 May 21, 2008

Dear Shareholders and Investors:

IMA has organized a conference call for THURSDAY, MAY 22 AT 10:00 A.M. (PACIFIC TIME; SEE CALL-IN DETAILS AT THE END OF THIS LETTER) giving you the opportunity to listen to a presentation on the Hushamu project followed by a question and answer session. As a preamble to the conference call, below is a brief summary of the Hushamu asset with a comparative table comparing Hushamu to high profile and economic projects located in British Columbia.

HUSHAMU ASSET:

230.9 MILLION TONNES OF MEASURED AND INDICATED RESOURCE CONTAINING:

2.08 MILLION OUNCES OF GOLD
 1.39 BILLION POUNDS OF COPPER
 UNDEFINED MOLYBDENUM, RHENIUM, AND SILVER CREDITS

AND

53 MILLION TONNES OF INFERRED RESOURCE

0.6 MILLION OUNCES OF GOLD
 0.33 BILLION POUNDS OF COPPER
 UNDEFINED MOLYBDENUM, RHENIUM, AND SILVER CREDITS

- |X| IMA HAS AN OPTION TO EARN UP TO 70% FOR A WORK INVESTMENT OF \$19 MILLION OVER 4 YEARS, OF WHICH ONLY 10% IS COMMITTED IN YEAR 1.
- |X| IMA BELIEVES THE EXPLORATION POTENTIAL IS EXCELLENT

Table 1 - Hushamu asset compared to comparable projects in BC:

PROPERTY	TONNES	COPPER EQUIVALENT GRADE*	COMMENTS
HUSHAMU	230.9 MILLION MEASURED AND INDICATED RESOURCE	0.62%	STRONG EXPLORATION UPSIDE
HUSHAMU	53 MILLION INFERRED RESOURCE	0.65%	STRONG EXPLORATION UPSIDE

Edgar Filing: IMA EXPLORATION INC - Form 6-K

Kemess South	51.8 million Proven Reserve	0.42%	Producing Strong 2007 profits
Mt Milligan	334 million Proven and Probable Reserve	0.45%	Management made go forward production decision May 2008
Copper Mountain	227.5 million Measured and Indicated Resource	0.37%	Beginning Feasibility

* pricing used to calculate copper equiv is based on Canaccord-Adams long term estimate: \$1.75 Cu/lb, \$30 Mo/lb, \$700 Au/oz, \$12.5 Ag/oz. Metallurgical recoveries and net smelter returns are assumed to be 100%

-2-

The preceding Table 1 comparisons indicate that Hushamu has similar or superior size and grade when compared to the above projects which are near to or are producing mines in British Columbia.

There are 20 plus new drill targets existing within Hushamu. A very compelling gold target called NW Expo intersected 204 metres of 0.74 g/t gold and 182 metres of 0.58 g/t gold in a separate drillhole during the 2007 drilling program completed by Western Copper. Surface outcrops identify similar alteration in a zone approximately 200 metres wide by 1500 metres long. This is a very significant target adding greatly to the project upside potential especially when combined with other untested targets. The NW Expo zone will be a focus of the 2008 drilling program. Our technical team has high expectations for the exploration potential of the Hushamu project.

FOUR YEAR OUTLOOK:

Gold and moly will potentially be large contributors to the project's value during the next four years of the 70% earn in option with Western Copper. IMA's exploration technical team (as operator) led by Dr. Greg Myers will advance Hushamu toward feasibility study executing infill drilling and testing in excess of 20 existing known targets.

Shareholders should be looking forward to an exciting exploration campaign thus creating an excellent potential investment. The merger and acquisition team will continue to search for additional projects of value in North and South America.

We thank you for the continued support I look forward to you joining us for the conference call.

Sincerely,

/s/ Joseph Grosso

Mr. Joseph Grosso, President & CEO

IMPORTANT NOTICE RE CONFERENCE CALL: IMA'S Management and Technical Team will be hosting a conference call for shareholders and analysts on Thursday, May 22, 2008 at 10:00 a.m. Pacific Time, 1 pm Eastern Time, featuring a technical
