CREDICORP Ltd. Reports Second Quarter 2008 Earnings

Lima, Peru, August 6, 2008 - Credicorp (NYSE:BAP) announced today its unaudited results for the second quarter of 2008. These results are reported on a consolidated basis in accordance with IFRS in nominal U.S. Dollars.

HIGHLIGHTS

- The continuing strong currency volatility impacted once again Credicorp's results, though this time a currency translation loss was reported as the USD/Soles exchange rate bounced back, leading to a bottom line net income of US\$ 73.7 million.
- Focusing on recurrent income and thus excluding such translation gains or losses, Credicorp's results show an extraordinary 23.7% QoQ earnings growth to US\$ 135.2 million vs. US\$ 109 million the previous quarter, reflecting the continuing strong growth and income generation of Credicorp's core businesses.
- Such unexpectedly high income volatility is a direct result of the unusually high currency fluctuation experienced locally during this first semester, and the net currency exposure held at each point in time and which is an intrinsic part of our business in a dual currency financial market. Thus, a significant currency translation loss of US\$ 61.5 million was reported this 2Q08 while a gain of US\$ 68.7 million was reported in 1Q08.
- Loan growth reported by the banking business continued strong, revealing a 4.3% QoQ net loan portfolio growth. In fact, retail and SME loan growth is still very strong at 11.4% QoQ growth for the local currency portfolio and 3 % for the USD portfolio.
- Interest income was even stronger with a robust 13.4% QoQ growth, led not only by higher interest income from loans, but also strong dividend income.
- NIM improves 30 b.p. as the result of higher interest and dividend income at Credicorp's subsidiaries other than BCP, since NIM at BCP remains flat.
- Non financial income shows a QoQ drop mainly related to less gain on the sale of securities which last quarter included large proceeds of the sale of Visa shares. In fact, fee income remained strong and 53% higher FX-transactions' gains were reached given the strong FX-activity as a result of the high currency exchange volatility.
- Loan portfolio quality improved further reaching a PDL/Loans ratio of only 0.75%. Net provisioning also dropped 43% QoQ to US\$ 9.2 million given the high coverage ratios and 2.7% QoQ drop in the absolute volume of past due loans.
- BCP's consolidated numbers reflect a very healthy and dynamic banking environment with core revenues up 12% QoQ and 38.1% for the year. Such improved income combined with controlled operating expenses, led to an excellent operating performance with net income, before the currency translation effect reaching US\$ 127.9 million, 17.8% higher from the US\$ 108.5 million reported in 1Q08.
- BCP Bolivia, which is consolidated in BCP, continues its consistent growth and reports a strong, though slightly lower contribution of US\$ 10 million for 2Q08, 4% lower QoQ and 84% higher YoY.
- ASHC remains a stable business and reports also a strong, though 8% lower contribution this quarter of US\$ 5.2 million.
- PPS, remains troubled by its property and casualty business, which added to higher reserves at its Life and Health businesses and also an important translation loss resulted in a significant loss contribution for this 2Q08 of US\$ -7.2 million.
- Finally, Prima AFP reports growth of its business and good though lower operating results, but also a translation effect which after having boosted results for 1Q08, led to a loss for 2Q08 of US\$

0.95 million.

- Credicorp's performance is however better reflected by 1H08 results, since the currency translation effects are netted out and neutralized in the course of the semester, leaving the pure commercial results: 58% higher income contribution from BCP, 100% higher income generation at BCP Bolivia, 16% higher income at ASHC, US\$ 8 million income contribution from Prima (vs. US\$ 1.7 million loss in 1H07), i.e.: earnings generation growth in all businesses except its insurance business which remains today the only problem to solve. This led to the outstanding total net income of US\$ 251.6 million for the first half of the year and 28.3% ROAE.
-

I. Credicorp Ltd.

Overview

The continuing strong currency volatility experienced in the second quarter impacted once again Credicorp results, though this time a currency translation loss was reported as the USD/Soles exchange rate bounced back, leading to a bottom line net income of US\$ 73.7 million compared to US\$ 178 million reported for the 1Q08.

Such unexpectedly high income volatility is a direct result of two things: (1) the unusually high currency fluctuation experienced in the local market during this first semester, fueled by the US Dollar weakness in the international markets and some speculative activity based on the strengthening of the local currency, and (2) the natural currency exposure through net balance sheet positions either in Soles or Dollars which is an intrinsic part of our business in a dual currency financial market. Thus, as a result of these two factors, a significant currency translation loss of US\$ 61.5 million was reported this 2Q08 while a gain of US\$ 68.7 million was reported in 1Q08. Significantly different (basically opposite) results were reported in local currency accounting, where the currency movements generate the contrary effect each time. Therefore, it is very important to understand, that given the dual currency financial market in which we operate, the calculated management of the currency positions is crucial for our business and the decisions are aimed at either increasing gains or minimizing losses, following a consensus view of the currency exchange rate for the future. Nevertheless, we should keep in mind the volatile source and nature of these gains/losses, which can be equally reverted with changing market conditions given the highly uncertain markets.

Therefore, excluding such currency translation gains or losses and focusing on recurrent income, Credicorp's results show a strong 23.7% QoQ earnings growth to US\$ 135.2 million vs. US\$ 109 million the previous quarter, reflecting the continuing strong growth and income generation of Credicorp's core businesses. The following chart isolates such translation results, which reflect an environment with an appreciation trend for the local currency generating gains in US Dollar accounting, and which have only become extremely volatile this year as speculation drove the exchange rate and we took a view on the long term appreciation of the Nuevos Soles.

Credicorp's excellent core business performance is better appreciated when looking at our accumulated 6 month results, which reflect results clean of the translation impact as they became almost fully neutralized throughout the semester. Thus, net income for 1H08 reached an outstanding US\$ 251.7 million, reflecting a 51% higher income from the previous year and a ROAE of 28.3%, outperforming all expectations.

Continuing with this approach and excluding such currency translation distortions, Credicorp's core banking business reported a strong performance, with total loan balances reaching 4.1% QoQ growth. Though slightly understated this time by the devaluation of the Soles loan portfolio, loan growth was fueled mainly by the strong retail segment, while a slowdown of local investment activity led to a flat corporate loan book.

Employees	18,169	17,275			

*The old methodology for the calculation of NIM considered only 70% of the investments available for sale as part of interest earning assets.

**The new methodology for the calculation of NIM considers 100% of the investments available for sale as interest earning assets.

NII outperformed this robust loan growth and reached 13.4% QoQ expansion despite the persistent competition and pressure on rates and supported by our expanding interest earning assets through larger investments (incl. Central Bank CD's and bank deposits).

Net interest margin also improves 30 b.p. which stems from a solid though flat net interest margin at BCP, and stronger interest income from other investments at Credicorp. This improvement is reflected by Credicorp's NIM

reaching 5.4% from 5.1% based on the calculation approach used up to date. However, for transparency reasons, we have standardized our NIM calculation methodology, which used to ponder a percentage of interest earnings assets available for sale into the formula, whereas it seemed to be a standard procedure to include ALL interest earning assets into this calculation, which is what we have adopted as of this quarter. Thus the equivalent calculations of NIM result in 4.8% for 2Q08 vs. 4.5% for 1Q08 and 4.9% for 2Q07.

Non Financial income reported an 8% QoQ drop mainly because the previous 1Q08 included relatively large extraordinary one-off gains realized through the sale of Credicorp's VISA shareholding and also poor results in securities trading. In fact, fee income remained fairly strong though flat, while net gains on FX-transactions was up 53% QoQ given the strong FX-transactional activity fueled by the high volatility of the currency markets.

Though the insurance business reports a good quarterly net premiums growth of 9%, claims in the property and casualty sector continued too high this quarter due to the weather alterations which led to extremely strong torrential rains affecting the northern areas of the country, resulting in 56% higher claims. Life and Health businesses also reported higher provisioning for different though mainly conservative reasons, which led to lower results in the Life business and a loss for the quarter in the Health business. Thus, the insurance business operating income dropped 76%, leading to negative bottom line results.

On the cost side, total operating costs were up by a moderate 4% QoQ resulting in an improved efficiency ratio of 37.3% vs. 40.2% the previous quarter and 46.2% at 2007 year end. Such development is a reflection of a good cost control policy and some seasonality in costs. Having said this, we would like to point out that the expansion plans do continue full speed ahead and are a core part of Credicorp's business strategy, and their impact on costs will be more noticeable in the second half of the year.

Another positive development is the continuing strength of portfolio quality, which remains healthy with a PDL/Loans ratio improving further to 0.75% from 0.8% last 1Q08. Total provisions net of recoveries also lowered to US\$ 9.2 million from US\$ 16.1 million last quarter, following a drop in the absolute volumes of past due loans and high coverage levels reached. Despite this, we still follow today a more conservative provisioning policy for our retail portfolio, increasing the internal minimum provisioning requirements in line with a more sophisticated risk assessment methodology.

These developments resulted in a somewhat distorted ROAE ratio for the quarter as in the previous quarter: 16.18% for 2Q08, 40.4% for 1Q08 and 22.9% for 4Q07. Adjusting this ROAE excluding the translation impact on income, the numbers would show a more stable evolution: 29.7% for 2Q08, 24.8% for 1Q08 and 23.2% for 2Q07. More importantly, ROAE for the 1H08 reaches this way 28.3%.

Credicorp – the Sum of its Parts

As we have experienced, going through a period of significant volatility can impact results in many different ways. The management of this volatility requires a series of timely financial decisions regarding our currency positions and investments in the different subsidiaries, and is an integral part of our business. Therefore, we are very pleased to see our real performance show once such impact has been fully neutralized, as has happened by the end of the 2Q08.

In fact, BCP reported a significantly depressed income contribution this 2Q08 of US\$ 75.98 million, which included an approximate US\$ 49.85 million translation loss, though revealing at the same time excellent core business expansion when excluding such translation loss, and confirming this way its expanding earnings generation capacity. This becomes clear when looking at BCP's 1H08 superb contributions to Credicorp's earnings of US\$ 237.3 million, which reflects real business results given that the currency translation effect gets almost totally neutralized in the 2Q08. These earnings for the 1H08 represent a boost of ROAE to 42.15%, a truly extraordinary number.

(US\$ Thousands)	2Q08	1Q08	2Q07	2Q08/2Q07	2Q08/1Q08	Jun 08	Jun 07	Jun 08/ Jun 07

Edgar Filing: CREDICORP LTD - Form 6-K

- (1) Includes Banco de Crédito de Bolivia.
- (2) Includes Grupo Crédito, Servicorp and Prima AFP
- (3) Includes taxes on BCP's and PPS's dividends, and other expenses at the holding company level.

BCP Bolivia, which is consolidated within BCP, reported a contribution of US\$ 10 million for 2Q08, maintaining its high level despite a significant stagnation of investment activity in the country, which should eventually generate a notorious slowdown, reaching this way a total of US\$ 20.5 million contribution for the 1H08.

4

ASHC reports a contribution drop of 8% QoQ reaching US\$ 5.2 million for the 2Q08, but on a cumulative basis reports a 16% stronger earnings contribution of US\$ 10.9 million for the period. Despite this 2Q08 blip, ASHC's business is constantly expanding as a result also of the increasing wealth generation in the country, and represents a stable, no-risk investment.

As explained before, though the insurance business reports a good quarterly net premiums growth of 9%, claims in the property and casualty sector continued growing this quarter due to the weather alterations affecting the northern areas of the country with torrential rains. Further, the Life and Health businesses had strong increases in reserves, which added to the translations effects resulted in lower income at the Life business and a loss at the Health business. The combined impact of all these events led to the poor results and loss contribution to Credicorp of US\$ -7.2 million for the quarter. This resulted in a US\$ -4.9 million loss contribution for the 1H08. Thus, turning the P&C business into a profitable operation continues being PPS's main focus, though it is proving to be troublesome. Following this objective, significant efforts are being made to develop the more massive and better predictable retail business and limit exposure to the wholesale insurance P&C business, as well as to improve the financial investment management to achieve better returns overall. This process will take more time than expected.

Finally, Prima's business results were in line with expectations showing good operating profits, but the currency translation effect which improved Prima's results in 1Q08, depressed its results this 2Q08 leading to a bottom line loss of US\$ -0.95 million. Again, the dual currency market, the FX-volatility of the first half of 2008 and our US Dollar reporting generates such translation gains / losses. Net of these, 1H08 results for Prima reflect its performance more accurately, with a US\$ 8 million earnings contribution to Credicorp for this 1H08. Prima's business results are in fact better than expected following the cost reduction efforts of last year and business plan. Prima has established a dominant position in the market, capturing important market shares (31.4% of AuM, 33.7% of collections and 47.2% of voluntary contributions to the funds).

II. Banco de Crédito – BCP Consolidated

Summary 2Q08

Consolidated results for BCP this 2Q08 revealed an extraordinarily strong 17.8% QoQ growth of BCP's net profits before the currency translations effect in 2Q08 reaching US\$127.9 million, compared to US\$108.5 million in 1Q08, continuing this way its expansion in assets and earnings generation.

However, as explained in the Credicorp section, the strong currency volatility experienced in the last 2 quarters impacted all our businesses' reported results given our dual currency economy and resulting net currency positions. Thus, while in the first quarter a significant currency translation gain (+US\$ 57.2 million) generated by the appreciation of the local currency boosted total net earnings reported in US Dollar IFRS accounting to US\$ 165.8 million, this 2Q08 an equally strong currency translation loss (-US\$ 49.8 million) was recorded depressing total reported net earnings to US\$ 78 million for the quarter.

The excellent business performance of BCP is better revealed by its 1H08 results, since the translation effect is netted out within the semester given the fluctuation of the exchange rate (total currency translation impact for 1H08 of only +US\$ 7.4 million). Thus, total net earnings for the first half of the year reached a superb US\$ 243.8 million and BCP's ROAE reached 42.15%, surpassing all expectations.

The continuing growth of BCP's business is confirmed by the further expansion of total loans (measured as average daily balances for the quarter) which grew 3.3% QoQ. However, this reflects a slow down in loan growth from the 7.8% growth in 1Q08. Nevertheless, this growth differential also includes the impact of the currency fluctuation, which in the 1Q08 inflated loan growth numbers through the revaluation of the Soles and the conversion of the Soles loan portfolio into US Dollars, while in the 2Q08 the contrary effect occurred. It is noteworthy, that this 2Q08, and contrary to the prior quarter, the corporate loan portfolio remained basically unchanged, showing merely a shift from Soles to US Dollar borrowings, whereas the retail segment recovers its growth leading position and grew 6.2% QoQ, with Consumer, SME, mortgages and credit card also showing strong growth in that order.

The overdue/loans ratio remained at a very healthy 0.74%, and did not show any signs of deterioration in any business segment. Past due loans coverage remains at a robust 318.7%, up from last quarter's 313.2%.

Net provisions fell 39.4% to a net total of US\$10.3 million in 2Q08. This change resulted from reversions of gross provisions for Corporate and Middle Market Banking, which compensated stronger provisions in the Retail Banking segment, in particular consumer loans. Stronger Retail segment provisions are not related to a decline in portfolio quality, but rather respond to more conservative policies for that business segment. Likewise, provisions for country risk were also reversed in 2Q08, so gross provisions reached US\$16.2 million, while recoveries reached US\$6.0 million.

Core Earnings

Core Revenues US\$ 000	Quarter			Change	
	2Q08	1Q08	2Q07	2Q08/2Q07	2Q08/1Q08
Net interest and dividend income	188,359	172,611	141,146	33.4%	9.1%
Fee income, net	85,228	79,747	66,986	27.2%	6.9%
Net gain on foreign exchange transactions	31,389	19,971	12,778	145.7%	57.2%
Core Revenues	304,976	272,329	220,909	38.1%	12.0%

Core revenue generation was robust reaching 12% QoQ. Growth of 2Q08 *net interest and dividend income* is the main contributor to this and is the result not only from an increased loan portfolio, mainly retail, which resulted in a 7.0% rise in interest income, but also of larger interest from investments, despite their smaller volume in 2Q08 and dividend income. This growth combined with smaller growth of interest expenditure (up by only 5.7%), helped by earnings in rate and currency coverage operations, resulted in an overall excellent growth of net revenues from interests of 9.1% QoQ.

Another element of *core earnings, Fee income*, continued on its rising trend and grew 6.9% QoQ mainly due to greater earnings from commissions for mortgages, SMEs, personal loans as well as fees on collections and payments. In addition, the volume of transactions, measured as a monthly average increased 9.0% during this quarter, from 32.4 million in 1Q08 to 35.3 million in 2Q08.

Finally, as a result of strong exchange rate volatility in the first half of this year, *net earnings from exchange rate operations* also increased significantly by 57.2% QoQ, due to the higher volume of monthly average transactions in 2Q08 as the network expanded and the dollar's volatility increased against the Nuevo Sol, resulting in higher earnings from wider purchase/sale spreads. Altogether, these components resulted in a 12% QoQ total growth of revenues from operations.

Earnings from sales of securities dropped a significant 83.6% during this quarter, from US\$22.7 million to US\$3.7 million in 2Q08, as a consequence of including windfall earnings from the sale of Visa Intl. shares in 1Q08, the basis for comparison. In addition, volatility in the local and international capital markets was reflected in lower earnings from the sale of securities and higher provisions related to price volatility of securities. This led to a 1.8% QoQ drop in total non-financial revenues.

Banco de Crédito and Subsidiaries

US\$ 000	2Q08	Quarter 1Q08	2Q07	Change 2Q08/2Q07	2Q08/1Q08

Branches	285	277	249
ATMs	801	778	699
Agentes BCP	1,552	1,358	837

*The old methodology for the calculation of NIM considered only 70% of the investments available for sale as part of interest earning assets.

**The new methodology for the calculation of NIM considers 100% of the investments available for sale as interest earning assets.

Operating expenses grew 5.3% QoQ, mainly driven by rising personnel and overhead expenditures, which grew 1.9% and 4.4% QoQ, respectively. Both components are intimately related to the cost of an expanding BCP network, not reflected yet as initially planned in the first half this year. Twelve offices have opened to June, to a 285 total, while an additional 63 should open in the second half of 2008.

Thus, operating results show a significant improvement reaching a net result, including profit sharing and taxes but before currency translation effects 17.8% higher QoQ, of US\$ 127.9 million vs. US\$ 108.5 million in 1Q08.

However, as mentioned above, *results from currency translation* which impacts BCP's net Nuevos Soles position, resulted in a loss in 2Q08 as the local currency devalued, reversing the gains reported in 1Q08 as the currency revalued in that period. Results from translation in 1Q08 revealed a US\$.57.2 million profit, while 2Q08 ended in a US\$49.9 million loss.

As a consequence of the above results, BCP's quarterly indicators included an excellent 43.8% efficiency index following larger revenues from operations, excellent portfolio quality with 0.75% delinquencies and 318.7% coverage ratio, and great profitability with 25.5% ROAE, including translation effects. When excluding such effect, BCP's ROAE for the last periods reaches 41.8% for 2Q08, 37.3% for 1Q08 and 35.15% for 2Q07, which is a better reflection of the improving profitability of BCP's operations.

II.1 Interest Earning Assets

As a consequence of regulations increasing legal reserves, liquid deposits at BCR rose 24.7%, contributing to the change in composition of interest earning assets in favor of lower yielding assets.

Interest Earning Assets US\$ 000	Quarter			Change	
	2Q08	1Q08	2Q07	2Q08/2Q07	2Q08/1Q08
BCRP and Other Banks	2,589,828	2,077,661	1,804,401	43.5%	24.7%
Interbank funds	1,620	1,468	17,133	-90.5%	10.3%
Trading Securities	55,240	38,538	53,569	3.1%	43.3%
Available For Sale Securities	4,747,724	4,928,259	2,858,817	66.1%	-3.7%
Current Loans, net	9,129,652	8,767,674	6,923,441	31.9%	4.1%
Total interest earning assets	16,524,064	15,813,601	11,657,361	41.7%	4.5%

Interest earning assets grew 4.5% QoQ mainly as a result of larger current account deposits in BCRP following the increase in bank's reserve requirements implemented in April and May. This regulation was one of a series of monetary adjustments implemented during the 1H of the year in order to control inflation and resulted in a 24.7% increase in low yielding bank deposits.

Nevertheless, outstanding loans also showed a great dynamism during the quarter, increasing 4.1%. In addition, there was also a slight reduction in CB CD's from the previous quarters, as reserve requirements absorbed liquidity. Finally, there was a remarkable increase in trading securities despite the high volatility of capital markets.

As a result of these movements, a re-composition of IEA in relation to June 2007 worked against our NIM, with our highest yielding assets, loans, dropping its share from 60% to 55% of total IEA. This was initially generated by the increased position in CB CD's (other IEA) which despite the decrease showed during the 2Q, remained at a high level, because of its attractive after tax yield (given their tax shelter), and was further supported by the increase in bank deposits following the reserve requirements rise.

Loan portfolio

The bank's loan portfolio this quarter continued to grow and reached a total US\$ 9.130 million total balance as of June 2008, or 4.1% QoQ and 39.1% YoY growth. Likewise, a study of average daily loans' growth reveals a 3.3% QoQ and 37.1% YoY growth.

As in the previous quarter, attention must be paid to the impact of the exchange rate which, contrary to 1Q08, depreciated significantly. The dollar's revaluation depressed the reported growth of soles-denominated loans, which account already for 39% of the total portfolio measured by average outstanding balances for the quarter. Thus, reported figures in US Dollars underscore the strength of the Bank's growth.

In 2Q08, even including this currency exchange impact on growth numbers, Retail Banking showed the greatest strength by recording a total US\$ 3,298 million daily balance and 6.2% QoQ and 49.5% YoY growth, continuing on the consistent expansion trend of recent years. Within Retail Banking, the Consumer segment stands out, after 14% QoQ and 79.2% YoY growth, followed by the SME segment, which expanded 6.1% QoQ and 64.8% YoY. Home and credit card loans grew 3.9% and 2.8% QoQ, and 30.2% and 43.6% YoY, respectively.

Middle Market Banking also performed strongly this quarter growing at 5.7% QoQ, while annually it expanded 29.6%.

Corporate Banking, on the other hand, performed less strongly than in the previous quarter, reaching US\$ 3,174.7 million which represent a slight reduction of -0.3% QoQ. This variation was a consequence of the normalization of portfolio growth after having had unusually high growing periods in a segment where BCP's has already the highest market share, and a decision to be rigorous in transferring higher funding costs. Consequently, given the strong pressure on rates which characterize this 2Q, we became less competitive.

Furthermore, higher growth in the US\$ denominated loan book continued during the quarter, because a market perception of a weaker dollar prevails, despite the reversion that took place in this period, especially in June, and completely offset the drop in the corporate local currency loan book.

Given the distortion generated by the currency fluctuations and the fact that BCP's loan portfolio is in both currencies but reports in US Dollars, it is helpful to look at the evolution of the different loan portfolios by currency to see the real growth in each portfolio. The following chart intends to shed some light over such loan growth analysis...

	Domestic Currency Loans (Nuevos Soles million)					Foreign Currency Loans (US\$ million)				
	2Q07	1Q08	2Q08	YoY	QoQ	2Q07	1Q08	2Q08	YoY	QoQ
Corporate	2,121.2	2,783.7	2,363.4	11.4%	-15.1%	1,598.0	2,208.8	2,355.3	47.4%	6.6%
Middle Market	782.1	980.3	1,100.1	40.7%	12.2%	1,272.5	1,518.1	1,587.2	24.7%	4.6%
Retail	2,624.5	4,015.6	4,474.9	70.5%	11.4%	1,378.4	1,697.7	1,747.7	26.8%	2.9%
SME	1,026.8	1,393.8	1,532.5	49.2%	10.0%	338.0	539.2	559.6	65.5%	3.8%
Mortgages	440.9	891.9	1,036.6	135.1%	16.2%	810.2	876.7	876.6	8.2%	0.0%
Consumer	465.2	836.7	983.5	111.4%	17.5%	183.3	225.1	250.8	36.8%	11.4%
Credit Cards	691.5	893.3	922.3	33.4%	3.3%	46.8	56.8	60.8	29.7%	7.0%
Consolidated total loans*	5,555.1	7,797.9	7,962.5	43.3%	2.1%	4,826.9	5,997.1	6,250.7	29.5%	4.2%

* Includes work out unit, other banking and BCP Bolivia

• The corporate segment grew 6.6% in foreign currency, accounting for 74% of loans for that segment. The 15.1% QoQ drop of the Nuevos Soles-denominated portfolio results from reduced demand for this currency caused by dollar volatility during this quarter and greater demand for dollars. The combined impact on the corporate loan book resulted in a basically flat performance.

• The Middle Market segment, which has 81% of its portfolio in foreign currency loans, grew a moderate 4.6% in this currency, but sustained a strong 12.2% growth in local currency as well, in line with projections.

• The Retail portfolio has approximately 50/50 split between the two currencies, and showed a very strong 11.4% quarterly growth of soles-denominated loans, while dollar loans grew by only 2.9%.

Market Share

BCP's market share of loan remains strong despite strong competition characterized by the arrival of new international financial organizations and the already strong bank positioning. Thus, BCP accomplished a 31.5% share to June 2008, slightly below its 32.2% share in December 2007. The drop is accounted for by a rising position of the 3rd and 4th competitors from December 2007 to June 2008.

Furthermore, market shares for the corporate and middle market sectors continue revealing BCP's solid positioning, reaching 46% and 34%, respectively, as of May 2008. These reflect, however, a minor growth in both segments, as a consequence of the strong competition.

Market shares in the retail market had mixed results during this quarter. Consumer loans were up by 0.8% reaching 17.9%, while Credit Cards and SME decreased 0.1% and 0.7%, respectively, reaching 18.6% and 17.8%. However, mortgages increased 0.1% to 40.2% consolidating its strong position.

Dollarization

The de-dollarization of BCP's assets continued this 2Q08. The Nuevos Soles component of the total portfolio reached 32.8%, a small 0.3% increase since December 2007. The de-dollarization in the financial system also continued, and

reached 41% in domestic currency and 59% in foreign currency last quarter.

11

II.2 Deposits and Mutual Funds

Deposits grew 2.4% QoQ and 40.1% YoY and remain as the main funding source to sustain loan growth. In addition, BCP's mutual funds grew 10.9% QoQ.

Deposits and Obligations US\$ (000)	Quarter ended			Change	
	2Q08	1Q08	2Q07	2Q08/2Q07	2Q08/1Q08
Non-interest bearing deposits	2,905,401	2,965,756	2,316,573	25.4%	-2.0%
Demand deposits	966,662	761,123	1,220,352	-20.8%	27.0%
Saving deposits	2,603,344	2,749,983	2,040,264	27.6%	-5.3%
Time deposits	5,740,312	5,543,993	3,012,079	90.6%	3.5%
Severance indemnity deposits (CTS)	969,594	859,630	836,817	15.9%	12.8%
Interest payable	66,095	58,442	32,923	100.8%	13.1%
Total customer deposits	13,251,408	12,938,927	9,459,008	40.1%	2.4%
Mutual funds in Perú	2,315,170	2,088,039	1,776,232	30.3%	10.9%
Mutual funds in Bolivia	88,702	83,890	64,817	36.8%	5.7%
Total customer funds	15,655,279	15,110,857	11,300,057	38.5%	3.6%

After an unusual evolution of deposits in 1Q08, in particular for deposits in Nuevos Soles which reflected the significant flow of short term capitals to the financial system; in 2Q08 deposits returned to their normal evolution pattern and grew 2.4% QoQ. Although this is the main source of funds for loans, BCP increased its liabilities abroad by 24.8% QoQ. The increase in June 2008 corresponds mainly to funds granted to BCP from correspondent credit lines with local and foreign financial institutions and short-term funds in order to cover liquidity needs.

Savings deposits continued to shrink, while demand deposits, CTS accounts and time deposits grew, as a result of sharper market competition to raise funds and the customer's greater sensitivity to interest earned by their deposits. Such growth occurs in a highly volatile capital market where funds continue to migrate towards such passive products. Nonetheless, deposits remain a low-cost source of funds as 57% of such deposits earned low or no interest. In addition, the retail segment is a clearly important source of funds, given that approximately 46% of deposits are originated in this segment.

Market Share

Despite strong competition for the public's deposits, BCP increased its deposits share to 39.7% in June 2008, larger than its 38.8% share to December 2007.

BCP's leadership is clear for all types of deposits, with its share in CTS deposits as the strongest, at 52.1% and well above our closest competitor's, whose share reaches 19.8%. Demand deposits reach 46.6% in domestic currency and 39.9% in foreign currency while savings deposits reached 37.3% and 42.4% shares, respectively. Finally, time deposits' shares in domestic and foreign currency were 24.3% and 43.4%, respectively.

Through its Credifondo subsidiary, BCP remains the leader in the mutual funds business, presently managing a US\$ 2,315 million fund, with a 10.9% QoQ growth. This resulted in a 44.6% market share to June 2008, higher than last March's 43.7%. Such increase is noteworthy given growth of this industry and increasingly customized funds that cater to investors' goals and profiling. In April, BCP brought to market three new mutual funds in domestic currency for the conservative, balanced and moderate investor profiles.

The currency mix of BCP consolidated deposits reached 51% in foreign currency and 49% in domestic currency, driven by a volatile dollar and, partly, by the migration of the CTS accounts to the domestic currency.

II.3 Net Interest Income

As a result of 9.1% QoQ higher revenue from interest and despite increased legal reserves and the subsequent increase in BCRP liquidity, Net Interest Margin maintained its strong level and remained basically flat in 2Q08.

Net interest income	Quarter			Change	
US\$ 000	2Q08	1Q08	2Q07	2Q08/2Q07	2Q08/1Q08
Interest income	319,420	296,660	220,180	45.1%	7.7%
Interest on loans	228,892	213,932	164,101	39.5%	7.0%
Interest and dividends on investments	4,323	1	3,082	40.3%	100
Interest on deposits with banks	15,170	16,924	15,497	-2.1%	-10.4%
Interest on investment securities	61,253	54,527	32,531	88.3%	12.3%
Other interest income	9,781	11,276	4,970	96.8%	-13.3%
Interest expense	131,061	124,049	79,035	65.8%	5.7%
Interest on deposits	98,104	90,233	57,927	69.4%	8.7%
Interest on borrowed funds	16,782	15,545	11,220	49.6%	8.0%
Interest on bonds and subordinated notes	13,378	11,480	8,165	63.8%	16.5%
Other interest expense	2,797	6,792	1,722	62.4%	-58.8%
Net interest income	188,359	172,611	141,146	33.4%	9.1%
Average interest earning assets	16,168,832	14,859,043	10,999,323	47.0%	8.8%
Net interest margin* (old methodology)	5.12%	5.07%	5.52%		
Net interest margin(1)** (new methodology)	4.66%	4.65%	5.13%		

*The old methodology for the calculation of NIM considered only 70% of the investments available for sale as part of interest earning assets.

**The new methodology for the calculation of NIM considers 100% of the investments available for sale as interest earning assets.

(1)Annualized

Interest Income grew 7.7% in 2Q08 as a consequence not only of growing loans which resulted in a 7.0% increase in interest, but also due to 12.3% higher interest from investments in securities, despite a smaller investments volume in 2Q08. Combined with more slowly (5.7%) growing expenditures for interests, thanks to earnings on rate and currency hedging operations, net revenues from interests grew 9.1% QoQ.

13

This evolution reveals better lending margins. In fact, loans (average balances) grow 3.3% this quarter, while interest income from loans grows 7% reflecting the stronger loan portfolio growth of the higher yielding retail sector, whereas interest expense grows only 5.7%, which reflects the less sensitivity of our liabilities to increasing interest rates. This would logically lead to improving NIM. However, the rise of legal reserves drove growth of liquid deposits at BCRP to a high 24%, and these earn low nominal rates and have a negative impact on NIM. Therefore, the significantly higher levels of low interest earning deposits (which provide a return of approximately 3% both in domestic and foreign currencies) inflated our average interest earning assets balance with low yielding assets and led to a basically flat NIM.

Furthermore, for transparency reasons, this quarter we have standardized our NIM calculation methodology, which used to exclude a percentage of interest earnings assets available for sale from the formula, whereas it seemed to be a standard procedure in the markets to include ALL interest earning assets into this calculation, which is what we have adopted as of this quarter.

Thus, with net interest income growing 9.1% QoQ, while average interest earning assets expanded 8.8% QoQ, the resulting NIM showed an improvement to 5.12% for 2Q08 from 5.07% the previous quarter, based on the calculation approach used up to date. However the equivalent calculations of Net Interest Margin under the new standardized methodology gives only a slight rise from 4.65% in 1Q08 to 4.66% in 2Q08.

II.4 Loan provisions

Though provisions in the consumer segment increased in line with the new policies, global Gross provisions fell in 2Q08 as such stronger provisions were attenuated by reversions in the wholesale portfolio and country risk. Furthermore, portfolio quality indicators continued improving.

Provisión for loan losses US\$ 000	Quarter ended			Change	
	2Q08	1Q08	2Q07	2Q08/2Q07	2Q08/1Q08
Provisions	(16,230)	(25,867)	(13,308)	22.0%	-37.3%
Loan loss recoveries	5,951	8,915	6,423	-7.3%	-33.3%
Total provisions, net of recoveries	(10,280)	(16,951)	(6,885)	49.3%	-39.4%
Total loans	9,197,916	8,837,689	6,989,841	31.6%	4.1%
Reserve for loan losses (RLL)	217,569	219,295	190,413	14.3%	-0.8%
Bcp's Charge-Off amount	10,513	9,281	9,896	6.2%	13.3%
Past due loans (PDL)	68,264	70,015	66,400	2.8%	-2.5%
PDL/Total loans	0.74%	0.79%	0.95%		
Coverage	318.72%	313.21%	286.77%		

Gross provisions reached US\$ 16.2 million in 2Q08, 37.3% lower QoQ, reflecting a reduction of total past due loans, which dropped from US\$ 70 million to US\$ 68 million by June 2008, and reserves for loan losses, which were also down from US\$219.3 million in March 2008 to US\$217.6 million. These reductions took place in both Wholesale and Retail Banking. Consequently, BCP's past due ratio dropped again and reached only 0.74% while the coverage ratio improved further to 318.7% in 2Q08.

Despite continued excellent portfolio quality numbers, the application of a more sophisticated risk evaluation methodology resulted in improved provisioning policies for the retail segment, leading to increased provisioning levels for each segment within this sector. However, on the other hand, country risk provisioning reversals follow improved country performances and were effected this quarter.

In addition, recoveries dropped 33.3% because of reduced revenues from recovery of written off portfolio from previous years as a smaller downgraded portfolio stock is left.

II.5 Non Financial Income

Fee and FX income continued expanding at excellent rates, though in 2Q08, smaller revenues from securities sales (which included the sale of VISA shares in 1Q08) impacted total non financial revenues and resulted in a 1.8% QoQ total drop.

Non financial income US\$ 000	Quarter			Change	
	2Q08	1Q08	2Q07	2Q08/2Q07	2Q08/1Q08
Fee income	85,228	79,747	66,986	27.2%	6.9%
Net gain on foreign exchange transactions	31,389	19,971	12,778	145.7%	57.2%
Net gain on sales of securities	3,721	22,655	7,586	-50.9%	-83.6%
Other income	2,008	2,190	1,479	35.8%	-8.3%
Total non financial income	122,347	124,563	88,827	37.7%	-1.8%

Growth of 6.9% in *fee income* resulted mainly from larger revenues from commissions for mortgages, SMEs, personal loans and collections & payment commissions. In addition, the quarter's monthly average transactions that generate fees grew from 32.4 million transactions to 35.3 million in 2Q08 or a 9.0% QoQ change.

Net gains on FX operations grew also a very strong 57.2%, following a higher volume of average monthly transactions in 2Q08, resulting from a growing network, and greater dollar/sol volatility which also allowed for larger purchase/sale spreads.

Net gain on sale of securities dropped sharply from US\$22.7 million in 1Q08 to US\$3.7 million in 2Q08. This is accounted for by the fact that 1Q08 included earnings from the sale of Visa Intl. stock, which resulted in a windfall earning amounting to US\$17.9 million. In addition, lower earnings were made from the sale of securities, while valuation fluctuations resulted in larger QoQ losses given the unstable markets.

N° de Transactions per channel	Quarter			Change %	
	Average 2Q08	Average 1Q08	Average 2Q07	2Q08/ 2Q07	2Q08/ 1Q08
Teller	9,732,229	9,091,066	8,541,465	13.9%	7.1%
ATMs Via BCP	5,940,702	5,376,097	4,745,857	25.2%	10.5%
Balance Inquiries	2,435,836	2,249,668	2,150,016	13.3%	8.3%
Telephone Banking	1,168,087	1,126,113	976,654	19.6%	3.7%
Internet Banking Via BCP	8,235,199	7,448,052	6,441,179	27.9%	10.6%
Agente BCP	1,561,047	1,248,203	656,986	137.6%	25.1%
Telecrédito	3,134,627	2,884,387	2,816,308	11.3%	8.7%
Direct Debit	345,684	341,265	283,255	22.0%	1.3%
Points of Sale P.O.S.	2,568,932	2,466,764	2,079,573	23.5%	4.1%
Other ATMs network	186,203	173,343	153,375	21.4%	7.4%
Total transactions	35,308,545	32,404,959	28,844,668	22.4%	9.0%

The above chart shows the higher monthly average figures for this quarter, particularly at BCP Agent, which is rapidly taking a significant position in business generation. Likewise, electronic channels evolved significantly, compared to the conventional teller channel.

	Balance as of			Change	
	Jun-08	Mar-08	Jun-07	Jun. 08 / Jun. 07	Jun. 08/ Mar. 08
Branches	285	277	249	14.5%	2.9%
ATMs	801	778	699	14.6%	3.0%
Agentes BCP	1,552	1,358	837	85.4%	14.3%
Total	2,638	2,413	1,785	47.8%	9.3%

II.6 Operating Costs and Efficiency

BCP's efficiency ratio improved in 2Q08 and reached 43.78%, after 12.0% growth in revenues from operations and only 3.2% QoQ higher operating expenditures (excluding "other expenditures")

16

Operating expenses US\$ 000	Quarter			Change	
	2Q08	1Q08	2Q07	2Q08/2Q07	2Q08/1Q08
Salaries and employees benefits	71,871	70,553	56,865	26.4%	1.9%
Administrative, general and tax expenses	50,669	48,520	42,631	18.9%	4.4%
Depreciation and amortizacion	10,978	10,364	9,396	16.8%	5.9%
Other expenses	12,177	8,898	7,635	59.5%	36.9%
Total operating expenses	145,695	138,336	116,527	25.0%	5.3%
Efficiency Ratio	43.78%	47.53%	49.29%		

Salaries and employee benefits grew 1.9% resulting from a larger number of workers, mainly to provide for the larger network. In addition, QoQ growth includes the impact of the Dollar revaluation vis-à-vis the local currency in 2Q08. Consequently, increases in personnel expenditures (Soles denominated) are partly attenuated by translation to US Dollar IFRS accounting.

Overhead expenditures rose 4.4% QoQ, mainly as a result of larger marketing (advertising and marketing campaigns), expenses, as well as expenditure on consultants and advisors, maintenance and transportation. Again, these increases were partly mitigated by smaller spending on software, systems and IT. It is worthwhile mentioning that the network expansion plan and investment in IT support are evolving vigorously and will result in larger expenditures on such items in the second half.

Detailed administrative expenses and the corresponding quarterly changes appear below:

Administrative Expenses US\$ (000)	2Q08		Quarter		2Q07		Change	
		%	1Q08	%		%	2Q08/2Q07	2Q08/1Q08
Marketing	6,683	13%	5,032	10%	6,985	16%	-4.3%	32.8%
Transportation	4,834	10%	4,458	9%	4,008	9%	20.6%	8.4%
Systems	3,506	7%	6,892	14%	3,926	9%	-10.7%	-49.1%
Maintenance	2,660	5%	2,444	5%	1,880	4%	41.5%	8.9%
Consulting	2,485	5%	2,207	5%	2,525	6%	-1.6%	12.6%
Communications	2,372	5%	2,497	5%	1,996	5%	18.9%	-5.0%
Other expenses	14,682	29%	14,195	29%	12,337	29%	19.0%	3.4%
Property taxes and others	4,876	10%	5,487	11%	4,512	11%	8.0%	-11.1%
Other subsidiaries and eliminations, net	8,572	17%	5,308	11%	4,461	10%	92.1%	61.5%
Total Administrative Expenses	50,669	100%	48,520	100%	42,631	100%	18.9%	4.4%

“Other expenditures” increased 36.9% QoQ. This change is mainly accounted for by an increase in provisions related to the Stock Appreciation Rights program, resulting from the appreciation of the Credicorp share value in 2Q08. The stock appreciation was largely offset by a hedging transaction linked to the SAR program, though some reserves are required since the hedge is not perfect.

Thus, the moderate growth in operating costs (excluding others) of 3.2%, while operating income improved 12% resulted in a significant recovery of BCP’s efficiency ratio from 56.9% in 4Q07 to 47.5% in 1Q08, and 43.8% this 2Q08.

II.7 Shareholder's Equity and Regulatory Capital

Shareholders' equity	Quarter			Change	
	2Q08	1Q08	2Q07	2Q08/ 2Q07	2Q08/ 1Q08
US\$ 000					
Capital stock	439,474	364,706	364,706	20.5%	20.5%
Reserves	388,062	388,062	282,189	37.5%	0.0%
Unrealized Gains and Losses	70,819	90,285	66,066	7.2%	-21.6%
Retained Earnings	111,994	186,761	96,484	16.1%	-40.0%
Income for the year	243,814	165,772	154,719	57.6%	47.1%
Total shareholders' equity	1,254,162	1,195,587	964,164	30.1%	4.9%
Return on average equity (ROAE)	25.49%	56.96%	35.57%		

Net equity reached US\$ 1.2 billion as of June 2008, or a 4.9% QoQ growth. Also, in 2Q08 ROAE was 25.49%, lower than the 56.96% figure for 1Q08. This wide changes are the consequence of the unusual translation effects in 2Q08, compared to 1Q08.

As of June 2008, the capital adequacy ratio for non consolidated BCP reached 13.5% (7.4 times), slightly below 1Q08's 13.8% (7.3 multiple). Consequently, this indicator exceeds the system's (9.1%) and our own even more conservative ceiling (11.5%).

A larger amount of earnings was retained in 2Q08 for capitalization with a view at further strengthening the Bank's equity. Retained earnings reached US\$134 million as of June 2008, reflecting an increase of 66.9% from last March08. In addition, it is worthwhile underscoring the lower market risk equity requirement resulting from smaller foreign currency exposure under the present circumstances and the appreciation of the local currency, which has reduced both exposure to and risk from foreign currency value fluctuations.

In addition, Tier I reached US\$ 997.2 million. Risk weighted assets include US\$ 38.3 million market risk, requiring a US\$ 3.5 million equity. Total regulatory capital includes US\$ 292 million of subordinated debt.

III. Banco de Crédito de Bolivia

Bolivian Financial System

Total loans of the Bolivian banking system increased from US\$ 3,183 million in December 2007 to US\$ 3,448 million in June 2008, an increase of 8.3%. Loan quality of the banking system has maintained the improved performance registered during 2007. In 2007, PDL of the banking system reached a level of 5.6%, in March 2008 5.7% and in June 2008 it dropped to 5.2%. In addition, the coverage ratio of the banking system attained a level of 110.7% in June 2008 vs. 109.6% in last March.

With respect to the deposit side of the banking system, it increased from US\$ 4,124 million in December 2007 to US\$ 4,982 million in June 2008, an increase of 20.8%, which was mainly a response to the attractive inflation adjusted deposits implemented, which are in turn invested in also inflation adjusted deposits at the Central Bank. This growth was distributed in demand deposits, which grew 21.2%, saving deposits with 35.2% and time deposits with 9.5%.

BCP Bolivia - Results

In 2Q08, BCP Bolivia reached a net income of US\$ 10.1 million, a slight decrease of 3.0% QoQ and a strong growth of 85.2% YoY, mainly as a result of higher net interest income (5.8% QoQ and 37.5% YoY) and higher non financial income.

The higher growth of NII is the result of higher average loan balances and interest rates, and at the same time, higher returns of the proprietary investment portfolio. Non financial income decreased in 2Q08 mainly because in 1Q08 the sale of VISA shares for approximately US\$ 1.9 million boosted this income, so the base for comparison purposes was higher.

The conservative strategy on credit risk management has allowed BCP Bolivia to reach a past due loan ratio of 1.9% (1.7 % in 1Q08 and 2.7% in 2Q07) and coverage of 206.1% (227.8% in 1Q08 and 184.3% in 2Q07). ROAE of our Bolivian subsidiary was 51.5%, lower than 56.1% in March 2008. However, these ratios reveal a better performance than the Bolivian Financial System, which reported a 5.2% in PDL and 110.7% as coverage.

Assets and liabilities

Total loans as of June 2008 reached US\$472.1 million, 1.0% higher than US\$ 467.6 million corresponding to March 2008 and 10.3% higher YoY. The lower quarterly loan growth is the result of slower economic activity, as a consequence of political instability that reduces the possibility of higher investments. Thus, the economic deceleration is also reflected on the performance of the loan portfolio.

In 2Q08, The Retail Banking registered an increase of 6.3% QoQ and 25.4% YoY, which has an important impact on BCP Bolivia's results, mainly because this segment represents 48.7% of the total loan portfolio and it is the segment with the highest margins within the Bank, whereas Corporate Banking and Middle Market Banking represent 46.2% of the loan portfolio with lower returns when compared to the Retail sector.

In the Retail segment, products that showed higher quarterly growth rates were SME with 14.2% and Personal loans with 11.0%. Both represented 25.2% of the retail segment. Mortgages, which account for 50.7% of the total loan portfolio, showed a growth rate of 2.0% QoQ and 5.8% YoY.

On the deposit side, BCP Bolivia registered an increase of 9.6% QoQ and 35.5% YoY. During 2Q08, growth of savings deposits with 15.3% QoQ and 49.7% YoY stands out, followed by demand deposits with 8.8% QoQ and 53.4% YoY, and time deposits with 1.5% QoQ and 2.1% YoY.

Shareholders' net equity, shows an increase of 15.3% with respect to last March mainly because of non realized gains (84.6% QoQ) and due to a 97.0% increase of net income during the first half of the year.

Finally, BCP Bolivia has a market share of 13.5% in loans and 14.4% in deposits, positioning it as the fourth bank in loans and third in deposits for the whole banking system. It has also continued consolidating its position in strategic products and services, including the low risk income of non financial earnings. In addition, the bank has implemented the business model of Agente BCP, a plan that has the objective of increasing market penetration in those segments still not attended by the financial system. As of June 2008, BCP Bolivia had 69 Agentes BCP.

Return on average equity	53.4%	9.4%	8.3%		
PDL / Total loans	0.00	0.00	0.00		
Cover ratio	0.9%	0.9%	1.2%		
BIS ratio	15.85%	14.93%	13.90%		

During this second quarter 2008 Atlantic Security Holding Corporation (ASHC) reported a net income of USD 27.1 million, which includes the dividend from its significant position of Credicorp shares (BAP's treasury stock), resulting in distorted growth rates. Excluding this income, ASHC's performance reveals a QoQ net income drop of about 8% to US\$ 5.1 million, which reflects still a solid performance.

Thus, total Core Revenues excluding the extraordinary dividend income which is recorded once a year would be about US\$ 8.5 million, i.e. flat on a QoQ comparison, though 16% higher on YoY basis.

Net interest income presented increases of 31.82% YoY and 10.2% on QoQ basis. Given the declining interest rate environment, this increase in net interest income reflects a favorable situation for the bank, considering its current short term structure of deposits (which allows quick downwards re-pricing) and medium to long term structure of assets with higher interests locked-in. In addition to this active management of its cost of funds through periodical adjustments to interest rates paid on deposits, a reduction in the migration of customer deposits balances to managed investment products has contributed to widening this income.

As a result of this active management and re-pricing flexibility, net interest margin (NIM) presents an increase from 1.66% to 2.00% during this 2QT08.

Commissions and fee income from asset management business remain stable at US\$ 2.1 million reporting a slight increase of 0.6% when compared with 1QT08. When compared with 2QT07, these are however 7.5% lower.

Net gains on foreign exchange transactions increased in more than 41.5% YoY (from US\$ 32 thousand to US\$ 46 thousand), though quarterly figures drop 92.8% compared to 1QT08. These gains rise from the appreciation of foreign currency positions, mainly Peruvian Nuevos Soles, maintained by the bank against the US Dollar.

Net provisions reported in 2QT08 of US\$ 1.7 million were 12.9% lower when compared to those reported in 1QT08, notwithstanding, these are more than 100% higher when compared YoY. These higher reserves in the first 2 quarters of the year are the result of recognizing the adverse market effect on the Bank's proprietary investment portfolio, triggered by the current financial markets turmoil, mainly in United States where our portfolio is highly concentrated. Even though we have preferred to create these reserves, the investment portfolio maintains a significant concentration of 63% on investment grade securities indicating a high credit quality exposure.

Realized gains on securities were only US\$ 39 thousands, down from USD 700 thousand in 1Q08, but do reflect an improvement from the figure reported a year ago, which was a loss of US\$ 211 thousand.

Efficiency ratio presented an important reduction from 22.0% on 1QT08 to 6.7% in this 2QT08. This is mainly the impact of the dividend income from Credicorp Ltd. Thus, excluding this dividend income, the efficiency ratio would be 23.5%, which is slightly higher than the one reported in 1QT08, but less than the 29.0% reported a year ago.

Asset levels decreased by 7.2% on QoQ due to the usage of available cash for outgoing customers' funds and a migration of customer' deposits to structured investment products managed off-balance sheet, motivated by higher yields offerings.

Interest Earning Assets

Interest earning assets reached US\$ 1.254 MM, as shown in the table below. This figure dropped 7.6% QoQ, while a YoY drop of 15.1% was observed. The variation from 1QT08 is caused by the decrease on available cash, used to meet outgoing funds from customer's accounts and the reduction of investment portfolio values.

The share of investment-grade securities in the investment portfolio is 75%, emphasizing ASB's prudent investment policy of concentrating its portfolio in high credit quality investments. Although the size of the portfolio presents a reducing trend, its composition remains on similar levels to those of 2Q 2007.

INTEREST EARNING

ASSETS* (US\$ Million)	Quarter			% Change	
	2Q 2008	1Q 2008	2Q 2007	2Q08 / 2Q07	2Q08 / 1Q08
Due from banks	405	437	531	-23.7%	-7.4%
Loans	151	146	107	40.8%	3.2%

Total interest-earning assets	1,254	1,358	1,477	-15.1%	-7.6%

(*) Excludes investments in equities and mutual funds.

Asset Management Business

Our Asset Management Business includes third party managed funds, customers' deposits, and investments such as proprietary mutual funds and securities custody. The total of these funds has increased by 4.2% QoQ and 13.2% YoY. The observed increase is a result of the successful migration of customer deposits to managed funds and structured investment products which have increased 36% YoY and 10.2 QoQ. As we concluded in the previous quarter, the management of third party funds in off-balance sheet accounts continues to command most new business.

V. Prima AFP

V1. Recent evolution of the private pension market

In the 2Q, the private pension market evolved in a stable environment, similar to the 1Q as far as commercial competition is regarded with a total 68,000 transfers and 60,000 new affiliates. The system now has a total 4.2 million members.

Volatility of international markets and its impact on local financial markets affected the behaviour of funds managed by the system which, together with a weaker local currency, resulted in a drop in US Dollar terms of the total managed portfolio to US\$21.1 billion or 4.5% less than in the previous period.

Regarding the system's financial results, it earned US\$59.3 million this quarter, or 29% more than one year ago. These earnings are mainly accounted for by the wider base of contributions resulting from the lively local economy and more formal jobs. Likewise, the appreciation of the sol compared to a year ago contributed to the improvement.

After operating expenses totalling US\$45.2 million, the system's earnings from operations reached US\$14.1million. After accounting for other revenues and expenses, legal reserves and provisions for taxes and participations, the pension plan management system's net earnings reached US\$11.1million.

(1) Quarter Variation

In local Peruvian accounting, legal reserves are included in the income statement as opposed to the IFRS There is no information for results adjusted to international financial reporting standards for the Total System. The first and third quarter include double collection

V2. Prima AFP

PRIMA's commercial activity in the second quarter remained stable compared to the first quarter. Although the sales force was slightly smaller, productivity increased in terms of recruitment of new and transfer members. However, because PRIMA's sales force was smaller than our competitors' the net effect of transfers among AFP companies was a loss of four thousand members during the period under review.

Nonetheless, during the second quarter PRIMA succeeded in getting the largest contributions and market share for voluntary contributions in May¹, for a total of close to 49% of all voluntary contributions to the system.

On the investment front, the volatile international financial markets through its impact on our local markets, affected returns from managed funds which are highly concentrated in local markets, leading to its deteriorated performance. To address this challenge, the company adopted a conservative portfolio approach looking for the best possible mix between local and foreign investments.

Commercial results

PRIMA's commercial activity in the second half continued in a relatively stable environment, as in the previous quarter.

Although new and transfer members this quarter was slightly lower than in the previous period, because of the smaller sales force, strong performance by the sales team translated into high recruitment among high average salary members, and ultimately total Monthly Insurance Compensation recruitment slightly above last quarter's. Affiliations this quarter totalled 10,900 new members and 13,500 transfers, which offset the 17,500 clients lost. Moreover, the company attracted clients with larger funds, a feature directly related to their compensation level.

PRIMA funds under management totalled US\$6,637 million or 31.2% of the entire system to June 2008, reflecting a stable share throughout this year.

Investments

Fluctuations in global markets impacted returns from investments in the period under review. However, it is worthwhile recalling that funds are managed with a long term view and seen from this standpoint, results are very favourable. In the last 24 months the company earned 28.24% yield in fund 1; 56.55% in fund 2, and 115.26% in fund 3, with all three funds ranked first in the market.

The following chart shows each fund's share of the total portfolio under management to June 2008.

	Jun-08	%	Mar-08	%
Fund 1	371	5.6%	349	5.0%
Fund 2	4,300	64.8%	4,519	64.7%

Total US\$ mm	6,637	100.0%	6,989	100.0%

Source: Superintendencia de Banca y Seguros

According to the PF rules, the Central Reserve Bank of Peru raised the limit to foreign investment to 20%; while the Superintendencia de Banca Seguros listed new investment securities allowing more investment opportunities for the pension fund system.

*Financial results**Revenues:*

PRIMA's revenues in 2Q08 totalled US\$15.9 million, above estimates and explained by a wider company revenue base that has increased revenues since the beginning of 2008. It is important to remember that, contrary to the 1Q08, in the 2Q08 Prima does not have the positive impact on revenues of the double collections related to the extraordinary Christmas "gratificaciones" (the company's revenues are typically 60% to 70% higher in the months of January and August following the extraordinary additional month's salary paid in accordance to Peruvian labour laws in July and December). Thus, discounting that effect, revenues in the 2Q08 are similar to those in the 1Q08, and compared to the 4Q07 (which does not have that extraordinary income either), 2Q08 revenues increased 10%.

Company revenues are related to the compensation of members who pay in monthly into the pension fund system, and according to estimates based on publicly available information about the pension administration companies' revenues and management fees, in the second quarter PRIMA's compensation revenue base was the system's highest, while it retained a robust 32% market share.

Voluntary contributions grew slightly in 2Q08 quarter over quarter as a consequence of higher return rates. However the depreciation of the local currency reduced the dollar denominated balance. Still managing voluntary contributions has been a significant source of company revenues.

	PRIMA Jun-08	Total System Jun-08	Prima % Share
Income (1)	5.08	18.69	27.2%
Administrative Fees	1.5%	n.a.	
RAM estimated base (2)	339	1,058	32.0%

PRIMA AFP estimates. In accordance to local public information, (CONASEV)

(1) Average income from the last four month, excluding special collections and voluntary contribution fees

(2) RAM: Monthly Accumulated Salary

Expenditures:

In the second quarter this year the company kept its focus on containing operating expenses despite some increases in administration personnel costs by US\$ 0.5 million. It also deferred some sales expenses which generate expenses by US\$ 1.4 million more than in the first quarter.

As a consequence of the above, the quarter's operating expenses reached a significant US\$3.6million, as expected, leading to a net income before translation results of US\$ 1.5 million. It is worthwhile recalling these results include expenses related to the amortization of assets identified in the Purchase Price Allocation which, added to the amortization and depreciation for property and IT investments, result in a total US\$2.2 million for D&A over the period under review.

Nonetheless, exchange rate volatility implied for this 2Q08 a strong depreciation of the local currency and losses to the company for exchange rate differences, compared to the gains reported in 1Q08 as the local currency appreciated in that period. Therefore, the loss generated this way reached US\$ 2.4 million, which contrasted sharply with the US\$ 4.6 million gain reported the previous quarter.

PRIMA AFP: Main financial indicators (US\$ thousand) (1)

	2Q08	1Q08	Change %
Income	15,860	19,053	-17%
Administrative and sale expenses	(10,066)	(9,209)	9%
Depreciation and amortization	(2,185)	(2,138)	2%
Net operating income	3,609	7,706	-53%
Other income and expenses, net	(1,497)	(828)	81%
Workers' profit sharing and Income tax	(612)	(2,526)	-76%

Net income (losses)	(954)	9,015	-111%
Total Assets	246,129	254,311	-3%
Total Liabilities	108,286	116,534	-7%
Equity	137,843	137,777	0%

(1) (IFRS)

As a result of this, net earnings before the currency translation impact, reveal a business performance after provisioning for taxes and profit sharing with closer results in the 2 quarters: US\$ 1.5 million earnings for 2Q08 compared better to 1Q08 when considering that the US\$ 4.35 million reported includes US\$ 2.3 million from the extraordinary income recognition from previous periods as explained last quarter and also the additional seasonal income for 1Q08 explained before.

However, including this currency translation loss, the company's net result was a US\$0.9 million loss.

When looking at 1H08 however, the annual cumulative result was strong with profits reaching US\$8.06 million, or 200% above budget.

As a final note, at the end of the second quarter, the company's assets were worth US\$246.1 million, liabilities totalled US\$108.3 million and net equity was US\$137.8 million.

VI. 1 PACIFICO GROUP

VI. 1.a Second Quarter results

Premium production by Pacifico Insurance Group (PGA) including general property and casualty insurance (PPS), life insurance (PV) and health insurance (EPS)] reached US\$ 149.2 million in 2Q08, or 8.5% higher than 1Q08 and 27.1% above 2Q07. This significant growth in premium over 2Q07 resulted in larger reserves which grew from US\$ 17.4 million to US\$ 25.9 million.

US\$ mm	Quarter			Change	
	2Q08	1Q08	2Q07	2Q08/1Q08	2Q08/2Q07
Total Gross Premiums	149.2	137.5	117.4	8.5%	27.1%
Retained Premiums	125.2	110.2	91.4	13.6%	37.0%
Reserve Adjustments	25.9	18.6	17.4	39.4%	49.4%
Net Premiums Earned	99.3	91.6	74.0	8.4%	34.1%

Compared to 1Q08, General P&C Insurance led growth with a larger 16.9% production; life insurance grew 1.8% while contributions to EPS dropped 0.7%.

As in 1Q08, growth in General P&C Insurance resulted principally from larger risk underwriting in the personal lines, which grew 22.5% over 1Q08 and 56.7% compared to 2Q07, in line with a portfolio restructuring policy to accomplish greater fragmentation and atomization of claims.

PPS's 2Q08 negative -US\$ 11.7 million technical result, which is a significant deterioration vs. a small loss in 1Q08 (US\$ 0.5 million) and 2Q07's US\$ 7.9 million earnings, is mainly explained by severe claims in the General Insurance (Fire, Technical and Car Segments) because of heavy rains in the first half, since rainfall on the western Andean slopes in Peru's north was 94%, 68% and 38% higher than the historical averages for February, March and April, respectively.

Medical care was also impacted by more frequent claims and rising health care cost following the revaluation of the local currency in which medical costs are denominated and inflationary pressures.

In addition, claimed Rents for Life Insurance under the annuities, mandatory life insurance and SCTR, also increased, and there was a significant rise in reserves for inflation, related products (VAC) which rose from 3.93% in December 2007 to 5.71% in June 2008, in yearly-adjusted terms.

Quarterly financial revenues totaled US\$ 24.2 million, or US\$ 6.0 million more than in 1Q08 and US\$ 5.7 million above those in 2Q07, principally as a consequence of larger PV investments and earnings realized in the stock exchange on PPS trading portfolio.

General expenses rose 1.9 million over 2Q07 mainly as a consequence of a stronger commercial ride and larger PV sale force. However, seen against 1Q08 a 2.2 % drop was accomplished.

In addition, as a consequence of local currency (sol) depreciation in 2Q08, a US\$ 6.5 million translation loss was experienced, resulting from the net active position in soles held by the 3 companies and which amount for S/.223 million. Translation results cumulative to June are accounted for by the Nuevo Sol appreciation from January to April. However, this effect is reverted by the strong local currency depreciation in May and June.

PGA's net results after minority interests in 2Q08 reached -US\$ 9.5 million, a significant deterioration from 1Q08 earnings of US\$ 3.1 million and 2Q07, when they reached US\$ 6.8 million, resulting principally from increased claims during the period under review and the above mentioned translation effects and despite a lower overhead to net premium ratio than fell from 24.0% to 19.8%, and also from the above mentioned increased financial revenues.

To May 2008, Pacífico Insurance Group (PGA) grew 27.1% while the overall market expanded by 23.9%. Such significant growth led to larger market share that rose from 33.3% in May 2007 to 34.2% in May 2008.

Period	Net Earnings*				Ajustment for Consolidation and Minorities	Total Contribution to BAP
	PPS	PV	EPS	PGA		
2Q07	2,263	3,931	585	6,779	(1,645)	5,134
3Q07	(6,615)	2,108	598	(3,908)	948	(2,960)
4Q07	(3,266)	3,351	768	853	(208)	645
1Q08	(121)	2,544	797	3,093	(750)	2,343
2Q08	(7,657)	692	(2,759)	(9,525)	2,311	(7,214)
Var % 2Q08/1Q08	n.a	-73%	-446%	-408%	n.a	-408%
Var % 2Q08/2Q07	-438%	-82%	-572%	-241%	n.a	-241%

VI.2 PACIFICO GENERAL P&C INSURANCE (PPS)

Premiums in 2Q08 totaled US\$ 77.3 million, 16.9% higher than 1Q08 and 17.1% higher than in 2Q07. Compared to 2Q07, growth resulted principally in the Car, Fire and Healthcare Business lines.

To diversify the risk portfolio and reduce volatility in results, a strategy was pursued to increase sales to individuals; results were encouraging and increased the premium production compared to 1Q08 and 2Q07 in 22.5% and 56.7% respectively.

To June 2008, and compared with a year before, personal insurance line grew 48.7%, while market grew 30.5% principally in the Car and Mandatory Car Accident Insurance (SOAT) business lines which grew 98.9% and 93.1%, while market expanded 58.2% and 6.2% respectively.

To 2Q08, net claims totaled US\$ 45.9 million at 105.2% net earned claims (SNG) compared to 81.4% SNG in 1Q08 and 66.1% in 2Q07. This increase resulted mainly from increased claims in fire, healthcare and automobile premiums, with Fire recording the most severe claims. In 2Q08, intense rainfalls and landslides led to significant losses in agriculture, infrastructure and transportation. The following chart and graph show the increase in Peru's north rainfall compared to 2007 and historical averages for the months of February, March and April.

Such adverse natural catastrophe has mainly impacted claims in fire and Technical Insurance, further hurting the company's corporate portfolio, where Peru's largest companies hold their property insurance.

It is worthwhile mentioning that higher Automobile claims result principally from larger production and increased theft of high market value vehicles, as well as heavy vehicle overturns caused by rain in northern Peru.

Average rain flow in the northern zone of the Pacific Basin (mm), 2006-2008

Month	Historical Average	2006	2007	2008	2008/Average	Change	
						2008/2007	Change with respect to the previous month
January	81.9	102.2	107.5	93.4	14.1	-13.1	150.7
February	145.2	221.4	35.0	282.0	94.2	705.1	202.0
March	176.8	264.7	239.7	298.6	68.9	24.6	5.9
April	124.9	102.7	126.6	172.4	38.0	36.2	-42.2
May	43.7	15.7	40.1	32.6P/	-25.5	-18.9	-81.1
June	15.0	29.8	2.4				

Source: Chart N°41 - Technical report N°05 May 2008 -Instituto Nacional de Estadística e Informática (INEI)

However, since June measures to reduce claims in this line of business became increasingly effective.

In addition, Healthcare Insurance claims which account 30.5% of net company claims grew significantly because of higher local and international healthcare cost and increased reserved resulting from greater expected claims from a portfolio that expanded 16% in the first half.

Technical Results in 2Q08 were de -US\$ 9.4 million comparing to positive results in 1Q08 reaching US\$ 1.1 million and US\$ 4.7 million in 2Q07. This drop resulted principally from the higher claims, described above.

In view of higher claims, the company has introduced a correction plan focusing on three initiatives: i) to reduce exposure to corporate business by increasing reinsurance assignments; ii) correcting healthcare deviations by increasing rates and reducing the related medical costs; and iii) continue strategies underway to contain claims in the automobile business line.

Overhead reached US\$ 9.8 million in 2Q08, 2.6% higher than in 1Q08 but 2.2% lower than in 2Q07. Comparing overhead as a percent of premiums shows 2Q08 results reached 22.5% of net premium earnings, lower than in 1Q08 and 2Q07, when 25.2% and 30.5% ratios were earned, respectively. Cost reduction strategies are currently deployed to reduce expenditure.

It is worthwhile mentioning that in June the main property and terrorism reinsurance contracts were renewed for July 2008 to June 2009, under favorable cost conditions and lower retention levels, despite discouraging outcomes during the prior period resulting from last August's earthquake and severe claims in fire and technical insurance lines during the prior quarter.

The local currency's depreciation in 2Q08 resulted in a translation loss reaching US\$ 2mm, compared to profits earned in 1Q08 for US\$ 1.7mm.

Net result for the period reached -US\$ 7.7 million, lower than 1Q08's - US\$122 thousand and 2Q07's US\$2.3 million.

PPS's market share in general insurance to June 2008 reached 34.8%, similar to June 2007's. Strongest growth business lines were vehicles and mandatory car insurance, at 98.9% and 93.1%, respectively.

VI.3 PACIFICO LIFE

Premiums produced during this quarter reached US\$ 44.8 million, 1.8% higher than in 1Q08 and 48.4% above 2Q07. Compared to a year ago, strongest performers were annuities, pension funds, individual life and credit life. Slight growth compared to a year ago is accounted for by individual and credit life insurance products.

Pacífico Vida (US\$ thousand)

Products	Total Premiums			Change %	
	2Q08	1Q08	2Q07	1Q08	2Q07
