FIRST RELIANCE BANCSHARES, INC.

Notes to Condensed Consolidated Financial Statements

Note 1 - Basis of Presentation

The accompanying consolidated financial statements have been prepared in accordance with the requirements for interim financial statements and, accordingly, they are condensed and omit certain disclosures, which would appear in audited annual consolidated financial statements. The consolidated financial statements as of June 30, 2009 and for the interim periods ended June 30, 2009 and 2008 are unaudited and, in the opinion of management, include all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation. The consolidated financial information as of December 31, 2008 has been derived from the audited consolidated financial statements as of that date. For further information, refer to the consolidated financial statements and the notes included in First Reliance Bancshares, Inc.'s Annual Report on Form 10-K for the year ended December 31, 2008.

Note 2 - Recently Issued Accounting Pronouncements

The following is a summary of recent authoritative pronouncements:

In June 2009, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 168, "The FASB Accounting Standards Codification TM and the Hierarchy of Generally Accepted Accounting Principles – a replacement of FASB Statement No. 162," ("SFAS 168"). SFAS 168 establishes the FASB Accounting Standards Codification TM ("Codification") as the source of authoritative generally accepted accounting principles ("GAAP") for nongovernmental entities. The Codification does not change GAAP. Instead, it takes the thousands of individual pronouncements that currently comprise GAAP and reorganizes them into approximately 90 accounting Topics, and displays all Topics using a consistent structure. Contents in each Topic are further organized first by Subtopic, then Section and finally Paragraph. The Paragraph level is the only level that contains substantive content. Citing particular content in the Codification involves specifying the unique numeric path to the content through the Topic, Subtopic, Section and Paragraph structure. FASB suggests that all citations begin with "FASB ASC," where ASC stands for Accounting Standards Codification. SFAS 168, (FASB ASC 105-10-05, 10, 15, 65, 70) is effective for interim and annual periods ending after September 15, 2009 and will not have an impact on the Company's financial position but will change the referencing system for accounting standards. The following pronouncements provide citations to the applicable Codification by Topic, Subtopic and Section in addition to the original standard type and number.

In December 2008, the FASB issued FASB Staff Position ("FSP") SFAS 132(R)-1 (FASB ASC 715-20-65), "Employers' Disclosures about Postretirement Benefit Plan Assets," ("FSP SFAS 132(R)-1"). This FSP provides guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan. The objective of the FSP is to provide the users of financial statements with an understanding of: (a) how investment allocation decisions are made, including the factors that are pertinent to an understanding of investment policies and strategies; (b) the major categories of plan assets; (c) the inputs and valuation techniques used to measure the fair value of plan assets; (d) the effect of fair value measurements using significant unobservable inputs (Level 3) on changes in plan assets for the period; and (e) significant concentrations of risk within plan assets. The FSP also requires a nonpublic entity, as defined in Statement of Financial Accounting Standard ("SFAS") 132, to disclose net periodic benefit cost for each period for which a statement of income is presented. FSP SFAS 132(R)-1 is effective for fiscal years ending after December 15, 2009. The Staff Position will require the Company to provide additional disclosures related to its benefit plans.

FSP EITF 99-20-1, "Amendments to the Impairment Guidance of EITF Issue No. 99-20," (FASB ASC 325-40-65) ("FSP EITF 99-20-1") was issued in January 2009. Prior to the FSP, other-than-temporary impairment was determined by using either Emerging Issues Task Force ("EITF") Issue No. 99-20, "Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests that Continue to be Held by a Transferor in Securitized Financial Assets," ("EITF 99-20") or SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities," ("SFAS 115") depending on the type of security. EITF 99-20 required the use of market participant assumptions regarding future cash flows regarding the probability of collecting all cash flows previously projected. SFAS 115 determined impairment to be other than temporary if it was probable that the holder would be unable to collect all amounts due according to the contractual terms. To achieve a more consistent determination of other-than-temporary impairment, the FSP amends EITF 99-20 to determine any other-than-temporary impairment based on the guidance in SFAS 115, allowing management to use more judgment in determining any other-than-temporary impairment. The FSP was effective for reporting periods ending after December 15, 2008. Management has reviewed the Company's security portfolio and evaluated the portfolio for any other-than-temporary impairments.

FIRST RELIANCE BANCSHARES, INC.

Notes to Condensed Consolidated Financial Statements

Note 2 - Recently Issued Accounting Pronouncements – (continued)

On April 9, 2009, the FASB issued three staff positions related to fair value, which are discussed below.

FSP SFAS 115-2 and SFAS 124-2 (FASB ASC 320-10-65), “Recognition and Presentation of Other-Than-Temporary Impairments,” (“FSP SFAS 115-2 and SFAS 124-2”) categorizes losses on debt securities available-for-sale or held-to-maturity determined by management to be other-than-temporarily impaired into losses due to credit issues and losses related to all other factors. Other-than-temporary impairment (“OTTI”) exists when it is more likely than not that the security will mature or be sold before its amortized cost basis can be recovered. An OTTI related to credit losses should be recognized through earnings. An OTTI related to other factors should be recognized in other comprehensive income. The FSP does not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities. Annual disclosures required in SFAS 115 and FSP SFAS 115-1 and SFAS 124-1 are also required for interim periods (including the aging of securities with unrealized losses).

FSP SFAS 157-4 (FASB ASC 820-10-65), “Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That are Not Orderly” recognizes that quoted prices may not be determinative of fair value when the volume and level of trading activity has significantly decreased. The evaluation of certain factors may necessitate that fair value be determined using a different valuation technique. Fair value should be the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction, not a forced liquidation or distressed sale. If a transaction is considered to not be orderly, little, if any, weight should be placed on the transaction price. If there is not sufficient information to conclude as to whether or not the transaction is orderly, the transaction price should be considered when estimating fair value. An entity’s intention to hold an asset or liability is not relevant in determining fair value. Quoted prices provided by pricing services may still be used when estimating fair value in accordance with SFAS 157; however, the entity should evaluate whether the quoted prices are based on current information and orderly transactions. Inputs and valuation techniques are required to be disclosed in addition to any changes in valuation techniques.

FSP SFAS 107-1 and APB 28-1 (FASB ASC 825-10-65), “Interim Disclosures about Fair Value of Financial Instruments” requires disclosures about the fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements and also requires those disclosures in summarized financial information at interim reporting periods. A publicly traded company includes any company whose securities trade in a public market on either a stock exchange or in the over-the-counter market, or any company that is a conduit bond obligor. Additionally, when a company makes a filing with a regulatory agency in preparation for sale of its securities in a public market it is considered a publicly traded company for this purpose.

The three staff positions are effective for periods ending after June 15, 2009, with early adoption of all three permitted for periods ending after March 15, 2009. The Company adopted the staff positions for its second quarter 10-Q. The staff positions had no material impact on the financial statements. Additional disclosures have been provided where applicable.

Also on April 1, 2009, the FASB issued FSP SFAS 141(R)-1 (FASB ASC 805-20-25, 30, 35, 50), “Accounting for Assets Acquired and Liabilities Assumed in a Business Combination That Arise from Contingencies.” The FSP requires that assets acquired and liabilities assumed in a business combination that arise from a contingency be recognized at fair value. If fair value cannot be determined during the measurement period as determined in SFAS 141 (R), the asset or liability can still be recognized if it can be determined that it is probable that the asset existed or the liability had been incurred as of the measurement date and if the amount of the asset or liability can be reasonably

estimated. If it is not determined to be probable that the asset/liability existed/was incurred or no reasonable amount can be determined, no asset or liability is recognized. The entity should determine a rational basis for subsequently measuring the acquired assets and assumed liabilities. Contingent consideration agreements should be recognized initially at fair value and subsequently reevaluated in accordance with guidance found in paragraph 65 of SFAS 141 (R). The FSP is effective for business combinations with an acquisition date on or after the beginning of the Company's first annual reporting period beginning on or after December 15, 2008. The Company will assess the impact of the FSP if and when a future acquisition occurs.

FIRST RELIANCE BANCSHARES, INC.

Notes to Condensed Consolidated Financial Statements

Note 2 - Recently Issued Accounting Pronouncements – (continued)

The Securities and Exchange Commission (“SEC”) issued Staff Accounting Bulletin (“SAB”) No. 111 (FASB ASC 320-10-S99-1) on April 9, 2009 to amend Topic 5.M., “Other Than Temporary Impairment of Certain Investments in Debt and Equity Securities” and to supplement FSP SFAS 115-2 and SFAS 124-2. SAB 111 maintains the staff’s previous views related to equity securities; however debt securities are excluded from its scope. The SAB provides that “other-than-temporary” impairment is not necessarily the same as “permanent” impairment and unless evidence exists to support a value equal to or greater than the carrying value of the equity security investment, a write-down to fair value should be recorded and accounted for as a realized loss. The SAB was effective upon issuance and had no impact on the Company’s financial position.

SFAS 165 (FASB ASC 855-10-05, 15, 25, 45, 50, 55), “Subsequent Events,” (“SFAS 165”) was issued in May 2009 and provides guidance on when a subsequent event should be recognized in the financial statements. Subsequent events that provide additional evidence about conditions that existed at the date of the balance sheet should be recognized at the balance sheet date. Subsequent events that provide evidence about conditions that arose after the balance sheet date but before financial statements are issued, or are available to be issued, are not required to be recognized. The date through which subsequent events have been evaluated must be disclosed as well as whether it is the date the financial statements were issued or the date the financial statements were available to be issued. For nonrecognized subsequent events, which should be disclosed to keep the financial statements from being misleading, the nature of the event and an estimate of its financial effect, or a statement that such an estimate cannot be made, should be disclosed. The standard is effective for interim or annual periods ending after June 15, 2009. See Note 11 for Management’s evaluation of subsequent events.

The FASB issued SFAS 166 (not yet reflected in FASB ASC), “Accounting for Transfers of Financial Assets – an amendment of FASB Statement No. 140,” (“SFAS 166”) in June 2009. SFAS 166 limits the circumstances in which a financial asset should be derecognized when the transferor has not transferred the entire financial asset by taking into consideration the transferor’s continuing involvement. The standard requires that a transferor recognize and initially measure at fair value all assets obtained (including a transferor’s beneficial interest) and liabilities incurred as a result of a transfer of financial assets accounted for as a sale. The concept of a qualifying special-purpose entity is removed from SFAS 140 along with the exception from applying FIN 46(R). The standard is effective for the first annual reporting period that begins after November 15, 2009, for interim periods within the first annual reporting period, and for interim and annual reporting periods thereafter. Earlier application is prohibited. The Company does not expect the standard to have any impact on the Company’s financial position.

SFAS 167 (not yet reflected in FASB ASC), “Amendments to FASB Interpretation No. 46(R),” (“SFAS 167”) was also issued in June 2009. The standard amends FIN 46(R) to require a company to analyze whether its interest in a variable interest entity (“VIE”) gives it a controlling financial interest. A company must assess whether it has an implicit financial responsibility to ensure that the VIE operates as designed when determining whether it has the power to direct the activities of the VIE that significantly impact its economic performance. Ongoing reassessments of whether a company is the primary beneficiary is also required by the standard. SFAS 167 amends the criteria to qualify as a primary beneficiary as well as how to determine the existence of a VIE. The standard also eliminates certain exceptions that were available under FIN 46(R). SFAS 167 is effective as of the beginning of each reporting entity’s first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period, and for interim and annual reporting periods thereafter. Earlier application is prohibited. Comparative disclosures will be required for periods after the effective date. The Company does not expect the standard to have any impact on the Company’s financial position.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies are not expected to have a material impact on the Company's financial position, results of operations or cash flows.

Note 3 - Reclassifications

Certain captions and amounts in the financial statements in the Company's Form 10-Q for the quarter ended June 30, 2008 were reclassified to conform to the June 30, 2009 presentation.

## FIRST RELIANCE BANCSHARES, INC.

## Notes to Condensed Consolidated Financial Statements

## Note 4 - Comprehensive Income

Comprehensive Income - Accounting principles generally require that recognized income, expenses, gains, and losses be included in net income. Although certain changes in assets and liabilities, such as unrealized gains and losses on available-for-sale securities, are reported as a separate component of the equity section of the balance sheet, such items, along with net income, are components of comprehensive income.

The components of other comprehensive income and related tax effects are as follows:

	Pre-tax Amount	Tax (Expense) Benefit	Net-of-tax Amount
<b>For the Six Months Ended June 30, 2009:</b>			
Net unrealized losses on securities available-for-sale arising during the period	\$ (687,653)	\$ 233,802	\$ (453,851)
Less, reclassification adjustment for gains realized in net income	1,029,459	(350,016)	679,443
	\$ (1,717,112)	\$ 583,818	\$ (1,133,294)
<b>For the Six Months Ended June 30, 2008</b>			
Net unrealized losses on securities available-for-sale	\$ (1,156,595)	\$ 393,242	\$ (763,353)
Reclassification adjustment for gains (losses) realized in net income	-	-	-
	\$ (1,156,595)	\$ 393,242	\$ (763,353)
<b>For the Three Months Ended June 30, 2009:</b>			
Net unrealized losses on securities available-for-sale arising during the period	\$ (1,084,399)	\$ 368,696	\$ (715,703)
Less, reclassification adjustment for gains realized in net income	1,029,459	(350,016)	679,443
	\$ (2,113,858)	\$ 718,712	\$ (1,395,146)
<b>For the Three Months Ended June 30, 2008</b>			
Net unrealized losses on securities available-for-sale	\$ (1,301,521)	\$ 442,517	\$ (859,004)
Reclassification adjustment for gains (losses) realized in net income	-	-	-
	\$ (1,301,521)	\$ 442,517	\$ (859,004)

## NOTE 5 - INVESTMENT SECURITIES

Total	\$ 49,346,045	\$ 1,355,428	\$ 10,538,855	\$ 915,636	\$ 59,884,900	\$ 2,271,064
December 31, 2008						
	\$ 87,997	\$ 16	\$ -	\$ -	\$ 87,997	\$ 16

U.S. government  
agencies

Municipals	16,846,808	836,446	3,719,646	637,833	20,566,454	1,474,279
Other	124,300	94,450	-	-	124,300	94,450
Total	\$ 17,059,105	\$ 930,912	\$ 3,719,646	\$ 637,833	\$ 20,778,751	\$ 1,568,745

At June 30, 2009, securities classified as available-for-sale are recorded at fair market value. Approximately 40.32% of the unrealized losses, or 17 individual securities, consisted of securities in a continuous loss position for twelve months or more. The Company does not intend to sell these securities and it is more likely than not that the Company will not be required to sell these securities before recovery of their amortized cost. The Company believes, based on industry analyst reports and credit ratings, that the deterioration in value is attributable to changes in market interest rates and is not in the credit quality of the issuer and therefore, these losses are not considered other-than-temporary.

## FIRST RELIANCE BANCSHARES, INC.

## Notes to Condensed Consolidated Financial Statements

## Note 6 – Shareholders' Equity

Common Stock – The following is a summary of the changes in common shares outstanding for the six months ended June 30, 2009 and 2008.

	Six Months Ended June 30,	
	2009	2008
Common shares outstanding at beginning of the period	3,525,004	3,494,646
Issuance of non-vested restricted shares	62,222	14,028
Issuance of stock to employee	200	
Exercise of stock options	-	4,850
Common shares outstanding at end of the period	3,587,426	3,513,524

Preferred Stock - On February 24, 2009, the Company's Articles of Incorporation were amended to authorize the issuance of a class of 10,000,000 shares of preferred stock, having no par value. Subject to certain conditions, the amendment authorizes the Company's Board of Directors to issue preferred stock without shareholders' approval. Under this amendment, the Board is authorized to determine the terms of one or more series of preferred stock, including the preferences, rights, and limitations of each series.

On March 6, 2009, the Company completed a transaction with the United States Treasury ("Treasury") under the Troubled Asset Relief Program Capital Purchase Program ("TARP CPP"), which was amended by the enactment of the American Recovery and Reinvestment Act of 2009 on February 17, 2009. Under the TARP CPP, the Company sold 15,349 shares of its Series A Cumulative Perpetual Preferred Stock. In addition, the Treasury received a warrant to purchase 767 shares of the Company's Series B Cumulative Perpetual Preferred Stock, which was immediately exercised by the Treasury for a nominal exercise price. The preferred shares issued to the Treasury qualify as tier 1 capital for regulatory purposes.

The Series A Preferred Stock is a senior cumulative perpetual preferred stock that has a liquidation preference of \$1,000 per share, pays cumulative dividends at a rate of 5% per year for the first five years and thereafter at a rate of 9% per year. Dividends are payable quarterly. At any time, the Company may, at its option and with regulatory approval, redeem the Series A Preferred Stock at par value plus accrued and unpaid dividends. The Series A Preferred Stock is generally non-voting. Prior to March 6, 2012, unless the Company has redeemed the Series A Preferred Stock or the Treasury has transferred the Series A Preferred Stock to a third party, the consent of the Treasury will be required for the Company to increase its common stock dividend or repurchase its common stock or other equity or capital securities, other than in connection with benefit plans consistent with past practices and certain other circumstances. A consequence of the Series A Preferred Stock purchase includes certain restrictions on executive compensation that could limit the tax deductibility of compensation the Company pays to executive management.

The Series B Preferred Stock is a cumulative perpetual preferred stock that has the same rights, preferences, privileges, voting rights and other terms as the Series A Preferred Stock, except that dividends will be paid at the rate of 9% per year and may not be redeemed until all the Series A Preferred Stock has been redeemed.

The proceeds from the issuance of the Series A and Series B were allocated based on the relative fair value of each series based on a discounted cash flow model. As a result of the valuations, \$14,492,526 and \$856,474 was allocated

to the Series A Preferred Stock and Series B Preferred Stock, respectively. This resulted in a discount of \$973,260 for the Series A stock and a premium of \$82,572 for the Series B stock. The discount and premium will be accreted and amortized, respectively, through retained earnings over a five-year estimated life using the effective interest method. For the six months and quarter ended June 30, 2009, accretion of the Series A Preferred Stock discount totaled \$62,363 and \$48,503 respectively, and the amortization of the Series B Preferred Stock premium totaled \$5,291 and \$4,115, respectively. The net amount of the accretion and amortization was treated as a deemed dividend to preferred shareholders in the computation of earnings per share.

## FIRST RELIANCE BANCSHARES, INC.

## Notes to Condensed Consolidated Financial Statements

## Note 7 - Earnings Per Share

Net income available to common shareholders represents net income adjusted for preferred dividends including dividends declared, accretions of discounts and amortization of premiums on preferred stock issuances and cumulative dividends related to the current dividend period that have not been declared as of period end.

The following is a summary of the earnings (loss) per share calculations for the six months and three months ended June 30, 2009 and 2008.

	Six Months Ended June 30,		Three Months Ended June 30,	
	2009	2008	2009	2008
Earnings (loss) available to common shareholders				
Net income (loss)	\$ (1,140,749)	\$ 1,509,544	\$ (1,154,614)	\$ 683,421
Preferred stock dividends	268,132	-	208,547	-
Deemed dividends on preferred stock resulting from net accretion of discount and amortization of premium	57,072	-	44,388	-
Net income (loss) available to common shareholders	\$ (1,465,953)	\$ 1,509,544	\$ (1,407,549)	\$ 683,421
Basic earnings per share:				
Net income (loss) available to common shareholders	\$ (1,465,953)	\$ 1,509,544	\$ (1,407,549)	\$ 683,421
Average common shares outstanding - basic	3,546,386	3,504,070	3,567,533	3,445,001
Basic earnings (loss) per share	\$ (0.41)	\$ 0.43	\$ (0.40)	\$ .20
Diluted earnings per share:				
Net income (loss) available to common shareholders	\$ (1,465,953)	\$ 1,509,544	\$ (1,407,549)	\$ 683,421
Average common shares outstanding - basic	3,546,386	3,504,070	3,567,533	3,445,001
Dilutive potential common shares	-	28,602	-	104,902
Average common shares outstanding - diluted	3,546,386	3,532,672	3,567,533	3,549,903
Diluted earnings (loss) per share	\$ (0.41)	\$ 0.43	\$ (0.40)	\$ .20

## Note 8 - Equity Incentive Plan

On January 19, 2006, the Company adopted the 2006 Equity Incentive Plan, which provides for the granting of dividend equivalent rights options, performance unit awards, phantom shares, stock appreciation rights and stock awards, each of which shall be subject to such conditions based upon continued employment, passage of time or satisfaction of performance criteria or other criteria as permitted by the plan. The plan allows granting up to 350,000 shares of stock, to officers, employees, and directors, consultants and service providers of the Company or its affiliates. Awards may be granted for a term of up to ten years from the effective date of grant. Under this Plan, our Board of Directors has sole discretion as to the exercise date of any awards granted. The per-share exercise price of incentive stock awards may not be less than the market value of a share of common stock on the date the award is granted. Any awards that expire unexercised or are canceled become available for re-issuance.

The Company can issue the restricted shares as of the grant date either by the issuance of share certificate(s) evidencing restricted shares or by documenting the issuance in uncertificated or book entry form on the Company's stock records. Except as provided by the Plan, the employee does not have the right to make or permit to exist any transfer or hypothecation of any restricted shares. When restricted shares vest the employee must either pay the Company within two business days the amount of all tax withholding obligations imposed on the Company or make an election pursuant to Section 83(b) of the Internal Revenue Code to pay taxes at grant date.

## FIRST RELIANCE BANCSHARES, INC.

## Notes to Condensed Consolidated Financial Statements

## Note 8 - Equity Incentive Plan – (continued)

Restricted shares may be subject to one or more objective employment, performance or other forfeiture conditions as established by the Plan Committee at the time of grant. Any shares of restricted stock that are forfeited will again become available for issuance under the Plan. An employee or director has the right to vote the shares of restricted stock after grant until they are forfeited or vested. Compensation cost for restricted stock is equal to the market value of the shares at the date of the award and is amortized to compensation expense over the vesting period. Dividends, if any, will be paid on awarded but unvested stock.

During six months ended June 30, 2009 the Company issued 62,222 of restricted stock pursuant to the 2006 Equity Incentive Plan. The shares cliff vest in three years and are fully vested in 2012. The weighted-average fair value of restricted stock issued during the six months ended June 30, 2009 was \$2.25 per share. Compensation cost associated with the issuance was \$139,999. There were no restricted stock forfeitures during the six months ended June 30, 2009. Deferred compensation expense of \$77,860, relating to restricted stock, was amortized to income during six months ended June 30, 2009.

The 2006 Equity Incentive Plan allows for the issuance of Stock Appreciation Rights ("SARs"). The SARs entitle the participant to receive the excess of (1) the market value of a specified or determinable number of shares of the stock at the exercise date over the fair value at grant date or (2) a specified or determinable price which may not in any event be less than the fair market value of the stock at the time of the award. Upon exercise, the Company can elect to settle the awards using either Company stock or cash. The shares start vesting after five years and vest at 20% per year until fully vested. Compensation cost for SARs is amortized to compensation expense over the vesting period.

There were no SARs awarded, exercised or forfeited during the six months ended June 30, 2009 and 2008. The SARs compensation expense for the six months ended June 30, 2009 and 2008 was \$36,917 and \$37,121 respectively.

As of June 30, 2009 and 2008, there were 93,981 SARs outstanding with a weighted average exercise price of \$14.95.

## Note 9 – STOCK-BASED COMPENSATION

The Company terminated its 2003 Employee Stock Option Plan and replaced it with the 2006 Equity Incentive Plan. Outstanding options issued under any former stock option plans will be honored in accordance with the terms and conditions in effect at the time they were granted, except that they are not subject to reissuance. At June 30, 2009, 269,447 options were outstanding and exercisable. No stock options have been granted since June 2005.

A summary of the status of the Company's 2003 stock option plan as of June 30, 2009 and 2008, and changes during the period is presented below:

	2009		2008	
	Shares	Weighted-Average Exercise Price	Shares	Weighted-Average Exercise Price
Outstanding at beginning of year	269,447	\$ 8.36	278,847	\$ 8.32
Exercised			(4,850)	5.15

Edgar Filing: FIRST RELIANCE BANCSHARES INC - Form 10-Q

Forfeited				(2,500)		11.00
Outstanding at end of period	269,447	\$	8.36	271,497	\$	8.35

FIRST RELIANCE BANCSHARES, INC.

Notes to Condensed Consolidated Financial Statements

NOTE 10 - FAIR VALUE OF FINANCIAL INSTRUMENTS

The fair value of a financial instrument is the amount for which the asset or obligation could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Fair value estimates are made at a specific point in time based on relevant market information and information about the financial instruments. Because no market value exists for a significant portion of the financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors.

The following methods and assumptions were used to estimate the fair value of significant financial instruments:

Cash and Due from Banks - The carrying amount is a reasonable estimate of fair value.

Federal Funds Sold and Purchased - Federal funds sold and purchased are for a term of one day and the carrying amount approximates the fair value.

Securities Available-for-Sale - Fair value equals the carrying amount, which is the quoted market price. If quoted market prices are not available, fair values are based on quoted market prices of comparable securities.

Nonmarketable Equity Securities - The carrying amount of nonmarketable equity securities is a reasonable estimate of fair value since no ready market exists for these securities.

Loans Held-for-Sale - The carrying amount of loans held for sale is a reasonable estimate of fair value.

Loans Receivable - For certain categories of loans, such as variable rate loans, which are repriced frequently and have no significant change in credit risk and credit card receivables, fair values are based on the carrying amounts. The fair value of other types of loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to the borrowers with similar credit ratings and for the same remaining maturities.

Deposits - The fair value of demand deposits, savings, and money market accounts is the amount payable on demand at the reporting date. The fair values of certificates of deposit are estimated using a discounted cash flow calculation that applies current interest rates to a schedule of aggregated expected maturities.

Securities Sold Under Agreements to Repurchase - The carrying amount is a reasonable estimate of fair value because these instruments typically have terms of one day.

Advances From Federal Home Loan Bank - The fair values of fixed rate borrowings are estimated using a discounted cash flow calculation that applies the Company's current borrowing rate from the Federal Home Loan Bank. The carrying amounts of variable rate borrowings are reasonable estimates of fair value because they can be repriced frequently.

Junior Subordinated Debentures and Note Payable - The carrying value of the junior subordinated debentures and note payable approximates their fair value since they were issued at a floating rate.

Accrued Interest Receivable and Payable - The carrying value of these instruments is a reasonable estimate of fair value.

Off-Balance-Sheet Financial Instruments - Fair values of off-balance sheet lending commitments are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing.

-15-

Standby letters of credit	2,636,141	-	3,006,214	-	

The Company adopted Statement No. 157 effective January 1, 2008, which did not have a material impact on the financial statements. Statement No. 157 applies to all assets and liabilities that are being measured and reported on a fair value basis. Statement No. 157 requires new disclosure that establishes a framework for measuring fair value in GAAP, and expands disclosure about fair value measurements. This statement enables the reader of the financial statements to assess the inputs used to develop those measurements by establishing a hierarchy for ranking the quality and reliability of the information used to determine fair values. The statement requires that assets and liabilities carried at fair value will be classified and disclosed in one of the following three categories:

Level 1: Quoted market prices in active markets for identical assets or liabilities.

Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data.

Level 3: Unobservable inputs that are not corroborated by market data.

In determining the appropriate levels, the Company performs a detailed analysis of the assets and liabilities that are subject to Statement No. 157. At each reporting period, all assets and liabilities for which the fair value measurement is based on significant unobservable inputs are classified as Level 3.

-16-

---

## FIRST RELIANCE BANCSHARES, INC.

## Notes to Condensed Consolidated Financial Statements

## NOTE 10 - FAIR VALUE OF FINANCIAL INSTRUMENTS - continued

The table below presents the balances of assets and liabilities measured at fair value on a recurring basis by level within the hierarchy.

	June 30, 2009			
	Total	Level 1	Level 2	Level 3
Available for- sale- securities	\$ 89,605,156	\$ -	\$ 89,605,156	\$ -
Mortgage loans held for sale (1)	14,925,745	-	14,925,745	-

(1) Carried at the lower of cost or market.

The Company has no liabilities carried at fair value or measured at fair value on a nonrecurring basis.

The Company is predominantly an asset-based lender with real estate serving as collateral on a substantial majority of loans. Loans that are deemed impaired are primarily valued on a nonrecurring basis at the fair values of the underlying real estate collateral. Such fair values are obtained using independent appraisals, which the Company considers to be level 2 inputs. The aggregate carrying amount of impaired loans at June 30, 2009 was \$49,263,581.

Repossessed assets required in settlement of loans are carried at the lower of carrying value or fair value on a non-recurring basis. The fair is dependent primarily upon independent appraisals, which the Company considers level 2 inputs. At June 30, 2009, the recorded investment in repossessed assets acquired in the settlement of loans was \$3,901,800.

## Note 11- SUBSEQUENT EVENTS

Subsequent events are events or transactions that occur after the balance sheet date but before financial statements are issued. Recognized subsequent events are events or transactions that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing financial statements. Nonrecognized subsequent events are events that provide evidence about conditions that did not exist at the date of the balance sheet but arose after that date. Management has reviewed events occurring through August 13, 2009, the date the financial statements were issued and no subsequent events occurred requiring accrual or disclosure.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation

The following discussion reviews our results of operations and assesses our financial condition. You should read the following discussion and analysis in conjunction with the accompanying consolidated financial statements. The commentary should be read in conjunction with the discussion of forward-looking statements, the financial statements and the related notes and the other statistical information included in this report.

Advisory Note Regarding Forward-Looking Statements

The statements contained in this report on Form 10-Q that are not historical facts are forward-looking statements subject to the safe harbor created by the Private Securities Litigation Reform Act of 1995. We caution readers of this report that such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of us to be materially different from those expressed or implied by such forward-looking statements. Although we believe that our expectations of future performance is based on reasonable assumptions within the bounds of our knowledge of our business and operations, there can be no assurance that actual results will not differ materially from our expectations.

Factors which could cause actual results to differ from expectations include, among other things:

- the challenges, costs and complications associated with the continued development of our branches;
- the potential that loan charge-offs may exceed the allowance for loan losses or that such allowance will be increased as a result of factors beyond the control of us;
  - our dependence on senior management;
- competition from existing financial institutions operating in our market areas as well as the entry into such areas of new competitors with greater resources, broader branch networks and more comprehensive services;
- adverse conditions in the stock market, the public debt market, and other capital markets (including changes in interest rate conditions);
  - changes in deposit rates, the net interest margin, and funding sources;
  - inflation, interest rate, market, and monetary fluctuations;
  - risks inherent in making loans including repayment risks and value of collateral;
- the strength of the United States economy in general and the strength of the local economies in which we conduct operations may be different than expected resulting in, among other things, a deterioration in credit quality or a reduced demand for credit, including the resultant effect on our loan portfolio and allowance for loan losses;
  - fluctuations in consumer spending and saving habits;
  - the demand for our products and services;
  - technological changes;
- the challenges and uncertainties in the implementation of our expansion and development strategies;
  - the ability to increase market share;
  - the adequacy of expense projections and estimates of impairment loss;
- the impact of changes in accounting policies by the Securities and Exchange Commission;
  - unanticipated regulatory or judicial proceedings;
- the potential negative effects of future legislation affecting financial institutions (including without limitation laws concerning taxes, banking, securities, and insurance);
- the effects of, and changes in, trade, monetary and fiscal policies and laws, including interest rate policies of the Board of Governors of the Federal Reserve System;
- the timely development and acceptance of products and services, including products and services offered through alternative delivery channels such as the Internet;

- the impact on our business, as well as on the risks set forth above, of various domestic or international military or terrorist activities or conflicts;
- other factors described in this report and in other reports we have filed with the Securities and Exchange Commission; and
  - our success at managing the risks involved in the foregoing.

Forward-looking statements speak only as of the date on which they are made. We undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which the statement is made to reflect the occurrence of unanticipated events.

FIRST RELIANCE BANCSHARES, INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

Overview

The following discussion describes our results of operation for the six months and quarter ended June 30, 2009 as compared to the six months and quarter ended June 30, 2008 and also analyzes our financial condition as of June 30, 2009 as compared to December 31, 2008.

Like most community banks, we derive the majority of our income from interest received on our loans and investments. Our primary source of funds for making these loans and investments is our deposits, on which we pay interest. Consequently, one of the key measures of our success is our amount of net interest income, or the difference between the income on our interest-earning assets, such as loans and investments, and the expense on our interest-bearing liabilities, such as deposits and borrowings. Another key measure is the spread between the yield we earn on these interest-earning assets and the rate we pay on our interest-bearing liabilities, which is called our net interest spread.

There are risks inherent in all loans, so we maintain an allowance for loan losses to absorb probable losses on existing loans that may become uncollectible. We maintain this allowance by charging a provision for loan losses against our operating earnings for each period. We have included a detailed discussion of this process, as well as several tables describing our allowance for loan losses.

In addition to earning interest on our loans and investments, we earn income through fees and other charges to our customers. We have also included a discussion of the various components of this non-interest income, as well as of our non-interest expense.

The following discussion and analysis also identifies significant factors that have affected our financial position and operating results during the periods included in the accompanying financial statements. We encourage you to read this discussion and analysis in conjunction with our financial statements and the other statistical information included in our filings with the Securities and Exchange Commission.

Critical Accounting Policies

We have adopted various accounting policies which govern the application of accounting principles generally accepted in the United States in the preparation of our financial statements. Our significant accounting policies are described in the notes to the consolidated financial statements at December 31, 2008 as filed on our annual report on Form 10-K. Certain accounting policies involve significant judgments and assumptions by us which have a material impact on the carrying value of certain assets and liabilities. We consider these accounting policies to be critical accounting policies. The judgments and assumptions we use are based on the historical experience and other factors, which we believe to be reasonable under the circumstances. Because of the nature of the judgments and assumptions we make, actual results could differ from these judgments and estimates which could have a major impact on our carrying values of assets and liabilities and our results of operations.

We believe the allowance for loan losses is a critical accounting policy that requires the most significant judgments and estimates used in preparation of our consolidated financial statements. Refer to the portion of this discussion that addresses our allowance for loan losses for description of our processes and methodology for determining our allowance for loan losses.

### Regulatory Matters

We are not aware of any current recommendations by regulatory authorities which, if they were to be implemented, would have a material effect on liquidity, capital resources or operations.

### Effect of Economic Trends

Economic conditions, competition and federal monetary and fiscal policies also affect financial institutions. Lending activities are also influenced by regional and local economic factors, such as housing supply and demand, competition among lenders, customer preferences and levels of personal income and savings in our primary market area.

FIRST RELIANCE BANCSHARES, INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

Results of Operations

For the quarter ended June 30, 2009, we incurred a net loss of \$1,154,614 compared to net income of \$683,421 for the quarter ended June 30, 2008. Basic and diluted earnings (loss) per share were (\$0.40), compared to \$0.20 reported in the prior year .

We realized a net loss of \$1,140,749 for the six months ended June 30, 2009, compared to net income of \$1,509,544 for the six months ended June 30, 2008. This resulted in basic and diluted earnings (loss) per share of (\$0.41) for the six months ended June 30, 2009, compared to \$0.43 for the same period of 2008.

The decline in net income for both periods was caused by the significant increase in our provision for loan losses due to the higher level of charged off loans and to the decline of our net interest income. The reduction in our net interest income is attributed to the lost income on our nonaccruing loans and to the net interest margin compression due to market interest rates for the 2009 reporting periods being lower than the rates in effect during the comparable periods in 2008.

Income Statement Review

Net Interest Income

The largest component of our net income is its net interest income, which is the difference between the income earned on assets and interest paid on deposits and on the borrowings used to support such assets. Net interest income is determined by the yields earned on our interest-earning assets and the rates paid on interest-bearing liabilities, the relative amounts of interest-earning assets and interest-bearing liabilities, and the degree of mismatch and the maturity and repricing characteristics of its interest-earning assets and interest-bearing liabilities. Total interest-earning assets yield less total interest-bearing liabilities rate represents our net interest rate spread.

Net interest income decreased \$941,541, or 19.50%, to \$3,885,709 for the quarter ended June 30, 2009, from \$4,827,250 for the comparable period in 2008. Our net interest income for the six months ended June 30, 2009 and 2008 was \$8,038,802 and \$9,795,234, respectively. This represents a decline of \$1,756,432 or 17.93%. The decrease in the net interest income for both periods was attributable to the prevailing market interest rates during 2009 being lower than the rates in effect during the comparable periods in 2008. Since approximately 55% of the average volume of our loan portfolio included variable interest rate loans, these lower rates negatively impacted interest income. In addition, the decrease in net interest income was significantly impacted by the increase in our nonaccruing loans, which were \$23,084,908 higher at June 30, 2009 than at June 30, 2008.

For the second quarter of 2009 and 2008, total interest income was \$7,801,822 and \$9,290,924, respectively. This equated to a tax-equivalent yield of 5.64% and 6.83%, respectively, on our averaged interest-earning assets. The yield on our interest-earning assets for the quarter ended June 30, 2009 was 119 basis points lower than the yield for the comparable period of 2008. Total interest income for the six months ended June 30, 2009 was \$15,624,875, a decline of \$3,492,701, or 18.27%, from the total interest income earned during the first six months of 2008. The tax-equivalent yield for 2009 was 141 basis points lower than the yield for 2008. For the first six months of 2009 and 2008, the tax-equivalent yield realized on our earning assets was 5.64% and 7.05%, respectively.

For the second quarter of 2009 and 2008, the primary components of interest income were interest earned on loans of \$6,870,317 and \$8,560,841 and interest on investment securities of \$904,035 and \$657,462, respectively. For the first six months of 2009 and 2008, interest income on loans was \$13,838,054 and \$17,660,316 and interest on investment securities was \$1,748,769 and \$1,331,456, respectively.

Average earning assets for the three and six months ended June 30, 2009, were \$11,314,046, or 2.04%, and \$16,660,920, or 3.02%, higher than the average earnings assets for the comparable periods of 2008. The increase in both periods was primarily due to growth in the average investment portfolio, which increased \$21,587,737, or 37.74%, and \$19,540,113, or 33.87%, respectively.

The average rate paid on our interest-bearing liabilities was 2.80% and 3.53% for the quarter ended June 30, 2009 and 2008, respectively, which represented a decrease of 73 basis points. The average rate paid on our interest-bearing liabilities declined 91 basis points from 3.70% for the first six months of 2008 to 2.79% for the comparable 2009 period.

FIRST RELIANCE BANCSHARES, INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

Our average interest-bearing liabilities increased \$52,747,355, or 10.37%, from the quarter ended June 30, 2008, to \$561,243,480 for the quarter ended June 30, 2009. For the six months ended June 30, 2009 and 2008, our interest-bearing liabilities were \$549,105,744 and \$506,685,590, respectively. This represents an increase of \$42,420,154, or 8.37%. The increases for both periods were due mainly to the increase in the average balance of interest-bearing deposits, which increased \$75,658,544, or 18.49%, and \$53,395,137, or 13.17%, for the three and six months ended June 30, 2009, respectively.

Our net interest spread was 2.84% for the three months ended June 30, 2009, compared to 3.30% for the three months ended June 30, 2008. This represents a decrease of 46 basis points. For the six months ended June 30, 2009, our net interest spread was 2.85%, compared to 3.35% for the six months ended June 30, 2008. This represents a decrease of 50 basis points. The net interest spread is the difference between the yield earned on our interest-earning assets and the rate paid on our interest-bearing liabilities.

Our net interest margin is calculated as tax equivalent net interest income divided by average interest-earning assets. Our net interest margin for the second quarter of 2009 was 2.86%, which is 73 basis points lower than our net interest margin of 3.59% for the second quarter of 2008. For the six months ended June 30, 2009, our net interest margin was 2.94%, which is 71 basis points lower than our net interest margin of 3.65% for the six months ended June 30, 2008.

Average Balances, Income and Expenses, and Rates

For the periods indicated, the following tables set forth certain information relating to our average balance sheet and its average yields on assets and average costs of liabilities. Such yields are derived by dividing income or expense by the average balance of the corresponding assets or liabilities. Average balances have been derived from the daily balances throughout the periods indicated.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

Provision and Allowance for Loan Losses

We have developed policies and procedures for evaluating the overall quality of our credit portfolio and the timely identification of potential problem credits. On a quarterly basis, our Board of Directors reviews and approves the appropriate level for the allowance for loan losses based upon management's recommendations, the results of the internal monitoring and reporting system, and an analysis of economic conditions in our market. The objective of management has been to fund the allowance for loan losses at a level greater or equal to our internal risk measurement system for loan risk.

Additions to the allowance for loan losses, which are expensed as the provision for loan losses on our income statement, are made periodically to maintain the allowance at an appropriate level based on management's analysis of the potential risk in the loan portfolio. Loan losses and recoveries are charged or credited directly to the allowance. The amount of the provision is a function of the level of loans outstanding, the level of nonperforming loans, historical loan loss experience, the amount of loan losses actually charged against the reserve during a given period, and current and anticipated economic conditions.

The allowance represents an amount which management believes will be adequate to absorb inherent losses on existing loans that may become uncollectible. Our judgment in determining the adequacy of the allowance is based on evaluations of the collectability of loans, including consideration of factors such as the balance of impaired loans; the quality, mix and size of our overall loan portfolio; economic conditions that may affect the borrower's ability to repay the amount and quality of collateral securing the loans; our limited historical loan loss experience and a review of specific problem loans.

The amount of the allowance is periodically adjusted based on changing circumstances as a component of the provision for loan losses. We charge recognized losses against the allowance and add subsequent recoveries back to the allowance. Under our policy, we evaluate the allowance for loan losses using three categories; specific reserves, historical losses based on loan category, and environmental factors. Detailed calculations are documented on a monthly basis and submitted through appropriate areas for approval to ensure adequate levels for the allowance for loan losses. Management and the Board believe that the current methodology meets regulatory requirements and industry standards.

Our various regulatory agencies review our allowance for loan losses through their periodic examinations, and they may require additions to the allowance for loan losses based on their judgment about information available to them at the time of their examinations. Our losses will undoubtedly vary from our estimates, and it is possible that charge-offs in future periods will exceed the allowance for loan losses as estimated at any point in time.

As of June 30, 2009 and 2008, the allowance for loan losses was \$7,541,049 and \$5,740,860, respectively, an increase of \$1,800,189, or 31.36%, over the 2008 allowance. As a percentage of total loans, the allowance for loan losses was 1.68% and 1.23% at June 30, 2009 and 2008, respectively. The increase in the allowance for loan losses was driven by the significant increase in the amount of net loans charged off during 2009. During the three months ended June 30, 2009, our net loans charged off totaled \$3,545,444 compared to \$444,535 for the three months ended June 30, 2008, an increase of \$2,900,909. For the six months ended June 30, 2009 and 2008, our net loans charged off totaled \$5,538,672 and \$677,144, respectively, an increase of \$4,861,529.

For the second quarter of 2009 and 2008, the provision for loan losses was \$3,555,442 and \$645,794, respectively, an increase of \$2,909,648. The provision for loan losses was \$4,855,822 and \$1,147,397 for the six months ended June 30, 2009 and 2008, respectively. This represents an increase of \$3,708,425. The increase in the provision for loan losses for both periods is primarily attributable to the higher than normal amount of our net loans charged-off.

We believe the allowance for loan losses at June 30, 2009, is adequate to meet potential loan losses inherent in the loan portfolio.

## FIRST RELIANCE BANCSHARES, INC.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

## Noninterest Income

The following table sets forth information related to our noninterest income.

	Three months ended June 30,		Six months ended June 30,	
	2009	2008	2009	2008
Service fees on deposit accounts	\$ 474,486	\$ 492,717	\$ 935,094	\$ 929,852
Gain on sale of mortgage loans	554,038	566,973	1,214,537	1,126,357
Gain on sale of securities available-for-sale	1,029,459	-	1,029,459	-
Other income	255,734	339,811	827,744	675,086
Total noninterest income	\$ 2,313,717	\$ 1,399,501	\$ 4,006,834	\$ 2,731,295

Compared to 2008, noninterest income increased \$914,216 for the second quarter of 2009, while it increased \$1,275,539 for the six months ended June 30, 2009. The increase in both periods is largely attributable to the \$1,029,459 gain on sale of securities available-for-sale. The underlying securities were sold in accordance with our strategy to reposition the investment portfolio in order to maximize the yield on our investment securities.

Other income consisted primarily of other service fees and commissions, income from bank owned life insurance and other miscellaneous types of income.

## Noninterest Expense

Total noninterest expense for the three months ended June 30, 2009, was \$4,753,923, an increase of \$26,246 from the three months ended June 30, 2008. For the six months ended June 30, 2009 and 2008, noninterest expense totaled \$9,478,802 and \$9,462,073, respectively, an increase of \$16,729. The primary reason for the slight increases in non-interest expense is our continued emphasis on expense management offset by increases in FDIC insurance premiums.

For the three months ended June 30, 2009, compared to the quarter ended June 30, 2008, salaries and employee benefits decreased \$93,986, or 3.35%, while all other major categories of noninterest expense increased \$120,232, 6.27%. For the six months ended June 30, 2009, compared to the six months ended June 30, 2008, salaries and employee benefits decreased \$229,822, or 4.28%, while all other major categories of noninterest expense increased \$246,551, or 6.65%.

The change from the income tax expense of \$407,515 and \$169,859 for the three and six months ended June 30, 2008, respectively, to the income tax benefit of \$1,148,239 and \$955,325 for the comparable 2009 periods, respectively, is attributable to the net operating loss incurred before our income provision and the increase in nontaxable investment income.

## Balance Sheet Review

## General

Edgar Filing: FIRST RELIANCE BANCSHARES INC - Form 10-Q

At June 30, 2009, we had total assets of \$696.0 million, consisting principally of \$447.9 million in loans, \$94.4 million in investments, and \$95.0 million in cash and due from banks. Our liabilities at June 30, 2009 totaled \$645.7 million, which consisted principally of \$575.3 million in deposits, \$56.5 million in FHLB advances, and \$11.4 million in other borrowings. Since March 6, 2009, we improved our capital position by issuing \$15.3 million of preferred stock to the United States Treasury under the Troubled Asset Relief Program Capital Program. At June 30, 2009, our shareholders' equity was \$50.3 million.

At December 31, 2008, we had total assets of \$603.4 million, consisting principally of \$469.0 million in loans, \$80.9 million in investments, and \$5.5 million in cash and due from banks. Our liabilities at December 31, 2008 totaled \$566.0 million, consisting principally of \$461.1 million in deposits, \$78.0 million in FHLB advances, and \$25.5 million in other borrowings. At December 31, 2008, our shareholders' equity was \$37.4 million.

## FIRST RELIANCE BANCSHARES, INC.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

## Investments Securities

The investment securities portfolio, which is also a component of our total earning assets, consists of securities available-for-sale and nonmarketable equity securities.

At June 30, 2009 and December 31, 2008, we had investment securities totaling \$94,417,256 and \$80,885,516, respectively, which represented 13.57% and 13.40% of our total assets, respectively.

Nonmarketable equity securities consist of Federal Home Loan Bank stock, which is recorded at its original cost of \$4,812,100 and \$4,574,700 at June 30, 2009 and December 31, 2008, respectively.

The amortized costs and the fair value of our securities available-for-sale at June 30, 2009 and December 31, 2008 are shown in the following table.

	June 30, 2009		December 31, 2008	
	Amortized Cost (Book Value)	Estimated Fair Value	Amortized Cost (Book Value)	Estimated Fair Value
U. S. Government agencies	\$ 5,035,557	\$ 4,986,929	\$ 88,013	\$ 87,997
Mortgage-backed securities	43,429,576	42,744,057	46,465,667	47,574,021
Municipal securities	42,943,729	41,800,695	29,843,730	28,524,498
Other	218,750	73,475	218,750	124,300
	\$ 91,627,612	\$ 89,605,156	\$ 76,616,160	\$ 76,310,816

At June 30, 2009, securities classified as available-for-sale are recorded at fair market value. Approximately 40.32% of the unrealized losses, or 17 individual securities, consisted of securities in a continuous loss position for twelve months or more. The Company does not intend to sell these securities and it is more likely than not that the Company will not be required to sell these securities before recovery of their amortized cost. The Company believes, based on industry analyst reports and credit ratings, that the deterioration in value is attributable to changes in market interest rates and is not in the credit quality of the issuer and therefore, these losses are not considered other than temporary.

## Securities Available-for-sale Maturity Distribution and Yields

Contractual maturities and yields on our available for sale securities at June 30, 2009 are shown in the following table. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

June 30, 2009 (Dollars in thousands)	After One But Within Five Years		After Five But Within Ten Years		After Ten Years		Total	
	Amount	Yield	Amount	Yield	Amount	Yield	Amount	Yield
U. S. Government agencies	\$ 17	6.34%	\$ -	%	\$ 4,970	5.29%	\$ 4,987	5.29%
Municipals (2)	-	-	1,253	6.68	40,548	6.39	41,801	6.40
Total securities (1)	\$ 17	6.34%	\$ 1,253	6.68%	\$ 45,518	6.28%	\$ 46,788	6.29%

(1)

Excludes mortgage-backed securities totaling \$42,744 with a yield of 4.34 % and other equity securities totaling \$73.

(2)

Yields are based on a tax equivalent basis of 34%.

## FIRST RELIANCE BANCSHARES, INC.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

## Loans

Since loans typically provide higher interest yields than other types of interest earning assets, a substantial percentage of our earning assets are invested in our loan portfolio. For the six months ended June 30, 2009 and 2008, average loans, including mortgage loans held for sale, were \$483,599,949 and \$487,754,471, respectively. Before the allowance for loan losses, total loans outstanding, excluding mortgage loans held for sale, at June 30, 2009 and December 31, 2008, were \$447,853,158 and \$468,990,202, respectively.

The following table summarizes the composition of our loan portfolio at June 30, 2009 and December 31, 2008.

	June 30, 2009	% of Total	December 31, 2008	% of Total
<b>Mortgage loans on real estate</b>				
Residential 1-4 family	\$ 61,956,006	13.83%	\$ 72,245,289	15.40%
Multifamily	8,490,679	1.90	7,104,889	1.51
Commercial	168,805,860	37.69	201,318,345	42.94
Construction	105,882,181	23.64	60,744,432	12.95
Second mortgages	5,327,104	1.19	4,989,538	1.06
Equity lines of credit	33,781,971	7.54	37,792,852	8.06
Total mortgage loans	384,243,801	85.79	384,195,345	81.92
Commercial and industrial	53,609,633	11.97	70,877,890	15.12
Consumer	8,400,815	1.88	8,974,448	1.91
Other, net	1,598,909	.36	4,942,519	1.05
Total loans	\$ 447,853,158	100.00%	\$ 468,990,202	100.00%

## Maturities and Sensitivity of Loans to Changes in Interest Rates

The information in the following tables is based on the contractual maturities of individual loans, including loans which may be subject to renewal at their contractual maturity. Renewal of such loans is subject to review and credit approval, as well as modification of terms upon maturity. Actual repayments of loans may differ from the maturities reflected below because borrowers have the right to prepay obligations with or without prepayment penalties.

The following table summarizes the loan maturity distribution by type and related interest rate characteristics at June 30, 2009.

## Loan Maturity Schedule and Sensitivity to Changes in Interest Rates

June 30, 2009 (Dollars in thousands)	One Year or Less	Over One Year Through Five Years	Over Five Years	Total
Commercial and industrial	\$ 21,291	\$ 29,372	\$ 2,947	\$ 53,610
Real estate	125,166	199,652	59,426	384,244
Consumer and other	2,879	6,315	805	9,999

## Activity in the Allowance for Loan Losses

The following table summarizes the activity related to our allowance for loan losses for the six months ended June 30, 2009 and 2008.

	June 30,	
	2009	2008
Balance, January 1	\$ 8,223,899	\$ 5,270,607
Provision for loan losses for the period	4,855,822	1,147,397
Net loans (charged-off) recovered for the period	(5,538,672)	(677,144)
Balance, end of period	\$ 7,541,049	\$ 5,740,860
Total loans outstanding, end of period	\$ 447,853,158	\$ 466,428,206
Allowance for loan losses to loans outstanding	1.68%	1.23%

## Risk Elements in the Loan Portfolio

The following is a summary of risk elements in the loan portfolio.

	June 30, 2009	June 30, 2008
Nonperforming Loans		
Nonaccrual loans	\$ 26,393,371	\$ 3,308,463
Accruing loans more than 90 days past due	1,419,207	1,399,612
Nonperforming loans	\$ 27,812,578	\$ 4,708,075
Percentage of nonperforming loans to total loans	6.21%	1.01%
Allowance for loan losses as a percentage of nonperforming loans	27.11%	92.81%

Generally, loans are placed on nonaccrual status if principal or interest payments become 90 days past due and/or we deem the collectability of the principal and/or interest to be doubtful. Once a loan is placed in nonaccrual status, all previously accrued and uncollected interest is reversed against interest income. Interest income on nonaccrual loans is recognized on a cash basis when the ultimate collectability is no longer considered doubtful. Loans are returned to accrual status when the principal and interest amounts contractually due are brought current and future payments are reasonably assured. All nonaccruing loans at June 30, 2009, were included in our impaired loans.

## Impaired Loans

At June 30, 2009, we had impaired loans totaling \$49,263,581, as compared to \$3,308,463 at June 30, 2008. Included in the impaired loans at June 30, 2009, were 25 borrowers that accounted for approximately 76.24% of the total amount of the impaired loans at that date. These loans were primarily commercial real estate loans isolated to the coastal regions of South Carolina.

The recent downturn in the real estate market has resulted in an increase in loan delinquencies, defaults and foreclosures; however, we believe these trends are slowing. In some cases, this downturn has resulted in a significant impairment to the value of the Company's collateral and ability to sell the collateral upon foreclosure at its appraised

value. However, there is a risk that these trends could continue a higher pace. If real estate values continue to decline, it is also more likely that the Company would be required to increase its allowance for loan losses.

-29-

---

## FIRST RELIANCE BANCSHARES, INC.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

At June 30, 2009, nonaccrual loans were \$26,393,371 and total recorded investments in impaired loans were \$49,263,581 versus \$3,308,463 at June 30, 2008. During the six months ended June 30, 2009, the average investments in impaired loans were \$41,066,599, as compared to \$2,930,960 during the six months ended June 30, 2008. Impaired loans with a specific allocation of the allowance for loan losses totaled \$25,970,639 at June 30, 2009. The amount of the specific allocation was \$4,880,786. There was no specific allocation of the allowance for loan losses at June 30, 2008.

Monthly, management analyzes each loan that is classified as impaired to determine the potential for possible loan losses. This analysis is focused upon determining the then current estimated value of the collateral, local market condition and estimated costs to foreclose, repair and resell the property. The net realizable value of the property is then computed and compared to the loan balance to determine the appropriate amount of specific reserve for each loan.

Interest income recognized on impaired loans for the six months ended June 30, 2009 was \$926,817.

## Deposits and Other Interest-Bearing Liabilities

Average interest-bearing liabilities increased \$42,420,154 or 8.37%, to \$549,105,744 for the six months ended June 30, 2009, from \$506,685,590 for the six months ended June 30, 2008.

## Deposits

For the six months ended June 30, 2009 and 2008, average total deposits were \$504,915,663 and \$449,810,541, respectively, which is an increase of \$55,105,122 or 10.91%. At June 30, 2009 and December 31, 2008, total deposits were \$575,265,557 and \$461,135,384, respectively, an increase of \$114,130,173 or 24.75%.

Average interest-bearing deposits increased \$53,395,137, or 13.17%, to \$458,920,096 for the six months ended June 30, 2009, from \$405,524,959 for the six months ended June 30, 2008.

The average balance of non-interest bearing deposits increased \$1,709,985, or 3.86%, to \$45,995,567 for the six months ended June 30, 2009, from \$44,285,582 for the six months ended June 30, 2008.

The following table shows the average balance amounts and the average rates paid on deposits held by us for the six months ended June 30, 2009 and 2008.

	2009		2008	
	Average Amount	Average Rate	Average Amount	Average Rate
Noninterest bearing demand deposits	\$ 45,995,567	0.0%	\$ 44,285,582	0.0%
Interest bearing demand deposits	35,928,629	0.58	29,457,748	0.65
Savings accounts	98,328,994	1.74	88,620,534	2.50
Time deposits	324,662,473	3.14	287,446,677	4.37
	\$ 504,915,663	2.40%	\$ 449,810,541	3.33%

Core deposits, which exclude time deposits of \$100,000 or more, provide a relatively stable funding source for our loan portfolio and other earning assets. Core deposits were \$363,492,333 and \$323,690,517 at June 30, 2009 and December 31, 2008, respectively. This represented an increase of \$39,801,816 or 12.30%. The increase in core deposits resulted from successful pricing and marketing promotions.

Included in time deposits \$100,000 and over, at June 30, 2009 and December 31, 2008 are brokered time deposits of \$157,005,000 and \$96,652,000, respectively. We anticipate being able to either renew or replace brokered deposits when they mature, although we may not be able to replace them with deposits with the same terms or rates.

## FIRST RELIANCE BANCSHARES, INC.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

Deposits, and particularly core deposits, have been our primary source of funding and have enabled us to meet successfully both our short-term and long-term liquidity needs. We anticipate that such deposits will continue to be our primary source of funding in the future. However, advances from the Federal Home Loan Bank are being used as an alternative source of funds. Our loan-to-deposit ratio was 77.85% and 101.70% at June 30, 2009 and December 31, 2008, respectively.

All of our time deposits are certificates of deposits. The maturity distribution of our time deposits of \$100,000 or more at June 30, 2009 was as follows:

	June 30, 2009
Three months or less	\$ 37,400,195
Over three through twelve months	32,550,436
Over one year through three years	64,430,761
Over three years	77,391,832
Total	\$ 211,773,224

## Borrowings

The following table outlines our various sources of borrowed funds during the six months ended June 30, 2009 and the year ended December 31, 2008, the amounts outstanding at the end of each period, at the maximum point for each component during the periods and on average for each period, and the average interest rate that we paid for each borrowing source. The maximum month-end balance represents the high indebtedness for each component of borrowed funds at any time during each of the periods shown.

(Dollars in thousands)	Maximum Outstanding at any Month End	Weighted Average Balance	Average Interest Rate	Ending Balance	Period End Rate
<b>At or for the six months ended June 30, 2009</b>					
Securities sold under agreement to repurchase	\$ 7,664	\$ 3,472	0.07%	\$ 1,125	0.54%
Advances from Federal Home Loan Bank	93,500	73,367	3.39	56,500	3.45
Federal funds purchased	243	41	0.82	-	-
Note payable	6,950	2,995	2.35	-	-
Junior subordinated debentures	10,310	10,310	6.00	10,310	5.93
<b>At or for the year ended December 31, 2008</b>					
Securities sold under agreement to repurchase	\$ 9,291	\$ 7,845	1.54%	\$ 8,197	0.25%
Advances from Federal Home Loan Bank	83,500	72,617	3.77	78,000	3.43
Federal funds purchased	11,482	4,359	2.99	-	-
Note payable	6,950	3,389	4.01	6,950	2.00
Junior subordinated debentures	10,310	10,310	5.97	10,310	5.93

## Capital Resources

Total shareholders' equity at June 30, 2009 and December 31, 2008 was \$50,291,432 and \$37,425,758, respectively. The \$12,865,674 increase during the first six months of 2009 resulted primarily from the issuance of \$15,349,000 of preferred stock to the United States Treasury under the Troubled Asset Relief Program Capital Purchase Program. See Note 6 of the condensed consolidated financial statements, which described the terms of the preferred stock issued to the Treasury.

The following table shows the return on average assets (net income (loss) divided by average total assets), return on average equity (net income (loss) divided by average equity), and equity to assets ratio (average equity divided by average total assets) for the six months ended June 30, 2009 and 2008. Since our inception, we have not paid cash dividends on common stock.

	June 30, 2009	June 30, 2008
Return on average assets	(0.36)%	0.51%
Return on average equity	(4.94)%	7.99%
Average equity to average assets ratio	7.23%	6.42%

The Company and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possible additional discretionary actions by regulators that, if undertaken, could have a material effect on the Company's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of the Company's assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The Company's capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company to maintain minimum ratios of Tier 1 and total capital as a percentage of assets and off-balance-sheet exposures, adjusted for risk weights ranging from 0% to 100%. Tier 1 capital of the Company consists of common shareholders' equity, excluding the unrealized gain or loss on securities available-for-sale, minus certain intangible assets. The Company's Tier 2 capital consists of the allowance for loan losses subject to certain limitations. Total capital for purposes of computing the capital ratios consists of the sum of Tier 1 and Tier 2 capital. The regulatory minimum requirements are 4% for Tier 1 capital and 8% for total risk-based capital.

The Company and the Bank are also required to maintain capital at a minimum level based on quarterly average assets, which is known as the leverage ratio. Only the strongest banks are allowed to maintain capital at the minimum requirement of 3%. All others are subject to maintaining ratios 1% to 2% above the minimum.

The following table sets forth the Company's and the Bank's various capital ratios at June 30, 2009 and at December 31, 2008. For all periods, the Bank was considered "well capitalized" and the Company met or exceeded its regulatory capital requirements applicable to bank holding companies.

June 30, 2009

December 31, 2008

Edgar Filing: FIRST RELIANCE BANCSHARES INC - Form 10-Q

	Holding Company	Bank	Holding Company	Bank
Tier 1 capital (to risk-weighted assets)	12.34%	11.29%	10.73%	9.60%
Total capital (to risk-weighted assets)	13.59%	12.54%	11.97%	10.86%
Leverage or Tier 1 capital (to total average assets)	9.39%	8.57%	9.28%	8.18%

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

## Effect of Inflation and Changing Prices

The effect of relative purchasing power over time due to inflation has not been taken into account in our consolidated financial statements. Rather, our financial statements have been prepared on an historical cost basis in accordance with generally accepted accounting principles.

Unlike most industrial companies, our assets and liabilities are primarily monetary in nature. Therefore, the effect of changes in interest rates will have a more significant impact on our performance than will the effect of changing prices and inflation in general. In addition, interest rates may generally increase as the rate of inflation increases, although not necessarily in the same magnitude. As discussed previously, we seek to manage the relationships between interest sensitive assets and liabilities in order to protect against wide rate fluctuations, including those resulting from inflation.

## Off-Balance Sheet Risk

Through our operations, we have made contractual commitments to extend credit in the ordinary course of our business activities. These commitments are legally binding agreements to lend money to our customers at predetermined interest rates for a specified period of time. At June 30, 2009, we had issued commitments to extend credit of \$46.3 million and standby letters of credit of \$2.6 million through various types of commercial lending arrangements. Approximately \$37.2 million of these commitments to extend credit had variable rates.

The following table sets forth the length of time until maturity for unused commitments to extend credit and standby letters of credit at June 30, 2009.

(Dollars in thousands)	Within One Month	After One Through Three Months	After Three Through Twelve Months	Within One Year	Greater Than One Year	Total
Unused commitments to extend credit	\$ 8,818	\$ 4,883	\$ 11,437	\$ 25,138	\$ 21,186	\$ 46,324
Standby letters of credit	-	423	615	1,038	1,598	2,636
Total	\$ 8,818	\$ 5,306	\$ 12,052	\$ 26,176	\$ 22,784	\$ 48,960

We evaluate each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by us upon extension of credit, is based on our credit evaluation of the borrower. Collateral varies, but may include accounts receivable, inventory, property, plant and equipment, commercial and residential real estate.

FIRST RELIANCE BANCSHARES, INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

Market Risk

Market risk is the risk of loss from adverse changes in market prices and rates, which principally arises from interest rate risk inherent in our lending, investing, deposit gathering, and borrowing activities. Other types of market risks, such as foreign currency exchange rate risk and commodity price risk, do not generally arise in the normal course of our business. Our finance committee monitors and considers methods of managing exposure to interest rate risk. We have both an internal finance committee consisting of senior management that meets at various times during each quarter and a management finance committee that meets weekly as needed. The finance committees are responsible for maintaining the level of interest rate sensitivity of our interest sensitive assets and liabilities within board-approved limits.

We actively monitor and manage our interest rate risk exposure principally by measuring our interest sensitivity "gap," which is the positive or negative dollar difference between assets and liabilities that are subject to interest rate repricing within a given period of time. Interest rate sensitivity can be managed by repricing assets or liabilities, selling securities available for sale, replacing an asset or liability at maturity, or adjusting the interest rate during the life of an asset or liability. Managing the amount of assets and liabilities repricing in this same time interval helps to hedge the risk and minimize the impact on net interest income of rising or falling interest rates. We generally would benefit from increasing market rates of interest when we have an asset-sensitive gap position and generally would benefit from decreasing market rates of interest when we are liability-sensitive.

We were asset sensitive during most of the year ended December 31, 2008 and during the three months ended June 30, 2009. As of June 30, 2009, we expect to be liability sensitive for the next nine months because a majority of our deposits reprice over a 12-month period. Approximately 55% of our loans were variable rate loans at June 30, 2009. The ratio of cumulative gap to total earning assets after 12 months was (33.33%) because \$186.0 million more assets will reprice in a 12 month period than liabilities. However, our gap analysis is not a precise indicator of our interest sensitivity position. The analysis presents only a static view of the timing of maturities and repricing opportunities, without taking into consideration that changes in interest rates do not affect all assets and liabilities equally. For example, rates paid on a substantial portion of core deposits may change contractually within a relatively short time frame, but those rates are viewed by us as significantly less interest-sensitive than market-based rates such as those paid on noncore deposits. Net interest income may be affected by other significant factors in a given interest rate environment, including changes in the volume and mix of interest-earning assets and interest-bearing liabilities.

FIRST RELIANCE BANCSHARES, INC.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued

Liquidity and Interest Rate Sensitivity

Liquidity represents the ability of a company to convert assets into cash or cash equivalents without significant loss and the ability to raise additional funds by increasing liabilities. Liquidity management involves monitoring our sources and uses of funds in order to meet our day-to-day cash flow requirements while maximizing profits. Liquidity management is made more complicated because different balance sheet components are subject to varying degrees of management control. For example, the timing of maturities of our investment portfolio is fairly predictable and subject to a high degree of control at the time investment decisions are made. However, net deposit inflows and outflows are far less predictable and are not subject to the same degree of control.

At June 30, 2009, our liquid assets, consisting of cash and due from banks, amounted to \$95.0 million, or 13.65% of total assets. Our investment securities, excluding nonmarketable securities, at June 30, 2009 amounted to \$89.6 million, or 12.87% of total assets. Investment securities traditionally provide a secondary source of liquidity since they can be converted into cash in a timely manner. However, \$63.3 million of these securities are pledged against unused FHLB borrowing lines, the Federal Reserve line of credit, and other required deposit accounts. At December 31, 2008, our liquid assets, consisting of cash and due from banks, amounted to \$5.7 million, or 0.95% of total assets. Our investment securities, excluding nonmarketable securities, at December 31, 2008 amounted to \$76.3 million, or 12.65% of total assets. However, \$73.2 million of these securities were pledged.

Our ability to maintain and expand our deposit base and borrowing capabilities serves as our primary source of liquidity. We plan to meet our future cash needs through the liquidation of temporary investments, the generation of deposits, and from additional borrowings. In addition, we will receive cash upon the maturity and sale of loans and the maturity of investment securities. During most of 2008 and the first six months of 2009, as a result of historically low rates that were being earned on short-term liquidity investments, we maintained a lower than normal level of short-term liquidity securities. Additionally, we maintain four federal funds purchased lines of credit with correspondent banks, giving us credit availability totaling approximately \$17.0 million, for which there were no borrowings against the lines at June 30, 2009. We are also a member of the Federal Home Loan Bank of Atlanta, from which applications for borrowings can be made for leverage purposes. The FHLB requires that securities, qualifying mortgage loans, and stock of the FHLB owned by the bank be pledged to secure any advances from the FHLB. The Company has an available line to borrow funds from the Federal Home Loan Bank up to 30% of the Bank's total assets which provide additional available funds of \$104.6 million at June 30, 2009. At June 30, 2009, the bank had \$56.5 million outstanding in FHLB advances. Additionally, the Company has an available line of credit at the Federal Reserve of \$32.2 million. At June 30, 2009, there were no borrowings against this line. We believe that sources described above will be sufficient to meet our future liquidity needs.

Asset/liability management is the process by which we monitor and control the mix and maturities of our assets and liabilities. The essential purposes of asset/liability management are to ensure adequate liquidity and to maintain an appropriate balance between interest sensitive assets and liabilities in order to minimize potentially adverse impacts on earnings from changes in market interest rates. We have both an internal finance committee consisting of senior management that meets at various times during each quarter and a management finance committee that meets weekly as needed. The finance committees are responsible for maintaining the level of interest rate sensitivity of our interest sensitive assets and liabilities within board-approved limits.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation - continued  
Interest Sensitivity Analysis

The following table sets forth information regarding our rate sensitivity as of June 30, 2009 for each of the time intervals indicated. The information in the table may not be indicative of our rate sensitivity position at other points in time. In addition, the maturity distribution indicated in the table may differ from the contractual maturities of the earning assets and interest-bearing liabilities presented due to consideration of prepayment speeds under various interest rate change scenarios in the application of the interest rate sensitivity methods described above.

Item 3 - Quantitative and Qualitative Disclosures About Market Risk

See "Market Risk" and "Liquidity and Interest Rate Sensitivity" in Item 2, Management Discussion and Analysis of Financial Condition and Results of Operations, for quantitative and qualitative disclosures about market risk, which information is incorporated herein by reference.

Item 4. Controls and Procedures

As of the end of the period covered by this Quarterly Report on Form 10-Q, our chief executive officer and chief financial officer have evaluated the effectiveness of our "disclosure controls and procedures" ("Disclosure Controls"). Disclosure Controls, as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), are procedures that are designed with the objective of ensuring that information required to be disclosed in our reports filed under the Exchange Act, such as this quarterly Report on Form 10-Q, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure Controls are also designed with the objective of ensuring that such information is accumulated and communicated to our management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

Our management, including the CEO and CFO, does not expect that our Disclosure Controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Based upon their controls evaluation, our CEO and CFO have concluded that our Disclosure Controls are effective at a reasonable assurance level.

There have been no changes in our internal controls over financial reporting during our second fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

## Part II - Other Information

## Item 1. Legal Proceedings

There are no material, pending legal proceedings to which the Company or its subsidiary is a party or of which any of their property is the subject.

## Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, "Item 1. Business" under the heading "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2008, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

## Item 2. Unregistered Sales of Equity Securities and Use of Proceeds
