**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

September 30, 2016

(unaudited)

The Kentucky First Federal Bancorp (“Kentucky First” or the “Company”) was incorporated under federal law in March 2005, and is the mid-tier holding company for First Federal Savings and Loan Association of Hazard, Hazard, Kentucky (“First Federal of Hazard”) and Frankfort First Bancorp, Inc. (“Frankfort First”). Frankfort First is the holding company for First Federal Savings Bank of Kentucky, Frankfort, Kentucky (“First Federal of Kentucky”). First Federal of Hazard and First Federal of Kentucky (hereinafter collectively the “Banks”) are Kentucky First’s primary operations, which consist of operating the Banks as two independent, community-oriented savings institutions.

In December 2012, the Company acquired CKF Bancorp, Inc., a savings and loan holding company which operated three banking locations in Boyle and Garrard Counties in Kentucky. In accounting for the transaction the assets and liabilities of CKF Bancorp were recorded on the books of First Federal of Kentucky in accordance with accounting standard ASC 805, Business Combinations.

1. Basis of Presentation

The accompanying unaudited consolidated financial statements, which represent the consolidated balance sheets and results of operations of the Company, were prepared in accordance with the instructions for Form 10-Q and, therefore, do not include information or footnotes necessary for a complete presentation of financial position, results of operations and cash flows in conformity with U.S. generally accepted accounting principles. However, in the opinion of management, all adjustments (consisting of only normal recurring adjustments) which are necessary for a fair presentation of the consolidated financial statements have been included. The results of operations for the three-month period ended September 30, 2016, are not necessarily indicative of the results which may be expected for an entire fiscal year. The consolidated balance sheet as of June 30, 2016 has been derived from the audited consolidated balance sheet as of that date. Certain information and note disclosures normally included in the Company’s annual financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted. These consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company’s Form 10-K annual report for 2016 filed with the Securities and Exchange Commission.

**Principles of Consolidation** - The consolidated financial statements include the accounts of the Company, Frankfort First, and its wholly-owned banking subsidiaries, First Federal of Hazard and First Federal of Kentucky. All intercompany transactions and balances have been eliminated in consolidation.

**Reclassifications** - Certain amounts presented in prior periods have been reclassified to conform to the current period presentation. Such reclassifications had no impact on prior years' net income or shareholders' equity.

**2. Earnings Per Share**

Diluted earnings per share is computed taking into consideration common shares outstanding and dilutive potential common shares to be issued or released under the Company's share-based compensation plans. The factors used in the basic and diluted earnings per share computations follow:

	<b>Three months ended</b>	
(in thousands)	<b>September 30,</b>	
	2016	2015
Net income allocated to common shareholders, basic and diluted	\$ 297	\$ 538

**3. Investment Securities (continued)**

The Company's equity securities consist of Federal Home Loan Mortgage Company (FHLMC or Freddie Mac) stock, while our debt securities consist of agency bonds and mortgage-backed securities. Mortgage-backed securities do not have a single maturity date. The amortized cost and fair value of held-to-maturity debt securities are shown by contractual maturity. Securities not due at a single maturity date are shown separately.

(in thousands)	September 30, 2016	
	Amortized Cost	Fair Value
Held-to-maturity Securities		
Within one year	\$ 1,517	\$ 1,518
One to five years	—	—
Mortgage-backed	1,906	1,976
	\$ 3,423	\$ 3,494

Our pledged securities totaled \$1.2 and \$1.7 million at September 30, 2016, and June 30, 2016, respectively. The Company had \$1.0 million and \$500,000 in time deposits in other financial institutions pledged at September 30, 2016, and June 30, 2016, respectively.

There were no sales of investment securities during the three month periods ended September 30, 2016 and 2015.

We evaluated securities in unrealized loss positions for evidence of other-than-temporary impairment, considering duration, severity, financial condition of the issuer, our intention to sell or requirement to sell. Those securities were agency bonds, which carry a very limited amount of risk. Also, we have no intention to sell nor feel that we will be compelled to sell such securities before maturity. Based on our evaluation, no impairment has been recognized through earnings.

**Troubled Debt Restructurings:**

A Troubled Debt Restructuring (“TDR”) is the situation where the Bank grants a concession to the borrower that the Bank would not otherwise have considered due to the borrower’s financial difficulties. All TDRs are considered “impaired.” At September 30, 2016 and June 30, 2016, the Company had \$1.8 million of loans classified as TDRs. Of the TDRs at September 30, 2016, approximately 26.5% were related to the borrowers’ completion of Chapter 7 bankruptcy proceedings with no reaffirmation of the debt to the Banks.

The following table presents TDR’s by loan type at September 30, 2016 and June 30, 2016, and their performance, by modification type:

**Credit Quality Indicators:**

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. The Company analyzes loans individually by classifying the loans as to credit risk. This analysis is performed on an annual basis. The Company uses the following definitions for risk ratings:

**Special Mention.** Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position at some future date.

**Substandard.** Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

**Doubtful.** Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable.

Loans not meeting the criteria above that are analyzed individually as part of the above-described process are considered to be pass rated loans. Loans listed that are not rated are included in groups of homogeneous loans and are evaluated for credit quality based on performing status. See the aging of past due loan table above. As of September

**5. Disclosures About Fair Value of Assets and Liabilities**

ASC topic 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC topic 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

**Level 1** - Quoted prices in active markets for identical assets or liabilities.

**Level 2** - Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in active markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

**Level 3** – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Following is a description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy.

### **Securities**

Where quoted market prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. If quoted market prices are not available, then fair values are estimated by using pricing models, quoted prices of securities with similar characteristics. Level 2 securities include agency mortgage-backed securities.

**Impaired Loans**

At the time a loan is considered impaired, it is evaluated for loss based on the fair value of collateral securing the loan if the loan is collateral dependent. If a loss is identified, a specific allocation will be established as part of the allowance for loan losses such that the loan's net carrying value is at its estimated fair value. Impaired loans carried at fair value generally receive specific allocations of the allowance for loan losses. For collateral-dependent loans, fair value is commonly based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value. Non-real estate collateral may be valued using an appraisal, net book value per the borrower's financial statements, or aging reports, adjusted or discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and management's expertise and knowledge of the client and client's business, resulting in a Level 3 fair value classification. Impaired loans are evaluated on a quarterly basis for additional impairment and adjusted accordingly.

**Other Real Estate**

Assets acquired through or instead of loan foreclosure are initially recorded at fair value less costs to sell when acquired, establishing a new cost basis. These assets are subsequently accounted for at lower of cost or fair value less estimated costs to sell. Fair value is commonly based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.

Land	79	Sales comparison approach	Adjustments for differences between comparable sales	3.5% to 6.6% (5.0%)

The following is a disclosure of the fair value of financial instruments, both assets and liabilities, whether or not recognized in the consolidated balance sheet, for which it is practicable to estimate that value. For financial instruments where quoted market prices are not available, fair values are based on estimates using present value and other valuation methods.

The methods used are greatly affected by the assumptions applied, including the discount rate and estimates of future cash flows. Therefore, the fair values presented may not represent amounts that could be realized in an exchange for certain financial instruments.

**5. Disclosures About Fair Value of Assets and Liabilities (continued)**

The following methods were used to estimate the fair value of all other financial instruments at September 30, 2016 and June 30, 2016:

Cash and cash equivalents and interest-bearing deposits: The carrying amounts presented in the consolidated statements of financial condition for cash and cash equivalents are deemed to approximate fair value.

Held-to-maturity securities: For held-to-maturity securities, fair value is estimated by using pricing models, quoted price of securities with similar characteristics, which is level 2 pricing for the other securities.

Loans held for sale: Loans originated and intended for sale in the secondary market are determined by FHLB pricing schedules.

Loans: The loan portfolio has been segregated into categories with similar characteristics, such as one- to four-family residential, multi-family residential and nonresidential real estate. These loan categories were further delineated into fixed-rate and adjustable-rate loans. The fair values for the resultant loan categories were computed via discounted cash flow analysis, using current interest rates offered for loans with similar terms to borrowers of similar credit quality. For loans on deposit accounts and consumer and other loans, fair values were deemed to equal the historic carrying values. The fair values of the loans does not necessarily represent an exit price.

Loans receivable represents the Company's most significant financial asset, which is in Level 3 for fair value measurements. A third party provides financial modeling for the Company and results are based on assumptions and factors determined by management.

Federal Home Loan Bank stock: It is not practicable to determine the fair value of FHLB stock due to restrictions placed on its transferability.

Accrued interest receivable: The carrying amount is the estimated fair value.

Deposits: The fair value of NOW accounts, passbook accounts, and money market deposits are deemed to approximate the amount payable on demand. Fair values for fixed-rate certificates of deposit have been estimated using a discounted cash flow calculation using the interest rates currently offered for deposits of similar remaining maturities.

Federal Home Loan Bank advances: The fair value of these advances is estimated using the rates currently offered for similar advances of similar remaining maturities or, when available, quoted market prices.

Advances by borrowers for taxes and insurance and accrued interest payable: The carrying amount presented in the consolidated statement of financial condition is deemed to approximate fair value.

Commitments to extend credit: For fixed-rate and adjustable-rate loan commitments, the fair value estimate considers the difference between current levels of interest rates and committed rates. The fair value of outstanding loan commitments at September 30, 2016 and June 30, 2016, was not material.

**ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (continued)**

Discussion of Financial Condition Changes from June 30, 2016 to September 30, 2016

**Assets:** At September 30, 2016, the Company's assets totaled \$295.1 million, an increase of \$3.2 million, or 1.1%, from total assets at June 30, 2016. This increase was attributed primarily to increases in loans, cash and cash equivalents and time deposits in other financial institutions.

**Cash and cash equivalents:** Cash and cash equivalents increased \$538,000 or 4.1% to \$13.6 million at September 30, 2016, primarily as we seek to maintain the appropriate level of liquidity. Our strategy is to balance our need for liquidity to meet day-to-day operational cash flows against keeping too much idle cash on hand. We keep a minimum of 8.0% of our liquidity base for normal cash flow needs and borrow short-term using FHLB advances when cash is low. Likewise, we pay down FHLB advances with any excess funds we might have.

**Time Deposits in Other Financial Institutions:** Time deposits in other financial institutions increased \$988,000 or 26.6% to \$4.7 million at September 30, 2016, as we seek to earn a higher interest rate on short-term liquidity.

**Investment securities:** Investment securities decreased \$665,000 or 15.8% to \$3.5 million at September 30, 2016, due to maturity of a \$500,000 agency bond and cash flows associated with mortgage-backed securities.

**Loans:** Loans receivable, net, increased by \$2.8 million or 1.2% to \$241.2 million at September 30, 2016. Management continues to look for high-quality loans to add to its portfolio and will continue to emphasize loan originations to the extent that it is profitable, prudent and consistent with our interest rate risk strategies.

**Non-Performing and Classified Loans:** At September 30, 2016, the Company had non-performing loans (loans 90 or more days past due or on nonaccrual status) of approximately \$8.7 million, or 3.6% of total loans (including loans purchased in the acquisition), compared to \$7.1 million or 2.9%, of total loans at June 30, 2016. The Company's allowance for loan losses totaled \$1.5 million at both September 30, 2016, and June 30, 2016. The allowance for loan losses at September 30, 2016, represented 16.9% of nonperforming loans and 0.6% of total loans (including loans

purchased in the acquisition), while at June 30, 2016, the allowance represented 21.2% of nonperforming loans and 0.6% of total loans.

The Company had \$12.8 million in assets classified as substandard for regulatory purposes at September 30, 2016, including loans (\$12.5 million) and real estate owned (“REO”) (\$345,000), including loans acquired in the CKF Bancorp transaction. Classified loans as a percentage of total loans (including loans acquired on December 31, 2012) were 5.1% at both September 30, 2016 and June 30, 2016. Of substandard loans at September 30, 2016, 99.8% were secured by real estate on which the Banks have priority lien position.

AND RESULTS OF OPERATIONS (continued)**Discussion of Financial Condition Changes from June 30, 2016 to September 30, 2016 (continued)

The table below shows the aggregate amounts of our assets classified for regulatory purposes at the dates indicated:

(dollars in thousands)    September 30, 2016    June 30, 2016

Substandard assets	\$ 12,833	\$ 13,015
Doubtful assets	—	—
Loss assets	—	—
Total classified assets	\$ 12,833	\$ 13,015

At September 30, 2016, the Company's real estate acquired through foreclosure represented 2.7% of substandard assets compared to 4.0% at June 30, 2016. During the three months ended September 30, 2016, the Company sold property with carrying value of \$239,000 for \$357,000, while during the year ended June 30, 2016, property with a carrying value of \$727,000 was sold for \$822,000. During the three months ended September 30, 2016, the Company made a \$110,000 loan to facilitate the purchase of its other real estate owned by qualified borrowers, while for the fiscal year ended June 30, 2016, \$741,000 in loans to facilitate an exchange were made. The Company defers recognition of any gain on loans to facilitate an exchange until the proper time in the future. Loans to facilitate the sale of other real estate owned, which were included in substandard loans, totaled \$372,000 and \$375,000 at September 30, 2016 and June 30, 2016, respectively.

**Kentucky First Federal Bancorp****ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (continued)**Discussion of Financial Condition Changes from June 30, 2016 to September 30, 2016 (continued)

The following table presents the aggregate carrying value of REO at the dates indicated:

	September 30, 2016		June 30, 2016	
	Number of Properties	Net Carrying Value	Number of Properties	Net Carrying Value
Single family, non-owner occupied	5	\$ 345	5	\$ 445
Building lot	2	—	3	82
Total REO	7	\$ 345	8	\$ 527

At September 30, 2016, and June 30, 2016, the Company had \$7.1 million and \$7.3 million of loans classified as special mention, respectively (including loans purchased at December 31, 2012.) This category includes assets which do not currently expose us to a sufficient degree of risk to warrant classification, but do possess credit deficiencies or potential weaknesses deserving our close attention. The primary reason for this decrease was related to two larger borrowers who each experienced some weakness in cash flow, but had no delinquency and their loans were well secured by real estate.

**Liabilities:** At September 30, 2016, the Company's liabilities increased \$3.3 million, or 1.5%, to \$227.6 million compared to total liabilities at June 30, 2016, primarily as a result of an increase in advances, which increased \$5.9 million or 17.9% to \$39.1 million at September 30, 2016. The increase in advances was used to fund the growth in assets and to partially offset a decrease of \$3.1 million or 1.6% in deposits, which totaled \$185.5 million at quarter end. Deposit customers continue seeking higher yields on their funds after growing impatient in the current low-rate environment and some are turning to non-insured investments. As deposits have continued to decrease, we have utilized short-term FHLB advances as replacement funding.

**Shareholders' Equity:** At September 30, 2016, the Company's shareholders' equity totaled \$67.5 million, a decrease of \$28,000 from the June 30, 2016 total. The change in shareholders' equity was chiefly associated with net profits for the

period less dividends paid on common stock.

**ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (continued)**

Discussion of Financial Condition Changes from June 30, 2016 to September 30, 2016 (continued)

The Company paid dividends of \$372,000 or 125.3% of net income for the three month period just ended. On July 7, 2016, the members of First Federal MHC for the fifth time approved a dividend waiver on annual dividends of up to \$0.40 per share of Kentucky First Federal Bancorp common stock. The Board of Directors of First Federal MHC applied for approval of another waiver. The Federal Reserve Bank of Cleveland has notified the Company that there would be no objection to a waiver of dividends paid by the Company to First Federal MHC, and, as a result, First Federal MHC will be permitted to waive the receipt of dividends for quarterly dividends up to \$0.10 per common share through the third quarter of 2017. Management believes that the Company has sufficient capital to continue the current dividend policy without affecting the well-capitalized status of either subsidiary bank. Management cannot speculate on future dividend levels, because various factors, including capital levels, income levels, liquidity levels, regulatory requirements and overall financial condition of the Company are considered before dividends are declared. However, management continues to believe that a strong dividend is consistent with the Company's long-term capital management strategy. See "Risk Factors" in Part II, Item 1A, of the Company's Annual Report on Form 10-K for the year ended June 30, 2016 for additional discussion regarding dividends.

Comparison of Operating Results for the Three Month Periods Ended September 30, 2016 and 2015

General

Net income totaled \$297,000 for the three months ended September 30, 2016, a decrease of \$241,000 or 44.8% from net income of \$538,000 for the same period in 2015. The net decrease in net earnings for the recently-ended quarter was primarily attributable to lower net interest income, higher non-interest expense and higher income tax expense.

Net Interest Income

## Edgar Filing: Kentucky First Federal Bancorp - Form 10-Q

Net interest income after provision for loan losses decreased \$166,000 or 6.3% to \$2.5 million for the three month period just ended compared to \$2.6 million for the prior year quarter primarily due to reduced interest income. Interest income decreased \$195,000 or 6.5% to \$2.8 million for the quarter ended September 30, 2016, while interest expense decreased \$22,000 or 6.3% to \$328,000 for the quarter just ended after amortization of fair value adjustments on interest bearing accounts. Provision for losses on loans decreased \$7,000 to \$4,000 for the recently-ended quarter compared to a provision of \$11,000 in the prior year period.

Interest income on loans decreased \$199,000 or 6.9% to \$2.7 million, due primarily to a decrease in the average rate earned on the loan portfolio, which decreased 24 basis points to 4.46% for the recently ended quarter compared to the prior year period. The average balance of loans outstanding for the three month period ended September 30, 2016, decreased \$4.8 million or 2.0% to \$241.5 million. Interest income on mortgage-backed securities and other securities was largely unchanged, while interest-bearing deposits and other increased \$4,000 or 6.3% to \$68,000 for the three months ended September 30, 2016, due to higher balances of time deposits in other financial institutions during the recently-ended quarter.

**ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS (continued)**

Comparison of Operating Results for the Three Month Periods Ended September 30, 2016 and 2015

(continued)

Interest expense on deposits decreased \$33,000 or 11.8% and totaled \$247,000 for the three month period ended September 30, 2016, while interest expense on borrowings increased \$11,000 or 15.7% to \$81,000 for the most recently ended period. The decrease in interest expense on deposits was attributed to a decrease in both the average balance of deposits and the average rate paid on deposits. The average balance of deposits decreased \$11.4 million or 5.8% to \$183.7 million for the most recent quarter, while the average rate paid on deposits decreased 3 basis points to 0.54%. The decrease in average deposits was primarily attributed to rate-sensitive deposit customers withdrawing funds to seek additional yield as the historically low interest rate environment continues. The increase in interest expense on borrowings also was attributed to higher outstanding balances of FHLB advances, which were used increase total assets and to offset deposit funding. The average balance of outstanding borrowings increased \$7.3 million or 26.2% to \$35.2 million for the quarter ended September 30, 2016, compared to \$27.9 million for the prior year quarterly period. The average rate paid on borrowings decreased 8 basis points to 92 basis points for the recently ended quarter.

Net interest margin decreased 22 basis points from 3.93% for the prior year quarterly period to 3.71% for the quarter ended September 30, 2016.

Provision for Losses on Loans

The Company recorded \$4,000 in provision for losses on loans during the three months ended September 30, 2016, compared to a \$11,000 provision for the three months ended September 30, 2015. There can be no assurance that the loan loss allowance will be adequate to absorb unidentified losses on loans in the portfolio, which could adversely affect the Company's results of operations.

Non-interest Income

Non-interest income totaled \$168,000 for the three months ended September 30, 2016, an increase of \$54,000 or 47.4% from the same period in 2015 due primarily to positive experience with other real estate owned (“REO”). Net gains on sales of REO totaled \$73,000 for the quarter just ended compared to \$16,000 for the prior year quarter, an increase of \$57,000 period over period. The Company recorded a write-down on REO during the year ago quarter of \$18,000, compared to no write-down on REO in the current year period. There were no sales of loans during the recently ended quarter compared to gain on sale of loans of \$19,000 for the three months ended September 30, 2015. There were no sales of investments during the three month periods ended September 30, 2016 and 2015.

#### Non-interest Expense

Non-interest expense increased \$103,000 or 5.0% and totaled \$2.2 million for the three months ended September 30, 2016 compared to \$2.1 million for the same period in 2015.

Employee compensation and benefits increased \$65,000 or 5.1% and totaled \$1.3 million for the quarterly period, primarily due to higher levels of compensation expense, retirement contributions and fringe benefits. Employee compensation increased \$31,000 quarter over quarter as the Company employed two more full-time equivalent staff during the recently-ended period compared to the prior year, while pension contributions accounted for \$23,000 of the increase and the balance was primarily related to increased employee benefits. The Company participates in a multiple-employer pension plan and, like most sponsors of defined benefit plans, is faced with increasing costs associated with the plans. Contributions to the defined benefit pension plan totaled \$174,000 and \$151,000 for the three months ended September 30, 2016 and 2015, respectively.

**Kentucky First Federal Bancorp**

**ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION**

**AND RESULTS OF OPERATIONS (continued)**

Occupancy and equipment expense increased \$34,000 or 23.0% to \$182,000 for the quarter just ended primarily due to increased costs associated with newly-acquired bank offices in Hazard and Frankfort.

Other non-interest expense increased \$19,000 or 7.5% to \$271,000 for the three months ended September 30, 2016, primarily due to increased advertising and communication costs incurred by the Company. Advertising expense totaled \$53,000 for the quarter recently ended as the Company seeks to develop top-of-mind awareness in its local markets, while communications charges increased \$24,000 or 85.7% to \$52,000 for the quarter ended recently to provide faster data transfer speeds. Somewhat offsetting the increased employee compensation, occupancy and equipment and other non-interest expenses were decreases in legal and outside service fees. Legal fees decreased \$16,000 or 55.2% to \$13,000 for the quarter ended September 30, 2016, while outside service fees decreased \$7,000 or 14.6% to \$41,000 for the quarter recently ended.

Federal Income Tax Expense

Federal income taxes expense increased \$26,000 or 19.4% and totaled \$160,000 for the three months ended September 30, 2016, compared to \$134,000 in the prior year quarter primarily due to the reversal of an ASC 740 reserve related to a previously received federal tax refund in the prior year period. The effective tax rates were 35.0% and 19.9% for the three-month periods ended September 30, 2016 and 2015, respectively.
