CALCULATION OF REGISTRATION FEE

Title of Each Class of Securities to be Registered	Amount to Be Registered (1)	Proposed Maximum Offering Price Per Security (2)	Proposed Maximum Aggregate Offering Price	Amount of Registration Fee
Shares of common stock, \$0.001 par value	1,642,200	\$ 1.25	\$ 2,052,750	80.67
Class A Warrants	1,000,000			
Shares of common stock, \$0.001 par value, underlying warrants (3)	1,000,000	\$ 1.25	\$ 1,250,000	49.15
Class B Warrants	1,000,000			
Shares of common stock, \$0.001 par value, underlying warrants (3)	1,000,000	\$ 1.25	\$ 1,250,000	49.15
Units	100			
Total	3,642,200	\$ 1.25	\$ 4,552,750	178.92

(1) The registration fee for the shares of the selling security holders is based upon a value of \$1.25. All shares of common stock registered pursuant to this registration statement are to be offered by the selling stockholders. In the event of a stock split, stock dividend or similar transaction involving our common stock, in order to prevent dilution, the number of shares registered shall be automatically increased to cover the additional shares in accordance with Rule 416(a)

(2) Estimated solely for the purpose of calculating the amount of the registration fee pursuant to Rule 457(c) promulgated under the Securities Act of 1933, as amended. The selling security holders are offering 3,642,200 of the shares, which we are registering. These shares will be sold at \$1.25 unless and until the shares are traded and thereafter at prevailing market prices. If the selling security holders sell to more than 25 persons, the Company will undertake efforts to have markets established for the trading of the securities. If such a market begins before all securities offered hereby are sold, then the remaining securities will be sold at market prices.

(3) Shares of common stock issuable upon exercise of warrants held by the selling stockholders.

We hereby amend this registration statement on such date or dates as may be necessary to delay its effective date until we shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until this Registration Statement shall become effective on such date as the Commission, acting pursuant to Section 8(a) may determine.

The information contained in this prospectus is not complete and may be changed. Our selling stockholders may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and neither this prospectus nor the selling stockholders is soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

PRELIMINARY PROSPECTUS, SUBJECT TO COMPLETION, DATED MAY 22, 2008

**REVOLUTIONARY CONCEPTS, INC.
3,642,200 Shares of Common Stock**

This is a prospectus for the resale of up to 3,642,200 shares of our common stock , par value \$0.001 per share, by the selling stockholders of Revolutionary Concepts, Inc. identified in this prospectus under “*Selling Securityholders*”, including 2,000,000 shares of our common stock issuable upon the exercise of 2,000,000 warrants.

Selling security holders are offering shares at a selling price of \$1.25 per share until a market for the shares is established and thereafter at prevailing market prices. These shares may be sold by the selling stockholders from time to time in the over-the-counter market, other national securities exchanges, or an automated interdealer quotation system on which our common stock is then traded or quoted, through negotiated transactions at negotiated prices or otherwise at market prices prevailing at the time of sale. An arbitrary determination of the offering price increases the risk that purchasers of the shares in the offering will pay more than the value the public market ultimately assigns to the shares and more than an independent appraisal value.

Our common stock is presently not traded on any market or securities exchange and we have not begun to take steps to make the shares available for trading. The sales price to the public is fixed at \$1.25 per share until such time as the shares of our common stock are traded on the NASD Over-The-Counter Bulletin Board. The Company is not able to apply for OTC Bulletin Board trading on its own. We anticipate seeking sponsorship for the quotation of our common stock on the OTC Bulletin Board upon effectiveness of the registration statement we have filed with the SEC in connection with this offering. However, we can provide no assurance that our shares will be listed for quotation on the OTC Bulletin Board. If a market begins before all securities offered hereby are sold, then the remaining securities will be sold at market prices. If the selling security holders sell to more than 25 persons, the Company will undertake efforts to have markets established for the trading of the securities. If we are unable to obtain a market maker, we expect our securities to trade over the counter on the Pink Sheets after the conclusion of this offering.

The shares of Common Stock offered from time to time by the selling securityholders under this prospectus consist of:

- 1,000,000 shares of Common Stock issued in the Units sold in 2005;(the "2005 Private Placement")
- 1,000,000 shares of Common Stock issuable upon exercise the Class A Warrants sold in the 2005 Private Placement;
- 1,000,000 shares of Common Stock issuable upon conversion of the Class B Warrants sold in the 2005 Private Placement;
- 642,200 shares of Common Stock sold in 2007; (the “2007 Private Placement”.)

The information in this prospectus is not complete and may be changed. These securities may not be sold until the registration filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted. Pursuant to registration rights granted by us to the selling stockholders, we are obligated to register the

shares held or to be acquired upon exercise of warrants by these selling stockholders. The distribution of the shares by the selling stockholders is not subject to any underwriting agreement. We will receive none of the proceeds from the sale of the shares by the selling stockholders, except cash exercise prices upon exercise of the warrants.. We will bear all expenses of registration incurred in connection with this offering (currently estimated to be \$62,679, but all selling and other expenses incurred by the selling stockholders will be borne by them. An arbitrary determination of the offering price increase the risk that purchasers of the shares in the offering will pay more than the value the public market ultimately assigns to our common stock and more than an independent appraisal value.

You should rely only on the information contained in this prospectus. We have not authorized anyone to provide you with information different from that contained in this prospectus. This offering is limited to sale of securities and seeking offers to buy securities only in jurisdictions where offers and sales are permitted. The information contained in this prospectus is accurate only as of the date of this prospectus, regardless of the time of delivery of this prospectus or any sale of the units.

Until _____, 2008 (60 days after the commencement of this offering), all dealers that buy, sell or trade the securities, whether or not participating in this offering, may be required to deliver a prospectus. This delivery requirement is in addition to the obligation of dealers to deliver a prospectus when acting as underwriters and with respect to any unsold allotments or subscriptions.

For investors outside the United States: Neither we nor any of the statutory underwriters have done anything that would permit this offering or possession or distribution of this prospectus in any jurisdiction where action for that purpose is required, other than in the United States. You are required to inform yourselves about and to observe any restrictions relating to this offering and the distribution of this prospectus.

Investing in our common stock involves a high degree of risk. We urge you to carefully consider the “Risk Factors” beginning on page 11.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the adequacy or accuracy of the prospectus. Any representation to the contrary is a criminal offense.

Summary Financial Data

Because this is only a summary of our financial information, it does not contain all of the financial information that may be important to you. Therefore, you should carefully read all of the information in this prospectus and any prospectus supplement, including the financial statements and their explanatory notes and the section entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations," before making a decision to invest in our common stock. The information contained in the following summary are derived from our financial statements for the years ending December 31, 2006 and 2007 and quarter ended March 31, 2008.

	Years ended December 31,		Quarter ended

SUMMARY

You should read the following summary together with the more detailed information contained elsewhere in this prospectus, including the section titled "Risk Factors," regarding us and the common stock being sold in this offering. Unless the context otherwise requires, "we," "our," "us" and similar phrases refer to Revolutionary Concepts Inc., a Nevada corporation.

Our Business

The Company is in the development stage, has incurred losses and expects losses to continue for the foreseeable future. We have not generated revenues to date, and there can be no assurance that we will be able to successfully penetrate our target market. We have designed, developed and patented a network camera video and monitoring device (the "Eyetalk") that permits two way interaction from remote sites, transmits to cell phones and other media, and permits visual and auditory control of monitored entry points. Our system can be remotely controlled and monitored so that sound and visuals can be remotely transmitted to a cell phone or other receiving device. We expect to begin the commercialization of the system in the latter half of 2008. The system utilizes new technology to synergistically improve messaging, communication, and security in this setting.

We intend to target licensing arrangement targeted to consumers and direct marketing to small to mid-sized businesses that require a secure workplace or work in remote locations. We believe that up until now this user group has been underserved due to the high price of competing solutions.

We are currently considered to be in unsound financial condition. Our Auditor has expressed substantial doubt about our ability to continue as a going concern. Persons should not invest unless they can afford to lose their entire investments. We sustained net losses of \$(455,300) and \$(77,222), for the years ended December 31, 2007, 2006 respectively. We have accumulated a deficit of 1,140,867, since inception in March, 2004. Further, we may incur significant losses through 2008 and beyond, as we further develop and commercialize our remote network camera video system.

As of December 31, 2007 we had 18,811,700 shares of our common stock outstanding (excluding any warrants.). The shares of common stock covered by this prospectus constitute 17.50% of our outstanding common stock (assuming the exercise of all warrants included in this prospectus).

Corporate Information and History

We were founded in 2004 as Revolutionary Concepts, Inc., a North Carolina corporation and its subsidiary, D.V. M. S., LLC for the purpose of developing a network camera video device. We reincorporated in Nevada in February 2005 as Revolutionary Concepts, Inc. (the "Company") to re-domicile the North Carolina corporation to a Nevada corporation by the same name

Our principal executive offices are located at 2622 Ashby Woods, Matthews, NC 28105. The Company's telephone number is 704-622-6327. The President of the Company is Ron Carter. We maintain a corporate website at [www http://Eyetalk.com.com](http://Eyetalk.com.com). The contents of our website are not part of this prospectus and should not be relied upon with respect to the prospectus.

To date, our efforts have been largely devoted to money developing our network camera video system. We are in the development stage and have not generated revenue from operations. We hope to release our remote network camera video system into the general marketplace in 2008. We will likely require continuous upgrade as our users implement the system and provide us with feedback.

Recent Financing Transactions

2005 Private Placement. In March 2005, we commenced a private offering of 100 Units at a price of \$5,000 per Unit which was completed in March, 2006.. Each Unit consisted of 10,000 shares of common stock; 10,000 Class A Warrants, and 10,000 Class B Warrants (the "2005 Offering") The Units were sold . We received gross proceeds of \$500,000, which was used to complete the prototype and patenting of the remote network camera video system and operating expenses, including some of the costs of this offering.

Each Class A warrant is exercisable for one share of common stock at an exercise price of \$0.65 per share, and each Class B warrant is exercisable for one share of common stock at an exercise price of \$0.90 per share. Each 2005 Warrant will be exercisable for eighteen months after the effective date of their registration, unless extended or redeemed. The exercise price and number of shares of common stock underlying the 2005 Warrants is subject to adjustment on certain events, including reverse stock splits, stock dividends and recapitalizations, combinations, and mergers. We must at all times reserve and keep available, solely for issuance and delivery upon the exercise of the 2005 Warrants, such shares of common stock underlying the 2005 Warrants, as from time to time shall be issuable upon the exercise of the 2005 Warrants.

We agreed to file a registration statement following completion of the 2005 Private Placement under certain conditions and undertook to use reasonable efforts to cause the registration statement to be declared effective. The securities to be registered under the registration statement consisted of all common stock issued, or issuable, under the 2005 Private Placement. No penalties were prescribed for failure to meet the deadlines for filing and effectiveness of the registration statement.

2007 Private Placement. In May 2007, we commenced a private offering of 642,200 shares of common stock in a private placement at \$0.50 per share and received gross proceeds of \$321,100 (the "2007 Private Placement"). No agents were involved in the 2007 Private Placement and no commissions or similar consideration was paid in connection with the 2007 Private Placement. The net proceeds were expended to further the development of the issuing and amending of the patent, research commercialization, further develop the software and operating expenses.

We also borrowed \$306,000 from four non-related parties at 4% interest which begin to come due in October, 2008. These promissory notes were secured by a pledge of up to 612,000 shares of restricted common stock from our authorized buy unissued shares. If we are unable to pay according to the terms of the notes or successfully renegotiate the notes, we must issue shares to the noteholders.

The securities offered in both private placements, including the common stock, warrants and common stock issuable upon exercise of the warrants issued and sold in reliance upon the exemption from registration contained in Section 4(2) of the Securities Act and Regulation D promulgated thereunder, which exempt transactions by an issuer not involving any public offering. The issuance of the shares was undertaken without general solicitation or advertising. Each purchaser of the shares represented in the purchase agreement, among other things, that (a) it was an “accredited investor”, as defined in Regulation D promulgated under the Securities Act of 1933, (b) it had obtained sufficient information from us to evaluate the merits and risks of an investment in the shares of our common stock and (c) it was acquiring the shares of our common stock for investment purposes and not with a view to any public resale or other distribution in violation of the Securities Act of 1933 or the securities laws of any state. In addition, the stock certificate representing these shares contained a legend that they are restricted securities under the Securities Act of 1933. These securities may not be offered or sold in the United States in the absence of an effective registration statement or exemption from the registration requirements under the Securities Act.

THE OFFERING

The Offering

All selling securityholders are statutory underwriters and will be required to comply with all obligations imposed on statutory underwriters under the Securities Act of 1933, and any broker-dealer executing sell orders on behalf of the selling stockholders may be deemed to be “underwriters” within the meaning of the Securities Act of 1933, and any commissions or discounts given to any such broker-dealer may be deemed to be underwriting commissions or discounts under the Securities Act of 1933. The selling stockholders have informed us that they do not have any agreement or understanding, directly or indirectly, with any person to distribute their common stock.

Common stock offered by the selling stockholders:

Shares of Common Stock, \$0.001 par value	1,642,200 shares
---	------------------

Maximum number of shares that may be issued on conversion of Class A Convertible Common Stock Purchase Warrants	1,000,000 shares
---	------------------

Class A Convertible Common Stock Purchase Warrants

Maximum number of shares that may be issued on conversion of Class B Convertible Common Stock Purchase Warrants	1,000,000 shares
---	------------------

Class B Convertible Common Stock Purchase Warrants 1,000,000

Total shares offered	3,642,200 shares
----------------------	------------------

Common stock outstanding	18,811,700 shares ⁽¹⁾
--------------------------	----------------------------------

Use of proceeds	We will receive none of the proceeds from the sale of the shares by the selling stockholders. We will receive \$0.65 upon exercise of each Class A Warrant and \$0.90 upon exercise of each Class B Warrant.
-----------------	--

Risk Factors	You should read the section titled “Risk Factors” beginning on page _11_ as well as other cautionary statements throughout this prospectus before investing in any shares offered hereunder.
--------------	--

(1) As of December 31, 2007. Does not include:

1,000,000 shares of our common stock that are reserved for issuance on the conversion of the outstanding shares of Class A Convertible Common Stock Purchase Warrants;

1,000,000 shares of our common stock that are reserved for issuance on the conversion of the outstanding shares of Class B Convertible Common Stock Purchase Warrants; and

Selling Stockholders

All of the offered shares are to be offered and sold by our existing security holders. Seventy four selling stockholders acquired their shares in our 2005 Private Offering which were units including common stock, Class A issuance of Class A Convertible Common Stock Purchase Warrants and our Class B issuance of Class B Convertible Common Stock Purchase Warrants. The shares of common stock to be offered by the selling stockholders include:

1,000,000 shares of common stock currently issued and outstanding;

1,000,000 shares of our common stock issuable on the conversion of our Class A Convertible Common Stock Purchase Warrants; and

1,000,000 shares of our common stock issuable on the conversion of our Class B Convertible Common Stock Purchase Warrants.

Sixty Four selling stockholders acquired their shares in our 2007 Private Offering and are offering 642,200 shares.

In addition, under Rule 416 of the Securities Act, this prospectus, and the registration statement of which it is a part, covers a presently indeterminate number of shares of common stock issuable on the occurrence of a stock split, stock dividend or other similar transaction.

RISK FACTORS

RISKS RELATED TO OUR BUSINESS

AN INVESTMENT IN THE SHARES OF COMMON STOCK OFFERED BY THIS PROSPECTUS INVOLVES A HIGH DEGREE OF RISK. WE CANNOT ASSURE THAT WE WILL EVER GENERATE SIGNIFICANT REVENUES, DEVELOP OPERATIONS, OR MAKE A PROFIT.

OUR INDEPENDENT AUDITORS HAVE NOTED THAT THERE IS SUBSTANTIAL DOUBT ABOUT OUR ABILITY TO CONTINUE AS A GOING CONCERN.

Our independent auditors have noted that there is substantial doubt that we can continue as a going concern. As reflected in our consolidated financial statements the Company has had cumulative operating losses. We currently have a negative net worth, extremely limited cash and suffered net losses \$(455,300) at December 31, 2007 and \$(77,222) at December 31, 2006. We had accumulated deficits to our stockholder's equity of \$(1,140,867) and \$(685,567) for the years ended 2007 and 2006 respectively. Management expects the losses to continue, thereby requiring addition capital, some of which may be generated from this offering. There can be no assurance that our plans will be successful. Our consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded assets, or the amounts and classification of liabilities that might be necessary in the event the Company cannot continue in existence.

OUR OFFICERS HAVE RECEIVED LOANS THAT MAY HAVE TO BE EXPENSED AND WHICH MAY CREATE CERTAIN TAX OBLIGATIONS.

From April 2005 to the date of this Memorandum, the officers of the Company have not taken salaries but have taken advances from the Company, some of which have been repaid. We have booked loans to shareholders as a current asset on our balance sheet. As of December 31, 2006, the Company had Loans to Shareholders of approximately \$125,731 to its officers and directors. As of December 31, 2007, the outstanding loans were \$107,396. The advances carry an interest rate of 5% and have been recorded as "Unpaid Capital Contributions".

WE ARE A DEVELOPMENT STAGE COMPANY WITH NO OPERATING HISTORY FOR YOU TO EVALUATE AND WE HAVE NOT PROVEN OUR ABILITY TO GENERATE PROFITS.

We are a developmental stage company. Although we have developed a working prototype, we have not established a market for our product. We have no meaningful operating history so it will be difficult for you to evaluate an investment in our securities. From our inception to date, we have had no revenues. We may never be able to become profitable. You will be furnishing venture capital to us and will bear the risk of complete loss of your investment if we are unsuccessful.

An investor should also consider the uncertainties and difficulties frequently encountered by companies, such as ours, in their early stages of development. Our revenue and income potential is unproven and our business model is still emerging. If our business model does not prove to be profitable, investors may lose all of their investment.

WE HAVE HAD NO REVENUES AND ANTICIPATE LOSSES FOR THE FORESEEABLE FUTURE.

Since inception we have had no revenues. We have not achieved profitability and expect to continue to incur net losses throughout fiscal 2008 and subsequent fiscal periods. We expect to incur significant operating expenses and, as a result, will need to generate significant revenues to achieve profitability, which may not occur. Even if we do achieve profitability, we may be unable to sustain or increase profitability on an ongoing basis.

IF WE FAIL TO IMPLEMENT OUR COMMERCIALIZATION STRATEGY, OUR BUSINESS, FINANCIAL CONDITION AND RESULTS OF OPERATIONS COULD BE MATERIALLY AND ADVERSELY AFFECTED.

Our future financial performance and success are dependent in large part upon our ability to implement our commercialization strategy successfully. We have engaged third party consultants to identify potential clients for our technology, although we have no means to determine whether this strategy will be successful. We may not be able to successfully implement our commercialization strategy with or without the involvement of these third parties. If we are unable to do so, our long-term growth and profitability may be adversely affected. Even if we are able to successfully implement some or all of the initiatives of our business plan, our operating results may not improve to the extent we expect, or at all.

Implementation of our commercialization strategy could also be affected by a number of factors beyond our control, such as increased competition, legal developments, general economic conditions, increased operating costs or expenses. In addition, to the extent, we have misjudged the nature and extent of industry trends or our competition; we may have difficulty achieving our strategic objectives. We may also decide to alter or discontinue certain aspects of our business strategy at any time. Any failure to successfully implement our business strategy may adversely affect our business, financial condition and results of operations and thus our ability to service our indebtedness, including our ability to make principal and interest payments on our indebtedness.

THE COMPANY DEPENDS ON ITS PATENT AND PROPRIETARY RIGHTS TO DEVELOP AND PROTECT TECHNOLOGIES AND PRODUCTS, WHICH RIGHTS MAY NOT OFFER SUFFICIENT PROTECTION FROM INFRINGEMENT BY THIRD PARTIES.

The Company has been issued a patent by the U.S. Patent Office for its patented network camera video technology. Management believes that this is a valid patent. However, there can be no assurances that the patent and the network camera video technology will be enforceable or generate revenues for the Company.

The Company's inability to protect its intellectual property through sufficient patent protection will adversely affect that Company's ability to survive and other companies may be able to develop substantially similar technologies in

competition with the Company. If those other companies enter the marketplace with their own similar products, the value of the Company's patent will be substantially diminished.

The Company's success will depend on its ability to obtain and enforce protection under United States and foreign patent laws and other intellectual property laws for the technology that the Company intends to market and license, to develop and preserve the confidentiality of trade secrets and to operate without infringing the proprietary rights of third parties.

The Company cannot assure you that our technology will not be breached, that we will have adequate remedies for any breach, or that our trade secrets and proprietary know-how will not otherwise become known or be independently discovered by others. Consequently, such breach could have a negative effect on our financial performance and results of operations.

LITIGATION TO ENFORCE ITS PATENT AGAINST UNAUTHORIZED USERS WILL BE EXPENSIVE AND TIME CONSUMING, AND THEIR OUTCOME IS UNCERTAIN. ANY DELAY OR OTHER FACTOR WHICH NEGATIVELY AFFECTS THE COMPANY'S ABILITY TO FUND OPERATIONS AND DEVELOP REVENUES.

Litigation to enforce the Company's patented technology against unauthorized users can be a lengthy, time-consuming and expensive process and there can be no assurance of the results of such litigation. The Company has engaged patent counsel to consider enforcement actions against those using the technology but who do not have a licensing agreement for it. In addition, if we fail to provide adequate proprietary protection, our names, brand name reputation, revenues and potential profitability may be negatively affected.

WE EXPECT TO HAVE OUR PRODUCT MANUFACTURED BY THIRD PARTIES OVER WHICH WE HAVE NO CONTROL AND WE CURRENTLY DO NOT HAVE ANY AGREEMENTS FOR THE MANUFACTURE OF THE PRODUCT. WE ARE SUBJECT TO FLUCTUATIONS IN THE COST AND AVAILABILITY OF RAW MATERIALS AND THE POSSIBLE LOSS OF SUPPLIERS.

While we have had discussions with third party suppliers regarding the manufacture of our product, we currently have no arrangements. We expect to depend on third party manufacturers over which we will have no control. We are dependent upon the pricing by these companies and the availability and pricing of raw materials to produce our products. The availability of suppliers and the price and availability of the raw materials will be affected by numerous factors beyond our control. We do not have the resources, facilities or experience to manufacture our Eyetalk product or any of its component parts. Such contract manufacturers may be the sole source of production and may have limited experience at manufacturing, a product similar to ours.

WE MAY HAVE INSUFFICIENT LIQUIDITY TO CONTINUE.

The Company will not receive any proceeds from the sale of common stock hereby offered although the Company will receive the exercise price for each warrant exercised. If none of the warrants are exercised we will need additional sources of capital or we may not be able to continue operations. We are devoting substantially all of our present efforts to establishing a new business and will need additional capital to continue implementing our business plan. We have generated no revenue. If we cannot raise money through this offering, we will have to seek other sources of financing or we will be forced to curtail or terminate our business plans. There is no assurance that additional sources of financing will be available at all or at a reasonable cost.

We have estimated the costs of completion of the commercialization at \$1,382,000. Since there is no assurance that any of the warrants will be exercised the Company has initiated discussions regarding loans through commercial banks and a loan from other funding sources. We expect to continue these discussions in the hopes of arranging financing to provide sufficient liquidity. We have no assurance that any of these discussion will prove successful

WE DO NOT CURRENTLY HAVE SALES, MARKETING OR DISTRIBUTION CAPABILITIES. IF WE FAIL TO EFFECTIVELY SELL, MARKET AND DISTRIBUTE OUR EYETALK PRODUCT, OUR BUSINESS AND RESULTS OF OPERATIONS WILL SUFFER.

We do not currently have a sales staff, marketing plan or other distribution facilities. We have engaged third parties to assist us in identifying potential users of the Eyetalk technology. If we are unable to create sales, marketing and distribution capabilities or enter into licensing and similar agreements with third parties to perform these functions, we will not be able to successfully commercialize our Eyetalk product. In order to successfully commercialize any of our product candidates, we must either internally develop sales, marketing and distribution capabilities or make arrangements with third parties to perform these services.

WE MAY HAVE EXPOSURE TO LEGAL CLAIM THAT COULD CAUSE SIGNIFICANT LOSSES.

Our Eyetalk product will likely be relied upon to provide methods of security from personal harm or property loss. To the extent that the Eyetalk product malfunctions or experiences down times, losses could occur which would give rise to legal claims against us. There is no accurate method to predict the extent of exposure to these potential claims. We may therefore be susceptible to lawsuits that could cause us to incur substantial liabilities and/or limit commercialization of our Eyetalk product. Product liability insurance for the pharmaceutical and biotechnology industries is generally expensive, if available at all. We do not currently have any product liability insurance. If we are unable to obtain sufficient insurance coverage on reasonable terms or to otherwise protect against potential product liability claims, we may be unable to commercialize our product candidates. A successful product liability claim brought against us in excess of our insurance coverage, if any, may cause us to incur substantial liabilities and, as a result, our business may fail.

COMPETITION IN THE ELECTRONIC SECURITY WORLD IS FIERCE AND WE MAY NOT BE ABLE TO COMPETE AND SURVIVE.

The electronic security industry is very competitive. It is constantly changing and we expect competition to intensify in the future. Increased competition will result in reduced profit margins on products. We believe that our ability to compete successfully depends on a number of factors, including establishing brand awareness and market presence on a rapid basis; the quality of our marketing services; ease of use; and industry and general economic trends. The failure of any number of these factors could cause us additional losses.

OUR PRINCIPAL STOCKHOLDERS CONTROL OUR BUSINESS AFFAIRS IN WHICH CASE YOU WILL HAVE LITTLE OR NO PARTICIPATION IN OUR BUSINESS AFFAIRS.

Currently, our principal stockholders own 69.095% of our common stock. After this offering (and assuming all shares are sold and all warrants are exercised), they will own approximately 62.455% of the common stock. As a result, they will have control over all matters requiring approval by our stockholders without the approval of minority stockholders. In addition, they will be able to elect all of the members of our Board of Directors, which will allow them to control our affairs and management. They will also be able to affect most corporate matters requiring stockholder approval by written consent, without the need for a duly noticed and duly-held meeting of stockholders. As a result, they will have significant influence and control over all matters requiring approval by our stockholders. Accordingly, you will be limited in your ability to affect change in how we conduct our business.

WE MAY INCUR SIGNIFICANT COSTS TO ENSURE COMPLIANCE WITH CORPORATE GOVERNANCE AND ACCOUNTING REQUIREMENTS.

We expect to incur significant costs associated with our public company reporting requirements, costs associated with applicable corporate governance requirements, including requirements under the Sarbanes-Oxley Act of 2002 and other rules implemented by the SEC. We expect all of these applicable rules and regulations to increase our legal and financial compliance costs and to make some activities more time-consuming and costly. While we have no experience as a public company, we estimate that these additional costs will total approximately \$50,000 per year. We also expect that these applicable rules and regulations may make it more difficult and more expensive for us to obtain director and officer liability insurance and we may be required to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage. As a result, it may be more difficult for us to attract and retain qualified individuals to serve on our board of directors or as executive officers. We are currently evaluating and monitoring developments with respect to these newly applicable rules, and we cannot predict or estimate the amount of additional costs we may incur or the timing of such costs.

RISKS RELATING TO OUR SECURITIES

WE HAVE NEVER PAID DIVIDENDS ON OUR COMMON STOCK AND YOU MAY NEVER RECEIVE DIVIDENDS. THERE IS A RISK THAT AN INVESTOR IN OUR COMPANY WILL NEVER SEE A RETURN ON INVESTMENT AND THE STOCK MAY BECOME WORTHLESS.

We have never paid dividends on our common stock. We intend to retain earnings, if any, to finance the development and expansion of our business. Future dividend policy will be at the discretion of the Board of Directors and will be contingent upon future earnings, if any, our financial condition, capital requirements, general business conditions and other factors. Future dividends may also be affected by covenants contained in loan or other financing documents, which may be executed by us in the future. Therefore, there can be no assurance that cash dividends of any kind will ever be paid. If you are counting on a return on your investment in the common stock, the shares are a risky investment.

THERE IS CURRENTLY NO MARKET FOR OUR COMMON STOCK AND NO ASSURANCE THAT ONE WILL DEVELOP.

There is currently no trading market for our shares of Common Stock, and there can be no assurance that a more substantial market will ever develop or be maintained. Any market price for shares of our Common Stock is likely to be very volatile, and numerous factors beyond our control may have a significant adverse effect. In addition, the stock markets generally have experienced, and continue to experience, extreme price and volume fluctuations which have affected the market price of many small capital companies and which have often been unrelated to the operating performance of these companies. These broad market fluctuations, as well as general economic and political conditions, may also adversely affect the market price of our Common Stock. Further, there is no correlation between the present limited market price of our Common Stock and our revenues, book value, assets or other established criteria of value. The present limited quotations of our Common Stock should not be considered indicative of the actual value of the Company or our Common Stock

Future sales of our common stock could put downward selling pressure on our shares, and adversely affect the stock price. There is a risk that this downward pressure may make it impossible for an investor to sell his shares at any reasonable price.

Future sales of substantial amounts of our common stock in the public market, or the perception that such sales could occur, could put downward selling pressure on our shares, and adversely affect the market price of our common stock. Such sales could be made pursuant to Rule 144 under the Securities Act of 1933, as amended, as shares become eligible for sale under the Rule.

AN ARBITRARY DETERMINATION OF THE OFFERING PRICE INCREASES THE RISK THAT PURCHASERS OF THE SHARES IN THE OFFERING WILL PAY MORE THAN THE VALUE THE PUBLIC MARKET ULTIMATELY ASSIGNS TO OUR COMMON STOCK AND MORE THAN AN INDEPENDENT APPRAISAL VALUE OF US.

The offering price for the shares of \$1.25 was arbitrarily determined by our management. The offering price bears no relation to our assets, revenues, book value or other traditional criteria of value. Investors may be unable to resell their shares at or near the offering price, if they are able to resell the shares at all. Selling security holders are offering shares at a selling price of \$1.25 per share until a market for the shares is established and thereafter at prevailing market prices. If the selling security holders sell to more than 25 persons, the Company will undertake efforts to have markets established for the trading of the securities. If such a market begins before all securities offered hereby are sold, then the remaining securities will be sold at market prices.

IT WILL LIKELY BE HARDER FOR THE COMPANY TO RAISE ADDITIONAL MONEY WHILE THE WARRANTS ARE OUTSTANDING.

In our March, 2005 private offering, we sold 1,000,000 redeemable Class A Common Stock purchase warrants and 1,000,000 redeemable Class B Common Stock purchase warrants (the “public warrants.”) The Class A warrants are exercisable for one share of common stock at an exercise price of \$0.65 and the Class B warrants are exercisable for one share of common stock at an exercise price of \$0.90. Proceeds from the exercise of warrants will be booked as paid in capital and be added to working capital. All of the warrants will remain outstanding for a period of eighteen months from the effective date of registration, unless redeemed. During the term that the public warrants are outstanding, the holders of the public warrants are given the opportunity to profit from a rise in the market price of our common stock. We may find it more difficult to raise additional equity capital while these public warrants are outstanding. At any time during which these public warrants are likely to be exercised, we may be unable to obtain additional equity capital on more favorable terms from other sources.

THERE IS A POTENTIAL MARKET OVERHANG THAT COULD DEPRESS THE VALUE OF OUR COMMON STOCK AND FUTURE SALES OF OUR COMMON STOCK COULD PUT A DOWNWARD PRESSURE ON THE PRICE OF YOUR SHARES AND ADVERSELY AFFECT THE PRICE OF YOUR SHARES.

We also borrowed \$306,000 from four non-related parties at 4% interest which begin to come due in October, 2008. These promissory notes were secured by a pledge of up to 612,000 shares of restricted common stock from our authorized buy unissued shares. If we are unable to pay according to the terms of the notes or successfully renegotiate the notes, we must issue shares to the noteholders. These shares are likely to create a market overhang until the notes are satisfied or the shares are issued and outstanding. This market overhang is likely to depress the value of the remaining outstanding shares.

Because our principal stockholders will continue to own approximately at least 62.46% of our common stock regardless of the number of warrants exercised they may dispose of a substantial percentage of their stock subject to Rule 144 trading volume limitations. If substantial amounts of any of these shares are sold there may be downward price pressures on our common stock price, causing the market price of our common stock to decrease in value. In addition, this selling activity could:

- § Decrease the level of public interest in our common stock;
- § Inhibit buying activity that might otherwise help support the market price of our common stock; and
- § Prevent possible upward price movements in our common stock.

An arbitrary determination of the offering price increases the risk that purchasers of the shares in the offering will pay more than the value the public market ultimately assigns to our common stock and more than an independent appraisal value of us.

BECAUSE OUR SHARES ARE DEEMED HIGH RISK "PENNY STOCKS," YOU MAY HAVE DIFFICULTY SELLING THEM IN THE SECONDARY TRADING MARKET.

The Commission has adopted regulations which generally define a "penny stock" to be any equity security that has a market price (as therein defined) less than \$5.00 per share or with an exercise price of less than \$5.00 per share, subject to certain exceptions. Additionally, if the equity security is not registered or authorized on a national securities exchange, the equity security also constitutes a "penny stock." As our common stock falls within the definition of penny stock, these regulations require the delivery, prior to any transaction involving our common stock, of a risk disclosure schedule explaining the penny stock market and the risks associated with it. These regulations generally require broker-dealers who sell penny stocks to persons other than established customers and accredited investors to deliver a disclosure schedule explaining the penny stock market and the risks associated with that market. Disclosure is also required to be made about compensation payable to both the broker-dealer and the registered representative and current quotations for the securities. These regulations also impose various sales practice requirements on broker-dealers. In addition, monthly statements are required to be sent disclosing recent price information for the penny stocks. The ability of broker/dealers to sell our common stock and the ability of shareholders to sell our common stock in the secondary market is limited. As a result, the market liquidity for our common stock is severely and adversely affected. We can provide no assurance that trading in our common stock will not be subject to these or other regulations in the future, which would negatively affect the market for our common stock.

IF A MARKET DEVELOPS FOR OUR SECURITIES THE COULD BE VOLATILE AND MAY NOT APPRECIATE IN VALUE.

If a market should develop for our securities, of which we have no assurance, the market price is likely to fluctuate significantly. Fluctuations could be rapid and severe and may provide investors little opportunity to react. Factors such

as changes in results from our operations, and a variety of other factors, many of which are beyond the control of the Company, could cause the market price of our common stock to fluctuate substantially. Also, stock markets in penny stock shares tend to have extreme price and volume volatility. The market prices of shares of many smaller public companies securities are subject to volatility for reasons that frequently unrelated to the actual operating performance, earnings or other recognized measurements of value. This volatility may cause declines including very sudden and sharp declines in the market price of our common stock. We cannot assure investors that the stock price will appreciate in value, that a market will be available to resell your securities or that the shares will retain any value at all.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

Included in this prospectus are “forward-looking” statements, as well as historical information. Although we believe that the expectations reflected in these forward-looking statements are reasonable, we can give no assurance that the expectations reflected in these forward-looking statements will prove to be correct. Our actual results could differ materially from those anticipated in forward-looking statements as a result of certain factors, including matters described in the section titled “Risk Factors.” Forward-looking statements include those that use forward-looking terminology, such as the words “anticipate,” “believe,” “estimate,” “expect,” “intend,” “may,” “project,” “plan,” “will,” “shall,” and similar expressions, including when used in the negative. Although we believe that the expectations reflected in these forward-looking statements are reasonable and achievable, these statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements. Actual results may be materially different than those described in this prospectus. Important factors that could cause our actual results, performance or achievements to differ from these forward-looking statements include the factors described in the “Risk Factors” section and elsewhere in this prospectus.

All forward-looking statements attributable to us are expressly qualified in their entirety by these and other factors. We undertake no obligation to update or revise these forward-looking statements, whether to reflect events or circumstances after the date initially filed or published, to reflect the occurrence of unanticipated events or otherwise

AVAILABLE INFORMATION

We have filed a registration statement on Form S-1 with the U.S. Securities and Exchange Commission, or the SEC, to register the shares of our common stock being offered by this prospectus. This Prospectus does not contain all of the information set forth in the Registration Statement, certain parts of which are omitted in accordance with the rules of the Commission. For further information pertaining to the Company, reference is made to the Registration Statement. Statements contained in this prospectus or any documents incorporated herein by reference concerning the provisions of documents are necessarily summaries of such documents, and each statement is qualified in its entirety by reference to the copy of the applicable document filed with the Commission. Copies of the Registration Statement are on file at the offices of the Commission, and may be inspected without charge at the offices of the Commission, the addresses of which are set forth above, and copies may be obtained from the Commission at prescribed rates. The Registration Statement has been filed electronically through the Commission's Electronic Data Gathering, Analysis and Retrieval System and may be obtained through the Commission's Web site ([http:// www.sec.gov](http://www.sec.gov)).

You may read and copy any reports, statements or other information that we file at the SEC's public reference facilities at 100 F Street, N.E., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information regarding the public reference facilities. The SEC maintains a website, <http://www.sec.gov>, that contains reports, proxy statements and information statements and other information regarding registrants that file electronically with the SEC, including us. Our SEC filings are also available to the public from commercial document retrieval services. Information contained on our website should not be considered part of this prospectus.

We will become subject to the information requirements of the Securities Exchange Act of 1934, as amended, and in accordance therewith file reports and other information with the Securities and Exchange Commission. Such reports and other information filed by us can be inspected and copied at the public reference facilities of the Commission at 100 F Street, N.E., Washington, D.C. 20549 . Requests for copies should be directed to the Commission's Public Reference Section, Judiciary Plaza, 450 Fifth Street, N.W., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for more information on the public reference rooms. The Commission maintains a Web site (<http://www.sec.gov>) that contains reports, proxy and information statements and other information regarding registrants that file electronically.

USE OF PROCEEDS

This prospectus relates to shares of our common stock that may be offered and sold from time to time by the selling stockholders who will receive all of the proceeds from the sale of the shares. We will not receive any proceeds from the sale of shares of common stock in this offering except upon the exercise of outstanding warrants. We could receive up to \$1,550,000 from the cash exercise price upon exercise of all warrants held by selling stockholders. We expect to use the proceeds received from the exercise of the warrants, if any, for working capital and general corporate purposes. We will bear all expenses of registration incurred in connection with this offering, but all commissions, selling and other expenses incurred by the selling stockholders to underwriters, agents, brokers and dealers will be borne by them. We estimate that our expenses in connection with the filing of the registration statement of which this prospectus is a part will be approximately \$62,679.

DETERMINATION OF OFFERING PRICE

The selling security holders will sell their shares at \$1.25 per share unless and until the Company is traded, and thereafter at prevailing market prices. Prior to this offering, there has been no market for our shares. If the selling security holders sell to more than 25 persons, the Company will undertake efforts to have markets established for the trading of the securities. If such a market begins before all securities offered hereby are sold, then the remaining securities will be sold at market prices. The offering price of \$1.25 per share was arbitrarily determined and bears no relationship to assets, book value, net worth, earnings, actual results of operations, or any other established investment criteria. Among the factors considered in determining this price were our historical sales levels, estimates of our prospects, the background and capital contributions of management, the degree of control which the current shareholders desired to retain, current conditions of the securities markets and other information.

MARKET FOR OUR SECURITIES AND RELATED STOCKHOLDER MATTERS

Dividend Policy

We do not expect to pay a dividend on our common stock in the foreseeable future. The payment of dividends on our common stock is within the discretion of our board of directors, subject to our certificate of incorporation. We intend to retain any earnings for use in our operations and the expansion of our business. Payment of dividends in the future will depend on our future earnings, future capital needs and our operating and financial condition, among other factors.

Management's Discussion and Analysis of Financial Condition and Results of Operations

SUMMARY OF CRITICAL ACCOUNTING POLICIES

The discussion and analysis of our financial condition and results of operations is based upon our financial statements, which have been prepared in accordance with generally accepted accounting principles generally accepted in the United States (or "GAAP"). The preparation of those financial statements requires us to make estimates and judgments that affect the reported amount of assets and liabilities at the date of our financial statements. Actual results may differ from these estimates under different assumptions or conditions.

Critical accounting policies are those that reflect significant judgments or uncertainties, and potentially result in materially different results under different assumptions and conditions. We have described below what we believe are our most critical accounting policies. SEE ALSO NOTES 1 and 2 TO CONSOLIDATED FINANCIAL STATEMENTS, "SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES."

Revenue recognition

The Company will recognize sales revenue at the time of delivery when ownership has transferred to the customer, when evidence of a payment arrangement exists and the sales proceeds are determinable and collectable. Provisions will be recorded for product returns based on historical experience. To date, the Company's revenue is primarily comprised of interest income.

Options and warrants issued

The Company allocates the proceeds received from equity financing and the attached options and warrants issued, based on their relative fair values, at the time of issuance. The amount allocated to the options and warrants is recorded as additional paid in capital.

Stock-based compensation

The Company will account for its employee stock based compensation arrangements in accordance with the provisions of Accounting Principles Board (“APB”) Opinion No. 25. “Accounting for Stock Issued to Employees”, and related interpretations. As such, compensation expense for stock options, common stock and other equity instruments issued to non-employees for services received will be based upon the fair value of the equity instruments issued, as the services are provided and the securities earned. SFAS No. 123, “Accounting for Stock-Based Compensation”, requires entities that continue to apply the provisions of APB Opinion No. 25 for transactions with employees to provide pro forma net earnings (loss) and pro forma earnings (loss) per share disclosures for employee stock option grants as if the fair-value-based method defined in SFAS No. 123 had been applied to these transactions. For the period from inception (March 12, 2004) to December 31, 2007, no stock options were committed to be issued to employees.

Income taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss carry forwards that are available to be carried forward to future years for tax purposes. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. When it is not considered to be more likely than not that a deferred tax asset will be realized, a valuation allowance is provided for the excess. Although the Company has significant loss carry forwards available to reduce future income for tax purposes, no amount has been reflected on the balance sheet for deferred income taxes as any deferred tax asset has been fully offset by a valuation allowance.

Use of Estimates

The preparation of the financial statements in conformity with generally accepted accounting principles requires management to make certain estimates and assumptions, where applicable, that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. While actual results could differ from those estimates, management does not expect such variances, if any, to have a material effect on the financial statements.

Research and Development Costs

Research is planned search or critical investigation aimed at discovery of new knowledge with the hope that such knowledge will be useful in developing a new product or service or a new process or technique or in bringing about a significant improvement to an existing product or process. Development is the translation of research findings or other knowledge into a plan or design for a new product or process or for a significant improvement to an existing product or process whether intended for sale or use. It includes the conceptual formulation, design, and testing of product alternatives, construction of prototypes, and operation of pilot plants. It does not include routine or periodic alterations to existing products, production lines, manufacturing processes, and other on-going operations even though those alterations may represent improvements and it does not include market research or market testing activities. Elements of costs shall be identified with research and development activities as follows: The costs of materials and equipment or facilities that are acquired or constructed for research and development activities and that have alternative future uses shall be capitalized as tangible assets when acquired or constructed. The cost of such materials consumed in research and development activities and the depreciation of such equipment or facilities used in those activities are research and development costs. However, the costs of materials, equipment, or facilities that are acquired or constructed for a particular research and development project and that have no alternative future uses and therefore no separate economic values are research and development costs at the time the costs are incurred. Salaries, wages, and other related costs of personnel engaged in research and development activities shall be included in research and development costs. The costs of contract services performed by others in connection with the research and development activities of an enterprise, including research and development conducted by others in behalf of the enterprise, shall be included in research and development costs.

Depreciation

Is computed using the straight-line method over the assets' expected useful lives.

Amortization

Deferred charges are amortized using the straight-line method over six years.

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, deposits in banks with maturities of three months or less, and all highly liquid investments which are unrestricted as to withdrawal or use, and which have original maturities of three months or less.

17

Concentrations of Credit Risk

Financial instruments that subject the Company to concentrations of credit risk consist primarily of cash and cash equivalents. The Company maintains its cash and cash equivalents with high-quality institutions. Deposits held with banks may exceed the amount of insurance provided on such deposits. Generally these deposits may be redeemed upon demand and therefore bear minimal risk.

Fair Value of Financial Instruments

The carrying value of financial instruments including cash and cash equivalents, receivables, accounts payable and accrued expenses, approximates their fair value at December 31, 2007 due to the relatively short-term nature of these instruments.

Supplies

Supplies are experimental materials used for research and development purpose. Actual cost is used to value these materials and supplies.

Valuation of Long-Lived Assets

The Company periodically analyzes its long-lived assets for potential impairment, assessing the appropriateness of lives and recoverability of unamortized balances through measurement of undiscounted operating cash flows on a basis consistent with accounting principles generally accepted in the United States of America.

Intangible and Other Long-Lived Assets, Net

Intangible and other long-lived assets are stated at cost, less accumulated amortization and impairments. The Company periodically analyzes its long-lived assets for potential impairment, assessing the appropriateness of lives and recoverability of unamortized balances through measurement of undiscounted operating cash flows on a basis consistent with accounting principles generally accepted in the United States of America.

Comprehensive Income

Statement of Financial Accounting Standards (SFAS) No. 130, "Reporting Comprehensive Income," establishes standards for reporting and display of comprehensive income, its components and accumulated balances. Comprehensive income as defined includes all changes in equity during a period from non-owner sources. Accumulated comprehensive income, as presented in the accompanying statement of changes in shareholders' equity consists of changes in unrealized gains and losses on foreign currency translation. This comprehensive income is not included in the computation of income tax expense or benefit.

Related Parties

For the purposes of these financial statements, parties are considered to be related if one party has the ability, directly or indirectly, to control the party or exercise significant influence over the party in making financial and operating decisions, or vice versa, or where the Company and the party are subject to common control or common significant influence. Related parties may be individuals or other entities.

Unpaid Capital Contributions

“Unpaid Capital Contributions” are short-term loans to our officers and directors in lieu of salary or other compensation.. These loans are unsecured, bear a 5% interest and have five year repayment term, The total balance of loans to officers and directors was \$125,731 and \$107,396 in 2006 and 2007, respectively.

The Company expects these loans on a rolling basis throughout the term of the five year loans. After deducting re-payments made by the officers, balances were due as of year end 2006 and 2007 as follows:

18

	12/31/06	12/31/07
Ron Carter	75,530.26	49,755.85
Garry Stevenson	27,635.20	28,883.25
Bethiel Tesfasillasi	22,565.55	28,756.29

In the event that the loans are not fully repaid, any shortfall will be recorded as unpaid capital contributions.

Earnings (Loss) Per Common Share

Basic earnings (loss) per common share are computed on the basis of the weighted average number of common shares outstanding during the period.

Diluted earnings (loss) per share are computed on the basis of the weighted average number of common shares and dilutive securities (such as convertible preferred stock) outstanding. Dilutive securities having an anti-dilutive effect on diluted earnings (loss) per share are excluded from the calculation.

Plan of Operation

Our auditors have expressed substantial concern about our ability to continue. Our efforts over the next twelve months will be directed towards identifying licensing opportunities completing the commercialization of the Eyetalk remote network camera video system. We expect to complete the software for the existing applications and explore other potential uses for the technology.

To date we have financed our activities from private placements and loans received from related and non-related parties. Until we begin to generate revenues we expect to continue to rely on loans from our directors and related parties. We will rely on the proceeds obtained by exercise of the warrants, if any, and loans from our officers until we begin to generate revenues. There are no assurances that the Company will receive any proceeds from the exercise of warrants. We have no other sources of capital and there can be no guarantee that the Company will be able to meet its obligations or obtain sufficient capital to complete its plan of operations for the next twelve (12) months. There is no assurance that our officers can or will provide such funds when the need arises. Other than the exercise of the warrants and the oral assurances given by the directors, we have no other sources of capital and there can be no guarantee that the Company will be able to meet its obligations or obtain sufficient capital to complete its plan of operations for the next twelve (12) months.

We hope to complete commercialization during 2008. We have estimated the costs of completion of the commercialization at \$1,382,000. Since there is no assurance that any of the warrants will be exercised the Company has initiated discussions regarding loans through Bank of America and are discussing a \$10,000,000 loan from another funding sources. We expect to continue these discussions in the hopes of arranging financing to continue the commercialization of the Eyetalk and to satisfy the outstanding balances of loans from third parties. We have no assurance that any of these discussion will prove successful. We intend to first emphasize the security applications in institutional and commercial environments, along with medical applications.

To complete commercialization we must complete further product development which will update the software that interfaces the Eyetalk and 3g and 4g cell phones; redesign the hardware so that it has a lid for providing visual assurance of privacy in medical and other sensitive situations; and a conversion kit to convert existing cameras to Eyetalk capability without requiring replacement of the camera. We also need to complete our agreements with potential manufacturers or licensees to create minimum of 10,000 units. If we cannot create a minimum of 10,000 units or more, our costs for each unit will increase substantially.

We expect to accomplish this primarily through our contract with Absolutely New, Inc., a California company that markets new patent applications to a network of large companies internationally. We have paid \$20,000 towards a total fee of \$24,000 for research and identification of companies in their database that they believe may have uses for our technology. We will also pay Absolutely New a commission of 18% for gross revenues received from any agreements brokered by Absolutely New. The Absolutely New agreement expires in July, 2008 but they have indicated that they will continue any negotiations that have commenced prior to that date.

Preliminarily, Absolutely New has identified approximately 20 companies that may be interested in various applications for the technology and has contacted three such companies for discussions in the near future. We will also pay Absolutely New a commission of 18% for gross revenues received from any agreements brokered by Absolutely New. The Absolutely New agreement expires in July, 2008 but they have indicated that they will continue any negotiations that have commenced prior to that date.

We also expect to engage Virsalent, a California company engaged in the business of identifying licensing opportunities. They have identified two companies: Speechphone, Inc. and Apisphere, Inc., both California based companies regarding joint venture applications.

We have also initiated discussions with Orbital Services Corporation, a Nevada company, that manufactures cameras for NASA regarding the design engineering and manufacture of the Eyetalk camera.

Specific implementation methods are expected to be:

- Obtain licensing agreements and joint ventures with prospective manufacturers;
- Present the Eyetalk at industry trade shows;
- Investigate other licensing opportunities;
- Explore and continue talks with Orbital regarding possible manufacturing of the product; and
- Together with Apisphere continue to enhance the software.

We believe these efforts will be sufficient to generate revenues for the Company. We are also exploring possible joint venture or similar arrangements with potential manufacturers. If so, we would reduce our need for the initial expenditures and the delay in commencing operations may be shortened.

Results of Operations

Comparison of Twelve months Periods Ended December 31, 2006 and December 31, 2007

Assets. Assets increased by \$23,120 to \$60,312 as of December 31, 2007, or approximately 62%, from \$37,192 as of December 31, 2006. This increase was primarily due to the increase in Patent from further developments of our Eyetalk Communicator.

Liabilities. Total liabilities decreased by \$17,765 to \$74,225 as of December 31, 2007, or approximately 19%, from \$91,990 as of December 31, 2006. The decrease was due to a reduction in accounts payable.

Stockholders' Equity. Stockholders' equity increased by \$40,885 to \$(13,913) as of December 31, 2007 or approximately 74.6% from \$(54,798) as of December 31, 2006. The increase was due primarily to an increase in additional paid in capital from the private placement memorandum and the re-paid capital contributions. As of December 31, 2006, the company had refunded the investment of two of the original shareholders. Neither were officers, directors or control persons. The total amount refunded was \$9,500. Subsequently, we cancelled 144,000 of their shares, which were representative of their investment.

Liquidity and Capital Resources

General. Our primary sources of cash have been sales of common stock through private placements and loans from affiliates. We are a developmental stage company and we will rely upon more established third party vendors for many aspects of the manufacture, sale and distribution of our product, if it becomes commercially available in this regard we have contracted with Absolutely New, Inc. a California company to identify potential licenses from their database. The agreement with Absolutely New is set to expire in July 2008. Under the agreement, Absolutely New identified approximately twenty companies that it believes have a particular use for the Eyetalk. We do not intend to renew the agreement as we have received the results of their search. We will nonetheless owe Absolutely New twenty percent of any proceeds received as a result of the sale, license, assignment or transfer of the Eyetalk to one of the

identified companies during the term of the agreement. The term will expire on September 28th, 2008. We also initiated discussions with a Nevada company, Orbital Services Corporation, regarding the design engineering and manufacture of the Eytalk camera. We are continuing our discussions but have not reached an agreement with Orbital. We have recently been in contact with another major potential manufacturer and our awaiting proposals from both.

Cash Flows from Operating Activities. Net cash used in operations of \$470,432 for the twelve-months period ended December 31, 2007 was primarily attributable to a net loss of \$455,300. Decrease in unpaid capital contributions of \$18,335 and other income of \$6,196 was recorded in the period ended December 31, 2007. Total expenses of \$461,496 were incurred.

Cash Flows from Investing Activities. Net cash provided by financing activities of \$470,432 for the twelve-months period ended December 31, 2007 was primarily attributable to an increase in paid in capital from a private placement by the company and for services paid for in restricted stock.

Cash Flows from Financing Activities. Net cash of \$19,070 for the twelve-months period ended December 31, 2007 was primarily a result of cash received from the 2007 private placement used to fund operations and a reduction unpaid capital contributions in the amount of \$18,335.

Quarterly Results of Operations

Comparison of Three month Periods Ended March 31, 2007 and March 31, 2008

Operating Expenses Although we have not begun operations, our total operating expenses for the three-month period ended March 31, 2008 increased to \$30,071 from \$20,567 over the prior year period. The overall increase in operating expenses of \$9,504 or 46.2% was due to an increase in professional fees, primarily from consultants we engaged for specific projects and are not ongoing fixed expenses.

Net Loss. Our net loss for the three-month period ended March 31, 2008 increased to \$29,006 from \$19,245 over the prior year period. The overall increase in net loss of \$9,761 or 50.7% was due to an increase in professional fees, primarily from consultants we engaged for limited purposes and whose services are not expected to continue.

Assets. Assets decreased by \$8,233 to \$51,972 as of March 31, 2008, or approximately 13.67%, from \$60,205 as of March 31, 2007. This increase was primarily due to the increase in Patent from further developments of our Eyetyalk Communicator. This more than offset a decrease in cash and cash equivalent balances.

Liabilities. Total liabilities decreased by \$18,206 to \$73,725 as of March 31, 2008, or approximately 9.38%, from \$91,750.87 as of March 31, 2007. The decrease was due to a reduction in accounts payable.

Stockholders' Equity. Stockholders' equity increased by \$9,793 to \$(21,753) as of March 31, 2008 or approximately 31% from \$31,546 as of March 31, 2007. The increase was due primarily to an increase in additional paid in capital from private placements. As of December 31, 2006, the company had refunded the investment of two of the original shareholders. Neither were officers, directors or control persons. The total amount refunded was \$9,500. Subsequently, we cancelled 144,000 of their shares, which were representative of their investment.

Liquidity and Capital Resources

General. Our primary sources of cash have been sales of common stock through private placements. We are a developmental stage company and we will rely upon more established third party vendors for many aspects of the manufacture, sale and distribution of our product, if it becomes commercially available in this regard we have contracted with Absolutely New, Inc. a California company to identify potential licenses from their database. The agreement with Absolutely New is set to expire in July 2008. Under the agreement, Absolutely New identified approximately twenty companies that it believes have a particular use for the Eyetalk. We do not intend to renew the agreement as we have received the results of their search. We will nonetheless owe Absolutely New twenty percent of any proceeds received as a result of the sale, license, assignment or transfer of the Eyetalk to one of the identified companies during the term of the agreement. The term will expire on September 28th, 2008. We also initiated discussions with a Nevada company, Orbital Services Corporation, regarding the design engineering and manufacture of the Eyetalk camera. We are continuing our discussions but have not reached an agreement with Orbital. We have recently been in contact with another major potential manufacturer and our awaiting proposals from both.

Overall, we had a decrease in cash flows of \$17,841 for the three-month period ended March 31, 2008 resulting from \$29,506 cash used in operating activities and \$11,665 of cash provided by investing activities.

Cash Flows from Operating Activities. Net cash used in operating activities of \$17,841 for the three-month period ended March 31, 2008 was primarily attributable to a 62% increase in Professional Fees, from \$16,250 in 2007 to \$26,192 in 2008, This was a contributing factor that lead to a net loss of \$(29,006).

Cash Flows from Investing Activities. Net cash provided by investing activities of \$11,665 for the three-month period ended March 31, 2008 was primarily attributable to an investment in patents of (\$9,501) and a decrease in unpaid capital contributions of \$21,166.

Cash Flows from Financing Activities. Net cash of \$1,229 for the three-month period ended March 31, 2008 was primarily a result of cash used to fund operations offset by a repayment of capital contributions by \$21,166.

Business

We are a development stage company with no history of revenues. The Company was incorporated as a Nevada corporation on February 28, 2005 to reincorporate and re-domesticate two existing North Carolina entities: Revolutionary Concepts, Inc. and DVMS, LLC. The business intends to develop and market a system by which a property owner can remotely identify persons at the entrances to their home or business.

Our efforts to date have been devoted establishing a video remote monitoring system that permits interactive two way communications called the Eyetalk Communicator (“EYETALK”.) We have engaged a design engineering firm to prepare a prototype product and we have obtained a patent of certain technology. Since the implementation of the product is dependent on various other technologies that will continue to evolve, the Company will likely require a continuous program of updating.

We have funded our development through two private offerings in 2005 and 2007 and obtaining loans from related parties. We also borrowed \$306,000 from four non-related parties at 4% interest which begin to come due in October, 2008. These promissory notes were secured by a pledge of up to 612,000 shares of restricted common stock from our authorized but unissued shares. If we are unable to pay according to the terms of the notes or successfully renegotiate the notes, we must issue shares to the noteholders. We have engaged third parties to assist in the commercialization of the Eyetalk and have made partial payments, but we will require the proceeds from the exercise of the warrants to complete those agreements. There is no assurance that this approach will successfully commercialize the product even if we make all required payments.

Since there is no assurance that any of the warrants will be exercised the company has initiated discussions regarding loans through Bank of America and several other funding sources. We expect to continue these discussions in the hopes of arranging financing to continue the commercialization of the Eyetalk and to satisfy the outstanding balances of loans from third parties. We have no assurance that any of these discussions will prove successful.

We have also attended a mediation settlement conference in our ongoing action for damages against our prior patent attorneys. The presiding judge has asked both sides to prepare affidavits of certain costs and has indicated that he expects the case to resolve or go to trial by the end of the year. While we believe our claims are meritorious any recovery is subject to the uncertainties associated with any litigation and we can offer no assurance that we can ultimately receive any recovery

Introduction to the Eyetalk Communicator

We have designed and patented a communications and monitoring system, which we expect to give homeowners and business owners the ability to remotely and interactively communicate with and have control of the entry points of their homes and businesses.

The EYETALK is primarily a software platform with a hardware component of an external unit deployed at the specified property. The system communicates to the property owner, and also retrieves and stores information via any commercially available Personal Data Assistant (“PDA”), Handheld Computer (“HC”) and cellular telephone. The EYETALK software platform will be able to communicate with any of the devices commonly available to a modern

user.

The EYETALK allows seamless communication to the entry points of a specific building, allowing the premise owners to interact remotely with visitors to the home or building via any common personal communication device with the benefit of audio, video and data communication. The system utilizes new technology to synergistically improve messaging, communication, and security; therefore the system enhances and personalizes the overall process of receiving a visitor.

.According to USBX, “iSuppli, a respected technology market research firm, announced this quarter that they project IP video surveillance camera revenue to grow to more than \$9.0 billion by 2011, a compound annual grown rate of 13.2%”Price declines from competitive systems have improved the viability of enhanced security systems while boosting the affordability and demand for basic security systems among families in the middle to lower-middle income strata of society

22

Management believes that The EYETALK technology may fill technology gap related to false alarms in the security monitoring industry. Some police departments are not required to respond to calls from alarm companies unless an emergency has been visually verified. Traditional security monitoring companies rarely offer visual verification and therefore cannot visually ascertain that the signal is not a false alarm.

The EYETALK also records visitors through data, video and audio records. The system provides a centralized control system using a user-friendly application with a means for storing digital images and provides enhanced security features.

The EYETALK does not require wiring from the exterior of the building to its interior. The Company believes that the system, when fully implemented, will be relatively inexpensive to install and maintain.

The Company expects The EYETALK to provide three Primary benefits:

Protection – The EYETALK may augment the capabilities of current residential and commercial security monitoring systems through audio, video and data communication which are interactive and which can be used on a remote basis.

Monitoring – The EYETALK may allow the homeowner to better facilitate the task of home management in non-threatening circumstances, such as latch key school children. allowing the owner to maintain better control and understanding of what is going on at one’s home

Convenience – The EYETALK may add convenience to home and business owners, providing remote access, screening of visitors and acceptance and monitoring of packages.

The EYETALK has four distinct physical parts:

- o an internal unit(s) (the ‘Indoor Mobile Monitor’)
- o an external unit(s) (the ‘Welcome System’)
- o a Central Application Server which may be a home personal computer (“PC”)
- o a remote access device, typically a standard cellular telephone (‘Phone GUI Emulator’)

The system is expandable to include multiple peripheral devices. The main components of the system (the Indoor Mobile Monitor, the Welcome System and the Central Application Server) communicate with each other by way of RF communications using 802.11b or higher wireless LAN. The Central Application Server will communicate with the remote access device by way of a dial-up modem connection, DSL, cable modem or other Internet-compatible method of communication.

INDUSTRY

The United States security services have generally divided the market into the following segments: security officer and investigation services, armored car services, monitoring services, and consulting. Security officer and investigation services are the oldest and largest segment of the security industry.

According to the USBX 2006 Year End Security Update the network camera video segment of the security industry is valued at \$7 Billion annually and has experienced a 20% annual growth rate. While noting that the public market support for the segment has remained strong and actually led all security industry segments in 2007, hardware and software costs have shrunk which has pressured margins in the industry. According to USBX, “iSuppli, a respected technology market research firm, announced this quarter that they project IP video surveillance camera revenue to grow to more than \$9.0 billion by 2011, a compound annual grown rate of 13.2%”

The report notes that each vertical market has differing applications but banking, gaming and inventory control are the premier growth applications. An estimated \$45 billion annually is lost in inventory shrinkage and bank fraud and network camera video is often at the forefront of industry efforts.

USBX also published a separate “white paper” in 2006 entitled “The Security Killer App: Intelligent Video Surveillance.” The white paper cites John Chambers, CEO of Cisco Systems and notes major contracts including \$255 Million from Lockheed Martin for video of New York City subways and \$2.5 Billion from Boeing to secure U. S. borders. The paper focuses on quickly developing vertical markets for intelligent video in retail, banking and financial and public safety and transit sectors.

Management believes that the Eyetalk technology significantly differs from existing systems. The Eyetalk allows two way communication via a wireless network camera that communicates with a variety of other remote communication devices such as cell phones, PDAs, smart phones, computers, security and video monitoring devices. Due to its software interface the Eyetalk can be used to greet visitors, provide instructions to delivery personnel, interact between remote staff and patients in medical settings, as well as in security applications.

Further, the Eyetalk allows security owners monitoring personnel to more accurately recognize and address the threat presented as well as verifying a true threat. We believe this will relieve the large number of false alarm security calls and unneeded emergency personnel visits. Unlike many competitors the Eyetalk system is not dependent on the internet although it can use the internet as a platform.

The communication can be initiated by a broad array of technologies, such as doorbells, glass breakage, heat or motion detectors, weapons detectors, biometric signaling or volutarily. The Eyetalk is programmed to manage certain of these events with standard greetings, identifications, commands, or directions. The Eyetalk can then notify designated personnel and the system of the triggering event, sending images of the current situation and permitting audible response.

We expect to compete by emphasizing the unique aspects of the Eyetalk in our marketing directly to distributors and end users, including those identified under our agreement with Absolutely New. We will concentrate on 5 identified distributors in Europe and 3 identified distributors in the United States. We also intend to compete by direct contact with larger end users such as hospitals, banks, and government agencies concerned with homeland security.

Future Plans and Potential Markets

We believe we have the capability to enter into a growing security marketplace. We are hopeful that the security industry will continue to experience increased spending on detection devices such as the Eyetalk for the residential, commercial and homeland security markets.

We have engaged marketing consultants to help us identify companies that may have immediate uses for our technology. We hope to establish isolate the factors that each of these potential customers may find advantageous. While we currently lack a sales staff, our management team is prepared to serve in that capacity until revenues commence.

While many of these companies have security applications, we also believe the Eyetalk has advantages over existing and competing technologies. Many of these applications may not relate to the security field at all, but may nonetheless be commercially useful. The additional commercial benefits of the EYETALK include:

- o monitors appointments
- o monitors deliveries
- o records employee arrivals and departures
- o provides remote access
- o provides a database of activity to and from the facility

We also expect to identify companies that may be interested in licensing arrangements for sales to consumers. We believe the Eyetalk Communicator provide consumers with the functions and features that are superior to those currently available and offered by competitors. These include:

- o allows the occupant to view, record or respond to visitors or guests without opening the door or even being in the home
- o

detects a visitor, providing a measure of convenience to guests who no longer need to search for and activate a doorbell button

- o allows remote access to visitors by the owner/occupant of the building
- o allows deliveries to be made and monitored while the owner of the home is away from the premises
- o detects intruders, allowing for an immediate response from the property owner

- o serves as a deterrent to criminals whose entry can be chronicled by the system and who cannot determine if persons are at home or not because of the nature of the remote interaction system.
- ofunctions as a recordkeeping database of all visitors to the home, welcomed or un-welcomed, with date, time and photographic records.
- o alerts the owner of a power outage at the facility.

We plan to use the following business development strategies:

- 1) Move forward with our consultant Absolutely New to identify and then contact companies in their database that meet the predetermined parameters that we believe demonstrate a need for the EYETALK.
- 2) Move forward in our discussions with our consultant Virsalent to identify and then contact companies in their database that meet the predetermined parameters that we believe demonstrate a potential for licensure of the EYETALK.
- 3) Continue our discussions with Orbital Services Corporation and others regarding the manufacture of the EYETALK.
- 4) Use internal contacts in the local medical community to negotiate placement in hospitals, recovery rooms and other medical applications.
- 5) Arrange a schedule of appearances at security industry trade shows and presentations to trade groups

Patent and Intellectual Property

On March 20, 2007, the United States Patent and Trademark Office issued to the Company a patent, number 7,193,644 B2. The patent abstract states:

“The invention is audio-video communication and answering system that synergistically improves communication between an exterior and an interior of a business or residence and a remote location, enables messages to be stored and accessed from both locally and remotely, and enables viewing, listening, and recording from a remote location. The system's properties make it particularly suitable as a sophisticated door answering-messaging system. The system has a DVMS module on the exterior. The DVMS module has a proximity sensor, a video camera, a microphone, a speaker, an RF transmitter, and an RF receiver. The system also has a computerized controller with a graphic user interface DVMS database application. The computerized controller is in communication with a public switching telephone network, and an RF switching device. The RF switching device enables communication between the DVMS module and the computerized controller. The RF switching device can be in communication with the other RF devices, such as a cell phone, PDA, or computer.”

A complete copy of the patent is on file at the Company's offices and can be inspected.

In March, 2007 we commenced a lawsuit in the Superior Courts of Mecklenburg County, North Carolina against our prior patent attorneys. Our lawsuit alleges that we retained these attorneys and requested that they file a Non-publication Request (“the Request”) pursuant to 35 U.S.C. § 122, in order to ensure that the Application would not be published by the United States Patent & Trademark Office (“USPTO”) until issued as a patent. The lawsuit further alleges that the attorneys failed to file the Request.

The purpose of the Request was for international patent rights under procedures established by the Patent Cooperation Treaty and U.S. law implementing that treaty. By virtue of the publication of the Application in the United States without the filing of a corresponding PCT or other foreign application relating back to a date before the date of publication, one or more requirements of patentability in certain advantageous foreign jurisdictions, including the European Union, Japan, and others, to wit the absolute public novelty of the invention, can no longer be fulfilled by the Company.

We believe our claims have merit in the lawsuit. We are unable to determine what rights we may still have, if any, to patent or intellectual property protection in other jurisdictions.

COMPETITION

We expect to compete with much larger and better financed companies in the remote monitoring industry, all of which have superior name recognition, such as ADT, ATT, Pinkerton's and others.

Remote monitoring is available through a variety of media and processes, including systems integrators, closed circuit television systems, intrusion detection systems, and others. These systems typically incorporate ultrasonic, infrared, vibration, microwave and other sensors to detect door and window openings, glass breakage, vibration, motion, temperature, and noise and transmit through alarms and other peripheral equipment.

For example, the ATT remote monitor integrates with Cingular and Yahoo through cell phones and wireless internet. The user can remotely select the device and determine whether notification will be triggered by door sensors, motion sensors, temperature sensors or a combination. The user can remotely control cameras with pan, tilt and zoom features. The user can download and record or view live camera.

Industry analysts report that both Cysco and IBM are developing new hardware and software applications for remote monitoring that, if successful, could have profound implications for the industry.

REGULATION

We are subject to the same federal, state and local laws as other companies conducting business in the software field. Our products are subject to copyright laws. We may become the subject of infringement claims or legal proceedings by third parties with respect to our current or future products. In addition, we may initiate claims or litigation against third parties for infringement of our proprietary rights, or to establish the validity of our proprietary rights. Any such claims could be time-consuming, divert management from our daily operations, result in litigation, cause product delays or lead us to enter into royalty or licensing agreements rather than disputing the merits of such claims. Moreover, an adverse outcome in litigation or a similar adversarial proceedings could subject us to significant liabilities to third parties, require the expenditure of significant resources to develop non-infringing products, require disputed rights to be licensed from others or require us to cease the marketing or use of certain products, any of which could have a material adverse effect on our business and operating results.

LEGAL PROCEEDINGS

In early 2007 we commenced a civil action in the Superior Courts of Mecklenburg County, North Carolina against our prior patent attorneys alleging professional malpractice and other theories. Under North Carolina law we are not permitted to demand an amount other than “in excess of \$10,000.” Our current counsel believes that our claims are meritorious. We are not party to any other pending or threatened legal proceedings. In addition, our officers, directors or beneficial owners are not involved in any legal proceedings.

DIRECTORS, EXECUTIVE OFFICERS, PROMOTERS, AND CONTROL PERSONS

Directors and Executive Officers.

Name	Age	Title
Ron Carter	53	Founder, President, CEO, Director
Garry Stevenson	57	Vice President, Director
Bethiel Tesfasillasi	34	Vice President of Corporate Relations

Our Bylaws provide that we shall have that number of directors determined by the majority vote of the board of directors. Currently we have two directors. Each director will serve until our next annual shareholder meeting. Directors are elected for one-year terms. Our Board of Directors elects our officers at the regular annual meeting of the Board of Directors following the annual meeting of shareholders. Vacancies may be filled by a majority vote of the remaining directors then in office. Our directors and executive officers are as follows:

Ron Carter – Founder, President, CEO and Director

Mr. Carter is the inventor of the EYETALK. He is a North Carolina native, married with three children. As a career government employee, Mr. Carter has been responsible for housing code, planning and development in several metropolitan areas in North Carolina. Mr. Carter formerly worked from the City of Charlotte as the Chief Housing Development Specialist from 1995 until 2004. Prior to this position, Mr. Carter was served as the Housing Rehabilitation Supervisor in Winston-Salem, NC.

Mr. Carter is a graduate of North Carolina A&T State University in Greensboro, where he earned a BA degree in Political Science. He is the 1988 recipient of the President's Award presented by the North Carolina Section 8 Housing Association. He also founded the Professional Housing Rehabilitation Association of North Carolina Housing and served as Chairman of Education and Training for the NC Community Development Association.

Garry Stevenson – Vice President, Director

Mr. Stevenson is a successful and proven entrepreneur. He has been the owner and CEO of Body Image, LLC, a fitness center for women and Point of Love and Grace Inc. of Shelby, NC, a group home for boys, since 2000. Mr. Stevenson has over thirty years of corporate experience; he served as Senior Vice President of World Connect Communications from 1997 until 2003. He worked for twenty-five years in corporate management as Division Manager at United Parcel Service where he retired in 1997.

Mr. Stevenson received a Juris Doctor Degree from North Carolina Central University School of Law in 1976. He is married and the father of three children.

Bethiel Tesfasillasie – Vice President of Corporate Relations

Ms. Tesfasillasie is an established professional. Ms. Tesfasillasie became the youngest vice president at World Connect Communications from 1999 until 2001. She also had a successful career as a Quality Inspector Technician for IBM from 1994 to 1998. From 2001 and 2003 she was in the sales and accounting department of a local car dealer. Ms. Tesfasillasie became a licensed real estate agent in 2003 and continues her real estate from time to time.

Ms. Tesfasillasie was born in East Africa and moved to the United States with her family when she was eleven years old. She was raised in Charlotte, NC and attended the Charlotte-Mecklenburg public schools. Ms. Tesfasillasie graduated from West Charlotte High School and received her Bachelors Degree in Chemistry from University of North Carolina at Charlotte.

Ms. Tesfaillasie is a Board Member of the Charlotte Black Chamber of Commerce and speaks four languages. In 2001, Ms. Tesfaillasie filed for protection from creditors under a chapter of the U. S. Bankruptcy Code which was discharged and closed in 2005.

Principal Shareholders

The following table contains certain information as of March 31, 2008 as to the number of shares of Common Stock beneficially owned by (i) each person known by the Company to own beneficially more than 5% of the Company's Common Stock, (ii) each person who is a Director of the Company, (iii) all persons as a group who are Directors and Officers of the Company, and as to the percentage of the outstanding shares held by them on such dates and as adjusted to give effect to this Offering.

Name and Position	Shares	Current Percentage	After Offering Percentage
Ron Carter			
President/CEO Director	10,509,200	.5586	.5050
Garry Stevenson Director	2,054,000	.1092	.0987
Bethiel Tesfasillasie	434,800	.0231	.0209
Totals	12,998,000	69.09%	62.46%

Executive Compensation

No compensation was awarded to or paid to any executive officer or director of the Company during the years 2007, 2006, and 2005.

The following table and the accompanying notes provide summary information for each of the last three fiscal years concerning cash and non-cash compensation paid or accrued.

Summary Compensation Table

Name And Principal Position	Year	Non-Equity					All Other Compensation (\$)	Total (\$)
		Salary (\$)	Bonus (\$)	Stock Awards (\$)	Option Awards (\$)	Incentive Plan Compensation (\$)		
Ronald Carter <i>Chairman of Board And CEO</i>	2004	0	0	0	0	0	0	0
	2005	0	0	0	0	0	0	0
	2006	0	0	0	0	0	0	0

	2008	0	0	0	0	0	0	0
Bethiel Tefasillasie	2004	0	0	0	0	0	0	0
	2005	0	0	0	0	0	0	0
	2006	0	0	0	0	0	0	0
	2007	0	0	0	0	0	0	0
	2008	0	0	0	0	0	0	0

The officers have taken no salary but have taken loans to our officers and directors in lieu of salary or other compensation.. These loans are unsecured, bear a 5% interest and have five year repayment term, The total balance of loans to officers and directors was \$125,731 and \$107,396 in 2006 and 2007, respectively and have been recorded as “Unpaid Capital Contributions”.

The Company expects these loans to be repaid on a rolling basis throughout the term of the five year loans. After subtracting re-payments made, the following balances were owed as of year end 2006 and 2007.

	12/31/06	12/31/07
Ron Carter	75,530.26	49,755.85
Garry Stevenson	27,635.20	28,883.25
Bethiel Tefasillasie	22,565.55	28,756.29

In the event that the loans are not fully repaid, any shortfall will be expensed as salary to the officers. We do not consider these advances to be management compensation, but we have been advised by tax counsel that there is a possibility that the Internal Revenue Service may disagree with our position, in which case we will be required to book the advances as compensation and will owe applicable taxes on the entire amounts, together with possible penalties and interest.

CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

On January 19, 2005, we entered into a Consulting Services Agreement with Sedgefield Capital Corporation, a North Carolina management consultant firm. Sedgefield agreed to provide a range of advisory services including services related to payments of the preparation of a suitable private placement and a follow on registration statement seeking to register the shares sold in the 2005 private placement. Among other things, Sedgefield agreed to assist the company in selecting securities counsel, auditors, transfer agents, edgarizing service providers, provide assistance in the selection of accounting services. They have also introduced the company to strategic partners for marketing, public relations and distribution.

We have paid Sedgefield \$150,000 and 670,00 restricted common shares, to date under the Agreement. Sedgefield owns approximately 3.6% of the issued and outstanding shares of the Company. These fees were to cover the costs of legal and audit expenses in connection with the public offering, initial listing in a recognized securities manual such as Standard & Poors or Mergent, registration fees and costs, costs of "edgarization" and other services required for effectiveness. For a more complete discussion please see the section entitled March 2005 Private Placement elsewhere in this Memorandum.

In June 2007, we agreed to enter into a six month extension of the services provided by Sedgefield for a fee of \$20,000. The agreement is renewable in six month terms, thereafter.

We are currently a party to a consulting agreement with Sedgefield Capital Corporation under which Sedgefield has agreed to provide a variety of services, including services pertaining to services ancillary to this offering. Sedgefield will negotiate with, contract for and pay for services such as appointment of transfer agents, investment relations firms, listings in Standard & Poor's, Mergent, and prepare materials and attend meetings, roadshows and consultations with brokers and other industry professionals. A significant portion of these services will continue at least for some time after the effectiveness of this offering. The Company expects that it will negotiate a new agreement with Sedgefield at the conclusion of the current agreement but there have been no discussions thus far. We are therefore unable to determine whether there will be any further agreement or any fees payable for additional services.

Unpaid Capital Contributions

As of December 31, 2006, the Company had Loans to Shareholders of approximately \$125,731 to its officers and directors. As of December 31, 2007, the outstanding loans were \$107,396. The advances carry an interest rate of 5% and have been recorded as "Unpaid Capital Contributions".

As of December 31, 2007 the Company mutually terminated a marketing and public relations agreement with Red Moon Marketing, Inc. and NexCom, both of Charlotte, North Carolina. These agreements involved marketing to a specific Fortune 1000 company, but discussions with that company ended in 2007. The company paid \$83,580.10 to NexCom along with 56,000 shares of restricted common stock and \$50,000 to Red Moon and 87,500 shares of restricted common stock. Red Moon created the website for the company and provided certain maintenance and upgrades during the existence of their agreement. NexCom made introductions to Motorola Corporation to enter into a joint venture or similar manufacturing and marketing agreement. NexCom continued discussions on our behalf and believed them to be successful until Motorola decided to completely exit the security monitoring space to focus on core needs. Shortly thereafter we terminated the agreement with NexCom.

Stock Option Agreements

The Company has not entered into stock option agreements with the any individuals or companies. The management does anticipate that to secure the services of certain prospective employee that a stock option plan will need to be effective in the very near future. The company anticipates that such a plan would allow for options at competitive

market rates.

SELLING SHAREHOLDERS

The following table presents information regarding the selling shareholders. Unless otherwise noted, the shares listed below represent the shares that each selling shareholder beneficially owned on December 31, 2007.

We are registering the above-referenced shares to permit each of the selling shareholders and their pledges, donees, transferees or other successors-in-interest that receive their shares from the selling shareholders as a gift, partnership distribution or other non-sale related transfer after the date of this prospectus to resell the shares.

29

Unless otherwise noted, the following table sets forth the name of each selling shareholder, the number of shares owned by each of the selling shareholders as of December 31, 2007, the number of shares that may be offered under this prospectus and the number of shares of our common stock owned by the selling shareholders after this offering is completed, assuming all of the shares being offered are sold. Except as otherwise disclosed below, none of the selling shareholders has, or within the past three years has had, any position, office or other material relationship with us. The number of shares in the column "Shares Offered" represents all of the shares that a selling shareholder may offer under this prospectus.

Beneficial ownership is determined in accordance with Rule 13d-3(d) promulgated by the SEC under the Exchange Act. The percentages of shares beneficially owned are based 20,811,700 shares of our common stock outstanding as of December 31, 2007, including the warrant shares beneficially owned by the respective selling shareholder, as set forth in the following table and more fully described in the applicable footnotes.

Name of Selling Shareholder	Units Beneficially Owned Before the Offering	Shares Beneficially Owned Before the Offering	Percentage of Shares Outstanding Before the Offering		Shares Beneficially Owned After the Offering	Percentage of Shares Beneficially Owned After the Offering
			Before the Offering	Being Offered
