1. Nature of Operations and Continuance of Business

On January 1, 2006 Freshwater Technologies, Inc. (formerly HMI Technologies Inc) (“HMI”) entered into an Asset Acquisition Agreement to acquire the business of Freshwater Technologies (“Freshwater”). HMI was incorporated in the State of Nevada, U.S.A. on December 10, 1999. Effective January 1, 2006, the acquisition of the Freshwater business was completed through the issuance of 20,000 (80,000,000 pre-consolidation) restricted shares of common stock, and as a result, the former owners of the Freshwater business owned approximately 79% of the outstanding common stock of HMI. Prior to the acquisition of Freshwater, HMI was a non-operating shell company with nominal net assets. The acquisition was a capital transaction in substance and therefore has been accounted for as a recapitalization, which is outside the scope of Accounting Standards Codification (“ASC”) 805, “Business Combinations”. Under recapitalization accounting, Freshwater was considered the acquirer for accounting and financial reporting purposes, and acquired the assets and assumed the liabilities of HMI. Assets acquired and liabilities assumed are reported at their historical amounts. These financial statements include the accounts of HMI since the effective date of the recapitalization (January 1, 2006) and the historical accounts of the business of Freshwater since inception (collectively, the “Company”). Refer to Note 5.

On May 27, 2011, the Company issued 31,250 (125,000,000 pre-consolidation) shares of its common stock to Christopher Martinez in exchange for the acquisition of certain assets owned by Mr. Martinez. In exchange for the assets, the Company completed a 4000:1 reverse stock split, Company name change to Agent155 Media Corp. and the issuance, on July 26, 2011, of 99,968,750 common shares to Christopher Martinez following the reverse stock split.

The Company’s principal business now offers models, performers, artists, athletes, musicians, filmmakers and agencies a multimedia content management solution, providing a collaborative forum for the creative world to network and develop. It provides talent agencies, agents, producers, directors, and recording companies a one-stop location to search and view the profiles and work of emerging talent. The Company plans to produce films, music tours, commercials and various events.

The Company is a Development Stage Company, as defined by Financial Accounting Standards Board (“FASB”) ASC 915, “Development Stage Entities”.

These financial statements have been prepared on a going concern basis, which implies that the Company will continue to realize its assets and discharge its liabilities in the normal course of business. The Company has generated limited revenues to date and has never paid any dividends and is unlikely to pay dividends or generate significant earnings in the immediate or foreseeable future. In order to fund the proposed plan of operations, the Company will require an additional \$1,000,000 to \$1,400,000 in funding through the next twelve month period. As at September 30, 2011, the Company had accumulated losses of \$2,970,833 since inception and a negative working capital of \$249,782. The continuation of the Company as a going concern is dependent upon the continued financial support from its directors and officers, the ability to raise equity or debt financing, and the attainment of profitable operations from the business. These factors raise substantial doubt regarding the Company’s ability to continue as a going concern. These financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

2. Summary of Significant Accounting Policies

a) Basis of Presentation

These financial statements and related notes are presented in accordance with accounting principles generally accepted in the United States, and are expressed in US dollars. The Company's fiscal year-end is December 31.

On July 22, 2011, the Company effected a 4000 to 1 reverse stock-split of its issued and outstanding common stock. The issued and outstanding capital decreased from 386,238,730 shares of common stock to 96,500 shares of common stock. All share and per share amounts have been retroactively restated to reflect the reverse stock-split.

b) Interim Financial Statements

These interim unaudited financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Securities and Exchange Commission (“SEC”) Form 10-Q. They do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. Therefore, these financial statements should be read in conjunction with the Company’s audited financial statements and notes thereto for the year ended December 31, 2010, included in the Company’s Annual Report on Form 10-K filed April 15, 2011 with the SEC.

The financial statements included herein are unaudited; however, they contain all normal recurring accruals and adjustments that, in the opinion of management, are necessary to present fairly the Company’s financial position at September 30, 2011, and the results of its operations and cash flows for the three month and nine month periods ended September 30, 2011 and 2010. The results of operations for the period ended September 30, 2011 are not necessarily indicative of the results to be expected for future quarters or the full year.

c) Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The Company regularly evaluates estimates and assumptions related to provision for uncollectible receivables, provision for inventory obsolescence, valuation of distribution rights and intangible multimedia assets, donated expenses, fair values of financial instruments and deferred income tax asset valuation allowances. The Company bases its estimates and assumptions on current facts, historical experience and various other factors that it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the accrual of costs and expenses that are not readily apparent from other sources. The actual results experienced by the Company may differ materially and adversely from the Company’s estimates. To the extent there are material differences between the estimates and the actual results, future results of operations will be affected.

d) Cash and Cash Equivalents

The Company considers all highly liquid instruments with maturity of three months or less at the time of issuance to be cash equivalents. As at September 30, 2011, the Company had no cash equivalents.

e) Basic and Diluted Net Income (Loss) Per Share

The Company computes earnings (loss) per share in accordance with ASC 260, “Earnings per Share”, which requires presentation of both basic and diluted earnings per share (EPS) on the face of the income statement. Basic EPS is computed by dividing net income (loss) available to common shareholders (numerator) by the weighted average number of shares outstanding (denominator) during the period. Diluted EPS gives effect to all dilutive potential common shares outstanding during the period using the treasury stock method and convertible preferred stock using the if-converted method. In computing diluted EPS, the average stock price for the period is used in determining the number of shares assumed to be purchased from the exercise of stock options or warrants. Diluted EPS excludes all dilutive potential shares if their effect is anti dilutive. As at September 30, 2011, the convertible notes payable of

\$93,500 could be converted to approximately 1,269,000 common shares.

f) Comprehensive Loss

ASC 220, "Comprehensive Income", establishes standards for the reporting and display of comprehensive loss and its components in the financial statements. As at September 30, 2011, the Company has no items that represent other comprehensive loss and, therefore, has not included a schedule of other comprehensive loss in the financial statements.

g)

Inventory

On June 3, 2011, inventory of water activation products and water filters was sold to two previously related parties at cost. The Company has no inventory at September 30, 2011. (See Note 9)

h) Financial Instruments

Pursuant to ASC 820, "Fair Value Measurements and Disclosures", and ASC 825, "Financial Instruments", an entity is required to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value using a hierarchy based on the level of independent, objective evidence surrounding the inputs used to measure fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The hierarchy prioritizes the inputs into three levels that may be used to measure fair value:

Level 1

Level 1 applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.

Level 2

Level 2 applies to assets or liabilities for which there are inputs other than quoted prices that are observable for the asset or liability such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical assets or liabilities in markets with insufficient volume or infrequent transactions (less active markets); or model-derived valuations in which significant inputs are observable or can be derived principally from, or corroborated by, observable market data.

Level 3

Level 3 applies to assets or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

The Company's financial instruments consist principally of accounts payable, convertible notes payable and amounts due to related parties. The fair value of the Company's cash equivalents, when applicable, is determined based on "Level 1" inputs, which consist of quoted prices in active markets for identical assets. During the period ended September 30, 2011, the Company valued convertible notes payable based on "Level 2" inputs, consisting of model-derived valuations in which significant inputs are derived from observable market data. The Company estimates that the carrying values of all of its other financial instruments approximate their fair values due to the nature or duration of these instruments.

i) Foreign Currency Translation

The Company's functional and reporting currency is the United States dollar. Monetary assets and liabilities denominated in foreign currencies are translated in accordance with ASC 830, "Foreign Currency Translation Matters", using the exchange rate prevailing at the balance sheet date. Gains and losses arising on translation or settlement of foreign currency denominated transactions or balances are included in the determination of income. Foreign currency transactions are primarily undertaken in Canadian dollars and Euros. The Company has not, to the date of these financial statements, entered into derivative instruments to offset the impact of foreign currency fluctuations.

j) Revenue Recognition

The Company recognizes revenue from the sale or rental of drinking water products and water activation products in accordance with ASC 605, "Revenue Recognition", and SAB 104. The majority of the revenues consist of water activation units in Costa Rica, Panama and Peru. Revenue consists of the sale/rental of drinking water products and water activation products and is recognized only when the price is fixed or determinable, persuasive evidence of an arrangement exists, the product is shipped, and collectibility is reasonably assured. The Company's shipping terms are FOB shipping point. For UV products, the customer pays all costs from the point of shipment, and for FW products, the customer pays all costs from arrival point in the country to which the FW products are shipped. The Company evaluates the collectibility of accounts receivable based on a combination of factors. In cases where the Company is aware of circumstances that may impair a specific customer's ability to meet its financial obligations subsequent to the original sale, the Company will record an allowance against amounts due, and thereby reduce the net recognized receivable to the amount the Company reasonably believes will be collected. For all other customers, the Company recognizes allowances for doubtful accounts based on the length of time the receivables are past due, the current business environment and the Company's historical experience. On June 3, 2011, the Company sold all of its water business related assets and liabilities at a net gain of \$5,820 (Note 9).

2. Summary of Significant Accounting Policies (continued)

k) Stock-based Compensation

The Company accounts for share-based payments in accordance with ASC 718, "Compensation – Stock Based Compensation". All transactions in which goods or services are the consideration received for the issuance of equity instruments are accounted for based on the fair value of the consideration received or the fair value of the equity instrument issued, whichever is more reliably measurable. The Company has not issued any stock options since its inception.

l) Intangible Assets-Water

Intangible assets-water represent costs incurred to acquire product distribution rights amounting to \$689,732. The useful life of the product distribution rights acquired was estimated by management to be two years. Amortization is provided on a straight-line basis over the estimated useful life. During the nine months ended September 30, 2011, the Company recognized \$22,676 in amortization expense in loss from discontinued operations in relation to these assets as compared to \$257,941 amortization expense for the nine months ended September 30, 2010. The agreement expired January 26, 2011.

m) Intangible Assets-MultiMedia

Intangible assets-multimedia represent costs incurred to acquire multimedia assets from Christopher Martinez including codes, multimedia content, intangible assets and computer servers owned by Mr. Martinez. The useful life of the multimedia intangible assets acquired was estimated by management to be ten years from the date of the Agreement to acquire the assets, June 1, 2011. Amortization is provided on a straight-line basis over the estimated useful life. During the nine months ended September 30, 2011, the Company recognized \$38,289 in amortization expense in relation to these assets as compared to \$nil amortization expense for the nine months ended September 30, 2010.

n) Recently Adopted Accounting Pronouncements

In January 2010, the FASB issued Accounting Standards Update ("ASU") No. 2010-06, "Improving Disclosures about Fair Value Measurements", which amends the ASC Topic 820, "Fair Value Measurements and Disclosures". ASU No. 2010-06 amends the ASC to require disclosure of transfers into and out of Level 1 and Level 2 fair value measurements, and also requires more detailed disclosure about the activity within Level 3 fair value measurements. The new disclosures and clarifications of existing disclosures are effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures concerning purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The adoption of this amendment did not have a material effect on the Company's financial statements. The Company has implemented all other new accounting pronouncements that are in effect and that may impact its financial statements and does not believe that there are any other new accounting pronouncements that have been issued that might have a material impact on its financial position or results of operations.

3. Related Party Transactions

a) The Company entered into consulting agreements with the former President and former CFO of the Company. Under these agreements, both the former President and former CFO receive \$3,000 per month

commencing June 1, 2006 and expiring December 31, 2011. The former President and former CEO of the Company agreed to terminate these consulting agreements effective April 1, 2011. For the nine months ended September 30, 2011, the Company recorded \$18,000 (September 30, 2010 - \$54,000) under discontinued operations.

c) On June 1, 2011, Max Weissengruber, Brian Robertson and Doug Robertson resigned from their respective positions as officers and directors of the Company, and Christopher Martinez was appointed as the President, Chief Executive Officer, Chief Financial Officer, Secretary, Treasurer and sole director of the Company.

Our total assets at September 30, 2011 were \$1,283,191, compared to \$195,050 at December 31, 2010. At September 30, 2011 our assets were \$166,480 in prepaid consulting fees and the net Intangible Multimedia Agent155 Assets purchased from Christopher Martinez (as described below) on June 1, 2011 amounting to \$1,116,711.

At December 31, 2010, all of our assets were water business related which were sold June 3, 2011 for a net gain of \$5,820.

On May 27, 2011, the Company issued 125,000,000 shares of its pre-consolidation common stock (31,250 post-consolidation shares) to Christopher Martinez in exchange for the acquisition of certain Intangible assets owned by Mr. Martinez. In exchange for the assets, the Company agreed to and, subsequently, completed several post-closing

obligations including a 4000:1 reverse stock split, Company name change to Agent155 Media Corp. and the issuance of a further 99,968,750 common shares to Christopher Martinez following the completion of the reverse stock split. The fair value of the restricted shares issued and the Intangible assets purchased were estimated to be \$1,155,000. We have estimated the life of the Intangible assets to be 10 years and have amortized \$38,289 of these assets during the nine months ended September 30, 2011.

(The accompanying notes are an integral part of these financial statements)

Our liabilities at September 30, 2011 were \$416,262 compared to \$363,612 at December 31, 2010. The increase of \$52,650 is due to an increase of \$4,722 in discounted convertible notes and related interest payable, an increase in a loan payable of \$45,921, an increase in professional fees payable of \$70,119 and an increase in other accounts payable of \$19,865 offset by a decrease of \$87,977 due to former directors and officers. The amounts due to our former directors and officers total \$85,896 and are non-interest bearing, unsecured and have no specific terms for repayment.

As of September 30, 2011, we had \$nil in cash on hand and negative working capital of \$249,782, compared to \$371 in cash on hand and negative working capital of \$191,238 as of December 31, 2010. We anticipate that we will require approximately \$1,000,000 to \$1,400,000 for our operating expenses, including professional, legal and accounting expenses associated with our reporting requirements under the Exchange Act during the next 12 months. Accordingly, we do not have enough money to carry out our business plan and we will need to obtain additional financing in order to continue operating.

On September 7, 2010, the Company issued a \$25,000 convertible note with a maturity on June 11, 2011 and bearing interest at 8% per annum for cash proceeds of \$25,000. The note is convertible into shares of the Company's Class A common stock at a 45% discount of the average of the lowest three trading prices (the closing bid price on the Over-the-Counter Bulletin Board or applicable trading market) for the Company's common stock during the ten trading day period ending one trading day prior to the date the conversion notice is sent by the noteholder to the Company. Pursuant to the terms of the note the Company agreed to reserve for future issuance 6,696 (26,785,714 pre-consolidation) shares of Class A common stock which provides for five times the amount of common shares issuable upon the full conversion of the note. The Company is required to maintain this ratio based on the conversion price from time to time and may be subject to significant penalties should an insufficient number of shares be available for issuance on the date of conversion. The Company recognized the intrinsic value of the embedded beneficial conversion feature of \$23,750 as additional paid-in capital and reduced the carrying value of the convertible debenture to \$1,250. The carrying value will be accreted over the term of the convertible debenture up to its face value of \$25,000. As at September 30, 2011, the carrying values of the convertible debenture and accrued convertible interest payable thereon were \$25,000 and \$3,196, respectively.

On June 11, 2011, the Company defaulted on its repayment of the convertible note dated September 7, 2010. The note's principal and interest outstanding at September 30, 2011 amounted to \$28,196.

Pursuant to the terms of the convertible notes payable, the Company agreed to reserve for future issuance sufficient common shares to provide for full conversion of the notes as at September 30, 2011.

There are no assurances that we will earn the funds required for our continued operations. If we do not earn the required revenues, then we will have to seek another source of financing, likely through the sale of more shares of our common stock or borrowing money. There can be no assurance that additional financing will be available to us when needed or, if available, that it can be obtained on commercially reasonable terms. If we are not able to obtain the additional financing on a timely basis, we will not be able to meet our other obligations as they become due and we will be forced to scale down or perhaps even cease the operation of our business.

There is substantial doubt about our ability to continue as a going concern as the continuation of our business is dependent upon a combination of our ability to obtain further long-term financing, the successful and sufficient market acceptance of any product offerings that we may introduce, the continuing successful development of our product offerings, and, finally, our ability to achieve a profitable level of operations. The issuance of additional equity securities by us could result in a significant dilution in the equity interests of our current stockholders. Obtaining commercial loans, assuming those loans would be available, would increase our liabilities and future cash commitments.

Going Concern

Due to the uncertainty of our ability to meet our current operating and capital expenses, in their report on our audited annual financial statements for the year ended December 31, 2010, our independent auditors included an explanatory paragraph regarding concerns about our ability to continue as a going concern. Our financial statements contain additional note disclosures describing the circumstances that led to this disclosure by our independent auditors. There is substantial doubt about our ability to continue as a going concern as the continuation and expansion of our business is dependent upon obtaining further financing, successful and sufficient market acceptance of our products, and, finally, achieving a profitable level of operations. The issuance of additional equity securities by us could result in a significant dilution in the equity interests of our current stockholders. Obtaining commercial loans, assuming those loans would be available, will increase our liabilities and future cash commitments.

Future Financings

Fundraising will be one of our primary objectives over the next twelve months. The financial requirements of our company for the next twelve months will depend on our ability to raise the money we require through credit facilities and additional private placements of our equity securities or loans from our director. The issuance of additional equity securities by us may result in a significant dilution in the equity interests of our current shareholders.

There is no assurance that we will be able to obtain the funds required for our continued operations or that additional financing will be available to us when needed or, if available, that it can be obtained on commercially reasonable terms. If we are not able to obtain the additional financing on a timely basis, we will not be able to meet our other obligations as they become due and we will be forced to scale down or perhaps even cease our operations. We do not currently have any plans to merge with another company, and we have not entered into any agreements or understandings for any such merger.

Our cash on hand and the revenue that we anticipate generating going forward from our operations will not be sufficient to satisfy our cash requirements for the next twelve month period. We expect to require from \$1,000,000 to \$1,400,000. We intend to raise any such additional capital primarily through the private placement of our securities and further borrowings from our directors if this type of funding continues to be available. We also intend to continue to seek additional funds from our directors to fund our day to day operations until a private placement can be pursued but we have no guarantee that our directors will continue to fund our day to day operations.

(The accompanying notes are an integral part of these financial statements)

Estimated Working Capital Expenditures During the Next 12 Months

General and Administrative	\$	50,000 - 75,000
Legal and Accounting	\$	50,000 - 75,000
Working capital	\$	500,000 - 700,000
		1,000,000 -
Total	\$	1,400,000

Off-Balance Sheet Arrangements

We have no off-balance sheet transactions that have or are reasonably likely to have a current or future effect on our financial condition, changes in our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to our stockholders.

Critical Accounting Policies

Foreign Currency Translation

The Company's functional and reporting currency is the United States dollar. Monetary assets and liabilities denominated in foreign currencies are translated in accordance with ASC 830, "Foreign Currency Translation Matters", using the exchange rate prevailing at the balance sheet date. Gains and losses arising on translation or settlement of foreign currency denominated transactions or balances are included in the determination of income. Foreign currency transactions are primarily undertaken in Canadian dollars and Euros. The Company has not, to the date of these financial statements, entered into derivative instruments to offset the impact of foreign currency fluctuations.

Revenue Recognition

The Company recognizes revenue from the sale or rental of drinking water products and water activation products in accordance with ASC 605, "Revenue Recognition", and SAB 104. The majority of the revenues consist of water activation units in Costa Rica, Panama and Peru. Revenue consists of the sale/rental of drinking water products and water activation products and is recognized only when the price is fixed or determinable, persuasive evidence of an arrangement exists, the product is shipped, and collectibility is reasonably assured. The Company's shipping terms are FOB shipping point. For UV products, the customer pays all costs from the point of shipment, and for FW products, the customer pays all costs from arrival point in the country to which the FW products are shipped. The Company evaluates the collectibility of accounts receivable based on a combination of factors. In cases where the Company is aware of circumstances that may impair a specific customer's ability to meet its financial obligations subsequent to the original sale, the Company will record an allowance against amounts due, and thereby reduce the net recognized receivable to the amount the Company reasonably believes will be collected. For all other customers, the Company recognizes allowances for doubtful accounts based on the length of time the receivables are past due, the current business environment and the Company's historical experience. On June 3, 2011, the Company sold all of its water business related assets and liabilities at a net gain of \$5,820.

Intangible Assets-Water

Intangible assets-water represent costs incurred to acquire product distribution rights amounting to \$689,732. The useful life of the product distribution rights acquired was estimated by management to be two years. Amortization is

provided on a straight-line basis over the estimated useful life. During the nine months ended September 30, 2011, the Company recognized \$22,676 in amortization expense in loss from discontinued operations in relation to these assets as compared to \$257,941 amortization expense for the nine months ended September 30, 2010. The agreement expired January 26, 2011.

(The accompanying notes are an integral part of these financial statements)

Intangible assets-multimedia

Intangible assets-multimedia represent costs incurred to acquire multimedia assets from Christopher Martinez including codes, multimedia content, intangible assets and computer servers owned by Mr. Martinez. The useful life of the multimedia intangible assets acquired was estimated by management to be ten years from the date of the Agreement to acquire the assets, June 1, 2011. Amortization is provided on a straight-line basis over the estimated useful life. During the nine months ended September 30, 2011, the Company recognized \$38,289 in amortization expense in relation to these assets as compared to \$nil amortization expense for the nine months ended September 30, 2010.

Recently Adopted Accounting Pronouncements

In January 2010, the FASB issued Accounting Standards Update (“ASU”) No. 2010-06, “Improving Disclosures about Fair Value Measurements”, which amends the ASC Topic 820, “Fair Value Measurements and Disclosures”. ASU No. 2010-06 amends the ASC to require disclosure of transfers into and out of Level 1 and Level 2 fair value measurements, and also requires more detailed disclosure about the activity within Level 3 fair value measurements. The new disclosures and clarifications of existing disclosures are effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures concerning purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The adoption of this amendment did not have a material effect on the Company’s financial statements. The Company has implemented all other new accounting pronouncements that are in effect and that may impact its financial statements and does not believe that there are any other new accounting pronouncements that have been issued that might have a material impact on its financial position or results of operations.

Disclosure Controls and Procedures

Our management, including our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, our management, including our Chief Executive Officer and Chief Financial Officer, concluded that our disclosure controls and procedures as of the end of the period covered by this report were not effective.

Disclosure controls and procedures are controls and other procedures that are designed to ensure that the information required to be disclosed by us in reports filed or submitted under the Securities Exchange Act of 1934, as amended, is (i) recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms and (ii) accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding disclosure. A controls system cannot provide absolute assurance, however, that the objectives of the controls system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

We have no external evaluations, however, we conduct management internal reviews annually. Our disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives and the conclusions of our Chief Executive Officer and Chief Financial Officer regarding the effectiveness of our disclosure controls and procedures are made at the reasonable assurance level.
