 11,663,000	\$ 12,693,000

Plant and equipment located in the foreign countries where the Company has production facilities, net of accumulated depreciation, totaled \$5,790,000 and \$5,759,000 at March 31, 2011 and 2010, respectively. These assets constitute substantially all the long-lived assets of the Company located outside of the United States.

9. Capital Lease Obligations

The Company leases various types of machinery and computer equipment under agreements accounted for as capital leases and included in plant and equipment as follows at March 31:

	2011	2010
Cost	\$ 1,371,000	\$ 6,515,000
Less: accumulated amortization	(611,000)	(4,782,000)
Total	\$ 760,000	\$ 1,733,000

Future minimum lease payments at March 31, 2011 for the capital leases are as follows:

Year Ending March 31,	
2012	\$ 398,000
2013	299,000
2014	178,000
Total minimum lease payments	875,000
Less amount representing interest	(41,000)
Present value of future minimum lease payment	834,000
Less current portion	(372,000)
	\$ 462,000

On October 26, 2005, the Company entered into a capital sale-leaseback agreement with a bank. The agreement provided the Company with \$4,110,000 in equipment financing repayable in monthly installments of \$81,000 over the 60 month term of the lease agreement, with a one dollar purchase option at the end of the lease term. The financing arrangement has an effective interest rate of 6.75%. The proceeds from the agreement were used to reduce the outstanding balance in the Company's line of credit with the bank, which had been used in fiscal 2006 to fund the purchase of fixed assets.

Assets financed under the agreement had a net book value of \$1,517,000. The difference between the financing provided, which was based on the fair market value of the equipment, and the net book value of the equipment financed was accounted for as a deferred gain on the sale-leaseback agreement. The deferred gain was amortized at a monthly rate of \$43,000 over the estimated five year life of the capital lease asset, which concluded in October 2010, and was accounted for as an offset to general and administrative expenses. At March 31, 2011 and 2010, the deferred gain remaining to be amortized was \$0 and \$319,000, respectively.

10. Debt

In October 2009, the Company entered into a revolving credit and term loan agreement (the "Credit Agreement"), with its bank and one additional lender (the "Lenders"), which permits the Company to borrow up to a total of \$45,000,000 (the "Credit Facility"). The Credit Facility is comprised of (i) a revolving facility with a \$7,000,000 letter of credit sub-facility and (ii) a term loan. The Company may borrow on a revolving basis up to an amount equal to \$35,000,000 minus all outstanding letter of credit obligations minus a borrowing reserve of \$7,500,000 (the "Revolving Loan"). The borrowing reserve remains in effect only if the Company is party to a receivable discount program pursuant to which its accounts receivable owed to the Company by its largest customer are being discounted. The term loan is in the principal amount of \$10,000,000 (the "Term Loan"). The Lenders hold a security interest in substantially all of the Company's assets.

The Credit Agreement, among other things, requires the Company to maintain certain financial covenants, including tangible net worth, fixed charge coverage ratio and leverage ratio covenants. The Company was in compliance with all financial covenants under the Credit Agreement as of March 31, 2011.

The Term Loan matures in October 2014 and requires principal payments of \$500,000 on a quarterly basis. The Revolving Loan expires in October 2011 and provides the Company the option to request up to three one-year extensions.

Table of Contents

In May 2010, the Company entered into a first amendment to the Credit Agreement with its Lenders. This amendment provides, among other things, that the borrowing reserve against the Company's Revolving Loan commitment amount be increased from \$7,500,000 to \$10,000,000.

In November 2010, the Company entered into a second amendment to the Credit Agreement with its Lenders. This amendment, among other things, extended the expiration date of the Revolving Loan to October 2012.

In December 2010, the Company entered into a third amendment to the Credit Agreement with its Lenders. This amendment, among other things, eliminated the minimum LIBOR lending rate with respect to the Term Loan.

In April 2011, the Company entered into a fourth amendment to the Credit Agreement, which was effective as of March 31, 2011, with its Lenders. This amendment, among other things, (i) increased the amount the Company may borrow on a revolving basis from \$35,000,000 to \$50,000,000 and (ii) amended the definition of permitted acquisitions under the Credit Agreement.

There was no outstanding balance on the Revolving Loan at March 31, 2011 and 2010, respectively. The Company had reserved \$1,126,000 of the Revolving Loan for standby letters of credit for workers' compensation insurance and \$3,536,000 for commercial letters of credit as of March 31, 2011. As of March 31, 2011, \$45,338,000 was available under the Revolving Loan, and of this, \$10,000,000 was reserved for use in the event the Company's largest customer discontinued its current practice of having the Company's receivables discounted.

The Revolving Loan and the Term Loan bear interest at the bank's reference rate, plus an applicable margin, or a London Interbank Offered Rate ("LIBOR") rate, plus an applicable margin, as selected by the Company in accordance with the Credit Agreement. The reference rate is, as further described in the Credit Agreement, the higher of the bank's announced base rate and the Federal funds rate plus 1/2 percent. The applicable margins are determined quarterly on a prospective basis as set forth below:

Leverage Ratio	Applicable LIBOR Margin	Applicable Reference Rate Margin
Less than 1.0:1.0	250 basis points	125 basis points
Greater than or equal to 1.0:1.0, but less than 1.5:1.0	275 basis points	150 basis points
Greater than or equal to 1.5:1.0	300 basis points	175 basis points

11. Accounts Receivable Discount Programs

The Company has established receivable discount programs with certain customers and their respective banks. Under these programs, the Company may sell those customers' receivables to those banks at a discount to be agreed upon at the time the receivables are sold. These discount arrangements have allowed the Company to accelerate collection of customers' receivables aggregating \$134,867,000 and \$85,592,000 for the years ended March 31, 2011 and 2010, respectively, by a weighted average of 330 days and 334 days, respectively. On an annualized basis, the weighted average discount rate on the receivables sold to the banks during the years ended March 31, 2011 and 2010 was 3.9% and 4.5%, respectively. The amount of the discount on these receivables, \$4,768,000 and \$3,599,000 for the years ended March 31, 2011 and 2010, respectively, was recorded as interest expense.

12. Financial Risk Management and Derivatives

Purchases and expenses denominated in currencies other than the U.S. dollar, which are primarily related to the Company's production facilities overseas, expose the Company to market risk from material movements in foreign exchange rates between the U.S. dollar and the foreign currency. The Company's primary risk exposure is from

changes in the rate between the U.S. dollar and the Mexican peso related to the operation of the Company's facility in Mexico. The Company enters into forward foreign currency exchange contracts to exchange U.S. dollars for Mexican pesos in order to mitigate this risk. In addition, during the year ended March 31, 2011, the Company began entering into forward foreign currency exchange contracts to exchange U.S. dollars for Chinese yuan to mitigate the risk of exposure from material movements in exchange rates on certain purchases made from Chinese vendors. The extent to which forward foreign currency exchange contracts are used is modified periodically in response to management's estimate of market conditions and the terms and length of specific purchase requirements to fund those overseas facilities and purchases.

Table of Contents

The Company enters into forward foreign currency exchange contracts in order to reduce the impact of foreign currency fluctuations and not to engage in currency speculation. The use of derivative financial instruments allows the Company to reduce its exposure to the risk that the eventual cash outflow resulting from funding the expenses of the foreign operations and purchases will be materially affected by changes in exchange rates. The Company does not hold or issue financial instruments for trading purposes. The forward foreign currency exchange contracts are designated for forecasted expenditure requirements to fund foreign operations and purchases.

The Company had forward foreign currency exchange contracts with a U.S. dollar equivalent notional value of \$9,356,000 and \$6,159,000 at March 31, 2011 and 2010, respectively. The forward foreign currency exchange contracts entered into require the Company to exchange U.S. dollars for foreign currencies. These contracts generally expire in a year or less, at rates agreed at the inception of the contracts. The counterparty to this derivative transaction is a major financial institution with investment grade or better credit rating; however, the Company is exposed to credit risk with this institution. The credit risk is limited to the potential unrealized gains (which offset currency fluctuations adverse to the Company) in any such contract should this counterparty fail to perform as contracted. Any changes in the fair values of forward foreign currency exchange contracts are reflected in current period earnings and accounted for as an increase or offset to general and administrative expenses.

The following table shows the effect of the Company's derivative instruments on its consolidated statements of income:

Derivatives Not Designated as Hedging Instruments under Statement 133	Location of (Gain) Loss Recognized in Income on Derivatives	Amount of (Gain) Loss Recognized in Income on Derivatives		
		Years Ended March 31		
		2011	2010	2009
Forward foreign currency exchange contracts	General and administrative expenses	\$ 162,000	\$ (1,565,000)	\$ 1,194,000

The fair value of the forward foreign currency exchange contracts of \$355,000 and \$517,000 is included in prepaid expenses and other current assets in the consolidated balance sheets at March 31, 2011 and 2010, respectively.

13. Fair Value Measurements

The Company adopted the guidance related to fair value measurements on April 1, 2008. The Company defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The Company uses a three-tier valuation hierarchy based upon observable and unobservable inputs:

- Level 1 — Valuation is based upon quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 — Valuation is based upon quoted prices for similar assets and liabilities in active markets, or other inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.
- Level 3 — Valuation is based upon unobservable inputs that are significant to the fair value measurement.

The fair value hierarchy requires the use of observable market data when available. In instances in which the inputs used to measure fair value fall into different levels of the fair value hierarchy, the fair value measurement has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The

Company's assessment of the significance of a particular item to the fair value measurement in its entirety requires judgment, including the consideration of inputs specific to the asset or liability. The following table sets forth by level within the fair value hierarchy, the Company's financial assets and liabilities that were accounted for at fair value on a recurring basis at March 31, 2011 and 2010, according to the valuation techniques we used to determine their fair values.

F-21

Table of Contents

	Fair Value	March 31, 2011 Fair Value Measurements Using Inputs Considered as			Fair Value	March 31, 2010 Fair Value Measurements Using Inputs Considered as		
		Level 1	Level 2	Level 3		Level 1	Level 2	Level 3
Assets								
Short-term investments								
Cash	-	-	-	-	\$207,000	\$207,000	-	-
Mutual funds	\$304,000	\$304,000	-	-	244,000	244,000	-	-
Prepaid expenses and other current assets								
Forward foreign currency exchange contracts	355,000	-	\$355,000	-	517,000	-	\$517,000	-
Liabilities								
Other current liabilities								
Deferred compensation	304,000	304,000	-	-	451,000	451,000	-	-

The Company's short-term investments, which fund its deferred compensation liabilities, consist of investments in mutual funds. These investments are classified as Level 1 as the shares of these mutual funds trade with sufficient frequency and volume to enable the Company to obtain pricing information on an ongoing basis.

The forward foreign currency exchange contracts are primarily measured based on the foreign currency spot and forward rates quoted by the banks or foreign currency dealers. During the fiscal years ended March 31, 2011 and 2010, a loss of \$162,000 and a gain of \$1,565,000, respectively, were recorded in general and administrative expenses due to the change in the value of the forward foreign currency exchange contracts subsequent to entering into the contracts.

Disclosures for non-financial assets and non-financial liabilities that are measured at fair value, but recognized and disclosed at fair value on a nonrecurring basis, were required prospectively beginning April 1, 2009. During the fiscal years ended March 31, 2011 and 2010, the Company had no significant measurements of assets or liabilities at fair value on a nonrecurring basis subsequent to their initial recognition.

The carrying amounts of cash, short-term investments, accounts receivable, accounts payable and accrued liabilities approximate their fair value due to the short-term nature of these instruments. The carrying amount of the long-term note receivable approximates its fair value based on current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturity. The carrying amounts of the Revolving Loan, Term Loan and other long-term liabilities approximate their fair value based on current rates for instruments with similar characteristics.

14. Commitments and Contingencies

Operating Lease Commitments

The Company leases office and warehouse facilities in California, Tennessee, Malaysia, Singapore and Mexico under operating leases expiring through 2017. The Company also has short term contracts of one year or less covering its third party warehouses that provide for contingent payments based on the level of sales that are processed through the third party warehouse.

F-22

Table of Contents

At March 31, 2011, the remaining future minimum rental payments under the above operating leases are as follows:

Year Ending March 31,	
2012	\$ 2,788,000
2013	1,710,000
2014	1,664,000
2015	1,639,000
2016	1,018,000
Thereafter	501,000
Total minimum lease payments	\$ 9,320,000

During fiscal years 2011, 2010 and 2009, the Company incurred total operating lease expenses of \$2,889,000, \$2,783,000 and \$2,792,000, respectively.

Commitments to Provide Marketing Allowances under Long-Term Customer Contracts

The Company has or is renegotiating long-term agreements with many of its major customers. Under these agreements, which typically have initial terms of at least four years, the Company is designated as the exclusive or primary supplier for specified categories of remanufactured alternators and starters. In consideration for the Company's designation as a customer's exclusive or primary supplier, the Company typically provides the customer with a package of marketing incentives. These incentives differ from contract to contract and can include (i) the issuance of a specified amount of credits against receivables in accordance with a schedule set forth in the relevant contract, (ii) support for a particular customer's research or marketing efforts provided on a scheduled basis, (iii) discounts granted in connection with each individual shipment of product, and (iv) other marketing, research, store expansion or product development support. These contracts typically require that the Company meet ongoing standards related to fulfillment, price, and quality. The Company's contracts with major customers expire at various dates through March 2019.

The Company typically grants its customers marketing allowances in connection with these customers' purchase of goods. The Company records the cost of all marketing allowances provided to its customers. Such allowances include sales incentives and concessions and typically consist of: (i) allowances which may only be applied against future purchases and are recorded as a reduction to revenues in accordance with a schedule set forth in the long-term contract, (ii) allowances related to a single exchange of product that are recorded as a reduction of revenues at the time the related revenues are recorded or when such incentives are offered, and (iii) allowances that are made in connection with the purchase of inventory from a customer.

Table of Contents

The following table presents the breakout of allowances discussed above, recorded as a reduction to revenues in the years ended March 31:

	2011	2010	2009
Allowances incurred under long-term customer contracts	\$ 13,988,000	\$ 13,278,000	\$ 9,002,000
Allowances related to a single exchange of product	17,552,000	14,162,000	11,725,000
Allowances related to core inventory purchase obligations	1,455,000	486,000	2,681,000
Total customer allowances recorded as a reduction of revenues	\$ 32,995,000	\$ 27,926,000	\$ 23,408,000

The following table presents the commitments to incur allowances which will be recognized as a charge against revenue, and customer Remanufactured Core purchase obligations which will be recognized in accordance with the terms of the relevant long-term customer contracts:

Year Ending March 31,	
2012	\$ 11,799,000
2013	5,032,000
2014	3,825,000
2015	3,152,000
2016	3,105,000
Thereafter	6,460,000
Total marketing allowances	\$ 33,373,000

Workers Compensation Insurance

Effective January 1, 2007 through the current fiscal year, the Company's workers compensation insurance policy has been written on a guaranteed cost basis (first dollar payment of claims with no deductibles). For each of the five years prior to January 1, 2007, the Company purchased workers compensation insurance on a large deductible plan. The Company was, and still is, liable for the first \$250,000 of each claim until all claims are settled (essentially self-insured). The Company records an estimate of its liability for the self-insured portion of its workers' compensation policy by including an estimate of the total claims incurred and reported as well as an estimate of incurred, but not reported, claims by applying the Company's historical claims development factor to its estimate of incurred and reported claims.

15. Major Customers and Suppliers

The Company's four largest customers accounted for the following total percentage of net sales and accounts receivable—trade:

Sales	Years Ended March 31,					
	2011		2010		2009	
Customer A	48	%	44	%	49	%
Customer B (1)	18	%	24	%	23	%
Customer C	8	%	8	%	10	%
Customer D	7	%	9	%	10	%

Table of Contents

Accounts receivable - trade	2011		2010	
Customer A	26	%	24	%
Customer B	13	%	15	%
Customer C	17	%	31	%
Customer D	6	%	4	%

(1) One of the Company's largest customers was acquired by another of the Company's largest customers. Therefore, the percentage of net sales for the year ended March 31, 2009 includes the combined net sales of these customers.

The Company's largest supplier accounted for the following total percentage of raw materials purchases:

Significant supplier purchases	Years Ended March 31,					
	2011		2010		2009	
Supplier A	13	%	29	%	25	%

16. Income Taxes

The income tax expense (benefit) for the years ended March 31 is as follows:

	Years Ended March 31,		
	2011	2010	2009
Current tax expense			
Federal	\$4,797,000	\$4,203,000	\$2,831,000
State	718,000	1,121,000	1,260,000
Foreign	267,000	161,000	561,000
Total current tax expense	5,782,000	5,485,000	4,652,000
Deferred tax expense (benefit)			
Federal	1,206,000	(117,000)	(1,149,000)
State	821,000	109,000	(914,000)
Foreign	-	(195,000)	-
Total deferred tax expense (benefit)	2,027,000	(203,000)	(2,063,000)
Total income tax expense	\$7,809,000	\$5,282,000	\$2,589,000

Table of Contents

Deferred income taxes consist of the following at March 31:

	2011	2010
Assets		
Accounts receivable valuation	\$3,185,000	\$2,719,000
Estimate for returns	-	1,878,000
Allowance for customer incentives	720,000	642,000
Inventory obsolescence reserve	993,000	989,000
Stock options	1,251,000	1,282,000
Intangible amortization	504,000	450,000
Deferred core revenue	1,268,000	798,000
Claims payable	788,000	618,000
Acquisition cost	336,000	-
Other	1,698,000	2,114,000
Total deferred tax assets	\$10,743,000	\$11,490,000
Liabilities		
Prepaid expenses	\$(591,000)	\$(586,000)
Accelerated depreciation	(733,000)	(1,135,000)
Estimate for returns	(1,838,000)	-
Other	(713,000)	(427,000)
Total deferred tax liabilities	\$(3,875,000)	\$(2,148,000)
Net deferred tax assets	\$6,868,000	\$9,342,000
Net current deferred income tax assets	\$5,522,000	\$8,391,000
Net long-term deferred income tax assets	1,346,000	951,000
Total	\$6,868,000	\$9,342,000

At March 31, 2011, the Company had no federal net operating loss carryforwards, and approximately \$2,100,000 of state net operating loss carryforwards. The utilization of these net operating loss carryforwards may be limited due to the suspension of the usage of the net operating losses in certain states. The state net operating loss carryforwards expire between 2018 and 2022.

Realization of the deferred tax assets is dependent upon the Company's ability to generate sufficient taxable income. Management believes that it is more likely than not that future taxable income will be sufficient to realize the recorded deferred tax assets.

For the year ended March 31, 2011, 2010, and 2009, the primary components of the Company's income tax provision were (i) the current liability due to federal, state and foreign income taxes and (ii) the change in the amount of the net deferred income tax asset due to a change in the deferred tax rate.

Table of Contents

The difference between the income tax expense at the federal statutory rate and the Company's effective tax rate is as follows:

	Years Ended March 31,					
	2011		2010		2009	
Statutory federal income tax rate	34	%	34	%	34	%
State income tax rate, net of federal benefit	3	%	5	%	4	%
Change in deferred tax rate	2	%	-	%	-	%
Foreign income taxed at different rates	(1) %	(5) %	(1) %
Other income tax	1	%	1	%	3	%
	39	%	35	%	40	%

During the current fiscal year, the Company recognized an increase of \$52,000 in the liability for unrecognized tax benefits in the consolidated statements of income.

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction and various state and foreign jurisdictions with varying statutes of limitations. The Internal Revenue Service ("IRS") had an ongoing tax examination of the federal tax returns for the fiscal year ended March 31, 2007. In November 2009, the IRS expanded its ongoing tax examination of the federal tax returns to include the fiscal year ended March 31, 2008. In May 2010, the IRS concluded its examination of the Company's federal income tax returns for the fiscal 2007 and 2008 tax years. The IRS required no changes to the Company's tax returns for those fiscal years as filed.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows at March 31:

	2011	2010	2009
Balance at beginning of period	\$711,000	\$925,000	\$663,000
Additions based on tax positions related to the current year	128,000	27,000	287,000
Additions for tax positions of prior year	298,000	-	10,000
Reductions for tax positions of prior year	(561,000)	(241,000)	(35,000)
Settlements	-	-	-
Balance at end of period	\$576,000	\$711,000	\$925,000

The total unrecognized tax benefits that, if recognized, would affect the Company's effective tax rate were \$390,000 as of March 31, 2011. The Company believes no amounts will significantly increase or decrease within the next 12 months.

Included in the balance at March 31, 2011, are \$55,000 of tax positions for which the ultimate deductibility is highly certain, but for which there is uncertainty about the timing of such deductibility. Because of the impact of deferred tax accounting, other than interest and penalties, the disallowance of the shorter deductibility period would not affect the annual effective tax rate, but would accelerate the payment of cash to the taxing authority to an earlier period.

The Company recognizes interest and penalties accrued related to unrecognized tax benefits as part of income tax expense, which amounted to \$(4,000), \$6,000 and \$7,000 during the years ended March 31, 2011, 2010 and 2009, respectively.

17. Defined Contribution Plan

The Company has a 401(k) plan covering all employees who are 21 years of age with at least six months of service. The plan permits eligible employees to make contributions up to certain limitations, with the Company matching 25% of each participating employee's contribution up to the first 6% of employee compensation. Employees are immediately vested in their voluntary employee contributions and vest in the Company's matching contributions ratably over five years. The Company's matching contribution to the 401(k) plan was \$92,000, \$88,000 and \$93,000 for the fiscal years ended March 31, 2011, 2010 and 2009, respectively.

F-27

Table of Contents

18. Stock Options

In January 1994, the Company adopted the 1994 Stock Option Plan (the “1994 Plan”), under which it was authorized to issue non-qualified stock options and incentive stock options to key employees, directors and consultants. After a number of shareholder-approved increases to this plan, at March 31, 2002 the aggregate number of stock options approved was 960,000 shares of the Company’s common stock. The term and vesting period of options granted is determined by a committee of the Board of Directors with a term not to exceed ten years. At the Company’s Annual Meeting of Shareholders held on November 8, 2002, the 1994 Plan was amended to increase the authorized number of shares issued to 1,155,000. As of March 31, 2011 and 2010, options to purchase 364,100 and 406,350 shares of common stock, respectively, were outstanding under the 1994 Plan and no options were available for grant.

At the Company’s Annual Meeting of Shareholders held on December 17, 2003, the shareholders approved the Company’s 2003 Long-Term Incentive Plan (“Incentive Plan”) which had been adopted by the Company’s Board of Directors on October 31, 2003. Under the Incentive Plan, a total of 1,200,000 shares of the Company’s common stock were reserved for grants of Incentive Awards and all of the Company’s employees are eligible to participate. The 2003 Incentive Plan will terminate on October 31, 2013, unless terminated earlier by the Company’s Board of Directors. As of March 31, 2011 and 2010, options to purchase 1,038,984 and 1,051,984 shares of common stock, respectively, were outstanding under the Incentive Plan and options to purchase 112,600 and 109,600 shares of common stock, respectively, were available for grant. In January 2011, this Incentive Plan was replaced and the Company will not make any further grants of awards under this plan.

In November 2004, the Company’s shareholders approved the 2004 Non-Employee Director Stock Option Plan (the “2004 Plan”) which provides for the granting of options to non-employee directors. At the Company’s Annual Meeting of Shareholders held on February 25, 2010, the Company’s shareholders approved an amendment to the 2004 Plan that increased the number of shares of common stock reserved for grant under the 2004 Plan from 175,000 to 275,000. As of March 31, 2011 and 2010, options to purchase 188,000 and 170,000 shares of common stock, respectively, were issued, and 87,000 and 105,000 shares of common stock were available for grant.

In January 2011, the Company’s shareholders approved the 2010 Incentive Award Plan (the “2010 Plan”) which will replace the 2003 Long-term Incentive Plan. Under the 2010 Plan, a total of 750,000 shares of the Company’s common stock were reserved for grants of incentive awards and all of the Company’s employees are eligible to participate. As of March 31, 2011, no awards were issued under the 2010 Plan.

The shares of common stock issued upon exercise of a previously granted stock option are considered new issuances from shares reserved for issuance upon adoption of the various plans. The Company requires that the option holders provide a written notice of exercise to the stock plan administrator and payment for the shares prior to issuance of the shares.

A summary of stock option transactions follows:

	Number of Shares	Weighted Average Exercise Price
Outstanding at March 31, 2008	1,661,459	\$ 8.47
Granted	84,000	\$ 5.83
Exercised	-	\$ -
Cancelled	(14,375)	\$ 12.13
Outstanding at March 31, 2009	1,731,084	\$ 8.32
Granted	12,000	\$ 4.76
Exercised	(64,000)	\$ 2.40
Cancelled	(50,750)	\$ 10.69
Outstanding at March 31, 2010	1,628,334	\$ 8.45
Granted	18,000	\$ 9.61
Exercised	(52,250)	\$ 3.83
Cancelled	(3,000)	\$ 11.00
Outstanding at March 31, 2011	1,591,084	\$ 8.61

Based on the market value of the Company's common stock at March 31, 2011, 2010 and 2009, the pre-tax intrinsic value of options exercised was \$530,000, \$262,000 and \$0, respectively.

The followings table summarizes information about the options outstanding at March 31, 2011:

Options Outstanding					Options Exercisable		
Range of Exercise price	Shares	Weighted Average Exercise Price	Weighted Average Remaining Life In Years	Aggregate Intrinsic Value	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value
\$1.800 to \$2.160	102,250	\$2.15	1.92	\$1,209,618	102,250	\$2.15	\$1,209,618
\$2.700 to \$3.600	166,850	3.09	0.78	1,816,997	166,850	3.09	1,816,997
\$4.170 to \$6.345	175,000	5.86	4.90	1,421,000	168,000	5.88	1,360,800
\$6.620 to \$9.270	371,900	8.73	3.61	1,952,475	369,900	8.74	1,938,276
\$9.650 to \$11.813	362,084	10.19	4.8	1,372,298	362,084	10.19	1,372,298
\$11.900 to \$13.800	404,000	12.05	5.44	779,720	400,000	12.05	772,000
\$14.500 to \$14.610	9,000	\$14.54	7.05	-	7,000	\$14.52	-
	1,591,084			\$8,552,108	1,576,084		\$8,469,989

The aggregate intrinsic values in the above table represent the pre-tax value of all in-the-money options if all such options had been exercised on March 31, 2011 based on the Company's closing stock price of \$13.98 as of that date.

Options to purchase 1,576,084, 1,587,998 and 1,637,082 shares of common stock were exercisable as of March 31, 2011, 2010 and 2009, respectively. The weighted average exercise price of options exercisable was \$8.61, \$8.50 and \$8.31 as of March 31, 2011, 2010 and 2009, respectively.

Table of Contents

A summary of changes in the status of non-vested stock options during the fiscal year ended March 31, 2011 is presented below.

	Number of Shares	Weighted Average Grant Date Fair Value
Non-vested at March 31, 2010	40,336	\$ 1.95
Granted	18,000	\$ 3.82
Vested	(43,336)	\$ 2.22
Non-vested at March 31, 2011	15,000	\$ 3.41

Effective April 1, 2006, the Company began using the modified prospective application method of transition for all its stock-based compensation plans. The Company did not modify the terms of any previously granted options in anticipation of the adoption of this guidance. At March 31, 2011, there was \$39,000 of total unrecognized compensation expense from stock-based compensation granted under the plans, which is related to non-vested shares. The compensation expense is expected to be recognized over a weighted average vesting period of 1.1 years.

19. Shareholders' Equity Transactions

Equity Transaction

In May 2007, the Company completed the sale of 3,641,909 shares of its common stock at a price of \$11.00 per share and warrants to purchase up to 546,283 shares of its common stock at an exercise price of \$15.00 per share. This sale was made through a private placement to accredited investors. The warrants are callable by the Company if, among other things, the volume weighted average trading price of the Company's common stock as quoted by Bloomberg L.P. is greater than \$22.50 for 10 consecutive trading days. The fair value of the warrants at the date of grant was estimated to be approximately \$4.44 per warrant using the Black-Scholes pricing model. The following assumptions were used to calculate the fair value of the warrants: dividend yield of 0%; expected volatility of 40.01%; risk-free interest rate of 4.5766%; and an expected life of five years.

Share Repurchase Program

In March 2010, the Company's Board of Directors authorized a share repurchase program of up to \$5,000,000 of the Company's outstanding common stock from time to time in the open market and in private transactions at prices deemed appropriate by management. There is no expiration date governing the period over which the Company can repurchase shares under this program. During July 2010, the Company repurchased 14,400 shares at a total cost of approximately \$89,000.

20. Litigation

The Company is subject to various lawsuits and claims in the normal course of business. Management does not believe that the outcome of these matters will have a material adverse effect on its financial position or future results of operations.

21. Related Party Transactions

The Company has arrangements or entered into agreements with three members of its Board of Directors, Messrs. Mel Marks, Philip Gay and Selwyn Joffe.

In August 2000, the Company's Board of Directors agreed to engage Mr. Mel Marks to provide consulting services to the Company. Mr. Marks is currently paid an annual consulting fee of \$350,000 per year. Mr. Marks was paid \$350,000 during each of the years ended March 31, 2011, 2010, and 2009. The Company can terminate this arrangement at any time.

The Company agreed to pay Mr. Gay \$90,000 per year for serving on the Company's Board of Directors, and for being Chairman of the Company's Audit and Ethics Committees.

F-30

Table of Contents

On February 14, 2003, Mr. Joffe accepted his current position as President and Chief Executive Officer in addition to serving as Chairman of the Board of Directors. Mr. Joffe's agreement, which was originally scheduled to expire on March 31, 2006, called for an annual base salary of \$500,000, the continuation of his prior agreement relative to payment of 1% of the value of any transactions which close by March 31, 2006 and other compensation generally provided to the Company's other executive staff members.

On April 22, 2005, the Company entered into an amendment to its employment agreement with Mr. Joffe. Under the amendment, Mr. Joffe's term of employment was extended from March 31, 2006 to March 31, 2008. His base salary, bonus arrangements, 1% transaction fee right and fringe benefits remained unchanged. This amendment was unanimously approved by the Company's Board of Directors.

Before the amendment, Mr. Joffe had the right to terminate his employment upon a change of control and receive his salary and benefits through March 31, 2006. Under the amendment, upon a change of control (which has been redefined pursuant to the amendment), Mr. Joffe will be entitled to a sale bonus equal to the sum of (i) two times his base salary plus (ii) two times his average bonus earned for the two years immediately prior to the change of control. The amendment also grants Mr. Joffe the right to terminate his employment with effect on or after the one year anniversary of a change of control and to then receive salary and benefits for a one-year period following such termination plus a bonus equal to the average bonus Mr. Joffe earned during the two years immediately prior to his voluntary termination.

If Mr. Joffe is terminated without cause or resigns for good reason (as defined in the amendment), the Company must pay Mr. Joffe (i) his base salary, (ii) his average bonus earned for the two years immediately prior to termination (or, if such termination occurs within the first three months of the Company's fiscal year, for the second and third years preceding the year in which such termination occurs), and (iii) all other benefits payable to Mr. Joffe pursuant to the employment agreement, as amended, through the later of two years after the date of termination of employment or March 31, 2008. Under the amendment, Mr. Joffe is also entitled to an additional "gross-up" payment to offset the excise taxes (and related income taxes on the "gross-up" payment) that he may be obligated to pay with respect to the first \$3,000,000 of "parachute payments" (as defined in Section 280G of the Code) to be made to him upon a change of control. The amendment has redefined the term "for cause" to apply only to misconduct in connection with Mr. Joffe's performance of his duties. Pursuant to the amendment, any options that have been or may be granted to Mr. Joffe will fully vest upon a change of control and be exercisable for a two-year period following the change of control, and Mr. Joffe agreed to waive the right he previously had under the employment agreement to require the Company to purchase his option shares and any underlying options if his employment were terminated for any reason. The amendment further provides that Mr. Joffe's agreement not to compete with the Company terminates at the end of his employment term.

In December 2006, the Company's employment agreement with Mr. Joffe was amended to extend the term of this agreement from March 31, 2008 to August 30, 2009. This amendment was unanimously approved by the Company's Board of Directors.

On March 27, 2008, the Company's employment agreement with Mr. Joffe was further amended to extend the term of this agreement from August 30, 2009 to August 31, 2012. All other terms and conditions of Mr. Joffe's employment remained unchanged. This amendment was unanimously approved by the Company's Board of Directors.

On December 31, 2008, the Company entered into an amended and restated employment agreement with Mr. Joffe. Mr. Joffe's previous employment agreement was amended and restated primarily to add language that satisfies the requirements of the final treasury regulations issued pursuant to Section 409A of the Code with respect to certain of the payments that may be provided to Mr. Joffe pursuant to the employment agreement. The restated agreement does not increase the amounts payable to Mr. Joffe as salary, bonus, severance or other compensation, nor does it extend

the term of employment, but it does clarify that if the Company terminates the restated agreement without cause, either directly or constructively, Mr. Joffe will be entitled to receive severance payments until the later of (i) that date which is two years after the termination date or (ii) the date upon which the restated agreement would otherwise have expired. All other substantive terms and conditions of Mr. Joffe's employment remain unchanged. The restated agreement was unanimously approved by the Company's Board of Directors.

F-31

Table of Contents

22. Subsequent Event

During fiscal 2011, the Company made secured loans in the approximate aggregate amount of \$4,863,000 to Fenco, a privately-owned Toronto-based manufacturer, remanufacturer and distributor of new and remanufactured aftermarket auto parts. In connection with this loan, the Company had an option to acquire a substantial ownership interest in Fenco. On May 6, 2011, the Company exercised this option and entered into and consummated the transactions pursuant to a purchase agreement (the “Purchase Agreement”) with FAPL Holdings Inc. (“FAPL”) and certain other individuals. In connection with this acquisition, the Company advanced an additional \$10,000,000 to Fenco. Pursuant to the Purchase Agreement, the Company purchased (i) all of the outstanding equity of Fenco, a corporation incorporated under the laws of Ontario, (ii) all of the outstanding equity of Introcan, Inc., a Delaware corporation (“Introcan”), and (iii) 1% of the outstanding equity of Fapco S.A. de C.V., a Mexican variable capital company (“Fapco”). Since Fenco owned 99% of Fapco, the Company now owns 100% of Fapco.

In consideration for the acquisition, the Company issued FAPL 360,000 shares of our common stock (the “MPA Shares”). For a period of 18 months following the closing of the acquisition, the MPA Shares shall be (i) subject to transfer restrictions pursuant to a Hold Agreement between the Company and FAPL, dated May 6, 2011 (the “Hold Agreement”), and (ii) held in escrow in order to secure certain indemnification obligations under the Purchase Agreement pursuant to an Escrow Agreement by and among FAPL, Stikeman Elliott LLP, certain other individuals, and the Company, dated May 6, 2011 (the “Escrow Agreement”).

In connection with the acquisition and the secured loans made to Fenco, the Company has incurred \$879,000 expenses related to legal, accounting, and valuation services during fiscal 2011, which are reflected in operating expenses. Additional fees in connection with the closing of the transaction will be recorded as expenses in the first quarter of fiscal 2012 as incurred.

In connection with the acquisition, the Company’s now wholly-owned subsidiaries, Fenco and Introcan, as borrowers (the “Fenco Borrowers”), entered into an amended and restated credit agreement, dated May 6, 2011 (the “Fenco Credit Agreement”) with Manufacturers and Traders Trust Company as lead arranger, M&T Bank as lender and administrative agent and the other lenders from time to time party thereto (the “Lenders”). Pursuant to the Fenco Credit Agreement, the Lenders have made available to the Fenco Borrowers a revolving credit facility in the maximum principal amount of \$50,000,000 (the “Revolving Facility”) and a term loan in the principal amount of \$10,000,000 (the “Term Loan”). The availability of the Revolving Facility is subject to a borrowing base calculation consisting of eligible accounts receivable and eligible inventory.

The Fenco Borrowers may receive advances under the Revolving Facility by any one or more of the following options: (i) swingline advances in Canadian or US dollars; (ii) Canadian dollar prime-based loans; (iii) US dollar base rate loans; (iv) LIBOR loans; or (v) letters of credits.

The Term Loan bears interest at the LIBO rate plus an applicable margin. Outstanding advances under the Revolving Facility bear interest as follows:

- (i) in respect of swingline advances in Canadian dollars and Canadian dollar prime-based loans, at the reference rate announced by the Royal Bank of Canada plus an applicable margin;
- (ii) in respect of swingline advances in US dollars and US dollar base rate loans, at a base rate (which shall be equal to the highest of (x) M&T Bank’s prime rate, (y) the Federal Funds Rate plus ½ of 1%, or (z) the one month LIBO rate) plus an applicable margin;
- (iii) in respect of LIBOR loans, at the LIBO rate plus an applicable margin.

The Fenco Credit Agreement, among other things, requires the Fenco Borrowers to maintain certain financial covenants.

The Revolving Facility and the Term Loan mature on October 6, 2012, but may be accelerated upon the occurrence of an insolvency event or event of default under the Fenco Credit Agreement.

F-32

In connection with the Fenco Credit Agreement, the Company loaned Fenco an additional \$10,000,000 bringing the aggregate amount of indebtedness owed by Fenco to the Company to \$14,863,000.

The preliminary allocation of purchase price is incomplete at this time. As a result, we are unable to allocate fair value to the acquired business at this time.

23. Unaudited Quarterly Financial Data

The following table summarizes selected quarterly financial data for the fiscal year ended March 31, 2011:

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Net sales	\$36,234,000	\$40,977,000	\$41,288,000	\$42,786,000
Cost of goods sold	24,689,000	28,295,000	28,115,000	28,804,000
Gross profit	11,545,000	12,682,000	13,173,000	13,982,000
Operating expenses:				
General and administrative	4,024,000	3,571,000	4,384,000	5,054,000
Sales and marketing	1,740,000	1,201,000	1,798,000	1,798,000
Research and development	366,000	396,000	391,000	396,000
Acquisition costs	-	-	-	879,000
Total operating expenses	6,130,000	5,168,000	6,573,000	8,127,000
Operating income	5,415,000	7,514,000	6,600,000	5,855,000
Other expense (income):				
Interest expense	1,602,000	1,724,000	1,070,000	1,199,000
Interest income	-	(23,000)	(73,000)	(144,000)
Income before income tax expense	3,813,000	5,813,000	5,603,000	4,800,000
Income tax expense	1,293,000	2,312,000	1,842,000	2,362,000
Net income	\$2,520,000	\$3,501,000	\$3,761,000	\$2,438,000
Basic net income per share	\$0.21	\$0.29	\$0.31	\$0.20
Diluted net income per share	\$0.21	\$0.29	\$0.30	\$0.19

Table of Contents

The following summarizes selected quarterly financial data for the fiscal year ended March 31, 2010:

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Net sales	\$32,690,000	\$39,437,000	\$36,482,000	\$38,616,000
Cost of goods sold	25,519,000	28,621,000	25,605,000	26,153,000
Gross profit	7,171,000	10,816,000	10,877,000	12,463,000
Operating expenses:				
General and administrative	2,512,000	3,462,000	3,801,000	5,614,000
Sales and marketing	1,272,000	1,535,000	1,548,000	1,664,000
Research and development	334,000	334,000	355,000	398,000
Acquisition costs	-	191,000	-	-
Total operating expenses	4,118,000	5,522,000	5,704,000	7,676,000
Operating income	3,053,000	5,294,000	5,173,000	4,787,000
Other expense (income):				
Gain on acquisition	-	(1,331,000)	-	-
Interest expense	996,000	974,000	1,776,000	964,000
Income before income tax expense	2,057,000	5,651,000	3,397,000	3,823,000
Income tax expense	862,000	2,216,000	1,252,000	952,000
Net income	\$1,195,000	\$3,435,000	\$2,145,000	\$2,871,000
Basic net income per share	\$0.10	\$0.29	\$0.18	\$0.24
Diluted net income per share	\$0.10	\$0.28	\$0.18	\$0.24

Quarterly and year-to-date computations of per share amounts are made independently. Therefore, the sum of per share amounts for the quarters may not agree with per share amounts for the year shown elsewhere in the Annual Report on Form 10-K.

Table of Contents

Schedule II — Valuation and Qualifying Accounts

Accounts Receivable — Allowance for doubtful accounts

Years Ended March 31,	Description	Balance at beginning of period	Charge to (recovery of) bad debts expense	Amounts written off	Balance at end of period
