UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

x **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**
For the quarterly period ended September 30, 2013

OR

¨ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**
For the transition period from ________ to ________

Commission File Number 0-33203

LANDMARK BANCORP, INC.
(Exact name of registrant as specified in its charter)

Delaware	**43-1930755**
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification Number)

701 Poyntz Avenue, Manhattan, Kansas 66502
(Address of principal executive offices) (Zip code)

(785) 565-2000
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes x No ¨

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes x No ¨

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):
Large accelerated filer ¨ Accelerated filer ¨ Non-accelerated filer ¨ Smaller reporting company x
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ¨ No x

Indicate the number of shares outstanding of each of the issuer's classes of common stock as of the latest practicable date: as of November 13, 2013, the issuer had outstanding 2,935,833 shares of its common stock, $.01 par value per share.

LANDMARK BANCORP, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Interim Financial Statements

The consolidated financial statements of Landmark Bancorp, Inc. (the "Company") and subsidiary have been prepared in accordance with the instructions to Form 10-Q. To the extent that information and footnotes required by U.S. generally accepted accounting principles ("GAAP") for complete financial statements are contained in or consistent with the consolidated audited financial statements incorporated by reference in the Company's Form 10-K for the year ended December 31, 2012, such information and footnotes have not been duplicated herein. In the opinion of management, all adjustments, consisting of normal recurring accruals, considered necessary for a fair presentation of financial statements have been reflected herein. The results of the interim period ended September 30, 2013 are not necessarily indicative of the results expected for the year ending December 31, 2013. The Company evaluates subsequent events and transactions that occur after the balance sheet date up to the date that financial statements are filed for potential recognition or disclosure.

2. Goodwill and Other Intangible Assets

The Company tests goodwill for impairment annually or more frequently if circumstances warrant. The Company's annual step one impairment test as of December 31, 2012 concluded that its goodwill was not impaired; however, the Company can make no assurances that future impairment tests will not result in goodwill impairments. The Company concluded there were no triggering events during the first nine months of 2013 that required an interim goodwill impairment test.

On April 1, 2012, the Company's subsidiary, Landmark National Bank, assumed approximately $35.0 million in deposits with the acquisition of The Wellsville Bank. The Company identified $24.7 million of core deposits and recorded a core deposit intangible asset of $308,000 as a result of the acquisition. The core deposit intangible asset will be amortized over its estimated useful life of ten years on an accelerated basis. A summary of this and the other intangible assets that continue to be subject to amortization is as follows:

(Dollars in thousands)	As of September 30, 2013			
	Gross carrying amount	Accumulated amortization	Valuation allowance	Net carrying amount
Core deposit intangible assets	$ 4,973	$ (4,474)	$ -	$ 499
Mortgage servicing rights	3,598	(1,385)	-	2,213
Total other intangible assets	$ 8,571	$ (5,859)	$ -	$ 2,712

(Dollars in thousands)	As of December 31, 2012			
	Gross carrying amount	Accumulated amortization	Valuation allowance	Net carrying amount
Core deposit intangible assets	$ 4,973	$ (4,258)	$ -	$ 715
Mortgage servicing rights	3,038	(1,147)	(212)	1,679
Total other intangible assets	$ 8,011	$ (5,405)	$ (212)	$ 2,394

During 2012, the Company recorded a $212,000 valuation allowance against its mortgage servicing rights. During the second quarter of 2013, a rise in mortgage rates increased the estimated fair value of these assets as it became less likely some of the loans the Company services will be refinanced. Based on the increase in estimated fair value, the Company reversed its valuation allowance during the second quarter of 2013.

Aggregate core deposit and mortgage servicing rights amortization expense was $238,000 and $481,000 for the third quarter of 2013 and 2012, respectively. Aggregate core deposit and mortgage servicing rights amortization expense was $478,000 and $907,000 for the first nine months of 2013 and 2012, respectively. The Company recorded a $212,000 valuation allowance against its mortgage servicing rights during the third quarter of 2012, which increased amortization expense for the three and nine months periods ending September 30, 2012. The valuation allowance was reversed during the second quarter of 2013 which reduced amortization expense for the nine months ending September 30, 2013. The following sets forth estimated amortization expense for other intangible assets for the remainder of 2013 and in successive years ending December 31:

(Dollars in thousands)	Amortization expense	
Remainder of 2013	$	223
2014		822
2015		740
2016		669
2017		193
Thereafter		65
Total	$	2,712

3. Investments

A summary of investment securities available-for-sale is as follows:

9

Certain of the Company's investment securities have unrealized losses, or are temporarily impaired. This temporary impairment represents the estimated amount of loss that would be realized if the securities were sold on the valuation date. Securities which are temporarily impaired are shown below, along with the length of the impairment period.

(Dollars in thousands)		As of September 30, 2013 Less than 12 months		12 months or longer		Total	
	No. of securities	Fair value	Unrealized losses	Fair value	Unrealized losses	Fair value	Unrealized losses

Common stocks	1	21	(1)	-	-	21	(1)
Total	51	$ 37,853	$ (200)	$ 209	$ (2)	$ 38,062	$ (202)

The Company performs quarterly reviews of the investment portfolio to determine if investment securities have any declines in fair value which might be considered other-than-temporary. The initial review begins with all securities in an unrealized loss position. The Company's assessment of other-than-temporary impairment is based on the specific facts and circumstances impacting each individual security. The Company reviews and considers all available information, including expected cash flows, the structure of the security, the credit quality of the underlying assets and the current and anticipated market conditions. Any credit-related impairment on debt securities is realized through a charge to earnings. If an equity security is determined to be other-than-temporarily impaired, the entire impairment is realized through a charge to earnings.

The Company's U.S. federal agency portfolio consists of securities issued by the government-sponsored agencies of the Federal Home Loan Mortgage Corporation ("FHLMC"), Federal National Mortgage Association ("FNMA") and Federal Home Loan Bank ("FHLB"). The receipt of principal and interest on U.S. federal agency obligations is guaranteed by the respective government-sponsored agency guarantor, such that the Company believes that its U.S. federal agency obligations do not expose the Company to credit-related losses. Based on these factors, along with the Company's intent to not sell the securities and its belief that it is more likely than not that the Company will not be required to sell the securities before recovery of their cost basis, the Company believes that the U.S. federal agency obligations identified in the tables above are temporarily impaired.

The Company's portfolio of municipal obligations consists of both tax-exempt and taxable general obligations securities issued by various municipalities. The Company does not intend to sell and it is more likely than not that the Company will not be required to sell its municipal obligations in an unrealized loss position until the recovery of its cost. Due to the issuers' continued satisfaction of the securities' obligations in accordance with their contractual terms and the expectation that they will continue to do so, the evaluation of the fundamentals of the issuers' financial condition and other objective evidence, the Company believes that the municipal obligations identified in the tables above are temporarily impaired.

The Company's mortgage-backed securities portfolio consists of securities underwritten to the standards of and guaranteed by the government-sponsored agencies of FHLMC, FNMA and the Government National Mortgage Association ("GNMA"). The receipt of principal, at par, and interest on mortgage-backed securities is guaranteed by the respective government-sponsored agency guarantor, such that the Company believes that its mortgage-backed securities do not expose the Company to credit-related losses. Based on these factors, along with the Company's intent to not sell the securities and the Company's belief that it is more likely than not that the Company will not be required to sell the securities before recovery of their cost basis, the Company believes that the mortgage-backed securities identified in the tables above are temporarily impaired.

It is reasonably possible that the fair values of the Company's investment securities could decline in the future if the overall economy and/or the financial condition of some of the issuers of these securities deteriorate and/or if the liquidity in markets for these securities declines. As a result, there is a risk that additional other-than-temporary impairments may occur in the future and any such amounts could be material to the Company's consolidated financial statements. The fair value of the Company's investment securities may continue to decline from further increases in market interest rates, as the market prices of these investments generally move inversely to market interest rates.

Maturities of investment securities at September 30, 2013 are as follows:

(Dollars in thousands)	Amortized cost		Estimated fair value	
Due in less than one year	$	13,952	$	13,998
Due after one year but within five years		139,556		140,149
Due after five years but within ten years		68,248		68,155
Due after ten years		9,609		9,507
Common stocks		602		1,064
Total	$	231,967	$	232,873

The preceding table includes scheduled principal payments and estimated prepayments, based on observable market inputs, for mortgage-backed securities, where actual maturities will differ from contractual maturities because borrowers have the right to prepay obligations with or without prepayment penalties.

Gross realized gains and losses on sales of available-for-sale investment securities are as follows:

(Dollars in thousands)	Three months ended September 30,				Nine months ended September 30,			
	2013		2012		2013		2012	
Realized gains	$	-	$	-	$	-	$	359
Realized losses		-		-		-		-
Total	$	-	$	-	$	-	$	359

Other investment securities primarily consist of restricted investments in FHLB and Federal Reserve Bank ("FRB") stock. The carrying value of the FHLB stock was $3.0 million at September 30, 2013 and $3.4 million at December 31, 2012. The carrying value of the FRB stock was $1.8 million at September 30, 2013 and December 31, 2012. These securities are not readily marketable and are required for regulatory purposes and borrowing availability. Since there is no available market value, these securities are carried at cost. Redemption of these investments at par value is at the option of the FHLB or FRB. Also included in other investment securities are other miscellaneous investments in the common stock of various correspondent banks which are held for borrowing purposes and totaled $113,000 at September 30, 2013 and December 31, 2012. The Company assessed the ultimate recoverability of these investments and believes that no impairment has occurred.

4. Loans and Allowance for Loan Losses

Loans consisted of the following as of:

(Dollars in thousands)	September 30, 2013	December 31, 2012
One-to-four family residential real estate	$ 95,759	$ 88,454
Construction and land	22,633	23,435
Commercial real estate	98,616	88,790
Commercial loans	54,951	64,570
Agriculture loans	33,166	31,935
Municipal loans	6,196	9,857
Consumer loans	13,307	13,417
Total gross loans	324,628	320,458
Net deferred loan costs and loans in process	21	37
Allowance for loan losses	(5,126)	(4,581)
Loans, net	$ 319,523	$ 315,914

The following tables provide information on the Company's allowance for loan losses by loan class and allowance methodology:

(Dollars in thousands)	Three and nine months ended September 30, 2013							
	One-to-four family residential real estate	Construction and land	Commercial real estate	Commercial loans	Agriculture loans	Municipal loans	Consumer loans	Total

The Company's key credit quality indicator is a loan's performance status, defined as accruing or non-accruing. Performing loans are considered to have a lower risk of loss. Non-accrual loans are those which the Company believes have a higher risk of loss. Loans are placed on non-accrual or are charged off at an earlier date if collection of principal or interest is considered doubtful. The accrual of interest on non-performing loans is discontinued at the time the loan is 90 days delinquent, unless the credit is well secured and in process of collection. There were no loans 90 days delinquent and accruing interest at September 30, 2013 or December 31, 2012. The following tables present information on the Company's past due and non-accrual loans by loan class:

(Dollars in thousands)	As of September 30, 2013					
	30-59 days delinquent and accruing	60-89 days delinquent and accruing	90 days or more delinquent and accruing	Total past due loans accruing	Non-accrual loans	Total

The Company's impaired loans decreased from $14.6 million at December 31, 2012 to $13.6 million at September 30, 2013. The difference between the unpaid contractual principal and the impaired loan balance is a result of charge-offs recorded against impaired loans. The difference in the Company's non-accrual loan balances and impaired loan balances at September 30, 2013 and December 31, 2012, was related to troubled debt restructurings ("TDR") that are current and accruing interest, but still classified as impaired. The following tables present information on impaired loans:

(Dollars in thousands)	As of September 30, 2013						
	Unpaid contractual principal	Impaired loan balance	Impaired loans without an allowance	Impaired loans with an allowance	Related allowance recorded	Year-to-date average loan balance	Year-to-date interest income recognized
One-to-four family residential real estate	$ 1,483	$ 1,193	$ 699	$ 494	$ 86	$ 1,224	$ -

Consumer loans	18	18	3	15	15	20	-
Total impaired loans	$ 16,618	$ 14,594	$ 10,329	$ 4,265	$ 901	$ 15,758	$ 344

At September 30, 2013, the Company had eight loan relationships consisting of twelve outstanding loans that were classified as TDRs compared to eight relationships consisting of thirteen outstanding loans at December 31, 2012. During the first nine months of 2013, the Company classified a $278,000 commercial real estate loan as a TDR after modifying the loan payments to interest only in order to allow the borrower additional time to liquidate the properties securing the loan. Since the loan was adequately secured, no impairment was recorded against the principal as of September 30, 2013. During 2012, the Company classified a commercial loan relationship consisting of two commercial loans as a TDR after agreeing to extend the maturity of the loans while the borrower liquidated the business assets securing the loans. The loans were repaid in the first quarter of 2013 and resulted in a net charge-off of $6,000.

The Company evaluates each TDR individually and returns the loan to accrual status when a payment history is established after the restructuring and future payments are reasonably assured. There were no loans as of September

30, 2013 that had been modified as TDRs and then subsequently defaulted. At September 30, 2013, there were no commitments to lend additional funds to any loans classified as a TDR. As of September 30, 2013, the Company had $270,000 of allowance recorded against loans classified as TDRs compared to $521,000 recorded at December 31, 2012.

15

The following table presents information on loans that are classified as TDRs:

(Dollars in thousands)

	As of September 30, 2013			As of December 31, 2012		
	Number of loans	Non-accrual balance	Accruing balance	Number of loans	Non-accrual balance	Accruing balance
One-to-four family residential real estate	2	$ 438	$ 7	2	$ 485	$ 8
Construction and land	7	630	6,133	7	2,240	4,837
Commercial real estate	1	-	278	-	-	-
Commerical loans	-	-	-	2	196	-
Municipal loans	2	-	641	2	-	641
Total troubled debt restructurings	12	$ 1,068	$ 7,059	13	$ 2,921	$ 5,486

The Company services one-to-four family residential real estate loans for others with outstanding principal balances of $309.1 million and $263.5 million at September 30, 2013 and December 31, 2012, respectively. Gross service fee income related to such loans was $189,000 and $145,000 for the quarters ended September 30, 2013 and 2012, respectively, and is included in fees and service charges in the consolidated statements of earnings. Gross service fee income for the nine months ended September 30, 2013 and 2012 was $536,000 and $394,000, respectively.

The Company had a mortgage repurchase reserve of $418,000 at September 30, 2013 and December 31, 2012, which represents the Company's best estimate of probable losses that the Company has incurred related to the repurchase obligation of one-to-four family residential real estate loans previously sold or to reimburse investors for credit losses incurred on loans previously sold where a breach of the contractual representations and warranties occurred. Because the level of mortgage repurchase losses depends upon economic factors, investor demand strategies and other external conditions that may change over the life of the underlying loans, mortgage repurchase losses are difficult to estimate and require considerable judgment. The Company did not make any provisions or charge any losses against the reserve during the first nine months of 2013.

5. Earnings per Share

Basic earnings per share has been computed based upon the weighted average number of common shares outstanding during each period. Diluted earnings per share includes the effect of all potential common shares outstanding during each period. The shares used in the calculation of basic and diluted earnings per share are shown below:

(Dollars in thousands, except per share amounts)	Three months ended September 30,		Nine months ended September 30,	
	2013	2012	2013	2012
Net earnings	$ 1,285	$ 1,205	$ 4,134	$ 4,750
Weighted average common shares outstanding - basic (1)	2,935,833	2,922,435	2,928,243	2,922,207
Assumed exercise of stock options (1)	44,040	25,257	50,449	19,597
Weighted average common shares outstanding - diluted (1)	2,979,873	2,947,690	2,978,692	2,941,803
Net earnings per share (1):				
Basic	$ 0.44	$ 0.41	$ 1.41	$ 1.63
Diluted	$ 0.43	$ 0.41	$ 1.39	$ 1.61

(1) Share and per share values for the period ended September 30, 2012 have been adjusted to give effect to the 5% stock dividend paid during December 2012.

The diluted earnings per share computations for the three and nine months ended September 30, 2013 include all unexercised stock options, while the diluted earnings per share computations for the three and nine months ended September 30, 2012 exclude unexercised stock options of 65,914 and 152,195, respectively, because their inclusion would have been anti-dilutive to earnings per share.

6. Fair Value of Financial Instruments and Fair Value Measurements

The Company follows the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 820 "Fair Value Measurements and Disclosures," which defines fair value, establishes a framework for measuring fair value and expands the disclosures about fair value measurements. ASC Topic 820-10-55 requires the use of a hierarchy of fair value techniques based upon whether the inputs to those fair values reflect assumptions other market participants would use based upon market data obtained from independent sources or reflect the Company's own assumptions of market participant valuation. The Company applies FASB ASC 820 to certain nonfinancial assets and liabilities, which include foreclosed real estate, long-lived assets, goodwill, mortgage servicing rights and core deposit premium, which are recorded at fair value only upon impairment. The fair value hierarchy is as follows:

- Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.
- Level 2: Quoted prices for similar assets in active markets or quoted prices that contain observable inputs such as yield curves, volatilities, prepayment speeds and other inputs derived from market data.
- Level 3: Quoted prices in markets that are not active or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable.

Fair value estimates of the Company's financial instruments as of September 30, 2013 and December 31, 2012, including methods and assumptions utilized, are set forth below:

(Dollars in thousands)	As of September 30, 2013		As of December 31, 2012	
	Carrying amount	Estimated fair value	Carrying amount	Estimated fair value
Financial assets:				
Cash and cash equivalents	$ 12,130	$ 12,130	$ 14,920	$ 14,920

Other borrowings	24,534	22,074	21,541	19,273
Derivative financial instruments	43	43	28	28
Accrued interest payable	349	349	410	410

Methods and Assumptions Utilized

The carrying amount of cash and cash equivalents is considered to approximate fair value.

The Company's investment securities classified as available-for-sale include U.S. treasury securities, U.S. federal agency securities, municipal obligations, mortgage-backed securities, certificates of deposits and common stocks.

Quoted exchange prices are available for the Company's common stock investments, which are classified as Level 1. U.S. treasury securities are priced based on the active trading prices in U.S. treasury bills, bonds and notes and are classified as Level 1. U.S. federal agency securities and mortgage-backed obligations are priced utilizing industry-standard models that consider various assumptions, including time value, yield curves, volatility factors, prepayment speeds, default rates, loss severity, current market and contractual prices for the underlying financial instruments, as well as other relevant economic measures. Substantially all of these assumptions are observable in the marketplace, can be derived from observable data, or are supported by observable levels at which transactions are executed in the marketplace and are classified as Level 2. Municipal securities are valued using a type of matrix, or grid, pricing in which securities are benchmarked against U.S. treasury rates based on credit rating. These model and matrix measurements are classified as Level 2 in the fair value hierarchy. The Company's investments in FDIC-insured, fixed-rate certificates of deposits are valued using a net present value model that discounts the future cash flows at the current market rates and are classified as Level 2.

The Company’s other investment securities primarily include investments in FHLB and FRB stock, which are held for regulatory purposes. These investments generally have restrictions on the sale and/or liquidation of stock and the carrying value is approximately equal to fair value. Fair value measurements for these securities are classified as Level 3 based on the restrictions on sale and/or liquidation and related credit risk.

The estimated fair value of the Company’s loan portfolio is based on the segregation of loans by collateral type, interest terms, and maturities. The fair value is estimated based on discounting scheduled and estimated cash flows through maturity using an appropriate risk-adjusted yield curve to approximate current interest rates for each category. No adjustment was made to the interest rates for changes in credit risk of performing loans where there were no known credit concerns. Management segregates loans in appropriate risk categories. Management believes that the risk factor embedded in the interest rates along with the allowance for loan losses applicable to the performing loan portfolio results in a fair valuation of such loans. The fair values of impaired loans are generally based on market prices for similar assets determined through independent appraisals or discounted values of independent appraisals and brokers’ opinions of value. This method of estimating fair value is classified as Level 3 and does not incorporate the exit-price concept of fair value prescribed by ASC Topic 820.

Mortgage loans originated and intended for sale in the secondary market are carried at the lower of cost or estimated fair value, determined on an aggregate basis. The mortgage loan valuations are based on quoted secondary market prices for similar loans and are classified as Level 2.

The Company measures its mortgage servicing rights at the lower of amortized cost or fair value. Periodic impairment assessments are performed based on fair value estimates at the reporting date. The fair value of mortgage servicing rights is estimated based on a valuation model which calculates the present value of estimated future cash flows associated with servicing the underlying loans. The model incorporates assumptions that market participants use in estimating future net servicing income, including estimated prepayment speeds, market discount rates, cost to service, and other servicing income, including late fees. The fair value measurements are classified as Level 3.

The carrying amount of accrued interest receivable and payable is considered to approximate fair value and is classified as Level 3.

The estimated fair value of deposits with no stated maturity, such as non-interest-bearing demand deposits, savings, money market accounts, and NOW accounts, is equal to the amount payable on demand. The fair value of interest-bearing time deposits is based on the discounted value of contractual cash flows of such deposits. The discount rate is tied to the FHLB yield curve plus an appropriate servicing spread. Fair value measurements based on discounted cash flows are classified as Level 3. These fair values do not incorporate the value of core deposit intangibles which may be associated with the deposit base.

The fair value of advances from the FHLB and other borrowings is estimated using current yield curves for similar borrowings adjusted for the Company’s current credit spread, if applicable, and classified as Level 2.

The Company’s derivative financial instruments consist of interest rate lock commitments and corresponding forward sales contracts on mortgage loans held for sale. The fair values of these derivatives are based on quoted prices for similar loans in the secondary market. The market prices are adjusted by a factor, based on the Company’s historical data and its judgment about future economic trends, which considers the likelihood that a commitment will ultimately result in a closed loan. These instruments are classified as Level 2. The amounts are included in other assets or other liabilities on the consolidated balance sheets and gains on sales of loans in the consolidated statements of earnings.

The Company also includes interest rate swaps in derivative financial instruments. The fair values of these derivatives are based on valuation models that utilize readily observable market inputs. These instruments are classified as Level 2. The amounts are included in other assets or other liabilities on the consolidated balance sheets.

Off-Balance Sheet Financial Instruments

The fair value of letters of credit and commitments to extend credit is based on the fees currently charged to enter into similar agreements. The aggregate of these fees is not material.

Transfers

The Company did not transfer any assets or liabilities among levels during the nine months ended September 30, 2013 or during the year ended December 31, 2012.

Limitations

Fair value estimates are made at a specific point in time based on relevant market information and information about the financial instruments. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment, and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates. Fair value estimates are based on existing balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments.

Valuation Methods for Instruments Measured at Fair Value on a Recurring Basis

The following table represents the Company's financial instruments that are measured at fair value on a recurring basis at September 30, 2013 and December 31, 2012, allocated to the appropriate fair value hierarchy:

(Dollars in thousands)		As of September 30, 2013		
		Fair value hierarchy		
	Total	Level 1	Level 2	Level 3
Assets:				
Available-for-sale securities				
U. S. treasury securities	$ 500	$ 500	$ -	$ -
U. S. federal agency obligations	17,234	-	17,234	-
Municipal obligations, tax exempt	82,733	-	82,733	-
Municipal obligations, taxable	53,682	-	53,682	-
Mortgage-backed securities	70,917	-	70,917	-
Common stocks	1,064	1,064	-	-
Certificates of deposit	6,743	-	6,743	-
Other securities	4,832	-	-	4,832
Derivative financial instruments	230	-	230	-
Liabilities:				
Derivative financial instruments	$ 43	$ -	$ 43	$ -

(Dollars in thousands)		As of December 31, 2012		
		Fair value hierarchy		
	Total	Level 1	Level 2	Level 3
Assets:				
Available-for-sale securities				
U. S. federal agency obligations	$ 8,848	$ -	$ 8,848	$ -
Municipal obligations, tax exempt	77,286	-	77,286	-
Municipal obligations, taxable	38,142	-	38,142	-
Mortgage-backed securities	81,848	-	81,848	-

19

Changes in the fair value of available-for-sale securities are included in other comprehensive income to the extent the changes are not considered other-than-temporary impairments. Other-than-temporary impairment tests are performed on a quarterly basis and any decline in the fair value of an individual security below its cost that is deemed to be other-than-temporary results in a write-down of that security's cost basis.

Valuation Methods for Instruments Measured at Fair Value on a Nonrecurring Basis

The Company does not value its loan portfolio at fair value; however, adjustments are recorded on certain loans to reflect the impaired value on the underlying collateral. Collateral values are reviewed on a loan-by-loan basis through independent appraisals. Appraised values may be discounted based on management's historical knowledge, changes in market conditions and/or management's expertise and knowledge of the client and the client's business. Because many of these inputs are unobservable, the valuations are classified as Level 3. The carrying value of the Company's impaired loans was $13.6 million at September 30, 2013 and $14.6 million at December 31, 2012, with allocated allowances of $646,000 and $901,000, respectively.

The Company measures the fair value of its goodwill based on the Company's market capitalization with appropriate control premiums and valuation multiples, as compared to recent similar financial industry acquisition multiples, to estimate the fair value of the Company's single reporting unit. The fair value measurements are classified as Level 3. Core deposit intangibles are recognized at the time core deposits are acquired, using valuation techniques which calculate the present value of the estimated net cost savings relative to the Company's alternative costs of funds over the expected remaining economic life of the deposits. Subsequent evaluations are made when facts or circumstances indicate potential impairment may have occurred. The models incorporate market discount rates, estimated average core deposit lives and alternative funding rates. The fair value measurements are classified as Level 3.

Mortgage loans originated and intended for sale in the secondary market are carried at the lower of cost or estimated fair value, determined on an aggregate basis. The mortgage loan valuations are based on quoted secondary market prices for similar loans and are classified as Level 2.

Real estate owned includes assets acquired through, or in lieu of, foreclosure and land previously acquired for expansion. Real estate owned is initially recorded at the fair value of the collateral less estimated selling costs. Subsequent valuations are updated periodically and are based upon independent appraisals, third party price opinions or internal pricing models and are classified as Level 3.

The following table represents the Company's financial instruments that are measured at fair value on a non-recurring basis as of September 30, 2013 and December 31, 2012 allocated to the appropriate fair value hierarchy:

(Dollars in thousands)

		As of September 30, 2013 Fair value hierarchy			Total (losses)/
	Total	Level 1	Level 2	Level 3	gains

8. Impact of Recent Accounting Pronouncements

In February 2013, the FASB issued ASU No. 2013-02, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. The amendments require an entity to present, either in the income statement or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income, but only if the amount reclassified is required under GAAP to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required under GAAP to be reclassified in their entirety, an entity is required to cross-reference to other disclosures that provide additional detail about those amounts. This ASU became effective for annual and interim periods beginning January 1, 2013. Adoption of ASU 2013-02 did not have a significant impact on the Company's consolidated financial statements.

In July 2013, the FASB issued ASU No. 2013-11, Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or Tax Credit Carryforward Exists. To eliminate diversity in practice, ASU 2013-11 provides explicit guidance on the financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. This ASU is effective for annual and interim periods beginning after December 15, 2013. Adoption of ASU 2013-11 is not expected to have a significant impact on the Company's consolidated financial statements.

9. Subsequent Event

The Company announced the completion of the acquisition, by its wholly-owned subsidiary, Landmark National Bank, of Citizens Bank, National Association ("Citizens Bank") from First Capital Corporation, effective November 1, 2013. The purchase price consisted of cash of $1.3 million. The acquisition was effected through the merger of Citizens Bank with and into Landmark National Bank. As of October 31, 2013, Citizens Bank's assets and liabilities consisted primarily of investments of $56.5 million, loans of $100.6 million and deposits of $177.0 million. Based on preliminary estimates of the fair values of the net assets acquired, goodwill and other intangible assets are expected to be approximately $6.6 million. Such fair values will be finalized prior to December 31, 2013. The acquisition adds eight branches, located in Fort Scott, Iola, Kincaid, Lenexa, Mound City, Overland Park and Pittsburg, Kansas, to Landmark's existing branch network, giving Landmark a total of 30 offices in 23 communities across Kansas. Due to the timing of the acquisition, pro forma financial information was not available as of the date of this filing.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview. Landmark Bancorp, Inc. is a one-bank holding company incorporated under the laws of the State of Delaware and is engaged in the banking business through its wholly-owned subsidiary, Landmark National Bank. Landmark Bancorp is listed on the Nasdaq Global Market under the symbol "LARK". Landmark National Bank is dedicated to providing quality financial and banking services to its local communities. Our overall strategy includes continuing a tradition of quality assets while also emphasizing growth in our commercial and commercial real estate loan portfolios. We are committed to developing relationships with our borrowers and providing a total banking service.

Landmark National Bank is principally engaged in the business of attracting deposits from the general public and using such deposits, together with borrowings and other funds, to originate one-to-four family residential real estate, construction and land, commercial real estate, commercial, agriculture, municipal and consumer loans. Although not our primary business function, we also invest in certain investment and mortgage-related securities using deposits and other borrowings as funding sources.

Our results of operations depend generally on net interest income, which is the difference between interest income from interest-earning assets and interest expense on interest-bearing liabilities. Net interest income is affected by regulatory, economic and competitive factors that influence interest rates, loan demand and deposit flows. In addition, we are subject to interest rate risk to the degree that our interest-earning assets mature or reprice at different times, or at different speeds, than our interest-bearing liabilities. Our results of operations are also affected by non-interest income, such as service charges, loan fees and gains from the sale of newly originated loans and gains or losses on investments. Our principal operating expenses, aside from interest expense, consist of compensation and employee benefits, occupancy costs, professional fees, advertising, federal deposit insurance costs, data processing expenses, foreclosure and real estate owned expense and provision for loan losses.

We are significantly impacted by prevailing economic conditions including federal monetary and fiscal policies and federal regulations of financial institutions. Deposit balances are influenced by numerous factors such as competing investments, the level of income and the personal rate of savings within our market areas. Factors influencing lending activities include the demand for housing and interest rate pricing competition from other lending institutions.

Our business consists of ownership of Landmark National Bank, with its main office in Manhattan, Kansas and twenty one branch offices across the state of Kansas as of September 30, 2013. In August 2013, we entered into an agreement to acquire Citizens Bank, National Association ("Citizens Bank"). Citizens Bank has its main office in Fort Scott, Kansas and seven branches located in eastern Kansas. Citizens Bank, which was merged into Landmark National Bank on November 1, 2013, had approximately $185 million in assets.

Recent Regulatory Developments. In July 2013, the U.S. federal banking authorities approved the implementation of the Basel III regulatory capital reforms and issued rules effecting certain changes required by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the "Basel III Rules"). The Basel III Rules are applicable to all U.S. banks that are subject to minimum capital requirements, as well as to bank and savings and loan holding companies other than "small bank holding companies" (generally bank holding companies with consolidated assets of less than $500 million). The Basel III Rules not only increase most of the required minimum regulatory capital ratios, but they introduce a new Common Equity Tier 1 Capital ratio and the concept of a capital conservation buffer. The Basel III Rules also expand the definition of capital as in effect currently by establishing criteria that instruments must meet to be considered Additional Tier 1 Capital (Tier 1 Capital in addition to Common Equity) and Tier 2 Capital. A number of instruments that now generally qualify as Tier 1 Capital will not qualify, or their qualifications will change when the Basel III Rules are fully implemented. The Basel III Rules also permit banking organizations with less than $15.0 billion in assets to retain, through a one-time election, the existing treatment for accumulated other

comprehensive income, which currently does not affect regulatory capital. The Basel III Rules have maintained the general structure of the current prompt corrective action framework, while incorporating the increased requirements. The prompt corrective action guidelines were also revised to add the Common Equity Tier 1 Capital ratio. In order to be a "well-capitalized" depository institution under the new regime, a bank and holding company must maintain a Common Equity Tier 1 Capital ratio of 6.5% or more; a Tier 1 Capital ratio of 8% or more; a Total Capital ratio of 10% or more; and a leverage ratio of 5% or more. Generally, financial institutions become subject to the new Basel III Rules on January 1, 2015, with phase-in periods for many of the changes. Management is in the process of assessing the effect the Basel III Rules may have on the Company's and Landmark National Bank's capital positions and will monitor developments in this area.

Critical Accounting Policies. Critical accounting policies are those which are both most important to the portrayal of our financial condition and results of operations, and require our management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. Our critical accounting policies relate to the allowance for loan losses, valuation of real estate owned, valuation of investment securities and accounting for income taxes, all of which involve significant judgment by our management. Information about our critical accounting policies is included under Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our Annual Report on Form 10-K for the year ended December 31, 2012.

Summary of Results. During the third quarter of 2013, we recorded net earnings of $1.3 million, which was an increase from the $1.2 million of net earnings in the third quarter of 2012. In the first nine months of 2013, our net earnings were $4.1 million, a decline from the $4.8 million of net earnings recorded in the same period of 2012. The decline from our 2012 net earnings was primarily driven by a decline in gains on sales of loans, as one-to-four family residential mortgage loan originations volumes declined in the 2013 periods, as well higher non-interest expense. While our net interest income and net interest margin improved slightly during the third quarter of 2013, as compared to the same period of 2012, our net interest income was lower during the nine months ending September 30, 2013 as the low interest rate environment over the past year continued to compress our net interest margin. Further, gains on sale of investment securities contributed to higher net earnings during the first nine months of 2012, with no such gains occurring in the comparable periods of 2013.

The following table summarizes earnings and key performance measures for the periods presented.

(Dollars in thousands, except per share amounts)	Three months ended September 30,		Nine months ended September 30,	
	2013	2012	2013	2012
Net earnings:				
Net earnings	$ 1,285	$ 1,205	$ 4,134	$ 4,750
Basic earnings per share (1)	$ 0.44	$ 0.41	$ 1.41	$ 1.63
Diluted earnings per share (1)	$ 0.43	$ 0.41	$ 1.39	$ 1.61
Earnings ratios:				
Return on average assets (2)	0.80 %	0.74 %	0.87 %	1.00 %
Return on average equity (2)	8.19 %	7.69 %	8.72 %	10.40 %
Equity to total assets	10.03 %	9.77 %	10.03 %	9.77 %
Net interest margin (2) (3)	3.40 %	3.35 %	3.37 %	3.49 %
Dividend payout ratio	44.19 %	44.19 %	41.01 %	33.53 %

(1) Per share values for the periods ended September 30, 2012 have been adjusted to give effect to the 5% stock dividend paid during December 2012.
(2) Ratios have been annualized and are not necessarily indicative of the results for the entire year.
(3) Net interest margin is presented on a fully tax equivalent basis, using a 34% federal tax rate.

Interest Income. Interest income for the quarter ended September 30, 2013 decreased $166,000 to $5.3 million, a decrease of 3.0% as compared to the same period of 2012. Interest income on loans decreased $51,000, or 1.2%, to $4.1 million for the quarter ended September 30, 2013, due to lower tax equivalent yields earned on loans. Our average tax equivalent yield on loans decreased to 4.94% in the third quarter of 2013 from 5.32% in the same period of 2012. Partially offsetting the lower tax equivalent yields was an increase in our average loan balances, which increased to $330.1 million from $312.4 million over the same periods. Interest income on investment securities decreased $115,000, or 8.5%, to $1.2 million for the third quarter of 2013, as compared to $1.4 million in the same period of 2012. The decrease in interest income on investment securities was due to lower average balances and a decline in the tax equivalent yield on our investment securities portfolio. The average balance of investment securities declined from $252.2 million in the third quarter of 2012 to $241.3 million in the third quarter of 2013 while our

average yield declined from 2.61% to 2.53% over the same periods respectively.

Interest income for the nine months ended September 30, 2013 decreased $1.0 million to $15.7 million, a decrease of 6.2% as compared to the same period of 2012. Interest income on loans decreased $639,000, or 5.0%, to $12.0 million for the first nine months of 2013, due to lower tax equivalent yields earned on loans. Our average tax equivalent yield on loans decreased to 4.99% in the first nine months of 2013 from 5.44% in the same period of 2012. Partially offsetting the lower tax equivalent yields was an increase in our average loan balances, which increased to $325.1 million from $314.4 million over the same periods. Interest income on investment securities decreased $406,000, or 9.9%, to $3.7 million for the nine months ending September 30, 2013, as compared to the same period of 2012. The decrease in interest income on investment securities was due to a decline in the tax equivalent yield on our investment portfolio from 2.79% during the first nine months of 2013 to 2.59% during the same period of 2013. Also contributing to the lower income was a decline in our average balances of investment securities, which decreased from $237.3 million during the first nine months of 2012 to $234.5 million during the same period of 2013.

Interest Expense. Interest expense during the quarter ended September 30, 2013 decreased $233,000, or 24.2%, to $731,000 as compared to the same period of 2012. For the third quarter of 2013, interest expense on interest-bearing deposits decreased $213,000, or 40.6%, to $312,000 as a result of lower rates paid on our certificates of deposit, money market, NOW and savings accounts and lower average balances. Our average total cost of deposits declined from 0.47% during the third quarter of 2012 to 0.30% during the same period of 2013 as we were able to reprice our deposits lower in the current low rate environment. Our average interest-bearing deposit balances decreased from $443.2 million for the third quarter of 2012 to $418.2 million for the third quarter of 2013. For the third quarter of 2013, interest expense on borrowings decreased $20,000, or 4.6%, to $419,000 due to a lower average rate on our borrowings. Our average cost of borrowings decreased from 3.03% in the third quarter of 2012 to 2.49% in the same period of 2013. Partially offsetting the lower cost of borrowings was an increase in our average outstanding borrowings from $57.6 million in the third quarter of 2012 to $66.8 million in the same period of 2013.

Interest expense during the nine months ended September 30, 2013 decreased $734,000, or 24.3%, to $2.3 million as compared to $3.0 milliion in the same period of 2012. For the first nine months of 2013, interest expense on interest-bearing deposits decreased $648,000, or 38.3%, to $1.0 million as a result of lower rates paid on our certificates of deposit, money market, NOW and savings accounts and lower average balances. Our average total cost of deposits declined from 0.53% during the first nine months of 2012 to 0.33% during the same period of 2013 as we were able to reprice our deposits lower in the current low rate environment. Our average interest-bearing deposit balances decreased from $429.2 million for the first nine months of 2012 to $422.7 million for the first nine months of 2013. For the nine months ended September 30, 2013, interest expense on borrowings decreased $86,000, or 6.5%, to $1.2 million due to a lower average rate on our borrowings. Our average cost of borrowings decreased from 2.99% in the first nine months of 2012 to 2.67% in the same period of 2013. Partially offsetting the lower cost of borrowings was an increase in our average outstanding borrowings from $59.3 million in the first nine months of 2012 to $62.1 million in the same period of 2013.

Net Interest Income. Net interest income increased $67,000, or 1.5%, for the third quarter of 2013 to $4.6 million compared to the same period of 2012. The increase in net interest income resulted from an increase in our net interest margin, on a tax equivalent basis, to 3.40% during the third quarter of 2013 from 3.35% during the same period of 2012. Net interest margin increased primarily as a result of an increase in average loan balances. The higher tax equivalent yield on our loans, as compared to the yield on our investment securities and cash, contributed to our increase in net interest margin. Partially offsetting the higher average balances of loans was a decline in our average total interest-earning assets from $578.2 million in the third quarter of 2012 to $572.8 million in the third quarter of 2013 as our average balances of investment securities and cash declined.

Net interest income decreased $311,000, or 2.3%, for the first nine months of 2013 to $13.4 million compared to $13.7 million in the same period of 2012. The lower net interest income resulted from a decline in our net interest margin, on a tax equivalent basis, to 3.37% during the first nine months of 2013 compared to 3.49% during the same period of 2012. Net interest margin declined as we were unable to lower the costs of our interest-bearing liabilities to the extent necessary to offset the decline in our yields on assets in this low rate environment. Partially offsetting the lower net interest margin was an increase in average interest-earning assets from $564.4 million during the first nine months of 2012 to $570.4 million during the same period of 2013.

See the Average Assets/Liabilities and Rate/Volume tables at the end of Item 2 “Management’s Discussion and Analysis of Financial Condition” for additional details on asset yields, liability rates and net interest margin.

Provision for Loan Losses. We maintain, and our Board of Directors monitors, an allowance for losses on loans. The allowance is established based upon management's periodic evaluation of known and inherent risks in the loan portfolio, review of significant individual loans and collateral, review of delinquent loans, past loss experience, adverse situations that may affect the borrowers’ ability to repay, current and expected market conditions, and other factors management deems important. Determining the appropriate level of reserves involves a high degree of

management judgment and is based upon historical and projected losses in the loan portfolio and the collateral value or discounted cash flows of specifically identified impaired loans. Additionally, allowance policies are subject to periodic review and revision in response to a number of factors, including current market conditions, actual loss experience and management's expectations.

We recorded a $200,000 provision for loan losses during the third quarter of 2013 compared to $1.0 million in the same period of 2012. We recorded net loan recoveries of $21,000 during the third quarter of 2013 compared to net loan charge-offs of $105,000 during the same period of 2012. The higher provision for loan losses recorded in the third quarter of 2012 was principally associated with a $3.3 million land loan, which was classified as non-accrual and impaired after an updated appraisal indicated a significant decline in the value of the collateral securing the loan. The land loan was restructured during the fourth quarter of 2012.

Our provision for loan losses totaled $800,000 of during the first nine months of 2013 compared to $1.6 million during the same period of 2012. We recorded net loan charge-offs of $255,000 during the first nine months of 2013 compared to net loan charge-offs of $140,000 during the same period of 2012. The increase in charge-offs in the nine months ended September 30, 2013 was principally associated with liquidating the assets securing a previously identified and impaired $1.1 million commercial loan relationship, which was fully reserved as of December 31, 2012.

For further discussion of the allowance for loan losses, refer to the "Asset Quality and Distribution" section.

Non-interest Income. Total non-interest income decreased $436,000, or 13.6%, to $2.8 million in the third quarter of 2013 compared to $3.2 million in the same period of 2012. The decline in non-interest income was the result of a $579,000 decrease in gains on sales of loans as the volume of loans sold in the secondary market was lower in the third quarter of 2013 compared to a year earlier. Further increases in mortgage rates may further reduce our gains on sales of loans in future periods as the origination volumes associated with refinancing slows. Partially offsetting the decline in gains on sales of loans was a $103,000 increase in fees and service charges as a result of additional fees and service charges received on our deposit accounts and service fee income on one-to-four family residential real estate loans serviced for others. Bank owned life insurance income increased $33,000 in the third quarter of 2013, as compared to the same period of 2012, primarily as a result of the 2012 period including a penalty related to transferring certain of our policies to a different insurance company after our internal review identified credit quality concerns with the previous insurance company.

Total non-interest income decreased $959,000, or 10.8%, to $8.0 million in the first nine months of 2013 compared to $8.9 million in the same period of 2012. The decrease in non-interest income was primarily the result of a $1.3 million decrease in gains on sales of loans due to lower volumes of loans sold in the secondary market in the first nine months of 2013 as compared to the same period of 2012. Partially offsetting the decline in gains on sales of loans, was a $325,000 increase in fees and service charges as a result of additional fees and service charges received on our deposit accounts and service fee income on one-to-four family residential real estate loans serviced for others.

Investment Securities Gains, Net. We did not realize any gains or losses on our investment securities during the third quarter of 2013 or 2012.

During the first nine months of 2012, we recognized $359,000 in gains on sales of investment securities as a result of selling approximately $8.0 million of mortgage-backed investment securities. Partially offsetting the gains on sales of investment securities was a credit-related, other-than-temporary impairment loss of $63,000 recognized during the first quarter of 2012 on one of our investments in pooled trust preferred securities. We sold our portfolio of pooled trust preferred investment securities during the fourth quarter of 2012. No such gains or losses were realized during the first nine months of 2013.

Non-interest Expense. Non-interest expense increased $276,000, or 5.2%, to $5.5 million for the third quarter of 2013 compared to the same period of 2012. The increase in non-interest expense was primarily the result of increases of $186,000 in foreclosure and other real estate expense and $112,000 in professional fees. The increase in other real estate expense reflected losses associated with liquidating a substantial portion of our other real estate owned, while our professional fees increased as a result of costs associated with our acquisition of Citizens Bank. Other

non-interest expense increased by $108,000, primarily resulting from a cash fraud loss of $75,000, net of expected insurance recoveries of $315,000 that we have assessed as probable of collection. See Part I, Item 4. “Controls and Procedures” for further discussion of this cash fraud loss. Partially offsetting those increases was a $243,000 decline in amortization expense as a result of recording a $212,000 valuation allowance against our mortgage servicing rights during the third quarter of 2012 as an increase in mortgage rates decreased the estimated fair value of these assets as of September 30, 2012.

Non-interest expense increased $161,000, or 1.1%, to $15.3 million for the first nine months of 2013 compared to the same period of 2012. The increase in non-interest expense was primarily the result of an increase of $216,000 in foreclosure and other real estate expense, which reflected losses associated with liquidating a substantial portion of our other real estate owned. Other non-interest expense increased by $119,000, primarily as a result of the $75,000 net effect of the cash fraud loss noted above. In addition, our acquisition of The Wellsville Bank on April 1, 2012 contributed to increases of $185,000 in compensation and benefits, $76,000 in federal deposit insurance premiums and $65,000 in data processing. Partially offsetting those increases was a $429,000 decline in amortization expense. During the third quarter of 2012, we recorded a $212,000 valuation allowance against our mortgage servicing rights which increased amortization expense for nine months ending September 30, 2012. The valuation allowance was reversed during the second quarter of 2013 which reduced amortization expense for the nine months ending September 30, 2013.

Income Tax Expense. During the third quarter of 2013, we recorded income tax expense of $342,000, compared to $267,000 during the same period of 2012. Our effective tax rate increased from 18.1% in the third quarter of 2012 to 21.0% in the third quarter of 2013 as a result of higher earnings before income taxes, while tax-exempt income remained stable between the periods.

During the first nine months of 2013, we recorded income tax expense of $1.2 million, compared to $1.5 million during the same period of 2012. Our effective tax rate decreased from 23.6% in the first nine months of 2012 to 21.8% in the same period of 2013 as a result of lower earnings before income taxes, while tax-exempt income remained stable between the periods.

Financial Condition. Despite measured improvement in certain metrics, general uncertainty with respect to economic conditions in the United States continues to affect our asset quality and performance. Even though the geographic markets in which the Company operates have been impacted by these economic conditions in recent years, the effect has not been as severe as those experienced in some areas of the United States. In addition, our loan portfolio is diversified across various types of loans and collateral throughout the markets in which we operate. Despite a few lingering problem loans that management is working to resolve, our asset quality has generally improved over the past few years. Outside of identified problem assets, management believes that it continues to have a high quality asset base and solid core earnings, and anticipates that its efforts to run a high quality financial institution with a sound asset base will continue to create a strong foundation for continued growth and profitability in the future.

Asset Quality and Distribution. Our primary investing activities are the origination of commercial real estate, commercial, agriculture and consumer loans and the purchase of investment and mortgage-backed securities. Total assets increased to $630.1 million at September 30, 2013, compared to $614.1 million at December 31, 2012. Net loans, excluding loans held for sale, increased to $319.5 million at September 30, 2013 from $315.9 million at December 31, 2012. The $3.6 million increase in loans was primarily the result higher outstanding balances of commercial real estate, one-to-four family residential real estate and agriculture loans. Partially offsetting those increases were lower balances in our commercial, municipal, consumer and construction and land loans. The decline in these loan balances is the result of multiple factors, including reduced loan demand from our customers, seasonal factors and early payoffs. Generally, we originate fixed-rate, residential mortgage loans with maturities in excess of ten years for sale in the secondary market. These loans are typically sold soon after the loan closing. We also retain some of our newly originated one-to-four family residential real estate loans that meet internal criteria as well as secondary market qualifications. We typically only retain loans with maturities of 15 years or less. While we do not intend to significantly increase our one-to-four family residential real estate loan portfolio, we are currently continuing to slow the normal runoff of the portfolio by retaining some of the new loan originations to offset weak commercial loan demand; however, most of the new loan originations will still be sold. We do not originate and warehouse these fixed-rate residential loans for resale in order to speculate on interest rates.

The allowance for loan losses is established through a provision for loan losses based on our evaluation of the risk inherent in the loan portfolio and changes in the nature and volume of our loan activity. This evaluation, which includes a review of all loans with respect to which full collectability may not be reasonably assured, considers the fair value of the underlying collateral, economic conditions, historical loan loss experience, level of classified loans and other factors that warrant recognition in providing for an appropriate allowance for loan losses. At September 30, 2013, our allowance for loan losses totaled $5.1 million, or 1.58% of gross loans outstanding, as compared to $4.6 million, or 1.43% of gross loans outstanding, at December 31, 2012.

Loans past due 30-89 days and still accruing interest totaled $1.2 million, or 0.37% of gross loans at September 30, 2013 compared to $2.2 million, or 0.69% of gross loans, at December 31, 2012. At September 30, 2013, $6.5 million in loans were on non-accrual status, or 2.01% of gross loans, compared to a balance of $9.1 million, or 2.84% of gross loans, at December 31, 2012. Non-accrual loans consist of loans 90 or more days past due and certain impaired

loans. The decrease in non-accrual loans was principally associated with two loans. During the second quarter of 2013, a $1.5 million land loan was returned to accrual status after a payment history was established based on the terms of the TDR that occurred in 2012. Also reducing our non-accrual loan balances was the pay down of a $1.1 million commercial loan with proceeds from the liquidation of the borrower's assets in the first quarter of 2013. The remaining loan balance of $192,000 was charged off during the first quarter of 2013. There were no loans 90 days delinquent and still accruing interest at September 30, 2013 or December 31, 2012. Our impaired loans totaled $13.6 million at September 30, 2013 compared to $14.6 million at December 31, 2012. The difference in the Company's non-accrual loan balances and impaired loan balances at September 30, 2013 was related to TDRs that are current but still classified as impaired. We recorded net loan charge-offs of $255,000 during the first nine months of 2013 compared to net loan charge-offs of $140,000 during the same period of 2012. The increase in charge-offs in the nine months ended September 30, 2013 was principally associated with liquidating the assets securing a previously identified and impaired $1.1 million commercial loan relationship, which was fully reserved as of December 31, 2012.

At September 30, 2013, the Company had eight loan relationships consisting of twelve outstanding loans totaling $8.1 million that were classified as TDRs compared to eight relationships consisting of thirteen outstanding loans totaling $8.4 million at December 31, 2012. During the first nine months of 2013, the Company classified a $278,000 commercial real estate loan as a TDR after modifying the loan payments to interest only in order to allow the borrower additional time to liquidate the properties securing the loan. Since the loan was adequately secured, no impairment was recorded against the principal as of September 30, 2013.

During 2012, the Company classified a commercial loan relationship consisting of two commercial loans as a TDR after agreeing to extend the maturity of the loans while the borrower liquidated the business assets securing the loans. The loans were repaid in the first quarter of 2013 and resulted in a net charge-off of $6,000.

As part of our credit risk management, we continue to manage the loan portfolio to identify problem loans and have placed additional emphasis on commercial real estate and construction and land relationships. We are working to resolve the remaining problem credits or move the non-performing credits out of the loan portfolio. At September 30, 2013, we had $455,000 of real estate owned compared to $2.4 million at December 31, 2012. As of September 30, 2013, real estate owned primarily consisted of a few residential real estate properties. The decline in real estate owned during the first nine months of 2013 was principally associated with the sale of a residential subdivision development, a commercial real estate building and land previously acquired by Landmark National Bank for expansion. The Company is currently marketing all of the other properties in real estate owned.

Many financial institutions, including us, experienced a general increase in non-performing assets during recent years, as even well-established business borrowers developed cash flow, profitability and other business-related problems as a result of economic conditions. While we believe that our allowance for loan losses at September 30, 2013 and December 31, 2012 was appropriate, there can be no assurances that loan losses will not exceed the estimated amounts. We believe that we use the best information available to determine the allowance for loan losses; however, unforeseen market conditions could result in adjustment to the allowance for loan losses. In addition, net earnings could be significantly affected if circumstances differ substantially from the assumptions used in establishing the allowance for loan losses. Deterioration in the local economy or real estate values may create additional problem loans for us and require further adjustment to our allowance for loan losses.

Liability Distribution. Our primary ongoing sources of funds are deposits, FHLB borrowings, proceeds from principal and interest payments on loans and investment securities and proceeds from the sale of mortgage loans and investment securities. While maturities and scheduled amortization of loans are a predictable source of funds, deposit flows and mortgage prepayments are greatly influenced by general interest rates and economic conditions. We experienced a $16.6 million increase in total deposits during the first nine months of 2013, to $499.1 million at September 30, 2013, from $482.5 million at December 31, 2012. The growth occurred in our non-interest-bearing demand, money market and NOW and savings accounts, while our time deposit balances declined. Total borrowings increased $265,000 to $60.2 million at September 30, 2013, from $60.0 million at December 31, 2012.

Non-interest-bearing deposits at September 30, 2013 were $87.4 million, or 17.5% of deposits, compared to $75.9 million, or 15.7%, at December 31, 2012. Money market and NOW deposit accounts were 40.8% of our deposit portfolio and totaled $203.4 million at September 30, 2013, compared to $190.3 million, or 39.5%, at December 31, 2012. Savings accounts increased to $51.1 million, or 10.2% of deposits, at September 30, 2013, from $45.4 million, or 9.4%, at December 31, 2012. Certificates of deposit decreased to $157.1 million, or 31.5% of deposits, at September 30, 2013, from $170.9 million, or 35.4%, at December 31, 2012.

Certificates of deposit at September 30, 2013, which are scheduled to mature in one year or less, totaled $100.3 million. Historically, maturing deposits have generally remained with our bank and we believe that a significant portion of the deposits maturing in one year or less will remain with us upon maturity.

Cash Flows. During the nine months ended September 30, 2013, our cash and cash equivalents decreased by $2.8 million. Our operating activities provided net cash of $9.5 million during the first nine months of 2013. Our investing activities used net cash of $27.8 million during the first nine months of 2013 as we purchased investment securities with our excess liquidity and our outstanding loan balances increased. Financing activities provided net cash of $15.5 million during the first nine months of 2013 as a result of increased deposits.

Liquidity. Our most liquid assets are cash and cash equivalents and investment securities available for sale. The levels of these assets are dependent on the operating, financing, lending and investing activities during any given period. These liquid assets totaled $245.0 million at September 30, 2013 and $228.2 million at December 31, 2012. During periods in which we are not able to originate a sufficient amount of loans and/or periods of high principal prepayments, we increase our liquid assets by investing in short-term, high-grade investments.

Liquidity management is both a daily and long-term function of our strategy. Excess funds are generally invested in short-term investments. In the event we require funds beyond our ability to generate them internally, additional funds are generally available through the use of FHLB advances, a line of credit with the FHLB, other borrowings or through sales of investment securities. At September 30, 2013, we had outstanding FHLB advances of $35.7 million and no borrowings against our line of credit with the FHLB. At September 30, 2013, we had collateral pledged to the FHLB that would allow us to borrow an additional $12.3 million, subject to FHLB credit requirements and policies. At September 30, 2013, we had no borrowings through the Federal Reserve discount window, while our borrowing capacity was $14.8 million. We also have various other fed funds agreements, both secured and unsecured, with correspondent banks totaling approximately $50.0 million under which we had no outstanding borrowings at September 30, 2013. We had other borrowings of $24.5 million at September 30, 2013, which included $16.5 million of subordinated debentures and $8.0 million in repurchase agreements. The Company has a $7.5 million line of credit from an unrelated financial institution maturing on November 1, 2014, with an interest rate that adjusts daily based on the prime rate plus 0.25%, but not less than 3.75%. This line of credit has covenants specific to capital and other financial ratios, which the Company was in compliance with at September 30, 2013. There was no outstanding balance on the line of credit at September 30, 2013.

Off Balance Sheet Arrangements. As a provider of financial services, we routinely issue financial guarantees in the form of financial and performance standby letters of credit. Standby letters of credit are contingent commitments issued by us generally to guarantee the payment or performance obligation of a customer to a third party. While these standby letters of credit represent a potential outlay by us, a significant amount of the commitments may expire without being drawn upon. We have recourse against the customer for any amount the customer is required to pay to a third party under a standby letter of credit. The letters of credit are subject to the same credit policies, underwriting standards and approval process as loans made by us. Most of the standby letters of credit are secured, and in the event of nonperformance by the customers, we have the right to the underlying collateral, which could include commercial real estate, physical plant and property, inventory, receivables, cash and marketable securities. The contract amount of these standby letters of credit, which represents the maximum potential future payments guaranteed by us, was $1.1 million at September 30, 2013.

At September 30, 2013, we had outstanding loan commitments, excluding standby letters of credit, of $58.1 million. We anticipate that sufficient funds will be available to meet current loan commitments. These commitments consist of unfunded lines of credit and commitments to finance real estate loans.

Capital. Current regulatory capital regulations require financial institutions (including banks and bank holding companies) to meet certain regulatory capital requirements. Institutions are required to have minimum leverage capital equal to 4% of total average assets and total qualifying capital equal to 8% of total risk weighted assets in order to be considered “adequately capitalized.” As of September 30, 2013 and December 31, 2012, both the Company and Landmark National Bank were rated “well capitalized,” which is the highest rating available under the regulatory capital regulations framework for prompt corrective action. Management believes that as of September 30, 2013, the Company and Landmark National Bank met all capital adequacy requirements to which we are subject.

The following is a comparison of the Company's regulatory capital to minimum capital requirements at September 30, 2013 and December 31, 2012:

(Dollars in thousands)	Actual Amount	Ratio	For capital adequacy purposes Amount	Ratio	To be well-capitalized under prompt corrective action provisions Amount	Ratio
As of September 30, 2013						
Leverage	$ 65,359	10.41 %	$ 25,103	4.00 %	$ 31,379	5.00 %
Tier 1 Capital	$ 65,359	17.28 %	$ 15,129	4.00 %	$ 22,693	6.00 %
Total Risk Based Capital	$ 70,301	18.59 %	$ 30,257	8.00 %	$ 37,822	10.00 %
As of December 31, 2012						
Leverage	$ 61,839	10.09 %	$ 24,504	4.00 %	$ 30,631	5.00 %
Tier 1 Capital	$ 61,839	16.39 %	$ 15,092	4.00 %	$ 22,638	6.00 %
Total Risk Based Capital	$ 67,273	17.83 %	$ 30,184	8.00 %	$ 37,731	10.00 %

The following is a comparison of Landmark National Bank's regulatory capital to minimum capital requirements at September 30, 2013 and December 31, 2012:

(Dollars in thousands)	Actual Amount	Ratio	For capital adequacy purposes Amount	Ratio	To be well-capitalized under prompt corrective action provisions Amount	Ratio
As of September 30, 2013						
Leverage	$ 64,133	10.25 %	$ 25,025	4.00 %	$ 31,282	5.00 %
Tier 1 Capital	$ 64,133	17.03 %	$ 15,066	4.00 %	$ 22,598	6.00 %

As of December 31, 2012						
Leverage	$ 60,463	9.90 %	$ 24,433	4.00 %	$ 30,541	5.00 %
Tier 1 Capital	$ 60,463	16.09 %	$ 15,029	4.00 %	$ 22,543	6.00 %
Total Risk Based Capital	$ 65,124	17.33 %	$ 30,057	8.00 %	$ 37,571	10.00 %

Dividends. During the quarter ended September 30, 2013, we paid a quarterly cash dividend of $0.19 per share to our stockholders.

The payment of dividends by any financial institution or its holding company is affected by the requirement to maintain adequate capital pursuant to applicable capital adequacy guidelines and regulations. As described above, Landmark National Bank exceeded its minimum capital requirements under applicable guidelines as of September 30, 2013. The National Bank Act imposes limitations on the amount of dividends that a national bank may pay without prior regulatory approval. Generally, the amount is limited to the bank's current year's net earnings plus the adjusted retained earnings for the two preceding years. As of September 30, 2013, approximately $5.7 million was available to be paid as dividends to the Company by Landmark National Bank without prior regulatory approval.

Additionally, our ability to pay dividends is limited by the subordinated debentures that are held by two business trusts that we control. Interest payments on the debentures must be paid before we pay dividends on our capital stock, including our common stock. We have the right to defer interest payments on the debentures for up to 20 consecutive

quarters. However, if we elect to defer interest payments, all deferred interest must be paid before we may pay dividends on our capital stock.

(4)

Net interest margin represents annualized, tax-equivalent net interest income divided by average interest-earning assets.

Rate/Volume Table. The following table describes the extent to which changes in tax equivalent interest income and interest expense for major components of interest-earning assets and interest-bearing liabilities affected the Company's interest income and expense for periods indicated. The table distinguishes between (i) changes attributable to rate (changes in rate multiplied by prior volume), (ii) changes attributable to volume (changes in volume multiplied by prior rate), and (iii) net change (the sum of the previous columns). The net changes attributable to the combined effect of volume and rate that cannot be segregated have been allocated proportionately to the change due to volume and the change due to rate.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our assets and liabilities are principally financial in nature and the resulting net interest income thereon is subject to changes in market interest rates and the mix of various assets and liabilities. Interest rates in the financial markets affect our decision on pricing our assets and liabilities, which impacts net interest income, a significant cash flow source for us. As a result, a substantial portion of our risk management activities relates to managing interest rate risk.

Our Asset/Liability Management Committee monitors the interest rate sensitivity of our balance sheet using earnings simulation models. We have set policy limits of interest rate risk to be assumed in the normal course of business and monitor such limits through our simulation process.

We have been successful in meeting the interest rate sensitivity objectives set forth in our policy. Simulation models are prepared to determine the impact on net interest income for the coming twelve months, including one using rates at September 30, 2013, and forecasting volumes for the twelve-month projection. This position is then subjected to a shift in interest rates of 100 and 200 basis points with an impact to our net interest income on a one-year horizon as follows:

Scenario	Dollar change in net interest income ($000's)	Percent change in net interest income
200 basis point rising	$ 566	3.1 %
100 basis point rising	$ 311	1.7 %
100 basis point falling	$ (807)	(4.4) %
200 basis point falling	NM	NM

The 200 basis point falling scenario is considered to be not meaningful ("NM") in the current low rate environment.

32

Safe Harbor Statement Under the Private Securities Litigation Reform Act of 1995

Forward-Looking Statements

This document (including information incorporated by reference) contains, and future oral and written statements by us and our management may contain, forward-looking statements, within the meaning of such term in the Private Securities Litigation Reform Act of 1995, with respect to our financial condition, results of operations, plans, objectives, future performance and business. Forward-looking statements, which may be based upon beliefs, expectations and assumptions of our management and on information currently available to management, are generally identifiable by the use of words such as “believe,” “expect,” “anticipate,” “plan,” “intend,” “estimate,” “may,” “will “could,” “should” or other similar expressions. Additionally, all statements in this document, including forward-looking statements, speak only as of the date they are made, and we undertake no obligation to update any statement in light of new information or future events.

Our ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors which could have a material adverse effect on operations and future prospects by us and our subsidiaries include, but are not limited to, the following:

- The strength of the United States economy in general and the strength of the local economies in which we conduct our operations which may be less favorable than expected and may result in, among other things, a deterioration in the credit quality and value of our assets.
- The effects of, and changes in, federal, state and local laws, regulations and policies affecting banking, securities, insurance and monetary and financial matters (including the Dodd-Frank Wall Street Reform and Consumer Protection Act and the rules and regulations promulgated thereunder, as well as rules recently adopted by the federal bank regulatory agencies to implement Basel III) and the effects of increases in FDIC premiums.
- The effects of changes in interest rates (including the effects of changes in the rate of prepayments of our assets) and the policies of the Board of Governors of the Federal Reserve System.
- Our ability to compete with other financial institutions as effectively as we currently intend due to increases in competitive pressures in the financial services sector.
- Our inability to obtain new customers and to retain existing customers.
- The timely development and acceptance of products and services, including products and services offered through alternative delivery channels such as the Internet.
- Technological changes implemented by us and by other parties, including third party vendors, which may be more difficult or more expensive than anticipated or which may have unforeseen consequences to us and our customers.
- Our ability to develop and maintain secure and reliable electronic systems.
- Our ability to retain key executives and employees and the difficulty that we may experience in replacing key executives and employees in an effective manner.
- Consumer spending and saving habits which may change in a manner that affects our business adversely.
- Our ability to successfully integrate acquired businesses and future growth.
- The costs, effects and outcomes of existing or future litigation.
- Changes in accounting policies and practices, as may be adopted by state and federal regulatory agencies and the Financial Accounting Standards Board.
- The economic impact of past and any future terrorist attacks, acts of war or threats thereof, and the response of the United States to any such threats and attacks.
- Our ability to effectively manage our credit risk.
- Our ability to forecast probable loan losses and maintain an adequate allowance for loan losses.
- The effects of declines in the value of our investment portfolio.
- Our ability to raise additional capital if needed.
- The effects of declines in real estate markets.

These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Additional information concerning us and our business, including other factors that could materially affect our financial results, is included in our filings with the Securities and Exchange Commission, including the “Risk Factors” section in our Form 10-K.

ITEM 4. CONTROLS AND PROCEDURES

An evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) promulgated under the Securities and Exchange Act of 1934, as amended) as of September 30, 2013. Based on that evaluation, the Company's management, including the Chief Executive Officer and Chief Financial Officer, concluded that, as of September 30, 2013, the Company's disclosure controls and procedures were not effective because of the material weakness described below.

During the three months ended September 30, 2013, the Company's management discovered an instance of employee fraud resulting in the loss of an aggregate $390,000 of vault cash at one of the Company's branches over an extended period of time. The employee suspected of perpetrating this fraud is no longer with the Company, and, as of the date of this report, the Company is continuing its investigation into this matter. As a result of the discovery, the Company recorded a $75,000 loss in its consolidated financial statements as of September 30, 2013, representing the $390,000 gross loss, net of expected insurance proceeds of $315,000. The Company determined that any adjustments relating to prior-period financial statements were immaterial.

Although the employee fraud noted above was ultimately discovered as a result of high-level controls in place at the Company, management determined that the operation of the Company's controls related to cash reconcilement and accounting was not effective to ensure consistent application of established policies and procedures, including those designed to detect or prevent certain unauthorized, fraudulent transactions, and that such deficiency constituted a material weakness in the Company's internal control over financial reporting. The Company promptly took steps to enhance its cash controls and procedures to remediate such material weakness, including, among other things, the adoption of clarifying revisions to existing policies to aid in their effective implementation, adjustments to the level of precision at which the controls operate, enhancements to the segregation of certain duties, and additional communication from senior management regarding effective application of existing controls and procedures. In addition to these remedial measures, the Company performed a cash count at all of its branches utilizing the enhanced controls and procedures to ensure that cash totals reconciled to its financial statements.

Management has discussed these remedial actions with the Audit Committee of the Company's board of directors and, as of the date of this report, anticipates that these measures will strengthen the Company's internal control over financial reporting to the extent necessary to remedy the material weakness described above. However, because of the nature of certain of these remedial actions, their operational effectiveness may only be validated over a period of time. Accordingly, their successful implementation will continue to be observed and evaluated before management is able to conclude that the material weakness has been remediated. The Company cannot give assurances that these remedial actions will be successful or that it will not in the future identify further material weaknesses or significant deficiencies in the Company's internal control over financial reporting that have not been discovered to date.

Other than as discussed above, there were no changes in the Company's internal control over financial reporting during the quarter ended September 30, 2013 that materially affected or were reasonably likely to materially affect the Company's internal control over financial reporting.

LANDMARK BANCORP, INC. AND SUBSIDIARY
PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

There are no material pending legal proceedings to which the Company or its subsidiaries is a party or which any of their property is subject, other than ordinary routine litigation incidental to their respective businesses.

ITEM 1A. RISK FACTORS

There have been no material changes in the risk factors applicable to the Company from those disclosed in Part I, Item 1A. "Risk Factors," in the Company's 2012 Annual Report on Form 10-K.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS
